This Supplement updates certain information contained in the above-dated Summary Prospectus for Market Vectors ETF Trust (the “Trust”) regarding the Market Vectors Africa Index ETF (the “Fund”), a series of the Trust. You may obtain copies of the Fund’s Summary Prospectus free of charge, upon request, by calling toll-free 1.888.MKT.VCTR or by visiting the Van Eck website at [www.marketvectorsetfs.com](http://www.marketvectorsetfs.com).

As stated in the Supplements dated April 18, 2013 and May 1, 2013 to the Summary Prospectus of the Trust, the Board of Trustees of the Trust approved a change to the Market Vectors Africa Index ETF’s investment objective of seeking to replicate as closely as possible, before fees and expenses, the price and yield performance of the Dow Jones Africa Titans 50 Index<sup>SM</sup>. Effective on or about June 21, 2013, the Market Vectors Africa Index ETF will seek to replicate as closely as possible, before fees and expenses, the price and yield performance of the Market Vectors<sup>®</sup> GDP Africa Index (the “Africa Index”). The Fund’s investment objective is not fundamental and may be changed by the Board of Trustees without shareholder approval upon 60 days’ prior written notice to shareholders.

Effective at the time of the investment objective change, the Market Vectors Africa Index ETF’s current investment policy to normally invest at least 80% of its total assets in equity securities, which may include depositary receipts, of companies (i) domiciled in Africa, (ii) primarily listed on an exchange in Africa or (iii) that generate at least 50% of their revenues in Africa will be replaced with the following investment policy: the Market Vectors Africa Index ETF normally invests at least 80% of its total assets in securities that comprise the Market Vectors Africa Index ETF’s benchmark index. The Africa Index is comprised of African companies. The Africa Index includes local listings of companies that are incorporated in Africa and offshore listings of companies incorporated outside of Africa but that

generate at least 50% of their revenues (or, in certain circumstances, have at least 50% of their assets) in Africa. The weighting of each country in the Africa Index is determined by the size of its gross domestic product (“GDP”) relative to the GDPs of the other countries represented in the Index.

In connection with this change, the Fund may experience additional portfolio turnover, which may cause the Fund to incur additional transaction costs and may result in higher taxes when Fund shares are held in a taxable account.

The Africa Index is published by Market Vectors Index Solutions GmbH, which is a wholly owned subsidiary of Van Eck Associates Corporation.

All references to the Dow Jones Africa Titans 50 Index<sup>SM</sup>, except for references in the performance tables, will be deleted and replaced with the Market Vectors<sup>®</sup> GDP Africa Index.
