KADANT INC.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

1. Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations

Kadant Inc. and its subsidiaries' (collectively, "we," "Kadant," "the Company," or "the Registrant") continuing operations include one reportable operating segment, Papermaking Systems, and a separate product line, Fiber-based Products. Through its Papermaking Systems segment, the Company develops, manufactures, and markets a range of equipment and products primarily for the global papermaking and paper recycling and process industries. The Company's principal products in this segment include custom-engineered stock-preparation systems and equipment for the preparation of wastepaper for conversion into recycled paper; fluid-handling systems used primarily in the dryer section of the papermaking process and during the production of corrugated boxboard, metals, plastics, rubber, textiles, chemicals, and food; doctoring systems and equipment and related consumables important to the efficient operation of paper machines; and cleaning and filtration systems essential for draining, purifying, and recycling process water and cleaning paper machine fabrics and rolls. Through its Fiber-based Products business, the Company manufactures and sells granules derived from papermaking byproducts primarily for use as agricultural carriers and for home lawn and garden applications, as well as for oil and grease absorption.

Interim Financial Statements

The interim condensed consolidated financial statements and related notes presented have been prepared by the Company, are unaudited, and, in the opinion of management, reflect all adjustments of a normal recurring nature necessary for a fair statement of the Company's financial position at June 29, 2013, its results of operations and comprehensive income for the three and six month periods ended June 29, 2013 and June 30, 2012, and its cash flows and stockholders' equity for the six month periods ended June 29, 2013 and June 30, 2012. Interim results are not necessarily indicative of results for a full year or for any other interim period.

The condensed consolidated balance sheet presented as of December 29, 2012 has been derived from the consolidated financial statements contained in the Company's Annual Report on Form 10-K. The condensed consolidated financial statements and related notes are presented as permitted by the Securities and Exchange Commission (SEC) rules and regulations for Form 10-Q and do not contain certain information included in the annual consolidated financial statements and related notes of the Company. The condensed consolidated financial statements and notes included herein should be read in conjunction with the consolidated financial statements and related notes included in the Company's Annual Report on Form 10-K for the fiscal year ended December 29, 2012, filed with the SEC.

Critical Accounting Policies

Critical accounting policies are defined as those that entail significant judgments and estimates, and could potentially result in materially different results under different assumptions and conditions. The Company believes that the most critical accounting policies upon which its financial position depends, and which involve the most complex or subjective decisions or assessments, concern revenue recognition and accounts receivable, warranty obligations, income taxes, the valuation of goodwill and intangible assets, inventories, pension obligations, and derivatives. A discussion of the application of these and other accounting policies is included in Notes 1 and 3 to the consolidated financial statements in the Company's Annual Report on Form 10-K for the fiscal year ended December 29, 2012.

9

KADANT INC.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

1. Nature of Operations and Summary of Significant Accounting Policies (continued)

Restricted Cash

As of June 29, 2013, the Company had restricted cash of \$165,000. This cash serves as collateral for bank guarantees primarily associated with providing assurance to customers in China that the Company will fulfill certain customer obligations entered into in the normal course of business. All the bank guarantees will expire by the end of 2013.

Banker's Acceptance Drafts

The Company's Chinese subsidiaries may receive banker's acceptance drafts from customers as payment for their trade accounts receivable. The banker's acceptance drafts are non-interest bearing obligations of the issuing bank and mature within six months of the origination date. The Company has the ability to sell the drafts at a discount to a third-party financial institution or transfer the drafts to vendors in settlement of current accounts payable prior to the scheduled maturity date. These drafts, which totaled \$8,197,000 and \$9,794,000 at June 29, 2013 and December 29, 2012, respectively, are included in accounts receivable in the accompanying condensed consolidated balance sheet until the subsidiary obtains cash payment on the scheduled maturity date or upon the sale or transfer of the drafts prior to maturity.

Inventories

The components of inventories are as follows:

	June 29,	December
(In thousands)	2013	29, 2012
Raw Materials and Supplies	\$20,245	\$ 19,561
Work in Process	17,658	8,371
Finished Goods	16,149	14,145
	\$54,052	\$ 42,077

Warranty Obligations

The Company provides for the estimated cost of product warranties at the time of sale based on the actual historical occurrence rates and repair costs. The Company typically negotiates the terms regarding warranty coverage and length of warranty depending on the products and applications. While the Company engages in extensive product quality programs and processes, the Company's warranty obligation is affected by product failure rates, repair costs, service delivery costs incurred in correcting a product failure, and supplier warranties on parts delivered to the Company. Should actual product failure rates, repair costs, service delivery costs, or supplier warranties on parts differ from the Company's estimates, revisions to the estimated warranty liability would be required.

The changes in the carrying amount of accrued warranty costs included in the accompanying condensed consolidated balance sheet are as follows:

KADANT INC.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

1. Nature of Operations and Summary of Significant Accounting Policies (continued)

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period.

Recent Accounting Pronouncements

Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists. In July 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2013-11. Currently, U.S. GAAP does not include explicit guidance on the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. This ASU clarifies that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except as follows. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. This ASU applies to all entities that have unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. This ASU is effective for fiscal years, and interim periods within those years, beginning after December 15, 2013, although early adoption is permitted. This ASU will be applied prospectively to all unrecognized tax benefits that exist at the effective date. Retrospective application is permitted. The Company has not yet adopted this ASU, but is currently evaluating the effect the adoption will have on its consolidated financial statements.

Derivatives and Hedging (Topic 815): Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedge Accounting Purposes. In February 2013, the FASB issued ASU No. 2013-10. This ASU permits the Fed Funds Effective Swap Rate (OIS) to be used as a U.S. benchmark interest rate for hedge accounting purposes, in addition to UST and LIBOR. This ASU also removes the restriction on using different benchmark rates for similar hedges. Before this ASU, only Treasury obligations of the U.S. government (UST) and, for practical reasons, the London Interbank Offered Rate (LIBOR) swap rate, were considered benchmark interest rates. Including the Fed Funds Effective Swap Rate (OIS) as an acceptable U.S. benchmark interest rate in addition to UST and LIBOR will provide risk managers with a more comprehensive spectrum of interest rate resets to utilize as the designated benchmark interest rate risk component under the hedge accounting guidance. This ASU is effective prospectively for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013. We will consider the guidance in this ASU for future transactions in which we elect to apply hedge accounting of the benchmark interest rate. The Company does not expect the adoption of this ASU to have a material effect on its consolidated financial statements.

Presentation of Financial Statements (Topic 205): Liquidation Basis of Accounting. In April 2013, the FASB issued ASU No. 2013-02. This ASU clarifies when an entity should apply the liquidation basis of accounting. In addition, the guidance provides principles for the recognition and measurement of assets and liabilities and requirements for

financial statements prepared using the liquidation basis of accounting. The ASU requires an organization to prepare its financial statements using the liquidation basis of accounting when liquidation is imminent. The ASU requires financial statements prepared using the liquidation basis to present relevant information about a company's resources and obligations in liquidation, including: the organization's assets measured at the amount of the expected cash proceeds from liquidation, including any items it had not previously recognized under U.S. GAAP that it expects to either sell in liquidation or use in settling liabilities; the organization's liabilities as recognized and measured in accordance with existing guidance that applies to those liabilities; and accrual of the costs it expects to incur and the income it expects to earn during liquidation, including any anticipated disposal costs. This ASU is effective for reporting periods beginning after December 15, 2013, although early adoption is permitted. The Company does not expect the adoption of this ASU to have a material effect on its consolidated financial statements.

(Unaudited)

1. Nature of Operations and Summary of Significant Accounting Policies (continued)

Foreign Currency Matters (Topic 830): Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity. In March 2013, the FASB issued ASU No. 2013-05. When a reporting entity (parent) ceases to have a controlling financial interest in a subsidiary or group of assets that is a nonprofit activity or a business within a foreign entity, the parent is required to apply the guidance in subtopic 830-30 to release any related cumulative translation adjustment into net income. Accordingly, the cumulative translation adjustment should be released into net income only if the sale or transfer results in the complete or substantially complete liquidation of the foreign entity in which the subsidiary or group of assets had resided. For an equity method investment that is a foreign entity, the partial sale guidance in Accounting Standards Codification section 830-30-40 still applies. As such, a pro rata portion of the cumulative translation adjustment should be released into net income upon a partial sale of such an equity method investment. However, this treatment does not apply to an equity method investment that is not a foreign entity. In those instances, the cumulative translation adjustment is released into net income only if the partial sale represents a complete or substantially complete liquidation of the foreign entity that contains the equity method investment. This ASU is effective prospectively for fiscal years and interim periods beginning after December 15, 2013. This ASU will be applied prospectively to derecognition events occurring after the effective date. Prior periods should not be adjusted. Early adoption is permitted. The Company has not yet adopted this ASU, but is currently evaluating the effect the adoption will have on its consolidated financial statements.

2. Acquisitions

On April 12, 2013, the Company's Papermaking Systems segment acquired all the outstanding stock of Companhia Brasileira de Tecnologia Industrial (CBTI) for approximately \$8,140,000 in cash and \$484,000 in assumed liabilities owed to Kadant. The purchase price included \$1,123,000 of cash acquired. CBTI is a long-time licensee of the Company's doctoring, cleaning, and filtration, and stock preparation products and is also a supplier of industrial drying systems. This acquisition furthers the Company's strategy of expanding its presence in emerging markets. At the closing date, approximately \$3,550,000 of the purchase price was deposited into an escrow fund to secure certain indemnification obligations of the sellers. Approximately \$1,520,000 of the escrow fund will be released to the sellers on or about January 31, 2014, and the balance will be released on various dates over a five-year period ending on the fifth anniversary of the closing date, less the amount of any claims in each instance.

On May 3, 2013, the Company's Papermaking Systems segment acquired certain assets of the Noss Group (Noss), a Sweden-based developer and supplier of high-efficiency cleaners and approach flow systems, for approximately \$6,708,000 paid at closing and subject to adjustment for redundancy and certain employee benefit payments. As part of the purchase agreement, the Company retained approximately \$1,170,000 to fund certain anticipated redundancy and certain employee benefit payments in Sweden. Any payments made in excess of this estimate will be reimbursed by the sellers and amounts unpaid below this estimate will be due to the sellers. As of June 29, 2013, the Company has accrued \$1,304,000 in estimated payments, including \$615,000 in accrued restructuring costs and \$689,000 in accrued employee benefits. This acquisition will expand the Company's product offerings in its Stock-Preparation product line, particularly for virgin pulp and approach flow applications. In addition, Noss has a large installed base and a high proportion of its revenues are parts and consumables products. At the closing date, approximately \$1,970,000 of the purchase price was deposited into an escrow fund to secure certain indemnification obligations of the sellers. The escrow fund, less any claims made, will be released to the sellers in two installments on the first and second anniversaries of the closing date.

These acquisitions have been accounted for using the purchase method of accounting and the results of CBTI and Noss have been included in the accompanying financial statements from the date of the acquisitions. The Company

recorded acquisition transaction costs of approximately \$676,000 in the first six months of 2013 in selling, general, and administrative expenses. The Company has made preliminary fair value assessments of the assets acquired and liabilities assumed, including identifiable intangible assets acquired of \$2,357,000, which are being amortized using the straight-line method over a weighted-average period of 7 years. The excess of the acquisition purchase prices over the tangible and identifiable intangible assets were recorded as goodwill and totaled \$2,279,000, a portion of which will be deductible for tax purposes. The fair values are subject to adjustment upon finalization of the valuations, and therefore the current measurements of intangible assets, acquired goodwill, and assumed assets and liabilities are subject to change.

The Company's acquisitions have historically been made at prices above the fair value of the acquired assets, resulting in goodwill, due to expectations of synergies from combining the businesses. The Company anticipates several synergies in connection with these acquisitions, including consolidating manufacturing facilities and the use of the Company's existing distribution channels to expand sales of the products of the acquired businesses.

12

KADANT INC.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

2. Acquisitions (continued)

Pro forma disclosures of the results of operations are not required, as the acquisitions are not considered material business combinations as outlined in FASB ASC 805, "Business Combinations."

3. Restructuring Costs and Other (Income) Expense, Net

The Company's restructuring costs and other (income) expense, net was \$218,000 in the first six months of 2013, including \$1,958,000 of restructuring costs and a \$1,740,000 gain on the sale of assets, and \$307,000 in the first six months of 2012.

Restructuring Costs

The Company recorded acquisition-related restructuring costs of \$1,958,000 in the second quarter of 2013, including \$1,330,000 associated with the reduction of 22 employees in Brazil and \$628,000 associated with the reduction of 25 employees in Sweden. These actions were taken to streamline the Company's operations as a result of the recent acquisitions. All of these items occurred in the Papermaking Systems segment.

A summary of the changes in accrued restructuring costs included in other current liabilities in the accompanying condensed consolidated balance sheet is as follows:

(In thousands)	Severance Costs
Provision	\$ 1,958
Currency translation	(92)
Balance at June 29, 2013	\$ 1,866

Other (Income) Expense

Other income consisted of a pre-tax gain of \$1,740,000 from the sale of real estate in China in the second quarter of 2013. Other expense consisted of accelerated depreciation of \$307,000 in the first six months of 2012 associated with the disposal of equipment in China related to a facility consolidation.

KADANT INC.
Notes to Condensed Consolidated Financial Statements
(Unaudited)

4. Earnings per Share

Basic and diluted earnings per share are calculated as follows:

(In thousands, except per share amounts)	Three Months		Six Months Ended	
	Ended June 29, 2013	June 30, 2012	June 29, 2013	June 30, 2012
Amounts Attributable to Kadant:				
Income from Continuing Operations	\$5,772	\$6,546	\$11,085	\$13,660
Loss from Discontinued Operation	(12)	(3)	(41)	(64)
Net Income	\$5,760	\$6,543	\$11,044	\$13,596
Basic Weighted Average Shares	11,178	11,575	11,170	11,614
Effect of Stock Options, Restricted Stock Units and Employee Stock Purchase Plan	153	104	129	90
Diluted Weighted Average Shares	11,331	11,679	11,299	11,704
Basic Earnings per Share:				
Continuing Operations	\$0.52	\$0.57	\$0.99	\$1.18
Discontinued Operation	\$-	\$-	\$-	\$(0.01)
Net Income per Basic Share	\$0.52	\$0.57	\$0.99	\$1.17
Diluted Earnings per Share:				
Continuing Operations	\$0.51	\$0.56	\$0.98	\$1.17
Discontinued Operation	\$-	\$-	\$-	\$(0.01)
Net Income per Diluted Share	\$0.51	\$0.56	\$0.98	\$1.16

Options to purchase approximately 92,900 and 164,400 shares of the Company's common stock for the second quarters of 2013 and 2012, respectively, and 102,100 and 135,700 shares of the Company's common stock for the first six months of 2013 and 2012, respectively, were not included in the computation of diluted earnings per share as the effect of their inclusion would have been anti-dilutive. Unvested restricted stock units equivalent to approximately 2,000 shares of common stock for the second quarter of 2012, and 41,000 and 57,000 shares of common stock for the first six months of 2013 and 2012, respectively, were not included in the computation of diluted earnings per share because either the effect of their inclusion would have been anti-dilutive, or for unvested performance-based restricted stock units, the performance conditions had not been met as of the end of the reporting period.

5. Provision for Income Taxes

The provision for income taxes was \$4,459,000 and \$5,843,000 in the first six months of 2013 and 2012, respectively, and represented 28% and 30% of pre-tax income. The effective tax rate of 28% in the first six months of 2013 was lower than the Company's statutory tax rate primarily due to the reduction of the 2012 U.S. tax cost of foreign earnings and a benefit from the 2012 U.S. research and development tax credit, both of which resulted from U.S. tax legislation enacted in January 2013. In addition, the Company's effective tax rate in the first six months of 2013 benefited from the release of a valuation allowance against deferred tax assets related to net operating loss carryforwards. The release of the valuation allowance was due to increased projected profitability associated with the

CBTI acquisition. Also contributing to the lower effective tax rate in the first six months of 2013 were lower statutory tax rates in the Company's overseas operations and a more favorable distribution of the Company's worldwide earnings. The effective tax rate of 30% in the first six months of 2012 was lower than the Company's statutory tax rate primarily due to the distribution of worldwide earnings and the expected utilization of foreign tax credits that were fully reserved in prior periods, the latter of which was due to an increase in estimated 2012 income in the U.S.

14

KADANT INC.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

6. Short- and Long-Term Obligations

Short- and long-term obligations are as follows:

(In thousands)	June 29, 2013	December 29, 2012
Revolving Credit Facility, due 2017	\$8,000	\$ -
Variable Rate Term Loan, due from 2013 to 2016	6,625	6,875
Short-term Obligation, due 2014	1,400	-
Total Short- and Long-Term Obligations	16,025	6,875
Less: Short-Term Obligation and Current Maturities	(2,025)	(625)
Long-Term Obligations, less Current Maturities	\$14,000	\$ 6,250

The weighted average interest rate for the Company's short- and long-term obligations was 4.42% as of June 29, 2013.

On August 3, 2012, the Company entered into a five-year unsecured revolving credit facility (2012 Credit Agreement) in the aggregate principal amount of up to \$100,000,000. The 2012 Credit Agreement also includes an uncommitted unsecured incremental borrowing facility of up to an additional \$50,000,000. The principal on any borrowings made under the 2012 Credit Agreement is due on August 3, 2017. Interest on any loans outstanding under the 2012 Credit Agreement accrues and is payable quarterly in arrears at one of the following rates selected by the Company: (i) the highest of (a) the federal funds rate plus 0.50% plus an applicable margin of 0% to 1%, (b) the prime rate, as defined, plus an applicable margin of 0% to 1% and (c) the Eurocurrency rate, as defined, plus 0.50% plus an applicable margin of 0% to 1% or (ii) the Eurocurrency rate, as defined, plus an applicable margin of 1% to 2%. The applicable margin is determined based upon the ratio of the Company's total debt to earnings before interest, taxes, depreciation, and amortization (EBITDA), as defined in the 2012 Credit Agreement. For this purpose, total debt is defined as total debt less up to \$25,000,000 of unrestricted domestic cash. There was \$8,000,000 outstanding under the 2012 Credit Agreement at June 29, 2013.

The obligations of the Company under the 2012 Credit Agreement may be accelerated upon the occurrence of an event of default under the 2012 Credit Agreement, which includes customary events of default including without limitation payment defaults, defaults in the performance of affirmative and negative covenants, the inaccuracy of representations or warranties, bankruptcy- and insolvency-related defaults, defaults relating to such matters as the Employment Retirement Income Security Act (ERISA), unsatisfied judgments, the failure to pay certain indebtedness, and a change of control default. In addition, the 2012 Credit Agreement contains negative covenants applicable to the Company and its subsidiaries including financial covenants requiring the Company to comply with a maximum consolidated leverage ratio of 3.5 to 1, maximum annual capital expenditures of \$25,000,000, and a minimum consolidated interest coverage ratio of 3 to 1, and restrictions on liens, indebtedness, fundamental changes, dispositions of property, making certain restricted payments (including dividends and stock repurchases), investments, transactions with affiliates, sale and leaseback transactions, swap agreements, changing its fiscal year, arrangements affecting subsidiary distributions, entering into new lines of business, and certain actions related to the discontinued operation. As of June 29, 2013, the Company was in compliance with these covenants.

Loans under the 2012 Credit Agreement are guaranteed by certain domestic subsidiaries of the Company pursuant to a Guarantee Agreement, effective August 3, 2012.

As of June 29, 2013, the Company had \$91,922,000 of borrowing capacity available under the committed portion of its 2012 Credit Agreement. The amount the Company is able to borrow under the 2012 Credit Agreement is the total borrowing capacity of \$100,000,000 less any outstanding borrowings, letters of credit and multi-currency borrowings issued under the 2012 Credit Agreement.

Short-term Obligation

On April 11, 2013, one of the Company's subsidiaries in Brazil borrowed BRL 3,057,000, or approximately \$1,400,000 at June 29, 2013, under a short-term note payable to partially fund the acquisition of CBTI. This borrowing was repaid in full on July 15, 2013.

15

KADANT INC.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

7. Stock-Based Compensation

Stock-based compensation expense of \$1,289,000 and \$1,188,000 in the second quarters of 2013 and 2012, respectively, and \$2,558,000 and \$2,262,000 in the first six months of 2013 and 2012, respectively, was recognized within selling, general, and administrative expenses in the accompanying condensed consolidated statement of income. Unrecognized compensation expense related to stock-based compensation totaled approximately \$6,566,000 at June 29, 2013, and will be recognized over a weighted average period of 1.8 years.

8. Employee Benefit Plans

The Company sponsors a noncontributory defined benefit retirement plan for the benefit of eligible employees at its Kadant Solutions division and its corporate office (included in the table below in "Pension Benefits"). The Company also sponsors a restoration plan for the benefit of certain executive officers who also participate in the noncontributory defined benefit retirement plan (included in the table below in "Other Benefits"). In addition, employees at certain of the Company's subsidiaries participate in defined benefit retirement and post-retirement welfare benefit plans (included in the table below in "Other Benefits").

The components of the net periodic benefit cost for the pension benefits and other benefits plans are as follows:

	Three Months Ended June 29, 2013		Three Months Ended June 30, 2012	
	Pension Benefits	Other Benefits	Pension Benefits	Other Benefits
(In thousands)				
Components of Net Periodic Benefit Cost:				
Service cost	\$236	\$ 53	\$243	\$ 34
Interest cost	283	69	331	57
Expected return on plan assets	(372)	(13)	(407)	—
Recognized net actuarial loss	115	22	160	8
Amortization of prior service cost	14	21	14	6
Net periodic benefit cost	\$276	\$ 152	\$341	\$ 105

The weighted average assumptions used to determine net periodic benefit cost are as follows:

Discount rate	3.89 %	4.00 %	4.28 %	4.44 %
Expected long-term return on plan assets	5.75 %	-	6.25 %	-
Rate of compensation increase	3.50 %	3.73 %	4.00 %	3.44 %

	Six Months Ended June 29, 2013		Six Months Ended June 30, 2012	
	Pension Benefits	Other Benefits	Pension Benefits	Other Benefits
(In thousands)				

Components of Net Periodic Benefit Cost:

Edgar Filing: KADANT INC - Form 10-Q

Service cost	\$499	\$ 106	\$505	\$ 73
Interest cost	584	139	651	115
Expected return on plan assets	(753)	(26)	(801)	-
Recognized net actuarial loss	266	43	314	17
Amortization of prior service cost	28	42	28	11
Net periodic benefit cost	\$624	\$ 304	\$697	\$ 216

The weighted average assumptions used to determine net periodic benefit cost are as follows:

Discount rate	3.89 %	3.97 %	4.28 %	4.43 %
Expected long-term return on plan assets	5.75 %	-	6.25 %	-
Rate of compensation increase	3.50 %	3.71 %	4.00 %	3.46 %

KADANT INC.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

8. Employee Benefit Plans (continued)

The Company made cash contributions of \$540,000 to its Kadant Solutions division's noncontributory defined benefit retirement plan in the first six months of 2013 and expects to make cash contributions of \$540,000 over the remainder of 2013. For the remaining pension and post-retirement welfare benefits plans, the Company does not expect to make cash contributions other than to fund current benefit payments.

9. Accumulated Other Comprehensive Items

Comprehensive income combines net income and other comprehensive items, which represent certain amounts that are reported as components of stockholders' equity in the accompanying condensed consolidated balance sheet, including foreign currency translation adjustments, deferred losses and unrecognized prior service cost associated with pension and other post-retirement plans, and deferred losses on hedging instruments.

The change in accumulated other comprehensive items (AOCI) by component, net of tax, in the accompanying condensed consolidated balance sheet is as follows:

	Foreign Currency Translation Adjustment	Unrecognized Prior Service Cost	Deferred Loss on Pension and Other Post- Retirement Plans	Deferred Loss on Hedging Instruments	Accumulated Other Comprehensive Items
(In thousands)					
Balance at December 29, 2012	\$ 8,124	\$ (748)	\$ (9,645)	\$ (1,046)	\$ (3,315)
Other comprehensive (loss) income before reclassifications	(3,466)	–	9	(37)	(3,494)
Reclassifications from AOCI	–	46	202	326	574
Net current period other comprehensive (loss) income	(3,466)	46	211	289	(2,920)
Balance at June 29, 2013	\$ 4,658	\$ (702)	\$ (9,434)	\$ (757)	\$ (6,235)

Amounts reclassified out of accumulated other comprehensive items are as follows:

	Three Months Ended June 29, 2013	Six Months Ended June 29, 2013	Income Statement Line Item
(In thousands)			
Pension and Other Post-retirement Plans: (1)			
Amortization of prior service cost	\$ (35)	\$ (70)	Selling, general, and administrative expenses
Amortization of actuarial losses	(137)	(309)	Selling, general, and administrative expenses
Total expense before income taxes	(172)	(379)	
Income tax benefit	59	131	Provision for income taxes
	(113)	(248)	

Edgar Filing: KADANT INC - Form 10-Q

Cash Flow Hedges: (2)

Interest rate swap agreements	(90)	(196)	Interest expense
Forward currency-exchange contracts	(40)	(83)	Revenues
Total expense before income taxes	(130)	(279)	
Income tax benefit (expense)	46	(47)	Provision for income taxes
	(84)	(326)	
Total reclassifications	\$ (197)	\$ (574)	

(1)Included in the computation of net periodic benefit costs. See Note 8 for additional information.

(2)See Note 10 for additional information.

17

KADANT INC.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

10. Derivatives

The Company uses derivative instruments primarily to reduce its exposure to changes in currency exchange rates and interest rates. When the Company enters into a derivative contract, the Company makes a determination as to whether the transaction is deemed to be a hedge for accounting purposes. For a contract deemed to be a hedge, the Company formally documents the relationship between the derivative instrument and the risk being hedged. In this documentation, the Company specifically identifies the asset, liability, forecasted transaction, cash flow, or net investment that has been designated as the hedged item, and evaluates whether the derivative instrument is expected to reduce the risks associated with the hedged item. To the extent these criteria are not met, the Company does not use hedge accounting for the derivative. The changes in the fair value of a derivative not deemed to be a hedge are recorded currently in earnings. The Company does not hold or engage in transactions involving derivative instruments for purposes other than risk management.

ASC 815, "Derivatives and Hedging," requires that all derivatives be recognized on the balance sheet at fair value. For derivatives designated as cash flow hedges, the related gains or losses on these contracts are deferred as a component of accumulated other comprehensive items. These deferred gains and losses are recognized in the period in which the underlying anticipated transaction occurs. For derivatives designated as fair value hedges, the unrealized gains and losses resulting from the impact of currency exchange rate movements are recognized in earnings in the period in which the exchange rates change and offset the currency gains and losses on the underlying exposures being hedged. The Company performs an evaluation of the effectiveness of the hedge both at inception and on an ongoing basis. The ineffective portion of a hedge, if any, and changes in the fair value of a derivative not deemed to be a hedge are recorded in the condensed consolidated statement of income.

Interest Rate Swaps

The Company entered into a swap agreement in 2006 (the 2006 Swap Agreement) to convert a portion of the Company's outstanding debt from a floating to a fixed rate of interest. The swap agreement matures in 2016, has the same terms and quarterly payment dates as the corresponding debt, and reduces proportionately in line with the amortization of the debt. Under the 2006 Swap Agreement, the Company receives a three-month LIBOR rate and pays a fixed rate of interest of 5.63% plus an applicable margin. The fair value for this instrument as of June 29, 2013 is included in other long-term liabilities, with an offset to accumulated other comprehensive items (net of tax) in the accompanying condensed consolidated balance sheet. The Company has structured the interest rate swap agreement to be 100% effective and as a result, there is no current impact to earnings resulting from hedge ineffectiveness. Management believes that any credit risk associated with the outstanding swap agreement is remote based on the Company's financial position and the creditworthiness of the financial institution issuing the swap agreement.

The counterparty to the swap agreement could demand an early termination of the swap agreement if the Company is in default under the 2012 Credit Agreement, or any agreement that amends or replaces the 2012 Credit Agreement in which the counterparty is a member, and the Company is unable to cure the default. An event of default under the 2012 Credit Agreement includes customary events of default and failure to comply with financial covenants, including a maximum consolidated leverage ratio of 3.5 to 1, maximum annual capital expenditures of \$25,000,000, and a minimum consolidated interest coverage ratio of 3 to 1. As of June 29, 2013, the Company was in compliance with these covenants. The unrealized loss of \$826,000 as of June 29, 2013, represents the estimated amount that the Company would pay to the counterparty in the event of an early termination.

Forward Currency-Exchange Contracts

The Company uses forward currency-exchange contracts primarily to hedge exposures resulting from fluctuations in currency exchange rates. Such exposures result primarily from portions of the Company's operations and assets and liabilities that are denominated in currencies other than the functional currencies of the businesses conducting the operations or holding the assets and liabilities. The Company typically manages its level of exposure to the risk of currency-exchange fluctuations by hedging a portion of its currency exposures anticipated over the ensuing 12-month period, using forward currency-exchange contracts that have maturities of 12 months or less.

Forward currency-exchange contracts that hedge forecasted accounts receivable or accounts payable are designated as cash flow hedges. The fair values for these instruments are included in other current assets for unrecognized gains and in other current liabilities for unrecognized losses, with an offset in accumulated other comprehensive items (net of tax). For forward currency-exchange contracts that are designated as fair value hedges, the gain or loss on the derivative, as well as the offsetting loss or gain on the hedged item are recognized currently in earnings. The fair values of forward currency-exchange contracts that are not designated as hedges are recorded currently in earnings.

18

KADANT INC.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

10. Derivatives (continued)

The Company recognized a gain of \$15,000 and a loss of \$23,000 in the second quarters of 2013 and 2012, respectively, and a gain of \$13,000 and a loss of \$25,000 in the first six months of 2013 and 2012, respectively, included in selling, general, and administrative expenses, associated with forward currency-exchange contracts that were not designated as hedges. Management believes that any credit risk associated with forward currency-exchange contracts is remote based on the Company's financial position and the creditworthiness of the financial institutions issuing the contracts.

The following table summarizes the fair value of the Company's derivative instruments designated and not designated as hedging instruments, the notional values of the associated derivative contracts, and the location of these instruments in the condensed consolidated balance sheet:

Balance Sheet	June 29, 2013		December 29, 2012	
	Asset (Liability)	Notional Amount	Asset (Liability)	Notional Amount
(In thousands)	(a)	(b)	(a)	(b)
Derivatives Designated as Hedging Instruments:				
Derivatives in an Asset Position:				
Forward currency-exchange contracts	\$-	\$-	\$5	\$ 269
Derivatives in a Liability Position:				
Forward currency-exchange contracts	\$(160)	\$ 2,629	\$(161)	\$ 3,180
Interest rate swap agreement	\$-	\$-	\$(19)	\$-
Interest rate swap agreement	\$(826)	\$ 6,625	\$(1,029)	\$ 6,875
Derivatives Not Designated as Hedging Instruments:				
Derivatives in an Asset Position:				
Forward currency-exchange contracts	\$15	\$ 962	\$24	\$ 1,013
Derivatives in a Liability Position:				
Forward currency-exchange contracts	\$-	\$-	\$(12)	\$ 815

(a) See Note 11 for the fair value measurements related to these financial instruments.

(b) The total notional amount is indicative of the level of the Company's derivative activity during the first six months of 2013.

The following table summarizes the activity in accumulated other comprehensive items (OCI) associated with the Company's derivative instruments designated as cash flow hedges as of and for the period ended June 29, 2013:

(In thousands)	Interest Rate Swap Agreements	Forward Currency- Exchange Contracts	Total
Unrealized loss, net of tax, at December 29, 2012	\$ (939)	\$ (107)	\$(1,046)
Loss reclassified to earnings (a)	271	55	326
Gain (Loss) recognized in OCI	17	(54)	(37)
Unrealized loss, net of tax, at June 29, 2013	\$ (651)	\$ (106)	\$(757)

(a) Included in interest expense and provision for income taxes for interest rate swap agreements and in revenues for forward currency-exchange contracts in the accompanying condensed consolidated statement of income.

As of June 29, 2013, \$408,000 of the net unrealized loss included in OCI is expected to be reclassified to earnings over the next twelve months.

19

Notes to Condensed Consolidated Financial Statements

(Unaudited)

11. Fair Value Measurements

Fair value measurement is defined as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. A fair value hierarchy is established, which prioritizes the inputs used in measuring fair value into three broad levels as follows:

Level 1—Quoted prices in active markets for identical assets or liabilities.

Level 2—Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly.

Level 3—Unobservable inputs based on the Company's own assumptions.

The following table presents the fair value hierarchy for those assets and liabilities measured at fair value on a recurring basis:

(In thousands)	Fair Value as of June 29, 2013			
		Level	Level	Total
	Level 1	2	3	
Assets:				
Money market funds and time deposits	\$30,715	\$—	\$ —	\$30,715
Banker's acceptance drafts (a)	\$—	\$8,197	\$ —	\$8,197
Forward currency-exchange contracts	\$—	\$15	\$ —	\$15
Liabilities:				
Forward currency-exchange contracts	\$—	\$160	\$ —	\$160
Interest rate swap agreement	\$—	\$826	\$ —	\$826

(In thousands)	Fair Value as of December 29, 2012			
		Level	Level	Total
	Level 1	2	3	
Assets:				
Money market funds and time deposits	\$19,768	\$—	\$ —	\$19,768
Banker's acceptance drafts (a)	\$—	\$9,794	\$ —	\$9,794
Forward currency-exchange contracts	\$—	\$29	\$ —	\$29
Liabilities:				
Forward currency-exchange contracts	\$—	\$173	\$ —	\$173
Interest rate swap agreements	\$—	\$1,048	\$ —	\$1,048

(a) Included in accounts receivable in the accompanying condensed consolidated balance sheet.

The Company uses the market approach technique to value its financial assets and liabilities, and there were no changes in valuation techniques during the first six months of 2013. The Company's financial assets and liabilities carried at fair value include cash equivalents and derivative instruments used to hedge the Company's foreign currency and interest rate risks. The Company's cash equivalents are comprised of money market funds and bank deposits that

are highly liquid and easily tradable. These investments are valued using inputs observable in active markets for identical securities. The carrying value of the banker's acceptance drafts approximates their fair value due to their short-term nature. The fair values of the Company's interest rate swap agreements are based on LIBOR yield curves at the reporting date. The fair values of the Company's forward currency-exchange contracts are based on quoted forward foreign exchange rates at the reporting date. The forward currency-exchange contracts and interest rate swap agreements are hedges of either recorded assets or liabilities or anticipated transactions. Changes in values of the underlying hedged assets and liabilities or anticipated transactions are not reflected in the table above.

20

KADANT INC.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

11. Fair Value Measurements (continued)

The carrying value and fair value of the Company's long-term debt obligations are as follows:

(In thousands)	June 29, 2013		December 29, 2012	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Long-term debt obligations	\$14,000	\$14,000	\$6,250	\$6,250

The carrying value of long-term debt obligations approximates fair value as the obligations bear variable rates of interest, which adjust quarterly based on prevailing market rates.

12. Business Segment Information

The Company has combined its operating entities into one reportable operating segment, Papermaking Systems, and a separate product line, Fiber-based Products. In classifying operational entities into a particular segment, the Company aggregated businesses with similar economic characteristics, products and services, production processes, customers, and methods of distribution.

(In thousands)	Three Months Ended		Six Months Ended

(a) Corporate primarily includes general and administrative expenses.

KADANT INC.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

13. Contingencies and Litigation

Right of Recourse

In the ordinary course of business, the Company's subsidiaries in China may receive banker's acceptance drafts from customers in payment of outstanding accounts receivable. These banker's acceptance drafts are non-interest bearing obligations of the issuing bank and mature within six months of the origination date. The Company's subsidiaries in China may use these banker's acceptance drafts prior to the scheduled maturity date to settle outstanding accounts payable with vendors. Banker's acceptance drafts transferred to vendors are subject to customary right of recourse provisions prior to their scheduled maturity date. As of June 29, 2013 and December 29, 2012, the Company had \$3,474,000 and \$4,170,000, respectively, of banker's acceptance drafts subject to customary right of recourse provisions, which were transferred to vendors and had not reached their scheduled maturity date. Historically, the banker's acceptance drafts have settled upon maturity without any claim of recourse against the Company.

Discontinued Operation

In 2005, the Company's Kadant Composites LLC subsidiary (Composites LLC) sold substantially all of its assets to a third party. Composites LLC ceased doing business in September 2007 after it had expended all of the cash proceeds from the sale to administer and pay warranty claims related to certain decking and roofing products. All activity related to this business is classified in the results of the discontinued operation in the accompanying condensed consolidated financial statements.

On October 24, 2011, the Company, Composites LLC, and other co-defendants entered into an agreement to settle a nationwide class action lawsuit related to allegedly defective composites decking building products manufactured by Composites LLC between April 2002 and October 2003, which was filed and approved in Connecticut state court. As of June 29, 2013, the Company has accrued \$11,000 for the payment of remaining claims under the class action settlement and \$223,000 in related costs.

General

From time to time, the Company is subject to various claims and legal proceedings covering a range of matters that arise in the ordinary course of business. Such litigation may include claims and counterclaims by and against the Company for breach of contract, canceled contracts, or alleged breaches of warranty and other contract commitments. For legal proceedings in which a loss is probable and estimable, the Company accrues a loss based on the low end of the range of estimated loss when there is no better estimate within the range. If the Company were found to be liable for any of the claims or counterclaims against it, the Company would incur a charge against earnings for amounts in excess of legal accruals.

Item 2 – Management's Discussion and Analysis of Financial Condition and Results of Operations

This Quarterly Report on Form 10-Q includes forward-looking statements that are not statements of historical fact, and may include statements regarding possible or assumed future results of operations. Forward-looking statements are subject to risks and uncertainties and are based on the beliefs and assumptions of our management, using information currently available to our management. When we use words such as "believes," "expects," "anticipates," "intends," "plans," "estimates," "seeks," "should," "likely," "will," "would," "may," "continue," "could," or similar expressions, we are making forward-looking statements.

Forward-looking statements are not guarantees of performance. They involve risks, uncertainties, and assumptions. Our future results of operations may differ materially from those expressed in the forward-looking statements. Many of the important factors that will determine these results and values are beyond our ability to control or predict. You should not put undue reliance on any forward-looking statements. We undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future events, or otherwise. For a discussion of important factors that may cause our actual results to differ materially from those suggested by the forward-looking statements, you should read carefully the section captioned "Risk Factors" in Part II, Item 1A, of this Report.

Overview

Company Background

We are a leading supplier of equipment used in the global papermaking and paper recycling industries and a manufacturer of granules made from papermaking byproducts. Our continuing operations are comprised of one reportable operating segment: Papermaking Systems, and a separate product line, Fiber-based Products. Through our Papermaking Systems segment, we develop, manufacture, and market a range of equipment and products for the global papermaking, paper recycling, and process industries. We have a large customer base that includes most of the world's major paper manufacturers. We believe our large installed base provides us with a spare parts and consumables business that yields higher margins than our capital equipment business.

Through our Fiber-based Products business, we manufacture and sell granules derived from pulp fiber for use as carriers for agricultural, home lawn and garden, and professional lawn, turf and ornamental applications, as well as for oil and grease absorption.

Papermaking Systems Segment

Our Papermaking Systems segment consists of the following product lines: Stock-Preparation; Fluid-Handling; and Doctoring, Cleaning, & Filtration.

Stock-Preparation: custom-engineered systems and equipment, as well as standard individual components, for -pulping, de-inking, screening, cleaning, and refining primarily recycled fiber for preparation for entry into the paper machine; recausticizing and evaporation equipment and systems used in the production of virgin pulp;

Fluid-Handling: rotary joints, precision unions, steam and condensate systems, components, and controls used -primarily in the dryer section of the papermaking process and during the production of corrugated boxboard, metals, plastics, rubber, textiles, chemicals, and food; and

Doctoring, Cleaning, & Filtration: doctoring systems and related consumables that continuously clean rolls to keep paper machines running efficiently; doctor blades made of a variety of materials to perform functions including -cleaning, creping, web removal, flaking, and the application of coatings; profiling systems that control moisture, web curl, and gloss during paper converting; and systems and equipment used to continuously clean paper machine fabrics and rolls, drain water from pulp mixtures, form the sheet or web, and filter the process water for reuse.

Fiber-based Products

We produce biodegradable, absorbent granules from papermaking byproducts for use primarily as carriers for agricultural, home lawn and garden, and professional lawn, turf and ornamental applications, as well as for oil and grease absorption.

23

KADANT INC.

Overview (continued)

Recent Acquisitions

On April 12, 2013, we acquired all the outstanding stock of Companhia Brasileira de Tecnologia Industrial (CBTI) for approximately \$8.1 million in cash and \$0.5 million in assumed liabilities owed to us. CBTI is a long-time licensee of our doctoring, cleaning, and filtration products and stock-preparation products and is also a supplier of industrial drying systems. This acquisition furthers our strategy of expanding our presence in emerging markets.

On May 3, 2013, we acquired certain assets of the Noss Group (Noss), a Sweden-based developer and supplier of high-efficiency cleaners and approach flow systems, for approximately \$6.7 million paid at closing and subject to adjustment for redundancy and certain employee benefit payments. As part of the purchase agreement, we retained approximately \$1.2 million to fund anticipated redundancy and certain employee benefit payments in Sweden. This acquisition expands our product offerings in our Stock-Preparation product line, particularly for virgin pulp and approach flow applications. In addition, Noss has a large installed base and a high proportion of its revenues are parts and consumables products.

International Sales

During the first six months of 2013 and 2012, approximately 58% and 59%, respectively, of our sales were to customers outside the United States, principally in Europe and China. We generally seek to charge our customers in the same currency in which our operating costs are incurred. However, our financial performance and competitive position can be affected by currency exchange rate fluctuations affecting the relationship between the U.S. dollar and foreign currencies. We seek to reduce our exposure to currency fluctuations through the use of forward currency exchange contracts. We may enter into forward contracts to hedge certain firm purchase and sale commitments denominated in currencies other than our subsidiaries' functional currencies. These contracts hedge transactions principally denominated in U.S. dollars.

Application of Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations are based upon our condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of our condensed consolidated financial statements, and the reported amounts of revenues and expenses during the reporting period. Our actual results may differ from these estimates.

Critical accounting policies are defined as those that reflect significant judgments and uncertainties, and could potentially result in materially different results under different assumptions and conditions. We believe that our most critical accounting policies, upon which our financial condition depends and which involve the most complex or subjective decisions or assessments, are those described in "Management's Discussion and Analysis of Financial Condition and Results of Operations" under the section captioned "Application of Critical Accounting Policies and Estimates" in Part II, Item 7, of our Annual Report on Form 10-K for the fiscal year ended December 29, 2012, filed with the Securities and Exchange Commission (SEC). There have been no material changes to these critical accounting policies since fiscal year-end 2012 that warrant disclosure.

Industry and Business Outlook

Our products are primarily sold to the global pulp and paper industry. In North America, the paper industry has seen slow, but steady demand during the first half of 2013. While operating rates have remained strong for containerboard in the first half of 2013, printing and writing grades have continued to experience declines in demand. Our bookings in North America were \$36 million in the second quarter of 2013, up 1% compared to the same period last year, but down 17% sequentially from the traditionally strong first quarter. In Europe, the market continues to be weak due to the general economic conditions and reduced demand for paper. Our bookings in Europe were \$18 million in the second quarter of 2013, down 5% compared to the prior year and down 32% sequentially following a very strong first quarter that included two large stock preparation recycling system orders with a combined value of approximately \$9

million. In China, overcapacity continues to be an issue due to new capacity that has recently come on the market combined with reduced growth in demand. Although the government recently announced an increase in the number of tons of capacity from older mills to be removed in 2013, new capacity coming online in 2013 from recycled containerboard machines is expected to add capacity thereby reducing the net effect of the capacity closure plans. Our bookings in China increased in the second quarter of 2013 to \$15 million, up 54% compared to the second quarter of last year and 25% sequentially.

24

KADANT INC.

Overview (continued)

We expect to achieve GAAP (generally accepted accounting principles) diluted EPS from continuing operations of \$0.47 to \$0.49 in the third quarter of 2013 on revenues of \$88 to \$90 million. Our third quarter of 2013 guidance includes estimated restructuring costs of \$0.01. For the full year, we expect revenues of \$340 to \$345 million, revised from our previous guidance of \$336 to \$343 million. We expect to achieve GAAP diluted EPS from continuing operations of \$2.02 to \$2.07, which includes a gain of \$0.12 on the sale of assets and acquisition-related restructuring costs of \$0.13. This compares to our previous GAAP diluted EPS guidance of \$2.00 to \$2.10, which included an estimated gain of \$0.10 on the sale of assets. On an adjusted diluted EPS basis, excluding the restructuring costs and gain on sale, we are raising our guidance to \$2.03 to \$2.08 from our previous guidance of \$1.90 to \$2.00. Adjusted diluted EPS is a non-GAAP measure, which we believe helps investors to gain a more complete understanding of our underlying operations especially when comparing such results to prior periods. This non-GAAP measure should not be considered superior to or a substitute for the corresponding GAAP measure.

Results of Operations

Second Quarter 2013 Compared With Second Quarter 2012

The following table sets forth our unaudited condensed consolidated statement of income expressed as a percentage of total revenues from continuing operations for the second fiscal quarters of 2013 and 2012. The results of operations for the fiscal quarter ended June 29, 2013 are not necessarily indicative of the results to be expected for the full fiscal year.

	Three Months Ended	
	June 29, 2013	June 30, 2012

Selling, general, and administrative expenses	36	31
Research and development expenses	2	2
Restructuring costs and other income, net	–	–
	90	89
Operating Income	10	11
Interest Income	–	–
Interest Expense	–	–
Income from Continuing Operations Before Provision for Income Taxes	10	11
Provision for Income Taxes	3	3
Income from Continuing Operations	7 %	8 %
Revenues		

Edgar Filing: KADANT INC - Form 10-Q

Revenues for the second quarters of 2013 and 2012 from our Papermaking Systems segment and Fiber-based Products business are as follows:

(In thousands)	Three Months Ended	
	June 29, 2013	June 30, 2012
Revenues:		
Papermaking Systems	\$79,253	\$79,961
Fiber-based Products	2,912	3,021
	\$82,165	\$82,982

25

KADANT INC.

Results of Operations (continued)

Papermaking Systems Segment. Revenues decreased \$0.7 million to \$79.3 million in the second quarter of 2013 from \$80.0 million in the second quarter of 2012 due to decreased demand for capital products at our North American and European operations offset in part by increases of \$6.1 million from acquisitions and \$0.6 million from the favorable effects of currency translation.

Fiber-based Products. Revenues decreased \$0.1 million, or 4%, to \$2.9 million in the second quarter of 2013 from \$3.0 million in the second quarter of 2012 primarily due to decreased demand for our biodegradable granular products.

Papermaking Systems Segment by Product Line. The following table presents revenues for our Papermaking Systems segment by product line, the changes in revenues by product line between the second quarters of 2013 and 2012, and the changes in revenues by product line between the second quarters of 2013 and 2012 excluding the effect of currency translation. The decrease in revenues excluding the effect of currency translation represents the decrease resulting from the conversion of second quarter of 2013 revenues in local currency into U.S. dollars at the second quarter of 2012 exchange rates, and then comparing this result to the actual revenues in the second quarter of 2012. The presentation of the changes in revenues by product line excluding the effect of currency translation is a non-GAAP measure. We believe this non-GAAP measure helps investors gain a more complete understanding of our underlying operations especially when comparing such results to prior periods. This non-GAAP measure should not be considered superior to or a substitute for the corresponding GAAP measure.

	Three Months Ended		Decrease Excluding Effect of	
	June 29, 2013	June 30, 2012	Increase (Decrease)	Currency Translation
(In millions)				

Papermaking Systems Product Lines:

Stock-Preparation	\$28.5	\$28.7	\$(0.2)	\$(0.4)
Doctoring, Cleaning, & Filtration (a)	27.7	27.6	0.1	(0.2)
Fluid-Handling	23.1	23.7	(0.6)	(0.7)
	\$79.3	\$80.0	\$(0.7)	\$(1.3)

(a) Prior year amounts were formerly presented separately as Doctoring, Water-Management, and Other product lines and have been recast to conform to the current presentation.

Revenues in our Stock-Preparation product line in the second quarter of 2013 decreased \$0.4 million, or 2%, excluding a \$0.2 million favorable effect of currency translation, compared to the second quarter of 2012 due to decreased demand for our capital products at our North American and European operations, offset in part by an increase of \$4.0 million from acquisitions. Revenues from our Doctoring, Cleaning, & Filtration product line in the second quarter of 2013 decreased \$0.2 million, or 1%, excluding a \$0.3 million favorable effect of currency translation, compared to the prior year period. An increase of \$1.8 million from acquisitions in the second quarter of 2013 was offset by decreased demand for our capital products, especially at our European operations. In our Fluid-Handling product line, revenues in the second quarter of 2013 decreased \$0.7 million, or 3%, excluding a \$0.1 million favorable effect of currency translation, compared to the prior year period. Increases of \$0.3 million from acquisitions and from demand for our capital products at our European and Chinese operations were offset by decreased demand for our products at our North American operations.

KADANT INC.

Results of Operations (continued)

Gross Profit Margin

Gross profit margins for the second quarters of 2013 and 2012 are as follows:

Three Months Ended	
June	June
29,	30,
2013	2012

Gross Profit Margin:

Papermaking Systems	48.7%	43.4%
Fiber-based Products	47.1	52.8
	48.6%	43.7%

Papermaking Systems Segment. The gross profit margin in the Papermaking Systems segment increased to 48.7% in the second quarter of 2013 from 43.4% in the second quarter of 2012. Gross profit margins were higher in all of our product lines, especially our Stock-Preparation product line, compared to the second quarter of 2012. The increase in the gross profit margin in the Papermaking Systems segment resulted from higher gross profit margins for both capital and aftermarket products due to better pricing and, to a lesser extent, a higher proportion of parts and consumables products sold in the period.

Fiber-based Products. The gross profit margin in our Fiber-based Products business decreased to 47.1% in the second quarter of 2013 from 52.8% in the second quarter of 2012 as a result of decreased manufacturing efficiency due to lower production volumes.

Operating Expenses

Selling, general, and administrative expenses as a percentage of revenues were 36% and 31% in the second quarters of 2013 and 2012, respectively. Selling, general, and administrative expenses increased \$3.9 million, or 16%, to \$29.4 million in the second quarter of 2013 from \$25.5 million in the second quarter of 2012 including increases of \$2.9 million from acquisitions and \$0.2 million from the unfavorable effect of currency translation.

Total stock-based compensation expense was \$1.3 million and \$1.2 million in the second quarters of 2013 and 2012, respectively, and is included in selling, general, and administrative expenses in the accompanying condensed consolidated statement of income.

Research and development expenses were \$1.9 million and \$1.4 million in the second quarters of 2013 and 2012, respectively, and represented 2% of revenues in both periods.

Restructuring Costs and Other Income, net

Restructuring costs and other income, net was \$0.2 million in the second quarter of 2013, including \$1.9 million of restructuring costs and a \$1.7 million gain on the sale of assets. The restructuring costs of \$1.9 million included \$1.3 million associated with the reduction of 22 employees in Brazil and \$0.6 million associated with the reduction of 25 employees in Sweden. We estimate annualized savings of \$1.3 million in selling, general, and administrative expenses and \$1.7 million in cost of revenues once these restructuring actions have been completed. These actions were taken to streamline our operations as a result of our recent acquisitions. All of these items occurred in the Papermaking Systems segment.

Interest Income

Interest income was \$0.1 million in the second quarters of 2013 and 2012.

Interest Expense

Interest expense was \$0.2 million in the second quarters of 2013 and 2012.

27

KADANT INC.

Results of Operations (continued)

Provision for Income Taxes

Our provision for income taxes was \$2.5 million and \$2.7 million in the second quarters of 2013 and 2012, respectively, and represented 30% and 29% of pre-tax income. The effective tax rate of 30% in the second quarter of 2013 was lower than our statutory tax rate primarily due to the release of a valuation allowance against deferred tax assets related to net operating loss carryforwards. The release of the valuation allowance was due to increased projected profitability associated with the CBTI acquisition. Also, the effective tax rate was lower due to a more favorable distribution of our worldwide earnings. The effective tax rate of 29% in the second quarter of 2012 was lower than our statutory tax rate primarily due to a more favorable distribution of our worldwide earnings and the expected utilization of foreign tax credits that were fully reserved in prior periods, due to an increase in estimated 2012 income in the U.S.

Income from Continuing Operations

Income from continuing operations decreased \$0.8 million to \$5.8 million in the second quarter of 2013 from \$6.6 million in the second quarter of 2012. This decrease was primarily due to a decrease in operating income of \$1.0 million offset in part by a \$0.2 million decrease in our provision for income taxes (see Revenues, Gross Profit Margin, Operating Expenses, and Provision for Income Taxes discussed above).

Loss from Discontinued Operation

Loss from the discontinued operation was \$12 thousand and \$3 thousand in the second quarters of 2013 and 2012, respectively.

First Six Months 2013 Compared With First Six Months 2012

The following table sets forth our unaudited condensed consolidated statement of income expressed as a percentage of total revenues from continuing operations for the first six months of 2013 and 2012. The results of operations for the first six months of 2013 are not necessarily indicative of the results to be expected for the full fiscal year.

KADANT INC.

Results of Operations (continued)

Revenues

Revenues for the first six months of 2013 and 2012 from our Papermaking Systems segment and Fiber-based Products business are as follows:

(In thousands)	Six Months Ended	
	June 29, 2013	June 30, 2012
Revenues:		
Papermaking Systems	\$151,650	\$160,111
Fiber-based Products	6,719	6,984
	\$158,369	\$167,095

Papermaking Systems Segment. Revenues decreased \$8.4 million, or 5%, to \$151.7 million in the first six months of 2013 from \$160.1 million in the first six months of 2012 due to decreased demand for capital products at our North American and European operations offset in part by increases of \$6.1 million from acquisitions and \$0.9 million from the favorable effects of currency translation.

Fiber-based Products. Revenues decreased \$0.3 million, or 4%, to \$6.7 million in the first six months of 2013 from \$7.0 million in the first six months of 2012 primarily due to decreased demand for our biodegradable granular products.

Papermaking Systems Segment by Product Line. The following table presents revenues for our Papermaking Systems segment by product line, the changes in revenues by product line between the first six months of 2013 and 2012, and the changes in revenues by product line between the first six months of 2013 and 2012 excluding the effect of currency translation. The increase in revenues excluding the effect of currency translation represents the increase resulting from the conversion of first six months of 2013 revenues in local currency into U.S. dollars at the first six months of 2012 exchange rates, and then comparing this result to the actual revenues in the first six months of 2012. The presentation of the changes in revenues by product line excluding the effect of currency translation is a non-GAAP measure. We believe this non-GAAP measure helps investors gain a more complete understanding of our underlying operations especially when comparing such results to prior periods. This non-GAAP measure should not be considered superior to or a substitute for the corresponding GAAP measure.

(In millions)	Six Months Ended		Increase (Decrease) Excluding Effect of	
	June 29, 2013	June 30, 2012	Increase (Decrease)	Currency Translation
Papermaking Systems Product Lines:				
Doctoring, Cleaning, & Filtration (a)	\$53.6	\$52.6	\$1.0	\$ 0.4
Stock-Preparation	51.5	61.4	(9.9)	(10.2)
Fluid-Handling	46.6	46.1	0.5	0.5
	\$151.7	\$160.1	\$(8.4)	\$(9.3)

Papermaking Systems Product Lines:

Doctoring, Cleaning, & Filtration (a)	\$53.6	\$52.6	\$1.0	\$ 0.4
Stock-Preparation	51.5	61.4	(9.9)	(10.2)
Fluid-Handling	46.6	46.1	0.5	0.5
	\$151.7	\$160.1	\$(8.4)	\$(9.3)

(a) Prior year amounts were formerly presented separately as Doctoring, Water-Management, and Other product lines and have

been recast to conform to the current presentation.

Revenues from our Doctoring, Cleaning, & Filtration product line in the first six months of 2013 increased \$0.4 million, or 1%, excluding a \$0.6 million favorable effect of currency translation, compared to the prior year period due to an increase of \$1.8 million from acquisitions offset in part by a decrease in demand for capital products at our North American and, to a lesser extent, our European and Chinese operations. Revenues in our Stock-Preparation product line in the first six months of 2013 decreased \$10.2 million, or 17%, excluding a \$0.3 million favorable effect of currency translation, compared to the prior year period due to decreased demand for our capital products offset in part by an increase of \$4.0 million from acquisitions. In our Fluid-Handling product line, revenues in the first six months of 2013 increased \$0.5 million, or 1%, compared to the prior year period due to a \$0.3 million increase from acquisitions and higher demand for our capital products in China and, to a lesser extent, Europe and North America.

Fiber-based Products	51.4	54.8
	48.0%	44.7%

Papermaking Systems Segment. The gross profit margin in the Papermaking Systems segment increased to 47.8% in the first six months of 2013 from 44.2% in the first six months of 2012. This increase resulted primarily from higher gross profit margins in our Stock-Preparation product line due to better pricing and an increase in the proportion of higher-margin parts and consumables products to total revenues compared to the first six months of 2012.

Fiber-based Products. The gross profit margin in our Fiber-based Products business decreased to 51.4% in the first six months of 2013 from 54.8% in the first six months of 2012 primarily as a result of decreased manufacturing efficiency due to lower production volumes and revenues in the first six months of 2013.

Operating Expenses

Selling, general, and administrative expenses as a percentage of revenues were 36% and 31% in the first six months of 2013 and 2012, respectively. Selling, general, and administrative expenses increased \$4.8 million, or 9%, to \$56.4 million in the first six months of 2013 from \$51.6 million in the first six months of 2012 primarily due to higher selling expenses and increased selling, general, and administrative expenses related to our recent acquisitions.

Total stock-based compensation expense was \$2.6 million and \$2.3 million in the first six months of 2013 and 2012, respectively, and is included in selling, general, and administrative expenses in the accompanying condensed consolidated statement of income.

Research and development expenses increased \$0.7 million to \$3.6 million in the first six months of 2013 compared to \$2.9 million in the first six months of 2012 and represented 2% of revenues in both periods.

Restructuring Costs and Other (Income) Expense, net

Restructuring costs and other (income) expense, net was \$0.2 million in the first six months of 2013, consisting of \$1.9 million of restructuring costs and \$1.7 million of income from a gain on the sale of assets. In the first six months of 2012, other expense consisted of accelerated depreciation of \$0.3 million due to the anticipated disposal of equipment in China related to a facility consolidation. The restructuring costs of \$1.9 million in the first six months of 2013 included \$1.3 million associated with the reduction of 22 employees in Brazil and \$0.6 million associated with the reduction of 25 employees in Sweden.

Interest Income

Interest income was \$0.3 million and \$0.2 million in the first six months of 2013 and 2012, respectively.

Interest Expense

Interest expense was \$0.4 million in both the first six months of 2013 and 2012.

KADANT INC.

Results of Operations (continued)

Provision for Income Taxes

Our provision for income taxes was \$4.5 million and \$5.8 million in the first six months of 2013 and 2012, respectively, and represented 28% and 30% of pre-tax income. The effective tax rate of 28% in the first six months of 2013 was lower than our statutory tax rate primarily due to the reduction of the 2012 U.S. tax cost of foreign earnings and a benefit from the 2012 U.S. research and development tax credit, both of which resulted from U.S. tax legislation enacted in January 2013. In addition, our effective tax rate in the first six months of 2013 benefited from the release of a valuation allowance against deferred tax assets related to net operating loss carryforwards. The release of the valuation allowance was due to increased projected profitability associated with the CBTI acquisition. Also, contributing to the lower effective tax rate in the first six months of 2013 were lower statutory tax rates in our overseas operations and a more favorable distribution of our worldwide earnings. The effective tax rate of 30% in the first six months of 2012 was lower than our statutory tax rate primarily due to a more favorable distribution of worldwide earnings and the expected utilization of foreign tax credits that were fully reserved in prior periods, the latter of which was due to an increase in estimated 2012 income in the U.S.

Income from Continuing Operations

Income from continuing operations decreased \$2.5 million to \$11.2 million in the first six months of 2013 from \$13.7 million in the first six months of 2012. The decrease in the 2013 period was primarily due to a decrease in operating income of \$4.0 million offset in part by a \$1.3 million decrease in our provision for income taxes (see Revenues, Gross Profit Margin, and Provision for Income Taxes discussed above).

Loss from Discontinued Operation

Loss from the discontinued operation was \$41 thousand and \$64 thousand in the first six months of 2013 and 2012, respectively.

Recent Accounting Pronouncements

Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists. In July 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2013-11. Currently, U.S. GAAP does not include explicit guidance on the financial statement presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. This ASU clarifies that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except as follows. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. This ASU applies to all entities that have unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. This ASU is effective for fiscal years, and interim periods within those years, beginning after December 15, 2013, although early adoption is permitted. This ASU will be applied prospectively to all unrecognized tax benefits that exist at the effective date. Retrospective application is permitted. We have not yet adopted this ASU, however, we are currently evaluating the effect it will have on our consolidated financial statements.

Derivatives and Hedging (Topic 815): Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedge Accounting Purposes. In February 2013, the FASB issued ASU No. 2013-10. This ASU permits the Fed Funds Effective Swap Rate (OIS) to be used as a U.S. benchmark interest rate for hedge accounting purposes, in addition to UST and LIBOR. This ASU also removes the restriction on using different

benchmark rates for similar hedges. Before this ASU, only Treasury obligations of the U.S. government (UST) and, for practical reasons, the London Interbank Offered Rate (LIBOR) swap rate, were considered benchmark interest rates. Including the Fed Funds Effective Swap Rate (OIS) as an acceptable U.S. benchmark interest rate in addition to UST and LIBOR will provide risk managers with a more comprehensive spectrum of interest rate resets to utilize as the designated benchmark interest rate risk component under the hedge accounting guidance. This ASU is effective prospectively for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013. We will consider the guidance in this ASU for future transactions in which we elect to apply hedge accounting of the benchmark interest rate. We do not expect the adoption of this ASU to have a material effect on our consolidated financial statements.

KADANT INC.

Results of Operations (continued)

Presentation of Financial Statements (Topic 205): Liquidation Basis of Accounting. In April 2013, the FASB issued ASU No. 2013-02. This ASU clarifies when an entity should apply the liquidation basis of accounting. In addition, the guidance provides principles for the recognition and measurement of assets and liabilities and requirements for financial statements prepared using the liquidation basis of accounting. The ASU requires an organization to prepare its financial statements using the liquidation basis of accounting when liquidation is imminent. The ASU requires financial statements prepared using the liquidation basis to present relevant information about a company's resources and obligations in liquidation, including: the organization's assets measured at the amount of the expected cash proceeds from liquidation, including any items it had not previously recognized under U.S. GAAP that it expects to either sell in liquidation or use in settling liabilities; the organization's liabilities as recognized and measured in accordance with existing guidance that applies to those liabilities; and accrual of the costs it expects to incur and the income it expects to earn during liquidation, including any anticipated disposal costs. This ASU is effective for reporting periods beginning after December 15, 2013, although early adoption is permitted. We do not expect the adoption of this ASU to have a material effect on our consolidated financial statements.

Foreign Currency Matters (Topic 830): Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity. In March 2013, the FASB issued ASU No. 2013-05. When a reporting entity (parent) ceases to have a controlling financial interest in a subsidiary or group of assets that is a nonprofit activity or a business within a foreign entity, the parent is required to apply the guidance in subtopic 830-30 to release any related cumulative translation adjustment into net income. Accordingly, the cumulative translation adjustment should be released into net income only if the sale or transfer results in the complete or substantially complete liquidation of the foreign entity in which the subsidiary or group of assets had resided. For an equity method investment that is a foreign entity, the partial sale guidance in Accounting Standards Codification section 830-30-40 still applies. As such, a pro rata portion of the cumulative translation adjustment should be released into net income upon a partial sale of such an equity method investment. However, this treatment does not apply to an equity method investment that is not a foreign entity. In those instances, the cumulative translation adjustment is released into net income only if the partial sale represents a complete or substantially complete liquidation of the foreign entity that contains the equity method investment. This ASU is effective prospectively for fiscal years and interim periods beginning after December 15, 2013. This ASU will be applied prospectively to derecognition events occurring after the effective date. Early adoption is permitted. We have not yet adopted this ASU, but we are currently evaluating the impact its adoption will have on our consolidated financial statements.

Liquidity and Capital Resources

Consolidated working capital, including the discontinued operation, was \$111.4 million at June 29, 2013, compared with \$100.3 million at December 29, 2012. Included in working capital are cash and cash equivalents of \$64.3 million and restricted cash of \$0.2 million at June 29, 2013, compared with cash and cash equivalents of \$54.6 million at December 29, 2012. At June 29, 2013, \$61.0 million of cash and cash equivalents were held by our foreign subsidiaries.

First Six Months of 2013

Our operating activities provided cash of \$17.9 million in the first six months of 2013, including \$18.1 million of cash provided by our continuing operations and \$0.2 million of cash used in our discontinued operation. Working capital provided cash of \$2.5 million in the first six months of 2013, including \$4.1 million in other current liabilities, \$2.7 million in accounts payable and \$3.0 million in accounts receivable and unbilled contract costs and fees. The increase in other current liabilities was primarily due to an increase in customer deposits. The increase in accounts payable was primarily related to inventory purchases for several large projects, and the decrease in accounts receivable and unbilled contract costs and fees was primarily due to the timing of billings. These sources of cash were largely offset

by an increase in inventories, which used cash of \$6.9 million in the first six months of 2013 primarily due to an increase in work in process inventories associated with several major projects at our European operations that are expected to ship later in the year.

Our investing activities used cash of \$12.6 million in the first six months of 2013, including \$14.2 million for the acquisitions of CBTI and Noss and \$2.6 million for the purchase of property, plant, and equipment. These uses of cash were offset in part by \$3.3 million of proceeds received from the sale of property, plant, and equipment, primarily from the sale of real estate in China.

Our financing activities provided cash of \$5.5 million in the first six months of 2013, primarily from proceeds received from borrowings under our 2012 Credit Agreement of \$18.9 million. This source of cash was largely offset by cash used for principal payments on our debt obligations of \$9.8 million, repurchases of our common stock on the open market of \$2.7 million, and the payment of a \$1.4 million cash dividend to stockholders.

32

KADANT INC.

Liquidity and Capital Resources (continued)

First Six Months of 2012

Our operating activities provided cash of \$3.7 million in the first six months of 2012, including \$4.5 million of cash provided by our continuing operations and \$0.8 million of cash used in our discontinued operation. A decrease in other current liabilities used cash of \$9.1 million in the first six months of 2012. This use of cash was primarily associated with a decrease in billings in excess of costs due to the timing of billings, as well as incentive payments made during the first six months. An increase in unbilled contract costs and fees associated with revenue recognized under the percentage-of-completion method used cash of \$7.6 million in the first six months of 2012.

Our investing activities used cash of \$0.6 million in the first six months of 2012, including \$0.8 million to purchase property, plant, and equipment, offset in part by \$0.3 million of proceeds from the sale of property, plant, and equipment.

Our financing activities used cash of \$7.7 million in the first six months of 2012, including \$8.4 million for the repurchase of our common stock on the open market and \$0.3 million for principal payments on our debt obligations. These uses of cash were offset in part by a decrease of \$0.6 million in restricted cash.

2012 Revolving Credit Facility

On August 3, 2012, we entered into a five-year unsecured revolving credit facility (2012 Credit Agreement) in the aggregate principal amount of up to \$100 million. The 2012 Credit Agreement also includes an uncommitted unsecured incremental borrowing facility of up to an additional \$50 million. The principal on any borrowings made under the 2012 Credit Agreement is due on August 3, 2017. Interest on any loans outstanding under the 2012 Credit Agreement accrues and is payable quarterly in arrears at one of the following rates selected by us: (i) the highest of (a) the federal funds rate plus 0.50% plus an applicable margin of 0% to 1%, (b) the prime rate, as defined, plus an applicable margin of 0% to 1%, and (c) the Eurocurrency rate, as defined, plus 0.50% plus an applicable margin of 0% to 1% or (ii) the Eurocurrency rate, as defined, plus an applicable margin of 1% to 2%. The applicable margin is determined based upon the ratio of our total debt to earnings before interest, taxes, depreciation, and amortization, as defined in the 2012 Credit Agreement. For this purpose, total debt is defined as total debt less up to \$25 million of unrestricted domestic cash. There were \$8.0 million of borrowings outstanding under the 2012 Credit Agreement at June 29, 2013.

Our obligations under the 2012 Credit Agreement may be accelerated upon the occurrence of an event of default under the 2012 Credit Agreement, which includes customary events of default including without limitation payment defaults, defaults in the performance of affirmative and negative covenants, the inaccuracy of representations or warranties, bankruptcy- and insolvency-related defaults, defaults relating to such matters as the Employment Retirement Income Security Act (ERISA), unsatisfied judgments, the failure to pay certain indebtedness, and a change of control default. In addition, the 2012 Credit Agreement contains negative covenants applicable to us and our subsidiaries, including financial covenants requiring us to comply with a maximum consolidated leverage ratio of 3.5 to 1, maximum annual capital expenditures of \$25 million, and a minimum consolidated interest coverage ratio of 3 to 1, and restrictions on liens, indebtedness, fundamental changes, dispositions of property, making certain restricted payments (including dividends and stock repurchases), investments, transactions with affiliates, sale and leaseback transactions, swap agreements, changing our fiscal year, arrangements affecting subsidiary distributions, entering into new lines of business, and certain actions related to the discontinued operation. As of June 29, 2013, we were in compliance with these covenants.

Loans under the 2012 Credit Agreement are guaranteed by certain of our domestic subsidiaries pursuant to a Guarantee Agreement, effective August 3, 2012.

Commercial Real Estate Loan

On May 4, 2006, we borrowed \$10 million under a promissory note (2006 Commercial Real Estate Loan). The 2006 Commercial Real Estate Loan is repayable in quarterly installments of \$125 thousand over a ten-year period with the

remaining principal balance of \$5 million due upon maturity. As of June 29, 2013, the remaining balance on the 2006 Commercial Real Estate Loan was \$6.6 million. Interest on the 2006 Commercial Real Estate Loan accrues and is payable quarterly in arrears at one of the following rates selected by us: (a) the prime rate or (b) the three-month London Inter-Bank Offered Rate (LIBOR) plus a .75% margin.

KADANT INC.

Liquidity and Capital Resources (continued)

Our obligations under the 2006 Commercial Real Estate Loan may be accelerated upon the occurrence of an event of default under the 2006 Commercial Real Estate Loan and the mortgage and security agreements, which includes customary events of default including without limitation payment defaults, defaults in the performance of covenants and obligations, the inaccuracy of representations or warranties, bankruptcy- and insolvency-related defaults, liens on the properties or collateral and uninsured judgments. In addition, the occurrence of an event of default under the 2012 Credit Agreement or any successor credit facility would be an event of default under the 2006 Commercial Real Estate Loan.

Short-term Obligation

On April 11, 2013, one of our subsidiaries in Brazil borrowed BRL 3.1 million, or approximately \$1.4 million at June 29, 2013, under a short-term note payable to partially fund the acquisition of CBTI. The borrowing was repaid in full on July 15, 2013.

Interest Rate Swap Agreement

We entered into a swap agreement in 2006 (2006 Swap Agreement) to convert the 2006 Commercial Real Estate Loan from a floating to a fixed rate of interest. The 2006 Swap Agreement matures in 2016, has the same terms and quarterly payment dates as the corresponding debt, and reduces proportionately in line with the amortization of the 2006 Commercial Real Estate Loan. Under the 2006 Swap Agreement, we receive a three-month LIBOR rate and pay a fixed rate of interest of 5.63%. As of June 29, 2013, the interest rate swap agreement had an unrealized loss of \$0.8 million. Our management believes that any credit risk associated with the 2006 Swap Agreement is remote based on our financial position and the creditworthiness of the financial institution issuing the swap agreement.

The counterparty to the 2006 Swap Agreement could demand an early termination of the swap agreement if we are in default under the 2012 Credit Agreement, or any agreement that amends or replaces the 2012 Credit Agreement in which the counterparty is a member, and we are unable to cure the default. An event of default under the 2012 Credit Agreement includes customary events of default and failure to comply with financial covenants, including a maximum consolidated leverage ratio of 3.5 to 1, maximum annual capital expenditures of \$25 million, and a minimum consolidated interest charge coverage ratio of 3 to 1. The unrealized loss of \$0.8 million associated with the swap agreement as of June 29, 2013, represents the estimated amount that we would pay to the counterparty in the event of an early termination.

Additional Liquidity and Capital Resources

On October 29, 2012, our board of directors approved the repurchase by us of up to \$20 million of our equity securities during the period from November 7, 2012 to November 7, 2013. Through June 29, 2013, we had repurchased 294,733 shares of our common stock for \$7.4 million under this authorization.

In the second quarter of 2013, we paid a quarterly dividend of \$1.4 million. On May 23, 2013, our board of directors approved a quarterly cash dividend of \$0.125 per outstanding share of our common stock, or approximately \$1.4 million, to be paid on August 8, 2013 to all stockholders of record on July 11, 2013. Future declarations of dividends are subject to board of directors' approval and may be adjusted as business needs or market conditions change. The payment of cash dividends is subject to our compliance with the consolidated leverage ratio contained in our 2012 Credit Agreement.

On April 12, 2013, we acquired all the outstanding stock of CBTI for approximately \$8.1 million in cash and \$0.5 million in assumed liabilities owed to us. At the closing date, approximately \$3.5 million of the purchase price was deposited into an escrow fund to secure certain indemnification obligations of the sellers. Approximately \$1.5 million of the escrow fund will be released to the sellers on or about January 31, 2014, and the balance will be released on various dates over a five-year period ending on the fifth anniversary of the closing date, less the amount of any claims in each instance.

KADANT INC.

Liquidity and Capital Resources (continued)

On May 3, 2013, we acquired certain assets of Noss, a Sweden-based supplier of high-efficiency cleaners and approach flow systems, for approximately \$6.7 million paid at closing and subject to adjustment for redundancy and certain employee benefit payments. At the closing date, approximately \$2.0 million of the purchase price was deposited into an escrow fund to secure certain indemnification obligations of the sellers. The escrow fund, less any claims made, will be released to the sellers in two installments on the first and second anniversaries of the closing date.

It is our intention to reinvest indefinitely the earnings of our international subsidiaries in order to support the current and future capital needs of their operations. Through June 29, 2013, we have not provided for U.S. income taxes on approximately \$133.8 million of unremitted foreign earnings. The U.S. tax cost has not been determined due to the fact that it is not practicable to estimate at this time. The related foreign tax withholding, which would be required if we were to remit the foreign earnings to the U.S., would be approximately \$1.8 million.

Although we currently have no material commitments for capital expenditures, we plan to make expenditures of approximately \$3 to \$4 million during the remainder of 2013 for property, plant, and equipment.

In the future, our liquidity position will be primarily affected by the level of cash flows from operations, cash paid to satisfy debt repayments, capital projects, dividends, stock repurchases, or additional acquisitions, if any. We believe that our existing resources, together with the cash available from our credit facilities and the cash we expect to generate from continuing operations, will be sufficient to meet the capital requirements of our current operations for the foreseeable future.

Item 3 – Quantitative and Qualitative Disclosures About Market Risk

Our exposure to market risk from changes in interest rates and foreign currency exchange rates has not changed materially from our exposure at year-end 2012 as disclosed in Item 7A of our Annual Report on Form 10-K for the fiscal year ended December 29, 2012, filed with the SEC.

Item 4 – Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

Our management, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of June 29, 2013. The term "disclosure controls and procedures," as defined in Securities Exchange Act Rules 13a-15(e) and 15d-15(e), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by the company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based upon the evaluation of our disclosure controls and procedures as of June 29, 2013, our Chief Executive Officer and Chief Financial Officer concluded that as of June 29, 2013, our disclosure controls and procedures were effective at the reasonable assurance level.

(b) Changes in Internal Control Over Financial Reporting

There have not been any changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended) during the fiscal quarter ended June 29, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

KADANT INC.

PART II – OTHER INFORMATION

Item 1A – Risk Factors

In connection with the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, we wish to caution readers that the following important factors, among others, in some cases have affected, and in the future could affect, our actual results and could cause our actual results in 2013 and beyond to differ materially from those expressed in any forward-looking statements made by us, or on our behalf.

Our business is dependent on worldwide and local economic conditions as well as the condition of the pulp and paper industry.

We sell products worldwide primarily to the pulp and paper industry, which is a cyclical industry. Generally, the financial condition of the global pulp and paper industry corresponds to general worldwide economic conditions, as well as to a number of other factors, including pulp and paper production capacity relative to demand in the geographic markets in which we compete. A significant portion of our revenues are from customers based in Europe and China. The economic recession in Europe and continuing uncertainty due to the risk of sovereign debt defaults by certain European countries can adversely affect our revenues and bookings in Europe. In addition, slowing economic growth rates in China can adversely affect our business. The timing for the addition of new capacity in the paper markets in China remains uncertain and is highly dependent on the markets' ability to absorb existing capacity. These uncertainties in the global and regional economic outlooks have negatively affected, and may in the future negatively affect, demand for our customers' products, and as a consequence, our products and services, especially our capital equipment systems and products, and our financial results. Also, uncertainty regarding economic conditions has caused, and may in the future cause, liquidity and credit issues for many businesses, including our customers in the pulp and paper industry as well as other industries, and may result in their inability to fund projects, capacity expansion plans, and to some extent, routine operations and capital expenditures. These conditions have resulted, and may in the future result, in a number of structural changes in the pulp and paper industry, including decreased spending, mill closures, consolidations, and bankruptcies, all of which negatively affect our business, revenue, and profitability. Financial and economic turmoil affecting the worldwide economy or the banking system and financial markets, in particular, due to political or economic developments could cause the expectations for our business to differ materially in the future.

Our financial performance will be negatively impacted if there are delays in customers securing financing or our customers become unable to secure such financing, due to any number of factors including a tightening of monetary policy. The inability of our customers to obtain credit may affect our ability to recognize revenue and income, particularly on large capital equipment orders from new customers for which we may require letters of credit. We may also be unable to issue letters of credit to our customers, which are required in some cases to guarantee performance, during periods of economic uncertainty.

Paper producers have been, and may in the future be, negatively affected by higher operating costs. Paper companies curtail their capital and operating spending during periods of economic uncertainty and are cautious about resuming spending as market conditions improve. As paper companies consolidate operations in response to market weakness, they frequently reduce capacity, increase downtime, defer maintenance and upgrades, and postpone or even cancel capacity addition or expansion projects. It is especially difficult to accurately forecast our revenues and earnings per share during periods of economic uncertainty.

A significant portion of our international sales has, and may in the future, come from China and we operate several manufacturing facilities in China, which exposes us to political, economic, operational and other risks.

We have historically had significant revenues from China, operate significant manufacturing facilities in China, and manufacture and source equipment and components from China. As a result, we are exposed to increased risk in the event of economic slowdowns, changes in the policies of the Chinese government, political unrest, unstable economic conditions, or other developments in China or in U.S.-China relations that are adverse to trade, including enactment of protectionist legislation or trade or currency restrictions. Policies of the Chinese government to target slower economic growth to avoid inflation may negatively affect our business in China if customers are unable to expand capacity or obtain financing for expansion or improvement projects.

Our bookings activity from China tends to be more variable than in other geographic regions, as the China pulp and paper industry historically has experienced, and in the future may experience, periods of significant capacity expansion to meet demand followed by a period of stagnant activity while overcapacity is absorbed. These cycles result in periods of significant bookings activity for our capital products and increased revenues followed by a significant decrease in bookings or potential delays in shipments and order placements by our customers as they attempt to balance supply and demand. As a consequence, our bookings and revenues in China tend to be uneven and difficult to predict. Paper companies in China have brought and are scheduled to bring online capacity additions; however, this capacity growth has been uneven and the larger paper producers have delayed, and may in the future delay, additional new capacity start-ups in reaction to softer market conditions. In general, as significant capacity additions come online and the economic growth rate slows, paper producers have deferred and could in the future defer further investments or the delivery of previously-ordered equipment until the market absorbs the new production. This has negatively affected our bookings and revenues in China in the past, and may negatively affect our bookings and revenues in China in the future.

36

KADANT INC.

In addition, orders from customers in China, particularly for large stock-preparation systems that have been tailored to a customer's specific requirements, have credit risks higher than we generally incur elsewhere, and some orders are subject to the receipt of financing approvals from the Chinese government or can be impacted by the availability of credit and more restrictive monetary policies. For this reason, we generally do not record signed contracts from customers in China for large stock-preparation systems as orders until we receive the down payments for such contracts. The timing of the receipt of these orders and the down payments are uncertain and there is no assurance that we will be able to recognize revenue on these contracts. Delays in the receipt of payments and letters of credit affect when revenues can be recognized on these contracts, making it difficult to accurately forecast our future financial performance. We may experience a loss if a contract is cancelled prior to the receipt of a down payment in the event we commence engineering or other work associated with the contract. We typically have inventory awaiting shipment to customers. We could have excess and obsolete inventory if contracts are cancelled and we cannot re-sell the equipment. In addition, we may experience a loss if the contract is cancelled, or the customer does not fulfill its obligations under the contract, prior to the receipt of a letter of credit or final payments covering the remaining balance of the contract, which could represent 80% or more of the total order.

A significant portion of our revenue in China is recognized upon shipment once we have secured final payment. In some cases, we will be unable to recognize any revenue on completed orders until after installation or acceptance of the equipment. Furthermore, customers in China often demand that deliveries of previously-ordered equipment be delayed to future periods for any number of reasons. As a result, our revenues recognized in China have varied, and will in the future vary, greatly from period to period and be difficult to predict.

Commodity or component price increases and significant shortages of commodities and component products may adversely impact our financial results or our ability to meet commitments to customers.

We use steel, stainless steel, brass, bronze, and other commodities to manufacture our products. We also use natural gas in the production of our fiber-based granular products. As a result, unanticipated increases in the prices of such commodities could increase our costs more than expected and negatively impact our business, results of operations and financial condition if we are unable to fully offset the effect of these increased costs through price increases, productivity improvements, or cost reduction programs.

We rely on suppliers to secure commodity and component products required for the manufacture of our products. A disruption in deliveries to or from suppliers or decreased availability of such components or commodities could have an adverse effect on our ability to meet our commitments to customers or increase our operating costs. We believe our sources of raw materials and component products will generally be sufficient for our needs in the foreseeable future. However, our business, results of operations or financial condition could be negatively impacted if supply is insufficient for our operations.

We are dependent on two paper mills for the fiber used in the manufacture of our fiber-based granular products. From time to time we have experienced, and may in the future experience, some difficulty obtaining sufficient raw material to operate at optimal production levels. We continue to work with the mills to ensure a stable supply of raw material. To date, we have been able to meet all of our customer delivery requirements, but there can be no assurance that we will be able to meet future delivery requirements. Although we believe our relationships with the mills are good, the mills could decide not to continue to supply sufficient papermaking byproducts, or may not agree to continue to supply such products on commercially reasonable terms. If the mills were unable or unwilling to supply us sufficient fiber, we would be forced to find one or more alternative sources of supply of this raw material. We may be unable to find alternative supplies on commercially reasonable terms or could incur excessive transportation costs if an alternative supplier were found, which would increase our manufacturing costs, and might prevent prices for our products from being competitive or require closure of this business.

Our business is subject to economic, currency, political, and other risks associated with international sales and operations.

During the first six months of 2013 and 2012, approximately 58% and 59%, respectively, of our sales were to customers outside the United States, principally in Europe and China. In addition, we operate several manufacturing operations worldwide, including operations in China, Europe, Mexico, and Brazil. International revenues and operations are subject to a number of risks, including the following:

agreements may be difficult to enforce and receivables difficult to collect through a foreign country's legal system,

foreign customers may have longer payment cycles,
foreign countries may impose additional withholding taxes or otherwise tax our foreign income, impose tariffs, adopt
other restrictions on foreign trade, impose currency restrictions or enact other protectionist or anti-trade measures,
worsening economic conditions may result in worker unrest, labor actions, and potential work stoppages,
political unrest may disrupt commercial activities of ours or our customers,
it may be difficult to repatriate funds, due to unfavorable domestic and foreign tax consequences or other restrictions
or limitations imposed by foreign governments, and
the protection of intellectual property in foreign countries may be more difficult to enforce.

37

KADANT INC.

Our inability to successfully identify and complete acquisitions or successfully integrate any new or previous acquisitions could have a material adverse effect on our business.

Our strategy includes the acquisition of technologies and businesses that complement or augment our existing products and services. Any such acquisition involves numerous risks that may adversely affect our future financial performance and cash flows. These risks include:

- competition with other prospective buyers resulting in our inability to complete an acquisition or in us paying a substantial premium over the fair value of the net assets of the acquired business,
- inability to obtain regulatory approvals, including antitrust approvals,
- difficulty in assimilating operations, technologies, products and the key employees of the acquired business,
- inability to maintain existing customers or to sell the products and services of the acquired business to our existing customers,
- diversion of management's attention away from other business concerns,
- inability to improve the revenues and profitability or realize the cost savings and synergies expected of the acquisition,
- assumption of significant liabilities, some of which may be unknown at the time,
- potential future impairment of the value of goodwill and intangible assets acquired, and
- identification of internal control deficiencies of the acquired business.

Any acquisition we complete may be made at a substantial premium over the fair value of the net identifiable assets of the acquired business. We are required to assess the realizability of goodwill and indefinite-lived intangible assets annually as well as whenever events or changes in circumstances indicate that these assets may be impaired. These events or circumstances would generally include operating losses or a significant decline in earnings associated with the acquired business or asset, and our ability to realize the value of goodwill and indefinite-lived intangible assets will depend on the future cash flows of these businesses. For example, in 2008, we recorded a \$40.3 million impairment charge to write down the goodwill associated with the stock-preparation reporting unit within our Papermaking Systems segment. We may incur additional impairment charges to write down the value of our goodwill and acquired intangible assets in the future if the assets are not deemed recoverable, which could have a material adverse effect on our operating results.

It may be difficult for us to implement our strategies for improving internal growth.

Some of the markets in which we compete are mature and have lower growth rates. We pursue a number of strategies to improve our internal growth, including:

- strengthening our presence in selected geographic markets, including emerging markets and existing markets where we see opportunities,
- focusing on parts and consumables sales,
- using low cost manufacturing bases, such as China and Mexico,
- allocating research and development funding to products with higher growth prospects,
- developing new applications for our technologies,
- combining sales and marketing operations in appropriate markets to compete more effectively,
- finding new markets for our products, and
- continuing to develop cross-selling opportunities for our products and services to take advantage of our depth in product offerings.

We may not be able to successfully implement these strategies and these strategies may not result in the expected growth of our business.

We are exposed to fluctuations in currency exchange rates, which could adversely affect our cash flows and results of operations.

As a multinational corporation, we are exposed to fluctuations in currency exchange rates that impact our business in many ways. Although we seek to charge our customers in the same currency in which our operating costs are incurred, fluctuations in currency exchange rates may affect product demand and adversely affect the profitability in U.S. dollars of products we provide in international markets. Our subsidiaries occasionally invoice third-party customers in currencies other than their functional currency. Movements in the invoiced currency relative to the functional currency

could adversely impact our cash flows and results of operations. In addition, reported revenues made in non-U.S. currencies by our subsidiaries, when translated into U.S. dollars for financial reporting purposes, fluctuate due to exchange rate movements. Any of these factors could have a material adverse impact on our business and results of operations. Furthermore, while some risks can be hedged using derivatives or other financial instruments, or may be insurable, such attempts to mitigate these risks may be costly and not always successful.

We are subject to intense competition in all our markets.

We believe that the principal competitive factors affecting the markets for our products include quality, price, service, technical expertise, and product performance and innovation. Our competitors include a number of large multinational corporations that may have substantially greater financial, marketing, and other resources than we do. As a result, they may be able to adapt more quickly to new or emerging technologies and changes in customer requirements, or to devote greater resources to the promotion and sale of their services and products. Competitors' technologies may prove to be superior to ours. Our current products, those under development, and our ability to develop new technologies may not be sufficient to enable us to compete effectively. Competition, especially in China, has increased as new companies enter the market and existing competitors expand their product lines and manufacturing operations.

38

KADANT INC.

Adverse changes to the soundness of our suppliers and customers could affect our business and results of operations. All of our businesses are exposed to risk associated with the creditworthiness of our key suppliers and customers, including pulp and paper manufacturers and other industrial customers, many of which may be adversely affected by volatile conditions in the financial markets, worldwide economic downturns, and difficult economic conditions. These conditions could result in financial instability, bankruptcy, or other adverse effects at any of our suppliers or customers. The consequences of such adverse effects could include the interruption of production at the facilities of our suppliers, the reduction, delay or cancellation of customer orders, delays in or the inability of customers to obtain financing to purchase our products or pay amounts due, and bankruptcy of customers or other creditors. Any adverse changes to the soundness of our suppliers or customers may adversely affect our cash flow, profitability, and financial condition.

Changes in our effective tax rate may impact our results of operations.

We derive a significant portion of our revenue and earnings from our international operations, and are subject to income and other taxes in the U.S. and numerous foreign jurisdictions. A number of factors may cause our effective tax rate to fluctuate, including: changes in tax rates in various jurisdictions; unanticipated changes in the amount of profit in jurisdictions with low statutory tax rates; the resolution of issues arising from tax audits with various tax authorities; changes in the valuation of our deferred tax assets and liabilities; adjustments to income taxes upon finalization of various tax returns; increases in expenses not deductible for tax purposes, including impairments of goodwill in connection with acquisitions; changes in available tax credits or our ability to utilize foreign tax credits; and changes in tax laws or the interpretation of such tax laws. Any of these factors could cause us to experience an effective tax rate significantly different from prior periods or current expectations, which could have an adverse effect on our results of operations or cash flows.

We may be required to reorganize our operations in response to changing conditions in the worldwide economy and the pulp and paper industry, and such actions may require significant expenditures and may not be successful. We have undertaken various restructuring measures in the past in response to changing market conditions in the countries in which we operate and in the pulp and paper industry in general, which have affected our business. We may engage in additional cost reduction programs in the future. We may not recoup the costs of programs we have already initiated, or other programs in which we may decide to engage in the future, the costs of which may be significant. In connection with any future plant closures, delays or failures in the transition of production from existing facilities to our other facilities in other geographic regions could also adversely affect our results of operations. In addition, it is difficult to accurately forecast our financial performance in periods of economic uncertainty in a region or globally, and the efforts we have made or may make to align our cost structure may not be sufficient or able to keep pace with rapidly changing business conditions. Our profitability may decline if our restructuring efforts do not sufficiently reduce our future costs and position us to maintain or increase our sales.

Adverse changes to the soundness of financial institutions could affect us.

We have relationships with many financial institutions, including lenders under our credit facilities and insurance underwriters, and from time to time, we execute transactions with counterparties in the financial industry, such as our interest rate swap arrangement and other hedging transactions. In addition, our subsidiaries in China often hold banker's acceptance drafts that are received from customers in the normal course of business. These drafts may be discounted or used to pay vendors prior to the scheduled maturity date or submitted to an acceptance bank for payment at the scheduled maturity date. These financial institutions or counterparties could be adversely affected by volatile conditions in the financial markets, economic downturns, and difficult economic conditions. These conditions could result in financial instability, bankruptcy, or other adverse effects at these financial institutions or counterparties. We may not be able to access credit facilities in the future, complete transactions as intended, or otherwise obtain the benefit of the arrangements we have entered into with such financial parties, which could adversely affect our business and results of operations.

Our debt may adversely affect our cash flow and may restrict our investment opportunities.

On August 3, 2012, we replaced our existing unsecured revolving credit facility entered into in February 2008 with a five-year unsecured revolving credit facility (2012 Credit Agreement) in the aggregate principal amount of up to \$100 million. The 2012 Credit Agreement also includes an uncommitted unsecured incremental borrowing facility of up to an additional \$50 million. We have borrowed amounts under the 2012 Credit Agreement and under another agreement

to fund our operations. We may also obtain additional long-term debt and working capital lines of credit to meet future financing needs, which would have the effect of increasing our total leverage. Our indebtedness could have negative consequences, including:

- increasing our vulnerability to adverse economic and industry conditions,
- limiting our ability to obtain additional financing,
- limiting our ability to pay dividends on or to repurchase our capital stock,
- limiting our ability to complete a merger or an acquisition,
- limiting our ability to acquire new products and technologies through acquisitions or licensing agreements, and
- limiting our flexibility in planning for, or reacting to, changes in our business and the industries in which we compete.

Our existing indebtedness bears interest at floating rates and as a result, our interest payment obligations on our indebtedness will increase if interest rates increase. As of June 29, 2013, a portion of our outstanding floating rate debt was hedged through an interest rate swap agreement. The unrealized loss associated with this swap agreement was \$0.8 million as of June 29, 2013. This unrealized loss represents the estimated amount for which the swap agreement could be settled. The counterparty to the swap agreement could demand an early termination of the swap agreement if we are in default under the 2012 Credit Agreement, or any agreement that amends or replaces the 2012 Credit Agreement in which the counterparty is a member, and we are unable to cure the default. If this swap agreement were to be terminated

39

KADANT INC.

prior to the scheduled maturity date and if we were required to pay cash for the value of the swap, we would incur a loss, which would adversely affect our financial results.

Our ability to satisfy our obligations and to reduce our total debt depends on our future operating performance and on economic, financial, competitive, and other factors beyond our control. Our business may not generate sufficient cash flows to meet these obligations or to successfully execute our business strategy. The 2012 Credit Agreement includes certain financial covenants, and our failure to comply with these covenants could result in an event of default under the 2012 Credit Agreement, the swap agreement, and our other credit facilities, and would have significant negative consequences for our current operations and our future ability to fund our operations and grow our business. If we are unable to service our debt and fund our business, we may be forced to reduce or delay capital expenditures or research and development expenditures, seek additional financing or equity capital, restructure or refinance our debt, curtail or eliminate our cash dividend to stockholders, or sell assets.

Restrictions in our 2012 Credit Agreement may limit our activities.

Our 2012 Credit Agreement contains, and future debt instruments to which we may become subject may contain, restrictive covenants that limit our ability to engage in activities that could otherwise benefit us, including restrictions on our ability and the ability of our subsidiaries to:

incur additional indebtedness,

pay dividends on, redeem, or repurchase our capital stock,

make investments,

create liens,

sell assets,

enter into transactions with affiliates, and

consolidate, merge, or transfer all or substantially all of our assets and the assets of our subsidiaries.

We are also required to meet specified financial covenants under the terms of our 2012 Credit Agreement. Our ability to comply with these financial restrictions and covenants is dependent on our future performance, which is subject to prevailing economic conditions and other factors, including factors that are beyond our control such as currency exchange rates, interest rates, changes in technology, and changes in the level of competition. Our failure to comply with any of these restrictions or covenants may result in an event of default under our 2012 Credit Agreement and other loan obligations, which could permit acceleration of the debt under those instruments and require us to repay the debt before its scheduled due date. If an event of default were to occur, we might not have sufficient funds available to make the payments required under our indebtedness. If we are unable to repay amounts owed under our debt agreements, those lenders may be entitled to foreclose on and sell the collateral that secures our borrowings under the agreements.

Furthermore, our 2012 Credit Agreement requires that any amounts borrowed under the facility be repaid before the maturity date in 2017. If we are unable to roll over the amounts borrowed into a new credit facility and we do not have sufficient cash in the United States to repay our borrowings, we may need to repatriate cash from our overseas operations to fund the repayment and we would be required to pay taxes on the repatriated amounts. Such repatriation would have an adverse effect on our effective tax rate and cash flows.

Our inability to protect our intellectual property or defend ourselves against the intellectual property claims of others could have a material adverse effect on our business. In addition, litigation to enforce our intellectual property and contractual rights or defend ourselves could result in significant litigation or licensing expense.

We seek patent and trade secret protection for significant new technologies, products, and processes because of the length of time and expense associated with bringing new products through the development process and into the marketplace. We own numerous U.S. and foreign patents, and we intend to file additional applications, as appropriate, for patents covering our products. Patents may not be issued for any pending or future patent applications owned by or licensed to us, and the claims allowed under any issued patents may not be sufficiently broad to protect our technology. Any issued patents owned by or licensed to us may be challenged, invalidated, or circumvented, and the rights under these patents may not provide us with competitive advantages. In addition, competitors may design around our technology or develop competing technologies. Intellectual property rights may also be unavailable or limited in some foreign countries, which could make it easier for competitors to capture increased market share. In addition, as our patents expire, we rely on trade secrets and proprietary know-how to protect our products. We cannot

be sure the steps we have taken, or will take in the future, will be adequate to deter misappropriation of our proprietary information and intellectual property. Of particular concern are developing countries, such as China, where the laws, courts, and administrative agencies may not protect our intellectual property rights as fully as in the United States or Europe.

We seek to protect trade secrets and proprietary know-how, in part, through confidentiality and noncompetition agreements with our collaborators, employees, and consultants. These agreements may be breached, we may not have adequate remedies for any breach, and our trade secrets may otherwise become known or be independently developed by our competitors, or our competitors may otherwise gain access to our intellectual property.

We could incur substantial costs to defend ourselves in suits brought against us, including for alleged infringement of third party rights, or in suits in which we may assert our intellectual property or contractual rights against others. An unfavorable outcome of any such litigation could have a material adverse effect on our business and results of operations.

40

KADANT INC.

Failure of our information systems or breaches of data security could impact our business.

We operate a geographically dispersed business and rely on the electronic storage and transmission of proprietary and confidential information, including technical and financial information, among our operations, customers and suppliers. In addition, for some of our operations, we rely on information systems controlled by third parties. As part of our ongoing effort to upgrade our current information systems, we are implementing new enterprise resource planning software to manage certain of our business operations. As we implement and add functionality, problems could arise that we have not foreseen. System failures, network disruptions and breaches of data security could limit our ability to conduct business as normal, including our ability to communicate and transact business with our customers and suppliers; result in the loss or misuse of this information, the loss of business or customers, or damage to our brand or reputation; or interrupt or delay reporting our financial results. Such system failures or unauthorized access could be caused by external theft or attack, misconduct by our employees, suppliers, or competitors, or natural disasters. In addition, the cost and operational consequences of implementing further data protection measures could be significant.

Our share price fluctuates and experiences price and volume volatility.

Stock markets in general and our common stock in particular experienced significant price and volume volatility during the 2008 to 2009 economic recession and in the second half of 2011, and may experience significant price and volume volatility from time to time in the future. The market price and trading volume of our common stock may continue to be subject to significant fluctuations due not only to general stock market conditions but also to a change in sentiment in the market regarding our operations, business prospects, or future funding. Given the nature of the markets in which we participate and the volatility of orders, we may not be able to reliably predict future revenues and profitability, and unexpected changes may cause us to adjust our operations. A large proportion of our costs are fixed, due in part to our significant selling, research and development, and manufacturing costs. Thus, small declines in revenues could disproportionately affect our operating results. Other factors that could affect our share price and quarterly operating results include:

- failure of our products to pass contractually agreed upon acceptance tests, which would delay or prohibit recognition of revenues under applicable accounting guidelines,
- changes in the assumptions used for revenue recognized under the percentage-of-completion method of accounting,
- fluctuations in revenues due to customer-initiated delays in product shipments,
- failure of a customer, particularly in Asia, to comply with an order's contractual obligations or inability of a customer to provide financial assurances of performance,
- adverse changes in demand for and market acceptance of our products,
 - competitive pressures resulting in lower sales prices for our products,
- adverse changes in the pulp and paper industry,
- delays or problems in our introduction of new products,
- delays or problems in the manufacture of our products,
- our competitors' announcements of new products, services, or technological innovations,
- contractual liabilities incurred by us related to guarantees of our product performance,
- increased costs of raw materials or supplies, including the cost of energy,
- changes in the timing of product orders,
- changes in the estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, or expenses,
- the impact of new acquisition accounting, including the treatment of acquisition and restructuring costs as period costs,
- fluctuations in our effective tax rate,
- the operating and share price performance of companies that investors consider to be comparable to us, and
- changes in global financial markets and global economies and general market conditions.

Anti-takeover provisions in our charter documents and under Delaware law could prevent or delay transactions that our shareholders may favor.

Provisions of our charter and bylaws may discourage, delay, or prevent a merger or acquisition that our shareholders may consider favorable, including transactions in which shareholders might otherwise receive a premium for their

shares. For example, these provisions:

~~authorize the issuance of "blank check" preferred stock without any need for action by shareholders,~~
~~provide for a classified board of directors with staggered three-year terms,~~
~~require supermajority shareholder voting to effect various amendments to our charter and bylaws,~~
~~eliminate the ability of our shareholders to call special meetings of shareholders,~~
~~prohibit shareholder action by written consent, and~~
~~establish advance notice requirements for nominations for election to our board of directors or for proposing matters that can be acted on by shareholders at shareholder meetings.~~

Prior to July 2011, we had a shareholder rights plan, which may have had anti-takeover effects under certain circumstances. This shareholder rights plan expired by its terms in July 2011 and was not renewed by our board of directors. However, our board of directors could adopt a new shareholder rights plan in the future that could have anti-takeover effects and might discourage, delay, or prevent a merger or acquisition that our board of directors does not believe is in our best interests and those of our shareholders, including transactions in which shareholders might otherwise receive a premium for their shares.

KADANT INC.

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information about purchases by us of our common stock during the second quarter of 2013:

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans (1)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans
3/31/13 – 4/30/13	–	–	–	\$13,973,386
5/1/13 – 5/31/13	50,000	\$ 27.63	50,000	\$12,591,884
6/1/13 – 6/29/13	–	–	–	\$12,591,884
Total:	50,000	\$ 27.63	50,000	

(1) On October 29, 2012, our board of directors authorized and announced the repurchase by us of up to \$20 million of our equity securities during the period from November 7, 2012 to November 7, 2013. Repurchases may be made in public or private transactions, including under Securities Exchange Act Rule 10b-5-1 trading plans. In the second quarter of 2013, we repurchased 50,000 shares of our common stock for \$1.4 million under this authorization.
