FINANCIAL FEDERAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

In the opinion of the management of Financial Federal Corporation and Subsidiaries (the "Company"), the accompanying unaudited consolidated financial statements contain all adjustments (consisting only of normal recurring items) necessary to present fairly the financial position at January 31, 2001 and the results of operations and cash flows of the Company for the three and six month periods ended January 31, 2001 and 2000. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and note disclosures included in the Company's Annual Report on Form 10-K for the year ended July 31, 2000. The consolidated results of operations for the three and six month periods ended January 31, 2001 and 2000 are not necessarily indicative of the results for the respective full years.

NOTE 2 - DESCRIPTION OF BUSINESS

The Company is an independent financial services company providing collateralized lending, financing and leasing services nationwide to primarily middle-market commercial enterprises representing diverse industries such as general construction, road and infrastructure construction and repair, manufacturing, transportation and waste disposal. The Company lends against, finances and leases a wide range of revenue-producing equipment such as cranes, earth movers, machine tools, personnel lifts, trailers and trucks.

Net earnings per common share - Basic	\$0.49	\$0.45	\$0.98	\$0.87

NOTE 4 - SENIOR DEBT

At January 31, 2001, the Company had \$477.0 million of committed unsecured revolving credit facilities with various banks including \$192.0 million that expire after January 31, 2002 and \$285.0 million that expire before January 31, 2002. Long-term senior debt of \$561.2 million at January 31, 2001 comprised \$122.0 million of borrowings under credit facilities that expire after January 31, 2002, \$70.0 million of borrowings under credit facilities that expire before January 31, 2002 that were supported by credit facilities that expire after January 31, 2001 and \$369.2 million of term notes payable. In September 2000, the Company established a \$200.0 million Medium Term Note

6

Program and, in October 2000, issued \$38.0 million of 8.5% fixed rate term notes thereunder that mature in May 2003.

NOTE 5 - STOCKHOLDERS' EQUITY

In December 2000, the Company and the majority of the warrant holders amended the warrant agreements to purchase the Company's common stock. The amendment

Edgar Filing: FINANCIAL FEDERAL CORP - Form 10-Q

permitted the warrant holders to pay for the exercise of their warrants with previously owned common stock of the Company in lieu of cash at the holders' option.

During the quarter ended January 31, 2001, subsequent to the amendment, all of the Company's 1,606,500 outstanding warrants were exercised. The total proceeds to the Company were \$4.5 million (1,125,000 warrants at an exercise price of \$2.83 per warrant and 481,500 warrants at an exercise price of \$2.72 per warrant). The Company received \$1.1 million and 136,961 shares of its common stock at an average market value of \$24.70 per share. As a result of receiving 136,961 shares, the amount available under the Company's Stock and Convertible Debenture Repurchase Program decreased to \$6.6 million at January 31, 2001.

At January 31, 2001, the Company held the 136,961 shares in treasury.

NOTE 6 - RECENT ACCOUNTING PRONOUNCEMENTS

In August 2000, the Company adopted Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities" and SFAS No. 138, "Accounting for Certain Derivative Instruments and Certain Hedging Activities." These Statements require the fair value of derivatives to be recorded as assets or liabilities. Gains or losses resulting from changes in the fair values of derivatives are accounted for depending on the purpose of the derivatives and whether they qualify for hedge accounting treatment. The adoption of SFAS 133 and SFAS 138 did not have a material effect on the Company's earnings or financial position.

PART I
Item 2

MANAGEMENT'S DISCUSSION AND ANALYSIS OF OPERATIONS AND FINANCIAL CONDITION

RESULTS OF OPERATIONS

Comparison of three months ended January 31, 2001 to three months ended January 31, 2000

Finance income increased by 30% to \$34.8 million in the second quarter of fiscal 2001 from \$26.7 million in the second quarter of fiscal 2000. The increase was primarily due to the 22%, or \$217 million, increase in average finance receivables outstanding to \$1.214 billion in the second quarter of fiscal 2001 from \$997 million in the second quarter of fiscal 2000 and higher yields on new receivables and on variable rate receivables resulting from recent increases in market interest rates through December 2000. Finance receivables booked in the second quarter of fiscal 2001 and fiscal 2000 were \$171 million and \$161 million, respectively.

Interest expense, incurred on borrowings used to fund finance receivables, increased by 35% to \$17.0 million in the second quarter of fiscal 2001 from \$12.5 million in the second quarter of fiscal 2000. The increase was primarily due to the 22% increase in average debt outstanding in the second quarter of fiscal 2001 from the second quarter of fiscal 2000, higher rates incurred on short term and variable rate debt resulting from higher average market interest rates in the second quarter of fiscal 2001 from the second quarter of fiscal 2000 and recent issuances of additional term debt.

Finance income before provision for possible losses on finance receivables increased by 26% to \$17.8 million in the second quarter of fiscal 2001 from

Edgar Filing: FINANCIAL FEDERAL CORP - Form 10-Q

\$14.1 million in the second quarter of fiscal 2000. Finance income before provision for possible losses expressed as an annualized percentage of average finance receivables outstanding ("net interest margin") was 5.8% in the second quarter of fiscal 2001 compared to 5.6% in the second quarter of fiscal 2000. Subsequent to December 2000, market interest rates have been declining. Since approximately 90% of the Company's finance receivables are fixed rate and approximately 50% of the Company's debt is scheduled to reprice in the

7

third quarter of fiscal 2001, a decline in market interest rates could have a positive impact on the Company's net interest margin beginning in the third quarter of fiscal 2001.

The provision for possible losses on finance receivables increased by 100% to \$1.1 million in the second quarter of fiscal 2001 from \$550,000 in the second quarter of fiscal 2000. The provision for possible losses is determined by the amount required to increase the allowance for possible losses to a level that management considers appropriate. The allowance for possible losses was \$20.5 million, or 1.66% of finance receivables at January 31, 2001, compared to \$19.0 million, or 1.68% of finance receivables, at July 31, 2000 and \$17.3 million, or 1.70% of finance receivables, at January 31, 2000. The allowance is periodically reviewed by the Company's management and is estimated based on total finance receivables, net credit losses incurred and management's current assessment of the risks inherent in the Company's finance receivables from national and regional economic conditions, industry conditions, concentrations, the financial condition of counterparties and other factors. Future additions to the allowance may be necessary based on changes in these factors.

Net credit losses (write-downs of finance receivables less subsequent recoveries) were \$490,000 and \$84,000 in the second quarter of fiscal 2001 and 2000, respectively. Net credit losses expressed as an annualized percentage of average finance receivables outstanding ("loss ratio") was 0.16% and 0.03% in the second quarter of 2001 and 2000, respectively. Non-performing finance receivables were \$23.7 million, or 1.9% of total finance receivables, at January 31, 2001, compared to \$16.2 million, or 1.4% of total finance receivables, at July 31, 2000 and \$12.1 million, or 1.2% of total finance receivables, at January 31, 2000. Delinquent finance receivables (receivables with a contractual payment more than 60 days past due) were \$23.4 million, or 1.9% of total finance receivables, at January 31, 2001, compared to \$17.3 million, or 1.5% of total finance receivables, at July 31, 2000 and \$12.8 million, or 1.3% of total finance receivables, at January 31, 2000. The Company's non-performing and delinquent finance receivables and net credit losses have been increasing, and may continue to do so, although their current and expected levels are within industry standards.

Salaries and other expenses increased by 36% to \$4.0 million in the second quarter of fiscal 2001 from \$3.0 million in the second quarter of fiscal 2000. The increase was primarily due to the increase in the number of marketing and administrative employees, salary increases and the opening of the Company's sixth full service operations center in Atlanta, Georgia in February 2000.

Net earnings increased by 15% to \$7.7 million in the second quarter of fiscal 2001 from \$6.7 million in the second quarter of fiscal 2000. Diluted earnings per share increased by 13% to \$0.43 per share in the second quarter of fiscal 2001 from \$0.38 per share in the second quarter of fiscal 2000 and basic earnings per share increased by 9% to \$0.49 per share in the second quarter of fiscal 2001 from \$0.45 per share in the second quarter of fiscal 2000. The increase in diluted earnings per share was lower than the increase in net earnings primarily due to the effect that the convertible subordinated notes

Edgar Filing: FINANCIAL FEDERAL CORP - Form 10-Q

have on the diluted earnings per share calculation. The increase in basic earnings per share was lower than the increase in net earnings primarily due to the increase in the number of outstanding shares of the Company's common stock resulting from the exercise of the Company's 1,606,500 warrants in the second quarter of fiscal 2001.

In the second quarter of fiscal 2000, the Company repurchased \$2.3 million principal amount of its convertible subordinated notes for \$1.9 million. Excluding the net after tax gain on this retirement of debt, net earnings increased by 19%, diluted earnings per share increased by 16% and basic earnings per share increased by 11% in the second quarter of fiscal 2001 from the second quarter of fiscal 2000.

Comparison of six months ended January 31, 2001 to six months ended January 31, 2000

Finance income increased by 30% to \$67.9 million in the first half of fiscal 2001 from \$52.1 million in the first half of fiscal 2000. The increase was primarily due to the 21%, or \$210 million, increase in average finance receivables outstanding to \$1.190 billion in the first half of fiscal 2001 from \$980 million in the first half of fiscal 2000 and higher yields on new receivables and on variable rate receivables resulting from recent increases in market interest rates through December 2000. Finance receivables booked in the first half of fiscal 2001 and fiscal 2000 were \$344 million and \$336 million, respectively.

Interest expense, incurred on borrowings used to fund finance receivables, increased by 37% to \$33.1 million in the first half of fiscal 2001 from \$24.2 million in the first half of fiscal 2000. The increase was primarily due to

8

the 22% increase in average debt outstanding in the first half of fiscal 2001 from the first half of fiscal 2000, higher rates incurred on short term and variable rate debt resulting from higher average market interest rates in the first half of fiscal 2001 from the first half of fiscal 2000 and recent issuances of additional term debt.

Finance income before provision for possible losses on finance receivables increased by 25% to \$34.8 million in the first half of fiscal 2001 from \$27.9 million in the first half of fiscal 2000. The net interest margin was 5.8% in the first half of fiscal 2001 compared to 5.7% in the first half of fiscal 2000.

The provision for possible losses on finance receivables increased by 84% to \$2.3 million in the first half of fiscal 2001 from \$1.2 million in the first half of fiscal 2000. Net credit losses were \$836,000 and \$154,000 in the first half of fiscal 2001 and 2000, respectively. The loss ratio was 0.14% and 0.03% in the first half of 2001 and 2000, respectively.

Salaries and other expenses increased by 36% to \$8.0 million in the first half of fiscal 2001 from \$5.9 million in the first half of fiscal 2000. The increase was primarily due to the increase in the number of marketing and administrative employees, salary increases and the opening of the Company's sixth full service operations center in Atlanta, Georgia in February 2000.

Net earnings increased by 16% to \$15.0 million in the first half of fiscal 2001 from \$13.0 million in the first half of fiscal 2000. Diluted earnings per share increased by 14% to \$0.84 per share in the first half of fiscal 2001 from \$0.74 per share in the first half of fiscal 2000 and basic earnings per

Edgar Filing: FINANCIAL FEDERAL CORP - Form 10-Q

share increased by 13% to \$0.98 per share in the first half of fiscal 2001 from \$0.87 per share in the first half of fiscal 2000. The increase in diluted earnings per share was lower than the increase in net earnings primarily due to the effect that the convertible subordinated notes have on the diluted earnings per share calculation. The increase in basic earnings per share was lower than the increase in net earnings primarily due to the increase in the number of outstanding shares of the Company's common stock resulting from the exercise of the Company's 1,606,500 warrants in the second quarter of fiscal 2001.

In the first half of fiscal 2000, the Company repurchased \$2.3 million principal amount of its convertible subordinated notes for \$1.9 million. Excluding the net after tax gain on this retirement of debt, net earnings increased by 18%, diluted earnings per share increased by 15% and basic earnings per share increased by 14% in the first half of fiscal 2001 from the first half of fiscal 2000.

LIQUIDITY AND CAPITAL RESOURCES

The Company is dependent upon the continued availability of funds to originate or acquire finance receivables and to purchase portfolios of finance receivables. The Company may obtain required funds from a variety of sources, including operating cash flow, dealer placed and directly issued commercial paper, borrowings under committed unsecured revolving credit facilities, private and public issuances of term debt and securitizations, and sales of common and preferred equity. Management believes, but cannot assure, that the Company has available sufficient liquidity to support its future operations.

The Company issues investment grade commercial paper directly and through a \$350.0 million program with recognized dealers. Commercial paper outstanding at January 31, 2001 was \$129.9 million; a decrease of \$206 million from the amount outstanding at July 31, 2000. During the second quarter of fiscal 2001, the Company increased its borrowings under committed unsecured revolving bank credit facilities and reduced its outstanding commercial paper in order to lower borrowing costs and vary maturities using LIBOR-based bank borrowings. The Company's commercial paper is unsecured and matures within 270 days. Increases in commercial paper are generally offset by decreases in bank and other borrowings, and vice versa. The Company's current policy is to maintain committed revolving credit facilities from banks so that the aggregate amount available thereunder exceeds commercial paper outstanding.

At January 31, 2001, the Company had \$477.0 million of committed unsecured revolving credit facilities with various banks including \$192.0 million that expire after one year and \$285.0 million that expire within one year. At January 31, 2001, the Company had \$122.0 million of borrowings outstanding under credit facilities expiring after one year and \$189.0 million of borrowings outstanding under credit facilities expiring within one year.

In September 2000, the Company established a \$200.0 million Medium Term Note Program and, in October 2000, issued \$38.0 million of 8.5% fixed rate term notes thereunder that mature in May 2003.

FORWARD-LOOKING STATEMENTS

Certain statements in this document including the words or phrases "can be," "expects," "may affect," "may depend," "believes," "estimate," "project," "could," and similar words and phrases constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933

and Section 21E of the Securities Exchange Act of 1934. Such forward-looking statements are subject to various known and unknown risks and uncertainties and the Company cautions you that any forward-looking information provided by or on its behalf is not a guarantee of future performance. The Company's actual results could differ materially from those anticipated by such forward-looking statements due to a number of factors, some of which are beyond the Company's control, including, without limitation, (i) the ability to obtain funding on acceptable terms, (ii) changes in the risks inherent in the Company's receivables portfolio and the adequacy of the Company's reserves, (iii) changes in market interest rates, (iv) changes in economic, financial, and market conditions, (v) changes in competitive conditions and (vi) the loss of key executives or personnel. Forward-looking statements apply only as of the date made and the Company is not required to update forward-looking statements for subsequent or unanticipated events or circumstances.

PART II Item 2

CHANGES IN SECURITIES AND USE OF PROCEEDS

In December 2000 and January 2001, holders of 1,125,000 warrants originally issued to the Company's original stockholders in 1989 and holders of 481,500 warrants originally issued to certain officers of the Company in 1991 exercised their rights to acquire 1,606,500 shares of the Company's common stock. The total proceeds to the Company were \$4.5 million (1,125,000 warrants at an exercise price of \$2.83 per warrant and 481,500 warrants at an exercise price of \$2.72 per warrant). The Company received \$1.1 million and 136,961 shares of its common stock at an average market value of \$24.70 per share. The Company used the proceeds of \$1.1 million to repay short term debt and the Company is holding the 136,961 shares in treasury.
