## FINANCIAL ACCOUNTING STANDARDS NO. 157

September 30, 2010 (unaudited)

## Fair Value Measurements

The Fund adopted Financial Accounting Standards Board (“FASB”) Statement of Financial Accounting Standards No. 157, Fair Value Measurements (“FAS 157”), effective August 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. FAS 157 also established a framework for measuring fair value, and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an assets or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund’s own assumptions about the assumptions that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. Each investment is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

- Level 1-quoted prices in active markets for identical investments
- Level 2-other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3-significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments)

The following table shows a summary of investments measured at fair value on a recurring basis classified under the appropriate level of fair value hierarchy as of September 30, 2010:

	September 30, 2010
Quoted Prices in Active Markets for Identical Assets (Level 1)	\$ 7,707,539
Significant Other Observable Inputs (Level 2)	\$ 2,641,559
Significant Unobservable Inputs (Level 3)	\$ 1,343,794
Total Investments	\$ 11,692,892

The following is a reconciliation of assets in which significant unobservable inputs (Level 3) were used in determining fair value:
