

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

R F INDUSTRIES LTD
Form 10KSB
February 01, 2002

SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-KSB

Annual Report Under Section 13 or 15(d) of
The Securities Exchange Act of 1934

For the fiscal year ended October 31, 2001

Commission File Number 0-13301

RF INDUSTRIES, LTD.

(Name of small business issuer in its charter)

Nevada 88-0168936
(State of Incorporation) (I.R.S. Employer Identification No.)

7610 Miramar Road, Bldg. 6000 San Diego, California 92126-4202

(Address of principal executive offices) (Zip Code)

(858) 549-6340 FAX (858) 549-6345

(Registrant's telephone number, including area code)
Securities registered pursuant to Section 12(b) of the Act: None.

Securities registered pursuant to Section
12(g) of the Act:
Common Stock, \$.01 par value.

Check whether the issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes X No

Check if there is no disclosure of delinquent filers in response to Item 405 of Regulation S-B is not contained in this form, and no disclosure will be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-KSB or any amendment to this Form 10-KSB.

Yes X No

The issuer's revenues for the year ended October 31, 2001 were \$9,481,889.

The approximate aggregate market value of the voting stock held by non-affiliates of the registrant as of December 31, 2001, based on the average of the closing bid and asked prices of one share of the Common Stock of the Company, as reported on December 31, 2001 was \$9,428,488. As of December 31, 2001, the registrant had 3,409,354 outstanding shares of common stock, \$.01 par value.

Documents Incorporated By Reference

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

Certain portions of the registrant's Proxy Statement for the 2002 annual meeting of shareholders to be filed with the Securities and Exchange Commission pursuant to Regulation 14A, not later than 120 days after the close of the registrant's fiscal year, are incorporated by reference under Part III of this Form 10-KSB.

Number of Pages/ Index to Exhibits

This Form 10-KSB consists of a total of 24 pages. The Index to Exhibits can be found on page 22.

PART I

Forward-Looking Statements:

Certain statements in this Annual Report on Form 10-KSB, and other oral and written statements made by the Company from time to time are "forward looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, including those that discuss strategies, goals, outlook or other non-historical matters, or projected revenues, income, returns or other financial measures. In some cases forward-looking statements can be identified by terminology such as "may," "will," "should," "except," "plan," "anticipate," "believe," "estimate," "predict," "potential" or "continue," the negative of such terms or other comparable terminology. These forward-looking statements are subject to numerous risks and uncertainties that may cause actual results to differ materially from those contained in such statements. Among the most important of these risks and uncertainties is the ability of the Company to continue to source raw materials from its suppliers.

Important factors which may cause actual results to differ materially from the forward looking statements are described in the Section entitled "Risk Factors" in the Form 10-KSB, and other risks identified from time to time in the Company's filings with the Securities and Exchange Commission, press releases and other communications. The Company assumes no obligation to update these forward-looking statements to reflect actual results or changes in factors or assumptions affecting such forward-looking statements.

ITEM 1. BUSINESS

General:

RF Industries, Ltd. (hereinafter the "Company") is a provider of interconnect products and systems for radio frequency (RF) communications products and wireless digital transmission systems. Since its acquisition of Bioconnect, Inc. in December 2000, the Company has also commenced manufacturing and selling specialized electrical cabling and interconnect products to the medical monitoring market. The Company currently conducts its operations through three divisions known as (i) the RF Connector Division, (ii) the Neulink Division, and (iii) the Bioconnect Division. For financial accounting purposes, the Company considers these Divisions to be three separate business units.

The Company's principal executive office is located at 7610 Miramar Road, Building #6000, San Diego, California. The Company was incorporated in the State of Nevada on November 1, 1979, completed its initial public offering in March 1984 under the name Celltronics, Inc. and changed its name to RF Industries, Ltd. in November 1990. Unless the context requires otherwise, references to the

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

"Company" in this report include RF Industries, Ltd. and its divisions and wholly-owned subsidiaries.

RF Connector Division

The RF Connector Division, is engaged in the design, manufacture and distribution of coaxial connectors used in radio frequency (RF) wireless and digital transmission communication applications, such as base stations, cellular telephones, personal computers (PCs), test instruments, LANs (Local Area Networks), and antenna devices. Coaxial connector products consist primarily of connectors which, when attached to a coaxial cable, facilitates the transmission of RF signals in various radio frequency products. Most of the connectors are designed to fit standard products. However, the Company also sells custom connectors specifically designed and manufactured to suit its customers' requirements. The majority of the Company's RF connectors are manufactured for the Company by third party foreign manufacturers located in Asia. The Company has been designing, producing and selling coaxial connectors since 1987. In 2000 the RF Connector Division introduced fiber optic connectors.

The RF Connector Division also is engaged in the manufacturing and distribution of RF cable assemblies for coaxial cable. These cable assemblies consist of various types of coaxial cable that are attached to connectors (usually the Company's connectors) for use in numerous communications products. Cable assemblies are manufactured at the Company's California offices and are sold to distributors or directly to major OEM (Original Equipment Manufacturer) accounts. Cable assemblies consist of both standard cable assemblies and assemblies that are custom manufactured for the Company's clients. The Company offers a standard cable assembly line with over 60,000 cable assemblies. RF Cable Assembly generated approximately 22% of the RF Connector Division's gross revenues during the fiscal year ended October 31, 2001.

The RF Connector Division generated approximately 89.5% of the Company's gross revenues during the fiscal year ended October 31, 2001.

RF Neulink Division

The RF Neulink Division designs and manufactures, through outside contractors, wireless data products commonly known as RF data links and wireless modems. These radio modems and receivers provide high-speed wireless connections over longer distances where wire connections may not be desirable or feasible. A few of the many applications for these products include industrial monitoring and control of remote sensors and devices (SCADA), wireless linking of remote weather and seismic sites, multipoint military training range information systems, infrastructure linking of public safety communications networks and automatic vehicle location systems. The RF Neulink Division generated approximately 7.9% of the Company's gross revenues during the fiscal year ended October 31, 2001.

Bioconnect Division.

The Bioconnect division was acquired by the Company in December 2000. This division is engaged in the design, manufacture and sale of cables and interconnects for medical monitoring applications, such as the disposable ECG cables, infant apnea monitors in hospitals, patient leads, snap leads and connecting wires. Bioconnect's products are manufactured by Bioconnect at the Company's offices in California. Bioconnect's line of standard products normally consists of approximately 20 products. The Bioconnect Division generated approximately 3.4% of the Company's gross revenues during the fiscal year ended October 31, 2001.

Bioconnect also contributes to the high volume coaxial cable assembly operation for the RF Connector Division. Bioconnect's design and manufacturing

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

expertise has enabled the Company to bid, win and ship the high volume coaxial cable orders required by the RF Connector Division's customers. Revenues attributable to the sale of coaxial cable assemblies that are manufactured at Bioconnect's facilities are included in the revenues of the RF Connector Division.

Product Description:

The Company produces a broad range of interconnect products and assemblies. The products that are offered and sold by the Company's three divisions consist of the following:

RF Connector Division:

Coaxial connectors for radio communications equipment, PC LANS, antenna devices, instruments and other radio frequency devices are designed and distributed by the Company's RF Connector Division. The Company's coaxial connectors have applications in commercial, industrial, automotive, scientific and military markets.

The types of RF connectors offered by RF Industries include 2.4mm, 3.5mm, 7-16 DIN, BNC, MCX, MHV, Mini-UHF, MMCX, N, SMA, SMB, TNC and UHF. These connectors are offered in several configurations for both plugs and jacks. There are hundreds of applications for these connectors including, but not limited to, digital applications, cellular and PCS telephones, cellular and PCS base stations, GPS (Global Positioning Systems), cable and dish radio/TV systems, aircraft, video surveillance systems, cable assemblies and test equipment. The RF Connector Division normally markets approximately 1500 types of connectors, which range in price from \$0.40 to \$125.00 per unit.

The RF Connectors Division also designs, and manufactures through outside contractors, a variety of adapters and hand tools, that RF Industries assembles into kits, used by lab and field technicians, R&D technicians and engineers.

The RF Connector Division is developing a standard line of 75 Ohm connectors which are commonly found in high-speed digital application like HDTV, cable modems and cable connectors. The RF Connector Division has also commenced development of a new line of SMB connectors, which support data telecommunications and voice-over commercial broadcast applications like the wireless microphone devices employed by football referees. The Company believes there is an increased demand in digital applications for such 75 Ohm connectors.

Other connector products that the Company has released during the past two fiscal years in response to market demands include a full line of MMCX connectors, which are used for applications restricted by minimal space such as cellular telephones, PCS telephones, miniature transmitters and receivers, and mobile radio systems. Additionally, the RF Connector Division enhanced its line of reverse polarity and reverse thread connectors, which connectors were specifically designed to meet the requirements of the new government regulations for part 15 of the FCC. Applications for these connectors include non-licensed, low wattage transmitters used in areas such as convention center broadcast systems; MHV connectors; 75 Ohm SMB connectors which are used in areas such as microwave telephone and other non-defense applications. In addition, the Company has also introduced connectors used in precision military applications, satellite and other high frequency applications.

RF Connectors plans to continue to address the digital and home entertainment markets with new connector product offerings for fiber optic and high-end coaxial cable assemblies.

The RF Connector Division also produces the Company's cable assemblies. The cable assembly operations generated approximately 22% of the revenue of the RF

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

Connector Division during the fiscal year ended October 31, 2001. The cable assemblies are manufactured at both the Company's corporate headquarters in San Diego, California, and at the offices of the Bioconnect Division in Lake Elsinore, California. The Company's ability to design and manufacture cable assemblies, and its output capabilities, increased significantly with the acquisition of the Bioconnect Division in December 2000. Cable assemblies are made with a variety of sizes and combinations of RFI coaxial connectors and coax cabling. Cabling is purchased from a variety of major unaffiliated suppliers and are assembled with the Company connectors as complete cable assemblies.. Coaxial cable assemblies have thousands of applications including local area networks, wide area networks, Internet systems, PCS/cellular systems, TV/dish network systems, test equipment and entertainment systems. In addition, the Company recently commenced producing coaxial cable assemblies to provide high-performance antenna leads for an automotive application.

RF Neulink Division:

The wireless data products available from the RF Neulink Division come in a variety of configurations to satisfy the requirements of the various vertical markets. Transmitter and receiver modules come in a wide range of power output and frequency ranges and are used to convey data or voice from point to point. Additionally, dumb or smart programmable modems are available in a wide range of speeds and frequency/price ranges. Accessory modules have been developed for the purposes of remotely controlling and monitoring electrical devices.

Neulink's product line includes:

- o RF9600 UHF and VHF wireless modems
- o DAC9600'S incorporating RF9600's with Digital, Analogue, and Relay I/O modules
- o Zeus Wireless 2.4 Ghz Spread-Spectrum wireless modems requiring no user FCC licensing
- o RCL inexpensive, speech or data link transmitters and receivers in VHF and 900MHz frequencies.
- o Teledesign high-speed wireless modems in VHF, UHF and 900 Mhz frequencies
- o Maxrad antennas

Current applications in use worldwide for our Neulink products are various and include:

- o seismic and volcanic monitoring
- o industrial remote censoring/control in oil fields, pipelines and warehousing
- o lottery remote terminals
- o various military applications
- o remote camera control and tracking
- o perimeter and security system control/monitoring
- o water and waste management
- o inventory control
- o HVAC remote control and monitoring
- o biomedical hazardous material monitoring
- o fish farming automation of food dispensing, water aeration and monitoring
- o remote emergency generator startup and monitoring

The Company also is marketing its Neulink wireless data products for use in

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

oil and gas field monitoring, electrical control and distribution, and industrial automation and plant security. In addition, the Neulink Division's standard RR 9600 radio modem that is designed to monitor seismic and volcanic activity, is designed to prevent loss of life by early warning of impending disaster.

In addition to its own products, the Neulink Division also is the nationwide distributor for Zeus Wireless data spread spectrum transceivers. These units are true frequency hoppers @ 2.4GHz offering point-to-point, point-to-multipoint, Broadcast and TCP/IP operational modes. The Neulink Division has agreed to handle lower volume customers for this product. Under that agreement, the Neulink Division provides system design, tech support and service for sales of 2500 units, or less.

The Company is also a distributor for Maxrad Antennas, which were added to the product line with the goal of allowing the Neulink Division to provide a complete radio systems package to its customers.

Design efforts have been completed for the software and hardware products which, in combination with existing products, are designed to enable Neulink to market complete wireless solutions for control and monitoring of remote sites via radio modem links. New software enables RF Neulink's RF9600 wireless modems, in conjunction with our I/O modules, to configure a SCADA system. The software, named EZ-SCADA, creates a simple user-defined graphics screen that visually displays the status, analogue values and trends. EZ-SCADA software allows remote polling via base stations of SCADA units such as water, oil or gas tanks. Hardware changes include addition of Analogue 'C' module, allowing system design for a full range of sensing and monitoring devices, digital, analogue and relay control.

During 2000, Neulink has added several new products to its line. With over-the-air rates of 19.2 Kbps the Teledesign Systems TS4000 series offers enhanced features such as dual RS-232 data ports and higher RF power levels. The TS4000 series offer increased range for remote SCADA systems, as well as dual RS232 port options for multiple unit control.

Bioconnect Division:

The Bioconnect Division designs, manufactures and sells specialized electrical cabling and interconnect products used in the medical monitoring market. These products consist primarily of patient monitoring cables, ECG cables, snap leads, and molded safety leads for neonatal monitoring electrodes. The products are used in hospitals, clinics, doctor offices, ambulances and at home. In order to ensure maximum performance and safety, these interconnect products are replaced frequently.

Foreign Sales:

Direct export sales by the Company to customers in South America, Canada, Mexico, Europe, Australia, the Middle East, and the Orient accounted for approximately 16% of Company sales for both of the fiscal years ended October 31, 2000 and 2001. The majority of the export sales during these period were to Canada and Mexico. The Company is attempting to expand its foreign distribution efforts under its "RFI" logo, and is attempting to obtain additional foreign private label customers.

The Company does not own, or directly operate any manufacturing operations or sales offices in foreign countries.

Distribution, Marketing and Customers:

Sales methods vary greatly between the three divisions.

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

RF Connector presently sells its products primarily through warehousing distributors and OEM (Original Equipment Manufacturer) customers which utilize coaxial connectors and cable assemblies in the manufacture of their products. The OEM market, which includes manufacturers of communications test equipment, and computers, accounted for approximately 25% of sales while distribution accounted for 75%, of RF Connector division sales in fiscal 2000. During the fiscal year ended October 31, 2001, approximately 70% of the RF Connector Division's sales were generated through distributors. At the end of the 2001 fiscal year, the Company employed 68 independent distributors. During the October 31, 2001 fiscal year, the Company increased the number of its manufacturer's representatives who market to OEM customer to a total of 60 representatives.

RF Neulink sells its products directly or through manufacturers representatives, system integrators and OEM's. System integrators and OEMs integrate and/or mate Company's products with their hardware and software to produce turn-key wireless systems. These systems are then either sold or leased to other companies, including utility companies, financial institutions, petrochemical companies, government agencies, and irrigation/water management companies.

The Bioconnect Division markets its products both directly to hospitals and indirectly to the medical market through hospital dealers and distributors. The division also sells its products to OEMs who incorporate the leads and cables into their product offerings.

Manufacturing:

The Company contracts with outside third parties to manufacture all of its coaxial connectors, and all of its Neulink products. However, approximately 95% of RF cable assemblies sold by the Company during the fiscal year ended October 31, 2001 were manufactured by the Company at its facilities in California. RF Connector has its manufacturing performed at numerous manufacturing plants in Japan, Korea, the United States and International Standards organization (ISO) approved factories in Taiwan. The Company is not dependent on any one or a few manufacturers for its coaxial connectors and cable assemblies. The Company does not have any agreements with its manufacturers for its connectors, cable assemblies or Neulink products. RF Industries has in-house design engineers who create the engineering drawings for fabrication and assembly of connectors and cable assemblies. Accordingly, the manufacturers are not primarily responsible for design work related to the manufacture of the connectors and cable assemblies. However, the third party manufacturers of the Neulink products are solely responsible for design work related to the manufacture of the Neulink Division's products. Neulink's products are manufactured by numerous manufacturers in the United States, and the Company is not dependent on one or a few manufacturers for its Neulink products. The testing and assembly of both the connectors and the Neulink products is performed by outside manufacturers, while the testing of cable assemblies is conducted by the Company.

The Bioconnect Division has designed and manufactured its own products for over 20 years. The manufacturing process includes all aspects of the product, from the design to mold design, mold fabrication, assembly and testing. The Bioconnect Division produces its medical interconnect products in both high volume manufacturing and for custom or low volume uses. All of the manufacturing is conducted by the Bioconnect Division at its Lake Elsinore, California facilities.

There are certain risks associated with the Company's dependence on third party manufacturers for its products, including reduced control over delivery schedules, quality assurance, manufacturing costs, the potential lack of adequate capacity during periods of excess demand and increases in prices. See

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

"Risk Factors."

Raw Materials:

Connector materials are typically made of commodity metals and include small applications of precious materials, including silver and gold. The RF Connector Division purchases almost all of its connector products from contract manufacturers located in Taiwan and the United States. The Company believes that the raw materials used in its products are readily available and that the Company is not currently dependent on any supplier for its raw materials. The Company does not currently have any long-term purchase or supply agreements with its connector or Neulink product suppliers. The RF Connector cable assembly division also obtains its supplies of coaxial connectors from RF Connector's manufacturing sources. The Company believes there are numerous domestic and international suppliers of coaxial connectors. Nevertheless, should the Company experience a material delay in obtaining raw materials and component parts from its existing suppliers, until alternate arrangements are made, the Company's ability to meet its customer's needs may be adversely affected.

Neulink purchases its electronic products from various U.S. suppliers, and all Neulink wireless modem transceivers are built in the United States. The Company believes electronic components used in these products are readily available from a number of domestic suppliers and from other foreign suppliers.

Personnel:

As of December 31, 2001, the Company employed 60 full-time employees, of which 16 were in management, 20 were in manufacturing and assembly, three were engineers engaged in design, research and development, and the rest were in various administrative positions. The Company also occasionally hires part-time employees. The Company believes that it has a good relationship with its employees and, at this time, no employees are represented by a union.

Research and Development:

During the past two fiscal years, the Company spent approximately \$64,000 on research and development. Research and development activities of the Company consist of activities intended to produce new products not marketed by others that can be marketed to the industry in general. In addition, to research and development activities, the Company also spent approximately \$895,000 during the past two fiscal years on engineering. Engineering activities consist of the design and development of new products for specific customers and the design and engineering of new products to keep up with changes in the industry and products offered by the Company's competitors. Engineering work often is carried out in collaboration with the Company's customers.

Patents, Trademarks and Licenses:

The Company does not own any patents on any of its products, nor has it registered any product trademarks. Because of the Company carries thousands of separate types of connectors and other products, most of which are available to the Company's customers from other sources, the Company does not believe that its business or competitive position is dependent on patent protection.

Backlog, Warranties and Terms:

As of October 31, 2001, the Company had a sales order backlog of approximately \$9,000,000, of which approximately 90% is expected to be delivered in the current fiscal year. This compares to backlog of \$7,000,000 at October 31, 2000. Orders tend to fluctuate from quarter to quarter based on customer demands and general business conditions. In addition, unfilled orders may be cancelled prior to shipment of goods. Accordingly, backlog may not be indicative

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

of future demand.

The Company warrants its products to be free from defects in material and workmanship for varying warranty periods, depending upon the product. Products are generally warranted to the dealer for one year, with the dealer responsible for any additional warranty it may make. Certain Neulink products are sold directly to end-users and are warranted to those purchasers. The RF Connector products are warranted for the useful life of the connectors. Although the Company has not experienced any significant warranty claims to date, there can be no assurance that it will not be subjected to such claims in the future.

The Company usually sells to customers on 30-day terms pursuant to invoices and does not generally grant extended payment terms. Sales to most foreign customers are made on cash terms at time of shipment. Customers may delay, cancel, reduce, or return products after shipment subject to a restocking charge.

Competition:

Management estimates that RF Connector has over 50 competitors in a \$800,000,000 coaxial connector market. Management believes no one competitor has over 15% of the total market, while the three leaders hold no more than 30% of the total market. Many of the competitors of the RF Connector Division have significantly greater financial resources and broader product lines. RF Connector competes on the basis of product availability, service and value-added support to its distributors and OEM customers. In its connector operations, the Company competes on the basis of service, product availability and delivery time. Since the Company's strategy is to provide a broad selection of products in the areas in which it competes and to have a ready supply of those products available at all times, the Company normally has a significant amount of inventory of its connector products.

Major competitors for Neulink include Microwave Data Systems and Data Radio. Although a number of larger firms could enter Neulink's markets with similar products, Neulink's strategy is focused on serving and providing specific hardware and software combinations with the goal of maintaining a strong position in selected "niche" wireless applications. While the Neulink Division's competitors offer products that are substantially similar to Neulink's radio modems, the Neulink Division tries to enhance its competitive position by offering additional service before, during, and after the sale. For example, the Company provides design, applications engineering, and telephone assistance to its Neulink Division customers.

Bioconnect competes with numerous other companies in all areas of its operations, including in the manufacture of OEM custom products and medical cable products. Most of the competitors of Bioconnect are larger and have significantly greater financial resources than Bioconnect.

Government Regulations:

The Company's products are designed to meet all know existing or proposed governmental regulations. Management believes that the Company should be able to meet existing standards for approvals by government regulatory agencies for its principal products.

Neulink products are subject to the regulations of the Federal Communications Commission (FCC) in the United States, the Department of Communications (D.O.C.) in Canada, and the future E.C.C. Radio Regulation Division in Europe. The Company's present equipment is "type-accepted" for use in the United States and Canada. Neulink offers products that comply with current FCC, Industry Canada, and some European union regulations. The system integrator, or end user, is responsible for compliance with applicable

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

government regulations.

Bioconnect's products are subject to the regulations of the U.S. Food and Drug Administration.

RISK FACTORS

Investors should carefully consider the risks described below and all other information in this Form 10-KSB. The risks and uncertainties described below are not the only ones facing the Company. Additional risks and uncertainties not presently known to the Company or that it currently deems immaterial may also impair the Company's business and operations.

If any of the following risks actually occur, the Company's business, financial condition or results of operations could be materially adversely affected. In such case, the trading price of the Company's common stock could decline and investors may lose all or part of the money they paid to buy the Company's common stock.

Dependence On RF Connector Division Products

Although the Company has three operating divisions, sales of RF Connector division products accounted for approximately 89.5% of the Company's total sales for the fiscal year ended October 31, 2001. The Company expects the RF Connector division products will continue to account for the majority of the Company's revenues for the near future. Accordingly, an adverse change in the operations of the RF Connector division could materially adversely affect the Company's business, operating results and financial condition. Factors that could adversely affect the RF Connector division are described below.

International Sales And Operations

Sales to customers located outside the United States, either directly or through U.S. and foreign distributors, accounted for approximately 16% of the net sales of the Company in the year ended October 31, 2001. International revenues are subject to a number of risks, including:

- o longer accounts receivable payment cycles;
- o difficulty in enforcing agreements and in collecting accounts receivable;
- o tariffs and other restrictions on foreign trade;
- o economic and political instability;
- o and the burdens of complying with a wide variety of foreign laws.

The Company's foreign sales are also affected by general economic conditions in its international markets. A prolonged economic downturn in its foreign markets could have a material adverse effect on the Company's business. There can be no assurance that the factors described above will not have an adverse material effect on the Company's future international revenues and, consequently, on the financial condition, results of operations and business of the Company.

Since sales made to foreign customers or foreign distributors have historically been in U.S. dollars, the Company has not been exposed to the risks of foreign currency fluctuations. However, if the Company in the future is required to accept sales denominated in the currencies of the countries where sales are made, the Company thereafter also be exposed to currency fluctuation risks.

Dependence Upon Independent Distributors To Sell And Market The Company's Products

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

The Company's sales efforts are primarily effected through approximately 70 distributors, most of whom have entered into written agreements with the Company. Sales through independent distributors accounted for approximately 75% the net sales of the Company for the fiscal year ended October 31, 2001. The Company's agreements with its independent distributors are nonexclusive and generally may be terminated by either party upon 30-60 days' written notice. The Company's distributors are not within the control of the Company, are not obligated to purchase products from the Company, and may also sell other lines of products. There can be no assurance that these distributors will continue their current relationships with the Company or that they will not give higher priority to the sale of other products, which could include products of competitors. A reduction in sales efforts or discontinuance of sales of the Company's products by its distributors would lead to reduced sales and could materially adversely affect the Company's financial condition, results of operations and business. Selling through indirect channels such as distributors may limit the Company's contact with its ultimate customers and the Company's ability to assure customer satisfaction.

The Company Depends On Third-Party Contract Manufacturers For Substantially All Of Its Manufacturing Needs. If They Are Unable To Manufacture A Sufficient Quantity Of High-Quality Products On A Timely And Cost-Efficient Basis, The Company's Net Revenue And Profitability Would Be Harmed And Its Reputation May Suffer.

Substantially all of the Company's RF Connector products are manufactured by third-party contract manufacturers. The Company relies on them to procure components for RF Connectors and in certain cases to design, assemble and test its products on a timely and cost-efficient basis. If the Company's contract manufacturers are unable to complete design work on a timely basis, the Company will experience delays in product development and its ability to compete may be harmed. In addition, because some of the Company's manufacturers have manufacturing facilities in Taiwan and Korea, their ability to provide the Company with adequate supplies of high-quality products on a timely and cost-efficient basis is subject to a number of additional risks and uncertainties, including earthquakes and other natural disasters and political, social and economic instability. If the Company's manufacturers are unable to provide it with adequate supplies of high-quality products on a timely and cost-efficient basis, the Company's operations would be disrupted and its net revenue and profitability would suffer. Moreover, if the Company's third-party contract manufacturers cannot consistently produce high-quality products that are free of defects, the Company may experience a higher rate of product returns, which would also reduce its profitability and may harm the Company's reputation and brand.

The Company does not currently have any agreements with any of its contract manufacturers, and such manufacturers could stop manufacturing products for the Company at any time. . Although the Company believes that it could locate alternate contract manufacturers if any of its manufacturers terminated their business, the Company's operations could be impacted until alternate manufacturers are found.

The Company's Dependence On Third-Party Manufacturers Increases The Risk That It Will Not Have An Adequate Supply Of Products Or That Its Product Costs Will Be Higher Than Expected.

The risks associated with the Company's dependence upon third parties which develop and manufacture and assemble the Company's products, include:

- o reduced control over delivery schedules and quality;
- o risks of inadequate manufacturing yields and excessive costs;
- o the potential lack of adequate capacity during periods of excess demand; and

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

- o potential increases in prices.

These risks may lead to increased costs or delay product delivery, which would harm the Company's profitability and customer relationships.

If The Manufacturers of the Company's Coaxial Connectors Or Other Products Discontinue The Manufacturing Processes Needed To Meet The Company's Demands Or Fail To Upgrade Their Technologies, the Company May Face Production Delays.

The Company's coaxial connector and other product requirements typically represent a small portion of the total production of the third-party manufacturers. As a result, the Company is subject to the risk that a third party manufacturer will cease production some of the Company's products or continue to advance the process design technologies on which the manufacturing of the Company's products are based. Each of these events could increase the Company's costs, harm its ability to deliver products on time, or develop new products.

Dependence On Principal Customer

One customer accounted for approximately 14% of the total sales of the Company's RF Connector division for the fiscal year ended October 31, 2001. Although this customer has been an on-going major customer of the Company during the past five years, the Company does not have a written agreement with this customer. Therefore, this customer does not have any minimum purchase obligations and could stop buying the Company's products at any time. A reduction, delay or cancellation of orders from this customer or the loss of this customer could significantly reduce the Company's revenues and profits. The Company cannot provide assurance that this customer or any of its current customers will continue to place orders, that orders by existing customers will continue at current or historical levels or that the Company will be able to obtain orders from new customers.

The Company's Markets Are Subject To Rapid Technological Change, So Its Success Depends On The Company's Ability To Develop And Introduce New Products.

The markets for the Company's products are characterized by:

- o rapidly changing technologies;
- o evolving and competing industry standards;
- o short product life cycles;
- o changing customer needs;
- o emerging competition;
- o frequent new product introductions and enhancements; and
- o rapid product obsolescence.

To develop new products for the connector and wireless digital transmission markets, the Company must develop, gain access to and use new technologies in a cost-effective and timely manner. In addition, the Company must maintain close working relationship with key customers in order to develop new products that meet customers' changing needs. The Company also must respond to changing industry standards and technological changes on a timely and cost-effective basis.

Products for connector applications are based on industry standards that are continually evolving. The Company's ability to compete in the future will

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

depend on its ability to identify and ensure compliance with these evolving industry standards. If the Company is not successful in developing or using new technologies or in developing new products or product enhancements, its future revenues may be materially affected. The Company's attempt to keep up with technological advances may require substantial time and expense.

The Markets In Which The Company Competes Are Highly Competitive.

The markets in which the Company operates are highly competitive and the Company expects that competition will increase in these markets. In particular, the connector and communications markets in which the Company's products are sold are intensely competitive. Because the Company does not own any proprietary property that can be used to distinguish the Company from its competitors, the Company's ability to compete successfully in these markets depends on a number of factors, including:

- o success in subcontracting the design and manufacture of existing and new products that implement new technologies;
- o product quality;
- o reliability;
- o customer support;
- o time-to-market;
- o price;
- o market acceptance of competitors' products; and
- o general economic conditions.

In addition, the Company's competitors or customers may offer enhancements to its existing products or offer new products based on new technologies, industry standards or customer requirements that have the potential to replace or provide lower-cost or higher performance alternatives to the Company's products. The introduction of enhancements or new products by the Company's competitors could render its existing and future products obsolete or unmarketable.

Many of the Company's competitors have significantly greater financial and other resources. In certain circumstances, the Company's customers or potential customers have internal manufacturing capabilities with which the Company may compete.

If The Industries Into Which The Company Sells Its Products Experience Recession Or Other Cyclical Effects Impacting The Budgets Of Its Customers, The Company's Operating Results Could Be Negatively Impacted.

The primary customers for the Company's coaxial connectors are in the connector and communications industries. Any significant downturn in the Company's customers' markets, in particular, or in general economic conditions which result in the cut back of budgets would likely result in a reduction in demand for the Company's products and services and could harm the Company's business. Historically, the communications industry has been cyclical, affected by both economic conditions and industry-specific cycles. Depressed general economic conditions and cyclical downturns in the communications industry have each had an adverse effect on sales of communications equipment, OEMs and their suppliers, including the Company. No assurance can be given that the connector industry will not experience a material downturn in the near future. Any cyclical downturn in the connector and/or communications industry could have a

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

material adverse effect on the Company.

Control By Principal Stockholders

Officers and directors, as of January 31, 2002, own or could own, upon exercise of options which are immediately exercisable, approximately 19% of the outstanding common stock of the Company. Also, Hytek International, Inc. ("Hytek") owns approximately 22% of the Company's common stock as of December 31, 2001 and is therefore considered an affiliate. Accordingly, Hytek acting alone will be able to influence the outcome of any corporate or other matter submitted to the Company's stockholders for approval, including any merger, consolidation sale of all or substantially all of the Company's assets. Such concentrated share ownership may prevent or discourage potential bids to acquire the Company unless the terms are approved by such officers, directors and Hytek International.

Dependence On Key Personnel

The Company's success will depend to a significant extent on the continued service of the Company's senior executives including Howard Hill, its President and Chief Executive Officer, and certain other key employees, including certain technical and marketing personnel. The Company has an employment agreement with Mr. Hill for a term which expires on February 24, 2005. If the Company lost the services of Mr. Hill or one or more of the Company's key executives or employees (including if one or more of the Company's officers or employees decided to join a competitor or otherwise compete directly or indirectly with the Company), this could materially adversely affect the Company's business, operating results, and financial condition.

The Company May Make Future Acquisitions, Which Will Involve Numerous Risks.

Although the Company is not currently engaged in the potential acquisition of any other company, the Company may in the future acquire one or more additional companies. The risks involved with such future acquisitions include:

- o diversion of management's attention;
- o the affect on the Company's financial statements of the amortization of acquired intangible assets;
- o the cost associated with acquisitions and the integration of acquired operations; and
- o assumption of unknown liabilities, or other unanticipated events or circumstances.

Any of these risks could materially harm the Company's business, financial condition and results of operations. There can be no assurance that any business that the Company acquires will achieve anticipated revenues or operating results.

The Company Has No Exclusive Intellectual Property Rights In The Technology Employed In Its Products, Which May Limit the Company's Ability To Compete.

The Company does not hold any United States or foreign patents and does not have any patents pending. In addition, the Company does not have any other exclusive intellectual property rights in the technology employed in its products. The Company does not actively seek to protect its rights in the technology that it develops or that the Company's third-party contract manufacturers develop. In addition, these parties share the technologies with other parties, including some of the Company's competitors.

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

Volatility of Trading Prices

In the past several years the market price of the Company's common stock has varied greatly, and the volume of the Company's common stock traded has fluctuated greatly as well. These fluctuations often occur independently of the Company's performance or any announcements by the Company. Factors that may result in such fluctuations include:

- o any shortfall in revenues or net income from revenues or net income expected by securities analysts
- o quarterly fluctuations in the Company's financial results or the results of other connector and communications-related companies, including those of the Company's direct competitors
- o changes in analysts' estimates of the Company's financial performance, the financial performance of the Company's competitors, or the financial performance of connector and communications-related public companies in general
- o general conditions in the connector and communications industries
- o changes in the Company's revenue growth rates or the growth rates of the Company's competitors
- o sales of large blocks of the Company's common stock
- o conditions in the financial markets in general

In addition, the stock market may from time to time experience extreme price and volume fluctuations, which fluctuations may be unrelated to the operating performance of any specific company. Accordingly, the market prices of the Company's common stock may be expected to experience significant fluctuations in the future.

Securities And Exchange Commission Investigation.

In August 2000, the Company was notified that the Securities and Exchange Commission ("SEC") had issued a formal order of investigation to determine whether violations of certain aspects of the federal securities laws may have occurred in connection with matters related to the Company. In May 2001, the SEC informed the Company that the inquiry had been terminated and that, at that time, no enforcement action had been recommended. The SEC, however, further informed the Company that the termination does not mean that any parties have been exonerated or that the SEC may not take any action in the future. While the Company does not believe that there are grounds for any further investigation, the SEC could resurrect its investigation at any time in the future.

ITEM 2. PROPERTIES:

The Company leases its corporate headquarters building at 7610 Miramar Road, Building 6000, San Diego, California. The building consists of approximately 11,000 square feet which houses administrative, sales and marketing, engineering, production and warehousing for the Company's Connector Division. The rapid growth of both divisions of the Company required the leasing of an additional building to house the Neulink Division in 1996. The building is located adjacent to our corporate headquarters at 7606 Miramar Road, Building 7200. The building consists of approximately 2,400 square feet which houses the production and sales staff of the Neulink Division. The lease on both buildings will terminate in May 31, 2005. The monthly rental is approximately \$9,810 plus utilities, maintenance and insurance.

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

The Company's Bioconnect Division operates in a 5,000 square foot facility located in Lake Elsinore, California. The Lake Elsinore facility is used as the executive and sales office of Bioconnect, and for the manufacture of both (i) Bioconnect's products and (ii) the cable assemblies sold by the RF Connector Division. The lease for the Bioconnect facility expires on June, 2002 and provides for a monthly lease payment of \$2,576.00.

The Company currently believes that its facilities are sufficient to meet its foreseeable needs. However, should the Company require additional space, the Company believes that suitable additional space is available near the Company's current facilities.

ITEM 3. LEGAL PROCEEDINGS:

The Company is not currently a party to any pending legal proceedings.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS:

None.

PART II

ITEM 5. MARKET PRICE OF AND DIVIDENDS ON THE REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS.

Market information: The Company's Common Stock is listed and trades on the NASDAQ Small Cap Market under the "RFIL."

For the periods indicated, the following tables sets forth the high and low sales prices per share of Common Stock. These prices represent inter-dealer quotations without retail mark-up, mark-down or commission and may not necessarily represent actual transactions.

Quarter	High	Low
Fiscal 2001		
November 1, 2000 - January 31, 2001.....	5 16/32	2 17/32
February 1, 2001 - April 30, 2001.....	4	2
May 1, 2001 - July 31, 2001.....	4	2 4/5
August 1, 2001 - October 31, 2001.....	2 1/5	3 1/16
Fiscal 2000		
November 1, 1999 - January 31, 2000.....	2 22/32	1 1/2
February 1, 2000 - April 30, 2000.....	15 30/32	2 3/4
May 1, 2000 - July 31, 2000.....	6 13/16	4
August 1, 2000 - October 31, 2000.....	7	4 1/16

On December 31, 2001, the closing sales price of the Company's Common Stock was \$2.74.

As of December 31, 2001, there were 744 holders of the Company's Common Stock per records of the Company's transfer agent, Continental Stock Transfer & Trust Company, New York, NY.

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

The Company has not paid any dividends to date and does not presently intend to pay cash dividends on its Common Stock in the foreseeable future.

There were no sales of equity securities by the Company that were not registered under the Securities Act during fiscal 2001.

ITEM 6. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Financial Condition:

The following table presents the key measures of financial condition as of October 31, 2000 and 2001:

	2001		2000
	Amount	% Total Assets	Amount
Cash and cash equivalents.....	\$ 915,538	9.5%	\$ 557,923
Investments in available-for-sale securities.....	1,744,851	18.0%	2,208,558
Current assets.....	8,883,423	91.7%	8,598,437
Current liabilities.....	435,552	4.5%	916,716
Working capital.....	8,447,871	87.2%	7,681,721
Property and equipment - net.....	557,000	5.8%	318,853
Total Assets.....	\$9,684,946	100.0%	\$9,092,761
Stockholders' equity.....	\$9,184,531	94.8%	\$8,176,045

Liquidity and Capital Resources:

Management believes that its existing current assets and the amount of cash it anticipates it will generate from current operations will be sufficient to fund the anticipated liquidity and capital resource needs of the Company for the fiscal year ended October 31, 2002. The Company does not, however, currently have any commercial banking arrangements providing for loans, credit facilities or similar matters should the Company need to obtain additional capital. Management believes that its existing assets and the cash expected to be generated from operations will be sufficient during the current fiscal year are based on the following:

- o As of October 31, 2001, the amount of cash, cash equivalents, and available-for-sale securities was equal to \$2,660,000 in the aggregate. This amount represented approximately 92% of the selling, general and administrative expenses of the Company for entire fiscal year ended October 31, 2001.
- o As of October 31, 2001, the Company had approximately \$8,883,000 in current assets, and only \$436,000 of current liabilities.
- o As of October 31, 2001, the Company had only \$39,000 of outstanding indebtedness (other than accounts payable and other current liabilities).
- o As of October 31, 2001, the total amount of fixed commitments of the Company (such as lease payments for its properties and equipment, and other non-cancelable obligations) was \$147,000.

In addition, the Company currently does not believe it will need to make

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

any material additional capital equipment in fiscal 2002. Management also believes that based on the Company's financial condition at October 31, 2001, the absence of outstanding bank debt, and its recent operating results, the Company would be able to obtain bank loans to finance its expansion, if necessary, although there can be no assurance any bank loan would be obtainable, or if obtained, would be on favorable terms or conditions.

The Company is not a party to off-balance sheet arrangements and does not engage in trading activities involving non-exchange traded contracts. In addition, the Company has no financial guarantees, debt or lease agreements or other arrangements that could trigger a requirement for an early payment or that could change the value of the Company's assets.

Inventories as of October 31, 2001 were \$4,746,000, a \$541,000 increase from October 31, 2000. As part of its business strategy, and because of its off-shore manufacturing arrangements, the Company normally maintains a high level of inventory. As described elsewhere in this Annual Report, one of the Company's competitive advantages and strategies is to maintain customer satisfaction by having sufficient inventory on hand to fulfill most customer orders on short notice. Accordingly, as net sales significantly increased during the first half of fiscal year ended October 31, 2001, the Company increased its inventory levels to meet the anticipated continued increase in net sales.

Although the net income for the current year was \$874,500, a decrease of \$446,000 from the prior fiscal year, net cash provided by operating activities for the year ended October 31, 2001 was \$505,000 whereas cash used in operating activities in the year ended October 31, 2000 was \$360,500. The primary reasons for the improved cash returns from operations included an improvement in the collection of trade accounts receivable and a \$1,211,000 decrease in the amount spent on purchasing additional inventories. In addition, notwithstanding the decrease in net income and the increase in net cash provided by operations, the Company managed to reduce its accrue expenses and accounts payable by \$244,000 and 324,000, respectively.

Net cash provided by investing activities was \$65,900 during the current year compared to \$494,400 used in investing activities for the previous year. Current year investing activities included purchases of short-term money market securities of \$1,823,200, payment of part of the acquisition price of Bioconnect of \$147,000, capital expenditures of \$182,400 and proceeds from sale of money market securities of \$2,218,600.

Net cash used in financing activities was \$213,000 in the current year compared to net cash provided by financing activities of \$312,000 for the previous year. \$220,000 of the cash used in financing activities was payments on loans payable, \$2,300 was for the purchase of treasury stock, and \$9,400 was proceeds from the exercise of stock options.

Results of Operations:

The following summarizes the key components of the results of operations for the years ended October 31, 2000 and 2001:

	2001		2000	
	Amount	% of Sales	Amount	% of Total Sales
Net sales.....	\$9,481,889	100.0%	\$8,902,111	100.0%
Cost of sales.....	4,700,546	49.6%	4,404,515	49.5%

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

Gross profit.....	4,781,343	50.4%	4,497,596	50.5%
Engineering expenses.....	505,426	5.3%	386,395	4.3%
Selling and general expenses...	2,876,983	30.3%	2,241,334	25.2%
Operating income.....	1,398,934	14.8%	2,627,729	29.5%
Other income.....	159,575	1.7%	313,949	3.5%
Income before income taxes.....	1,558,509	16.4%	2,183,816	24.5%
Income taxes.....	684,000	7.2%	863,300	9.7%
Net income.....	874,509	9.2%	1,320,516	14.8%

Net sales increased by \$580,000, or 6.5%, for the fiscal year ended October 31, 2001 compared to the fiscal year ended October 31, 2000. The increase is primarily attributable to (i) a \$356,000 increase in sales at the Company's RF Connector Division to \$8,490,000 from \$8,134,000 in fiscal 2000, and (ii) sales at the Bioconnect Division of \$325,500. The foregoing increases in sales were partially offset by a decrease in sales at the RF Neulink Division. For the October 31, 2001 fiscal year, net sales of Neulink Division decreased by \$20,000 to \$748,000 from \$768,000 the previous year.

The increase in sales at the RF Connector division is attributable to a slight increase in connector sales and a material increase in sales of coaxial cable assemblies. The increase in connector sales resulted in a material increase in sales at the beginning of last fiscal year as demand for connectors for the PCS industry increased. However, during the last two quarters of fiscal 2001, demand for these PCS products decreased industry-wide, and the early gains in sales were mostly offset. During the October 31, 2000 fiscal year, the RF Connector division initiated its plan to increase its cable assembly operations. As a result, sales of cable assemblies increased significantly during the October 31, 2000 fiscal year over all prior periods. However, the cable assembly division's operations significantly improved during the October 31, 2001 fiscal year with the acquisition of Bioconnect, which subsidiary had additional cable manufacturing capabilities. As a result of the additional capabilities provided by Bioconnect, cable assembly sales further increased during the past fiscal year. Based on recently received orders for cable assemblies, the Company anticipates that cable assembly sales will remain strong during the current fiscal year. Connector sales, however, are less during the current fiscal year than at this time last year.

Since Bioconnect was acquired during the 2001 fiscal year, there were no Bioconnect sales included in the prior fiscal year, and no comparison of operations can be made.

The Company's gross profit increased by \$283,400 to \$4,781,000 in 2001 from \$4,497,600 in 2000 due to the increase in net sales. As a percent of sales, gross profit remained mostly unchanged, decreasing to 50.4% in 2001 from 50.5% of sales in 2000.

Engineering expenses increased by \$119,000 to \$505,400 compared to \$386,400, in 2000. As a percent of sales engineering expenses increased to 5.3%, compared to 4.3%, in 2000. The increase in engineering expenses is attributable to an increase in the design and development of new products and due to the addition of the Bioconnect division. The material portion of the increase was in the Bioconnect and the RF Connector Divisions and was incurred in connection with the new cable assemblies produced by the divisions. Since Bioconnect was not part of the Company during the prior fiscal year, no Bioconnect engineering expenses were included in last year's financial statements.

Selling and general expenses increased by \$635,700, to \$2,877,000, from

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

\$2,241,300, in 2000. As a percent of sales, selling and general expenses increased to 30.3% from 25.2% in 2000. The increase is primarily due to the addition of Bioconnect, which was not owned by the Company in fiscal 2000, and to increased travel and trade show expenses related to increased net sales.

Operating income decreased by \$471,000 to \$1,398,900, from \$1,869,900, in the previous year. The decrease in operating income is primarily attributable to the \$449,000 operating loss incurred by the Bioconnect division, the company that the Company acquired in December 2000. The operating loss also is due in part to the increase in selling and general expenses.

Other income decreased by \$154,400 due in part to a \$107,200 loss realized from the sale of available-for-sale securities (no gain or loss from such transactions occurred in the prior fiscal year). In addition, interest income decreased during the 2001 fiscal year due to lower interest rates and a reduction in interest-generating investments. The foregoing decreases were partially offset by a \$42,500 increase in commissions. The commissions received by the Company represent payments received by the Company's Neulink Division under an agreement with a third party. Under the third party agreement, Neulink receives a percentage of all sales revenues received by the third party from a specified client of the third party. Since the amount of revenues the Company receives from this contract with the third party depends on sales generated by the third party, the Company is unable to predict the amount, if any, of future revenues that the Company may receive from this arrangement.

Net income decreased by \$446,000, to \$874,500, compared to net income of \$1,320,500 in fiscal 2000. The decrease in net income is due to the loss incurred by the Company's new Bioconnect division, the increase selling and general expenses, and the decrease in other income.

ITEM 7. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The following Financial Statements of the Company with related Notes and Accountants' Report are attached hereto as pages F-1 to F-19 and filed as part of this Annual Report:

- o Report of J.H. Cohn LLP, Independent Public Accountants
- o Balance Sheet as of October 31, 2001
- o Statements of Income for the years ended October 31, 2001 and 2000
- o Statements of Stockholders' Equity for the years ended October 31, 2001 and 2000
- o Statements of Cash Flows for the years ended October 31, 2001 and 2000
- o Notes to Financial Statements

REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

To the Stockholders
RF Industries, Ltd.

We have audited the accompanying consolidated balance sheet of RF INDUSTRIES, LTD. AND SUBSIDIARY as of October 31, 2001, and the related consolidated statements of income, stockholders' equity and cash flows for the years ended October 31, 2001 and 2000. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of RF Industries, Ltd. and Subsidiary as of October 31, 2001, and their consolidated results of operations and cash flows for the years ended October 31, 2001 and 2000, in conformity with accounting principles generally accepted in the United States of America.

F-6

RF INDUSTRIES, LTD. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - Business activities and summary of significant accounting policies: Business activities:

The Company's business is comprised of the design, manufacture and/or sale of communications equipment primarily to the radio and other professional communications related industries. The Company is engaged in the design and distribution of coaxial connectors used primarily in radio and other professional communications applications (the "RF CONNECTOR Business Unit") the design, manufacture and sale of radio links for receiving and transmitting control signals for remote operation and monitoring of equipment (the "NEULINK Business Unit") and the design, manufacturing and distribution of electric cabling and interconnect products to the medical monitoring market (the "BIOCONNECT Business Unit"). Management considers each business unit to be a separate business segment (see Note 7).

Principles of consolidation:

The consolidated financial statements include the accounts of RF Industries, Ltd. (the "Parent") and its wholly-owned subsidiary, Bioconnect, Inc. (see Note 12) (collectively, the "Company"). All significant intercompany accounts and transactions are eliminated in consolidation.

Use of estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results may differ from those estimates.

Cash equivalents:

The Company considers all highly-liquid investments with an original maturity of three months or less when purchased to be cash equivalents.

Revenue recognition:

Revenue from product sales is recognized when the product is shipped. In addition, the Company has a strategic alliance with a supplier where the Company recognizes commission income when payment is received.

Investments:

Pursuant to Statement of Financial Accounting Standards ("SFAS") No. 115, "Accounting for Certain Investments in Debt and Equity Securities," the Company's investments in mutual fund units have

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

been classified as available-for-sale securities and, accordingly, are valued at fair value at the end of each period. If there is an other than temporary decline in fair value, the cost basis of the individual security will be written down to fair value via a charge to earnings. Unrealized holding gains and losses arising from such valuation are excluded from income and recognized, net of applicable income taxes, in accumulated other comprehensive income (loss) until realized. The Company uses the specific identification method to determine the cost basis for realized gains or losses included in income.

F-7

RF INDUSTRIES, LTD. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - Business activities and summary of significant accounting policies (continued):

Inventories:

Inventories, consisting of materials, labor and manufacturing overhead, are stated at the lower of cost or market. Cost has been determined using the weighted average cost method.

Property and equipment:

Equipment, tooling and furniture are recorded at cost and depreciated over their estimated useful lives (generally 3 to 7 years) using the straight-line method.

Research and development:

Costs and expenses related to research and development are expensed as incurred. Research and development expenses charged to operations were approximately \$2,000 and \$62,000 in 2001 and 2000, respectively.

Goodwill:

Goodwill represents the excess of the purchase price and related costs over the value assigned to the net assets of the business acquired. Goodwill is amortized on a straight-line basis over its estimated useful life of fifteen years (see Note 2).

Long-lived and intangible assets:

The Company assesses potential impairments to its long-lived assets and intangible assets when there is evidence that events or changes in circumstances indicate that the carrying amount of an asset may not be recovered. An impairment loss is recognized when the undiscounted cash flows expected to be generated by an asset (or group of assets) is less than its carrying amount. Any required impairment loss is measured as the amount by which the assets carrying value exceeds its fair value, and is recorded as a reduction in the carrying value of the related asset and a charge to operations.

Advertising:

The Company expenses the cost of advertising and promotions as incurred. Advertising costs charged to operations were approximately \$76,000 and \$46,000 in 2001 and 2000, respectively.

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

Income taxes:

The Company accounts for income taxes pursuant to the asset and liability method which requires deferred income tax assets and liabilities to be computed for temporary differences between the financial statement and tax bases of assets and liabilities that will result in taxable or deductible amounts in future periods based on enacted laws and rates applicable to the periods in which the temporary differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized. The income tax provision is the tax payable or refundable for the period plus or minus the change during the period in deferred tax assets and liabilities.

F-8

RF INDUSTRIES, LTD. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - Business activities and summary of significant accounting policies (continued):

Stock options:

In accordance with the provisions of Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25"), the Company will recognize compensation costs as a result of the issuance of stock options based on the excess, if any, of the fair value of the underlying stock at the date of grant or award (or at an appropriate subsequent measurement date) over the amount the employee must pay to acquire the stock. Therefore, the Company is not required to recognize compensation expense as a result of any grants of stock options at an exercise price that is equivalent to or greater than fair value at the date of grant. The Company also makes pro forma disclosures, as required by SFAS No. 123, "Accounting for Stock-Based Compensation", of net income as if a fair value based method of accounting for stock options had been applied.

Earnings per share:

Basic earnings per share is calculated by dividing net income applicable to common stockholders by the weighted average number of common shares outstanding during the period. The calculation of diluted earnings per share is similar to that of basic earnings per share, except that the denominator is increased to include the number of additional common shares that would have been outstanding if all potentially dilutive common shares, principally those issuable upon the exercise of stock options, were issued and the treasury stock method had been applied during the period.

The following table summarizes the calculation of basic and diluted earnings per share:

	2001	2000
	-----	-----
Numerators:		
Net income (A)	\$ 874,509	\$1,320,516

Diluted net earnings per share (A)/(C) ..	\$.22	\$.34
	=====	=====

F-9

RF INDUSTRIES, LTD. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - Business activities and summary of significant accounting policies (concluded):

Comprehensive loss:

Comprehensive income or loss is presented pursuant to SFAS No. 130, "Reporting Comprehensive Income," and, accordingly, has been displayed for each year in the accompanying statements of stockholders' equity and includes the net income or loss, plus or minus the effect of the net change in the fair value of available-for-sale securities each year, net of deferred taxes.

Reclassifications:

Certain 2000 amounts in the consolidated financial statements have been reclassified to conform to the 2001 presentation.

Note 2 - New accounting pronouncement:

In June 2001, the Financial Accounting Standards Board issued SFAS No. 142, "Goodwill and Other Intangible Assets", which requires that goodwill and certain intangible assets, including those recorded in past business combinations, no longer be amortized against earnings, but instead be tested for impairment at least annually. SFAS No. 142 will become effective for fiscal years beginning after December 15, 2001 with early adoption permitted for fiscal years beginning after March 15, 2001. The Company plans to elect early adoption of SFAS No. 142 on November 1, 2001 and does not expect the adoption to have a material effect on its consolidated financial statements.

Note 3 - Concentration of credit risk and sales to major customers:

The Company maintains its cash balances primarily in one financial institution. As of October 31, 2001, the balance exceeded the Federal Deposit Insurance Corporation limitation for coverage of \$100,000 by \$40,040. In addition, two unsecured money market accounts totaling \$733,865 were held at October 31, 2001. The Company reduces its exposure to credit risk by maintaining such balances with financial institutions that have high credit ratings.

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

Accounts receivable are financial instruments that also expose the Company to concentration of credit risk. Such exposure is limited by the large number of customers comprising the Company's customer base and their dispersion across different geographic areas. In addition, the Company routinely assesses the financial strength of its customers and maintains an allowance for doubtful accounts that management believes will adequately provide for credit losses.

F-10

RF INDUSTRIES, LTD. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 3 - Concentration of credit risk and sales to major customers (concluded): Sales to one customer represented 14% and 17% of total sales in 2001 and 2000, respectively. The Company does not have a written agreement with this customer and, therefore, this customer does not have any minimum purchase obligations and could stop buying the Company's products at any time. A reduction, delay or cancellation of orders from this customer or the loss of this customer could significantly reduce the Company's revenues and profits.

Note 4 - Investments:

At October 31, 2001, investments in available-for-sale securities consisted of units of mutual funds that invest primarily in short-term, secured obligations. The investments are carried at fair value at October 31, 2001. Net unrealized holding losses on these investments as of October 31, 2001 were \$7,986, net of deferred taxes of \$6,000. Realized losses from sales of investments as of October 31, 2001 were \$107,185. There were no realized gains or losses from sales of investments during 2000.

Reclassification adjustments included in comprehensive income (loss) during 2001 consisted of net unrealized holding losses arising during the year, net of deferred taxes of \$31,407, and adjustment for realized loss, net of deferred taxes included in net earnings of \$64,311. There were no reclassification adjustments during 2000.

Note 5 - Inventories:

Inventories consisted of the following as of October 31, 2001:

Raw materials and supplies.....	\$ 822,180
Finished goods.....	3,923,945

Total	\$4,746,125

Note 6 - Commitments:

The Company leases its facilities in San Diego, California under a noncancelable operating lease. The lease expires in May 2005 and requires minimum annual rental payments that are subject to fixed annual increases. The minimum annual rentals under this lease are

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

being charged to expense on a straight-line basis over the lease term. Deferred rentals were not material at October 31, 2001. The lease also requires the payment of the Company's pro rata share of the real estate taxes and insurance, maintenance and other operating expenses related to the facilities. The Company also leases certain automobiles under operating leases which expire at various dates through June 2001.

Total rent expense under all operating leases totaled approximately \$165,000 and \$121,000 in 2001 and 2000, respectively.

F-11

RF INDUSTRIES, LTD. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 6 - Commitments (concluded):

Minimum lease payments under these operating leases for years subsequent to October 31, 2001 are as follows:

Year Ending October 31, -----	Amount -----
2002	\$146,896
2003	157,498
2004	152,071
2005	86,002

Total	\$542,467 =====

The Company has an employment agreement with its President and Chief Executive Officer for a term which expires on February 24, 2005. The aggregate amount of compensation provided for over the remaining term of the agreement amounted to \$457,000 at October 31, 2001.

The Company has employment agreements with key employees of Bioconnect for terms which expire on December 31, 2002. The aggregate amount of compensation provided for over the remaining term of the agreement amounts to \$198,000 at October 31, 2001. The agreements also provide for 1/3 of a commission equivalent to 40% accumulated net profit to external customers, after taxes, since the purchase of Bioconnect, if still employed as of January 1, 2004. In addition, the agreements provide for a bonus stock option plan to be negotiated prior to 90 days following the fiscal year end 2004.

Note 7 - Segment information:

The Company has adopted the provisions of SFAS No. 131, "Disclosures about Segments of an Enterprise and Related Information. Pursuant to the provisions of SFAS No. 131, the Company reports segment sales in the same format reviewed by the Company's management (the "management approach").

F-12

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

RF INDUSTRIES, LTD. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 7 - Segment information (continued):

Management identifies the Company's segments based on strategic business units that are, in turn, based along market lines. These strategic business units offer products and services to different markets in accordance with their customer base and product usage. Accordingly, the Company's three business segments are centered on the operations associated with the RF CONNECTOR Business Unit, the NEULINK Business Unit and the BIOCONNECT Business Unit. Substantially all of the Company's operations are conducted in the United States; however, the Company derives a portion of its revenue from export sales. The Company evaluates the performance of each segment based on income or loss before income taxes. Assets are managed on a corporate basis. The Company allocates depreciation and amortization and other indirect expenses at the rate of 92.5% to the RF CONNECTOR Business Unit and 7.5% to the NEULINK Business Unit. During 2001, the Company reduced its allocation of depreciation and other indirect expenses relating to the NEULINK Business Unit. The change in the allocation of expenses was due to a decrease in operating overhead relating to the NEULINK Business Unit, as compared to the prior year. As a result of the decrease, income (loss) before provision for income taxes for 2000 has been restated to conform to the 2001 presentation.

The Company attributes revenues to geographic areas based on the location of the customers. The following table presents the revenues of the Company by geographic area for the years ended October 31, 2001 and 2000:

	2001 -----	2000 -----
United States	\$7,807,112	\$7,477,773
Foreign countries.....	1,674,777	1,424,338
	-----	-----
Totals	\$9,481,889	\$8,902,111
	=====	=====

During 2001, one customer of the RF CONNECTOR Business Unit generated approximately 14% of total revenues. During 2000, the customer generated approximately 17% of total revenues.

F-13

RF INDUSTRIES, LTD. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 7 - Segment information (concluded):

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

Net sales, income (loss) before provision for income taxes and other related segment information as of October 31, 2001 and for the years ended October 31, 2001 and 2000 follows:

	Connector	Neulink	Intercompany Sales	Biocon
2001				

Net sales.....	\$8,490,105	\$ 748,027	\$(81,783)	\$ 325,

RF INDUSTRIES, LTD. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 8 - Income taxes:

The provision for income taxes consists of the following:

	2001	2000
Current:		
Federal	\$ 437,000	\$ 739,600
State	123,000	201,000
	560,000	940,600
Deferred (credit):		
Federal	100,000	(67,700)

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

State	24,000	(9,600)
	-----	-----
	124,000	(77,300)
	-----	-----
Totals	\$ 684,000	\$ 863,300
	=====	=====

Income tax at the Federal statutory rate is reconciled to the Company's actual net provision for income taxes as follows:

	2001		2000	
	Amount	% of Pretax Income	Amount	% of Pretax Income
	-----	-----	-----	-----
Income tax at Federal statutory rate.....	\$530,000	34.0%	\$742,500	34.0%
State tax provision, net of Federal tax benefit..	91,000	5.8	126,324	5.8
Other.....	63,000	4.1	(5,524)	(.3)
	-----	-----	-----	-----
Provision for income taxes.....	\$684,000	43.9%	\$863,300	39.5%
	=====	=====	=====	=====

The Company's total deferred tax assets and deferred tax liabilities at October 31, 2001 are as follows:

	2001

Assets:	

Deferred compensation	\$ 8,000
Inventory obsolescence	19,300
State income taxes	68,700
Other	73,300
Liabilities:	

Depreciation	(39,300)

Net deferred tax assets	\$130,000
	=====

The other temporary differences generating net current and noncurrent deferred tax assets and liabilities were primarily related to accrued vacation expense, allowance for doubtful accounts, and unrealized losses on available-for-sale securities.

F-15

RF INDUSTRIES, LTD. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 9 - Stock options:

Incentive and Non-Qualified Stock Option Plans:

The Board of Directors approved an Incentive Stock Option Plan

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

(the "1990 Incentive Plan") during fiscal 1990 that provides for grants of options to employees to purchase up to 500,000 shares of common stock of the Company. Under its terms, the 1990 Incentive Plan terminated in 2000, and no additional options can be granted under that option plan. However, options previously granted under the 1990 Incentive Plan remain outstanding and continue in effect until they either expire, are forfeited or are exercised. As of October 31, 2001, a total of 143,860 options were still outstanding under the 1990 Incentive Plan, all of which are currently exercisable.

The Board of Directors also approved a Non-Qualified Stock Option Plan (the "1990 Non-Qualified Plan") during fiscal 1990 that provides for grants of options to purchase up to 200,000 shares of common stock to officers, directors and other recipients selected by the Board of Directors. Under its terms, the 1990 Non-Qualified Plan terminated in 2000, and no additional options can be granted under that option plan. However, options previously granted under the 1990 Non-Qualified Plan remain outstanding and continue in effect until they either expire, are forfeited or are exercised. As of October 31, 2001, a total of 33,555 options were still outstanding under the 1990 Non-Qualified Plan, all of which are currently exercisable.

In May 2000, the Board of Directors adopted the Company's 2000 Stock Option Plan (the "2000 Option Plan"). Under the 2000 Option Plan, the Company may grant options to purchase shares of common stock to officers, directors, key employees and others providing services to the Company. The number of shares of common stock that the Company is authorized to issued under options granted under the 2000 Option Plan initially was 300,000, which number automatically increases on January 1 of each year by the lesser of (i) 4% of the total number of shares of common stock then outstanding or (ii) 10,000 shares. Accordingly, as of October 31, 2001, the authorized number of shares of common stock that could be issued under the 2000 Option Plan was 310,000, of which 168,081 shares were still available to be granted. Under the 2000 Option Plan, the Company is authorized to grant both incentive stock options and non-qualified stock options. Incentive stock options are granted at an exercise price no less than the fair value of the common stock on the date of grant, while non-qualified options are granted at no less than 85% of the fair value of the common stock on the date of grant.

RF INDUSTRIES, LTD. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 9 - Stock options (continued): Compensatory stock option plans:
The Company granted options to two executives to purchase a total of 180,000 shares of common stock at \$.10 per share pursuant to the terms of their employment contracts dated February 1, 1998. The options to purchase 45,000 shares are scheduled to vest and become exercisable annually from March 1, 1998 through February 28, 2002. The difference of \$376,200 between the market value and the aggregate purchase price of the shares subject to option at the date of grant was initially recorded as unearned compensation

Edgar Filing: R F INDUSTRIES LTD - Form 10KSB

and deducted from stockholders' equity, and is being amortized over the vesting period. A total of \$94,056 was amortized to compensation expense in each of 2001 and 2000.

Additional required disclosures related to stock option plans:

Since the Company has elected to continue to use the provisions of APB 25 in accounting for stock options, no earned or unearned compensation cost was recognized in the accompanying consolidated financial statements for stock options other than the amounts attributable to the compensatory options granted to the executives described above. Had compensation cost been determined based on the fair value at the grant date for all awards consistent with the provisions of SFAS 123, the Company's net income and earnings per share in 2001 and 2000 would have been reduced to the pro forma amounts set forth below:

	2001 -----	2000 -----
Net income - as reported.....	\$ 874,509	\$1,320,516
Net income - pro forma.....	\$ 524,616	\$ 733,766
Basic earnings per share:		
As reported.....	\$.26	\$.40
Pro forma	\$.16	\$.22
Diluted earnings per share:		
As reported	\$.22	\$.34
Pro forma	\$.13	\$.19

The fair value of each option granted in 2001 and 2000 was estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions:

	2001 -----	2000 -----
Dividend yield	0%	0%
Expected volatility	87%	145%
Risk-free interest rate	4.9%	6.5%
Expected lives	10 years	10 years

RF INDUSTRIES, LTD. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 10- Retirement plan:

The Company sponsors a deferred savings and profit sharing plan under Section 401(k) of the Internal Revenue Code. Substantially all of its employees may participate in and make voluntary contributions to this defined contribution plan after they meet certain eligibility requirements. The Board of Directors of the Company can authorize additional discretionary contributions by the Company. The Company did not make contributions to the plan in 2001 or 2000.

Note 11- Related party transactions:

The note receivable from stockholder of \$70,000 at October 31, 2001 is due from the President of the Company, bears interest at 6%, payable annually, and has no specific due date.

Receivables from sales of stock arose from advances made to assist officers and employees in the exercise of stock options and, accordingly, are reported as a reduction of stockholders' equity in the accompanying balance sheet. The receivables are interest free.

Note 12- Acquisition and other matters:

On December 1, 2000, the Company acquired all the outstanding stock of Bioconnect for total consideration of \$289,163, of which \$139,163 was financed by the seller.

The acquisition has been accounted for as a purchase and, accordingly, the net assets acquired were recorded at estimated fair values on the date of acquisition. A summary of the allocation of the cost of the acquisition to the net assets acquired as of December 1, 2000 follows:

Cash	\$ 2,922
Accounts receivable	76,337
Inventory	39,956
Property and equipment	187,855
Intangibles and other assets	189,434

Total assets acquired	496,504
Accounts payable and other liabilities assumed	(207,341)

Purchase price	\$ 289,163
