(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each Class Name of each exchange on which registered

Common stock, \$.01 par value New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files) Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§292.405 of this chapter) is not contained herein, and will not be contained, to the best of the registrant's knowledge, in the definitive

Edgar Filing: NATIONAL HEALTH INVESTORS INC - Form 10-K

proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K  ]

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer”, “accelerated filer,” “smaller reporting company” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer   
Non-accelerated filer  Smaller reporting company   
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

The aggregate market value of shares of common stock held by non-affiliates on June 30, 2018 (based on the closing price of these shares on the New York Stock Exchange) was approximately \$2,986,872,000. There were 42,735,034 shares of the registrant’s common stock outstanding as of February 15, 2019.

**DOCUMENTS INCORPORATED BY REFERENCE**

Portions of the Registrant’s definitive proxy statement for its 2019 annual meeting of stockholders are incorporated by reference into Part III, Items 10, 11, 12, 13, and 14 of this Form 10-K.

PART I.

Forward Looking Statements

References throughout this document to NHI or the Company include National Health Investors, Inc., and its consolidated subsidiaries. In accordance with the Securities and Exchange Commission's "Plain English" guidelines, this Annual Report on Form 10-K has been written in the first person. In this document, the words "we", "our", "ours" and "us" refer only to National Health Investors, Inc. and its consolidated subsidiaries and not any other person. Unless the context indicates otherwise, references herein to "the Company" include all of our consolidated subsidiaries.

This Annual Report on Form 10-K and other materials we have filed or may file with the Securities and Exchange Commission (the "SEC"), as well as information included in oral statements made, or to be made, by our senior management contain certain "forward-looking" statements as that term is defined by the Private Securities Litigation Reform Act of 1995. All statements regarding our expected future financial position, results of operations, cash flows, funds from operations, continued performance improvements, ability to service and refinance our debt obligations, ability to finance growth opportunities, and similar statements including, without limitation, those containing words such as "may", "will", "believes", "anticipates", "expects", "intends", "estimates", "plans", and other similar expressions are forward-looking statements.

Forward-looking statements involve known and unknown risks and uncertainties that may cause our actual results in future periods to differ materially from those projected or contemplated in the forward-looking statements as a result of factors including, but not limited to, the following:

\* We depend on the operating success of our tenants and borrowers for collection of our lease and note payments;

\* We depend on the success of property development and construction activities, which may fail to achieve the operating results we expect;

\* We are exposed to the risk that our tenants and borrowers may become subject to bankruptcy or insolvency proceedings;

Certain tenants in our portfolio account for a significant percentage of the rent we expect to generate from our \*portfolio, and the failure of any of these tenants to meet their obligations to us could materially and adversely affect our business, financial condition and results of operations and our ability to make distributions to our stockholders.

\* We are exposed to the risk that the illiquidity of real estate investments could impede our ability to respond to adverse changes in the performance of our properties;

\* We are exposed to risks related to governmental regulations and payors, principally Medicare and Medicaid, and the effect that lower reimbursement rates would have on our tenants' and borrowers' business;

\* Legislative, regulatory, or administrative changes could adversely affect us or our security holders.

\* We are exposed to the risk that the cash flows of our tenants and borrowers would be adversely affected by increased liability claims and liability insurance costs;

\* We are exposed to risks related to environmental laws and the costs associated with liabilities related to hazardous substances;

- \* We are exposed to the risk that we may not be fully indemnified by our lessees and borrowers against future litigation;
- \* We depend on the success of our future acquisitions and investments;
- \* We depend on our ability to reinvest cash in real estate investments in a timely manner and on acceptable terms;
- \* We may need to refinance existing debt or incur additional debt in the future, which may not be available on terms acceptable to us;
- \* We have covenants related to our indebtedness which impose certain operational limitations and a breach of those covenants could materially adversely affect our financial condition and results of operations;
- \* When interest rates increase, our common stock may decline in price;

3

---

Table of Contents

\* We depend on revenues derived mainly from fixed rate investments in real estate assets, while a portion of our debt capital used to finance those investments bears interest at variable rates;

\* We are exposed to the risk that our assets may be subject to impairment charges;

\* We depend on the ability to continue to qualify for taxation as a Real Estate Investment Trust;

\* Complying with REIT requirements may cause us to forego otherwise attractive acquisition opportunities or liquidate otherwise attractive investments, which could materially hinder our performance;

We have ownership limits in our charter with respect to our common stock and other classes of capital stock which  
\* may delay, defer or prevent a transaction or a change of control that might involve a premium price for our common stock or might otherwise be in the best interests of our stockholders;

We are subject to certain provisions of Maryland law and our charter and bylaws that could hinder, delay or prevent  
\* a change in control transaction, even if the transaction involves a premium price for our common stock or our stockholders believe such transaction to be otherwise in their best interests.

\* If our efforts to maintain the privacy and security of Company information are not successful, we could incur substantial costs and reputational damage, and could become subject to litigation and enforcement actions.

See the notes to the annual audited consolidated financial statements, and “Business” and “Risk Factors” under Item 1 and Item 1A therein for a further discussion of these and of various governmental regulations and other operating factors relating to the healthcare industry and the risk factors inherent in them. You should carefully consider these risks before making any investment decisions in the Company. These risks and uncertainties are not the only ones we face. There may be additional risks that we do not presently know of or that we currently deem immaterial. If any of the risks actually occur, our business, financial condition, results of operations, or cash flows could be materially adversely affected. In that case, the trading price of our shares of stock could decline and you may lose part or all of your investment. Given these risks and uncertainties, we can give no assurance that these forward-looking statements will, in fact, occur and, therefore, caution investors not to place undue reliance on them.

## ITEM 1. BUSINESS

### General

National Health Investors, Inc., established in 1991 as a Maryland corporation, is a self-managed real estate investment trust (“REIT”) specializing in sale-leaseback, joint-venture, mortgage and mezzanine financing of need-driven and discretionary senior housing and medical investments. Our portfolio consists of lease, mortgage and other note investments in independent living facilities, assisted living facilities, entrance-fee communities, senior living campuses, skilled nursing facilities, specialty hospitals and medical office buildings. Other investments have included marketable securities and, until 2016, a joint venture structured to comply with the provisions of the REIT Investment Diversification Empowerment Act of 2007 (“RIDEA”) through which we invested in facility operations managed by an independent third-party. We have funded our real estate investments primarily through: (1) operating cash flow, (2) debt offerings, including bank lines of credit and term debt, both unsecured and secured, and (3) the sale of equity securities.

At December 31, 2018, we had investments in real estate, mortgage and other notes receivable involving 232 facilities located in 33 states. These investments involve 151 senior housing properties, 76 skilled nursing facilities, 3 hospitals, 2 medical office buildings and other notes receivable. These investments (excluding our corporate office of

\$2,471,000) consisted of properties with an original cost of \$2,815,894,000, rented under triple-net leases to 30 lessees, and \$246,111,000 aggregate carrying value of mortgage and other notes receivable due from 10 borrowers.

Our investments in real estate and mortgage loans are secured by real estate located within the United States. We are managed as one reporting unit, rather than multiple reporting units, for internal reporting purposes and for internal decision making. Therefore, we have concluded that we operate as a single segment. Information about revenues from our tenants and borrowers, our net income, cash flows and balance sheet can be found in Item 8 of this Form 10-K.

## Table of Contents

### Classification of Properties in our Portfolio

#### Senior Housing

As of December 31, 2018, our portfolio included 143 senior housing properties (“SHO”) leased to operators and mortgage loans secured by 8 SHOs. The SHOs in our portfolio are either need-driven or discretionary for end users and consist of independent living facilities, assisted living facilities, senior living campuses, and entrance-fee communities which are more fully described below.

#### Need-Driven Senior Housing

**Assisted Living Facilities.** As of December 31, 2018, our portfolio included 93 assisted living facilities (“ALF”) leased to operators and mortgage loans secured by 6 ALFs. ALFs are free-standing facilities that provide basic room and board functions for elderly residents. As residents typically receive assistance with activities of daily living such as bathing, grooming, administering medication and memory care services, we consider these facilities to be need-driven senior housing. On-site staff personnel are available to assist in minor medical needs on an as-needed basis. Operators of ALFs are typically paid from private sources without assistance from government. ALFs may be licensed and regulated in some states, but generally do not require the issuance of a Certificate of Need (“CON”) as required for skilled nursing facilities.

**Senior Living Campuses.** As of December 31, 2018, our portfolio included 10 senior living campuses (“SLC”) leased to operators. SLCs contain one or more buildings that include skilled nursing beds combined with an independent or assisted living facility that provides basic room and board functions for elderly residents. They may also provide assistance to residents with activities of daily living such as bathing, grooming and administering medication. On-site staff personnel are available to assist in minor medical needs on an as-needed basis. As the decision to transition to a senior living campus is typically more than a lifestyle choice and is usually driven by the need to receive some moderate level of care, we consider this facility type to be need-driven. Operators of SLCs are typically paid from private sources and from government programs such as Medicare and Medicaid for skilled nursing residents.

#### Discretionary Senior Housing

**Independent Living Facilities.** As of December 31, 2018, our portfolio included 30 independent living facilities (“ILF”) leased to operators. ILFs offer specially designed residential units for active senior adults and provide various ancillary services for their residents including restaurants, activity rooms and social areas. Services provided by ILF operators are generally paid from private sources without assistance from government payors. ILFs may be licensed and regulated in some states, but generally do not require the issuance of a CON as required for skilled nursing facilities. As ILFs typically do not provide assistance with activities of daily living, we consider the decision to transition to an ILF facility to be discretionary.

**Entrance-Fee Communities.** As of December 31, 2018, our portfolio included 10 entrance-fee communities (“EFC”) leased to operators and two mortgage loans secured by EFCs. Entrance-fee communities, frequently referred to as continuing care retirement communities, or CCRCs, typically include a combination of detached cottages, an independent living facility, an assisted living facility and a skilled nursing facility on one campus. These communities appeal to residents because there is no need to relocate when health and medical needs change. EFCs are classified as either Type A, B, or C depending upon the amount of healthcare benefits included in the entrance fee. “Type A” EFCs, or “Lifecare” communities, include substantially all future healthcare costs. Communities providing a modified healthcare contract offering access to skilled nursing care but only paying for a maximum number of days are referred to as “Type B” EFCs. Finally, “Type C” EFCs, the type in our lease portfolio, are fee-for-service communities which do not provide any healthcare benefits and correspondingly have the lowest entrance fees. However, monthly fees may be

higher to reflect the current healthcare components delivered to each resident. EFC licensure is state-specific, but generally the skilled nursing beds included in our EFC portfolio are subject to state licensure and regulation. As the decision to transition to an EFC is typically made as a lifestyle choice and not as the result of a pressing medical concern, we consider the decision to transition to an EFC to be discretionary. Accordingly, the predominant source of revenue for operators of EFCs is from private payor sources.

#### Medical

As of December 31, 2018, our portfolio included 77 medical facilities leased to operators and mortgage loans secured by 4 medical facilities. The medical facilities within our portfolio consist of skilled nursing facilities, hospitals and medical office buildings, which are more fully described below.

## Table of Contents

**Skilled Nursing Facilities.** As of December 31, 2018, our portfolio included 72 skilled nursing facilities (“SNF”) leased to operators and mortgage loans secured by 4 SNFs. SNFs provide some combination of skilled and intermediate nursing and rehabilitative care, including speech, physical and occupational therapy. As the decision to utilize the services of a SNF is typically made as the result of a pressing medical concern, we consider this to be a need-driven medical facility. The operators of the SNFs receive payment from a combination of private pay sources and government payors such as Medicaid and Medicare. SNFs are required to obtain state licenses and are highly regulated at the federal, state and local level. Most SNFs must obtain a CON from the state before opening or expanding such facilities. Some SNFs also include assisted living beds.

**Hospitals.** As of December 31, 2018, our portfolio included 3 hospitals (“HOSP”) leased to operators. Hospitals provide a wide range of inpatient and outpatient services, including acute psychiatric and rehabilitation services, and are subject to extensive federal, state and local legislation and regulation. Hospitals undergo periodic inspections regarding standards of medical care, equipment and hygiene as a condition of licensure. Services provided by hospitals are generally paid for by a combination of private pay sources and government payors. As the decision to utilize the services of a hospital is typically made as the result of a pressing medical concern, we consider this to be a need-driven medical facility.

**Medical Office Buildings.** As of December 31, 2018, our portfolio included 2 medical office buildings (“MOB”) leased to operators. MOB are specifically configured office buildings whose tenants are primarily physicians and other medical practitioners. As the decision to utilize the services of an MOB is typically made as a the result of a pressing medical concern, we consider this to be a need-driven medical facility. MOB differ from conventional office buildings due to the special requirements of the tenants. Each of our MOB is leased to one lessee and is either physically attached to or located on an acute care hospital campus. The lessee sub-leases individual office space to the physicians or other medical practitioners. The lessee is responsible to us for the lease obligations of the entire building, regardless of their ability to sub-lease the individual office space.

## Nature of Investments

Our investments are typically structured as acquisitions of properties through purchase-leaseback transactions, acquisitions of properties from other real estate investors, loans or operations through structures allowed by RIDEA. We have provided construction loans for facilities for which we were already committed to provide long-term financing or for which the operator agreed to enter into a purchase option and lease with us upon completion of construction or after the facility is stabilized. The annual lease rates on our leases and the annual interest rates on our mortgage, construction and mezzanine loans ranged between 6.75% and 10% during 2018. We believe our lease and loan terms are competitive within our peer group. Typical characteristics of these transactions are as follows:

**Leases.** Our leases generally have an initial leasehold term of 10 to 15 years with one or more 5-year tenant renewal options. The leases are “triple net leases” under which the tenant is responsible for the payment of all taxes, utilities, insurance premiums, repairs and other charges relating to the operation of the properties, including required levels of capital expenditures each year. The tenant is obligated at its expense to keep all improvements, fixtures and other components of the properties covered by “all risk” insurance in an amount equal to at least the full replacement cost thereof, and to maintain specified minimal personal injury and property damage insurance, protecting us as well as the tenant. The leases also require the tenant to indemnify and hold us harmless from all claims resulting from the use, occupancy and related activities of each property by the tenant, and to indemnify us against all costs related to any release, discovery, clean-up and removal of hazardous substances or materials, or other environmental responsibility with respect to each facility.

Most of our existing leases contain annual escalators in rent payments. For financial statement purposes, rental income is recognized on a straight-line basis over the term of the lease where the lease contains fixed escalators. Certain of

our operators hold purchase options allowing them to acquire properties they currently lease from NHI. When present, tenant purchase options generally give the lessee an option to purchase the underlying property for consideration determined by i) a sliding base dependent upon the extent of appreciation in the property plus a specified proportion of any appreciation; ii) our acquisition costs plus a specified proportion of any appreciation; iii) an agreed capitalization rate applied to the current rental; or iv) our acquisition costs plus a profit floor plus a specified proportion of any appreciation. Where stipulated above, appreciation may be established by independent appraisal.

Some of the obligations under the leases are guaranteed by the parent corporation of the lessee, if any, or affiliates or individual principals of the lessee. In some leases, the third-party operator will also guarantee some portion of the lease obligations. Some obligations are backed further by other collateral such as security deposits, equipment, furnishings and other personal property.

We monitor our triple-net lessee tenant credit quality and identify any material changes by performing the following activities:

6

---

Table of Contents

- Obtaining financial statements on a monthly, quarterly and annual basis to assess the operational trends of our tenants and the financial position and capability of those tenants
- Calculating the operating cash flow for each of our tenants
- Calculating the lease service coverage ratio and other ratios pertinent to our tenants
- Obtaining property-level occupancy rates for our tenants
- Verifying the payment of real estate taxes by our tenants
- Obtaining certificates of insurance for each tenant
  - Obtaining financial statements of our lessee guarantors on an annual basis
- Conducting a periodic inspection of our properties to ascertain proper maintenance, repair and upkeep
- Monitoring those tenants with indications of continuing and material deteriorating credit quality through discussions with our executive management and Board of Directors

RIDEA Transactions. Our arrangement with an affiliate of Bickford Senior Living (“Bickford”) was structured to be compliant with the provisions of RIDEA which permitted NHI to receive rent payments through a triple-net lease between a property company and an operating company and gave NHI the opportunity to capture additional value on the improving performance of the operating company through distributions to a Taxable REIT Subsidiary (“TRS”). Accordingly, the TRS held our 85% equity interest in an unconsolidated operating company, which we did not control, and provided an organizational structure that allowed the TRS to engage in a broad range of activities and share in revenues that would otherwise be non-qualifying income under the REIT gross income tests. The TRS is subject to state and federal income taxes. Our RIDEA arrangement ended on September 30, 2016, upon mutual agreement for NHI and Bickford to convert the buildings in the RIDEA to a traditional triple-net lease structure.

Mortgage loans. We have first mortgage loans with maturities of at least 5 years from inception, with varying amortization schedules from interest-only to fully-amortizing. Most of the loans are at a fixed interest rate; however, some interest rates increase based on a fixed schedule. In most cases, the owner of the facility is committed to make minimum annual capital expenditures for the purpose of maintaining or upgrading their respective facility. Additionally, most of our loans are collateralized by first mortgage liens and corporate or personal guarantees. Currently, our first mortgage loans carry interest rates which range from 6.75% to 9%.

We have made mortgage loans to borrowers secured by a second deed-of-trust where there is a process in place for the borrower to obtain long-term financing, primarily with a U.S. government agency, and where the historical financial performance of the underlying facility meets our loan underwriting criteria.

Mezzanine loans. Frequently in situations calling for temporary financing or when our borrowers’ in-place lending arrangements prohibit the extension of first mortgage security, we typically accept a second mortgage position or extend credit based on corporate and/or personal guarantees. These mezzanine loans often combine with an NHI purchase option covering the subject property. Our mezzanine loans currently carry an interest rate of 10%.

Construction loans. From time to time, we also provide construction loans that convert to mortgage loans upon the completion of the construction of the subject facility. We may also obtain a purchase option to acquire the facility at a future date and lease the facility back to the operator. During the term of the construction loan, funds are usually advanced pursuant to draw requests made by the borrower in accordance with the terms and conditions of the loan. Interest is typically assessed on these loans at rates equivalent to the eventual mortgage rate upon conversion. In addition to the security of the lien against the property, we will generally require additional security and collateral in the form of either payment and performance completion bonds or completion guarantees by the borrower’s parent, affiliates of the borrower or one or more of the individuals who control the borrower. We currently have construction loans bearing interest ranging from 6.75% to 9%.

Other notes receivable. We have provided a revolving credit facility to a borrower whose business is to provide bridge loans to owner-operators who are qualifying for long-term HUD financing secured by real estate. Our interest rate on the credit facility is 10%. We have provided loans to borrowers involved in the skilled nursing and senior housing industries who have pledged personal and business guarantees as security for the loans. The interest rates on these loans typically range from 8.25% to 10%.

Investment in marketable securities. From time to time we have invested a portion of our funds in various marketable securities with quoted market prices, including the common shares of other publicly-held REITs. We classify these highly-liquid securities as available-for-sale and carry the investments at their then quoted fair market value at the balance sheet date. We may choose to liquidate these investments to invest the proceeds into real estate assets. We currently have no investments in marketable securities.

#### Competition and Market Conditions

## Table of Contents

We compete primarily with other REITs, private equity funds, banks and insurance companies in the acquisition, leasing and financing of health care real estate.

Operators of our facilities compete on a local and regional basis with operators of facilities that provide comparable services. Operators compete for residents and/or patients and staff based on quality of care, reputation, physical appearance of facilities, services offered, family preference, physicians, staff and price. Competition is with other operators as well as companies managing multiple facilities, some of which are substantially larger and have greater resources than the operators of our facilities. Some of these facilities are operated for profit, while others are owned by governmental agencies or tax exempt not-for-profit entities.

The SNFs which either secure our mortgage loans or we lease to third-party operators receive the majority of their revenues from Medicare, Medicaid and other government payors. From time to time, these facilities have experienced revenue reductions brought about by the enactment of legislation to reduce government costs. In particular, the establishment of a Medicare Prospective Payment System (“PPS”) for SNF services, to replace the cost-based reimbursement system, significantly reduced Medicare reimbursement to SNF providers. While Congress subsequently took steps to mitigate the impact of PPS on SNFs, other federal legislative policies have been adopted and continue to be proposed that would reduce the growth rate of Medicare and/or Medicaid payments to SNFs. Effective October 1, 2019, a Patient Driven Payment Model (PDPM) was adopted as a case-mix system for classifying patient information payment groups under PPS. State Medicaid funding is not expected to keep pace with inflation according to industry studies. Any changes in government reimbursement methodology that reduce reimbursement to levels that are insufficient to cover the operating costs of our lessees and borrowers could indirectly and adversely impact us.

Our senior housing properties generally rely on private-pay residents who may be negatively impacted in an economic downturn. For example, a resident may intend to sell his or her house in order to afford the cost of residing in an ILF or ALF. In addition, the success of these properties is often impacted by the existence of comparable, competing facilities in a local market.

### Operator Diversification

For the year ended December 31, 2018, approximately 25% of our portfolio revenue was from publicly-owned operators, 56% was from regional operators, 17% from privately owned national chains which are privately owned and 2% was from smaller operators. We consider the creditworthiness of the operator to be an important factor in underwriting the lease or loan investment, and we generally have the right to approve any changes in operators.

For the year ended December 31, 2018, tenants which provided more than 3% of our total revenues were (in alphabetical order): Bickford Senior Living; Chancellor Health Care; The Ensign Group; Health Services Management; Holiday Retirement; National HealthCare Corporation; and Senior Living Communities. We will make reference to the parent company whenever we describe our business with these tenants, their subsidiaries and/or affiliates.

### Major Customers

We have four operators, Holiday Retirement (“Holiday”), Senior Living Communities, LLC (“Senior Living”), National HealthCare Corporation (“NHC”) and Bickford, from whom we individually derive at least 10% of our total revenues, and 62% collectively.

### Holiday

As of December 31, 2018, we leased 25 independent living facilities to an affiliate of Holiday. The 17-year master lease began in December 2013 and provided for a minimum escalator of 3.5% after 2017. Of our total revenues, \$43,311,000 (15%), \$43,817,000 (16%) and \$43,817,000 (18%) were derived from Holiday for the years ended December 31, 2018, 2017 and 2016, respectively, including \$5,616,000, \$7,397,000 and \$8,965,000 in straight-line rent, respectively. Our tenant operates the facilities pursuant to a management agreement with a Holiday-affiliated manager.

On November 5, 2018, we executed an Amendment to Master Lease and Termination of Guaranty with Holiday that significantly altered the master lease and extended its maturity to December 31, 2035. Apart from certain credit enhancements provided by our tenant, we agreed to decrease the annual rent under the existing master lease from approximately \$39,000,000 scheduled in 2019 to \$31,500,000 for the 25 facilities under the lease effective January 1, 2019. Annual lease escalators will go into effect on November 1, 2020 with a floor of 2% and a ceiling of 3%, such lease being secured by one-half of the original cash deposit of \$21,275,000, with the other half of the deposit, or \$10,637,000, being released to NHI. Further modifications of the existing master lease with NHI called for cash or a combination of cash and real estate equaling \$55,125,000, at NHI's option in 2019, for total consideration of \$65,762,000. Accordingly, on January 31, 2019, we acquired a facility from Holiday in Vero Beach, Florida at a cost of

Table of Contents

\$38,000,000 with a first year lease amount of \$2,550,000 plus annual escalators as described above. Holiday settled the remaining payable to NHI with cash of \$17,125,000 at closing.

Senior Living Communities

As of December 31, 2018, we leased nine retirement communities to Senior Living Communities (“Senior Living”) totaling 1,970 units under a 15-year master lease which began in December 2014, contains two 5-year renewal options and provides for an annual escalator of 4% in 2018 and 3% thereafter.

Of our total revenues, \$45,868,000 (16%), \$45,735,000 (16%) and \$40,332,000 (16%) were derived from the Senior Living lease for the years ending December 31, 2018, 2017 and 2016, respectively, including \$5,436,000, \$6,984,000 and \$7,369,000, respectively, in straight-line rent.

In December 2014, we provided a \$15,000,000 revolving line of credit to Senior Living, the maturity of which mirrors the term of the master lease, but subject to reduction to \$5,000,000 in 2019 and going forward. Borrowings are used primarily to finance construction projects within the Senior Living portfolio, including building additional units. Amounts outstanding under the facility, \$1,900,000 at December 31, 2018, bear interest at an annual rate equal to the 10-year U.S. Treasury rate, 2.69% at December 31, 2018, plus 6%.

In March 2016, we extended two mezzanine loans of up to \$12,000,000 and \$2,000,000, respectively, to affiliates of Senior Living, to partially fund construction of a 186-unit senior living campus on Daniel Island in South Carolina. The loans bear interest payable monthly at a 10% annual rate and mature in March 2021. The loans were fully drawn as of December 31, 2018, and provide NHI with a purchase option on the campus upon its meeting certain operational metrics. The option is to remain open during the term of the loans, plus any extensions.

NHC

We lease 42 facilities to NHC comprised of 3 independent living facilities and 39 skilled nursing facilities (4 of which are subleased to other parties for whom the lease payments are guaranteed to us by NHC). These facilities are leased to NHC under the terms of an amended Master Lease Agreement dated October 17, 1991 (the “1991 lease”) which includes our 35 remaining legacy properties and a Master Lease Agreement dated August 30, 2013 (the “2013 lease”) which includes 7 skilled nursing facilities acquired from a third party. Under the terms of the 1991 lease, base annual rental of \$30,750,000 escalates by 4% of the increase, if any, in each facility’s revenue over a 2007 base year. Similarly, the 2013 lease provides for base annual rental of \$3,450,000 plus percentage rent equal to 4% of the increase, if any, in each facility’s annual patient housing revenue over a 2014 base year. The NHC escalator is contingent upon future facility revenue increases and therefore does not give rise to straight-line revenues.

Of our total revenues, \$37,843,000 (13%), \$37,467,000 (13%) and \$37,626,000 (15%) in 2018, 2017 and 2016, respectively, were derived from NHC.

NHC owned 1,630,462 shares of our common stock at December 31, 2018. The chairman of our board of directors is also a director on NHC’s board.

Bickford

As of December 31, 2018 our Bickford lease portfolio is structured as follows (in thousands):

June 2023	September 2024	September 2027	May 2031	April 2033	Total
--------------	-------------------	-------------------	-------------	---------------	-------

Edgar Filing: NATIONAL HEALTH INVESTORS INC - Form 10-K

Number of Properties	13	10	4	20	5	52
2018 Annual Contractual Rent	\$ 11,133	\$ 9,264	\$ 1,515	\$ 19,988	\$ 3,165	\$ 45,065
Straight Line Rent Adjustment	588	(260	) 221	3,865	614	5,028
Total Revenues	\$ 11,721	\$ 9,004	\$ 1,736	\$ 23,853	\$ 3,779	\$ 50,093

On April 30, 2018, we acquired an assisted living/memory-care portfolio in Ohio and Pennsylvania totaling 320 units and comprising five facilities, one of which is subject to a ground lease with remaining term, including extensions, of 50 years. The purchase price was \$69,750,000, inclusive of \$500,000 in closing costs and \$1,750,000 in specified capital improvements, which

Table of Contents

will be added to the lease base upon funding. We included this portfolio in a separate master lease with Bickford which provides for a lease rate of 6.85%, with annual fixed escalators over a term of 15 years plus renewal options, subject to a fair market value rent reset feature available to NHI between years three and five.

Of our total revenues, \$50,093,000 (17%), \$41,606,000 (15%) and \$30,732,000 (12%) were recognized as rental income from Bickford for the years ended December 31, 2018, 2017 and 2016, including \$5,028,000, \$5,102,000, and \$858,000 in straight-line rent income, respectively.

At December 31, 2018, our ALF construction loans to Bickford are summarized as follows:

Commencement	Rate	Maturity	Commitment	Drawn	Location
July 2016	9%	5 years	\$ 14,000,000	\$(13,047,000)	Illinois
January 2017	9%	5 years	14,000,000	(11,931,000 )	Michigan
January 2018	9%	5 years	14,000,000	(4,515,000 )	Virginia
July 2018	9%	5 years	14,700,000	(2,978,000 )	Michigan
			\$56,700,000	\$(32,471,000)	

The promissory notes are secured by first mortgage liens on substantially all real and personal property as well as a pledge of any and all leases or agreements which may grant a right of use to the subject property. Usual and customary covenants extend to the agreements, including the borrower's obligation for payment of insurance and taxes. NHI has a purchase option on the properties at stabilization, whereby annual rent will be set with a floor of 9.55%, based on NHI's total investment, plus fixed annual escalators.

## Commitments and Contingencies

The following tables summarize information as of December 31, 2018 related to our outstanding commitments and contingencies which are more fully described in the notes to the consolidated financial statements, included herein.

	Asset Class	Type	Total	Funded	Remaining
Loan Commitments:					
LCS Sagewood Note A	SHO	Construction	\$ 118,800,000	\$(76,653,000 )	\$42,147,000
LCS Sagewood Note B	SHO	Construction	61,200,000	(10,165,000 )	51,035,000
LCS Timber Ridge Note A	SHO	Construction	60,000,000	(58,158,000 )	1,842,000
Bickford Senior Living	SHO	Construction	56,700,000	(32,471,000 )	24,229,000
Senior Living Communities	SHO	Revolving Credit	15,000,000	(1,900,000 )	13,100,000
			\$311,700,000	\$(179,347,000)	\$132,353,000
Development Commitments:

\$24,850,000 \$(7,750,000) \$17,100,000

## Table of Contents

### Sources of Revenues

General. Our revenues are derived primarily from rental income, mortgage and other note interest income and income from our other investments, substantially all of which were in marketable securities, including the common stock of other healthcare REITs. During 2018, rental income was \$280,813,000 (95.3%), interest income from mortgages and other notes was \$13,220,000 (4.6%) and other income was \$579,000 (0.1%) of total revenue of \$294,612,000, an increase of 5.7% over 2017. Our revenues depend on the operating success of our tenants and borrowers whose source and amount of revenues are determined by (i) the licensed beds or other capacity of the facility, (ii) their occupancy rate, (iii) the extent to which the services provided at each facility are utilized by the residents and patients, (iv) the mix of private pay, Medicare and Medicaid patients, and (v) the rates paid by private payors and by the Medicare and Medicaid programs.

### Government Regulation

Medicare and Medicaid. A significant portion of the revenue of our SNF lessees and borrowers is derived from government funded reimbursement programs, such as Medicare and Medicaid. Reimbursement under these programs is subject to periodic payment review and other audits by federal and state authorities. Medicare is uniform nationwide and reimburses skilled nursing facilities under PPS which is based on a predetermined, fixed amount. PPS is an acuity based classification system that uses nursing and therapy indexes adjusted by geographical wage indexes to calculate per diem rates for each Medicare patient. Payment rates are updated annually and are generally adjusted each October when the federal fiscal year begins. The current acuity classification system is named Resource Utilization Groups IV (“RUGs IV”) and was effective October 1, 2010. Federal legislative policies have been adopted and continue to be proposed that would provide small increases in annual Medicare payments to skilled nursing facilities. For example, the Centers for Medicare and Medicaid Services (“CMS”) announced the Skilled Nursing Facilities – PPS final rule for fiscal year 2019 which increased Medicare payments to SNF operators by only 2.4% beginning October 1, 2018.

Most notably, the new Patient Driven Payment Model (“PDPM”), which will replace the existing RUGs IV model beginning in FY 2020 (effective October 1, 2019), focuses on a resident’s clinical condition and care needs, rather than the volume of care provided. PDPM is characterized as a value-based, unified post-acute care payment system that prioritizes the unique care needs of patients and reduces the administrative burden associated with the system. PDPM is a case-mix classifications system for classifying SNF patients in a Medicare Part A covered stay into payment groups under the SNF PPS.

Medicaid is a joint federal and state program designed to provide medical assistance to “eligible needy persons.” Medicaid programs are operated by state agencies that adopt their own medical reimbursement methodology and standards. Payment rates and covered services vary from state to state. In many instances, revenues from Medicaid programs are insufficient to cover the actual costs incurred in providing care to those patients. With regard to Medicaid payment increases to skilled nursing operators, changes in federal funding coupled with state budget problems have produced uncertainty. States will more than likely be unable to keep pace with SNF inflation. States are under pressure to pursue other alternatives to long term care such as community and home-based services. Furthermore, several of the states in which we have investments have actively sought to reduce or slow the increase of Medicaid spending for SNF care.

Medicare and Medicaid programs are highly regulated and subject to frequent and substantial changes resulting from legislation, adoption of rules and regulations and administrative and judicial interpretations of existing law. Moreover, as health care facilities have experienced increasing pressure from private payors attempting to control health care costs, reimbursement from private payors has in many cases effectively been reduced to levels approaching those of government payors. Healthcare reimbursement will likely continue to be of significant importance to federal and state programs. We cannot make any assessment as to the ultimate timing or the effect that any future legislative reforms

may have on our lessees' and borrowers' costs of doing business and on the amount of reimbursement by government and other third-party payors. There can be no assurance that future payment rates for either government or private payors will be sufficient to cover cost increases in providing services to patients. Any changes in government or private payor reimbursement policies which reduce payments to levels that are insufficient to cover the cost of providing patient care could adversely affect the operating revenues of tenants and borrowers in our properties that rely on such payments, and thereby adversely affect their ability to make their lease or debt payments to us.

Licensure and Certification. The health care industry is highly regulated by federal, state and local law and is directly affected by state and local licensing requirements, facility inspections, state and federal reimbursement policies, regulations concerning capital and other expenditures, certification requirements and other such laws, regulations and rules. Sanctions for failure to comply with these regulations and laws include (but are not limited to) loss of licensure, fines and loss of certification to participate in the Medicare and Medicaid programs, as well as potential criminal penalties. The failure of any tenant or borrower to comply with such laws, requirements and regulations could affect their ability to operate the facility or facilities and could adversely affect such tenant's or borrower's ability to make lease or debt payments to us.

## Table of Contents

In the past several years, due to rising health care costs, there has been an increased emphasis on detecting and eliminating fraud and abuse in the Medicare and Medicaid programs. Payment of any consideration in exchange for referral of Medicare and Medicaid patients is generally prohibited by federal statute, which subjects violators to severe penalties, including exclusion from the Medicare and Medicaid programs, fines and even prison sentences. In recent years, both federal and state governments have significantly increased investigation and enforcement activity to detect and punish wrongdoers. In addition, legislation has been adopted at both state and federal levels which severely restrict the ability of physicians to refer patients to entities in which they have a financial interest.

It is anticipated that the trend toward increased investigation and enforcement activity in the area of fraud and abuse, as well as self-referral, will continue in future years. Certain of our investments are with lessees or borrowers which are partially or wholly owned by physicians. In the event that any lessee or borrower were to be found in violation of laws regarding fraud and abuse or self-referral, that lessee's or borrower's ability to operate the facility could be jeopardized, which could adversely affect the lessee's or borrower's ability to make lease or debt payments to us and could thereby adversely affect us.

Certificates of Need . The SNFs and hospitals in which we invest are also generally subject to state statutes which may require regulatory approval in the form of a CON prior to the construction or expansion of facilities to accommodate new beds (or addition of new beds to existing facilities), the addition of services or certain capital expenditures. CON requirements are not uniform throughout the United States and are subject to change. We cannot predict the impact of regulatory changes with respect to CONs on the operations of our lessees and borrowers; however, in our primary market areas, a significant reduction in new construction of long-term care beds has occurred.

## Investment Policies

Our investment objectives are (i) to provide consistent and growing current income for distribution to our stockholders through investments primarily in health care related facilities or in the operations thereof through independent third-party management, (ii) to provide the opportunity to realize capital growth resulting from appreciation, if any, in the residual value of our portfolio properties, and (iii) to preserve and protect stockholders' capital through a balance of diversity, flexibility and liquidity. There can be no assurance that these objectives will be realized. Our investment policies include making investments in real estate, mortgage and other notes receivable, marketable securities (including the common stock of other REITs) and joint ventures structured to comply with the provisions of RIDEA.

During 2018, we made commitments to fund new investments in real estate and loans totaling approximately \$364,344,000. In making new investments, we consider such factors as (i) the geographic area and type of property, (ii) the location, construction quality, condition and design of the property, (iii) the current and anticipated cash flow and its adequacy to meet operational needs, and lease or mortgage obligations to provide a competitive income return to our investors, (iv) the growth, tax and regulatory environments of the communities in which the properties are located, (v) occupancy and demand for similar facilities in the same or nearby communities, (vi) the quality, experience and creditworthiness of the management operating the facilities located on the property and (vii) the mix of private and government-sponsored residents. There can be no assurances that investments meeting our standards regarding these attributes will be found or closed.

We will not, without the approval of a majority of the Board of Directors and review of a committee comprised of independent directors, enter into any joint venture relationships with or acquire from or sell to any director, officer or employee of NHI, or any affiliate thereof, as the case may be, any of our assets or other property.

The Board of Directors, without the approval of the stockholders, may alter our investment policies if it determines that such a change is in our best interests and our stockholders' best interests. The methods of implementing our investment policies may vary as new investment and financing techniques are developed or for other reasons.

Management may recommend changes in investment criteria from time to time.

Future investments in healthcare related facilities may utilize borrowed funds or issuance of equity when it is advisable in the opinion of the Board of Directors. We may negotiate lines of credit or arrange for other short or long-term borrowings from lenders. We may arrange for long-term borrowings from institutional investors or through public offerings. We have previously invested, and may in the future invest, in properties subject to existing loans or secured by mortgages, deeds of trust or similar liens with favorable terms or in mortgage investment pools.

Table of Contents

## Executive Officers of the Company

The table below sets forth the name, position and age of each of our executive officers. Each executive officer is appointed by the Board of Directors, serves at its pleasure and holds office for a term of one year. There is no “family relationship” among any of the named executive officers or with any director. All information is given as of February 15, 2019:

Name	Position	Age
Eric Mendelsohn	President and Chief Executive Officer	57
Roger R. Hopkins	Chief Accounting Officer	57
Kristin S. Gaines	Chief Credit Officer	47
Kevin Pascoe	Chief Investment Officer	38
John Spaid	Executive Vice President Finance	59

Eric Mendelsohn joined NHI in January 2015. He has over 15 years of healthcare real estate and financing experience. Previously, Mr. Mendelsohn was with Emeritus Senior Living for 9 years, most recently as a Senior Vice President of Corporate Development where he was responsible for the financing and acquisition of assisted living properties, home health care companies, administration of joint venture relationships and executing corporate finance strategies. Prior to Emeritus, he was with the University of Washington as a Transaction Officer where he worked on the development, acquisition and financing of research, clinical and medical properties and has been a practicing transaction attorney, representing lenders and landlords. Mr. Mendelsohn holds a Bachelor of Science from American University in International Relations, a Law Degree from Pepperdine University, and a Masters (LLM) in Banking and Finance from Boston University. Mr. Mendelsohn is a member of the Florida and Washington State Bar Associations.

Roger R. Hopkins joined the former management advisor of NHI in July 2006 and was named Chief Accounting Officer for NHI in December 2006. With over 35 years of combined financial experience in public accounting and the real estate industry, he positioned companies to access public and private capital markets for equity and debt. Mr. Hopkins is responsible for the development of financial and tax strategies, reporting metrics, supplemental data reports and NHI’s internal control system. He has accounted for significant acquisitions and financings by NHI, including the successful executions of convertible debt and follow-on equity offerings, private debt placements and bank financing arrangements. Mr. Hopkins was an Audit Partner in the Nashville office of Rodefer Moss & Co, a regional accounting firm with eight offices in Tennessee, Indiana and Kentucky, where he brought extensive experience in SEC filing requirements and compliance issues. He was previously a Senior Manager in the Nashville office of Deloitte. Mr. Hopkins received his Bachelor of Science in Accounting from Tennessee Technological University in 1982 and is a CPA licensed in Tennessee.

Kristin S. Gaines was appointed NHI’s Chief Credit Officer in February 2010. She joined NHI in 1998 as a Credit Analyst. During her tenure with NHI, Ms. Gaines has had a progressive career in the areas of finance and operations. Her experience has resulted in a breadth of expertise in underwriting, portfolio oversight and real estate finance. Ms. Gaines holds an MBA and a Bachelor of Business Administration in Accounting from Middle Tennessee State University.

Kevin Pascoe joined NHI in June 2010. Mr. Pascoe oversees NHI’s portfolio of assets, relationship management with existing tenants and conducts operational due diligence on NHI’s existing investments and new investment opportunities. He has over 10 years of health care real estate background including his experience with General Electric - Healthcare Financial Services (“GE HFS”) (2006 – 2010) where he most recently served as a Vice President. With GE HFS, he moved up through the organization while working on various assignments including relationship management, deal restructuring, and special assets. He also was awarded an assignment in the GE Capital Global Risk Rotation Program. Mr. Pascoe holds an MBA and a Bachelor of Business Administration in Economics from Middle Tennessee State University.

John Spaid joined NHI in March 2016. He oversees the Company's banking relationships and financial transactions. Mr. Spaid has nearly 30 years of experience in real estate, finance and senior housing. Previously, he was with Emeritus Senior Living as a Senior Vice President whose responsibilities included budget and forecasting, debt and lease obligation underwriting, merger and acquisition processes, financial modeling, due diligence, board and investor presentations, employee development and Sarbanes-Oxley compliance. Mr. Spaid has been an independent financial consultant and has also served as the CFO of a regional assisted living and memory care provider in Redmond, Washington. Mr. Spaid holds an MBA from the University of Michigan and a Bachelor of Business Administration from the University of Texas.

We have a staff of 16, all reporting to our corporate office in Murfreesboro, TN. Essential services such as internal audit, tax compliance, information technology and legal services are outsourced to third-party professional firms.

## Table of Contents

### Investor Information

We publish our annual report on Form 10-K, quarterly reports on Form 10-Q, quarterly Supplemental Information, current reports on Form 8-K, and press releases to our website at [www.nhireit.com](http://www.nhireit.com). We have a policy of publishing these on the website within two (2) business days after public release or filing with the SEC.

We also maintain the following documents on our web site:

The NHI Code of Business Conduct and Ethics which has been adopted for all employees, officers and directors of the Company.

Information on our “NHI Valuesline” which allows all interested parties to communicate with NHI executive officers and directors. The toll free number is 877-880-2974 and the communications may be made anonymously, if desired.

The NHI Restated Audit Committee Charter.

The NHI Revised Compensation Committee Charter.

The NHI Revised Nominating and Corporate Governance Committee Charter.

The NHI Corporate Governance Guidelines.

We will furnish, free of charge, a copy of any of the above documents to any interested investor upon receipt of a written request.

Our transfer agent is Computershare. Computershare will assist registered owners with the NHI Dividend Reinvestment plan, change of address, transfer of ownership, payment of dividends, replacement of lost checks or stock certificates. Computershare’s contact information is: Computershare Trust Company, N.A., P.O. Box 43078, Providence, RI 02940-3078. The toll free number is 800-942-5909 and the website is [www.computershare.com](http://www.computershare.com).

The Annual Stockholders’ meeting will be held at 12:00 p.m. local time on Friday, May 3, 2019 at Embassy Suites, 1200 Conference Center Boulevard, Murfreesboro, TN.

### ITEM 1A. RISK FACTORS

We depend on the operating success of our tenants and borrowers for collection of our lease and note payments.

Revenues to operators of our properties are primarily driven by occupancy, Medicare and Medicaid reimbursement and private pay rates. Revenues from government reimbursement have, and may continue to, come under pressure due to reimbursement cuts and from widely-publicized federal and state budget shortfalls and constraints. Periods of weak economic growth in the U.S. which affect housing sales, investment returns and personal incomes may adversely affect senior housing occupancy rates. Expenses for the facilities are driven by the costs of labor, food, utilities, taxes, insurance and rent or debt service. Liability insurance and staffing costs continue to increase for our operators. To the extent any decrease in revenues and/or any increase in operating expenses results in a property not generating enough cash to make scheduled payments to us, our revenues, net income and funds from operations would be adversely affected. Such events and circumstances would cause us to evaluate whether there was an impairment of the real estate or mortgage loan that should be charged to earnings. Such impairment would be measured as the amount by which the carrying amount of the asset exceeded its fair value. Consequently, we might be unable to maintain or increase our current dividend and the market price of our stock may decline.

We depend on the success of property development and construction activities, which may fail to achieve the operating results we expect.

When we decide to invest in the renovation of an existing property or in the development of a new property, we make assumptions about the future potential cash flows of that property. We estimate our return based on expected occupancy, rental rates and future capital costs. If our projections prove to be inaccurate due to increased capital costs, lower occupancy or other factors, our investment in that property may not generate the cash flow we expected. Recently developed properties may take longer than expected to achieve stabilized operating levels, if at all. To the extent such facilities fail to reach stabilized operating levels or achieve stabilization later than expected, it could materially adversely affect our tenants' abilities to make payments to us under their leases and thus adversely affect our business and results of operations.

## Table of Contents

We are exposed to the risk that our tenants and borrowers may become subject to bankruptcy or insolvency proceedings for other reasons.

Although our lease agreements provide us the right to evict a tenant/operator and demand immediate payment of rent and exercise other remedies, and our mortgage loans provide us the right to terminate any funding obligations, demand immediate repayment of principal and unpaid interest, foreclose on the collateral and exercise other remedies, the bankruptcy laws afford certain rights to a party that has filed for bankruptcy or reorganization. A tenant or borrower in bankruptcy may be able to limit or delay our ability to collect unpaid rent in the case of a lease or to receive unpaid principal and/or interest in the case of a mortgage loan and to exercise other rights and remedies. For example, a lessee may reject its lease with us in a bankruptcy proceeding. In such a case, our claim against the lessee for unpaid and future rents would be limited by the statutory cap of the U.S. Bankruptcy Code. This statutory cap could be substantially less than the remaining rent owed under the lease, and any claim we have for unpaid rent might not be paid in full. In addition, a lessee may assert in a bankruptcy proceeding that its lease should be re-characterized as a financing agreement. If such a claim is successful, our rights and remedies as a lender, compared to a landlord, are generally more limited. We may be required to fund certain expenses (e.g. real estate taxes, maintenance and capital improvements) to preserve the value of a property, avoid the imposition of liens on a property and/or transition a property to a new tenant or borrower. In some instances, we have terminated our lease with a tenant and leased the facility to another tenant. In some of those situations, we provided working capital loans to, and limited indemnification of, the new tenant. If we cannot transition a leased facility to a new tenant, we may take possession of that property, which may expose us to certain successor liabilities. Should such events occur, our revenue and operating cash flow may be adversely affected.

Certain tenants in our portfolio account for a significant percentage of the rent we expect to generate from our portfolio, and the failure of any of these tenants to meet their obligations to us could materially and adversely affect our business, financial condition and results of operations and our ability to make distributions to our stockholders.

The successful performance of our real estate investments is materially dependent on the financial stability of our tenants/operators. As of December 31, 2018, approximately 62% of our total revenue is generated by Holiday (15%), Senior Living (16%), Bickford (17%), and NHC (13%). Payment defaults or declines in the operating performance by these or other tenants/operators could materially and adversely affect our business, financial condition and results of operations and our ability to pay expected dividends to our stockholders. In the event of a tenant default, we may experience delays in enforcing our rights as landlord and may incur substantial costs in protecting our investment and re-leasing our property. Further, we may not be able to re-lease the property for the rent previously received, or at all, or that lease terminations will not cause us to sell the property at a loss. The result of any of the foregoing risks could materially and adversely affect our business, financial conditions and results of operations and our ability to make distributions to our stockholders.

We are exposed to the risk that the illiquidity of real estate investments could impede our ability to respond to adverse changes in the performance of our properties.

Real estate investments are relatively illiquid and, therefore, our ability to quickly sell or exchange any of our properties in response to changes in economic and other conditions may be limited. All of our properties are "special purpose" properties that cannot be readily converted to general residential, retail or office use. Facilities that participate in Medicare or Medicaid must meet extensive program requirements, including physical plant and operational requirements. Transfers of operations of facilities are subject to regulatory approvals not required for transfers of other types of real estate. Thus, if the operation of any of our properties becomes unprofitable due to competition, age of improvements or other factors such that our lessee or borrower becomes unable to meet its obligations on the lease or mortgage loan, the liquidation value of the property may be less than the net book value or the amount owed on any related mortgage loan, because the property may not be readily adaptable to other uses. The

sale of the property or the replacement of an operator that has defaulted on its lease or loan could also be delayed by the approval process of any federal, state or local agency necessary for the transfer of the property or the replacement of the operator with a new operator licensed to manage the facility. No assurances can be given that we will recognize full value for any property that we are required to sell for liquidity reasons. Should such events occur, our results of operations and cash flows could be adversely affected.

We are exposed to risks related to governmental regulations and payors, principally Medicare and Medicaid, and the effect that lower reimbursement rates would have on our tenants' and borrowers' business.

Our tenants' and borrowers' businesses are affected by government reimbursement and the rates paid by private pay sources. To the extent that any of our facilities receive a significant portion of their revenues from governmental payors, primarily Medicare and Medicaid, such revenues may be subject to statutory and regulatory changes, retroactive rate adjustments, recovery of program overpayments or set-offs, administrative rulings, policy interpretations, payment or other delays by fiscal intermediaries, government funding restrictions (at a program level or with respect to specific facilities) and interruption or delays in payments

Table of Contents

due to any ongoing governmental investigations and audits at such facilities. In recent years, governmental payors have frozen or reduced payments to health care providers due to budgetary pressures. Such reductions in Medicare reimbursement will have an adverse effect on the financial operations of our borrowers and lessees who operate SNFs. Changes in health care reimbursement will likely continue to be of paramount importance to federal and state programs. The President and members of the U.S. Congress may approve or propose various spending cuts and tax reform initiatives that could result in changes (including substantial reductions in funding) to Medicare, Medicaid or Medicare Advantage Plans. In addition, a number of states are currently managing budget deficits, which may put pressure on states to decrease reimbursement rates for our tenants and operators with a goal of decreasing state expenditures under their state Medicaid programs. We cannot make any assessment as to the ultimate timing or effect any future legislative reforms may have on the financial condition of the health care industry. There can be no assurance that adequate reimbursement levels will continue to be available for services provided by any facility operator, whether the facility receives reimbursement from Medicare, Medicaid or private pay sources. Significant limits on the scope of services reimbursed and on reimbursement rates and fees could have a material adverse effect on an operator's liquidity, financial condition and results of operations, which could adversely affect the ability of an operator to meet its obligations to us. In addition, the replacement of an operator that has defaulted on its lease or loan could be delayed by the approval process of any federal, state or local agency necessary for the transfer of the facility or the replacement of the operator licensed to manage the facility.

Legislative, regulatory, or administrative changes could adversely affect us or our security holders.

The tax laws or regulations governing REITs or the administrative interpretations thereof may be amended at any time. We cannot predict if or when any new or amended law, regulation, or administrative interpretation will be adopted, promulgated, or become effective, and any such change may apply retroactively. We and our security holders may be adversely affected by any new or amended law, regulation, or administrative interpretation.

On December 22, 2017, the Tax Cuts and Jobs Act was enacted. The Tax Cuts and Jobs Act makes significant changes to the U.S. federal income tax rules related to the taxation of individuals and corporations, generally effective for taxable years beginning after December 31, 2017. In addition to reducing corporate and non-corporate tax rates, the Tax Cuts and Jobs Act eliminates and restricts various deductions and limits the ability to utilize net operating losses. Most of the changes applicable to individuals are temporary and apply only to taxable years beginning after December 31, 2017, and before January 1, 2026. The Tax Cuts and Jobs Act makes numerous large and small changes to the tax rules that do not affect REITs directly but may affect our security holders and may indirectly affect us.

Prospective investors are urged to consult with their tax advisors with respect to the status of the Tax Cuts and Jobs Act and any other regulatory or administrative developments and proposals and their potential effect on investment in our securities.

We are exposed to the risk that the cash flows of our tenants and borrowers would be adversely affected by increased liability claims and liability insurance costs.

ALF and SNF operators have experienced substantial increases in both the number and size of patient care liability claims in recent years, particularly in the states of Texas and Florida. As a result, general and professional liability costs have increased and may continue to increase. Nationwide, long-term care liability insurance rates are increasing because of large jury awards in states like Texas and Florida. Both Texas and Florida have now adopted SNF liability laws that modify or limit tort damages. Despite some of these reforms, the long-term care industry overall continues to experience very high general and professional liability costs. Insurance companies have responded to this claims crisis by severely restricting their capacity to write long-term care general and professional liability policies. No assurance can be given that the climate for long-term care general and professional liability insurance will improve in any of the foregoing states or any other states where the facility operators conduct business. Insurance companies may continue

to reduce or stop writing general and professional liability policies for ALFs and SNFs. Thus, general and professional liability insurance coverage may be restricted, very costly or not available, which may adversely affect the facility operators' future operations, cash flows and financial condition and may have a material adverse effect on the facility operators' ability to meet their obligations to us.

We are exposed to risks related to environmental laws and the costs associated with liabilities related to hazardous substances.

Under various federal and state laws, owners or operators of real property may be required to respond to the release of hazardous substances on the property and may be held liable for property damage, personal injuries or penalties that result from environmental contamination. These laws also expose us to the possibility that we may become liable to reimburse the government for damages and costs it incurs in connection with the contamination. Generally, such liability attaches to a person based on the person's relationship to the property. Our tenants or borrowers are primarily responsible for the condition of the property they occupy. Moreover, we review environmental site assessment of the properties that we purchase or encumber prior to taking an interest in them. Those assessments are designed to meet the "all appropriate inquiry" standard, which qualifies us for the innocent purchaser

Table of Contents

defense if environmental liabilities arise. Based upon such assessments, we do not believe that any of our properties are subject to material environmental contamination. However, environmental liabilities, including mold, may be present in our properties and we may incur costs to remediate contamination, which could have a material adverse effect on our business or financial condition.

We are exposed to the risk that we may not be fully indemnified by our lessees and borrowers against future litigation.

Our leases and notes require that the tenant/borrowers name us as an additional insured party on their insurance policies covering professional liability or personal injury claims. These instruments also require the tenant/borrower to indemnify and hold us harmless for all claims arising out of or incidental to the occupancy and use of each facility. We cannot give any assurance that these protective measures will completely eliminate any risk to us related to future litigation, the costs of which could have a material adverse impact on us.

We depend on the success of our future acquisitions and investments.

We are exposed to the risk that our future acquisitions may not prove to be successful. We could encounter unanticipated difficulties and expenditures relating to any acquired properties, including contingent liabilities, and newly acquired properties might require significant attention of NHI's management that would otherwise be devoted to our existing business. If we agree to provide construction funding to a borrower and the project is not completed, we may need to take steps to ensure completion of the project. Moreover, if we issue equity securities or incur additional debt, or both, to finance future acquisitions, it may reduce our per share financial results.

We depend on our ability to reinvest cash in real estate investments in a timely manner and on acceptable terms.

From time to time, we will have cash available from (1) the proceeds of sales of our securities, (2) principal payments on our notes receivable and (3) the sale of properties, including tenant purchase option exercises, under the terms of master leases or similar financial support arrangements. We must reinvest these proceeds, on a timely basis, in health care investments or in qualified short-term investments. We compete for real estate investments with a broad variety of potential investors. This competition for attractive investments may negatively affect our ability to make timely investments on terms acceptable to us. Delays in acquiring properties may negatively impact revenues and the amount of distributions to stockholders.

We may need to refinance existing debt or incur additional debt in the future, which may not be available on terms acceptable to us.

We operate with a policy of incurring debt when, in the opinion of our Board of Directors, it is advisable. Currently, we believe that our current liquidity, availability under our unsecured credit facility, and our capacity to service additional debt will enable us to meet our obligations, including dividends, and continue to make investments in healthcare real estate. While we currently have a low debt ratio, in the future, we may increase our borrowings. We may incur additional debt by borrowing under our unsecured credit facility, mortgaging properties we own and/or issuing debt securities in a public offering or in a private transaction. We believe we will be able to raise additional debt and equity capital at reasonable costs to refinance our existing indebtedness at or prior to its maturity. Our ability to raise reasonably priced capital is not guaranteed; we may be unable to raise reasonably priced capital because of reasons related to our business or for reasons beyond our control, such as market conditions. If our access to capital becomes limited, it could have an impact on our ability to refinance our debt obligations, fund dividend payments, acquire properties and fund acquisition activities.

We have covenants related to our indebtedness which impose certain operational limitations and a breach of those covenants could materially adversely affect our financial condition and results of operations.

The terms of our current indebtedness as well as debt instruments that the Company may enter into in the future are subject to customary financial and operational covenants. Among other things, these provisions require us to maintain certain financial ratios and minimum net worth and impose certain limits on our ability to incur indebtedness, create liens and make investments or acquisitions. Our continued ability to incur debt and operate our business is subject to compliance with these covenants, which limit operational flexibility. Breaches of these covenants could result in a default under applicable debt instruments, even if payment obligations are satisfied. Financial and other covenants that limit our operational flexibility, as well as defaults resulting from a breach of any of these covenants in our debt instruments, could have a material adverse effect on our financial condition and results of operations.

When interest rates increase, our common stock may decline in price.

## Table of Contents

Our common stock, like other dividend stocks, is sensitive to changes in market interest rates. In response to changing interest rates the market price of our common stock may adjust like a long-term fixed-income security and, compared to shorter-term instruments, may have more volatility. A wide variety of market factors can cause interest rates to rise, including central bank monetary policy, an uptick in inflation and changes in general economic conditions. The risks associated with increasing rates are intensified given that interest rates have increased from historic lows and are expected to increase in the future, with unpredictable effects on capital markets and on the price of our common stock. Consequential effects of a general rise in interest rates may hamper our access to capital markets, affect the liquidity of our underlying investments in real estate, and, by extension, limit management's effective range of responses to changing tenant circumstances or in answer to investment opportunities. Limited operational alternatives may further hinder our ability to maintain or increase our dividend, and the market price of our common stock may decline as the result.

We depend on revenues derived mainly from fixed rate investments in real estate assets, while a portion of our debt used to finance those investments bears interest at variable rates.

Our business model assumes that we can earn a spread between the returns earned from our investments in real estate as compared to our cost of debt and/or equity capital. Current interest rates on our debt are at low levels, and, as a result, the spread and our profitability on our investments have been at high levels. We are exposed to interest rate risk in the potential for a narrowing of our spread and profitability if interest rates increase in the future. Certain of our debt obligations are floating rate obligations with interest rates that vary with the movement of LIBOR or other indexes. Our revenues are derived mainly from fixed rate investments in real estate assets. Although our leases generally contain escalating rent clauses that provide a partial hedge against interest rate fluctuations, if interest rates rise, our interest costs for our existing floating rate debt and any new debt we incur would also increase. This increasing cost of debt could reduce our profitability by increasing the cost of financing our existing portfolio and our investment activity. Rising interest rates could limit our ability to refinance existing debt upon maturity or cause us to pay higher rates upon refinancing. We manage a portion of our exposure to interest rate risk by accessing debt with staggered maturities and through the use of derivative instruments, such as interest rate swap agreements with major financial institutions. Increased interest rates may also negatively affect the market price of our common stock and increase the cost of new equity capital.

We are exposed to the risk that our assets may be subject to impairment charges.

We regularly evaluate our real estate investments and other assets for impairment indicators. The judgment regarding the existence of impairment indicators is based on factors such as market conditions, operator performance and legal structure. If we determine that a significant impairment has occurred, we would be required to make an adjustment to the net carrying value of the asset, which could have a material adverse effect on our reported results of operations in the period in which the impairment charge occurs.

We depend on the ability to continue to qualify for taxation as a Real Estate Investment Trust.

We intend to operate as a REIT under the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code") and believe we have and will continue to operate in such a manner. Since REIT qualification requires us to meet a number of complex requirements, it is possible that we may fail to fulfill them. If we fail to qualify as a REIT:

- we will not be allowed a deduction for distributions to stockholders in computing our taxable income;
- we will be subject to corporate-level income tax, including any applicable alternative minimum tax, on our taxable income at regular corporate rates;
- we could be subject to increased state and local income taxes; and unless we are entitled to relief under relevant statutory provisions, we will be disqualified from taxation as a REIT for the four taxable years following the year

during which we fail to qualify as a REIT.

Because of all these factors, our failure to qualify as a REIT could also impair our ability to expand our business and could materially adversely affect the value of our common stock. The present federal income tax treatment of REITs may be modified, possibly with retroactive effect, by legislative, judicial or administrative action at any time, which could affect the federal income tax treatment of an investment in us. The federal income tax rules dealing with REITs constantly are under review by persons involved in the legislative process, the U.S. Internal Revenue Service (the "IRS") and the U.S. Treasury Department, which results in statutory changes as well as frequent revisions to regulations and interpretations. Revisions in federal tax laws and interpretations thereof could affect or cause us to change our investments and commitments and affect the tax considerations of an investment in us.

Complying with REIT requirements may cause us to forego otherwise attractive acquisition opportunities or liquidate otherwise attractive investments, which could materially hinder our performance.

## Table of Contents

To qualify as a REIT for U.S. federal income tax purposes, we must continually satisfy certain tests, including tests concerning the sources of our income, the nature and diversification of our assets, the amounts we distribute to our stockholders and the ownership of our stock. To meet these tests, we may be required to forego investments or acquisitions we might otherwise make. Thus, compliance with the REIT requirements may materially hinder our performance.

We have ownership limits in our charter with respect to our common stock and other classes of capital stock which may delay, defer or prevent a transaction or a change of control that might involve a premium price for our common stock or might otherwise be in the best interests of our stockholders.

Our charter, subject to certain exceptions, contains restrictions on the ownership and transfer of our common and preferred stock that are intended to assist us in preserving our qualification as a REIT. Our charter provides that any transfer that would cause NHI to be beneficially owned by fewer than 100 persons or would cause NHI to be “closely held” under the Internal Revenue Code would be void, which, subject to certain exceptions, results in no person or entity being allowed to own, actually or constructively, more than 9.9% of the outstanding shares of our stock. Our Board of Directors, in its sole discretion, may exempt a proposed transferee from the ownership limit and such an exemption has been granted through Excepted Holder Agreements to members of the Carl E. Adams family. Based on the Excepted Holder Agreements currently outstanding, the individual ownership limit for all other stockholders is approximately 7.5%. Our charter gives our Board of Directors broad powers to prohibit and rescind any attempted transfer in violation of the ownership limits. These ownership limits may delay, defer or prevent a transaction or a change of control that might involve a premium price for our common stock or might otherwise be in the best interests of our stockholders.

We are subject to certain provisions of Maryland law and our charter and bylaws that could hinder, delay or prevent a change in control transaction, even if the transaction involves a premium price for our common stock or our stockholders believe such transaction to be otherwise in their best interests.

The Maryland Business Combination Act provides that, unless exempted, a Maryland corporation may not engage in business combinations, including mergers, dispositions of 10% or more of its assets, issuances of shares of stock and other specified transactions with an “interested stockholder” or an affiliate of an interested stockholder for five years after the most recent date on which the interested stockholder became an interested stockholder, and thereafter, unless specified criteria are met. An interested stockholder is generally a person owning or controlling, directly or indirectly, 10% or more of the voting power of the outstanding stock of a Maryland corporation. Unless our Board of Directors takes action to exempt us, generally or with respect to certain transactions, from this statute in the future, the Maryland Business Combination Act will be applicable to business combinations between us and other persons. The Company’s charter and bylaws also contain certain provisions that could have the effect of making it more difficult for a third party to acquire, or discouraging a third party from attempting to acquire, control of the Company. Such provisions could limit the price that certain investors might be willing to pay in the future for the common stock. These provisions include a staggered board of directors, blank check preferred stock, and the application of Maryland corporate law provisions on business combinations and control shares. The foregoing matters may, together or separately, have the effect of discouraging or making more difficult an acquisition or change of control of the Company.

If our efforts to maintain the privacy and security of Company information are not successful, we could incur substantial costs and reputational damage, and could become subject to litigation and enforcement actions.

Our business, like that of other REITs, involves the receipt, storage and transmission of information about our Company, our tenants and borrowers, and our employees, some of which is entrusted to third-party service providers

and vendors. We also work with third-party service providers and vendors to provide technology, systems and services that we use in connection with the receipt, storage and transmission of this information.

Our information systems, and those of our third-party service providers and vendors, may be vulnerable to continually evolving cybersecurity risks. Unauthorized parties may attempt to gain access to these systems or our information through fraud or deception of our associates, third-party service providers or vendors. Hardware, software or applications we obtain from third parties may contain defects in design or manufacture or other problems that could unexpectedly compromise information security. The methods used to obtain unauthorized access, disable or degrade service or sabotage systems are also constantly changing and evolving and may be difficult to anticipate or detect for long periods of time. We have implemented and regularly review and update processes and procedures to protect against unauthorized access to or use of secured data and to prevent data loss. However, the ever-evolving threats mean we and our third-party service providers and vendors must continually evaluate and adapt our respective systems and processes, and there is no guarantee that they will be adequate to safeguard against all data security breaches or misuses of data. Any significant compromise or breach of our data security, whether external or internal, or misuse of our data, could result in significant costs, fines, lawsuits, and damage to our reputation. In addition, as the regulatory environment related to information

Table of Contents

security, data collection and use, and privacy becomes increasingly rigorous, with new and constantly changing requirements applicable to our business, compliance with those requirements could also result in significant additional costs.

## 10-YEAR LEASE EXPIRATIONS

The following table provides additional information on our leases which are scheduled to expire based on the maturity date contained in the most recent lease agreement or extension. We expect that, prior to maturity, we will negotiate new terms of a lease to either the current tenant or another qualified operator.

Year	Leases Expiring	Rentable Square Feet*	Number of Units/Beds	Annualized Percentage of	
				Gross Rent** (in thousands)	Annualized Gross Rent
2019	—	—	—	\$ —	— %
2020	6	27,017	224	\$ 3,082	1.2 %
2021	2	—	344	2,044	0.8 %
2022	4	—	156	4,249	1.7 %
2023	15	—	852	14,139	5.7 %
2024	10	—	674	7,232	2.9 %
2025	6	61,500	521	6,707	2.7 %
2026	32	—	4,624	32,714	13.1 %
2027	10	—	717	8,267	3.3 %
2028	12	—	1,170	7,615	3.0 %
Thereafter	113	—	11,487	163,598	65.6 %
					100.0 %

\*Rentable Square Feet represents total square footage in two MOB investments.

\*\*Annualized Gross Rent refers to the amount of lease revenue that our portfolio would have generated in 2018 if all leases were in effect for the twelve-month calendar year, regardless of the commencement date, maturity date, or renewals. The table excludes leases that auto-renew.

## ITEM 3. LEGAL PROCEEDINGS

On June 15, 2018, East Lake Capital Management LLC and certain related entities, including Regency, filed suit against NHI and NHI-REIT of Axel, LLC, in the District Court of Dallas County, Texas; 95th Judicial District for injunctive and declaratory relief and unspecified monetary damages, including attorney's fees. The suit sought, among other things, to enjoin NHI from making certain references to East Lake in NHI's public filings. In response to this lawsuit, related litigation, and other circumstances, we entered motions calling for the immediate appointment of a receiver and for pre-judgment possession, hearing, and bond.

Resulting from these claims and counterclaims, on December 6, 2018, the plaintiff parties entered into an agreement with NHI under Texas Rule of Civil Procedure 11, which rule ensures the enforceability of an agreement between lawyers in a case when the agreement is in writing and filed in the papers of the court. The agreement provided that Regency vacate our facilities in Indiana and North Carolina on December 7, 2018 and in Tennessee on December 14, 2018. Further, Regency agreed to provide minimal levels of cooperation in transitioning the facilities.

The original libel action of the East Lake affiliated entities survives the Rule 11 agreement and is set to continue in January 2019. NHI is not precluded from further action in damages under terms of the lease.

Our facilities are subject to claims and suits in the ordinary course of business. Our lessees and borrowers have indemnified, and are obligated to continue to indemnify us, against all liabilities arising from the operation of the facilities, and are further obligated to indemnify us against environmental or title problems affecting the real estate underlying such facilities. While there may be lawsuits pending against certain of the owners and/or lessees of the

facilities, management believes that the ultimate resolution of all such pending proceedings will have no material effect on our financial statements.

Table of Contents

## PART II.

## ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

The Company's charter contains certain provisions which are designed to ensure that the Company's status as a REIT is protected for federal income tax purposes. One of the provisions ensures that any transfer (of shares) which would cause NHI to be beneficially owned by fewer than 100 persons or would cause NHI to be "closely-held" under the Internal Revenue Code would be void which, subject to certain exceptions, result in no stockholder being allowed to own, either directly or indirectly pursuant to certain tax attribution rules, more than 9.9% of the Company's common stock with the exception of prior agreements in 1991 which were confirmed in writing in 2008 with the Company's founders Dr. Carl E. Adams and Jennie Mae Adams and their lineal descendants. Based on these agreement, the ownership limit for all other stockholders is approximately 7.5%. If a stockholder's stock ownership exceeds the limit, then such shares over the limit become Excess Stock within the meaning in the Company's charter whose rights to vote and receive dividends in certain situations. Our charter gives our Board of Directors broad powers to prohibit and rescind any attempted transfer in violation of the ownership limits. In addition, W. Andrew Adams' Excess Holder Agreement also provides that he will not own shares of stock in any tenant of the Company if such ownership would cause the Company to constructively own more than a 9.9% interest in such tenant. The purpose of these provisions is to protect the Company's status as a REIT for tax purposes.

In order to qualify for the beneficial tax treatment accorded to a REIT, we must make distributions to holders of our common stock equal on an annual basis to at least 90% of our REIT taxable income (excluding net capital gains), as defined in the Internal Revenue Code. Cash available for distribution to our stockholders is primarily derived from interest payments received on our notes and from rental payments received under our leases. All distributions will be made by us at the discretion of the Board of Directors and will depend on our cash flow and earnings, our financial condition, bank covenants contained in our financing documents and such other factors as the Board of Directors deems relevant. Our REIT taxable income is calculated without reference to our cash flow. Therefore, under certain circumstances, we may not have received cash sufficient to pay our required distributions.

Our common stock is traded on the New York Stock Exchange under the symbol "NHI". As of February 15, 2019, there were 712 holders of record of shares and 45,618 beneficial owners of shares.

We currently maintain two equity compensation plans: the 2005 Stock Option, Restricted Stock and Stock Appreciation Rights Plan (the "2005 Plan") and the 2012 Stock Incentive Plan (the "2012 Plan"). These plans, as amended, have been approved by our stockholders. The following table provides information as of December 31, 2018 about our common stock that may be issued upon the exercise of options under our existing equity compensation plans.

	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in the first column)
Equity compensation plans approved by security holders	920,346	\$69.24	921,669 <sup>1</sup>

<sup>1</sup>These shares remain available for grant under the 2012 Plan.

The following graph demonstrates the performance of the cumulative total return to the stockholders of our common stock during the previous five years in comparison to the cumulative total return on the MSCI US REIT Index and the Standard & Poor's 500 Stock Index. The MSCI US REIT Index is a free float-adjusted market capitalization weighted index that is comprised of Equity REIT securities. The MSCI US REIT Index includes securities with exposure to core real estate (e.g. residential and retail properties) as well as securities with exposure to other types of real estate (e.g. casinos, theaters).

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion and analysis is based primarily on the consolidated financial statements of National Health Investors, Inc. for the periods presented and should be read together with the notes thereto contained in this Annual Report on Form 10-K. Other important factors are identified in "Item 1. Business" and "Item 1A. Risk Factors" above.

Executive Overview

National Health Investors, Inc., established in 1991 as a Maryland corporation, is a self-managed REIT specializing in sale-leaseback, joint-venture, mortgage and mezzanine financing of need-driven and discretionary senior housing and medical investments. Our portfolio consists of lease, mortgage and other note investments in independent living facilities, assisted living facilities, entrance-fee communities, senior living campuses, skilled nursing facilities, specialty hospitals and medical office buildings. Other investments have included marketable securities and, until 2016, a joint venture structured to comply with the provisions of the REIT Investment Diversification Empowerment Act of 2007 ("RIDEA") through which we invested in facility operations managed by an independent third-party. We have funded our real estate investments primarily through: (1) operating cash flow, (2) debt offerings, including bank lines of credit and term debt, both unsecured and secured, and (3) the sale of equity securities.

Portfolio

At December 31, 2018, we had investments in real estate, mortgage and other notes receivable involving 232 facilities located in 33 states. These investments involve 151 senior housing properties, 76 skilled nursing facilities, 3 hospitals, 2 medical office buildings and other notes receivable. These investments (excluding our corporate office of \$2,471,000) consisted of properties with an original cost of \$2,815,894,000, rented under triple-net leases to 30 lessees, and \$246,111,000 aggregate carrying value of mortgage and other notes receivable due from 10 borrowers.

We classify the properties in our portfolio as either senior housing or medical properties. We further classify our senior housing properties as either need-driven (assisted living facilities and senior living campuses) or discretionary (independent living facilities and entrance-fee communities). Medical properties within our portfolio include skilled nursing facilities, medical office buildings and specialty hospitals.

Table of Contents

The following tables summarize our investments in real estate and mortgage and other notes receivable as of December 31, 2018 (dollars in thousands):

Real Estate Properties	Properties	Beds/Sq. Ft.*	Revenue	%	Investment
Senior Housing - Need-Driven					
Assisted Living	93	4,618	\$ 78,628	26.7 %	\$ 854,018
Senior Living Campus	10	1,323	16,372	5.6 %	161,611
Total Senior Housing - Need-Driven	103	5,941	95,000	32.3 %	1,015,629
Senior Housing - Discretionary					
Independent Living	30	3,412	48,683	16.6 %	553,727
Entrance-Fee Communities	10	2,363	50,869	17.3 %	603,234
Total Senior Housing - Discretionary	40	5,775	99,552	33.9 %	1,156,961
Total Senior Housing	143	11,716	194,552	66.2 %	2,172,590
Medical Facilities					
Skilled Nursing Facilities	72	9,342	77,603	26.4 %	576,847
Hospitals	3	181	7,991	2.7 %	55,971
Medical Office Buildings	2	88,517	* 667	0.2 %	10,486
Total Medical Facilities	77		86,261	29.3 %	643,304

## Table of Contents

For the year ended December 31, 2018, our tenants who provided more than 3% of our total revenues were (parent company, in alphabetical order): Bickford Senior Living; Chancellor Health Care; The Ensign Group; Health Services Management; Holiday Retirement; National HealthCare Corporation; and Senior Living Communities.

As of December 31, 2018, our average effective annualized rental income was \$8,421 per bed for SNFs, \$17,105 per unit for ALFs, \$13,883 per unit for ILFs, \$21,573 per unit for EFCs, \$44,150 per bed for hospitals, and \$8 per square foot for MOBs.

### Areas of Focus

We are evaluating and will likely make real estate and note investments in 2019 while we continue to monitor and improve our existing properties. We seek tenants who will become mission-oriented partners in relationships where our business goals are aligned. This approach aims to fuel steady, and thus, enduring growth for those partners and for NHI. Within the context of our growth model, we rely on a cost-effective access to debt and equity capital to finance acquisitions that will drive our earnings. There is significant competition for healthcare assets from other REITs, both public and private, and from private equity sources. Large-scale portfolios continue to command premium pricing, due to the continued abundance of private and foreign buyers seeking to invest in healthcare real estate. This combination of circumstances places a premium on our ability to execute acquisitions and negotiate leases that will generate meaningful earnings growth for our shareholders. We emphasize growth with our existing tenants and borrowers as a way to insulate us from other competition.

With lower capitalization rates for existing healthcare facilities, there has been increased interest in constructing new facilities in hopes of generating better returns on invested capital. Using our relationship-driven model, we continue to look for opportunities to support new and existing tenants and borrowers with the capital needed to expand existing facilities and to initiate ground-up development of new facilities. We concentrate our efforts in those markets where there is both a demonstrated demand for a particular product type and where we perceive we have a competitive advantage. The projects we agree to finance have attractive upside potential and are expected to provide above-average returns to our shareholders to mitigate the risks inherent with property development and construction.

Following three 25 basis-point increases in 2017, the Federal Open Market Committee of the Federal Reserve announced four further increases during 2018. As inflation is expected to rise, officials have forecast a total of two increases in 2019. However, the actual path the federal funds rate takes will depend on the changing economic outlook as informed by incoming data. The anticipation of past and further increases in the federal funds rate in 2018 and beyond has been a primary source of much volatility in REIT equity markets. As a result, there will be pressure on the spread between our cost of capital and the returns we earn. We expect that pressure to be partially mitigated by market forces that would tend to result in higher capitalization rates for healthcare assets and higher lease rates indicative of historical levels. Our cost of capital has increased over the past year as we transition some of our short term revolving borrowings into debt instruments with longer maturities and fixed interest rates. Managing long-term risk involves trade-offs with the competing alternative goal of maximizing short-term profitability. Our intention is to strike an appropriate balance between these competing interests within the context of our investor profile. As interest rates rise, our share price may decline as investors adjust prices to reflect a dividend yield that is sufficiently in excess of a risk-free rate.

For the year ended December 31, 2018, approximately 27% of our revenue was derived from operators of our skilled nursing facilities that receive a significant portion of their revenue from governmental payors, primarily Medicare and Medicaid. Such revenues are subject annually to statutory and regulatory changes and in recent years have been reduced due to federal and state budgetary pressures. Over the past five years, we have selectively diversified our portfolio by directing a significant portion of our investments into properties which do not rely primarily on Medicare and Medicaid reimbursement, but rather on private pay sources (assisted living and memory care facilities, senior

living campuses, independent living facilities and entrance-fee communities). We will occasionally acquire skilled nursing facilities in good physical condition with a proven operator and strong local market fundamentals, because diversification implies a periodic rebalancing, but our recent investment focus has been on acquiring need-driven and discretionary senior housing assets.

For individual tenant revenue as a percentage of total lease revenue, Bickford is our largest assisted living tenant, an affiliate of Holiday is our largest independent living tenant, NHC is our largest skilled nursing tenant and Senior Living Communities is our largest entrance-fee community tenant. Our shift toward private payor facilities, as well as our expansion into the discretionary senior housing market, has further resulted in a portfolio whose current composition is relatively balanced between medical facilities, need-driven and discretionary senior housing.

We manage our business with a goal of increasing the regular annual dividends paid to shareholders. Our Board of Directors approves a regular quarterly dividend which is reflective of expected taxable income on a recurring basis. Our transactions that are infrequent and non-recurring that generate additional taxable income have been distributed to shareholders in the form of special dividends. Taxable income is determined in accordance with the Internal Revenue Code and differs from net income for

Table of Contents

financial statements purposes determined in accordance with U.S. generally accepted accounting principles. Our goal of increasing annual dividends requires a careful balance between identification of high-quality lease and mortgage assets in which to invest and the cost of our capital with which to fund such investments. We consider the competing interests of short and long-term debt (interest rates, maturities and other terms) versus the higher cost of new equity. We accept some level of risk associated with leveraging our investments. We intend to continue to make new investments that meet our underwriting criteria and where the spreads over our cost of capital will generate sufficient returns to our shareholders.

Our dividends per share for the last three years are as follows:

2018	2017	2016
\$4.00	\$3.80	\$3.60

Our investments in healthcare real estate have been partially accomplished by our ability to effectively leverage our balance sheet. However, we continue to maintain a relatively low-leverage balance sheet compared with many in our peer group. We believe that our fixed charge coverage ratio, which is the ratio of Adjusted EBITDA (earnings before interest, taxes, depreciation and amortization, including amounts in discontinued operations, excluding real estate asset impairments and gains on dispositions) to fixed charges (interest expense at contractual rates net of capitalized interest and principal payments on debt), and the ratio of consolidated net debt to Adjusted EBITDA are meaningful measures of our ability to service our debt. We use these two measures as a useful basis to compare the strength of our balance sheet with those in our peer group. We also believe this gives us a competitive advantage when accessing debt markets.

We calculate our fixed charge coverage ratio as approximately 6.0x for the year ended December 31, 2018 (see our discussion of Adjusted EBITDA and a reconciliation to our net income on page 52). Giving effect to our acquisitions and financings on an annualized basis, our consolidated net debt-to Adjusted EBITDA ratio is approximately 4.5x for the year ended December 31, 2018 (in thousands):

Consolidated Total Debt	\$1,281,675
Less: cash and cash equivalents	(4,659 )
Consolidated Net Debt	\$1,277,016
Adjusted EBITDA	\$280,190
Annualized impact of recent investments	2,175
	\$282,365

Consolidated Net Debt to Adjusted EBITDA 4.5 x

According to the Administration on Aging (“AoA”) of the US Department of Health and Human Services, in 2016, the latest year for which data is available, 49.2 million people were age 65 or older in the United States (a 33% increase over the last ten years). Census estimates showed that, by 2040, those 65 or older are expected to constitute 21.7% of the population. The population aged 85 and above is projected to rise from 6.4 million in 2016 to 14.6 million in the US by 2040 (a 129% increase).

Per the AoA, in 2015, the median value of homes owned by older homeowners age 75 and over was \$150,000 (with a median purchase price of \$53,000). In comparison, the median home value of all homeowners was \$180,000. Of the 11.9 million households headed by persons age 75 and over in 2015, 76% were owners. About 78% of these older homeowners in 2015 owned their homes free and clear. Home ownership provides the elderly with greater freedom to choose their lifestyles.

Equipped with the basics of financial security, many will be economically able to enter the market for senior housing. These strong demographic trends provide the context for continued growth in senior housing in 2019 and the years ahead. We plan to fund any new real estate and mortgage investments during 2019 using our liquid assets and debt financing. As the weight of additional debt resulting from new acquisitions suggests the need to rebalance our capital structure, we would then expect to access the capital markets through an at-the-market (“ATM”) or other equity offering. Our disciplined investment strategy implemented through measured increments of debt and equity sets the stage for access to capital at the lowest possible rates, annual dividend growth, continued low leverage, a portfolio of diversified, high-quality assets, and business relationships with experienced operators whom we make our priority, continue to be the key drivers of our business plan.

## Table of Contents

### Critical Accounting Policies

#### Estimates

We prepare our consolidated financial statements in conformity with accounting principles generally accepted in the United States of America. These accounting principles require us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. If actual experience differs from the assumptions and other considerations used in estimating amounts reflected in our consolidated financial statements, the resulting changes could have a material adverse effect on our consolidated results of operations, liquidity and/or financial condition.

We consider an accounting estimate or assumption critical if:

1. the nature of the estimates or assumptions is material due to the levels of subjectivity and judgment necessary to account for highly uncertain matters or the susceptibility of such matters to change; and
2. the impact of the estimates and assumptions on financial condition or operating performance is material.

#### Valuations and Impairments

Our tenants and borrowers who operate SNFs derive their revenues primarily from Medicare, Medicaid and other government programs. Amounts paid under these government programs are subject to legislative and government budget constraints. From time to time, there may be material changes in government reimbursement. In the past, SNFs have experienced material reductions in government reimbursement.

The long-term health care industry has experienced significant professional liability claims which have resulted in an increase in the cost of insurance to cover potential claims. In previous years, these factors have combined to cause a number of bankruptcy filings, bankruptcy court rulings and court judgments affecting our lessees and borrowers. In prior years, we have determined that impairment of certain of our loan investments had occurred as a result of these events.

We evaluate the recoverability of the carrying values of our properties on a property-by-property basis. On a quarterly basis, we review our properties for recoverability when events or circumstances, including significant physical changes in the property, significant adverse changes in general economic conditions and significant deteriorations of the underlying cash flows of the property, indicate that the carrying amount of the property may not be recoverable. The need to recognize an impairment charge is based on estimated undiscounted future cash flows from a property compared to the carrying value of that property. If recognition of an impairment charge is necessary, it is measured as the amount by which the carrying amount of the property exceeds the fair value of the property.

For our mortgage and other notes receivable, we evaluate the estimated collectibility of contractual loan payments and general economic conditions on an instrument-by-instrument basis. On a quarterly basis, we review our notes receivable for ability to realize on such notes when events or circumstances, including the non-receipt of contractual principal and interest payments, significant deteriorations of the financial condition of the borrower and significant adverse changes in general economic conditions, indicate that the carrying amount of the note receivable may not be recoverable. If necessary, impairment is measured as the amount by which the carrying amount exceeds the fair value as measured by the discounted cash flows expected to be received under the note receivable or, if foreclosure is probable, the fair value of the collateral securing the note receivable.

The determination of fair value and whether a shortfall in operating revenues or the existence of operating losses is indicative of a loss in value that is other than temporary involves significant judgment. Our estimates consider all available evidence including, as appropriate, the present value of the expected future cash flows discounted at market rates, general economic conditions and trends, the duration of the fair value deficiency, and any other relevant factors. While we believe our assumptions are reasonable, changes in these assumptions may have a material impact on our financial results.

While we believe that the carrying amounts of our properties are recoverable and our notes receivable and other investments are realizable, it is possible that future events could require us to make significant adjustments or revisions to these estimates.

#### Revenue Recognition

We collect rent and interest from our tenants and borrowers. Generally, our policy is to recognize income on an accrual basis as earned. However, when we determine, based on current collections and the lack of expected future collections, that rent or

## Table of Contents

interest is not probable of collection until received, our policy is to recognize rental or interest income when assured, which we consider to be the period in which cash is received or accrued on the basis of tenant security deposits available to us for the recognition of lease revenue in the period in which it was earned. We identify investments as nonperforming if a required payment is not received within 30 days of the date it is due. This policy could cause our revenues to vary significantly from period to period. Rental income from minimum lease payments under our leases is recognized on a straight-line basis to the extent that future lease payments are considered collectible. Lease payments that depend on a factor directly related to future use of the property, such as an increase in annual revenues over base year revenues, are considered to be contingent rentals and are included in rental income when they are determinable and earned.

## REIT Qualification

As part of the process of preparing our consolidated financial statements, significant management judgment is required to evaluate our compliance with REIT requirements. Our determinations are based on interpretation of tax laws, and our conclusions may have an impact on the income tax expense recognized. We believe that we have operated our business so as to qualify as a REIT under Sections 856 through 860 of the Internal Revenue Code, and we intend to continue to operate in such a manner, but no assurance can be given that we will be able to so qualify at all times. Until September 30, 2016, we operated a taxable REIT subsidiary under a joint venture structured to comply with the provisions of the RIDEA through which we invested in facility operations managed by independent third-parties. On September 30, 2016, NHI and Bickford entered into a definitive agreement terminating the joint venture. In the past we recorded income tax expense or benefit with respect to the subsidiary which was taxed under provisions similar to those applicable to regular corporations. Aside from such income taxes that may have been applicable to the taxable income in our taxable REIT subsidiary, we are not subject to U.S. federal income tax, provided that we continue to qualify as a REIT and make distributions to stockholders equal to or in excess of our taxable income. This treatment substantially eliminates the “double taxation” (at the corporate and stockholder levels) that typically applies to corporate dividends. Our failure to continue to qualify under the applicable REIT qualification rules and regulations would cause us to owe state and federal income taxes and would have a material adverse impact on our financial position, results of operations and cash flows.

## Principles of Consolidation

The consolidated financial statements include our accounts, the accounts of our wholly-owned subsidiaries and the accounts of joint ventures in which we own a majority voting interest with the ability to control operations and where no substantive participating rights or substantive kick-out rights have been granted to the noncontrolling interests. In addition, we consolidate a legal entity deemed to be a variable interest entity (“VIE”) when we determine that we are the VIE’s primary beneficiary. All material inter-company transactions and balances have been eliminated in consolidation.

We apply Financial Accounting Standards Board (“FASB”) guidance for our arrangements with VIEs which requires us to identify entities for which control is achieved through means other than voting rights and to determine which business enterprise is the primary beneficiary of the VIE. A VIE is broadly defined as an entity with one or more of the following characteristics: (a) the total equity investment at risk is insufficient to finance the entity’s activities without additional subordinated financial support; (b) as a group, the holders of the equity investment at risk lack (i) the ability to make decisions about the entity’s activities through voting or similar rights, (ii) the obligation to absorb the expected losses of the entity, or (iii) the right to receive the expected residual returns of the entity; or (c) the equity investors have voting rights that are not proportional to their economic interests, and substantially all of the entity’s activities either involve, or are conducted on behalf of, an investor that has disproportionately few voting rights. We may change our assessment of a VIE due to events such as modifications of contractual arrangements that affect the characteristics or adequacy of the entity’s equity investments at risk and the disposal of all or a portion of an interest

held by the primary beneficiary.

#### Real Estate Properties

Real property we develop is recorded at cost, including the capitalization of interest during construction. The cost of real property investments we acquire is allocated to net tangible and identifiable intangible assets based on their relative fair values. We make estimates as part of our allocation of the purchase price of acquisitions to the various components of the acquisition based upon the fair value of each component. For properties acquired in transactions accounted for as asset purchases, the purchase price allocation is based on the relative fair values of the assets acquired. Cost includes the amount of contingent consideration, if any, deemed to be probable at the acquisition date. Contingent consideration is deemed to be probable to the extent that a significant reversal in amounts recognized is not likely to occur when the uncertainty associated with the contingent consideration is subsequently resolved. The most significant components of our allocations are typically the allocation of fair value to land, equipment, buildings and other improvements, and intangible assets, if any. Our estimates of the values of these components will affect the amount of depreciation and amortization we record over the estimated useful life of the property acquired or the remaining lease term.

31

---

Table of Contents

Our leases are typically structured as “triple net leases” on single-tenant properties having an initial leasehold term of 10 to 15 years with one or more 5-year renewal options. As such, there may be reporting periods in which we experience few, if any, lease renewals or expirations. During the year ended December 31, 2018, we did not have any renewing or expiring leases.

Most of our existing leases contain annual escalators in rent payments. For financial statement purposes, rental income is recognized on a straight-line basis over the term of the lease. Certain of our operators hold purchase options allowing them to acquire properties they currently lease from NHI. For options open or coming open in the short term, we are engaged in negotiations to continue as lessor or in some other capacity.

We adjust rental income for the amortization of payments recorded as the result of the eventual settlement of commitments and contingencies listed later in Item 7 as lease inducements. Amortization of these payments against revenues was \$387,000, \$119,000 and \$40,000 for the years ended December 31, 2018, 2017 and 2016, respectively.

**Major Tenants**

As discussed in Note 2 to the consolidated financial statements, we have four lessees (including their affiliated entities, which are the legal tenants) from whom we individually derive at least 10% of our rental income as follows (dollars in thousands):

		Original	Rental Income			
		Investment	Year Ended December		Lease	
	Asset Class	Amount	2018	2017	Renewal	
Senior Living Communities	EFC	\$551,459	\$45,868	16%	\$45,735	17% 2029
Bickford Senior Living	ALF	531,918	50,093	18%	41,606	16% Various
Holiday Retirement	ILF	493,378	43,311	15%	43,817	17% 2035
National HealthCare Corporation	SNF	171,297	37,843	13%	37,467	14% 2026
All others	Various	1,067,842	103,698	38%	96,544	36% Various
		\$2,815,894	\$280,813		\$265,169	

Straight-line rent of \$5,436,000 and \$6,984,000 was recognized from the Senior Living lease for the years ended December 31, 2018 and 2017, respectively. Straight-line rent of \$5,028,000 and \$5,102,000 was recognized from the Bickford leases for the years ended December 31, 2018 and 2017, respectively. Straight-line rent of \$5,616,000 and \$7,397,000 was recognized from the Holiday lease for the years ended December 31, 2018 and 2017, respectively. In November 2018, we announced an agreement with Holiday to receive approximately \$65,762,000 in specified cash and other consideration in exchange for a reduced annual rental payment for the existing 25 properties, beginning at \$31,500,000 for 2019, as discussed below under the heading Other Portfolio Activity. For NHC, rent escalations are based on a percentage increase in revenue over a base year and do not give rise to non-cash, straight-line rental income.

Our operators report to us the results of their operations on a periodic basis, which we in turn subject to further analysis as a means of monitoring potential concerns within our portfolio. We have identified EBITDARM (earnings before interest, taxes, depreciation, amortization, rent and management fees) as the most elemental barometer of success for our tenants, based on results they have reported to us. We believe EBITDARM is useful in our most fundamental analyses, as it is a property level measure of our operators’ success, by eliminating the effects of the operator’s method of acquiring the use of its assets (interest and rent), its non-cash expenses (depreciation and amortization), expenses that are dependent on its level of success (income taxes), and also excluding the effect of the operator’s payment of its management fees, as typically those fees are contractually subordinate to our lease payment.

For operators of our entrance-fee communities, our calculation of EBITDARM includes other cash flow adjustments typical of the industry which may include, but are not limited to, net cash flows from entrance fees; amortization of deferred entrance fees; adjustments for tenant rent obligations, depreciation and amortization; and management fee true-ups. The eliminations and adjustments reflect covenants in our leases and provide a comparable basis for assessing our various relationships

We believe that EBITDARM is a useful way to analyze the cash potential of a group of assets. From EBITDARM we calculate a lease coverage ratio (EBITDARM/Cash Rent), measuring the ability of the operator to meet its monthly rental obligation. In addition to EBITDARM and the lease coverage ratio, we rely on, a careful balance sheet analysis, and other analytical procedures to help us identify potential areas of concern relative to our operators' ability to generate sufficient liquidity to meet their obligations, including their obligation to continue to pay the rent due to us. Typical among our operators is a varying lag in reporting to us the results of their operations. Across our portfolio, however, our operators report their results, at the latest, within ninety days of month's end. For computational purposes, we exclude development and lease-up properties that have been in operation less than

Table of Contents

24 months and selected immaterial properties identified in 2019 as available for sale. For stabilized acquisitions in the portfolio less than 24 months and renewing leases with changes in scheduled rent, we include pro forma cash rent. For this reporting period, we have excluded results from SH Regency Leasing, LLC, as noted below under the heading Other Portfolio Activity.

The results by asset type are presented below on a trailing twelve-month basis, as of September 30, 2018 and 2017 (the most recent periods available):

<sup>1</sup> NHC based on corporate-level fixed-charge coverage and includes 3 independent living facilities

Fluctuations in portfolio coverage are a result of market and economic trends, local market competition, and regulatory factors as well as the operational success of our tenants. We use the results of individual leases to inform our decision making with respect to specific tenants, but trends described above by property type and operator bear analysis. Our Need-Driven SHO portfolio shows a decline brought about primarily by a softening in occupancy within particular markets, as well as rising wage pressures. For many of the affected operators, as is typical of our portfolio in

general, NHI has significant security deposits in place and/or corporate guarantees should actual cash rental shortfalls eventually materialize. In certain instances, our operators may elect to increase their security deposits with us in an amount equal to the coverage shortfall, and, upon subsequent compliance with the required lease coverage ratio, the operator would then be entitled to a full refund. The metrics presented in the tables above give no effect to the presence of these security deposits. For Skilled Nursing, coverage in the All Other segment of our portfolio has improved due to a better operating environment for the segment, as a whole, and for the Ensign portfolio transition, in particular. Each MOB's coverage is driven by the underlying performance of its on-campus hospital as the tenant or guarantor under the lease. In Texas, the aftermath of Hurricane Harvey in 2017 witnessed the shut-down of the guarantor hospital for a few days resulting in lost revenue, overtime and other one-time charges, negatively impacting the hospital's bottom-line and

## Table of Contents

resultant coverage ratios for that MOB. Within the context of this event-specific occurrence, it is also typical of MOB operations that there may be other large fluctuations in coverage resulting from hospital operations.

### RIDEA

On September 30, 2016, NHI and Sycamore Street, LLC (“Sycamore”), an affiliate of Bickford, entered into a definitive agreement terminating our joint venture which consisted of the ownership and operation of 40 properties and converting Bickford’s participation to a triple-net tenancy with assumption of existing leases and terms. Through September 30, 2016, NHI owned an 85% equity interest and Sycamore owned a 15% equity interest in our consolidated subsidiary, PropCo which owned 40 assisted living/memory care facilities, three new facilities and two facilities in development. The facilities had been leased to OpCo, in which NHI previously held a non-controlling 85% ownership interest. The facilities are managed by Bickford. The joint venture was structured to comply with the provisions of RIDEA. For the combined transaction, we recognized a gain of \$1,657,000 on the sale of OpCo; we recognized \$462,000 of income tax expense in applying a full valuation allowance to our state net operating loss carry-forwards on our Taxable REIT Subsidiary; Bickford’s non-controlling interest was de-recognized; and the difference between the fair value of NHI’s cost allocated to the redemption and the carrying amount of the 15% non-controlling interest was recorded as an adjustment to equity through additional-paid-in capital.

### Potential Effects of Medicare Reimbursement

Our SNF operators receive a significant portion of their revenues from governmental payors, primarily Medicare (federal) and Medicaid (states). Changes in reimbursement rates and limits on the scope of services reimbursed to skilled nursing facilities could have a material impact on the operators’ liquidity and financial condition. On August 1, 2018, the Centers for Medicare and Medicaid Services (“CMS”) announced the CMS Skilled Nursing Prospective Payment System (“PPS”) final rule whereby, effective October 1, 2019, its Patient-Driven Payment Model (“PDPM”) will replace Resource Utilization Groups (“RUGs”)-IV. Facilities will have one year to transition to PDPM from RUGs-IV by the October 1, 2019 implementation date. PDPM is designed as a more simplified payment model than RUGs-IV and is projected to reduce administrative costs and foster innovation to improve care to patients. Regulators forecast a \$2 billion reduction in provider costs over 10 years as a result of simplified paperwork requirements for resident assessments. The new model shifts care delivery under Medicare away from fee-for-service, which in the past has based reimbursement on the amount of care provided, to focus on value-based care, which will base reimbursement on clinical complexity and the resident’s conditions and care needs. The final rule also established a 2.4% market basket increase beginning October 1, 2018.

We currently estimate that our borrowers and lessees will find these Medicare increases to be adequate in the near term due to their credit quality, profitability and their debt or lease coverage ratios, although no assurances can be given as to what the ultimate effect that PDPM increases on an annual basis will have on each of our borrowers and lessees. According to industry studies, state Medicaid funding is not expected to keep pace with inflation. Any future acquisitions by NHI of skilled nursing facilities are planned on a selective basis, with emphasis on operator quality and newer construction.

				\$364,344
2019				
Lease Investments				
Wingate Healthcare	January 2019	1	SHO	\$52,200
Holiday Retirement	January 2019	1	SHO	38,000
				\$90,200

## Bickford

As of December 31, 2018 our Bickford lease portfolio is structured as follows (in thousands):

	Lease Expiration					Total
	June 2023	September 2024	September 2027	May 2031	April 2033	
Number of Properties	13	10	4	20	5	52
2018 Annual Contractual Rent	\$11,133	\$9,264	\$1,515	\$19,988	\$3,165	\$45,065
2018 Straight Line Rent Adjustment	588	(260)	221	3,865	614	5,028
Total Revenues	\$11,721	\$9,004	\$1,736	\$23,853	\$3,779	\$50,093

On April 30, 2018, we acquired an assisted living/memory-care portfolio in Ohio and Pennsylvania totaling 320 units and comprising five facilities, one of which is subject to a ground lease with remaining term, including extensions, of 50 years. The purchase price was \$69,750,000, inclusive of \$500,000 in closing costs and \$1,750,000 in specified capital improvements, which will be added to the lease base upon funding. In addition to the cash consideration stated above, we recorded an intangible liability of \$590,000 to recognize our above-market obligation for the ground lease. We included this portfolio in a separate master lease with Bickford which provides for a lease rate of 6.85%, with annual fixed escalators over a term of 15 years plus renewal options, subject to a fair market value rent reset feature available to NHI between years three and five.

At December 31, 2018, our ALF construction loans to Bickford are summarized as follows:

Commencement	Rate	Maturity	Commitment	Drawn	Location
July 2016	9%	5 years	\$14,000,000	\$(13,047,000)	Illinois
January 2017	9%	5 years	14,000,000	(11,931,000)	Michigan

Edgar Filing: NATIONAL HEALTH INVESTORS INC - Form 10-K

January 2018	9%	5 years	14,000,000	(4,515,000	)	Virginia
July 2018	9%	5 years	14,700,000	(2,978,000	)	Michigan
			\$56,700,000	\$(32,471,000)		

The construction loans are secured by first mortgage liens on substantially all real and personal property as well as a pledge of any and all leases or agreements which may grant a right of use to the subject property. Usual and customary covenants extend to the agreements, including the borrower's obligation for payment of insurance and taxes. NHI has a purchase option on the properties at stabilization, whereby the lease rate will be set with a floor of 9.55%, based on NHI's total investment, plus fixed

## Table of Contents

annual escalators. On these and future loan development projects, Bickford as the borrower is entitled to up to \$2,000,000 per project in incentive loan draws based upon the achievement of predetermined operational milestones, the funding of which will increase the principal amount, NHI's future purchase price under option and, upon exercise, eventual lease payment to NHI.

Our loans to Bickford represent a variable interest as do our leases which are considered analogous to financing arrangements. Bickford is structured to limit liability for potential claims for damages, is capitalized to achieve that purpose and is considered a VIE.

### Ensign

On January 12, 2018, NHI acquired from a developer a 121-bed skilled nursing facility in Waxahachie, Texas for a cash investment of \$14,404,000, and in May, we acquired from another developer two 132-bed skilled nursing facilities in Garland and Fort Worth, Texas, for a cash investment totaling \$29,000,000. Additional consideration of \$1,275,000 for the Waxahachie property and \$1,250,000 for each of Garland and Ft. Worth were contributed by the lessee, The Ensign Group (“Ensign”). We have capitalized the tenant contributions as a component of the cost of the facilities and have recorded the contributions as deferred revenue, which we are amortizing to revenue over the term of the master lease to which these properties have now been added. The remaining term of the master lease extends through April 2031, plus renewal options. The blended initial lease rate is set at 8.1%, subject to annual escalators based on prevailing inflation rates. The acquisitions were accounted for as asset purchases and fulfill our original commitment to acquire and lease to Ensign four skilled nursing facilities in New Braunfels, Waxahachie, Garland and Fort Worth, Texas.

### Comfort Care

On May 31, 2018, NHI acquired two assisted living facilities comprising a total of 106 units in Bridgeport and Saginaw, Michigan for a cash investment of \$17,140,000, inclusive of \$100,000 in closing costs. We leased the facilities to affiliates of Comfort Care Senior Living (“Comfort Care”) at an initial lease rate of 7.25% with annual escalators adjusted for prevailing inflation rates, subject to a floor and ceiling of 2% and 3%, respectively. The lease provides for an initial six-month cash escrow. With the acquisition, NHI also obtained fair value-based purchase options for two newly constructed facilities operated by Comfort Care, with the purchase option windows to open upon stabilization. The acquisition was accounted for as an asset purchase.

### Ignite

In December 2018, we reached an agreement with Ignite Team Partners, LLC, d/b/a Ignite Medical Resorts, to develop a \$25,350,000 skilled nursing facility in suburban Milwaukee. The facility is currently under construction with an expected opening date in the fourth quarter of 2019. The facility will be leased to Ignite Healthcare, Inc. (“Ignite”) for a term of 12 years, with two ten-year renewal options, at an initial lease rate of 9.5% plus annual fixed escalators. Ignite will be eligible for an earn-out of up to \$2,000,000, to be funded beginning in 2026 upon the attainment of specified metrics. NHI will have a right of first offer on future Ignite projects. We accounted for the transaction as an asset purchase. At December 31, 2018, we had funded \$4,674,000, including \$2,000,000 for the purchase of land.

### Life Care Services

On December 21, 2018 we entered into an agreement to lend LCS-Westminster Partnership IV LLP (“Life Care Services IV”), an affiliate of Life Care Services, the manager of the facility, up to \$180,000,000. The loan agreement conveys a mortgage interest and will facilitate the construction of Phase II of Sagewood, a Type-A Continuing Care

Retirement Community in Scottsdale, AZ.

The loan takes the form of two notes under a master credit agreement. The senior note (“Note A”) totals \$118,800,000 at a 7.25% interest rate with 10 basis-point escalators after year three and has a term of 10 years. We have funded \$76,653,000 of Note A as of December 31, 2018. Note A is interest-only and is locked to prepayment until January 2021. After 2020, the prepayment penalty starts at 2% and declines to 1% in 2022. The second note (“Note B”) is a construction loan for up to \$61,200,000 at an annual interest rate of 8.50% and carries a five-year maturity. We anticipate funding Note B through April 2020 and anticipate substantial repayment with new resident entrance fees upon the opening of Phase II. The total amount funded on Note B was \$10,165,000 as of December 31, 2018.

Wingate

On January 15, 2019, we acquired a 267-unit senior living campus in Massachusetts for a purchase price of \$50,300,000, including closing costs of \$300,000. The facility is being leased to Wingate Healthcare, Inc. (“Wingate”) for a term of 10 years, with three five-year renewal options, at an initial lease rate of 7.5% plus annual fixed escalators. We have committed to the

36

---

## Table of Contents

additional funding of up to \$1,900,000 in capital improvements, and the lease provides for incentives of \$5,000,000 to become available beginning in 2020 upon the attainment of certain operating metrics. NHI will have a right of first offer on two additional Wingate-operated facilities. We accounted for the transaction as an asset purchase.

### Other Lease Portfolio Activity

#### Holiday

As of December 31, 2018, we leased 25 independent living facilities to an affiliate of Holiday Retirement (“Holiday”) at an original cost of \$493,000,000. The 17-year master lease began in December 2013 and provides for a minimum annual escalator of 3.5% after 2017.

Of our total revenues, \$43,311,000 (15%), \$43,817,000 (16%) and \$43,817,000 (18%) were derived from Holiday for the years ended December 31, 2018, 2017 and 2016, respectively, including \$5,616,000, \$7,397,000 and \$8,965,000 in straight-line rent, respectively. Our tenant operates the facilities pursuant to a management agreement with a Holiday-affiliated manager.

In November 2018, we entered into a lease amendment and guaranty release (“the Agreement”) with Holiday. The Agreement extends the term of the lease, increases required minimum capital expenditure per unit and provides NHI with stronger projected 2019 lease coverage ratio. Below is a summary of the provisions of the new agreement:

We are to receive consideration of approximately \$65,762,000 consisting of a combination of cash and real estate equaling \$55,125,000 and the forfeiture to us of \$10,637,000 which is one-half of the original \$21,275,000 security deposit.

The agreement provided that, in lieu of cash mentioned above, we could have sole discretion to acquire a Holiday property that will be leased back to Holiday at an agreed-upon rent and subject to the same terms and conditions of the amended master lease. On January 31, 2019, we acquired a senior housing facility in Vero Beach, Florida as discussed in Note 15.

The lease maturity is extended by five years to December 31, 2035, and will be secured by the remaining half of the NHI-held security deposit. Additionally, NHI is requiring \$5,000,000 of equity to be contributed by the parent into the Holiday tenant entity (“the Credit Enhancement”). The use of the Credit Enhancement will be limited to payment of NHI rent and NHI-approved capital expenditures. Future return of the Credit Enhancement will further be limited by performance measures, including liquidity and lease service coverage ratio covenants. The Agreement also requires that \$6,500,000 of equity be contributed to the Holiday management company.

Effective January 1, 2019, Holiday rent was reset to \$31,500,000 for the existing 25 properties, as opposed to the \$39,000,000 previously obligated, with escalators commencing annually November 1, 2020, equal to the greater of 2.0% or 45% of trailing 12 months year over year revenue growth of the NHI/Holiday portfolio, not to exceed 3.0%.

We have committed to invest up to \$5,000,000 in capital expenditures into the communities at a 7.0% lease rate on funds drawn. In addition, Holiday has committed to a minimum of \$1,500 per unit in annual capital expenditures.

NHI and Holiday are reviewing the portfolio to identify underperforming properties within the existing Holiday lease. A subsequent sale of properties, if any, would reduce the rent owed us by 7.0% of the net proceeds received by NHI. Stated levels of our security deposit and tenant Credit Enhancement will not be adjusted as a result of any future sale.

The agreement calls for all conditions to be satisfied by late April 2019.

We will amortize to income the net proceeds received from Holiday under the Agreement so that cash or other consideration received in 2019 will be adjusted to deferred revenue/expense, resulting in the recognition of annual revenues from this lease through 2035 of \$37,748,000 on a straight-line basis. From 2019 through June 2022 we will include the deferred revenue balance of the straight-line payable for this lease among other liabilities on our balance sheet. After June 2022, cumulative straight-line amortization of the deferred revenue/expense associated with the Holiday lease will result in the more typical asset balance.

#### Tenant Non-Compliance

#### Affiliates of East Lake

In documents we have previously filed with and furnished to the SEC, we have used the shorthand “East Lake” to refer to the East Lake Capital Management affiliated entities for whom we have acted or continue to act as landlord. These entities consist of

Table of Contents

EL FW Intermediary I, LLC (for the Freshwater/Watermark continuing care retirement communities) and SH Regency Leasing, LLC (for the three assisted living facilities in Tennessee, Indiana and North Carolina referred to as “Regency”).

On June 15, 2018, East Lake Capital Management LLC and certain related entities, including Regency, filed suit against NHI and NHI-REIT of Axel, LLC, in the District Court of Dallas County, Texas; 95th Judicial District for injunctive and declaratory relief and unspecified monetary damages, including attorney’s fees. The suit sought, among other things, to enjoin NHI from making certain references to East Lake in NHI’s public filings. In response to this lawsuit, related litigation, and other circumstances, we entered motions calling for the immediate appointment of a receiver and for pre-judgment possession, hearing, and bond.

Resulting from these claims and counterclaims, on December 6, 2018, the plaintiff parties entered into an agreement with NHI under Texas Rule of Civil Procedure 11, which rule ensures the enforceability of an agreement between lawyers in a case when the agreement is in writing and filed in the papers of the court. As provided by the agreement, Regency vacated our facilities in Indiana and North Carolina on December 7, 2018 and in Tennessee on December 14, 2018. Due to a decrease in occupancy and the deferral of needed maintenance and capital expenditures related to their operation, NHI made arrangements with operators to manage the three facilities. NHI will receive 95% of operating cash flow, if any, as generated by the facilities until such time as operations become stabilized or more formal agreements are entered into.

The original libel action of the East Lake affiliated entities survives the Rule 11 agreement and is set to continue in February 2019. NHI is not precluded from further action in damages under terms of the lease.

As of December 31, 2018, based on our assessment of likely undiscounted cash flows we determined no impairment charge was required on the land, building and improvements formerly leased to Regency. We wrote off straight-line receivables from the Regency properties totaling \$1,820,000 during the fourth quarter of 2018 and included this amount in loan and realty losses in our consolidated statement of income.

Of our total revenues, \$5,103,000 (2%), \$5,466,000 (2%), and \$5,444,000 (2%) in lease revenues were derived from Regency for the years ended December 31, 2018, 2017 and 2016, respectively.

Other

In the second quarter of 2018, we identified a single-property lease with a tenant in Wisconsin as non-performing. Lease revenues from the tenant have comprised less than 1% of our rental income, and the tenant is two months, or \$840,000, in arrears on its rent payments to us as of December 31, 2018. In accordance with our revenue recognition policies, we will recognize future rental income from the lease in the period in which cash is received. Additionally, we may transition the lease to a new tenant. As a consequence of this course of action, the related straight-line receivable is considered uncollectible. Accordingly, in June 2018, we wrote off the balance of \$1,436,000 pertaining to this tenant, included this amount in loan and realty losses in our consolidated statement of income and we ceased recording straight-line rent income. Personal guarantees totaling \$3,000,000 remain in place.

Another of our tenants, The LaSalle Group, with five buildings in Illinois and Texas, is in material non-compliance with provisions of our lease regarding mandated coverage ratios, working capital requirements and timeliness of rent payments. Lease revenues from the tenant have comprised less than 2% of our rental income, and the tenant is two months in arrears on its rent payments to us as of December 31, 2018. As of October 31, 2018, we wrote off the accumulated straight-line rent receivable of \$1,496,000, we ceased recording straight-line rent income, and we adopted the cash basis for recognition of revenues from this tenant. We have made no rent concessions to the tenant as of December 31, 2018, and we are pursuing our remedies to the full extent of our agreements. The tenant has

requested forbearance, though no assurance can be given as of the date of this filing that an effective forbearance agreement can be reached.

Based on our assessment of current operations and the availability of suitable operating partners, we may seek new tenants or managers for the other properties mentioned above. If we enter into a management agreement rather than a lease as we seek to stabilize the operations of these facilities and if our resulting operating partner does not have adequate liquidity to accept the risks and rewards of ownership, NHI might be deemed the primary beneficiary of the operations and might be required to consolidate those statements of financial position and results of operations of the managers or operating partners into our consolidated financial statements.

Of our total revenues, \$5,540,000 (2%), \$6,141,000 (2%), and \$1,957,000 (1%) in lease revenues were derived from the above tenants for the years ended December 31, 2018, 2017 and 2016, respectively.

Table of Contents

## Utilization of Tenant Escrow Deposits

We have available to us a total of \$3,485,000 in escrowed deposits for the above-mentioned non-compliant tenants. Through the end of 2018, we made no draws against these deposits. When tenants have been changed to cash basis and prior to adjudication of any amounts in controversy, we assess the probability of recovery, if any, through legal recourse against amounts on escrow. We consider available escrowed funds to the extent, under governing lease provisions, that specified costs incurred are to be borne by the tenant. Accordingly, we have recognized \$2,534,000 as a receivable against these escrowed deposits to satisfy property tax liabilities and as reimbursement for expenses explicitly delineated under the leases.

## VIE Considerations

With Regency's relinquishment of possession of the three NHI facilities as discussed above, our prospective entry into management agreements with operators willing to venture into speculative operations entails structuring the agreements so that NHI, who stands to gain the most from rehabilitation of the properties, will likely expect to absorb most of the losses, if any, that these operators will encounter during revitalization of operations at the three properties. As a result of finalizing these agreements, entity-level operations at each facility may be considered variable interests, the operators may be considered variable interest entities ("VIEs"), and NHI may potentially be considered the primary beneficiary of those entities. Consequently, NHI may be required to consolidate these operations in 2019. If so, we expect that our statements of income will reflect revenues and expenses from these foreclosed operations. During 2018, activities at these facilities were immaterial to the results of NHI's operations.

It is possible that consolidation will also result from our interactions and negotiations with any of the operators of the other properties discussed above, however, the nature and form of any agreements that will result from this process are unknown at this time.

For operations which we place in our Taxable REIT Subsidiary ("TRS"), we have NOL carryforwards of \$462,000 available to offset taxable income in the TRS. The carry-forwards expire beginning in 2028.

## Prior Year

In October 2017, we issued a letter of forbearance to one of our tenants for a default on our lease terms involving coverage and liquidity ratios. Rent payments to NHI are current as of December 31, 2018. Lease revenues from the tenant and its affiliates comprise 3% of our rental income, and the related straight-line rent receivable was approximately \$4,566,000 at December 31, 2018. NHI's ongoing monitoring from 2017 through 2018 indicated that the tenant's operations and financial position have continued to improve, and in February 2019 we released them from provisions of the forbearance letter.

## Tenant Purchase Options

Certain of our operators hold purchase options allowing them to acquire properties they currently lease from NHI. For options open or coming open in the near future, we are engaged in preliminary negotiations to continue as lessor or in some other capacity. A summary of these tenant options to purchase senior housing communities, hospitals, medical office buildings and skilled nursing facilities is presented below (\$ in thousands):

Asset Type	Number of Lease Facilities	Expiration	1st Option Open Year	Current Cash Rent
MOB	1	February 2025	Open	\$ 300
HOSP	1	September 2027	2020	\$ 2,673

When present, tenant purchase options generally give the lessee an option to purchase the underlying property for consideration determined by i) a sliding base dependent upon the extent of appreciation in the property plus a specified proportion of any appreciation; ii) our acquisition costs plus a specified proportion of any appreciation; iii) an agreed capitalization rate applied to the current rental; or iv) our acquisition costs plus a profit floor plus a specified proportion of any appreciation.

Table of Contents

Real Estate and Mortgage Write-downs

Our borrowers and tenants experience periods of significant financial pressures and difficulties similar to those encountered by other health care providers. Governments at both the federal and state levels have enacted legislation to lower, or at least slow, the growth in payments to health care providers. Furthermore, the cost of professional liability insurance has increased significantly during this same period. Since our inception in 1991, a number of our facility operators and mortgage loan borrowers have undergone bankruptcy. Others have been forced to surrender properties to us in lieu of foreclosure or, for certain periods, have failed to make timely payments on their obligations to us.

We believe that the current carrying amounts of our real estate properties are recoverable and that mortgage notes receivable are realizable and supported by the value of the underlying collateral. However, it is possible that future events could require us to make significant adjustments to these carrying amounts.

Table of Contents

Financial highlights of the year ended December 31, 2018, compared to 2017 were as follows:

Rental income, before straight-line adjustments, increased \$18,947,000, or 7.9%, primarily as a result of new investments and lease escalators in our existing portfolio. Generally, future increases in rental income depend on our ability to make new investments which meet our underwriting criteria.

Interest income from mortgage and other notes increased \$309,000, due to interest income received on development loans to Bickford Senior Living which was partially offset by the continued repayment of our construction loan to the Timber Ridge project and mortgage note payoffs recorded in 2017.

Depreciation expense increased \$4,176,000 primarily due to new real estate investments completed during 2018 and 2017.

Interest expense, including amortization of debt discount and issuance costs, increased \$2,731,000 primarily as a result of an increase in 30-day LIBOR, which is the benchmark for our revolving debt.

Loan and realty losses for the year ended December 31, 2018 resulted primarily from \$4,752,000 of straight-line rent receivable write-downs including \$1,436,000 related to a Wisconsin property, \$1,820,000 from our SH Regency portfolio and \$1,496,000 from a Midwest portfolio, as well as a \$363,000 write-down of a note receivable.

Investment and other gains for the year ended December 31, 2017 includes \$10,038,000 from the sale of marketable securities.

<sup>1</sup>2016 includes \$993,000 from two Texas SNFs disposed April 2016

Table of Contents

Financial highlights of the year ended December 31, 2017, compared to 2016 were as follows:

Rental income increased \$32,774,000, or 14.1%, primarily as a result of new investments funded in 2017 and 2016. The increase in rental income included a \$3,892,000 increase in straight-line rent adjustments. Generally accepted accounting principles require rental income to be recognized on a straight-line basis over the term of the lease to give effect to scheduled rent escalators that are determinable at lease inception. Generally, future increases in rental income depend on our ability to make new investments which meet our underwriting criteria.

Interest income from mortgage and other notes decreased \$671,000, due to a combination of the continued repayment of our construction loan to Timber Ridge, interest income received on development loans to Bickford Senior Living and Senior Living Management and the recognition of an unamortized note discount related to a mortgage note which was paid in full during the second quarter.

Depreciation expense increased \$7,648,000 primarily due to new real estate investments completed during 2017 and 2016.

Interest expense, including amortization of debt discount and issuance costs, increased \$3,216,000 primarily as a result of an increase in 30-day LIBOR, which is the benchmark for our revolving debt, and the refinancing of \$75,000,000 in September 2016 to an 8-year note with annual interest at 3.93%.

Payroll and related compensation expenses increased \$2,080,000 due primarily to the addition of new corporate employees and the expense of certain incentive bonuses.

Investment and other gains for the year ended December 31, 2017 consist of \$10,038,000 from the sale of marketable securities. For the year ended December 31, 2016, investment and other gains include \$29,673,000 from the sale of marketable securities, \$2,805,000 from the sale of two Texas skilled nursing facilities, \$1,654,000 from the sale of an Idaho skilled nursing facility, \$123,000 from the sale of a vacant land parcel in Alabama and \$1,657,000 recorded as a gain on the sale of our 85% non-controlling interest in OpCo.

Loan and realty losses of \$15,856,000 for the year ended December 31, 2016 relate to non-cash transactional write-offs involving the acquisition of eight skilled nursing facilities from Legend and transition of a total of 15 SNF leases to Ensign in the second quarter of 2016, and the non-cash write-off of straight-line rent receivable during the third quarter of 2016 resulting from a tenant's material non-compliance with our lease terms which, as of October 1, 2017, NHI has transitioned to another tenant.

In September 2016 we unwound our joint venture interest in a RIDEA that we accounted for under the equity method. Subsequent periods show no corresponding entry for the attribution of \$1,176,000 to the minority interest.

Table of Contents

## Liquidity and Capital Resources

## Sources and Uses of Funds

Our primary sources of cash include rent payments, principal and interest payments on mortgage and other notes receivable, interest and dividends received on our marketable securities, proceeds from the sales of real property, net proceeds from offerings of equity securities and borrowings from our term loans and revolving credit facility. Our primary uses of cash include debt service payments (both principal and interest), new investments in real estate and notes, dividend distributions to our shareholders and general corporate overhead.

These sources and uses of cash are reflected in our Consolidated Statements of Cash Flows as summarized below (dollars in thousands):

	Year Ended		One Year Change		Year Ended		One Year Change	
	12/31/2018	12/31/2017	\$	%	12/31/2016	\$	%	
Cash and cash equivalents and restricted cash, January 1	\$8,075	\$ 8,878	\$(803 )	NM	17,913	\$(9,035)	(50.4 )	%
Net cash provided by operating activities	207,869	198,095	9,774	4.9 %	176,638	21,457	12.1	%
Net cash used in investing activities	(250,290)	(163,846 )	(86,444)	NM	(329,838 )	165,992	(50.3 )	%
Net cash provided by (used in) financing activities	44,258	(35,052 )	79,310	NM	144,165	(179,217)	(124.3)	%
Cash and cash equivalents and restricted cash, December 31	\$9,912	\$ 8,075	\$ 1,837	22.7%	8,878	\$(803 )		NM

Operating Activities – Net cash provided by operating activities for the years ended December 31, 2018 and 2017 increased primarily as a result of the collection of lease and interest payments on new real estate and note investments completed during 2018 and 2017.

Investing Activities – Net cash flows used in investing activities for the year ended December 31, 2018 increased primarily due to \$254,636,000 of investments in real estate and notes, which were partially offset by collection of notes receivable. Net cash flows used in investing activities for the year ended December 31, 2017 decreased primarily due to \$225,646,000 of investments in real estate and notes, which were partially offset by collection of notes receivable, sales of marketable securities and certain real estate assets, compared with \$486,788,000 of investments in real estate and notes in 2016 that were similarly offset by collections.

Financing Activities – The use of cash in financing activities for the years ended December 31, 2018 and 2017 resulted primarily from the excess of dividend payments over proceeds from equity offerings, the impact of other large transactions primarily being the restructuring of our debt.

## Liquidity

Apart from operations, a primary source of our liquidity is our unsecured bank credit facility. At December 31, 2018, we had \$466,000,000 available to draw on our revolving credit facility.

Our bank credit facility derives from agreements entered into in August 2017 and September 2018. Together these agreements establish our unsecured \$1,100,000,000 bank credit facility, which consists of \$250,000,000 and \$300,000,000 term loans and a \$550,000,000 revolving credit facility. The \$250,000,000 term loan and \$550,000,000 revolving facility mature in August 2022, and the \$300,000,000 term loan matures in September 2023. With the 2018 Agreement, we converted \$300,000,000 of debt initially drawn on our revolving facility into a five-year term loan.

The revolving facility fee is currently 20 basis points per annum, and floating interest on the revolver and term loans are presently set at 30-day LIBOR (252 bps at December 31, 2018) plus 115 and a blended 127 basis points, respectively. Within the facility, the employment of interest rate swaps for our fixed term debt leaves only our revolving credit facility and newly issued term loan of \$300,000,000 exposed to interest rate risk through April 2019, when our \$40,000,000 swap expires. Our swaps and the financial instruments to which they relate are described later in this section. The current interest spreads and facility fee reflect our leverage-ratio compliance based on the applicable margin for LIBOR loans, measuring debt to “Total Asset Value,” at Level 2 in the Interest Rate Schedule provided below in abridged format:

Table of Contents

## Interest Rate Schedule

Level	Leverage Ratio	LIBOR Margin		\$300m Term Loan	\$250m Term Loan	Facility Fee
		Revolver	Term Loan			
1	< 0.35	1.10%	1.20%			0.15%
2	≥ 0.35 & < 0.40	1.15%	1.25%			0.20%
3	≥ 0.40 & < 0.45	1.20%	1.30%			0.20%
4	≥ 0.45 & < 0.50	1.25%	1.40%			0.25%

Beyond the applicable ratios detailed above, increasing levels of leverage (not shown) will subject our debt to defined increases in interest rates and fees.

The credit facility agreement requires that we calculate specified financial statement metrics and meet or exceed a variety of financial ratios, which are usual and customary in nature. These ratios are calculated quarterly and have been within required limits. The calculation of our leverage ratio involves intermediate determinations of our “total indebtedness” and of our “total asset value,” as defined. We are near the upper bounds delineated by Level 2 in the Interest Rate Schedule, above.

Aside from a more favorable rate, the 2018 Agreement generally calls for the same covenants and financial statement metrics required for compliance with terms of the 2017 Agreement. Although we are currently eligible under both agreements to transact in our unsecured bank credit facilities at the respective scheduled rates represented by Level 2, the movement of our leverage ratio into Level 3 at current levels of debt would result in additional annual costs of approximately \$375,000, assuming an average revolver balance of approximately \$200,000,000. Further movement of our leverage ratio beyond levels currently contemplated by management would be subject to escalating increases in interest. If, in addition to changes in the leverage ratio, certain qualitative indicators of our risk profile were to materially change, further interest-rate escalations may result.

Traditionally, debt financing and cash resulting from operating and investing activities, which are derived from proceeds of lease and note collections, loan payoffs and the recovery of previous write-downs, have been used to satisfy our operational and investing needs and to provide a return to our shareholders. Those operational and investing needs reflect the resources necessary to maintain and cultivate our funding sources and have generally fallen into three categories: debt service, REIT operating expenses, and new real estate and note investments.

NHI’s at-the-market (“ATM”) offerings were initially made pursuant to a prospectus dated March 18, 2014, and a related prospectus supplement dated February 17, 2015, which constitute a part of our effective shelf registration statement that was previously filed with the SEC. We filed a new registration statement and commenced a new ATM program effective February 22, 2017. The following table summarizes the issuances since inception on our ATM as of December 31, 2018:

Shares	Weighted Average Share Price	Net Proceeds
2015 830,506	\$ 60.33	\$49,389,000
2016 1,395,642	\$ 75.79	\$104,190,000
2017 1,661,161	\$ 74.87	\$122,500,000
2018 1,112,363	\$ 74.84	\$82,001,000
4,999,672		\$358,080,000

The table above does not include indirect legal and accounting costs of \$263,000 for 2017 and \$217,000 for 2018 associated with updating and maintaining our shelf registration statement.

We began liquidating our position in LTC Properties, Inc. (“LTC”) common stock in the fourth quarter of 2015. We realized taxable gains of \$10,038,000 and \$29,673,000 for the years ended December 31, 2017 and 2016, respectively.

The use of funds from our ATM and the liquidation of our position in LTC common stock effected a rebalancing of our leverage in response to our acquisitions and has kept our options flexible for further expansion. We continue to explore various other funding sources including bank term loans, convertible debt, traditional equity placement, unsecured bonds and senior notes, debt private placement and secured government agency financing. We view our ATM program as an effective way to match-fund our smaller acquisitions by exercising control over the timing and size of transactions and achieving a more favorable cost of capital as compared to larger follow-on offerings.

Table of Contents

We expect that borrowings on our revolving credit facility, borrowings on term loans, and our ATM program will allow us to continue to make real estate investments during 2019. However, we anticipate that our historically low cost of debt capital will continue to rise in the near to mid-term, as the federal government prolongs the upward transitioning of the federal funds rate. In response to the changed interest-rate environment, we may find it advisable within the coming year to acquire a public credit rating as a tool for managing our interest costs.

We anticipate continued use of proceeds from the ATM program for general corporate purposes, which may include future acquisitions and repayment of indebtedness, including borrowings under our credit facility. Acquisitions, if any, whose magnitude would entail an equity match unable to be efficiently sourced through the ATM would likely trigger a prospectus supplement and an underwritten or overnight offering of NHI common stock, rather than placement through the ATM.

Concurrent with the amendments to our credit facility and with the exception of specific debt-coverage ratios, covenants pertaining to our private placement term loans were generally conformed with those governing the credit facility.

In other financing transactions during the year ended December 31, 2018, we undertook targeted open-market repurchases of certain of our convertible notes. Settlement of the notes requires management to allocate the consideration we ultimately pay between the debt component and the equity conversion feature as though they were separate instruments. The allocation is effected by fair valuing the debt component first, with any remainder allocated to the conversion feature. Amounts expended to settle the notes are recognized first as a settlement of the notes at our carrying value and then are recognized in income to the extent the portion allocated to the debt instrument differs from carrying value. The remainder of the allocation, if any, is treated as settlement of equity and adjusted through our capital in excess of par account.

A roll-forward of our convertible note balances, including the effect of year-to-date amortization, net of issuance costs, is presented below:

	December 31, Amounts		Amortization	December 31,
	2017	Retired		2018
Face Amount	\$ 147,575	\$(27,575)	\$ —	\$ 120,000
Discount	(2,637)	)\$458	\$ 788	(1,391)
Issuance Costs	(1,752)	)\$297	\$ 545	(910)
Carrying Value	\$ 143,186			\$ 117,699

Total expenditures of \$29,985,000 include paid amounts of \$27,558,000 allocated to the note retirement with the remaining expenditure of \$2,427,000 allocated to capital in excess of par. A loss of \$738,000 for the year ended December 31, 2018, resulted from the excess of cash expenditures over the book value of the notes retired, net of discount and issuance costs.

As of December 31, 2018, our senior unsecured convertible notes were convertible at a rate of 14.42 shares of common stock per \$1,000 principal amount, representing a conversion price of approximately \$69.36 per share for a total of 1,730,174 remaining underlying shares. For the year ended December 31, 2018, dilution resulting from the conversion option within our convertible debt is 80,123 shares. If NHI's current share price increases above the adjusted \$69.36 conversion price, further dilution will be attributable to the conversion feature. On December 31, 2018, the value of the convertible debt, computed as if the debt were immediately eligible for conversion, exceeded its face amount by \$10,697,000.

We may continue from time to time to seek to retire or purchase some of our outstanding convertible notes through cash open market purchases, privately-negotiated transactions or otherwise. As with our 2018 repurchases, amounts

and timing of further repurchases or exchanges, if any, will be dependent on prevailing market conditions, liquidity requirements, contractual restrictions and other factors.

When we take on new debt or when we modify or replace existing debt, we incur debt issuance costs. These costs are subject to amortization over the term of the new debt instrument and may result in the write-off of fees associated with debt which has been replaced or modified. Sustaining long-term dividend growth will require that we consider all sources of capital mentioned above, with the goal of maintaining a low-leverage balance sheet as mitigation against potential adverse changes in the business of our industry, tenants and borrowers.

#### Interest Rate Swap Agreements

To mitigate our exposure to interest rate risk, we have in place the following interest rate swap contracts in place to hedge against floating rates on our \$250,000,000 bank term loan as of December 31, 2018 (dollars in thousands):

47

---

Table of Contents

Date Entered	Maturity Date	Fixed Rate	Rate Index	Notional Amount	Fair Value
May 2012	April 2019	2.84%	1-month LIBOR	\$40,000	\$ 130
June 2013	June 2020	3.41%	1-month LIBOR	\$80,000	\$ 480
March 2014	June 2020	3.46%	1-month LIBOR	\$ 130,000	\$ 687

For instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative has been reported as a component of other comprehensive income (“OCI”), and reclassified into earnings in the same period, or periods, during which the hedged transaction affects earnings. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness have been recognized in earnings. Hedge ineffectiveness related to our cash flow hedges, which is reported in current period earnings as interest expense, was not significant in 2016. With the amendment of our bank credit facility in August 2017, discussed above, the introduction to the debt instrument of a LIBOR floor not present in the hedges resulted in hedge inefficiency of approximately \$353,000 for the year ended December 31, 2017, which we credited to interest expense.

On January 1, 2018 we adopted ASU 2017-12 Derivatives and Hedging: Targeted Improvements to Accounting for Hedging Activities, as discussed in the Notes to the consolidated financial statements. The transition method is a modified retrospective approach that required the Company to recognize the cumulative effect of initially applying the ASU as an adjustment to accumulated other comprehensive income with a corresponding adjustment to retained earnings as of the beginning of 2018. The primary provision in the ASU requiring adjustment to our beginning retained earnings is the change in timing and income statement line item for ineffectiveness related to cash flow hedges. Upon the adoption of the new standard, we reversed cumulative ineffectiveness occurring in the last six months of 2017, resulting in a retroactive net charge to retained earnings and a credit to accumulated other comprehensive income of \$235,000 as of January 1, 2018. Upon adoption of the ASU, the Company achieved a better alignment of its financial reporting for hedging activities with the economic objectives of those activities.

We intend to comply with REIT dividend requirements that we distribute at least 90% of our annual taxable income for the year ending December 31, 2018 and thereafter. Dividends declared for the fourth quarter of each fiscal year are paid by the end of the following January and are, with some exceptions, treated for tax purposes as having been paid in the fiscal year just ended as provided in IRS Code Sec. 857(b)(8). We declare special dividends when we compute our REIT taxable income in an amount that exceeds our regular dividends for the fiscal year.

Off Balance Sheet Arrangements

We currently have no outstanding guarantees. As described in Note 1 to the consolidated financial statements, our leases, mortgages and other notes receivable with certain entities represent variable interests in those enterprises. However, because we do not control these entities, nor do we have any role in their day-to-day management, we are not their primary beneficiary. Except as discussed below under Contractual Obligations and Contingent Liabilities, we have no further material obligations arising from our transactions with these entities, and we believe our maximum exposure to loss at December 31, 2018, due to this involvement would be limited to our contractual commitments and contingent liabilities and the amount of our current investments with them, as detailed further in in Notes 1, 2, 3 and 6 to the consolidated financial statements.

In March 2014 we issued \$200,000,000 of convertible notes, the conversion feature being intended to broaden the Company’s credit profile and as a means to obtain a more favorable coupon rate. For this feature we calculate the dilutive effect using market prices prevailing over the reporting period. Because the dilution calculation is market-driven, and per share guidance we provide is based on diluted amounts, the theoretical effects of the conversion feature result in per share unpredictability.

Additional disclosure requirements also give widely ranging results depending on market price variability. The notes will be freely convertible in the last six months of their contractual life, beginning in the fourth quarter of 2020; however, generally accepted accounting principles require us to periodically report the amount by which the notes' convertible value exceeds their principal amount, without regard to the current availability of the conversion feature. Further, the mechanics of the calculation require the use of an end-of-period stock price, so that using that amount for the remaining notes outstanding of \$120,000,000 at December 31, 2018, delivers an excess of \$10,697,000, whereas the use of another price point would give a different result.

The conversion feature is generally available to the noteholders entering the last six months of the notes' term but may also become actionable if the market price of NHI's common stock should, for 20 of 30 consecutive trading days within a calendar quarter, sustain a level in excess of 130% of the adjusted conversion price, or \$90.44 per share, down from \$93.55 per share, initially. The notes are "optional net-share settlement" instruments, meaning that NHI has the ability and intent to settle the principal amount of the indebtedness in cash, with possible dilutive share issuances for any excess, at NHI's option. Settlement of the notes requires management to allocate the consideration we ultimately pay between the debt component and the equity conversion

Table of Contents

feature as though they were separate instruments. The allocation is effected by valuing the debt component first, with any remainder allocated to the conversion feature. Amounts expended to settle the notes will be recognized first as a settlement of the notes at par and then will be recognized in income to the extent the portion allocated to the debt instrument differs from par value. The remainder of the allocation, if any, will be treated as settlement of equity and adjusted through our paid in capital account.

## Contractual Obligations

As of December 31, 2018, our contractual payment obligations were as follows (in thousands):

	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Debt, including interest <sup>1</sup>	\$1,557,761	\$51,319	\$596,666	\$746,870	\$162,906
Construction commitments	24,331	24,331	—	—	—
Loan commitments	132,353	132,353	—	—	—
	\$1,714,445	\$208,003	\$596,666	\$746,870	\$162,906

<sup>1</sup> Interest is calculated based on the weighted average interest rate of outstanding debt balances as of December 31, 2018. The calculation also includes a commitment fee of .20%.

## Commitments and Contingencies

The following tables summarize information as of December 31, 2018 related to our outstanding commitments and contingencies which are more fully described in the notes to the consolidated financial statements.

	Asset Class	Type	Total	Funded	Remaining
Loan Commitments:					
LCS Sagewood Note A	SHO	Construction	\$118,800,000	\$(76,653,000)	\$42,147,000
LCS Sagewood Note B	SHO	Construction	61,200,000	(10,165,000)	51,035,000
LCS Timber Ridge Note A	SHO	Construction	60,000,000	(58,158,000)	1,842,000
Bickford Senior Living	SHO	Construction	56,700,000	(32,471,000)	24,229,000
Senior Living Communities	SHO	Revolving Credit	15,000,000	(1,900,000)	13,100,000
			\$311,700,000	\$(179,347,000)	\$132,353,000

See Note 3 to our consolidated financial statements for full details of our loan commitments. As provided above, loans funded do not include the effects of discounts or commitment fees. We expect to incrementally fund the LCS Sagewood Note A during 2019. Funding of the promissory note commitments to Bickford is expected to transpire monthly throughout 2019.

	Asset Class	Type	Total	Funded	Remaining
Development Commitments:					
Ignite Medical Resorts	SNF	Construction	25,350,000	(4,674,000)	20,676,000
Woodland Village	SHO	Renovation	7,450,000	(6,867,000)	583,000
Senior Living Communities	SHO	Renovation	6,830,000	(4,772,000)	2,058,000
Bickford Senior Living	SHO	Renovation	1,750,000	(1,597,000)	153,000
Navion Senior Solutions	SHO	Construction	650,000	—	650,000
Discovery Senior Living	SHO	Renovation	500,000	(289,000)	211,000
			\$42,530,000	\$(18,199,000)	\$24,331,000

	Asset Class	Type	Total	Funded	Remaining
Contingencies:					

Edgar Filing: NATIONAL HEALTH INVESTORS INC - Form 10-K

Bickford Senior Living	SHO	Lease Inducement	\$10,000,000	\$(7,500,000)	\$2,500,000
Bickford Senior Living	SHO	Incentive Loan Draws	8,000,000	(250,000 )	7,750,000
Navion Senior Solutions	SHO	Lease Inducement	4,850,000	—	4,850,000
Ignite Medical Resorts	SNF	Lease Inducement	2,000,000	—	2,000,000
			\$24,850,000	\$(7,750,000)	\$17,100,000

## Table of Contents

Contingent lease inducement payments of \$10,000,000 related to the five Bickford development properties constructed in 2016 and 2017 include a licensure incentive of \$250,000 per property and a three-tiered operator incentive schedule paying up to an additional \$1,750,000, based on the attainment of certain performance metrics. Upon funding, these payments are added to the lease base and amortized against rental income.

For a discussion of incentive loan draws of \$8,000,000 available to Bickford related to borrowings for the development of its properties in Illinois, Michigan, and Virginia, see page 34 of Investment Highlights.

## Litigation

On June 15, 2018, East Lake Capital Management LLC and certain related entities, including Regency, filed suit against NHI and NHI-REIT of Axel, LLC, in the District Court of Dallas County, Texas; 95th Judicial District for injunctive and declaratory relief and unspecified monetary damages, including attorney's fees. The suit sought, among other things, to enjoin NHI from making certain references to East Lake in NHI's public filings. In response to this lawsuit, related litigation, and other circumstances, we entered motions calling for the immediate appointment of a receiver and for pre-judgment possession, hearing, and bond.

Resulting from these claims and counterclaims, on December 6, 2018, the plaintiff parties entered into an agreement with NHI under Texas Rule of Civil Procedure 11, which rule ensures the enforceability of an agreement between lawyers in a case when the agreement is in writing and filed in the papers of the court. The agreement provided that Regency vacate our facilities in Indiana and North Carolina on December 7, 2018 and in Tennessee on December 14, 2018. Further, Regency agreed to provide minimal levels of cooperation in transitioning the facilities.

The original libel action of the East Lake affiliated entities survives the Rule 11 agreement and is set to continue in January 2019. NHI is not precluded from further action in damages under terms of the lease.

With Regency's relinquishment of possession of the three NHI facilities as discussed above, our prospective entry into management agreements with operators willing to venture into speculative operations entails structuring the agreements so that NHI, who stands to gain the most from rehabilitation of the properties, will likely expect to absorb most of the losses, if any, that these operators will encounter during revitalization of operations at the three properties. As a result of finalizing these agreements, entity-level operations at each facility may be considered variable interests, the operators may be considered variable interest entities ("VIEs"), and NHI may potentially be considered the primary beneficiary of those entities. Consequently, NHI may be required to consolidate these operations in 2019. If so, we expect that our statements of income will reflect revenues and expenses from these foreclosed operations. During 2018, activities at these facilities were immaterial to the results of NHI's operations.

## Table of Contents

### FFO, AFFO & FAD

These supplemental operating performance measures may not be comparable to similarly titled measures used by other REITs. Consequently, our Funds From Operations (“FFO”), Normalized FFO, Normalized Adjusted Funds From Operations (“AFFO”) and Normalized Funds Available for Distribution (“FAD”) may not provide a meaningful measure of our performance as compared to that of other REITs. Since other REITs may not use our definition of these operating performance measures, caution should be exercised when comparing our Company’s FFO, Normalized FFO, Normalized AFFO and Normalized FAD to that of other REITs. These financial performance measures do not represent cash generated from operating activities in accordance with generally accepted accounting principles (“GAAP”) (these measures do not include changes in operating assets and liabilities) and therefore should not be considered an alternative to net earnings as an indication of operating performance, or to net cash flow from operating activities as determined by GAAP as a measure of liquidity, and are not necessarily indicative of cash available to fund cash needs.

### Funds From Operations - FFO

Our FFO per diluted common share for the year ended December 31, 2018 decreased \$(0.14) (2.5%) over the same period in 2017. Our normalized FFO for the year ended December 31, 2018 increased \$0.17 (3.2%) over the same period in 2017, primarily as the result of our new real estate investments in 2017 and 2018. FFO, as defined by the National Association of Real Estate Investment Trusts (“NAREIT”) and applied by us, is net income (computed in accordance with GAAP), excluding gains (or losses) from sales of real estate property, plus real estate depreciation and amortization and impairment, if applicable, and after adjustments for unconsolidated partnerships and joint ventures, if any. The Company’s computation of FFO may not be comparable to FFO reported by other REITs that do not define the term in accordance with the current NAREIT definition or have a different interpretation of the current NAREIT definition from that of the Company; therefore, caution should be exercised when comparing our Company’s FFO to that of other REITs. Diluted FFO assumes the exercise of stock options and other potentially dilutive securities. Normalized FFO excludes from FFO certain items which may create some difficulty in comparing FFO for the current period to similar prior periods, and may include, but are not limited to, impairment of non-real estate assets, gains and losses attributable to the acquisition and disposition of assets and liabilities, recoveries of previous write-downs and the write off of debt issuance costs due to credit facility modifications.

FFO and normalized FFO are important supplemental measures of operating performance for a REIT. Because the historical cost accounting convention used for real estate assets requires depreciation (except on land), such accounting presentation implies that the value of real estate assets diminishes predictably over time. Since real estate values instead have historically risen and fallen with market conditions, presentations of operating results for a REIT that uses historical cost accounting for depreciation could be less informative, and should be supplemented with a measure such as FFO. The term FFO was designed by the REIT industry to address this issue.

### Adjusted Funds From Operations - AFFO

Our normalized AFFO per diluted common share for the year ended December 31, 2018 increased \$0.29 (6.1%) over the same period in 2017 due primarily to the impact of real estate investments completed during 2017 and 2018. In addition to the adjustments included in the calculation of normalized FFO, normalized AFFO excludes the impact of any straight-line rent revenue, amortization of the original issue discount on our convertible senior notes and amortization of debt issuance costs.

Normalized AFFO is an important supplemental measure of operating performance for a REIT. GAAP requires a lessor to recognize contractual lease payments into income on a straight-line basis over the expected term of the lease. This straight-line adjustment has the effect of reporting lease income that is significantly more or less than the

contractual cash flows received pursuant to the terms of the lease agreement. GAAP also requires the original issue discount of our convertible senior notes and debt issuance costs to be amortized as non-cash adjustments to earnings. Normalized AFFO is useful to our investors as it reflects the growth inherent in the contractual lease payments of our real estate portfolio.

#### Funds Available for Distribution - FAD

Our normalized FAD for the year ended December 31, 2018 increased \$16,395,000 (8.3%) over the same period in 2017 due primarily to the impact of real estate investments completed during 2017 and 2018. In addition to the adjustments included in the calculation of normalized AFFO, normalized FAD excludes the impact of non-cash stock based compensation. Normalized FAD is an important supplemental measure of operating performance for a REIT as a useful indicator of the ability to distribute dividends to shareholders. Additionally, normalized FAD improves the understanding of our operating results among investors and makes comparisons with: (i) expected results, (ii) results of previous periods and (iii) results among REITs, more meaningful. Because FAD may function as a liquidity measure, we do not present FAD on a per-share basis.

Table of Contents

The following table reconciles net income attributable to common stockholders, the most directly comparable GAAP metric, to FFO, Normalized FFO, Normalized AFFO and Normalized FAD and is presented for both basic and diluted weighted average common shares (in thousands, except share and per share amounts):

	Years ended December 31,		
	2018	2017	2016
Net income	\$ 154,333	\$ 159,365	\$ 151,540
Elimination of certain non-cash items in net income:			
Depreciation	71,349	67,173	59,525
Depreciation related to noncontrolling interest	—	—	(927 )
Gain on sale of real estate	—	(50 )	(4,582 )
NAREIT FFO	\$ 225,682	\$ 226,488	\$ 205,556
Gain on sales of marketable securities	—	(10,038 )	(29,673 )
Gain on sale of equity-method investee	—	—	(1,657 )
Write-off of deferred tax asset	—	—	1,192
Loss on convertible note retirement	738	2,214	—
Debt issuance costs written-off due to credit facility modifications	—	407	—
Ineffective portion of cash flow hedges	—	(353 )	—
Non-cash write-off of straight-line rent receivable	3,701	—	9,456
Note receivable impairment	363	—	6,400
Revenue recognized due to early lease termination	—	—	(303 )
Recognition of unamortized note receivable commitment fees	(515 )	(922 )	(288 )

Normalized FFO per common share	\$5.46	\$5.29	\$4.87
Normalized AFFO per common share	\$5.04	\$4.75	\$4.39

Table of Contents

## Adjusted EBITDA

We consider Adjusted EBITDA to be an important supplemental measure because it provides information which we use to evaluate our performance and serves as an indication of our ability to service debt. We define Adjusted EBITDA as consolidated earnings before interest, taxes, depreciation and amortization, including amounts in discontinued operations, excluding real estate asset impairments and gains on dispositions and certain items which may create some difficulty in comparing Adjusted EBITDA for the current period to similar prior periods, and may include, but are not limited to, impairment of non-real estate assets, gains and losses attributable to the acquisition and disposition of assets and liabilities, and recoveries of previous write-downs. Since others may not use our definition of Adjusted EBITDA, caution should be exercised when comparing our Adjusted EBITDA to that of other companies.

The following table reconciles net income, the most directly comparable GAAP metric, to Adjusted EBITDA:

	December 31,		
	2018	2017	2016
Net income	\$154,333	\$159,365	\$152,716
Interest expense	49,055	46,324	43,108
Franchise, excise and other taxes	1,166	960	1,009
Income tax of taxable REIT subsidiary	—	—	749
Depreciation	71,349	67,173	59,525
Net gain on sales of real estate	—	(50 )	(4,582 )
Gain on sales of marketable securities	—	(10,038 )	(29,673 )
Gain on sale of equity-method investee	—	—	(1,657 )
Loss on convertible note retirement	738	2,214	—
Non-cash write-off of straight-line rent receivable	3,701	—	9,456
Note receivable impairment	363	—	6,400
Revenue recognized due to early lease termination	—	—	(303 )
Recognition of unamortized note receivable commitment fees	(515 )	(922 )	(288 )
Adjusted EBITDA	\$280,190	\$265,026	\$236,460
Interest expense at contractual rates	\$45,789	\$40,385	\$36,197
Principal payments	1,062	794	768
Fixed Charges	\$46,851	\$41,179	\$36,965
Fixed Charge Coverage	6.0x	6.4x	6.4x

For all periods presented, EBITDA reflects GAAP interest expense, which excludes amounts capitalized during the period.

Table of Contents

## ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

## Interest Rate Risk

At December 31, 2018, we were exposed to market risks related to fluctuations in interest rates on approximately \$384,000,000 of variable-rate indebtedness (excluding \$250,000,000 of variable-rate debt that has been hedged through interest-rate swap contracts) and on our mortgage and other notes receivable. The unused portion (\$466,000,000 at December 31, 2018) of our credit facility, should it be drawn upon, is subject to variable rates.

Interest rate fluctuations will generally not affect our future earnings or cash flows on our fixed rate debt and loans receivable unless such instruments mature or are otherwise terminated. However, interest rate changes will affect the fair value of our fixed rate instruments. Conversely, changes in interest rates on variable rate debt and investments would change our future earnings and cash flows, but not significantly affect the fair value of those instruments. Assuming a 50 basis point increase or decrease in the interest rate related to variable-rate debt, and assuming no change in the outstanding balance as of December 31, 2018, net interest expense would increase or decrease annually by approximately \$1,920,000 or \$.05 per common share on a diluted basis.

We use derivative financial instruments in the normal course of business to mitigate interest rate risk. We do not use derivative financial instruments for speculative purposes. Derivatives are included in the Consolidated Balance Sheets at their fair value. We may engage in hedging strategies to manage our exposure to market risks in the future, depending on an analysis of the interest rate environment and the costs and risks of such strategies.

The following table sets forth certain information with respect to our debt (dollar amounts in thousands):

	December 31, 2018			December 31, 2017		
	Balance <sup>1</sup>	% of total	Rate <sup>3</sup>	Balance <sup>1</sup>	% of total	Rate <sup>3</sup>
Fixed rate:						
Convertible senior notes	\$ 120,000	9.3 %	3.25 %	\$ 147,575	12.7 %	3.25 %
Unsecured term loans	650,000	50.2 %	3.99 %	650,000	56.0 %	3.83 %
HUD mortgage loans <sup>2</sup>	44,226	3.4 %	4.04 %	45,047	3.9 %	4.04 %
Fannie Mae loans	96,044	7.4 %	3.94 %	96,367	8.3 %	3.94 %
Variable rate:						
Unsecured term loan	300,000	23.2 %	3.77 %	—	—	% NA
Unsecured revolving credit facility	84,000	6.5 %	3.92 %	221,000	19.1 %	2.96 %
	\$ 1,294,270	100.0 %	3.88 %	\$ 1,159,989	100.0 %	3.61 %

<sup>1</sup> Differs from carrying amount due to unamortized discounts and loan costs.

<sup>2</sup> Includes 10 HUD mortgages; rate is a weighted average inclusive of a mortgage insurance premium

<sup>3</sup> Total is weighted average rate

The unsecured term loans in the table above give effect to \$40,000,000, \$80,000,000, and \$130,000,000 notional amount interest rate swaps with maturities of April 2019, June 2020 and June 2020, respectively, that collectively are continuing to hedge against fluctuations in variable interest rates applicable to the \$250,000,000 term loan maturing in 2022. These loans bear interest at LIBOR plus a spread, currently 130 basis points, based on our current Consolidated Coverage Ratio, as defined.

To highlight the sensitivity of our fixed-rate loans to changes in interest rates, the following summary shows the effects on fair value (“FV”) assuming a parallel shift of 50 basis points (“bps”) in market interest rates for a contract with similar maturities as of December 31, 2018 (dollar amounts in thousands):

	Balance	Fair Value	FV reflecting change in interest rates	
			-50 bps	+50 bps
Fixed rate:				
Private placement term loans - unsecured	\$400,000	\$386,580	\$396,605	\$376,849
Convertible senior notes	120,000	123,645	125,025	122,281
Fannie Mae loans	96,044	90,682	93,232	88,208
HUD mortgage loans	44,226	43,838	46,844	41,097

At December 31, 2018, the fair value of our mortgage and other notes receivable, discounted for estimated changes in the risk-free rate, was approximately \$244,206,000. A 50 basis point increase in market rates would decrease the estimated fair value of

Table of Contents

our mortgage and other notes receivable by approximately \$5,560,000, while a 50 basis point decrease in such rates would increase their estimated fair value by approximately \$5,755,000.

Equity Price Risk

The Company is no longer subject to equity risk since it no longer owns any marketable securities.

Table of Contents

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders  
National Health Investors, Inc.  
Murfreesboro, Tennessee

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of National Health Investors, Inc. (the “Company”) and subsidiaries as of December 31, 2018 and 2017, the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the three years in the period ended December 31, 2018, and the related notes and financial statement schedules listed in the accompanying index (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company and subsidiaries at December 31, 2018 and 2017, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2018, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (“PCAOB”), the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) and our report dated February 19, 2019 expressed an unqualified opinion thereon.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ BDO USA, LLP

We have served as the Company's auditor since 2004.
