Sidebar text: "WE THINK THAT MUNICIPAL BOND INVESTMENTS LIKE YOUR NUVEEN FUND CAN BE IMPORTANT BUILDING BLOCKS IN A PORTFOLIO DESIGNED TO PERFORM WELL THROUGH A VARIETY OF MARKET CONDITIONS."

Dear
SHAREHOLDER

I am very pleased to report that for the period ended January 31, 2004, your Nuveen Fund continued to provide you with attractive monthly tax-free income. Your Fund is managed with a value investing strategy that puts an emphasis on finding securities that we think are undervalued or underrated. We believe there are always some municipal bonds that the market is not properly valuing, and that by using a consistent, research-oriented management approach we have the opportunity to find them for your Fund.

In the current environment, many have begun to wonder whether interest rates will soon start to rise, and whether that possibility should cause them to adjust their holdings of fixed-income investments. We believe that by constructing a carefully balanced portfolio with the help of a trusted investment professional you may be able to reduce your overall investment risk and give yourself a better chance to meet your financial goals. We think that municipal bond investments like your Nuveen Fund can be important building blocks in a portfolio designed to perform well through a variety of market conditions.

Since 1898, Nuveen Investments has offered financial products and solutions that incorporate careful research, diversification, and the application of conservative risk-management principles. We are grateful that you have chosen us as a partner as you pursue your financial goals. We look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

/s/ Timothy R. Schwertfeger

Portfolio Manager's
COMMENTS

Portfolio manager Dan Solender reviews national and state economic and market conditions, key investment strategies, and the recent performance of the Funds. Dan, who has eleven years of investment experience, including seven at Nuveen, assumed portfolio management responsibility for these Funds in November 2003.

WHAT FACTORS AFFECTED THE U.S. ECONOMY AND MUNICIPAL MARKET DURING THE REPORTING PERIOD ENDED JANUARY 31, 2004?

Edgar Filing: NUVEEN MICHIGAN QUALITY INCOME MUNICIPAL FUND INC - Form N-CSRS

During this period, the greatest influences on the general economy and the municipal market continued to be historically low interest rates, a generally modest rate of inflation and the overall pace of economic improvement. Since its last credit easing in June 2003, the Federal Reserve has maintained the fed funds rate at 1.0%, the lowest level since 1958. Inflation remained under control, with the 1.1% annual change in the core CPI rate for 2003 representing the smallest gain in more than 40 years. The gross domestic product growth rate in 2003 was a respectable 3.1%, the fastest pace since 2000.

The combination of low interest rates, the absence of inflationary pressures, and a slowly improving economy created generally favorable conditions for municipal bonds. In 2003, municipal bond new issue supply reached \$382 billion nationally, a 7% increase over the previous new issue record set in 2002. However, the pace of issuance slowed somewhat during the last half of 2003 and this slow pace continued into the first month of 2004.

HOW WERE CONDITIONS IN MICHIGAN AND OHIO?

Michigan's long-standing reliance on the manufacturing sector continued to impede the state's recovery. While there were some signs of overall improvement in the Michigan economy early in 2003, unemployment hit a new cyclical high in October before showing some modest improvement in recent months. Although the state's budget stabilization fund was depleted at the end of fiscal 2003, Michigan's overall debt position remains low, and pension liabilities are fully funded. At the end of 2003, both Moody's and Standard & Poor's lowered their ratings on Michigan's general obligation debt to Aa1/AA+, respectively, from Aaa/AAA based on shortfalls in tax collections, the loss of manufacturing jobs, and the state's depleted reserves. Both agencies, however, assigned the state a stable outlook, stating that they expected Michigan to continue to manage its budget difficulties.

Ohio also continued to be hard-hit by the recession affecting the state's major manufacturing industries, including autos, heavy machinery and steel. However, the state has emerged as a major center for the provision of healthcare, and many expect this sector to become one of Ohio's most rapidly-growing industries. Despite depletion of reserve funds, Ohio's debt levels remained moderate relative to the state's substantial economic base. Ohio's general obligation debt maintained its rating of Aa1 with a negative outlook from Moody's and AA+ from S&P, which revised its outlook for the state to stable from negative in July 2003.

HOW DID THESE FUNDS PERFORM OVER THE 12-MONTHS ENDED JANUARY 31, 2004?

For additional information, see the individual Performance Overview for your Fund in this report.

1 The total annual returns on common share net asset value (NAV) for these Nuveen Funds are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged, unmanaged national index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses. You cannot invest directly in an index.

2 The total returns of the three Nuveen Michigan Funds are compared with the average annualized return of the seven funds in the Lipper Michigan Municipal Debt Funds category, while the total returns of the four Nuveen Ohio Funds are compared with the average annualized return of the forty-four funds in the Lipper Other States Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends. It should be noted that the performance of the Lipper Other States category represents the overall average of annual returns for funds from 10 different states with a wide variety of economic and municipal market conditions and investment guidelines, making direct comparisons less applicable.

3 The taxable-equivalent yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. With respect to investments that generate qualified dividend income that is taxable at a maximum rate of 15%, the taxable-equivalent yield is lower. The taxable-equivalent yield is calculated using the current yield and a federal income tax rate of 28% plus the applicable state income tax rate. The combined federal and state tax rate used for Michigan is 31%, and for Ohio is 33%. The yields shown for these Funds highlight the added value of owning shares that are exempt from state as well as federal income taxes.

2

For the 12 months ended January 31, 2004, the total returns of all seven of the Funds in this report outperformed the unleveraged Lehman Brothers Municipal Bond Index. The Funds' use of leverage was a primary factor that influenced their total return performance relative to the Lehman index. Leveraging can add volatility to a Fund's net asset value, share price and income. However, during periods of low short-term interest rates and low or falling long-term interest rates, such as the environment during much of this 12-month period, this strategy also can provide opportunities for net asset value appreciation and enhanced income for common shareholders.

Average duration⁴ and overall credit quality help explain much of the performance differences among the Funds themselves. In general, investments with longer durations generally would be expected to outperform those with shorter durations, all other factors being equal, during periods of declining interest rates such as that we experienced over the 12-month period. In addition, lower-rated bonds generally tended to perform better than higher-rated bonds over this time frame.

Among the Michigan Funds, NUM and NZW benefited from having longer average

Edgar Filing: NUVEEN MICHIGAN QUALITY INCOME MUNICIPAL FUND INC - Form N-CSRS

durations than NMP. Comparing the Ohio Funds, the performance of NBJ and NVJ was helped by the relatively long average durations of these Funds, while NXI benefited from a greater concentration of lower-rated investment-grade securities. NUO's shorter average duration and relatively high credit quality positioned it to lag the performance of its Ohio Fund peers over this period.

In addition, factors such as bond calls and the price movement of specific sectors and holdings also had an impact on the Funds' relative performances during this period. For example, NXI benefited from its holdings of bonds backed by Continental Airlines, as airline-backed bonds rebounded strongly in the last part of 2003.

WHAT ABOUT THE FUNDS' DIVIDENDS AND SHARE PRICES?

With short-term interest rates at historically low levels, the dividend-paying capabilities of all these Funds benefited from their use of leverage. The extent of this benefit is tied in part to the short-term rates the Funds pay their MuniPreferred(R) shareholders. Low short-term rates can enable the Funds to reduce the amount of income paid to MuniPreferred shareholders, which can leave more earnings to support common share dividends. During the 12 months ended January 2004, continued low short-term rates enabled us to implement three dividend increases in NBJ, two in NUM, NZW and NXI, and one each in NMP and NUO. Leverage also helped to support the dividend of NVJ, which as of January 31, 2004, had offered shareholders 21 consecutive months of stable, attractive dividends.

Each Fund seeks to pay a stable dividend at a rate that reflects the Fund's past results and projected future performance. The Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If the Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's net asset value (NAV). Conversely, if the Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of January 31, 2004, all of the Funds in this report had positive UNII.

Over this 12-month reporting period, the share prices of these Funds all ended the period higher than they began. As of January 31, 2004, all seven Funds in this report traded at premiums to their common share NAVs. (see charts on individual Performance Overview pages).

4 Duration is a measure of a Fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund. References to duration in this commentary are intended to indicate Fund duration unless otherwise noted.

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE PERIOD ENDED JANUARY 31, 2004?

Over this reporting period, a major focus continued to be management of the Funds' durations in an attempt to make the interest rate risk more consistent across all the Funds. Interest rate risk is the risk that the value of a Fund's portfolio will decline when market interest rates rise (since bond prices move

Edgar Filing: NUVEEN MICHIGAN QUALITY INCOME MUNICIPAL FUND INC - Form N-CSRS

in the opposite direction of interest rates). The longer the duration of a Fund's portfolio, the greater its interest rate risk. For NZW, NBJ and NVJ, our efforts were concentrated on moderating risk by shortening the durations of these Funds. For NXI, we worked to lengthen the Fund's duration as we reinvested proceeds from bond calls and sales of shorter maturity securities into bonds with longer maturities. We were comfortable with the durations of NUM, NMP and NUO, and we didn't seek to make major adjustments in these Funds.

The majority of our purchase activity over the period focused on value opportunities in the long intermediate part of the yield curve (i.e., bonds that mature in 15 to 20 years). In many cases, we believed bonds in this part of the curve offered yields similar to those of longer-term bonds but had better total return potential.

Although the heavy volume of municipal issuance during 2003 provided some opportunities to make trades that we thought would benefit the Funds, the pace of new issuance fell toward the end of the reporting period. This was especially true in Michigan, where issuance during August 2003-January 2004 declined 27% from the level of the previous six months. While issuance in the Ohio market was up 4% over this same period, we had a greater amount of call proceeds to reinvest for the Ohio Funds. Therefore, it was challenging in both markets to find issues with the types of structures we prefer to buy and with the potential to add value. In general, as opportunities arose in the market, our focus was on purchasing higher quality issues, particularly in the general obligation category, reflecting the increased issuance in this sector.

HOW WERE THE FUNDS POSITIONED IN TERMS OF CREDIT QUALITY AND BOND CALLS AS OF JANUARY 31, 2004?

We believe that, given the current geopolitical and economic climate, maintaining strong credit quality is a vital requirement. As of January 31, 2004, these Nuveen Funds offered excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 65% to 87%.

As of January 31, 2004, potential call exposure for the 2004 - 2006 period ranged from zero in NZW to 11% in NUO. The actual number of bond calls these Funds will face in the coming months will depend largely on current and anticipated changes in market interest rates.

In general, we believe that these Funds can continue to serve as attractive sources of tax-free income, while simultaneously offering the potential for portfolio diversification. In our opinion, they represent a quality component within a well-balanced core investment portfolio that can continue to benefit shareholders over time.
