Exhibit 99.1

AMERISERV FINANCIAL REPORTS EARNINGS FOR THE FOURTH QUARTER AND FULL YEAR OF 2014 AND DECLARES QUARTERLY COMMON STOCK DIVIDEND

JOHNSTOWN, PA AmeriServ Financial, Inc. (NASDAQ: ASRV) reported fourth quarter 2014 net income available to common shareholders of \$697,000, or \$0.04 per diluted common share. This compares to net income available to common shareholders of \$1,789,000, or \$0.09 per diluted common share, reported for the fourth quarter of 2013. For the year ended December 31, 2014, the Company reported net income available to common shareholders of \$2,813,000, or \$0.15 per diluted share. This represented a 42.3% decline in earnings per share from the full year 2013 where net income available to common shareholders totaled \$4,984,000 or \$0.26 per diluted common share. The following table highlights the Company's financial performance for both quarters and years ended December 31, 2014 and 2013:

	Fourth Quarter 2014	Fourth Quarter 2013	Year Ended December 31, 2014	Year Ended December 31, 2013
Net income	\$749,000	\$1,841,000	\$3,023,000	\$5,193,000
Net income available to common shareholders	\$697,000	\$1,789,000	\$2,813,000	\$4,984,000
Diluted earnings per share	\$ 0.04	\$ 0.09	\$ 0.15	\$0.26

Jeffrey A. Stopko, Interim President and Chief Executive Officer, commented on the fourth quarter 2014 financial results: Our fourth quarter 2014 results included a \$400,000 pension charge related to 25 employees who elected to participate in an early retirement incentive program. Since the majority of these retired employees will not be replaced, the Company expects to achieve meaningful salary and benefits expense savings in 2015. I was also pleased that we were able to grow net interest income by \$1.2 million in 2014 due to continued growth of our loan portfolio while maintaining excellent asset quality. Overall, AmeriServ Financial enters 2015 with a strong balance sheet that is well positioned for future growth.

The Company's net interest income in the fourth quarter of 2014 increased by \$134,000 from the prior year's fourth quarter and for the full year 2014 increased by \$1,183,000, or 3.6%, when compared to the full year 2013. The Company's net interest margin of 3.52% for the full year 2014 was four basis points lower than the net interest margin of 3.56% for the full year 2013. The Company has been able to mitigate this net interest margin pressure and to

increase net interest income by both growing its earning assets and reducing its cost of funds. Specifically, the earning asset growth has occurred in the loan portfolio as total loans averaged a record \$805 million for the full year 2014 which is \$58 million, or 7.8%, higher than the \$746 million average for the 2013 year. This loan growth reflects the successful results of the Company's more intensive sales calling efforts, with an emphasis on generating commercial loans and owner occupied commercial real estate loans, which qualify as Small Business Lending Fund (SBLF) loans.

As a result of this growth in SBLF qualified loans, the Company has locked in the lowest preferred dividend rate available under the program of 1% until the first quarter of 2016. Interest income in 2014 has also benefitted from reduced premium amortization on mortgage backed securities due to slower mortgage prepayment speeds. Overall, total interest income has increased by \$1,098,000 in 2014. Total interest expense for the 2014 year declined by \$85,000 from the full year 2013 due to the Company's proactive efforts to reduce deposit costs. Even with this reduction in deposit costs, the Company still experienced growth in deposits which reflects the loyalty of our core deposit base and ongoing efforts to cross sell new loan customers into deposit products. Specifically, total deposits averaged a record level of \$872 million for the full year 2014 which is \$25 million, or 3.0%, higher than the \$847 million average for the full year 2013. This decreased interest expense for deposits has been partially offset by a \$190,000 increase in the interest cost for borrowings as the Company has utilized more FHLB term advances to extend borrowings and provide protection against rising interest rates.

The Company recorded a \$375,000 provision for loan losses in the fourth quarter of 2014 compared to a negative provision for loan losses of \$1.0 million recognized in the fourth quarter of 2013. This represents an unfavorable swing of \$1,375,000 between periods and is the largest factor contributing to the lower fourth quarter earnings in 2014. The positive provision in the fourth quarter of 2014 was needed to cover net loan charge-offs and support the continuing growth of the loan portfolio. The large negative provision in the fourth quarter of 2013 resulted from the release of reserves due to the pay-off of a large classified loan and a continued reduction in the level of criticized loans and non-performing assets. For the full year 2014, the Company also recorded a \$375,000 provision for loan losses compared to a \$1.1 million negative provision for the 2013 year. The Company experienced net loan charge-offs of \$334,000, or 0.16% of total loans, in the fourth quarter of 2014 compared to net loan charge-offs of \$80,000, or 0.04% of total loans, in the fourth quarter of 2013. However, for the full year 2014 actual credit losses realized through net charge-offs totaled \$856,000, or 0.11% of total loans, which represents a decrease from the 2013 year when net charge-offs totaled \$1.4 million, or 0.18% of total loans. Overall, for the 2014 year, the Company continued to maintain outstanding asset quality. At December 31, 2014, non-performing assets totaled \$2.9 million, or only 0.35% of total loans, which represents the first time that our non-performing assets have been under \$3 million since 2007.

When determining the provision for loan losses, the Company considers a number of factors, some of which include periodic credit reviews, non-performing assets, loan delinquency and charge-off trends, concentrations of credit, loan volume trends and broader local and national economic trends. In summary, the allowance for loan losses provided a strong 400% coverage of non-performing loans, and 1.16% of total loans, at December 31, 2014, compared to 327% coverage of non-performing loans, and 1.29% of total loans, at December 31, 2013.

Total non-interest income in the fourth quarter of 2014 decreased by \$307,000 from the prior year's fourth quarter and for the full year 2014 decreased by \$1.4 million, or 9.0%, when compared to the full year 2013. The primary factors causing the fourth quarter 2014 decline were a \$93,000 decrease in deposit service charges and a \$61,000 decrease in trust and investment advisory fees. The decline in deposit service charges was due to fewer overdraft charges and account analysis fees as customers have generally maintained higher balances in their checking accounts in 2014. The decline in trust and investment advisory fees was caused by the loss of certain clients at our investment advisory subsidiary due to the departure of the former chief executive officer of that business line earlier in 2014. The largest factor contributing to the \$1.4 million decline in non-interest income for the full year 2014 was reduced revenue from residential mortgage banking activities due to lower refinance activity as a result of higher mortgage rates and reduced purchase activity, particularly in the first quarter of 2014. This caused gains realized on residential mortgage loan

sales into the secondary market and other mortgage related fees to decrease by a total of \$525,000 for the 2014 year. Other factors contributing to the non-interest income decline for the full year 2014 included a \$249,000 decrease in bank owned life insurance revenue due largely to the receipt of a death claim in 2013, a \$226,000 reduction in financial services commission revenue, and a net unfavorable swing of \$140,000 on other real estate owned property transactions.

Total non-interest expense in the fourth quarter of 2014 increased by \$24,000 from the prior year's fourth quarter and for the full year 2014 increased by \$1.1 million, or 2.7%, when compared to the full year 2013. The item responsible for the fourth quarter 2014 increase was a \$400,000 pension charge related to 25 employees who elected to participate in an early retirement incentive program. Without this charge, non-interest expense would have declined in the fourth quarter of 2014 as savings from our previously announced profitability improvement program are beginning to take hold. The largest factors contributing to the \$1.1 million increase in non-interest expense for the full year 2014 included a \$669,000 goodwill impairment charge and a \$1.1 million increase in professional fees. As previously disclosed, the Company recorded the goodwill impairment charge in the third quarter of 2014 as a loss of clients caused a reduction in the projected earnings capacity of our investment advisory subsidiary. The increased professional fees in 2014 were due to higher legal costs related to litigation against the former CEO of our investment advisory subsidiary, the consulting costs associated with our profitability improvement project and new recurring costs related to outsourcing our computer operations and statement processing to a third party vendor. The overall cost savings benefit from outsourcing these services is captured in lower personnel costs in these departments and reduced software expense, which is a key factor contributing to the decline in other expenses of \$541,000 for the full year 2014. Finally, the Company recorded an income tax expense of \$1.6 million, or an effective tax rate of 34.6%, for the 2014 year compared to income tax expense of \$2.3 million, or an effective tax rate of 30.6%, for the 2013 year. The higher effective tax rate in 2014 was primarily due to the non-deductibility of the goodwill impairment charge for tax purposes.

The Company had total assets of \$1.09 billion, shareholders' equity of \$114 million, a book value of \$4.97 per common share and a tangible book value of \$4.33 per common share at December 31, 2014. The Company continued to maintain strong capital ratios that exceed the regulatory defined well capitalized status with a risk based capital ratio of 14.80%, an asset leverage ratio of 11.34% and a tangible common equity to tangible assets ratio of 7.56% at December 31, 2014.

QUARTERLY COMMON STOCK DIVIDEND

The Company also announced that its Board of Directors declared a \$0.01 per share quarterly common stock cash dividend. The cash dividend is payable February 17, 2015 to shareholders of record on February 2, 2015. This cash dividend represents a 1.3% annualized yield using the January 13, 2015 closing common stock price of \$3.02. For the full year 2014, the Company's dividend payout ratio was 26.7%.
