- (d) Valued based on Level 3 Inputs – See Note 2.
- (e) Aggregate cost for Federal tax purposes is substantially the same.

See accompanying notes to statement of investments.

CENTRAL SECURITIES CORPORATION**NOTES TO STATEMENT OF INVESTMENTS**

1. Security Valuation – Marketable common and preferred stocks are valued at the last or closing sale price or, if unavailable, at the closing bid price. Securities for which no ready market exists are valued at estimated fair value pursuant to procedures adopted by the Board of Directors.

As of September 30, 2012, the tax cost of investments was \$301,654,244. Net unrealized appreciation was \$238,643,430 consisting of gross unrealized appreciation and gross unrealized depreciation of \$292,866,365 and \$54,222,935, respectively.

2. Fair Value Measurements – The Corporation’s investments are categorized below in three broad hierarchical levels based on market price observability as follows:

- Level 1 – Quoted prices in active markets for identical investments;
- Level 2 – Other significant observable assumptions obtained from independent sources, for example, quoted prices for similar investments, or the use of models or other valuation methodologies;
- Level 3 – Significant unobservable inputs including the Corporation’s own assumptions based upon the best information available. Investments categorized as Level 3 include securities in which there is little, if any, market activity. The Corporation’s Level 3 investments consist of The Plymouth Rock Company, Inc. and Aerogroup International, Inc.

The designated Level for a security is not necessarily an indication of the risk associated with investing in that security.

The Corporation’s investments as of September 30, 2012 are classified as shown below:

	Level 1	Level 2	Level 3	Total
Common stocks	\$371,285,342	-	\$167,838,800	\$539,124,142
Preferred stocks	-	\$1,173,532	-	1,173,532
Total investments	\$371,285,342	\$1,173,532	\$167,838,800	\$540,297,674

Edgar Filing: CENTRAL SECURITIES CORP - Form N-Q

The Corporation's investment in GeoMet, Inc. Series A Preferred Stock will transfer from Level 1 to Level 2 if there are no actual market trades in the security on a valuation date. The security will transfer back to Level 1 if there are market trades on a subsequent valuation date. On September 30, 2012 and on December 31, 2011, this investment was considered Level 2, and its value was based on the closing bid price. There were no other transfers of investments between Levels 1, 2 and 3 during the nine months ended September 30, 2012.

The following is a reconciliation of the change in the value of Level 3 investments:

Balance at December 31, 2011	\$168,126,800
Net realized gains and change in net unrealized appreciation of investments included in net decrease in net assets resulting from operations	91,200
Sales	(379,200)
Balance at September 30, 2012	\$167,838,800

There was no change in unrealized appreciation of Level 3 investments held at September 30, 2012 included in the above table. In valuing Level 3 investments, the Corporation's management considers the results of various valuation methods. Consideration is also given to corporate governance, marketability, professional appraisals of portfolio companies, company and industry results and outlooks, and general market conditions. Management then recommends a value for each investment that it considers most appropriate in light of all the information available. All of this information is subsequently presented to and discussed with the Corporation's Board of Directors, which selects the value. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the price used by other investors or the price that may be realized upon the actual sale of the security.

In valuing the Plymouth Rock Level 3 investment as of September 30, 2012, management used a number of significant unobservable inputs to develop a range of possible values for the investment. It used a comparable company approach that applied average market multiples from selected publicly traded companies to financial information from each of Plymouth Rock's major business segments. The market multiples used were price-to-book value, price-to-earnings and price-to-revenue. Management also used a discounted cash flow model based on a forecasted earnings growth rate ranging from 2.5%-4% and a weighted average cost of capital of 10%. Transactions in Plymouth Rock's shares were also considered. The values obtained from weighting the three methods described above (with greater weight given to the comparable company approach) were then discounted by 20% and 40% for the lack of marketability of the shares, which represent the range of rates management believes market participants would apply in estimating fair value. The resulting range of values, together with the underlying support, other information about Plymouth Rock's financial condition and results of operations and its industry outlook, were considered by management, which recommended a value for the investment. All of this information was subsequently considered by the Corporation's Directors, who selected the value.

Significant increases (decreases) in the value of the price-to-book value multiple, price-to-earnings multiple, price-to-revenue multiple and earnings growth rate in isolation would result in a higher (lower) range of fair value measurements. Significant increases (decreases) in the value of the discount for lack of marketability or weighted average cost of capital in isolation would result in a lower (higher) range of fair value measurements.

3. Restricted Securities - The Corporation from time to time invests in securities the resale of which is restricted. The Corporation does not have the right to demand registration of the restricted securities. On September 30, 2012, such investments had an aggregate value of \$167,838,800, which was equal to 29.8% of the Corporation's net assets. Investments in restricted securities at September 30, 2012, including acquisition dates and cost, were:

Company	Shares Security	Date Acquired	Cost
AeroGroup International, Inc.	20,000 Common Stock	6/14/05	\$ 11,719
The Plymouth Rock Company, Inc.	60,000 Class A Common Stock	12/15/82	1,500,000
The Plymouth Rock Company, Inc.	9,780 Class A Common Stock	6/9/84	684,586

Item 2. Controls and Procedures.

(a) Disclosure Controls and Procedures. The Principal Executive and Financial Officers have concluded that the Registrant's Disclosure Controls and Procedures are effective based on their evaluation of the Disclosure Controls and Procedures as of a date within 90 days of the filing date of this report.

(b) Internal Control Over Financial Reporting. During the last fiscal quarter, there was no significant change in the Registrant's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 3. Exhibits.

(a) Certifications.

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
