## NHI reports first quarter results

MURFREESBORO, Tenn. -- National Health Investors, Inc., (NYSE: NHI and NHIPr) announced funds from operations, FFO, for the first quarter ended March 31, 2003 of \$13,679,000, or 51 cents per diluted share of common stock compared to \$10,904,000 or 41 cents per diluted share of common stock. FFO for the first quarter of 2003 excludes a \$1,932,000 or seven cents per diluted share of common stock gain on the sale of real estate.

Net income applicable to common stock for the first quarter ended March 31, 2003 was \$11,723,000 or 44 cents per diluted share of common stock compared to \$7,240,000 or 27 cents per diluted share of common stock for the same period in 2002. The improvement in net income for the quarter was primarily due to increased rental income, reduced interest and loan loss expense, and a gain on sale of real estate of \$1,932,000.

During the first quarter, NHI sold the Women's and Children's Medical Office Building in Lafayette, Louisiana for proceeds of \$4,045,000, resulting in a \$1,932,000 gain. A loan loss of \$1,500,000 relates to a decline in value of a loan to an assisted living facility in Tavares, Florida.

"In addition to the highlights described above, on March 31, we redeemed \$39,917,000 of our 7% convertible debentures due February 1, 2004," said President Andy Adams. "As a result, our debt to capitalization ratio at quarter end declined to 29.5%, the lowest level in our 12 year history."

<sup>(1)</sup>We believe that funds from operations is an important supplemental measure of operating performance. We, therefore, disclose funds from operations, although it is a measurement that is not defined by accounting principles generally accepted in the United States. We generally use the National Association of Real Estate Investment Trusts (NAREIT) measure of funds from operations. We define funds from operations as income before extraordinary items adjusted for certain non-cash items, primarily real estate depreciation, less gains/losses on sales of facilities. Our measure may not be comparable to similarly titled measures used by other REITs. Consequently, our funds from operations may not provide a meaningful measure of our performance as compared to that of other REITs. Funds from operations does not represent cash generated from operating activities as defined by accounting principles generally accepted in the United States (funds from operations does not include changes in operating assets and liabilities) and, therefore, should not be considered as an alternative to net income as the primary indicator of operating performance or to cash flow as a measure of liquidity.
