Crimson Exploration Inc. Provides an Eagle Ford Shale and Woodbine Operational Update
Houston, TX – (BUSINESS WIRE) – February 8, 2012 - Crimson Exploration Inc. (NasdaqGM: CXPO) announced another successful oil well in Karnes County, Texas and provided status updates for current Eagle Ford and Woodbine wells currently in process.

Eagle Ford Shale - South Texas

In Karnes County, the Littlepage McBride #7 (53% WI) commenced production at a gross initial production rate of 1,019 Boepd, or 840 barrels of oil, 67 barrels of natural gas liquids, and 672 thousand cubic feet of gas per day, on a 16/64th choke and 2,119 psi of flowing tubing pressure. The well was drilled to a total measured depth of 16,435 feet, including a 5,950 foot lateral, and was completed using 19 stages of fracture stimulation. Average gross initial production rates for our seven wells in this area is 1,060 Boepd. One mile north of the #7 well location, the Glasscock A #1 (95.5% WI) is currently drilling at 14,439 feet toward a total measured depth of 16,870 feet, including a 6,000 foot lateral. We anticipate completing this well, using 18 - 20 stages of fracture stimulation, during the latter part of the first quarter.

In Dimmit County, the Beeler #1 (50% WI) was drilled to a total measured depth of 14,428 feet, including a 7,200 foot lateral, and was completed using 20 stages of fracture stimulation. Flowback operations have recently begun and we anticipate having production results in the following weeks.

In Zavala County, the KM Ranch #2 (50% WI) was drilled to a total measured depth of 12,875 feet, including a 6,100 foot lateral, and will be completed using 20 stages of fracture stimulation. This well was drilled in 15 days which is an 11 day improvement over the Beeler and the KM Ranch #1 wells. We anticipate completion operations to begin in the latter part of the first quarter with first production expected in April.

Woodbine Formation - Southeast Texas

In Madison County, the Mosley #1H (89% WI) is drilling at 14,065 feet toward a total measured depth of 16,930 feet. Crimson anticipates conducting 20 - 24 stages of fracture stimulation in the planned 7,500 foot lateral and remains on schedule to commence completion operations mid-February with initial production, given success, expected to begin in early March. Upon completion of drilling operations at the Mosley #1H, the rig will move approximately 1.5 miles to the north to begin drilling operations on the Grace Hall #1H (68% WI). As indicated in our capital budget, we anticipate being active in the Woodbine for all of 2012 and have already permitted 3 additional wells, with 6 more permits planned for the year.

Crimson Exploration is a Houston, TX-based independent energy company engaged in the acquisition, development, exploitation and production of crude oil and natural gas, primarily in the onshore Gulf Coast regions of the United States. The Company owns and operates conventional properties in Texas, Louisiana, Colorado and Mississippi, including approximately 5,400 net acres in the Haynesville Shale, Mid-Bossier, and James Lime plays in San Augustine and Sabine counties in East Texas, approximately 8,000 net acres in the Eagle Ford Shale in South Texas, approximately 17,000 net acres in Madison and Grimes counties in Southeast Texas and approximately 11,000 net acres in the Denver Julesburg Basin of Colorado.

Additional information on Crimson Exploration Inc. is available on the Company's website at <http://crimsonexploration.com>.

This press release includes “forward-looking statements” as defined by the Securities and Exchange Commission (“SEC”) and applicable securities laws. Such statements include those concerning Crimson’s strategic plans, expectations and objectives for future operations. All statements included in this press release that address activities, events or developments that Crimson expects, believes or anticipates will or may occur in the future are forward-looking statements. These statements are based on certain assumptions Crimson made based on its experience and perception of historical trends, current conditions, expected future developments and other factors it believes are appropriate under the circumstances. Such statements are subject to a number of assumptions, risks and uncertainties, many of which are beyond Crimson’s control. Statements regarding future production, revenue, cash flow operating results, leverage, drilling rigs operating, drilling locations, funding, derivative transactions, pricing, operating costs and capital spending, tax rates, and descriptions of our development plans are subject to all of the risks and uncertainties normally incident to the exploration for and development and production of oil and gas. These risks include, but are not limited to, commodity price changes, inflation or lack of availability of goods and services, environmental risks, the proximity to and capacity of transportation facilities, the timing of planned capital expenditures, uncertainties in estimating reserves and forecasting production results, operating and drilling risks, regulatory changes and the potential lack of capital resources. All forward-looking statements are based on our forecasts for our existing operations and do not include the potential impact of any future acquisitions. Investors are cautioned that any such statements are not guarantees of future performance and that actual results or developments may differ materially from those projected in the forward-looking statements. Please refer to our filings with the SEC, including our Form 10-K for the year ended December 31, 2010, and subsequent filings for a further discussion of these risks. Existing and prospective investors are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date hereof. We undertake no obligation to publicly update or revise any forward-looking statements after the date they are made, whether as a result of new information, future events or otherwise.
