***FOR IMMEDIATE RELEASE***

**ENTEL DEPLOYING FIRST WiMAX NATIONAL NETWORK IN CHILE  
USING ALVARION'S BREEZEMAX™ SOLUTION**

***BreezeMAX 3500 to Add Capacity, Voice Services for Small and Medium Companies  
and Corporate Users in 14 Cities***

---

**TEL AVIV, Israel, May 22, 2006**— Alvarion Ltd. (NASDAQ:ALVR), the world's leading provider of wireless broadband solutions and specialized mobile networks, today announced that telecommunications company, ENTEL Chile, is deploying the first WiMAX network in the country using its award-winning platform, BreezeMAX 3500. ENTEL will use its WiMAX network to offer voice and data services and extend broadband coverage to small and medium companies and corporate users in 14 cities. ENTEL's decision follows extensive field testing and evaluation. In previous years, ENTEL deployed Alvarion's BreezeACCESS® XL system to provide residential broadband data services of 30,000 customer links throughout the country.

"We are excited to be the first operator to offer WiMAX data and voice services in Chile," said Richard Büchi, CEO of ENTEL Chile. "We have already deployed 22 base stations and our network will be completed by the end of the first half of 2006. We chose Alvarion after we tested various competitive systems and we are confident of the performance of our network that will allow us to offer various services specially to small and medium companies."

BreezeMAX™ is Alvarion's WiMAX platform designed from the ground up according to the IEEE 802.16 standards and uses OFDM technology for advanced non-line-of-sight (NLOS) functionality. Its carrier-class design supports broadband speeds and quality of service (QoS) to enable carriers to offer triple play broadband services to thousands of subscribers in a single base station. Since its launch in mid-2004, BreezeMAX has been successfully deployed in over 150 installations in more than 30 countries around the world.

"We are delighted that Entel, a major customer of our BreezeACCESS XL products, has decided to extend its relationship with Alvarion and continue to leverage our leading technology and market position," said Tzvika Friedman, CEO and President of Alvarion. "Entel's selection of BreezeMAX is another example of a telecommunications company investing in WiMAX to expand its service portfolio. As we have seen in our many WiMAX installations elsewhere in South America and worldwide, WiMAX allows all types of carriers and innovative challengers to join the growing ranks of broadband providers. This fits in with our vision of broadband mass deployment enabled by WiMAX technology and we are thrilled to be leading this trend with our systems."

###

### **About ENTEL Chile**

Empresa Nacional de Telecomunicaciones S.A. is the largest listed Telecommunication Company in Chile with Ch\$ 1,133,693 million in assets and Ch\$ 766,362 million in annual revenues reported in December 2005. The Company provides mobile, Data, Internet, local telephony, long distance and integration services. Entel has two nationwide fixed wireless local telephony licenses of 50 MHz each, in the 3,5 GHz frequency band. The company also has operations in Central America and Peru.

Entel is listed on the Chilean Stock Exchange (Bolsa de Comercio de Santiago) under the ticker symbol ENTEL and its headquarters are based in Santiago, Chile.

### **About Alvarion**

With more than 2 million units deployed in 150 countries, Alvarion is the worldwide leader in wireless broadband providing systems to carriers, ISPs and private network operators, and also in extending coverage of GSM and CDMA mobile networks to developing countries and other hard to serve areas.

Leading the WiMAX revolution, Alvarion has the most extensive deployments and proven product portfolio in the industry covering the full range of frequency bands with both fixed and mobile solutions. Alvarion's products enable the delivery of business and residential broadband access, corporate VPNs, toll quality telephony, mobile base station feeding, hotspot coverage extension, community interconnection, public safety communications, and mobile voice and data. Alvarion works with several global OEM providers and more than 200 local partners to support its diverse global customer base in solving their last-mile challenges.

As a wireless broadband pioneer, Alvarion has been driving and delivering innovations for more than ten years from core technology developments to creating and promoting industry standards. Leveraging its key roles in the IEEE and HiperMAN standards committees and experience in deploying OFDM-based systems, the Company's prominent work in the WiMAX Forum is focused on increasing widespread adoption of standards-based products in the wireless broadband market and leading the entire industry to mobile WiMAX solutions.
