CALCULATION OF REGISTRATION FEE UNDER THE SECURITIES ACT OF 1933

Title of Securities Being Registered	Amount Being Registered(1)	Proposed Maximum Offering Price per Unit(1)	Proposed Maximum Aggregate Offering Price(1)	Amount of Registration Fee(1)(2)
Common Shares, \$0.001 par value	2,450,466 Common Shares(3)	\$18.13	\$44,426,949	\$5,091.33
Rights to Purchase Common Shares	(3)(4)	None	None	None

(1) Estimated solely for the purpose of calculating the registration fee. Based on the average of the high and low prices reported on the New York Stock Exchange on February 10, 2012.

(2) \$114.60 of which has been previously paid.

(3) An additional indeterminate amount of securities is being registered hereby to be offered solely for market making purposes by the dealer manager.

(4) No separate consideration will be received by the registrant.

The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until this registration statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to Section 8(a), may determine.

Prospectus

The information in this prospectus is not complete and may be changed. The Fund may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

Subject to Completion  
Preliminary Prospectus dated February 16, 2012

AVENUE INCOME CREDIT STRATEGIES FUND

2,450,466 Common Shares  
Issuable Upon Exercise of Transferable Rights to Subscribe for Common Shares

Avenue Income Credit Strategies Fund (the "Fund") is issuing transferable rights ("Rights") to its shareholders of record as of the close of business on February 24, 2012 (the "Record Date") entitling the holders of these Rights to subscribe (the "Offer") for an aggregate of 2,450,466 common shares of beneficial interest, par value \$0.001 per common share (the "Common Shares"). The holders of Common Shares (the "Common Shareholders") of record will receive one Right for each outstanding Common Share owned on the Record Date. The Rights entitle the holders to purchase one new Common Share for every three Rights held, and Common Shareholders of record who fully exercise their Rights will be entitled to subscribe, subject to certain limitations and subject to allotment, for additional Common Shares covered by any unexercised Rights. Any Record Date Common Shareholder issued fewer than three Rights is entitled to subscribe for one full Common Share in the Offer. The Fund's outstanding Common Shares are listed on the New York Stock Exchange ("NYSE") under the symbol "ACP." The Rights are transferable and will be listed for trading on the NYSE under the symbol "ACP RT" during the course of the Offer. See "The Offer" for a complete discussion of the terms of the Offer. The subscription price per Common Share (the "Subscription Price") will be determined based upon a formula equal to 90% of the average of the last reported sales price of a Common Share on the NYSE on the date on which the Offer expires, as such date may be extended from time to time (the "Expiration Date") and each of the four (4) preceding trading days (the "Formula Price"). If, however, the Formula Price is less than 80% of the net asset value per Common Share ("NAV") of the Fund's Common Shares at the close of trading on the NYSE on the Expiration Date, then the Subscription Price will be 80% of the Fund's NAV at the close of trading on the NYSE on that day. The Fund will pay a sales load on the Subscription Price.

The Offer will expire at 5:00 p.m., New York City time, on March 23, 2012 unless extended as described herein.

The Fund announced the terms of this Offer after the close of trading on the NYSE on February 13, 2012.

The NAV of the Fund's Common Shares at the close of business on [\_\_\_\_\_], 2012 (the date of this prospectus) was \$[\_\_\_\_\_] and the last reported sale price of a Common Share on the NYSE on that date was \$[\_\_\_\_\_].

**Investment Objectives and Principal Investment Strategy; Leverage.** The Fund is a non-diversified, closed-end management investment company whose primary investment objective is to seek a high level of current income with a secondary objective of capital appreciation.

Depending on current market conditions and the Fund's outlook over time, the Fund seeks to achieve its investment objectives by opportunistically investing primarily in loan and debt instruments (and loan-related or debt-related instruments, including repurchase and reverse repurchase agreements and derivative instruments) of issuers that operate in a variety of industries and geographic regions. The Fund expects to emphasize high current income, with a

secondary emphasis on capital appreciation, by investing generally in senior secured floating rate and fixed rate loans (“Senior Loans”) and in second lien or other subordinated loans or debt instruments, including non-stressed and stressed credit obligations, and related derivatives. The Fund is permitted to obtain leverage using any

---

form or combination of financial leverage instruments, including reverse repurchase agreements, credit facilities such as bank loans or commercial paper, and the issuance of preferred shares or notes. Following the completion of the Offer, and subject to prevailing market conditions, the Fund intends to have financial leverage representing up to approximately 331/3% of the Fund's total assets (including the assets subject to, and obtained with the proceeds of, such leverage). See “Investment Objectives and Principal Investment Strategy” and “Leverage” below and “Investment Restrictions” in the Statement of Additional Information.

Investing in Rights and/or in the Common Shares involves risks, including the risk that you may receive little or no return on your investment or that you may lose part or all of your investment. Before buying any Common Shares, you should read the discussion of the principal risks of investing in the Fund, including that the Fund may invest all or a substantial portion of its assets in below investment grade securities which are often referred to as high yield or “junk” securities. The principal risks of investing in the Fund are summarized in “Prospectus Summary—Risk Factors” beginning on page 17 of this prospectus and further described in “Risk Factors” beginning on page 71 of this prospectus.

Upon completion of the Offer, Common Shareholders who do not fully exercise their Rights will own a smaller proportional interest in the Fund than they owned prior to the Offer. The completion of the Offer will result in immediate voting dilution for such Common Shareholders. In addition, if the Subscription Price is less than the NAV as of the Expiration Date, the completion of the Offer will result in an immediate dilution of NAV for all Common Shareholders (i.e., will cause the NAV of the Fund to decrease) and may have the effect of reducing the market price of the Fund’s Common Shares. It is anticipated that the existing Common Shareholders will experience immediate dilution even if they fully exercise their Rights. Such dilution is not currently determinable because it is not known how many Common Shares will be subscribed for, what the NAV or market price of our Common Shares will be on the Expiration Date or what the subscription price per Common Share will be. However, assuming full exercise of the Rights being offered at the Subscription Price and assuming that the Expiration Date were February 2, 2012, it is estimated that the per share dilution resulting from the Offer, as of February 2, 2012, would be \$0.64. Any such dilution will disproportionately affect nonexercising Common Shareholders. If the Subscription Price is substantially less than the current NAV, this dilution could be substantial. See “The Offer—Dilution and Effect of Non-Participation in the Offer.” Any future rights offerings in which the Subscription Price is less than the NAV will result in an immediate dilution of NAV for all Common Shareholders. Except as described herein, Rights holders will have no right to rescind their subscriptions after receipt of their payment for Common Shares by the subscription agent for the Offer.

	Per Common Share	Total(5)
Estimated subscription price(1)	\$15.89	\$38,937,905
Sales load(2)	\$ 0.60	\$ 1,460,171
Proceeds, before expenses, to the Fund(3)(4)	\$15.29	\$37,477,734

Neither the Securities and Exchange Commission (the “SEC”) nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

UBS Investment Bank

---

(1) Estimated on the basis of 90% of the average of the last reported sales price per Common Share at the close of trading on the NYSE on February 2, 2012 and each of the four (4) preceding trading days. See “The

Offer—Subscription Price.”

- (2) In connection with the Offer, UBS Securities LLC, the dealer manager for the Offer (the “Dealer Manager”), will receive a fee from the Fund for its financial structuring and solicitation services equal to 3.75% of the Subscription Price for each Common Share issued pursuant to the Offer, which is estimated to be \$1,460,171 in total and \$0.60 per Common Share (assuming the Rights are fully exercised and that the Expiration Date were February 2, 2012). The Dealer Manager will reallocate a part of its fees to other broker-dealers that have assisted

in soliciting the exercise of Rights. The Fund has also agreed to pay the Dealer Manager up to \$100,000 (up to \$0.04 per Common Share (assuming the Rights are fully exercised)) as reimbursement for its expenses incurred in connection with the Offer. The Fund and its investment advisers have also agreed to indemnify the Dealer Manager against certain liabilities under the Securities Act.

- (3) Before deduction of expenses associated with the Offer incurred by the Fund, estimated at \$400,000, including an aggregate of up to \$100,000 to be paid to the Dealer Manager as reimbursement for its expenses. After deduction of such expenses, the per share and total dollar amount of proceeds to the Fund are estimated at \$15.13 and \$37,077,733, respectively. Both the sales load and the expenses associated with the Offer paid by the Fund will immediately reduce the NAV of each Common Shareholder's Common Shares.
- (4) Funds received by check or money order prior to the final due date of the Offer will be deposited into a segregated account pending proration and distribution of Common Shares. The Subscription Agent may receive investment earnings on the funds deposited into such account.
- (5) Assumes all Rights are exercised at the estimated Subscription Price. All of the Rights offered may not be exercised.

This prospectus sets forth concisely information about the Fund you should know before investing. Please read this prospectus carefully before deciding whether to invest and retain it for future reference. A Statement of Additional Information dated [ ], 2012 (the “SAI”) has been filed with the SEC. A table of contents to the SAI is located on page 107 of this prospectus. This prospectus incorporates by reference the entire SAI. The SAI is available along with other Fund-related materials at the SEC’s public reference room in Washington, DC (call 1-202-551-8090 for information on the operation of the reference room), on the EDGAR database on the SEC’s internet site (<http://www.sec.gov>), upon payment of copying fees by writing to the SEC’s Public Reference Section, 100 F Street, N.E. Washington, DC 20549-0102, or by electronic mail at [publicinfo@sec.gov](mailto:publicinfo@sec.gov).

You may also request a free copy of the SAI, annual and semi-annual reports to shareholders, and additional information about the Fund, and may make other shareholder inquiries, by calling 1-877-525-7330, by writing to the Fund or visiting the Fund’s website (<http://www.avenuecapital.com>).

The Fund’s Common Shares do not represent a deposit or obligation of, and are not guaranteed by or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

You should rely only on the information contained or incorporated by reference in this prospectus. The Fund has not, and the Dealer Manager has not, authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. The Fund is not, and the Dealer Manager is not, making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted.

Table of Contents

Prospectus Summary

The following summary is qualified in its entirety by reference to the more detailed information appearing elsewhere in this prospectus. This prospectus summary may not contain all of the information that is important to each Common Shareholder. Accordingly, to understand the Offer fully, Common Shareholders are encouraged to read the entire prospectus carefully. Unless otherwise indicated, the information in this prospectus assumes that the Rights issued are all exercised. As used in this prospectus, the terms “the Fund,” “our,” and “us” refer to the Avenue Income Credit Strategies Fund, a non-diversified, closed-end management investment company organized as a statutory trust under the laws of the State of Delaware and the issuer of the Rights, unless the context suggests otherwise.

The Offer at a Glance

Purpose of the Offer

The board of trustees of the Fund (the “Board”), based on the recommendations and presentations of Avenue Capital Management II, L.P., the Fund’s investment adviser (the “Adviser”), and Avenue Europe International Management, L.P., the Fund’s subadviser (the “Subadviser,” and together with the Adviser, the “Avenue Managers”) and others, has determined that it is in the best interests of the Fund and its Common Shareholders to increase the assets of the Fund available for investment and thereby to conduct the Offer. In making this determination, the Board considered a number of factors, including potential benefits and costs. In particular, the Board considered the Avenue Managers’ belief that the Offer would better enable the Fund to take advantage more fully of existing and future investment opportunities that may be or may become available, consistent with the Fund’s primary investment objective to seek a high level of current income with a secondary objective of capital appreciation.

In this regard, the Avenue Managers believe that a variety of factors indicate that there may be a robust opportunity to invest in U.S. and European high yield and leveraged loan instruments. Due to a combination of macroeconomic developments in the United States and Europe and the Avenue Managers’ credit analysis of companies in those underlying geographies, the Avenue Managers believe that now may be an opportune time for the Fund to raise additional assets and to seek attractive investment opportunities which may enhance the Fund’s prospective risk-adjusted returns. In addition, the Avenue Managers expect that a number of upcoming U.S. high yield bond and institutional maturities in a less than favorable capital markets environment may create investment opportunities for the Fund. Further, the Avenue Managers expect that the European sovereign debt crisis and potential European bank deleveraging may force these institutions to sell assets and enable the Fund to take advantage of such opportunities. Using the proceeds of the Offer, the Fund will seek to capitalize on these developments and enhance its returns by making investments in companies the Avenue Managers believe offer attractive opportunities for yield enhancement and/or net asset value appreciation potential. In making such investments, the Fund will seek to capitalize on market inefficiencies and to reallocate the portfolio of the Fund to opportunistically emphasize those investments, geographies and categories of investments believed to be best suited to the current investment and interest rate environment and market outlook.

The Offer seeks to provide an opportunity to existing Common Shareholders to purchase Common Shares at a discount to market price. The distribution to Common Shareholders of transferable Rights, which may themselves have intrinsic value, also will afford non-participating Common Shareholders of record on the Record Date, the potential of receiving cash payment upon the sale of the Rights, receipt of which may be viewed as partial

compensation for any dilution of their interests that may occur as a result of the Offer.

The Avenue Managers expect that the Offer will provide an opportunity to increase the assets of the Fund available for investment, thereby better enabling the Fund to take advantage more fully of existing and future investment opportunities that may be or may become available, consistent with the Fund's primary investment objective to seek a high level of current income with a secondary objective of capital appreciation. The Avenue

Table of Contents

Managers and its affiliates have an inherent conflict of interest in recommending the Offer because the Fund pays fees to the Avenue Managers based on a percentage of the Fund's Managed Assets (the greater the Managed Assets of the Fund, the greater the compensation paid to the Avenue Managers and their affiliates). "Managed Assets" are the total assets of the Fund (including any assets attributable to money borrowed for investment purposes, including proceeds from (and assets subject to) reverse repurchase agreements, any credit facility and any issuance of preferred shares or notes) minus the sum of the Fund's accrued liabilities (other than Fund liabilities incurred for the purpose of leverage).

There can be no assurance that the Offer (or the investment of the proceeds of the Offer) will be successful, that by increasing the size of the Fund the Fund's expense ratio will be lowered, or that the trading volume of the Fund's Common Shares on the New York Stock Exchange ("NYSE") will increase. See "The Offer—Purpose of the Offer."

Upon completion of the Offer, Common Shareholders who do not fully exercise their Rights will own a smaller proportional interest in the Fund than they owned prior to the Offer. The completion of the Offer will result in immediate voting dilution for such Common Shareholders. Further, both the sales load and the expenses associated with the Offer paid by the Fund will immediately reduce the net asset value of each Common Shareholder's Common Shares. In addition, if the Subscription Price is less than the NAV as of the Expiration Date, the completion of the Offer will result in an immediate dilution of NAV for all Common Shareholders (i.e., will cause the NAV of the Fund to decrease) and may have the effect of reducing the market price of the Fund's Common Shares. It is anticipated that the existing Common Shareholders will experience immediate dilution even if they fully exercise their Rights. Such dilution is not currently determinable because it is not known how many Common Shares will be subscribed for, what the NAV or market price of our Common Shares will be on the Expiration Date or what the subscription price per Common Share will be. However, assuming full exercise of the Rights being offered at the Subscription Price and assuming that the Expiration Date were February 2, 2012, it is estimated that the per share dilution resulting from the Offer, as of February 2, 2012, would be \$0.64. Any such dilution will disproportionately affect nonexercising Common Shareholders. If the Subscription Price is substantially less than the Fund's current NAV, this dilution could be substantial. See "The Offer—Dilution and Effect of Non-Participation in the Offer." Any future rights offerings in which the Subscription Price is less than the NAV will result in an immediate dilution of NAV for all Common Shareholders.

#### Example of Dilution to NAV Resulting from the Offer

(a) Net asset value per Common Share (as of 2/2/12)	\$17.68
(b) Total net assets (as of 2/2/12)	\$129,946,893
(c) Estimated reduction in current net asset value per Common Share resulting from the Offer ("per share dilution")(1)(2)	\$0.64
(d) Estimated percentage reduction in current net asset value per Common Share resulting from the Offer(1)(3)	3.6%

(1) Assumes full exercise of the Rights being offered, that the Expiration Date were February 2, 2012, that all of the Common Shares are sold at the estimated Subscription Price of \$15.89 and deducts all expenses related to the issuance of the Common Shares in the Offer. The Fund, not investors, pays the sales load, which is ultimately thus borne by all Common Shareholders.

(2) Item (c) was calculated by subtracting (A) the Fund's estimated net asset value per Common Share immediately following the completion of the Offer from (B) the Fund's net asset value per Common Share (as of 2/2/12). The Fund's estimated net asset value per Common Share immediately following the completion of the Offer was

estimated (using the assumptions described in note (1) above) by dividing (X) the estimated net asset value of the Fund immediately following the Offer by (Y) the estimated total number of Common Shares outstanding immediately following the completion of the Offer.

2

---

Table of Contents

(3) Item (d) was calculated by dividing Item (c) by Item (a).

There can be no assurance that the dilution will be limited to the amounts shown in the table above. The final amounts of such dilution may be greater than those estimated due to many factors, including the Fund's market price and NAV at the time of completion of the Offer and the level of participation in the Offer.

The number of Common Shares outstanding as of February 2, 2012 was 7,351,400. The number of Common Shares adjusted to give effect to the Offer, assuming that all Rights are exercised and the applicable Common Shares issued, would be 9,801,866. The percentage increase in Common Shares outstanding that will occur if all the Rights are exercised is 331/3%.

All of the costs of the Offer will be borne by the Fund's Common Shareholders.

Important Terms of the Offer

The Fund is issuing to Common Shareholders of record at the close of business on February 24, 2012 (the "Record Date") one transferable Right for each whole Common Share held. Each Common Shareholder on the Record Date that continues to hold Rights and each other holder of the Rights is entitled to subscribe for one Common Share for every three Rights held (1 for 3). The Fund will not issue fractional shares of its Common Shares upon the exercise of Rights; accordingly, Rights may be exercised only in multiples of three, except that any Record Date Common Shareholder who is issued fewer than three Rights will be able to subscribe for one Common Share. Record Date Common Shareholders who hold two or more accounts may not combine their fractional interests across accounts. Rights are evidenced by subscription certificates that will be mailed to Record Date Common Shareholders, except as described under "The Offer—Foreign Common Shareholders." We refer to a Rights holder's right to acquire during the subscription period at the Subscription Price one additional Common Share for every three Rights held (or in the case of any Record Date Common Shareholder who is issued fewer than three Rights, the right to acquire one Common Share), as the "Primary Subscription."

Rights holders may exercise Rights at any time during the subscription period, which commences on February 24, 2012 and expires at 5:00 p.m., New York City time, on March 23, 2012 unless otherwise extended by the Fund. See "The Offer—Expiration of the Offer." The Rights are transferable and will be listed for trading on the NYSE under the symbol "ACP RT" during the course of the Offer. See "The Offer—Transferability and Sale of Rights."

Record Date Common Shareholders who fully exercise the Rights they obtained in the Primary Subscription (other than those Rights that cannot be exercised because they represent the right to acquire less than one Common Share) will be entitled to an over-subscription privilege under which they may subscribe for additional Common Shares at the Subscription Price. Any Common Shares made available pursuant to the over-subscription privilege are subject to allotment. See "The Offer—Over-Subscription Privilege."

In this prospectus, we use the terms "Common Shareholders" to refer to any person that holds Common Shares, "Record Date Common Shareholders" to refer to those Common Shareholders that held their Common Shares on the Record Date and "Existing Rights Holders" to refer to those persons (i) that are Record Date Common Shareholders to whom the Rights were issued initially to the extent that a Record Date Common Shareholder continues to hold Rights and (ii) any subsequent transferees of the Rights that continue to hold the Rights.

Subscription Price

The subscription price per Common Share (the “Subscription Price”) will be determined based upon a formula equal to 90% of the average of the last reported sales price of a Common Share on the NYSE on the date on which the Offer expires, as such date may be extended from time to time (the “Expiration Date”) and each of the four (4) preceding trading days (the “Formula Price”). If, however, the Formula Price is less than 80% of the net asset value per Common Share (“NAV”) of the Fund’s Common Shares at the close of trading on the NYSE on the Expiration Date, then the Subscription Price will be 80% of the Fund’s NAV at the close of trading on the NYSE on that day. Since the Subscription Price will be determined on the Expiration Date, Rights holders who decide to acquire

## Table of Contents

Common Shares in the Primary Subscription or pursuant to the over-subscription privilege will not know when they make such decisions the purchase price of those Common Shares. See “The Offer—Subscription Price.” The Fund will pay a sales load on the Subscription Price.

### Over-Subscription Privilege

Record Date Common Shareholders who fully exercise all Rights issued to them (other than those Rights to acquire less than one Common Share, which cannot be exercised) are entitled to subscribe for additional Common Shares which were not subscribed for by other Record Date Common Shareholders, subject to certain limitations and subject to allotment. This is known as the “over-subscription privilege” (the “Over-Subscription Privilege”). Investors who are not Record Date Common Shareholders, but who otherwise acquire Rights to purchase our Common Shares pursuant to the Offer, are not entitled to subscribe for any of our Common Shares pursuant to the Over-Subscription Privilege. If sufficient Common Shares are available, all Record Date Common Shareholders’ over-subscription requests will be honored in full. If these requests for Common Shares exceed the Common Shares available, the available Common Shares will be allocated pro rata among Record Date Common Shareholders who over-subscribe based on the number of Rights originally issued to them by the Fund. See “The Offer—Over-Subscription Privilege.”

### Transferability and Sale of Rights

The Rights are transferable until the close of business on the last business day prior to the Expiration Date of the Offer. The Rights will be listed for trading on the NYSE under the symbol “ACP RT” during the course of the Offer. Trading in the Rights on the NYSE is expected to be conducted on a when-issued basis beginning on February 21, 2012 through February 28, 2012; thereafter, the Rights will trade the regular way through March 22, 2012 (one (1) business day prior to the Expiration Date (including any extensions)). We will seek to ensure that an adequate trading market for the Rights will exist, by requesting that the Rights trade on the NYSE and by retaining the dealer manager for the Offer (the “Dealer Manager”), subscription agent for the Offer (the “Subscription Agent”) and the information agent for the Offer (the “Information Agent”), but we cannot assure you that a market for the Rights will develop. Assuming a market does exist for the Rights, you may purchase and sell the Rights through the usual brokerage channels or sell the Rights through the Subscription Agent.

Record Date Common Shareholders who do not wish to exercise any or all of their Rights may instruct the Subscription Agent to try to sell any Rights they do not intend to exercise themselves. Subscription certificates evidencing the Rights to be sold by the Subscription Agent must be received by the Subscription Agent on or before 5:00 p.m., New York City time, on March 21, 2012 (or, if the subscription period is extended, on or before 5:00 p.m., New York City time, two (2) business days prior to the extended Expiration Date). The Rights evidenced by a subscription certificate may be transferred in whole by endorsing the subscription certificate for transfer in accordance with the accompanying instructions. A portion of the Rights evidenced by a single subscription certificate (but not fractional Rights) may be transferred by delivering to the Subscription Agent a subscription certificate, properly endorsed for transfer, with instructions to register such portion of the Rights evidenced thereby in the name of the transferee and to issue a new subscription certificate to the transferee evidencing the transferred Rights. See “The Offer—Transferability and Sale of Rights.”

### Use of Proceeds

The net proceeds of the Offer, assuming all Common Shares offered hereby are sold, are estimated to be approximately \$37,077,733, after deducting expenses associated with the Offer, including the sales load. The Avenue Managers anticipate that investment of the net proceeds of the Offer in accordance with the Fund’s investment objective and policies will take approximately thirty (30) to sixty (60) days after completion of the Offer. The Fund

intends to use the proceeds of the Offer to make investments consistent with its investment objectives. However, the investment of the net proceeds may take up to three months from completion of the Offer, depending on market conditions and the availability of appropriate securities. Pending such investment, it is anticipated that

Table of Contents

the net proceeds will be invested in fixed income securities and other permitted investments. See “Use of Proceeds.”

How to Obtain Subscription Information

Contact your broker-dealer, trust company, bank or other nominee, or

Contact the Information Agent toll-free at (888) 867-6963.

How to Subscribe

Rights may be exercised by either:

- sending a completed subscription certificate together with payment of the estimated Subscription Price of \$[\_\_\_] per Common Share (90% of the average last reported sales price per Common Share on March 23, 2012 and each of the four (4) preceding trading days) for the Common Shares subscribed for in the Primary Subscription and for any additional Common Shares subscribed for pursuant to the Over-Subscription Privilege to the Subscription Agent prior to 5:00 p.m., New York City time, on the Expiration Date, or
- having a bank, trust company or NYSE member deliver a Notice of Guaranteed Delivery to the Subscription Agent prior to 5:00 p.m., New York City time, on the Expiration Date guaranteeing delivery of (i) payment of the full estimated Subscription Price of \$[\_\_\_] per Common Share for the Common Shares subscribed for in the Primary Subscription and for any additional Common Shares subscribed for pursuant to the Over-Subscription Privilege and (ii) a completed subscription certificate.

For additional information on exercising your Rights, see “The Offer—Methods for Exercising Rights” and “The Offer—Payment for Common Shares.”

Subscription Agent

The Subscription Agent for the Offer is:

Computershare Trust Company, N.A.  
c/o Voluntary Corporate Actions  
250 Royall Street, Suite V  
Canton, MA 02021

Restrictions on Foreign Common Shareholders

The Fund will not mail subscription certificates to Record Date Common Shareholders whose record addresses are outside the United States (for these purposes, the United States includes its territories and possessions and the District of Columbia). The Subscription Agent will hold the Rights to which those subscription certificates relate for such Common Shareholders’ accounts until instructions are received to exercise, sell or transfer the Rights, subject to applicable law. If no instructions have been received by 5:00 p.m., New York City time, on March 20, 2012, three (3) business days prior to the Expiration Date (or, if the subscription period is extended, on or before three (3) business days prior to the extended Expiration Date), the Subscription Agent will ask the Dealer Manager if it will purchase the Rights. If the Dealer Manager declines to purchase the Rights, the Subscription Agent will attempt to sell such Rights in the open market. The net proceeds, if any, from the sale of those Rights will be remitted to these Common Shareholders. See “The Offer—Foreign Common Shareholders.”

## Table of Contents

### Distribution Arrangements

UBS Securities LLC will act as Dealer Manager for the Offer. Under the terms and subject to the conditions contained in a Dealer Manager Agreement among the Fund, the Adviser, the Subadviser and the Dealer Manager, the Dealer Manager will provide financial structuring and solicitation services in connection with the Offer and will solicit the exercise of Rights and participation in the Over-Subscription Privilege by Record Date Common Shareholders. The Offer is not contingent upon any number of Rights being exercised. The Fund has agreed to pay the Dealer Manager a fee for financial structuring and solicitation services equal to 3.75% of the Subscription Price for each Common Share issued pursuant to the exercise of Rights and the Over-Subscription Privilege. The Dealer Manager will reallocate a part of its fees to other broker-dealers that have assisted in soliciting the exercise of Rights. The Fund has also agreed to pay the Dealer Manager up to \$100,000 as a partial reimbursement for its reasonable out-of-pocket expenses incurred in connection with the Offer. The Fund and the Avenue Managers have also agreed to indemnify the Dealer Manager against certain liabilities under the 1933 Act. The fees paid to the Dealer Manager will be borne by the Fund and indirectly by all of its Common Shareholders, including those who do not exercise the Rights. All of the costs of the Offer will be borne by the Fund's Common Shareholders. See "The Offer—Distribution Arrangements" and "—Compensation to Dealer Manager."

Prior to the expiration of the Offer, the Dealer Manager may independently offer for sale Common Shares of the Fund, including Common Shares acquired through purchasing and exercising the Rights, all at prices that may be different from the market price for such Common Shares or from the price to be received by the Fund upon the exercise of Rights. See "The Offer—Distribution Arrangements."

### Subscription Agent

The Subscription Agent is collectively Computershare Inc. and Computershare Trust Company, N.A. Under the terms and subject to the conditions contained in a Subscription Agent Agreement between the Fund and the Subscription Agent, the Subscription Agent in connection with the Offer will provide services related to the distribution of the subscription certificates and the issuance and exercise of Rights to subscribe as set forth therein. The Fund has also agreed to indemnify the Subscription Agent and its nominees against all liability and reasonable expense which may arise out of the services described in the Subscription Agent Agreement, except for any liability or expense arising out of negligence, bad faith or willful misconduct of the Subscription Agent or its nominees. See "The Offer—Subscription Agent."

### Information Agent

The Information Agent is Georgeson Inc. Under the terms and subject to the conditions contained in an Information Agent Agreement between the Fund and the Information Agent, the Information Agent will provide communication, dissemination and other related services in connection with the Offer. The Fund has also agreed to indemnify the Information Agent and its stockholders, officers, directors, employees, agents and affiliates against any and all claims, costs, damages, liabilities, judgments and expenses, including the fees, costs and expenses of counsel retained by the Information Agent, which directly relate to or arise out of the Information Agent's performance of services under the Information Agent Agreement, except for costs, damages, liabilities, judgments or expenses resulting directly from the Information Agent's gross negligence or intentional misconduct. See "The Offer—Information Agent."

Edgar Filing: Avenue Income Credit Strategies Fund - Form N-2/A

How to Obtain Information

You may obtain information with respect to the Offer by contacting your bank, broker or nominee or the Information Agent, (212) 440-9800, toll-free at (888) 867-6963.

Important Dates to Remember

The Fund at a Glance

Information Regarding the Fund

The Fund is a recently organized, non-diversified, closed-end management investment company registered under the Investment Company Act of 1940, as amended, and the rules and regulations promulgated thereunder (the “1940 Act”). The Fund was organized as a statutory trust under the laws of the State of Delaware on October 12, 2010. As of February 2, 2012, the Fund’s NAV was \$17.68. See “The Fund.”

NYSE Listed

As of February 2, 2012, the Fund had 7,351,400 Common Shares outstanding. The Fund’s Common Shares are traded on the NYSE under the symbol “ACP.” As of February 2, 2012, the last reported sales price of a Common Share of the Fund was \$17.73. The Rights are transferable and will be listed for trading on the NYSE under the symbol “ACP RT” during the course of the Offer. See “Description of Common Shares.”

Who May Want to Invest

Investors should consider their investment goals, time horizons and risk tolerance before investing in the Fund. An investment in the Fund is not appropriate for all investors, and the Fund is not intended to be a complete investment program. The Fund is designed as a long-term investment and not as a trading vehicle. The Fund may be an appropriate investment for investors who are seeking:

- a closed-end fund that seeks attractive risk adjusted returns with a high level of current income by investing generally in senior secured floating rate and fixed rate loans (“Senior Loans”) and in second lien or other subordinated loans or debt instruments, including non-stressed and stressed credit obligations, and related derivatives;
- a fund that seeks a balance between credit risk and interest rate risk and investment returns;
- exposure to Senior Loans for an overall portfolio that lacks such exposure; and

- a portfolio that may be invested globally with professional selection and active management by the Avenue Managers.

#### Investment Objectives and Principal Investment Strategy

The Fund's primary investment objective is to seek a high level of current income with a secondary objective of capital appreciation. There can be no assurance that the Fund will achieve its investment objectives.

## Table of Contents

Depending on current market conditions and the Fund's outlook over time, the Fund seeks to achieve its investment objectives by opportunistically investing primarily in loan and debt instruments (and loan-related or debt-related instruments, including repurchase and reverse repurchase agreements and derivative instruments) (collectively, "credit obligations") of issuers that operate in a variety of industries and geographic regions.

The Fund's investment objectives and principal investment strategy are not considered to be fundamental by the Fund and can be changed without the vote of the Fund's shareholders by the Board with at least sixty (60) days written notice provided to shareholders.

### Strategy Rationale

The Avenue Managers believe that changing investment and interest rate environments over time offer attractive investment opportunities in the markets for credit obligations, as well as varying degrees of investment risk. To both capitalize on attractive investments and effectively manage potential risk, the Avenue Managers believe that the combination of a thorough and continuous credit analysis (including an analysis of an issuer's ability to make loan or debt payments when due) and the ability to reallocate the portfolio of the Fund among different categories of investments at different points in the credit cycle (i.e., the cycle between overall positive economic environments and less positive economic environments for credit obligations) is critical to achieving higher risk-adjusted returns, including higher current income and/or capital appreciation, relative to other high-yielding investments. The Avenue Managers seek to emphasize high current income, with a secondary emphasis on capital appreciation, by investing generally in Senior Loans, and in second lien or other subordinated loans or debt instruments, including non-stressed and stressed credit obligations, and related derivatives. The Fund seeks to capitalize on market inefficiencies and reallocate the portfolio of the Fund to opportunistically emphasize those investments, geographies and categories of investments best suited to the current investment and interest rate environment and market outlook. An investment committee of the Fund (the "Investment Committee") seeks to manage the allocation of the portfolio of the Fund between the Adviser and the Subadviser based on the availability of opportunities at the time.

The Fund's portfolio turnover rate may vary from year to year. The Fund believes that, under normal market conditions, its portfolio turnover may be up to 100%. Because it is difficult to predict accurately portfolio turnover rates, actual turnover may be higher or lower. A high portfolio turnover rate increases a fund's transaction costs (including brokerage commissions and dealer costs), which would adversely impact a fund's performance. Higher portfolio turnover may result in the realization of more short-term capital gains than if a fund had lower portfolio turnover.

### Portfolio

**Portfolio Construction Guidelines.** Under normal market conditions, the Fund will invest at least 80% of its "Managed Assets" in any combination of the following credit obligations and related instruments: (i) Senior Loans (including those that, at the time of investment, are rated below investment grade by a nationally recognized statistical rating organization (a "NRSRO") or are unrated but deemed by an Avenue Manager to be of comparable quality; these types of below investment grade instruments are commonly known as "junk" securities and are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal); (ii) second lien or other subordinated or unsecured floating rate and fixed rate loans or debt (including those that, at the time of investment, could be considered "junk" securities as described above); (iii) other debt obligations, including high-yield, high-risk obligations (i.e., instruments that are commonly known as "junk" securities as described above); (iv) structured products, including collateralized debt and loan obligations (collectively, "structured products") that provide long or short exposure to other credit obligations; (v) swaps and other derivative instruments (including credit default, total return, index and interest rate swaps, options, forward contracts, futures contracts and options on futures contracts)

that provide long or short exposure to other credit obligations; and (vi) short-term debt securities such as U.S. government securities, commercial paper and other money market instruments and cash equivalents (including shares of money market funds). Certain types of structured products, swaps and other derivative instruments provide short exposure to other credit obligations because the value of such instruments is

Table of Contents

inversely related to the value of one or more other credit obligations. “Managed Assets” are the total assets of the Fund (including any assets attributable to money borrowed for investment purposes, including proceeds from (and assets subject to) reverse repurchase agreements, any credit facility and any issuance of preferred shares or notes) minus the sum of the Fund’s accrued liabilities (other than Fund liabilities incurred for the purpose of leverage).

The Fund will not invest in credit obligations or related instruments that, at the time of investment, are in default. The Fund may invest in credit obligations or related instruments that, at the time of investment, are likely to default. The credit obligations and related instruments in which the Fund may invest include mortgage-backed and asset-backed securities and securities whose value depends on the value of mortgage-backed or asset-backed securities. These types of investments present special risks. See “Risk Factors—Risks Relating to Investing in the Fund’s Common Shares—Asset-Backed and Mortgage-Backed (or Mortgage-Related) Instruments Risk.” The Fund may act as a lender originating a Senior Loan.

Under normal market conditions, the Fund may also invest up to 20% of its Managed Assets in any combination of the following: (i) structured products that do not provide long or short exposure to other credit obligations; (ii) swaps and other derivative instruments (including total return, index and interest rate swaps, options, warrants, forward contracts, futures contracts and options on futures contracts) that do not provide long or short exposure to other credit obligations; (iii) foreign currencies and foreign currency derivatives (including foreign currency related swaps, futures contracts and forward contracts) acquired for the purpose of hedging the currency risk arising from the credit obligations in the Fund’s portfolio; and (iv) equity securities obtained through the conversion or exchange of convertible or exchangeable instruments, debt restructurings or bankruptcy proceedings and hedges on such positions. Structured products, swaps and other derivative instruments that do not provide long or short exposure to other credit obligations are those instruments whose reference or underlying assets or indices are not credit obligations or indices of credit obligations. Examples of such instruments include equity- and commodity-linked notes, total return swaps based on the value of an equity security and commodity futures contracts. The Fund may invest in such instruments in order, for example, (i) to seek current income or capital appreciation or (ii) to reduce the Fund’s exposure solely to credit obligations. The Avenue Managers believe that the flexibility afforded by being able to invest in such instruments may benefit the Fund by (i) allowing the Fund to invest in potentially attractive investment opportunities that are not credit obligations and (ii) increasing the mix of instruments in the Fund’s portfolio which could reduce the overall risk of the Fund’s portfolio (although the Fund intends to remain a non-diversified investment company). There can be no assurance that these benefits will be realized and such instruments may expose the Fund to risks not presented by credit obligations.

If the Fund receives equity securities in a debt restructuring or bankruptcy proceeding in an amount that would cause it to exceed the foregoing 20% limitation, the Fund will not be required to reduce its positions in such securities, or in any related hedges or any other investment, if the Adviser or Subadviser believes it would not be in the best interest of the Fund to do so.

Percentage limitations described in this prospectus are as of the time of investment by the Fund and may be exceeded after such time because of changes in the market value of the Fund’s assets.

The Fund may not invest in a derivative (other than a credit default swap or a currency hedging instrument) if, immediately after the investment, derivatives (other than credit default swaps and currency hedging instruments) would represent more than 30% of the Fund’s Managed Assets on a marked-to-market basis. The Fund may use derivative instruments for hedging, as well as speculative, purposes.

The Fund’s policy of investing, under normal market conditions, in accordance with the foregoing portfolio construction guidelines, is not considered to be fundamental by the Fund and can be changed without the vote of the

Fund's shareholders by the Board with at least sixty (60) days written notice provided to shareholders.

The types of derivative instruments that the Fund currently invests in (or considers for investment) are: structured products, swaps, futures contracts, forward contracts and options (including options on swaps, futures contracts and foreign currencies). In the future, the Fund may invest in other types of derivative instruments if

## Table of Contents

deemed advisable by the Adviser or Subadviser. The Fund may commence investing in such other types of derivative instruments without notice to Common Shareholders.

**Credit Quality, Liquidity and Geographic Origin of Portfolio Investments.** The Fund may invest, without limitation, in credit obligations that are rated below investment grade by a NRSRO such as Standard & Poor's Ratings Services ("S&P") or Moody's Investors Service, Inc. ("Moody's"), or unrated credit obligations that are deemed by the Adviser or the Subadviser to be of comparable quality, commonly known in either case as "junk" securities. Such securities are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations and involve significant risk exposure to adverse conditions. Any of the Fund's investments may be issued, at the time of investment by the Fund, by "non-stressed" or "stressed" issuers. The Fund may invest in credit obligations of any maturity or duration. See "—Investment Philosophy" below and "Management of the Fund—Potential Conflicts of Interest of the Avenue Managers" in the SAI. "Non-stressed issuers" generally refers to those issuers that are in compliance with respect to their financial obligations and are not stressed or distressed issuers. "Non-stressed obligations" generally refers to credit obligations issued by non-stressed issuers. "Stressed issuers" generally refers to those issuers that the market expects to become distressed issuers in the near future. "Stressed obligations" generally refers to credit obligations issued by stressed issuers. "Distressed issuers" generally refers to those issuers that are unable to service their debt. "Distressed obligations" generally refers to credit obligations issued by distressed issuers. The Fund does not intend to invest in credit obligations issued by issuers that, at the time of investment, the Adviser and Subadviser believe to be distressed issuers.

In making investments in accordance with the foregoing portfolio construction guidelines, the Fund may invest globally in U.S. and non-U.S. issuers' obligations and such obligations may be U.S. dollar denominated as well as non-U.S. dollar denominated. The Fund typically seeks to limit its exposure to foreign currency risks by entering into forward transactions and other hedging transactions to the extent practical. There can be no assurance that the Fund's currency hedging strategies will succeed. Under normal market conditions, the Fund expects to continue investing in both U.S. and non-U.S. issuers. The Fund's initial areas of geographic focus are the United States and, secondarily, Europe. The Fund is also, among other areas, considering investments in Canada and South Africa. The geographic areas of focus are subject to change from time to time and may be changed without notice to the Fund's shareholders. There is no minimum or maximum limit on the amount of the Fund's assets that may be invested in non-U.S. credit obligations, generally, or in emerging market credit obligations, specifically.

The Fund may invest in loans and bonds issued by issuers of any size. The Fund currently intends to focus on middle market issuers. Middle market issuers are issuers with between approximately \$100 million and \$5 billion in balance sheet debt. The Fund's focus with respect to borrower size is subject to change from time to time and may be changed without notice to the Fund's shareholders. The Fund may invest in credit obligations at all levels of the capital structure. In investing in credit obligations, the Fund currently intends to focus on senior secured debt and other senior debt (including senior unsecured debt issued by an issuer that has also issued senior secured debt). The Fund's focus in this regard is subject to change from time to time and may be changed without notice to the Fund's shareholders.

## Investment Philosophy

The Avenue Managers have expertise in Senior Loans and subordinated debt instruments, including those of stressed and distressed issuers, and are responsible for the overall management of the Fund.

The Avenue Managers seek to maximize risk adjusted returns, including by seeking to manage risk through shorting and other hedging strategies when deemed advisable by the Avenue Managers. There can be no assurance that the Fund's hedging strategies will succeed. The Avenue Managers seek to achieve the Fund's investment objectives while carefully evaluating risk/return within the capital structure of a company, as well as the industry and asset class. The

Avenue Managers look to maintain trading flexibility and to preserve capital. They conduct thorough in-depth research and employ a disciplined investment philosophy and a consistent investment approach in their focus on credit opportunities. The Avenue Managers' investment teams use a robust credit process that

Table of Contents

includes research and analysis using a top-down/bottom-up approach to find mispriced or undervalued opportunities: from the top down, they consider macroeconomic themes of the overall credit market and industries, and from the bottom up, they conduct detailed fundamental analysis related to credit obligations of specific issuers, including examining issuers' financials and operations, including sales, earnings, growth potential, assets, debt, management and competition. The Avenue Managers also seek to understand historic and prospective industry trends affecting an investment opportunity. The Avenue Managers seek to ensure that the Fund's portfolio will not consist of a large number of issuers to permit a more thorough analysis of each issuer and to focus on the investments the Avenue Managers believe to be most attractive. The concentration of the Fund's portfolio creates risk. See "Risk Factors—Risks Relating to Investing in the Fund's Common Shares—Non-Diversification Risk." The Fund typically seeks to balance interest rate risk with investment performance by investing, when deemed advisable by the Avenue Managers, in both floating rate credit obligations, which are more likely to maintain their value in changing interest rate environments, and fixed rate credit obligations, which are more likely to lose value in rising interest rate environments but may pay higher rates of interest than floating rate credit obligations. See "Risk Factors—Risks Relating to Investing in the Fund's Common Shares—Market Risk." The Fund typically seeks to balance credit risk with investment performance by investing, when deemed advisable by the Avenue Managers, in both Senior Loans, which may pose less credit risk, and other credit obligations, which may offer the prospect of higher returns with more credit risk. See "Risk Factors—Risks Relating to Investing in the Fund's Common Shares—Credit Risk." The Avenue Managers' investment process is subject to change in their discretion.

When investing in credit obligations, the Avenue Managers invest the Fund's assets in credit obligations with total yields that at the time of purchase are equal to or below an applicable benchmark plus a credit spread set from time to time by the Investment Committee (the "Avenue Credit Thresholds"). See "Investment Objectives and Principal Investment Strategy", "Risk Factors—Risks Relating to Investing in the Fund's Common Shares—Potential Conflicts of Interest Risk" and "Management of the Fund—Potential Conflicts of Interest of the Avenue Managers" in the SAI. The Avenue Credit Thresholds are determined by the Investment Committee in its sole discretion, and may be revised as markets change. Along the credit spectrum of non-stressed and stressed obligations, obligations with total yields at or below the Avenue Credit Thresholds generally will be less stressed obligations. Because the Adviser invests primarily in U.S. and Canadian investments, and the Subadviser invests primarily in non-North American investments, the Avenue Credit Thresholds applicable to the Adviser and the Subadviser may differ. There is no guarantee that the yield on the Fund's portfolio will equal or exceed the applicable Avenue Credit Thresholds.

As an example, as of the date of this prospectus, the following types of U.S. and Canadian credit obligations would be at or below the applicable "Avenue Credit Thresholds" if, at the time of investment, they have yields at or below the following benchmarks plus the indicated credit spreads:

- for floating rate obligations, LIBOR plus 950 basis points; and
- for fixed rate obligations, current U.S. Treasury plus 950 basis points.

As an additional example, as of the date of this prospectus, the following types of non-North American credit obligations would be at or below the applicable "Avenue Credit Thresholds" if, at the time of investment, they have yields at or below the following benchmarks plus the indicated credit spreads:

- for floating rate obligations, LIBOR plus 800 basis points, EURIBOR plus 800 basis points, and Sterling LIBOR plus 800 basis points, as applicable, depending upon the currency and term of the investment; and
- for fixed rate obligations, current U.S. Treasury plus 800 basis points, Bundesobligationen (Bobl) (of the Federal Republic of Germany) plus 800 basis points, Bundesschatzanweisungen (Schätzel) (of the Federal Republic of

Germany) plus 800 basis points and UK Gilt rates plus 800 basis points, as applicable, depending upon the currency and term of the investment.

Table of Contents

“LIBOR” is an acronym for “London Interbank Offered Rate” and refers to the average interest rate that leading banks in London charge when lending to other banks. A “basis point” is a unit equal to 1/100th of a percentage point or 0.0001. “Current U.S. Treasury” refers to the U.S. Treasury obligation closest in maturity to an evaluated asset in question. “EURIBOR” is an acronym for “Euro-area InterBank Offered Rate” and refers to the average interest rate that leading banks in the euro-area charge when lending on an unsecured basis to other banks in euros, in the euro-area. “Sterling LIBOR” or LIBOR-BBA is an acronym for “London InterBank Offered Rate-British Bankers Association” and refers to the average interest rate that leading banks charge when lending on an unsecured basis to other banks in British Pounds Sterling. “Bundesobligation (Bobl)” is a five year bond issued by the German government. “Bundesschatzanweisungen (Schätzel)” is a two year note issued by the German government. “UK Gilt” refers to the UK government securities issued by the UK Debt Management Office on behalf of HM Treasury closest in maturity to a evaluated asset in question.

The Adviser and Subadviser manage assets for accounts other than the Fund, including private funds. The risk and return profile for the Fund is generally lower than for most of the Avenue Managers’ other accounts. Thus, the Fund and most of the Avenue Managers’ other accounts generally do not invest in the same credit obligations (although their investments may include different obligations of the same issuer). (For example, the Fund might invest in a Senior Loan issued by a borrower and one or more of the Avenue Managers’ other accounts might invest in the borrower’s junior debt.) In particular, except in the limited cases described below, the Avenue Managers generally allocate credit obligations with a total yield at the time of investment at or below the applicable Avenue Credit Thresholds to the Fund and credit obligations with a total yield above the Avenue Credit Thresholds to the Avenue Managers’ other accounts.

In the following cases, credit obligations with a total yield at the time of investment at or below the applicable Avenue Credit Thresholds may also be allocated to the Avenue Managers’ other accounts (and thus at times an Avenue Manager may purchase and/or sell the same obligations for both its other clients and the Fund). Each of the Avenue Managers, on behalf of its other accounts, is able to sell short or otherwise take short positions in obligations (including purchasing a credit default swap) at or below the applicable Avenue Credit Thresholds. Also, each of the Avenue Managers, in making an investment (including an investment that comprises multiple component transactions) for its other accounts that is focused on an obligation above the applicable Avenue Credit Threshold (or on an instrument that is not subject to the Avenue Credit Thresholds), may purchase or sell obligations at or below the applicable Avenue Credit Threshold in order to hedge or otherwise limit the investment in the obligation or other instrument that is the focus of such investment. In addition, for purposes of covering or closing a short position, each of the Avenue Managers, on behalf of its other accounts, is able to borrow or buy investments at or below the applicable Avenue Credit Thresholds. Further, investments, such as equities and currencies, that do not have credit-based yields, are not subject to the Avenue Credit Thresholds. In addition, a portfolio management team (the “CLO Team”) in the Adviser manages certain accounts (including private funds) that invest in certain types of credit obligations in which the Fund may also invest. The CLO Team operates on a different trading system than the Avenue Managers’ other investment professionals and the Avenue Managers employ various policies and procedures intended to separate the CLO Team from such other professionals, including policies and procedures regarding physical separation and regarding limitations on the sharing of information. The CLO Team is not involved in the management of the Fund and the Fund’s portfolio managers are not involved in the management of the CLO Team’s accounts. The Avenue Credit Thresholds do not apply to investments made by the CLO Team and the CLO Team, on behalf of its accounts, may invest in credit obligations that have a total yield at the time of investment at or below (or above) the applicable Avenue Credit Thresholds. Investment opportunities in credit obligations sourced by the CLO Team are solely allocated to the CLO Team’s accounts and not to the Fund. The Avenue Managers may amend, modify, supplement and/or eliminate, from time to time, the foregoing policies, procedures, operations, involvement and/or relationships with respect to the CLO Team in any manner they believe to be consistent with law and regulatory requirements.

To the extent that the Adviser or Subadviser serves as an investment manager to other accounts in the future that have the same investment strategy as the Fund, investment opportunities within such strategy will, to the extent practicable, be allocated among the Fund and such other accounts on a pro rata basis or on such other basis as the Avenue Managers determine to be fair and equitable to the Fund and such other accounts.

## Table of Contents

Investors should note that the investment advisory fee structure for the Avenue Capital Group's accounts that are not registered investment companies or managed by the CLO Team is different and generally higher than the investment advisory fee structure for the Fund. See "Management of the Fund—Potential Conflicts of Interest of the Avenue Managers" in the SAI for more information on the Avenue Credit Thresholds, advisory fees and the Adviser's and Subadviser's policies and procedures to address conflicts of interest. The Fund offers an opportunity for its investors to have some indirect access to the Avenue Managers, which normally is not directly available to retail investors, albeit only at the lower risk and return segment of the market.

### Temporary Investments

During temporary defensive periods or in order to keep the Fund's cash fully invested, including during the period when the net proceeds of the Offer are being invested, the Fund may deviate from its investment objectives and principal investment strategy. During such periods, the Fund may invest all or a portion of its Managed Assets in certain short-term (less than one (1) year to maturity) and medium-term (not greater than five years to maturity) debt securities or hold cash. The short-term and medium-term debt securities in which the Fund may invest consist of: (i) obligations of the U.S. government, its agencies or instrumentalities; (ii) bank deposits and bank obligations (including certificates of deposit, time deposits and bankers' acceptances) of U.S. or foreign banks denominated in any currency; (iii) floating rate securities and other instruments denominated in any currency issued by various governments or international development agencies; (iv) finance company and corporate commercial paper and other short-term corporate debt obligations of U.S. or foreign corporations; (v) repurchase agreements with banks and broker-dealers with respect to such securities; and (vi) shares of money market funds. See "Investment Objectives and Principal Investment Strategy—Other Investments—Temporary Investments" and "Use of Proceeds" below.

### Leverage

The Fund is permitted to obtain leverage using any form or combination of financial leverage instruments, including reverse repurchase agreements, credit facilities such as bank loans or commercial paper and the issuance of preferred shares or notes. Subject to prevailing market conditions, the Fund intends to use leveraging instruments to add financial leverage to its portfolio representing up to approximately 331/3% of the Fund's total assets (including the assets subject to, and obtained with the proceeds of, such instruments). The Fund's intention to limit its use of financial leverage to 331/3% of the Fund's total assets is not a fundamental policy of the Fund and may be changed without notice to the Common Shareholders. The Fund intends to use leverage opportunistically and may choose to increase or decrease its leverage, or use different types or combinations of leveraging instruments, at any time based on the Fund's assessment of market conditions and the investment environment. The Fund is currently a party to a \$65 million senior secured revolving credit facility (the "Credit Facility"). The Credit Facility expires on March 9, 2012 (although, subject to certain conditions including the payment of an additional fee, the Fund may extend the maturity date of its outstanding loans for up to approximately one (1) year following such expiration date). The Fund intends to renew the existing Credit Facility and is currently in negotiations to do so. Although the Fund currently intends to renew the Credit Facility, there can be no assurance that the Fund will be able to do so or do so on terms similar to the current Credit Facility, which may adversely affect the ability of the Fund to pursue its investment objectives and strategies. See "Investment Objectives and Principal Investment Strategy—Use of Leverage and Related Risks" for more information.

The 1940 Act generally limits the extent to which the Fund may utilize "uncovered" reverse repurchase agreements and borrowings, together with any other senior securities representing indebtedness, to 331/3% of the Fund's total assets at the time utilized. In addition, the 1940 Act limits the extent to which the Fund may issue preferred shares to 50% of the Fund's total assets (less the Fund's obligations under uncovered reverse repurchase agreements and other senior securities representing indebtedness). "Covered" reverse repurchase agreements will not be counted against the

foregoing limits under the 1940 Act. A reverse repurchase agreement will be considered “covered” if the Fund segregates an amount of cash and/or liquid securities equal to the Fund’s obligations under such reverse repurchase agreement (or segregates such other amounts as may be permitted by the 1940 Act or guidance issued by the Securities and Exchange Commission (“SEC”) from time to time); otherwise, a reverse

Table of Contents

repurchase agreement will be considered “uncovered.” The Fund may not cover a reverse repurchase agreement if it does not need to do so to comply with the foregoing 1940 Act requirements and, in the view of an Avenue Manager, the assets that would have been used to cover could be better used for a different purpose.

Use of leverage creates an opportunity for increased income and return for the Common Shareholders but, at the same time, creates risks, including the likelihood of greater volatility in the NAV and market price of, and distributions on, the Common Shares. There can be no assurance that the Fund will continue to use leverage or that its leveraging strategy will be successful during any period in which it is employed. The Fund may be subject to investment restrictions of one or more NRSROs and/or credit facility lenders as a result of its use of financial leverage. These restrictions may impose asset coverage or portfolio composition requirements that are more stringent than those imposed on the Fund by the 1940 Act. It is not anticipated that these covenants or portfolio requirements will significantly impede the Avenue Managers in managing the Fund’s portfolio in accordance with its investment objectives and policies. Nonetheless, if these covenants or guidelines are more restrictive than those imposed by the 1940 Act, the Fund may not be able to utilize as much leverage as it otherwise could have, which could reduce the Fund’s investment returns. In addition, the Fund expects that any notes or a credit facility/commercial paper program would contain covenants that, among other things, will likely impose geographic exposure limitations, credit quality minimums, liquidity minimums, concentration limitations and currency hedging requirements on the Fund. These covenants would also likely limit the Fund’s ability to pay distributions in certain circumstances, incur additional debt, change fundamental investment policies and engage in certain transactions, including mergers and consolidations. Such restrictions could cause the Avenue Managers to make different investment decisions than if there were no such restrictions and could limit the ability of the Board and Common Shareholders to change fundamental investment policies. If preferred shares are used, holders of preferred shares will have rights to elect a minimum of two trustees. This voting power may negatively affect Common Shareholders, and the interests of holders of preferred shares may otherwise differ from the interests of Common Shareholders. Any trustees elected by preferred shareholders will represent both Common Shareholders as well as holders of preferred shares. Such trustees may have a conflict of interest when the interests of Common Shareholders differ from those of holders of preferred shares.

The costs of a financial leverage program (including the costs of offering preferred shares and notes) will be borne by Common Shareholders and consequently will result in a reduction of the NAV of the Common Shares. During periods in which the Fund is using leverage, the fees paid by the Fund for investment advisory services will be higher than if the Fund did not use leverage because the investment advisory fees paid will be calculated on the basis of the Fund’s Managed Assets, which includes proceeds from (and assets subject to) reverse repurchase agreements, any credit facility and any issuance of preferred shares or notes, so that the investment advisory fees payable to the Avenue Managers will be higher when leverage is utilized. This will create a conflict of interest between the Avenue Managers, on the one hand, and Common Shareholders, on the other hand. To monitor this potential conflict, the Board intends periodically to review the Fund’s use of leverage, including its impact on Fund performance and on the Avenue Managers’ fees. See “Management of the Fund—Potential Conflicts of Interest of the Avenue Managers” in the SAI. Fees and expenses in respect of financial leverage, as well as the investment advisory fee and all other expenses of the Fund, will be borne entirely by the Common Shareholders, and not by preferred shareholders, noteholders or any other leverage providers.

The Fund may enter into other transactions that may give rise to a form of leverage including, among others, swaps, futures and forward contracts, options and other derivative transactions. See “Investment Objectives and Principal Investment Strategy—Use of Leverage and Related Risks” and “Risk Factors.” To the extent that the Fund covers its obligations under such other transactions, as described in this prospectus, such transactions should not be treated as borrowings for purposes of the 1940 Act. However, these transactions, even if covered, may represent a form of economic leverage and will create risks. The potential loss on derivative instruments may be substantial relative to the

initial investment therein. See “Investment Objectives and Principal Investment Strategy—Portfolio Composition”, “—Structured Products”, “—Swaps” and “—Other Derivative Instruments”; and “Risk Factors—Risks Relating to Investing in Fund’s Common Shares—Risks of Structured Products”, “—Risks of Swaps” and “—Risks of Other Derivative Instruments.”

## Table of Contents

### The Adviser and the Subadviser

Under an advisory agreement, the Adviser receives an annual fee, payable monthly by the Fund, in an amount equal to 1.25% of the Fund's average daily Managed Assets, which means the total assets of the Fund (including any assets attributable to money borrowed for investment purposes, including proceeds from (and assets subject to) reverse repurchase agreements, any credit facility and any issuance of preferred shares or notes) minus the sum of the Fund's accrued liabilities (other than Fund liabilities incurred for the purpose of leverage).

Under an investment subadvisory agreement with the Adviser, the Adviser pays the Subadviser an annual fee, payable monthly, in an amount equal to 1.25% of the average daily value of the assets managed by the Subadviser.

### The Investment Committee

The Investment Committee which is composed of representatives of the Avenue Managers is responsible for allocating the portions of the Fund's assets to be invested by the Adviser and the Subadviser, respectively. The Investment Committee generally bases its allocation decisions on market conditions and the attractiveness of available investment opportunities in the United States and other geographic regions. In general, the Adviser is responsible for the Fund's North American investments and the Subadviser is responsible for the Fund's non-North American investments. The Investment Committee meets on a monthly basis (or more frequently, if necessary) to review market conditions and the allocation of the Fund's assets between the Adviser and the Subadviser. See "Management of the Fund—The Investment Committee."

### The Administrator

State Street Bank and Trust Company ("State Street"), located at State Street Financial Center, 1 Lincoln Street, Boston, Massachusetts 02111, serves as administrator to the Fund. Under the administration agreement, State Street is generally responsible for managing the administrative affairs of the Fund.

For administration related services, State Street is entitled to receive an annual fee of \$174,000, plus certain out-of-pocket expenses.

During periods when the Fund is using leverage, the fee paid to State Street (for various services) will be higher than if the Fund did not use leverage because the fees paid are calculated on the basis of the Fund's Managed Assets, which includes the assets purchased through leverage. See "Management of the Fund—The Administrator."

### Legal Proceedings

The Fund is not currently a party to any material legal proceedings.

### Distributions

The Fund intends to make regular monthly distributions of all or a portion of the Fund's net interest and other investment company taxable income to Common Shareholders. The Fund expects to pay its Common Shareholders annually all or substantially all of its investment company taxable income. In addition, the Fund intends to distribute, on an annual basis, all or substantially all of any net capital gains to its Common Shareholders.

Various factors will affect the level of the Fund's net interest and other investment company taxable income, of which the Fund intends to distribute all or substantially all on an annual basis to meet the requirements for qualification as a regulated investment company under the Internal Revenue Code of 1986, as amended (the "Code"). The Fund may

from time to time distribute less than the entire amount of income earned in a particular period. The undistributed income would be available to supplement future distributions. As a result, the distributions paid by the Fund for any particular month may be more or less than the amount of income actually earned by the Fund during that period. Undistributed income will add to the Fund's NAV and, correspondingly, distributions will reduce the Fund's NAV.

## Table of Contents

An investor who acquires Common Shares in the Offer after the record date for a monthly dividend (if any) to be paid by the Fund will not receive such dividend. An investor who acquires Common Shares in the Offer will not receive the Fund's dividend announced for March 2012 with respect to such Common Shares.

### Dividend Reinvestment Plan

The Fund has established a dividend reinvestment plan. A Common Shareholder will automatically have all dividends and distributions reinvested in Common Shares newly issued by the Fund or Common Shares of the Fund purchased in the open market in accordance with the Fund's dividend reinvestment plan unless the Common Shareholder specifically elects to receive cash. See "Distributions" and "Dividend Reinvestment Plan."

### Custodian, Dividend Paying Agent, Transfer Agent and Registrar

State Street serves as custodian (the "Custodian") for the Fund. State Street also provides accounting services to the Fund. State Street also serves as the Fund's dividend paying agent, transfer agent and registrar. See "Custodian, Dividend Paying Agent, Transfer Agent and Registrar."

### Closed-End Fund Structure

Closed-end funds differ from open-end management investment companies (commonly referred to as mutual funds) in that closed-end funds generally list their shares for trading on a securities exchange and do not redeem their shares at the option of the shareholder. By comparison, mutual funds issue securities redeemable at net asset value at the option of the shareholder and typically engage in a continuous offering of their shares. Mutual funds are subject to continuous asset in-flows and out-flows that can complicate portfolio management, whereas closed-end funds generally can stay more fully invested in securities consistent with the closed-end fund's investment objectives and policies. In addition, in comparison to open-end funds, closed-end funds have greater flexibility in the employment of financial leverage and in the ability to make certain types of investments, including investments in illiquid securities.

However, shares of closed-end funds frequently trade at a discount from their net asset value. In recognition of the possibility that the Common Shares might trade at a discount to NAV and that any such discount may not be in the interest of Common Shareholders, the Board, in consultation with the Adviser, from time to time may review possible actions to reduce any such discount. The Board might consider open market repurchases or tender offers for Common Shares at NAV. There can be no assurance, however, that the Board will decide to undertake any of these actions or that, if undertaken, such actions would result in the Common Shares trading at a price equal to or close to NAV. The Board might also consider the conversion of the Fund to an open-end mutual fund, which would also require a vote of the shareholders of the Fund. Conversion of the Fund to an open-end mutual fund would require approval by both (i) a majority of the Board and (ii) a vote of shareholders representing the lesser of (a) 67% or more of the outstanding voting securities of the Fund at a shareholder meeting, if the holders of more than 50% of the outstanding voting securities are present in person or by proxy, or (b) more than 50% of the outstanding voting securities of the Fund.

The Fund has no limitation on investments in illiquid securities (closed-end funds are not required to have any such limitation) and may invest all or a portion of its assets in illiquid securities. In order to meet redemptions upon request by shareholders, open-end funds typically cannot have more than 15% of their assets in illiquid securities. Thus, if the Fund were to convert to an open-end fund, it would have to adopt a limitation on illiquid securities and may need to revise its investment objectives, strategies and policies. The composition of the Fund's portfolio and/or its investment policies could prohibit the Fund from complying with regulations of the SEC applicable to open-end management investment funds absent significant changes in portfolio holdings, including with respect to certain illiquid securities, and investment policies. The Board believes, however, that the closed-end structure is desirable, given the Fund's

investment objectives, strategies and policies. Investors should assume, therefore, that it is highly unlikely that the Board would vote to convert the Fund to an open-end investment company. Investors should note that the issuance of preferred shares to provide investment leverage could make a conversion to an open-end fund

Table of Contents

more difficult because of the voting rights of preferred shareholders, the costs of redeeming preferred shares and other factors. See “Description of Capital Structure.”

Risk Factors

You should carefully consider the following factors, as well as the other information in this prospectus, before making an investment in the Fund under this Offer.

As a result of this Offer, it is anticipated that even if you fully exercise your Rights, you should expect to incur immediate economic dilution and, if you do not exercise all of your Rights, you will incur voting dilution.

Upon the completion of the Offer, Record Date Common Shareholders who do not exercise their Rights fully will own a smaller proportional interest in the Fund than they owned prior to the Offer because there will be more Common Shares issued and outstanding if Rights are exercised. The completion of the Offer will result in immediate voting dilution for such Common Shareholders. Further, both the sales load and expenses associated with the Offer paid by the Fund will immediately reduce the NAV of each Common Shareholder’s Common Shares. In addition, if the Subscription Price is less than the NAV of our Common Shares as of the Expiration Date, the Offer will result in an immediate dilution of NAV for all Common Shareholders. It is anticipated that the existing Common Shareholders will experience immediate dilution even if they fully exercise their Rights. Such dilution is not currently determinable because it is not known how many Common Shares will be subscribed for, what the NAV or market price of our Common Shares will be on the Expiration Date or what the Subscription Price will be. However, assuming full exercise of the Rights being offered at the Subscription Price and assuming that the Expiration Date were February 2, 2012, it is estimated that the per share dilution resulting from the Offer, as of February 2, 2012, would be \$0.64. Any such NAV dilution will disproportionately affect nonexercising Common Shareholders. If the Subscription Price is substantially less than the current NAV, this dilution could be substantial. For example, assuming all of the Common Shares are sold at the estimated Subscription Price (which includes a sales load) and after deducting all expenses related to the issuance of the Common Shares, the current NAV would be reduced by approximately \$0.64 or 3.6%. Record Date Common Shareholders will experience a decrease in the NAV of the Common Shares held by them, irrespective of whether they exercise all or any portion of their Rights. The distribution of transferable Rights, which may themselves have value, will afford non-participating Common Shareholders the potential of receiving a cash payment upon the sale of Rights, receipt of which may be viewed as partial compensation for the economic dilution of their interests, although there can be no assurance that a market for the Rights will develop or, if such a market does develop, what the price of the Rights will be.

Example of Dilution to NAV Resulting from the Offer

(a) Net asset value per Common Share (as of 2/2/12)	\$17.68
(b) Total net assets (as of 2/2/12)	\$129,946,893
(c) Estimated reduction in current net asset value per Common Share resulting from the Offer (“per share dilution”)(1)(2)	\$0.64
(d) Estimated percentage reduction in current net asset value per Common Share resulting from the Offer(1)(3)	3.6%

(1) Assumes full exercise of the Rights being offered, that the Expiration Date were February 2, 2012, that all of the Common Shares are sold at the estimated Subscription Price of \$15.89 and deducts all expenses related to the issuance of the Common Shares in the Offer. The Fund, not investors, pays the sales load, which is ultimately thus borne by all Common Shareholders.

(2) Item (c) was calculated by subtracting (A) the Fund's estimated net asset value per Common Share immediately following the completion of the Offer from (B) the Fund's net asset value per Common Share (as of 2/2/12). The Fund's estimated net asset value per Common Share immediately following the completion of the Offer was estimated (using the assumptions described in note (1) above) by dividing (X) the estimated net asset

Table of Contents

value of the Fund immediately following the Offer by (Y) the estimated total number of Common Shares outstanding immediately following the completion of the Offer.

(3) Item (d) was calculated by dividing Item (c) by Item (a).

There can be no assurance that the dilution will be limited to the amounts shown in the table above. The final amounts of such dilution may be greater than those estimated due to many factors, including the Fund's market price and NAV at the time of completion of the Offer and the level of participation in the Offer.

The number of Common Shares outstanding as of February 2, 2012 was 7,351,400. The number of Common Shares adjusted to give effect to the Offer, assuming that all Rights are exercised and the applicable Common Shares issued, would be 9,801,866. The percentage increase in Common Shares outstanding that will occur if all the Rights are exercised is 331/3%.

All of the costs of the Offer will be borne by the Fund's Common Shareholders.

See "Risk Factors—Risks Relating to the Offer—Dilution Risk."

**Risks of Investing in Rights.** Shares of closed-end funds such as the Fund frequently trade at a discount to net asset value. Since inception, the Fund's Common Shares have frequently traded at a discount in relation to NAV. See "Description of Common Shares." If the Formula Price is less than 80% of NAV on the Expiration Date, then the Subscription Price will likely be greater than the market price of a Common Share on that date. In addition, the Formula Price, even if above 80% of NAV, may be still above the market price of a Common Share on the Expiration Date. If either event occurs, the Rights will have no value, and a person who exercises Rights will experience an immediate loss of value.

**Market Risk.** Market risk is the possibility that the market values of securities owned by the Fund will decline. The values of fixed income securities tend to fall as interest rates rise, and such declines tend to be greater among fixed income securities with longer remaining maturities. Market risk is often greater among certain types of fixed income securities, such as zero coupon bonds which do not make regular interest payments but are instead bought at a discount to their face values and paid in full upon maturity. As interest rates change, these securities often fluctuate more in price than securities that make regular interest payments and therefore subject the Fund to greater market risk than a fund that does not own these types of securities. The values of adjustable, variable or floating rate income securities tend to have less fluctuation in response to changes in interest rates, but will have some fluctuation particularly when the next interest rate adjustment on such security is further away in time or adjustments are limited in number or degree over time. The Fund has no policy limiting the maturity of credit obligations it purchases. Such obligations often have mandatory and optional prepayment provisions and because of prepayments, the actual remaining maturity of loans and debts may be considerably less than their stated maturity. Obligations with longer remaining maturities or durations generally expose the Fund to more market risk. When-issued and delayed delivery transactions are subject to changes in market conditions from the time of the commitment until settlement. This may adversely affect the prices or yields of the securities being purchased. The greater the Fund's outstanding commitments for these securities, the greater the Fund's exposure to market price fluctuations. Interest rate risk can be considered a type of market risk.

**Credit Risk.** Credit risk refers to the possibility that the issuer of a security will be unable to make timely interest payments and/or repay the principal on its debt. Because the Fund may invest, without limitation, in securities that are below investment grade, the Fund is subject to a greater degree of credit risk than a fund investing primarily in

investment grade securities. Below investment grade securities (that is, securities rated Ba or lower by Moody's or BB or lower by S&P) are commonly referred to as "junk" securities. Generally, lower-grade securities provide a higher yield than higher-grade securities of similar maturity but are subject to greater risks, such as greater credit risk, greater market risk and volatility, greater liquidity concerns and potentially greater manager risk. Such securities are generally regarded as predominantly speculative with respect to the issuers' capacities to pay interest

Table of Contents

or repay principal in accordance with their terms. Lower-grade securities are more susceptible to non-payment of interest and principal and default than higher-grade securities and are more sensitive to specific issuer developments or real or perceived general adverse economic changes than higher-grade securities. The market for lower-grade securities may also have less information available than the market for other securities, further complicating evaluations and valuations of such securities and placing more emphasis on the experience, judgment and analysis of the Avenue Managers.

Credit obligations of stressed issuers (including those that are in covenant or payment default) are subject to a multitude of legal, industry, market, economic and governmental forces each of which make analysis of these companies inherently difficult. The Avenue Managers rely on company management, outside experts, market research and personal experience to analyze potential investments. There can be no assurance that any of these sources will provide credible information, or that the Adviser's or the Subadviser's analysis will produce conclusions that lead to profitable investments. Obligations of stressed issuers generally trade significantly below par and are considered speculative. The repayment of defaulted obligations is subject to significant uncertainties. Defaulted obligations might be repaid only after lengthy workout or bankruptcy proceedings or result in only partial recovery of cash payments or an exchange of the defaulted obligation for other debt or equity securities of the issuer or its affiliates, which may in turn be illiquid or speculative.

There are a number of significant risks inherent in the bankruptcy process. Many events in a bankruptcy are the product of contested matters and adversary proceedings and are beyond the control of the creditors. A bankruptcy court may approve actions that would be contrary to the interests of the Fund. A bankruptcy filing by an issuer may cause such issuer to lose its market position and key employees and otherwise become incapable of restoring itself as a viable entity, and its liquidation value may be less than its value was believed to be at the time of investment. In addition, the duration of a bankruptcy proceeding is difficult to predict and, as such, a creditor's return on investment can be adversely affected by delays while the plan of reorganization is being negotiated, approved by the creditors and confirmed by the bankruptcy court and until it ultimately becomes effective. The administrative costs in connection with a bankruptcy proceeding are frequently high and would be paid out of the debtor's estate prior to any return to creditors. Further, in the early stages of the bankruptcy process it is often difficult to estimate the extent of any contingent claims that might be made and, as such, there is a risk that the Fund's influence with respect to the class of obligations it owns could be lost by increases in the number and amount of claims in that class or by different classification and treatment. A creditor, such as the Fund, can also lose its ranking and priority if it is determined that such creditor exercised "domination and control" over a debtor and other creditors can demonstrate that they have been harmed by such actions. In addition, certain claims have priority by law, such as claims for taxes, which may be substantial and could affect the ability of the Fund to be repaid.

In any investment involving stressed obligations, there is a risk that the transaction involving such debt obligations will be unsuccessful, take considerable time or will result in a distribution of cash or a new security or obligation in exchange for the stressed obligations, the value of which may be less than the Fund's purchase price of such obligations. Furthermore, if an anticipated transaction does not occur, the Fund may be required to sell its investment at a loss. However, investments in equity securities obtained through debt restructurings or bankruptcy proceedings may be illiquid and thus difficult or impossible to sell.

**Interest Rate and Income Risk.** The income you receive from the Fund is based in large part on interest rates, which can vary widely over the short and long term. If interest rates drop, your income from the Fund may drop as well. The more the Fund invests in adjustable, variable or floating rate securities or in securities susceptible to prepayment risk, the greater the Fund's income risk. Market interest rates are at or near their lowest levels in many years and thus there is a substantial risk that the Fund's portfolio will decline in value as interest rates rise.

Prepayment or Call Risk. If interest rates fall, it is possible that issuers of fixed income securities with high interest rates will prepay or “call” their securities before their maturity dates. In this event, the proceeds from the prepaid or called securities would likely be reinvested by the Fund in securities bearing the new, lower interest rates, resulting in a possible decline in the Fund’s income and distributions to shareholders.

Table of Contents

**Risks of Senior Loans.** There is less readily available and reliable information about most Senior Loans than is the case for many other types of instruments, including listed securities. Senior Loans are not listed on any national securities exchange or automated quotation system and as such, many Senior Loans are illiquid, meaning that the Fund may not be able to sell them quickly at a fair price. To the extent that a secondary market does exist for certain Senior Loans, the market is more volatile than for liquid, listed securities and may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods. The market for Senior Loans could be disrupted in the event of an economic downturn or a substantial increase or decrease in interest rates, resulting in fluctuations in the Fund's NAV of the Common Shares and difficulty in valuing the Fund's portfolio of Senior Loans. Although the Avenue Managers believe that the Fund's investments in adjustable rate Senior Loans could limit fluctuations in the Fund's NAV of the Common Shares as a result of changes in interest rates, extraordinary and sudden changes in interest rates could nevertheless disrupt the market for such Senior Loans and result in fluctuations in the Fund's NAV of the Common Shares and difficulty in valuing the Fund's portfolio of Senior Loans.

Senior Loans, like most other debt obligations, are subject to the risk of default. Default in the payment of interest or principal on a Senior Loan will result in a reduction of income to the Fund, a reduction in the value of the Senior Loan and a potential decrease in the Fund's NAV of the Common Shares. The risk of default will increase in the event of an economic downturn or a substantial increase in interest rates. Each of the Avenue Managers relies primarily on its own evaluation of borrower credit quality rather than on any available independent sources. As a result, the Fund is particularly dependent on the analytical abilities of the Avenue Managers.

The Fund may acquire or hold Senior Loans of borrowers that are experiencing, or are more likely to experience, financial difficulty, including Senior Loans issued to highly leveraged borrowers or borrowers that have filed for bankruptcy protection. Borrowers may have outstanding debt obligations, including Senior Loans, that are rated below investment grade. The Fund may invest a substantial portion of its assets in Senior Loans that are rated below investment grade or that are unrated at the time of purchase but are deemed by the Adviser or Subadviser to be of comparable quality. If a Senior Loan is rated at the time of purchase, the Fund may consider the rating when evaluating the Senior Loan but, in any event, does not view ratings as a determinative factor in investment decisions. As a result, the Fund is dependent on the credit analytical abilities of the Avenue Managers. Because of the protective terms of Senior Loans, the Avenue Managers believe that the Fund is more likely to recover more of its investment in a defaulted Senior Loan than would be the case for most other types of defaulted credit obligations. The values of Senior Loans of borrowers that have filed for bankruptcy protection or that are experiencing payment difficulty could be affected by, among other things, the assessment of the likelihood that the lenders ultimately will receive repayment of the principal amount of such Senior Loans, the likely duration, if any, of a lapse in the scheduled payment of interest and repayment of principal and prevailing interest rates. There is no assurance that the Fund will be able to recover any amount on Senior Loans of such borrowers or that sale of the collateral granted in connection with Senior Loans would raise enough cash to satisfy the borrower's payment obligation or that the collateral can or will be liquidated. In the event of bankruptcy, liquidation may not occur and the bankruptcy court may not give lenders the full benefit of their senior position in the capital structure of the borrower.

The Fund may act as an original lender under Senior Loans or may acquire Senior Loans through assignments or participations. The Fund may make Senior Loans to, or acquire Senior Loans of, borrowers that, at the time of the making or acquisition of the loan by the Fund, are experiencing, or are likely to experience, financial difficulty (including highly leveraged borrowers) and such loans may constitute a material amount of the Fund's portfolio. The Fund will not make Senior Loans to, or acquire Senior Loans of, borrowers that, at the time of the making or acquisition of the loan by the Fund, are in bankruptcy.

If the Fund acquires a Senior Loan through an assignment agreement, it will typically succeed to all the rights and obligations of the assigning institution and become a lender under the credit agreement with respect to the debt

obligation purchased; however, its rights can be more restricted than those of the assigning institution, and, in any event, the Fund may not be able to unilaterally enforce all rights and remedies of the lenders under the loan agreement and with regard to any associated collateral. If the Fund acquires an interest in a Senior Loan through a participation agreement, the Fund will enter into a contractual relationship with the institution selling the

Table of Contents

participation, not with the borrower. In purchasing participations, the Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement or any rights of setoff against the borrower, and the Fund may not directly benefit from the collateral supporting the debt obligation in which it has purchased the participation. As a result, the Fund will be exposed to the credit risk of both the borrower and the institution selling the participation. When purchasing a participation, the applicable Avenue Manager will analyze the credit risk posed by the institution selling the participation. Each of the Avenue Managers relies primarily on its own evaluation of the credit quality of such selling institutions rather than on any available independent sources. As a result, the Fund is particularly dependent on the analytical abilities of the Avenue Managers. Because of the nature of its investments, the Fund may be subject to allegations of lender liability and other claims. See “Risk Factors—Risks Relating to Investing in the Fund’s Common Shares—Lender Liability Risk.” In addition, the Securities Act of 1933, as amended (the “Securities Act”), deems certain persons to be “underwriters” if they purchase a security from an issuer and later sell it to the public. Although it is not believed that the application of this Securities Act provision would cause the Fund to be engaged in the business of underwriting, a person who purchases an instrument from the Fund that was acquired by the Fund from the issuer of such instrument could allege otherwise. Under the Securities Act, an underwriter may be liable for material omissions or misstatements in an issuer’s registration statement or prospectus.

**Below Investment Grade (High-Yield or Junk Bond) Securities Risk.** Fixed income securities rated below investment grade generally offer a higher current yield than that available from higher grade issues, but typically involve greater risk. These securities are especially sensitive to adverse changes in general economic conditions, to changes in the financial condition of their issuers and to price fluctuation in response to changes in interest rates. During periods of economic downturn or rising interest rates, issuers of below investment grade instruments may experience financial stress that could adversely affect their ability to make payments of principal and interest and increase the possibility of default. The secondary market for high-yield securities may not be as liquid as the secondary market for more highly rated securities, a factor which may have an adverse effect on the Fund’s ability to dispose of a particular security. There are fewer dealers in the market for high-yield securities than for investment grade obligations. The prices quoted by different dealers may vary significantly, and the spread between the bid and asked price is generally much larger for high-yield securities than for higher quality instruments. Under continuing adverse market or economic conditions, the secondary market for high-yield securities could contract further, independent of any specific adverse changes in the condition of a particular issuer, and these securities may become illiquid. In addition, adverse publicity and investor perceptions, whether or not based on fundamental analysis, may also decrease the values and liquidity of below investment grade securities, especially in a market characterized by a low volume of trading.

**Foreign Securities Risk.** The Fund will invest in credit obligations, including loans, of issuers that are organized or located in countries other than the United States, including non-U.S. dollar denominated securities. Investing in non-U.S. issuers involves risks, including that non-U.S. issuers may be subject to less rigorous accounting and reporting requirements than U.S. issuers, less rigorous regulatory requirements, different legal systems and laws relating to creditors’ rights, the potential inability to enforce legal judgments, the potential for political, social and economic adversity and currency risk. Currency risk is the risk that fluctuations in the exchange rates between the U.S. dollar and non-U.S. currencies may negatively affect an investment. The value of investments denominated in non-U.S. currencies may fluctuate based on changes in the value of those currencies relative to the U.S. dollar, and a decline in such relative value could reduce the value of such investments held by the Fund.

The foreign securities in which the Fund may invest may be issued by companies or governments located in emerging market countries. Investing in the securities of issuers operating in emerging markets involves a high degree of risk and special considerations not typically associated with investing in the securities of other foreign or U.S. issuers. Compared to the United States and other developed countries, emerging market countries may have relatively unstable governments, economies based on only a few industries and securities markets that trade a small

number of securities. Securities issued by companies or governments located in emerging market countries tend to be especially volatile and may be less liquid than securities traded in developed countries. Securities in these countries have been characterized by greater potential loss than securities of companies and governments located in

Table of Contents

developed countries. Investments in the securities of issuers located in emerging markets could be affected by risks associated with expropriation and/or nationalization, political or social instability, pervasiveness of corruption and crime, armed conflict, the impact on the economy of civil war, religious or ethnic unrest and the withdrawal or non-renewal of any license enabling the Fund to trade in securities of a particular country, confiscatory taxation, restrictions on transfers of assets, lack of uniform accounting and auditing standards, less publicly available financial and other information, diplomatic development which could affect U.S. investments in those countries, and potential difficulties in enforcing contractual obligations.

Since the Fund may invest in credit obligations of foreign issuers denominated in the local currency, changes in foreign currency exchange rates will affect the value of credit obligations in the Fund's portfolio and the unrealized appreciation or depreciation of investments. In addition to changes in the value of the Fund's portfolio investments resulting from currency fluctuations, the Fund may incur costs in connection with conversions between various currencies. The Fund may also invest directly in currencies for hedging purposes. The Fund is subject to the risk that those currencies will decline in value relative to the U.S. dollar. For example, the recent debt crisis in certain European countries could cause the value of the Euro to deteriorate. The values of the currencies of the emerging market countries in which the Fund may invest may be subject to a high degree of fluctuation due to changes in interest rates, the effects of monetary policies of the United States, foreign governments, central banks or supranational entities, the imposition of currency controls or due to other national or global political or economic developments. Foreign exchange dealers realize a profit based on the difference between the prices at which they are buying and selling various currencies. Thus, a dealer normally will offer to sell a foreign currency to the Fund at one rate, while offering a lesser rate of exchange should the Fund desire immediately to resell that currency to the dealer. The Fund will conduct its foreign currency exchange transactions either on a spot (i.e., cash) basis at the spot rate prevailing in the foreign currency exchange market, or through entering into forward, futures or options contracts to purchase or sell foreign currencies. Therefore, the Fund's exposure to foreign currencies may result in reduced returns to the Fund. The Fund may, from time to time, seek to protect the value of some portion or all of its portfolio holdings against currency risks by engaging in currency hedging transactions. Such transactions may include entering into forward currency exchange contracts, currency futures contracts and options on such futures contracts as well as purchasing put or call options on currencies, in U.S. or foreign markets. Currency hedging involves risks, including possible default by the other party to the transaction, illiquidity and, to the extent the view as to certain market movements is incorrect, the risk that the use of hedging could result in losses greater than if they had not been used. In addition, in certain countries in which the Fund may invest, currency hedging opportunities may not be available. The use of currency transactions can result in the Fund incurring losses because of the imposition of exchange controls, suspension of settlements or the inability of the Fund to deliver or receive a specified currency. See "Investment Objectives and Principal Investment Strategy—Foreign Securities."

Investing in Euro-denominated (or other European currency-denominated) securities entails risk of being exposed to a currency that may not fully reflect the strengths and weaknesses of the disparate European economies. In addition, it is possible that the Euro could be abandoned in the future by countries that have already adopted its use. The effects of such an abandonment on the applicable country and the rest of the European Economic and Monetary Union ("EMU") are uncertain but could be negative and severe. Many European countries rely heavily upon export-dependent businesses and any change in the exchange rate between the Euro and the U.S. dollar can have either a positive or a negative effect upon corporate profits and the performance of investments in the European Union. Moreover, as the European debt crisis has progressed, the possibility of one or more European countries exiting the EMU, or even of the collapse of the Euro as a common currency, has arisen. The effects of the collapse of the Euro, or of the exit of one or more countries from the EMU, on the United States and global economy and securities markets are impossible to predict and any such events could have a significant adverse impact on the value and risk profile of the Fund's portfolio.

The Fund computes and expects to continue to distribute its income in U.S. dollars, and the computation of income is made on the date that the income is earned by the Fund at the foreign exchange rate in effect on that date. If the value of the foreign currencies in which the Fund receives its income falls relative to the U.S. dollar between the date of earning of the income and the time at which the Fund converts the foreign currencies to U.S. dollars, the

## Table of Contents

Fund may be required to liquidate securities in order to make distributions if the Fund has insufficient cash in U.S. dollars to meet distribution requirements. See “Distributions” and “Dividend Reinvestment Plan.” The liquidation of investments, if required, may have an adverse impact on the Fund’s performance.

**Risks of Second Lien or Other Subordinated or Unsecured Loans or Debt.** Second lien or other subordinated or unsecured loans or debt generally are subject to similar risks as those associated with investments in Senior Loans. In addition, because second lien or other subordinated or unsecured loans or debt are subordinated in payment and/or lower in lien priority to Senior Loans, they are subject to additional risk that the cash flow of the borrower and property securing the loan or debt, if any, may be insufficient to meet scheduled payments after giving effect to the senior secured obligations of the borrower. This risk is generally higher for subordinated unsecured loans or debt, which are not backed by a security interest in any specific collateral. Second lien or subordinated loans or debt, both secured and unsecured, are expected to have greater price volatility than Senior Loans and may be less liquid. There is also a possibility that originators will not be able to sell participations in second lien loans and subordinated loans or debt, both secured and unsecured, which would create greater credit risk exposure. Second lien or other subordinated or unsecured loans or debt of below investment grade quality share risks similar to those associated with investments in other below investment grade securities and obligations.

**Risks of Structured Products.** The Fund may invest in structured products, including collateralized debt obligations (“CDOs”), collateralized bond obligations (“CBOs”), collateralized loan obligations (“CLOs”), structured notes, credit-linked notes and other types of structured products. Holders of structured products bear risks of the underlying investments, index or reference obligation and are subject to counterparty risk. The Fund may have the right to receive payments to which it is entitled only from the issuer of the structured product, and generally does not have direct rights against the issuer of, or the entity that sold, assets underlying the structured product. While certain structured products enable the investor to acquire interests in a pool of securities without the brokerage and other expenses associated with directly holding such securities, investors in structured products generally pay their share of the structured product’s administrative and other expenses. When investing in structured products, it is impossible to predict whether the underlying indices or prices of the underlying assets will rise or fall, but prices of the underlying indices and assets (and, therefore, the prices of structured products) will be influenced by the same types of political and economic events that affect particular issuers of securities and capital markets generally. Certain structured products may be thinly traded or have a limited trading market and may have the effect of increasing the Fund’s illiquidity to the extent that the Fund, at a particular point in time, may be unable to find qualified buyers for, and may have difficulty valuing, these securities.

CBOs, CLOs and other CDOs are typically privately offered and sold, and thus, are not registered under the securities laws. As a result, investments in CDOs may be characterized by the Fund as illiquid securities; however, an active dealer market may exist for CDOs allowing a CDO to be considered liquid in some circumstances. In addition to the general risks associated with fixed income securities discussed herein, CDOs carry additional risks including, but not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or the collateral may go into default; (iii) the possibility that the CDOs are subordinate to other classes of obligations issued by the same issuer; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

Investments in structured notes involve risks including income risk, credit risk and market risk. Recent market conditions have magnified the risks related to an investment in structured products, including greater volatility, increased lack of liquidity and significant losses in value. Where the return on a structured note held by the Fund is based upon the movement of one or more factors, including currency exchange rates, interest rates, referenced bonds and stock indices, depending on the factor used and the use of multipliers or deflators, changes in interest rates and

movement of the factor may cause significant fluctuations in the price of the structured note. Additionally, changes in the reference instrument or security may cause the interest rate on the structured note to be reduced to zero and any further changes in the reference instrument may then reduce the principal amount payable on maturity. Structured notes may be less liquid than other types of securities and more volatile than the reference instrument or security underlying the note.

Table of Contents

**Counterparty Risk.** Changes in the credit quality of the companies that serve as the Fund's counterparties with respect to derivatives, swaps or other transactions supported by the counterparty's credit will affect the value of those instruments. Certain entities that have served as counterparties in the markets for these transactions have recently incurred significant financial hardships including bankruptcy and losses as a result of exposure to subprime mortgages or other lower quality credit investments that have experienced recent defaults or otherwise suffered extreme credit deterioration. As a result, such hardships have reduced such entities' capital and called into question their continued ability to perform their obligations under such transactions. By using derivatives, swaps or other transactions, the Fund assumes the risk that its counterparties could experience similar financial hardships. In the event of default by, or the insolvency of, a counterparty, the Fund may sustain losses or be unable to liquidate a derivative or swap position. The Fund and the Avenue Managers seek to deal only with counterparties of high creditworthiness. To that end, the Avenue Managers have adopted Broker-Dealer Approval Policies and Procedures that, if applicable, they will follow in considering counterparty creditworthiness. All of the Fund's broker-dealer counterparties (including broker-dealer derivative counterparties) will be subject to approval by the Avenue Managers' risk and compliance groups. The Avenue Managers' risk group will also monitor approved counterparties on an ongoing basis and will evaluate and assess the creditworthiness of these counterparties on a quarterly basis.

**Risks of Swaps.** The Fund may enter into swap transactions, including credit default, total return, index and interest rate swap agreements, as well as options thereon, and may purchase or sell interest rate caps, floors and collars. Such transactions are subject to market risk, risk of default by the other party to the transaction (i.e., counterparty risk), risk of imperfect correlation and manager risk and may involve commissions or other costs. Swaps generally do not involve delivery of securities, other underlying assets or principal. Accordingly, the risk of loss with respect to swaps generally is limited to the net amount of payments that the Fund is contractually obligated to make, or in the case of the other party to a swap defaulting, the net amount of payments that the Fund is contractually entitled to receive. The swap market has grown substantially in recent years with a large number of banks and investment banking firms acting both as principals and as agents utilizing standardized swap documentation. Caps, floors and collars are more recent innovations for which standardized documentation has not yet been fully developed and, accordingly, they are less liquid than swaps. If the Avenue Managers are incorrect in their forecast of market values, interest rates or currency exchange rates, the investment performance of the Fund would be less favorable than it would have been if these investment techniques were not used.

In addition, recent market developments related to swaps have prompted increased scrutiny with respect to these instruments. As a result of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") (which was passed into law in July 2010), swaps may in the future be subject to increased regulation. Such regulation may limit the Fund's ability to use swaps and increase the cost of using swaps.

**Financial Leverage Risk.** The Fund is permitted to obtain leverage using any form or combination of financial leverage instruments, including reverse repurchase agreements, credit facilities such as bank loans or commercial paper, and the issuance of preferred shares or notes. The Fund intends to use leverage opportunistically and may choose to increase or decrease its leverage, or use different types or combinations of leveraging instruments, at any time based on the Fund's assessment of market conditions and the investment environment.

There can be no assurance that a financial leveraging strategy will be utilized by the Fund or that, if utilized, it will be successful during any period in which it is employed. Leverage creates risks for Common Shareholders, including the likelihood of greater volatility of NAV of the Common Shares and market price of, and distributions on, the Common Shares and the risk that fluctuations in the costs to borrow, or in the distribution or interest rates on any preferred shares or notes, may affect the return to Common Shareholders. To the extent the income derived from investments purchased with proceeds received from leverage exceeds the cost of leverage, the Fund's distributions will be greater than if leverage had not been used. Conversely, if the income from the investments purchased with such proceeds is

not sufficient to cover the cost of the financial leverage, the amount available for distribution to Common Shareholders will be less than if leverage had not been used. In the latter case, the Fund may nevertheless maintain its leveraged position if such action is deemed to be appropriate based on market conditions. If preferred shares are used, holders of preferred shares will have rights to elect a minimum of two

Table of Contents

trustees. This voting power may negatively affect Common Shareholders (or the interests of holders of preferred shares may differ from the interests of Common Shareholders). The use of leverage by the Fund may magnify the Fund's losses when there is a decrease in the value of a Fund investment and even totally eliminate the Fund's equity in its portfolio or a Common Shareholder's equity in the Fund. See "Investment Objectives and Principal Investment Strategy—Use of Leverage and Related Risks."

The costs of a financial leverage program (including the costs of offering preferred shares and notes) will be borne by Common Shareholders and consequently will result in a reduction of the NAV of the Common Shares. During periods in which the Fund is using leverage, the fees paid by the Fund for investment advisory services will be higher than if the Fund did not use leverage because the investment advisory fees paid will be calculated on the basis of the Fund's Managed Assets, which includes proceeds from (and assets subject to) reverse repurchase agreements, any credit facility and any issuance of preferred shares or notes, so that the investment advisory fees payable to the Avenue Managers will be higher when leverage is utilized. This will create a conflict of interest between the Avenue Managers, on the one hand, and Common Shareholders, on the other hand. Fees and expenses in respect of financial leverage, as well as the investment advisory fee and all other expenses of the Fund, will be borne entirely by the Common Shareholders, and not by preferred shareholders, noteholders or any other leverage providers.

Any lender in connection with a credit facility may impose specific restrictions as a condition to borrowing. The credit facility fees may include, among other things, up front structuring fees and ongoing commitment fees (including fees on amounts undrawn on the facility) in addition to the traditional interest expense on amounts borrowed. The credit facility may involve a lien on the Fund's assets. The Fund is currently a party to the Credit Facility. See "Investment Objectives and Principal Investment Strategy—Use of Leverage and Related Risks" for more information. Similarly, to the extent the Fund issues preferred shares or notes, the Fund currently intends to seek an AAA or equivalent credit rating from one or more NRSROs on any preferred shares or notes it issues and the Fund may be subject to fees, covenants and investment restrictions required by the NRSRO as a result. Such covenants and restrictions imposed by a NRSRO or lender may include asset coverage or portfolio composition requirements that are more stringent than those imposed on the Fund by the 1940 Act. It is not anticipated that these covenants or restrictions will significantly impede the Avenue Managers in managing the Fund's portfolio in accordance with its investment objectives and policies. Nonetheless, if these covenants or guidelines are more restrictive than those imposed by the 1940 Act, the Fund may not be able to utilize as much leverage as it otherwise could have, which could reduce the Fund's investment returns. See "Description of Capital Structure—Preferred Shares" and "—Credit Facility/Commercial Paper Program/Notes."

The Fund also expects to enter into other transactions that may give rise to a form of leverage including, among others, swaps, futures and forward contracts, options and other derivative transactions. To the extent that the Fund covers its obligations under such other transactions, as described in this prospectus, such transactions should not be treated as borrowings for purposes of the 1940 Act. However, these transactions, even if covered, may represent a form of economic leverage and will create risks. The potential loss on derivative instruments may be substantial relative to the initial investment therein. See "Investment Objectives and Principal Investment Strategy—Portfolio Composition", "—Structured Products", "—Swaps" and "—Other Derivative Instruments"; and "Risk Factors— Risks Relating to Investing in the Fund's Common Shares—Risks of Structured Products", "—Risks of Swaps" and "—Risks of Other Derivative Instruments."

**Risks of Other Derivative Instruments.** The Fund may utilize options, forward contracts, futures contracts and options on futures contracts. These instruments involve risks, including the imperfect correlation between the value of such instruments and the underlying assets, the possible default by the other party to the transaction (i.e., counterparty risk), illiquidity of the derivative instrument and, to the extent the prediction as to certain market movements is incorrect, the risk that the use of such instruments could result in losses greater than if they had not been

used. In addition, transactions in such instruments may involve commissions and other costs, which may increase the Fund's expenses and reduce its return. Amounts paid as premiums and cash or other assets held in margin accounts with respect to such instruments are not otherwise available to the Fund for investment purposes.

Table of Contents

Further, the use of such instruments by the Fund could create the possibility that losses on the instrument would be greater than gains in the value of the Fund's position. In addition, futures and options markets could be illiquid in some circumstances, and certain over-the-counter options could have no markets. As a result, in certain markets, the Fund might not be able to close out a position without incurring substantial losses. To the extent that the Fund utilizes forward contracts, futures contracts or options transactions for hedging, such transactions should tend to minimize the risk of loss due to a decline in the value of the hedged position and, at the same time, limit any potential gain to the Fund that might result from an increase in value of the position. In addition, the daily variation margin requirements for futures contracts create a greater ongoing potential financial risk than would purchases of call options, in which case the exposure is limited to the cost of the initial premium and transaction costs. Losses resulting from the use of hedging will reduce the Fund's NAV of the Common Shares, and possibly income, and the losses can be greater than if hedging had not been used. Forward contracts may limit gains on portfolio securities that could otherwise be realized had they not been utilized and could result in losses. The contracts may also increase the Fund's volatility and may involve a significant amount of risk relative to the investment of cash. The use of put and call options may result in losses to the Fund, force the sale of portfolio securities at inopportune times or for prices other than at current market values, limit the amount of appreciation the Fund can realize on its investments or cause the Fund to hold a security it might otherwise sell. The Fund will be subject to credit risk with respect to the counterparties to any transactions in options, forward contracts, futures contracts or options on futures contracts. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivative contract due to financial difficulties, the Fund may experience significant delays in obtaining any recovery under the derivative contract in bankruptcy or other reorganization proceeding. The Fund may obtain only a limited recovery or may obtain no recovery in such circumstances.

When conducted outside the United States, transactions in options, forward contracts, futures contracts or options on futures contracts may not be regulated as rigorously as in the United States, may not involve a clearing mechanism and related guarantees, and are subject to the risk of governmental actions affecting trading in, or the prices of, foreign securities, currencies and other instruments. The value of such positions also could be adversely affected by: (i) other complex foreign political, legal and economic factors; (ii) lesser availability than in the United States of data on which to make trading decisions; (iii) delays in the Fund's ability to act upon economic events occurring in foreign markets during non-business hours in the United States; (iv) the imposition of different exercise and settlement terms and procedures and margin requirements than in the United States; and (v) lower trading volume and liquidity.

**Non-Diversification Risk.** The Fund is classified as "non-diversified" under the 1940 Act. As a result, it can invest a greater portion of its assets in obligations of a single issuer than a "diversified" fund. The Fund may therefore be more susceptible than a diversified fund to being adversely affected by a single corporate, economic, political or regulatory occurrence. The Fund, however, seeks to satisfy the less stringent diversification requirements of Subchapter M of the Code in order to qualify for the special tax treatment available to regulated investment companies. For a discussion of these diversification requirements, see "Tax Matters—Taxation of the Fund" in the SAI. In addition, because the Fund may invest a high percentage of its assets in a relatively small number of issuers, the Fund is more susceptible to any single economic, market, political or regulatory event affecting those issuers than is a more broadly diversified fund.

**Lender Liability Risk.** A number of U.S. judicial decisions have upheld judgments for borrowers against lending institutions on the basis of various evolving legal theories, collectively termed "lender liability." Generally, lender liability is founded on the premise that a lender has violated a duty (whether implied or contractual) of good faith, commercial reasonableness and fair dealing, or a similar duty owed to the borrower or has assumed an excessive degree of control over the borrower resulting in the creation of a fiduciary duty owed to the borrower or its other creditors or shareholders. Because of the nature of its investments, the Fund may be subject to allegations of lender liability.

In addition, under common law principles that in some cases form the basis for lender liability claims, if a lender or bondholder (a) intentionally takes an action that results in the undercapitalization of a borrower to the detriment of other creditors of such borrower, (b) engages in other inequitable conduct to the detriment of such other

Table of Contents

creditors, (c) engages in fraud with respect to, or makes misrepresentations to, such other creditors or (d) uses its influence as a stockholder to dominate or control a borrower to the detriment of other creditors of such borrower, a court may elect to subordinate the claim of the offending lender or bondholder to the claims of the disadvantaged creditor or creditors, a remedy called “equitable subordination.”

Because affiliates of, or persons related to, the Adviser or the Subadviser may hold equity or other interests in obligors of the Fund, the Fund could be exposed to claims for equitable subordination or lender liability or both based on such equity or other holdings.

**Net Asset Value Discount Risk.** Frequently, shares of closed-end investment companies, such as the Fund, trade at a price below their net asset value, commonly referred to as a “discount.” Historically, shares of closed-end funds have traded at a discount to their net asset value, and the Fund can provide no assurance that its Common Shares will trade at or above their NAV. The Fund’s Common Shares frequently trade at a discount to NAV. Immediately following the offering, the NAV will be reduced by expenses associated with the Offer paid by the Fund (and the NAV will also reflect the fact that the proceeds from the offering were reduced by the sales load). Because the market price of the Fund’s Common Shares may be determined by factors such as NAV, there is an increased risk that the Fund will trade below the Subscription Price and its current NAV for a period following the offering. Therefore, there is an added risk to investors who may sell their Common Shares shortly after the offering. Before making an investment decision, a prospective investor should consider the suitability of this investment with respect to the investor’s investment objectives and personal situation. See “Description of Capital Structure.”

**Manager Risk.** As with any managed fund, neither of the Avenue Managers may be successful in selecting the best-performing investments or investment techniques in managing its respective portion of the Fund’s portfolio, and the Fund’s performance may lag behind that of similar funds. The Adviser has not previously managed a registered investment company.

**Potential Conflicts of Interest Risk.** Because the Avenue Managers may manage assets for other investment companies, pooled investment vehicles and/or other accounts (including institutional clients, pension plans and certain high net worth individuals), there may be an incentive to favor one client over another resulting in conflicts of interest. For instance, the Adviser or the Subadviser may receive fees from certain accounts that are higher than the fees received from the Fund, or receive a performance-based fee on certain accounts. In those instances, the portfolio managers may have an incentive to favor the higher and/or performance-based fee accounts over the Fund. In addition, a conflict of interest could exist to the extent the Adviser or the Subadviser has proprietary investments in certain accounts, where portfolio managers have personal investments in certain accounts or when certain accounts are investment options in the Adviser’s or the Subadviser’s employee benefits plans. The Avenue Managers may have an incentive to favor these accounts over the Fund. If the Adviser or the Subadviser manages accounts that engage in short sales of (or otherwise take short positions in) securities or other instruments of the type in which the Fund invests, the Adviser or the Subadviser could be seen as harming the performance of the Fund for the benefit of the accounts taking short positions, if such short positions cause the market value of the securities to fall.

Conflicts of interest may arise where the Fund and other funds managed by the Avenue Managers or other affiliates of Avenue Capital Group simultaneously hold securities representing different parts of the capital structure of a stressed or distressed issuer. In such circumstances, decisions made with respect to the securities held by one fund may cause (or have the potential to cause) harm to the different class of securities of the issuer held by other funds (including the Fund). For example, if such an issuer goes into bankruptcy or reorganization, becomes insolvent or otherwise experiences financial distress or is unable to meet its payment obligations or comply with covenants relating to credit obligations held by the Fund or by the other Avenue funds, such other funds may have an interest that conflicts with the interests of the Fund. If additional financing for such an issuer is necessary as a result of financial or other

difficulties, it may not be in the best interests of the Fund to provide such additional financing, but if the other Avenue funds were to lose their respective investments as a result of such difficulties, an Avenue Manager may have a conflict in recommending actions in the best interests of the Fund. Also, conflicts of interest may arise where the Fund and other funds managed by the Avenue Managers or other affiliates of Avenue

## Table of Contents

Capital Group hold different investment positions with respect to the same issuer, and a decision that benefits one fund may potentially harm other funds (including the Fund). In such situations the Avenue Managers will seek to act in the best interests of their clients and will seek to resolve such conflicts in accordance with their compliance procedures.

In addition, the 1940 Act limits the Fund's ability to enter into certain transactions with certain affiliates of the Avenue Managers. As a result of these restrictions, the Fund may be prohibited from buying or selling any security directly from or to any portfolio company of a fund managed by an Avenue Manager or one of its affiliates. Nonetheless, the Fund may under certain circumstances purchase any such portfolio company's loans or securities in the secondary market, which could create a conflict for the Avenue Managers between the interests of the Fund and the portfolio company, in that the ability of the Avenue Managers to recommend actions in the best interest of the Fund might be impaired. The 1940 Act also prohibits certain "joint" transactions with certain of the Fund's affiliates (which includes other funds managed by the Avenue Capital Group), which could be deemed to include certain types of investments, or certain types of restructurings of investments, in the same portfolio company (whether at the same or different times). These limitations may limit the scope of investment opportunities that would otherwise be available to the Fund.

Although the professional staff of the Avenue Managers will devote as much time to the management of the Fund as the Avenue Managers deem appropriate to perform their duties in accordance with the investment advisory and subadvisory agreements and in accordance with reasonable commercial standards, the professional staff of the Avenue Managers may have conflicts in allocating their time and services among the Fund and the Avenue Managers' other investment vehicles and accounts. The Avenue Managers and their affiliates are not restricted from forming additional investment funds, from entering into other investment advisory relationships or from engaging in other business activities, even though such activities may be in competition with the Fund and/or may involve substantial time and resources of the Avenue Managers and their professional staff. These activities could be viewed as creating a conflict of interest in that the time and effort of the members of the Avenue Managers and their officers and employees will not be devoted exclusively to the business of the Fund but will be allocated between the business of the Fund and the management of the assets of other clients of the Avenue Managers.

The Avenue Managers or their respective members, officers, directors, employees, principals or affiliates may come into possession of material, non-public information. The possession of such information may limit the ability of the Fund to buy or sell a security or otherwise to participate in an investment opportunity. Situations may occur where the Fund could be disadvantaged because of the investment activities conducted by the Avenue Managers for other clients.

**Limited Operating History.** The Fund is a recently organized, closed-end management investment company, which commenced operations on January 27, 2011. As such it has a limited operating history and is designed for long-term investors and not as a trading vehicle. The Fund's Common Shares may trade at a price that is less than their Subscription Price.

**Repurchase Agreements and Reverse Repurchase Agreements Risk.** The Fund may invest in repurchase agreements and reverse repurchase agreements. In its purchase of repurchase agreements, the Fund does not bear the risk of a decline in the value of the underlying security unless the seller defaults under its repurchase obligation. In the event of the bankruptcy or other default of a seller of a repurchase agreement, the Fund could experience both delays in liquidating the underlying securities and losses, including possible decline in the value of the underlying security during the period while the Fund seeks to enforce its rights thereto, possible lack of access to income on the underlying security during this period, and expenses of enforcing its rights. A repurchase agreement effectively represents a loan from the Fund to the seller under the agreement.

The Fund's use of reverse repurchase agreements involve many of the same risks involved in the Fund's use of financial leverage, as the proceeds from reverse repurchase agreements generally will be invested in additional securities. There is a risk that the market value of the securities acquired in the reverse repurchase agreement may decline below the price of the securities that the Fund has sold but remains obligated

Table of Contents

to repurchase. In addition, there is a risk that the market value of the securities retained by the Fund may decline. If the buyer of securities under a reverse repurchase agreement were to file for bankruptcy or experience insolvency, the Fund may be adversely affected. Also, in entering into reverse repurchase agreements, the Fund would bear the risk of loss to the extent that the proceeds of the reverse repurchase agreement are less than the value of the underlying securities. In addition, due to the interest costs associated with reverse repurchase agreements, the Fund's NAV of the Common Shares will decline, and, in some cases, the investment performance of the Fund would be less favorable than it would have been if the Fund had not used such instruments. A reverse repurchase agreement effectively represents a loan from the buyer to the Fund under the agreement.

**Certain Affiliations Risk.** Certain broker-dealers, including major ones, may be considered to be affiliated persons of the Fund or the Avenue Managers. Absent an exemption from the SEC or other regulatory relief, the Fund is generally precluded from effecting certain principal transactions with affiliated brokers, and its ability to purchase securities being underwritten by an affiliated broker or syndicate including an affiliated broker or to utilize affiliated brokers for agency transactions is subject to restrictions. This could limit the Fund's ability to engage in securities transactions and take advantage of market opportunities.

Table of Contents

## Fund Expenses

Common Shareholder transaction expenses		
Sales load (as a percentage of the Subscription Price)(1)	3.75	%
Offering expenses (as a percentage of the Subscription Price)(1)	1.03	%
Dividend reinvestment plan fees	None(2)	)
Annual expenses (as a Percentage of Net Assets Attributable to Common Shares(4))		
Advisory fee(4)	1.88	%
Interest expenses on bank borrowings(3)	.63	%
Other expenses(5)	.79	%
Total annual expenses(6)	3.30	%
Less: expense reimbursement(7)	(.28)	%)
Total annual expenses after expense reimbursement(5)	3.02	%

The purpose of the tables above and the example below is to help you understand the fees and expenses that you, as an investor in the Fund through the exercise of Rights, would bear directly or indirectly. The expenses shown in the table under “Other expenses”, are estimated for the Fund’s current fiscal year, based on the Fund’s annualized expenses during the period from January 27, 2011 (the date of the Fund’s commencement of operations) through October 31, 2011 and assume that the Fund issues approximately 2,450,466 Common Shares in this Offer. The expenses shown in the table under “Interest expenses on bank borrowings”, “Total annual expenses” and “Total annual expenses after expense reimbursement” are estimated based on the Fund’s average net assets for the period January 27, 2011 (date of commencement of operations) through October 31, 2011 of \$132,480,386. The tables also reflect the estimated use of leverage by the Fund through bank borrowings representing in the aggregate 331/3% of the Fund’s total assets (including the assets subject to, and obtained with the proceeds of, such borrowings), and show Fund expenses as a percentage of net assets attributable to Common Shares.

(1) The Fund has agreed to pay the Dealer Manager for its financial structuring and solicitation services a fee equal to 3.75% of the aggregate Subscription Price for the Common Shares issued pursuant to the Offer (i.e., the sales load) and to reimburse the Dealer Manager for its out-of-pocket expenses up to \$100,000. In addition, the Fund has agreed to pay a fee to each of the Subscription Agent and the Information Agent estimated to be \$30,000 and \$16,000, respectively, plus reimbursement for their out-of-pocket expenses related to the Offer. Total offering expenses (not including the sales load) are estimated to be \$400,000, which assumes that the Offer is fully subscribed. The fee paid to the Dealer Manager is reflected in the table under “Sales load” and the other fees and expenses described in this note are reflected in the table under “Offering expenses.” The sales load and the offering expenses will be borne by the Fund and indirectly by all of the Fund’s Common Shareholders, including those who do not exercise their Rights and will result in a reduction of the NAV of the Common Shares. See “Distribution Arrangements.”

(2) You will pay a brokerage commission if you direct the Plan Agent (as defined under “Dividend Reinvestment Plan”) to sell your Common Shares held in a dividend reinvestment account.

(3) For the period March 16, 2011 (the date of the initial drawdown) through October 31, 2011, the Fund had approximately \$43,313,043 in average daily borrowings outstanding under its Credit Facility (representing approximately 25% of the average daily value of the Fund’s total assets during such period) at an average annual

interest rate of 1.25%. For purposes of preparing this table, the Fund has assumed that it will use leverage through bank borrowings representing in the aggregate 331/3% of the Fund's total assets (including the assets subject to, and obtained with the proceeds of, such borrowings) at terms similar to the existing Credit Facility. There can be no assurances that the Fund will be able to obtain such level of borrowing (or to maintain its current level of borrowing), that the terms under which the Fund borrows will not change, or that the Fund's use of leverage will be profitable. The Fund currently intends during the next twelve months (i) to maintain a similar proportionate amount

Table of Contents

of borrowings but may increase such amount to 331/3% of the average daily value of the Fund's total assets and (ii) not to issue preferred shares.

(4) The Adviser receives a monthly fee at an annual rate of 1.25% of the average daily value of the Fund's Managed Assets. The advisory fee percentage calculation assumes the use of leverage by the Fund as discussed in note (3). To derive the annual advisory fee as a percentage of the Fund's net assets (which are the Fund's total assets less all of the Fund's liabilities), the Fund's average Managed Assets for the period January 27, 2011 (date of commencement of operations) through October 31, 2011 (plus (i) the estimated proceeds of this Offer if fully subscribed as described in note (6) and (ii) leverage in the amount of 331/3% of such proceeds) were multiplied by the annual advisory fee rate and then divided by the Fund's average net assets for the same period (plus the estimated proceeds of this Offer if fully subscribed as described in note (6)).

(5) Does not include the sales load or other expenses of the Fund incurred in connection with the Offer, estimated at \$1,460,171 and \$400,000, respectively. However, these expenses will be borne by all holders of the Common Shares, including those who do not exercise their Rights, and result in a reduction of the NAV of the Common Shares.

(6) The indicated 3.30% expense ratio assumes that the Offer is fully subscribed, yielding estimated net proceeds of approximately \$37,077,733 (assuming a Subscription Price of \$15.89 as of February 2, 2012), and that, as a result, based on the Fund's average net assets for the period January 27, 2011 (date of commencement of operations) through October 31, 2011 of \$132,480,386, the net assets attributable to Common Shareholders would be \$169,558,119 upon completion of the Offer. It also assumes that net assets attributable to Common Shareholders will not increase or decrease due to currency fluctuations. If the Offer is not fully subscribed, or if the Fund increases the amount of money that it borrows, the amount of expenses borne by the Fund's Common Shareholders will increase.

(7) The Adviser has contractually agreed to reimburse the Fund so that total other expenses (as a percentage of net assets attributable to Common Shares of the Fund ) are limited to 0.50% until March 1, 2013 (excluding (i) interest, taxes, brokerage commissions and expenditures capitalized in accordance with generally accepted accounting principles, (ii) portfolio transactions and investment related expenses and (iii) extraordinary expenses not incurred in the ordinary course of the Fund's business). The Fund may repay any such reimbursement from the Adviser if, within three years of the reimbursement, the Fund could repay the Adviser without causing the Fund's total other expenses (as a percentage of net assets attributable to Common Shares of the Fund) to exceed 0.50% for the fiscal year in which such repayment would occur when such amount repaid to the Adviser is included in the Fund's total other expenses. During the Fund's first fiscal year (period ending October 31, 2011), the Adviser reimbursed the Fund \$502,176 and, during the current fiscal year (period ending October 31, 2012), the Adviser as of January 31, 2012 has reimbursed the Fund \$159,202. Under the terms of such reimbursement agreement, if the Fund's expense ratio declines sufficiently, the Fund may be liable to the Adviser to repay such reimbursed amounts until (i) no later than October 31, 2014, in the case of amounts reimbursed during the first fiscal year and (ii) no later than January 31, 2015, in the case of amounts reimbursed during the current fiscal year, as of January 31, 2012. Thus, until those amounts are repaid, the Fund and the Common Shareholders will not enjoy any benefit of any reduced expenses per Common Share that may result from the Offer. Because interest expenses are not subject to the reimbursement agreement, interest expenses are included in the "Total annual expenses after expense reimbursement" line item.

The Fund's current reimbursement agreement commenced on January 19, 2011 and expires on February 29, 2012. As of December 8, 2011, the Fund and the Adviser entered into an agreement that extends the terms of the current reimbursement agreement for the period March 1, 2012 through February 28, 2013.

Example

Edgar Filing: Avenue Income Credit Strategies Fund - Form N-2/A

An investor would directly or indirectly pay the following expenses on a \$1,000 investment in the Fund, assuming a 5% annual return. This example assumes that (i) all dividends and other distributions are reinvested at NAV, (ii) the percentage amounts listed under “Annual expenses” above remain the same in the years shown, (iii) the expense

Table of Contents

reimbursement agreement is only in effect in year 1, and (iv) the Offer is fully subscribed as described in note (6) above. This example reflects all recurring and non-recurring fees, including payment of the 3.75% sales load and other expenses incurred in connection with the Offer. For more complete descriptions of certain of the Fund's costs and expenses, see "Management of the Fund—Advisory Agreement and Subadvisory Agreement."

The example should not be considered a representation of future expenses or rate of return and actual Fund expenses may be greater or less than those shown.

## Financial Highlights

The following is the selected financial data per Common Share throughout the period January 27, 2011 (commencement of operations) through the fiscal period ended October 31, 2011, which have been audited by PricewaterhouseCoopers LLP, the Fund's independent registered public accounting firm. This information should be read in conjunction with the audited financial statements and accompanying notes thereto for the period ended October 31, 2011 and the accompanying notes thereto, which are incorporated by reference in this prospectus.

	For the Period ended October 31, 2011
Per Common Share operating performance	
Net asset value, beginning of period	\$19.101
Income (loss) from investment operations:	
Net investment income <sup>2</sup>	1.01
Net realized and unrealized gain (loss)	(1.94)
Total from investment operations	(0.93)
Distributions to Common Shareholders from:	
Net investment income	(0.91)
Total distributions	(0.91)
Capital Share Transactions	
Offering costs charged to paid-in-capital	\$(0.04)
Net asset value, end of period	\$17.22
Market value, end of period	\$16.40
Total return on net asset value	(5.12)% <sup>3,4</sup>
Total return on market value	(13.71)% <sup>3,4</sup>
Net assets, end of period (in 000's)	\$126,587
Ratio of expenses to average net assets	2.50% <sup>5</sup>
Ratio of expenses to average net assets excluding interest expense and commitment fee and loan servicing fees	2.09% <sup>5</sup>
Ratio of net investment income to average net assets	7.28% <sup>5</sup>
Supplemental Information on Ratios to Average Net Assets	
Ratios before expense limitation:	
Ratio of expenses to average net assets	3.00% <sup>5</sup>
Ratio of net investment income to average net assets	6.78% <sup>5</sup>
Portfolio turnover rate	56%
Loans Outstanding, End of Period (000s)	\$43,000
Asset Coverage per \$1,000 unit of senior indebtedness <sup>6</sup>	\$ 3,944

---

1. Net asset value at beginning of period reflects the deduction of the underwriters' discount of \$0.90 per Common Share from the \$20.00 offering price.

2. Per Common Share amounts have been calculated using average Common Shares outstanding.

3. Not annualized.

4.

Edgar Filing: Avenue Income Credit Strategies Fund - Form N-2/A

Total market value return is computed based upon the NYSE market price of the Fund's Common Shares and excludes the effects of brokerage commissions. Total net asset value return measures the changes in value over the period indicated, taking into account dividends as reinvested. Dividends and distributions are assumed for purposes of these calculations to be reinvested at prices obtained under the Fund's dividend reinvestment plan.

5. Annualized.
6. Calculated by subtracting the Fund's total liabilities (not including borrowings) from the Fund's total assets and dividing by the total number of senior indebtedness units, where one unit equals \$1,000 of senior indebtedness.

Note: Contained above is operating performance for a Common Share outstanding, total investment return, ratios to average net assets of Common Shareholders and other supplemental data for the period indicated. This information has been determined based upon financial information provided in the financial statements and market value data for the Fund's Common Shares.

Table of Contents

The Offer

Purpose of the Offer

The board of trustees of the Fund (the “Board”), based on the recommendations and presentations of Avenue Capital Management II, L.P., the Fund’s investment adviser (the “Adviser”), and Avenue Europe International Management, L.P., the Fund’s subadviser (the “Subadviser,” and together with the Adviser, the “Avenue Managers”) and others, has determined that it is in the best interests of the Fund and its Common Shareholders to increase the assets of the Fund available for investment and thereby to conduct the Offer. In making this determination, the Board considered a number of factors, including potential benefits and costs. In particular, the Board considered the Avenue Managers’ belief that the Offer would better enable the Fund to take advantage more fully of existing and future investment opportunities that may be or may become available, consistent with the Fund’s primary investment objective to seek a high level of current income with a secondary objective of capital appreciation.

In this regard, the Avenue Managers believe that a variety of factors indicate that there may be a robust opportunity to invest in U.S. and European high yield and leveraged loan instruments. Due to a combination of macroeconomic developments in the United States and Europe and the Avenue Managers’ credit analysis of companies in those underlying geographies, the Avenue Managers believe that now may be an opportune time for the Fund to raise additional assets and to seek attractive investment opportunities which may enhance the Fund’s prospective risk-adjusted returns. In addition, the Avenue Managers expect that a number of upcoming U.S. high yield bond and institutional maturities in a less than favorable capital markets environment may create investment opportunities for the Fund. Further, the Avenue Managers expect that the European sovereign debt crisis and potential European bank deleveraging may force these institutions to sell assets and enable the Fund to take advantage of such opportunities. Using the proceeds of the Offer, the Fund will seek to capitalize on these developments and enhance its returns by making investments in companies the Avenue Managers believe offer attractive opportunities for yield enhancement and/or net asset value appreciation potential. In making such investments, the Fund will seek to capitalize on market inefficiencies and to reallocate the portfolio of the Fund to opportunistically emphasize those investments, geographies and categories of investments believed to be best suited to the current investment and interest rate environment and market outlook.

In making its determination that the Offer is in the best interests of the Fund and its Common Shareholders, the Board considered (in addition to the Avenue Managers’ belief as to the potential investment opportunity) various factors, including (i) the size, pricing and structure of the Offer, (ii) that the Offer, if it is well-subscribed, could increase the liquidity of the Common Shares on the NYSE, where the Fund’s Common Shares are traded; (iii) the opportunity the Offer represents for current shareholders to buy shares at a discount to net asset value or market price, or, in many cases, both; (iv) the costs of the Offer, including dilution of Common Shareholders’ interests through the Offer and fees paid to the Dealer Manager; and (v) the possible negative effect on the market price of Common Shares the Offer may have. There can be no assurance that the Offer (or the investment of the proceeds of the Offer) will be successful or that, by increasing the size of the Fund, its expense ratio will be lowered or that the level of trading of our Common Shares on the NYSE will increase. For a discussion of the potential impact of the Offer on current Common Shareholders, such as dilution, see “Risk Factors.”

The Offer seeks to provide an opportunity to existing Common Shareholders to purchase Common Shares at a discount to market price. The distribution to Common Shareholders of transferable Rights, which may themselves have intrinsic value, also will afford non-participating Common Shareholders of record on the Record Date, the potential of receiving cash payment upon the sale of the Rights, receipt of which may be viewed as partial compensation for any dilution of their interests that may occur as a result of the Offer.

The Avenue Managers expect that the Offer will provide an opportunity to increase the assets of the Fund available for investment, thereby better enabling the Fund to take advantage more fully of existing and future investment opportunities that may be or may become available, consistent with the Fund's primary investment objective to seek a high level of current income with a secondary objective of capital appreciation. The Avenue Managers and its affiliates have an inherent conflict of interest in recommending the Offer because the Fund pays

## Table of Contents

fees to the Avenue Managers based on a percentage of the Fund's Managed Assets (the greater the Managed Assets of the Fund, the greater the compensation paid to the Avenue Managers and their affiliates).

### Structure of the Offer

The Board retained UBS Securities LLC, the Dealer Manager for the Offer, to provide the Fund with financial structuring and solicitation services relating to the Offer, including advice with respect to the structure, timing and terms of the Offer. In determining the structure of the Offer, the Board considered, among other things, the extent of dilution and expenses of the Offer (including the fees to be paid to the Dealer Manager), the trading market described by the Dealer Manager, using a fixed pricing versus variable pricing mechanism, the benefits and drawbacks of conducting a non-transferable versus a transferable rights offering, the effect on the Fund and its existing Common Shareholders if the Offer is not fully subscribed and the experience of the Dealer Manager in conducting rights offerings.

ALTHOUGH THE FUND HAS NO PRESENT INTENTION TO DO SO, THE FUND MAY, IN THE FUTURE AND IN ITS DISCRETION, CHOOSE TO MAKE ADDITIONAL RIGHTS OFFERINGS FROM TIME TO TIME FOR A NUMBER OF SHARES AND ON TERMS WHICH MAY OR MAY NOT BE SIMILAR TO THE OFFER. ANY SUCH FUTURE RIGHTS OFFERING WILL BE MADE IN ACCORDANCE WITH THE 1940 ACT.

### Important Terms of the Offer

The Fund is issuing to Record Date Common Shareholders transferable Rights to subscribe for an aggregate of 2,450,466 Common Shares. Each Record Date Common Shareholder is being issued one transferable Right for each whole Common Share owned on the Record Date. The Rights entitle each Record Date Common Shareholder to acquire one Common Share at the Subscription Price for every three Rights held (1-for-3). Rights may be exercised at any time during the subscription period, which commences on February 24, 2012, the Record Date, and ends at 5:00 p.m., New York City time, on March 23, 2012, the Expiration Date, unless extended by the Fund.

The Rights are transferable and will be listed for trading on the NYSE under the symbol "ACP RT" during the course of the Offer. Trading in the Rights on the NYSE is expected to be conducted until the close of trading on the NYSE on the last business day prior to the Expiration Date. See "—Transferability and Sale of Rights" below. The Common Shares, once issued, will be listed on the NYSE under the symbol "ACP." The Rights will be evidenced by subscription certificates which will be mailed to Record Date Common Shareholders, except as discussed below under "— Foreign Common Shareholders."

The Fund will not issue fractional Common Shares upon the exercise of Rights; accordingly, Rights may be exercised only in multiples of three, except that any Record Date Common Shareholder who is issued fewer than three Rights will be able to subscribe for one Common Share. Record Date Common Shareholders who hold two or more accounts may not combine their fractional interests across accounts.

The Rights are transferable. Rights holders who are not Record Date Common Shareholders may purchase Common Shares as described above (the "Primary Subscription"), but are not entitled to subscribe for Common Shares pursuant to the Over-Subscription Privilege. Record Date Common Shareholders and Rights holders who purchase Common Shares in the Primary Subscription and Record Date Common Shareholders who purchase Common Shares pursuant to the Over-Subscription Privilege are hereinafter referred to as "Exercising Rights Holders."

Common Shares not subscribed for during the Primary Subscription will be offered, by means of the Over-Subscription Privilege, to Record Date Common Shareholders who fully exercise the Rights issued to them pursuant to the Offer (other than those Rights to acquire less than one Common Share, which cannot be exercised) and who wish to acquire more than the number of Common Shares they are entitled to purchase pursuant to the exercise of their Rights, subject to certain limitations and subject to allotment. Investors who are not Record Date Common Shareholders are not entitled to subscribe for any Common Shares pursuant to the Over-Subscription Privilege. See “—Over-Subscription Privilege” below.

## Table of Contents

For purposes of determining the number of Common Shares a Record Date Common Shareholder may acquire pursuant to the Offer, broker-dealers, trust companies, banks or others whose Common Shares are held of record by Cede & Co. (“Cede”) or by any other depository or nominee will be deemed to be the holders of the Rights that are issued to Cede or the other depository or nominee on their behalf.

Rights may be exercised by completing a subscription certificate and delivering it, together with payment at the estimated Subscription Price, to the Subscription Agent. A Rights holder will have no right to rescind a purchase after the Subscription Agent has received a completed subscription certificate together with payment for the Common Shares offered pursuant to the Offer, except as provided under “—Notice of NAV Decline.” Rights holders who exercise their Rights will not know at the time of exercise the Subscription Price of the Common Shares being acquired and will be required initially to pay for both the Common Shares subscribed for during the subscription period and, if eligible, any additional Common Shares subscribed for pursuant to the Over-Subscription Privilege at the estimated Subscription Price of \$[\_\_\_] per Common Share. The Fund will pay a sales load on the Subscription Price. For a discussion of the method by which Rights may be exercised and Common Shares paid for, see “The Offer—Methods for Exercising Rights” and “The Offer—Payment for Common Shares.”

There is no minimum number of Rights which must be exercised in order for the Offer to close. The Fund will bear the expenses of the Offer, which will be paid from the proceeds of the Offer. These expenses include, but are not limited to, the expenses of preparing and printing the prospectus for the Offer, the Dealer Manager fee, and the expenses of Fund counsel and the Fund’s independent registered public accounting firm in connection with the Offer.

### Subscription Price

The Subscription Price for the Common Shares to be issued pursuant to the Offer will be determined based upon the Formula Price. If, however, the Formula Price is less than 80% of the Fund’s NAV of the Common Shares at the close of trading on the NYSE on the Expiration Date, then the Subscription Price will be 80% of the Fund’s NAV of the Common Shares at the close of trading on the NYSE on that day. The Fund will pay a sales load on the Subscription Price. For example, assuming the Expiration Date were February 2, 2012, if the average of the last reported sale prices of a Common Share on the NYSE on the Expiration Date and the preceding four (4) trading days is \$17.65, the Subscription Price would be \$15.89 per Common Share (90% of \$17.65). Since the Expiration Date will be March 23, 2012 (unless the Fund extends the subscription period), Rights holders will not know the Subscription Price at the time of exercise and will be required initially to pay for both the Common Shares subscribed for pursuant to the Primary Subscription and, if eligible, any additional Common Shares subscribed for pursuant to the Over-Subscription Privilege at the estimated Subscription Price of \$15.89 per Common Share. See “—Payment for Common Shares” below. Rights holders who exercise their Rights will have no right to rescind a purchase after receipt of their completed subscription certificates together with payment for Common Shares by the Subscription Agent. The Fund does not have the right to withdraw the Rights or cancel the Offer after the Rights have been distributed. All of the costs of the Offer will be borne by the Fund’s Common Shareholders.

The Fund announced the terms of the Offer after the close of trading on the NYSE on February 13, 2012. The NAV of the Fund’s Common Shares at the close of business on February 10, 2012 (the last trading date on which the Fund publicly reported its NAV prior to the announcement), and on [\_\_\_\_\_], 2012 (the date of this prospectus) was \$17.86 and \$[\_\_\_], respectively, and the last reported sales price of a Common Share on the NYSE on those dates was \$17.88 and \$[\_\_\_], respectively.

### Over-Subscription Privilege

Common Shares not subscribed for by Rights holders (the “Excess Common Shares”) will be offered, by means of the Over-Subscription Privilege, to the Record Date Common Shareholders who have fully exercised the Rights issued to them (other than those Rights that cannot be exercised because they represent the right to acquire less than one Common Share) and who wish to acquire more than the number of Common Shares they are entitled to purchase pursuant to the Primary Subscription. Record Date Common Shareholders should indicate on the subscription certificate, which they submit with respect to the exercise of the Rights issued to them, how many Excess Common Shares they are willing to acquire pursuant to the Over-Subscription Privilege. If sufficient Excess Common Shares remain, all such Record Date Common Shareholders’ over-subscription requests will be honored in

## Table of Contents

full. If requests from such Record Date Common Shareholders for Common Shares pursuant to the Over-Subscription Privilege exceed the Excess Common Shares available, the available Excess Common Shares will be allocated pro rata among Record Date Common Shareholders who oversubscribe based on the number of Rights originally issued to such Record Date Common Shareholders. The percentage of remaining Common Shares each over-subscribing Record Date Common Shareholder may acquire will be rounded down to result in delivery of whole Common Shares. The allocation process may involve a series of allocations to assure that the total number of Common Shares available for over-subscriptions is distributed on a pro rata basis.

Banks, broker-dealers, trustees and other nominee holders of Rights will be required to certify to the Subscription Agent, before any Over-Subscription Privilege may be exercised with respect to any particular beneficial owner, as to the aggregate number of Rights exercised pursuant to the Primary Subscription and the number of Common Shares subscribed for pursuant to the Over-Subscription Privilege by such beneficial owner and that such beneficial owner's Primary Subscription was exercised in full. Nominee Holder Over-Subscription Forms and Beneficial Owner Certification Forms will be distributed to banks, brokers, trustees and other nominee holders of Rights with the subscription certificates.

The Fund will not offer or sell any Common Shares that are not subscribed for pursuant to the Primary Subscription or the Over-Subscription Privilege.

### Expiration of the Offer

The Offer will expire at 5:00 p.m., New York City time, on March 23, 2012, the Expiration Date, unless extended by the Fund.

Rights will expire without value on the Expiration Date (including any extension); they may not be exercised thereafter. Any extension of the Offer will be followed as promptly as practicable by announcement thereof, and in no event later than 9:00 a.m., New York City time, on the next business day following the previously scheduled Expiration Date. Without limiting the manner in which the Fund may choose to make such announcement, the Fund will not, unless otherwise required by law, have any obligation to publish, advertise or otherwise communicate any such announcement other than by making a release to the Dow Jones News Service or such other means of announcement as the Fund deems appropriate. The Fund may extend the Offer in its sole discretion for any reason, including as a result of a decline in the Fund's NAV as described below in "—Notice of NAV Decline."

### Transferability and Sale of Rights

The Rights are transferable until the last business day prior to the Expiration Date, which is March 22, 2012, unless extended. We may, however, extend the expiration of the Offer.

The Rights are transferable and will be listed for trading on the NYSE under the symbol "ACP RT" during the course of the Offer. The Rights will be admitted for trading on the NYSE on a when-issued basis from February 21, 2012 through February 28, 2012; thereafter, they will trade the regular way through March 22, 2012 (one (1) business day prior to the Expiration Date (including extensions)). You are encouraged to contact your broker, bank or financial adviser for more information about trading the Rights. We will seek to ensure that an adequate trading market for the Rights will exist by requesting that the Rights be traded on the NYSE and by retaining the Dealer Manager, the Subscription Agent and the Information Agent, but we cannot assure you that a market for the Rights will develop. Assuming a market exists for the Rights, you may purchase and sell the Rights through the usual brokerage channels or sell the Rights through the Subscription Agent.

### Sales through the Subscription Agent

Record Date Common Shareholders who do not wish to exercise any or all of their Rights may instruct the Subscription Agent to try to sell any Rights they do not intend to exercise themselves. Subscription certificates evidencing the Rights to be sold by the Subscription Agent must be received by the Subscription Agent on or before 5:00 p.m., New York City time, on March 21, 2012 (or, if the subscription period is extended, on or before 5:00 p.m., New York City time, two (2) business days prior to the extended Expiration Date). Upon the timely receipt by the Subscription Agent of appropriate instructions to sell Rights, the Subscription Agent will ask the Dealer Manager if it will purchase the Rights. If the Dealer Manager purchases the Rights, the sales price paid by the Dealer Manager will be based upon the then current market price for the Rights. The proceeds from each of such sales to the Dealer Manager will be remitted to the Subscription Agent, which will hold such proceeds in an account segregated from the Subscription Agent's own funds pending distribution to each selling Record Date Common Shareholder. It is expected that following each such sale of Rights to the Dealer Manager, the proceeds from each such sale will be received by the Subscription Agent within three (3) business days of the sale and that the proceeds will then be remitted to the selling Record Date Common Shareholder within three (3) business days of receipt by the Subscription Agent.

If the Dealer Manager declines to purchase the Rights of a Record Date Common Shareholder that have been duly submitted to the Subscription Agent for sale, the Subscription Agent will attempt to sell such Rights in the open market. If the Rights can be sold in such manner, all of such sales will be deemed to have been effected at the weighted-average price of all Rights sold by the Subscription Agent in such open market transactions throughout the subscription period. The proceeds from such sales will be held by the Subscription Agent in an account segregated from the Subscription Agent's own funds pending distribution to the selling Record Date Common Shareholders. It is expected that the proceeds of such open market sales will be remitted by the Subscription Agent to the selling Record Date Common Shareholders within five (5) business days following the Expiration Date.

The Subscription Agent will also attempt to sell (either to the Dealer Manager or in open market transactions as described above) all Rights which remain unclaimed as a result of subscription certificates being returned by the postal authorities to the Subscription Agent as undeliverable as of the fourth (4th) business day prior to the Expiration Date. The Subscription Agent will hold the proceeds from those sales in an account segregated from the Subscription Agent's own funds for the benefit of such non-claiming Record Date Common Shareholders until such proceeds are either claimed or revert to the state.

## Table of Contents

There can be no assurance that the Subscription Agent will be able to sell any Rights, and neither the Fund nor the Subscription Agent has guaranteed any minimum sales price for the Rights. If a Record Date Common Shareholder does not utilize the services of the Subscription Agent and chooses to use another broker-dealer or other financial institution to sell Rights, then the other broker-dealer or financial institution may charge a fee to sell the Rights.

### Other Transfers

The Rights evidenced by a subscription certificate may be transferred in whole by endorsing the subscription certificate for transfer in accordance with the accompanying instructions. A portion of the Rights evidenced by a single subscription certificate (but not fractional Rights) may be transferred by delivering to the Subscription Agent a subscription certificate properly endorsed for transfer, with instructions to register such portion of the Rights evidenced thereby in the name of the transferee and to issue a new subscription certificate to the transferee evidencing such transferred Rights. In such event, a new subscription certificate evidencing the balance of the Rights, if any, will be issued to the Record Date Common Shareholder or, if the Record Date Common Shareholder so instructs, to an additional transferee. The signature on the subscription certificate must correspond to the name as set forth upon the face of the subscription certificate in every particular, without alteration or enlargement, or any change. A signature guarantee must be provided by an eligible financial institution as defined in Rule 17Ad-15 under the Securities Exchange Act of 1934, as amended (the “1934 Act”), subject to the standards and procedures adopted by the Fund.

Record Date Common Shareholders wishing to transfer all or a portion of their Rights should allow at least five (5) business days prior to the Expiration Date for (i) the transfer instructions to be received and processed by the Subscription Agent; (ii) a new subscription certificate to be issued and transmitted to the transferee or transferees with respect to transferred Rights, and to the transferor with respect to retained Rights, if any; and (iii) the Rights evidenced by such new subscription certificate to be exercised or sold by each recipient thereof. Neither the Fund, the Subscription Agent nor the Dealer Manager shall have any liability to a transferee or transferor of Rights if subscription certificates are not received in time for exercise or sale prior to the Expiration Date.

Except for the fees charged by the Subscription Agent and Dealer Manager (which will be paid by the Fund), the transferor of the Rights shall be responsible for all commissions, fees and other expenses (including brokerage commissions and transfer taxes) incurred or charged in connection with the purchase, sale or exercise of Rights. Neither we nor the Subscription Agent nor the Dealer Manager will pay such commissions, fees or expenses. Investors who wish to purchase, sell, exercise or transfer Rights through a broker, bank or other party should first inquire about any fees and expenses that the investor will incur in connection with the transaction.

The Fund anticipates that the Rights will be eligible for transfer through, and that the exercise of the Primary Subscription (but not the Over-Subscription Privilege) may be effected through, the facilities of the Depository Trust Company (“DTC”) or through the Subscription Agent. Eligible Record Date Common Shareholders may exercise the Over-Subscription Privilege in respect of exercised Rights by properly executing and delivering to the Subscription Agent, at or prior to 5:00 p.m., New York City time, on the Expiration Date, a Nominee Holder over-subscription certificate or a substantially similar form satisfactory to the Subscription Agent, together with payment of the Subscription Price for the number of Common Shares for which the Over-Subscription Privilege is to be exercised.

### Methods for Exercising Rights

Rights are evidenced by new subscription certificates that, except as described below under “—Foreign Common Shareholders,” will be mailed to Record Date Common Shareholders or, if a Record Date Common

## Table of Contents

Shareholder's Common Shares are held by Cede or any other depository or nominee on their behalf, to Cede or such depository or nominee. Rights may be exercised by completing and signing the subscription certificate that accompanies this prospectus and mailing it in the envelope provided, or otherwise delivering the completed and signed subscription certificate to the Subscription Agent, together with payment in full for the Common Shares at the Subscription Price by the Expiration Date.

Rights may also be exercised by contacting your broker, trustee or other nominee, who can arrange, on your behalf, (1) to deliver a Notice of Guaranteed Delivery prior to 5:00 p.m., New York City time, on the Expiration Date and (2) to guarantee delivery of payment and delivery of a properly completed and executed subscription certificate pursuant to a Notice of Guaranteed Delivery by the close of business on the third (3rd) business day after the Expiration Date. A fee may be charged for this service. Completed subscription certificates and related payments must be received by the Subscription Agent prior to 5:00 p.m., New York City time, on or before the Expiration Date (unless payment is effected by means of a Notice of Guaranteed Delivery as described below under “—Payment for Common Shares”) at the offices of the Subscription Agent at the address set forth above. Fractional Common Shares will not be issued upon the exercise of Rights.

### Common Shareholders who are Record Owners

Exercising Rights Holders who are holders of record may choose either option set forth under “—Payment for Common Shares” below. If time is of the essence, the Fund or the Adviser, in their sole discretion, may permit delivery of the subscription certificate and payment after the Expiration Date.

### Record Date Common Shareholders Whose Common Shares are Held by a Nominee

Record Date Common Shareholders whose Common Shares are held by a nominee, such as a bank, broker or trustee, must contact that nominee to exercise their Rights. In that case, the nominee will complete the subscription certificate on behalf of the Record Date Common Shareholder and arrange for proper payment by one of the methods set forth under “—Payment for Common Shares” below.

### Nominees

Nominees, such as brokers, trustees or depositories for securities, who hold Common Shares for the account of others, should notify the respective beneficial owners of the Common Shares as soon as possible to ascertain the beneficial owners' intentions and to obtain instructions with respect to the Rights. If the beneficial owner so instructs, the nominee should complete the subscription certificate and submit it to the Subscription Agent with the proper payment as described under “—Payment for Common Shares” below.

Banks, brokers, trustees and other nominee holders of Rights will be required to certify to the Subscription Agent, before any Over-Subscription Privilege may be exercised with respect to any particular beneficial owner who is a Record Date Common Shareholder, as to the aggregate number of Rights exercised during the subscription period and the number of Common Shares subscribed for pursuant to the Over-Subscription Privilege by the beneficial owner, and that the beneficial owner exercised all Rights issued to it pursuant to the Offer.

All questions as to the validity, form, eligibility (including times of receipt and matters pertaining to beneficial ownership) and the acceptance of subscription forms and the Subscription Price will be determined by the Fund, which determinations will be final and binding. No alternative, conditional or contingent subscriptions will be accepted. The Fund reserves the right to reject any or all subscriptions not properly submitted or the acceptance of which would, in the opinion of the Fund's counsel, be unlawful.

### Foreign Common Shareholders

Subscription certificates will not be mailed to Record Date Common Shareholders whose record addresses are outside the United States (for these purposes, the United States includes its territories and possessions and the District of Columbia) (the "Foreign Common Shareholders"). Foreign Common Shareholders will receive written notice of the Offer. The Subscription Agent will hold the Rights to which those subscription certificates relate for these Common Shareholders' accounts until instructions are received to exercise, sell or transfer the Rights, subject to applicable law. If no instructions have been received by 5:00 p.m., New York City time, on March 20, 2012, three (3) business days prior to the Expiration Date (or, if the subscription period is extended, on or before three (3) business days prior to the extended Expiration Date), the Subscription Agent will ask the Dealer Manager if it will purchase the Rights. If the Dealer Manager purchases the Rights, the sales price paid by the Dealer Manager will be based upon the then current market price for the Rights. The proceeds from each of such sales to the Dealer Manager will be remitted to the Subscription Agent, which will hold such proceeds in an account segregated from the Subscription Agent's own funds pending distribution to each Foreign Common Shareholder. It is expected that following each such sale of Rights to the Dealer Manager, the proceeds from each such sale will be received by the Subscription Agent within three (3) business days of the sale and that the proceeds will then be remitted to the Foreign Common Shareholder within three (3) business days of receipt by the Subscription Agent.

## Table of Contents

If the Dealer Manager declines to purchase the Rights of a Foreign Common Shareholder, the Subscription Agent will attempt to sell such Rights in the open market. If the Rights can be sold in such manner, all of such sales will be deemed to have been effected at the weighted-average price of all Rights sold by the Subscription Agent in such open market transactions throughout the subscription period. The proceeds from such sales will be held by the Subscription Agent in an account segregated from the Subscription Agent's own funds pending distribution to the Foreign Common Shareholders. It is expected that the proceeds of such open market sales will be remitted by the Subscription Agent to the Foreign Common Shareholders within five (5) business days following the Expiration Date.

There can be no assurance that the Subscription Agent will be able to sell any Rights, and neither the Fund nor the Subscription Agent has guaranteed any minimum sales price for the Rights.

### Notice of NAV Decline

The Fund, as required by the SEC's registration form, will suspend the Offer until it amends this prospectus if, subsequent to the effective date of this prospectus, the Fund's NAV declines more than 10% from its NAV as of that date. Accordingly, the Expiration Date would be extended and the Fund would notify Record Date Common Shareholders of the decline and permit Exercising Rights Holders to cancel their exercise of Rights.

### Distribution Arrangements

UBS Securities LLC will act as Dealer Manager for the Offer. Under the terms and subject to the conditions contained in the Dealer Manager Agreement, the Dealer Manager will provide financial structuring and solicitation services in connection with the Offer and will solicit the exercise of Rights and participation in the Over-Subscription Privilege. The Offer is not contingent upon any number of Rights being exercised. The Dealer Manager will also be responsible for forming and managing a group of selling broker-dealers (each a "Selling Group Member" and collectively the "Selling Group Members"), whereby each Selling Group Member will enter into a Selling Group Agreement with the Dealer Manager to solicit the exercise of Rights and to sell Common Shares purchased by the Selling Group Member from the Dealer Manager. In addition, the Dealer Manager will enter into a Soliciting Dealer Agreement with other soliciting broker-dealers (each a "Soliciting Dealer" and collectively the "Soliciting Dealers") to solicit the exercise of Rights. See "Compensation to Dealer Manager" for a discussion of fees and other compensation to be paid to the Dealer Manager, Selling Group Members and Soliciting Dealers in connection with the Offer. The services provided by the Dealer Manager differ from those provided by the Adviser in that the Adviser acts as the investment adviser for the Fund and manages the investment and reinvestment of the Fund's assets in accordance with the Fund's investment objectives and policies and limitations, and generally manages the day-to-day business and affairs of the Fund. The Adviser has not been retained by the Fund to manage a rights offering; instead, given the complexities of the transaction, the Fund believes that the retention of the Dealer Manager will be beneficial. See "Management of the Fund Advisory Agreement" for a more complete description of the Advisory Agreement.

The Fund and the Avenue Managers have agreed to indemnify the Dealer Manager or contribute to losses arising out of certain liabilities, including liabilities under the 1933 Act. The Dealer Manager Agreement also provides that the Dealer Manager will not be subject to any liability to the Fund in rendering the services contemplated by the Dealer Manager Agreement except for any act of willful misfeasance, bad faith or gross negligence of the Dealer Manager in the performance of its duties or reckless disregard by the Dealer Manager of its obligations and duties under the Dealer Manager Agreement.

Prior to the expiration of the Offer, the Dealer Manager may independently offer for sale Common Shares, including Common Shares acquired through purchasing and exercising the Rights, all at prices that may be different from the market price for such Common Shares or from the price to be received by the Fund upon the exercise of Rights. The

Dealer Manager is authorized to buy and exercise Rights (for delivery of Common Shares prior to the expiration of the Offer), including unexercised Rights of Record Date Common Shareholders whose record addresses are outside the United States held by the Subscription Agent for which no instructions are received, and to sell Common Shares to the public or to Selling Group Members at the offering price set by the Dealer Manager from time to time. In addition, the Dealer Manager has the right to buy Rights offered to it by the Subscription Agent from electing Record Date Common Shareholders, and the Dealer Manager may purchase such Rights as principal or act as agent on behalf of its clients for the resale of such Rights.

#### Compensation to Dealer Manager

Pursuant to the Dealer Manager Agreement, the Fund has agreed to pay the Dealer Manager a fee for its financial structuring and solicitation services equal to 3.75% of the aggregate Subscription Price for Common

## Table of Contents

Shares issued pursuant to the Offer. The Dealer Manager will reallow to Selling Group Members in the Selling Group to be formed and managed by the Dealer Manager selling fees equal to 2.50% of the Subscription Price for each Common Share issued pursuant to the Offer or the Over-Subscription Privilege as a result of their selling efforts. In addition, the Dealer Manager will reallow to Soliciting Dealers that have executed and delivered a Soliciting Dealer Agreement and have solicited the exercise of Rights, solicitation fees equal to 0.50% of the Subscription Price for each Common Share issued pursuant to the exercise of Rights as a result of their soliciting efforts, subject to a maximum fee based on the number of Common Shares held by such Soliciting Dealer through DTC on the Record Date. Fees will be paid to the broker-dealer designated on the applicable portion of the subscription certificates or, in the absence of such designation, to the Dealer Manager.

In addition, the Fund has agreed to pay the Dealer Manager an amount up to \$100,000 as a partial reimbursement of its expenses incurred in connection with the Offer. The fees described above are one-time fees payable on each date on which the Fund issues Common Shares after the Expiration Date with respect to the Dealer Manager, and on or before the tenth business day following the day the Fund issues Common Shares after the Expiration Date with respect to a Selling Group Member or Soliciting Dealer. The Fund will also pay expenses relating to the printing or other production, mailing and delivery expenses incurred in connection with materials related to the Offer, including all reasonable out-of-pocket fees and expenses, if any and not to exceed \$10,000, incurred by the Dealer Manager, Selling Group Members, Soliciting Dealers and other brokers, dealers and financial institutions in connection with their customary mailing and handling of materials related to the Offer to their customers. In connection with the financial structuring and solicitation services provided by the Dealer Manager, the Dealer Manager may realize profits or losses in addition to and independent of any fees described above. While such profits or losses are difficult to quantify prior to the commencement of the subscription period, in no event will profits to the Dealer Manager from the sale of Common Shares prior to the Expiration Date of the Offer exceed 0.1% of the gross Offer size. No other fees will be payable by the Fund or the Avenue Managers to the Dealer Manager in connection with the Offer. All of the costs of the Offer will be borne by the Fund's Common Shareholders.

### Subscription Agent

The Subscription Agent is collectively Computershare Inc. and Computershare Trust Company, N.A. Under the terms and subject to the conditions contained in a Subscription Agent Agreement between the Fund and the Subscription Agent, the Subscription Agent in connection with the Offer will provide services related to the distribution of the subscription certificates and the issuance and exercise of Rights to subscribe as set forth therein. The Subscription Agent will receive for its administrative, processing, invoicing and other services a fee estimated to be approximately \$30,000, plus reimbursement for all out-of-pocket expenses related to the Offer. The Fund has also agreed to indemnify the Subscription Agent and its nominees against all liability and reasonable expense which may arise out of the services described in the Subscription Agent Agreement, except for any liability or expense arising out of negligence, bad faith or willful misconduct of the Subscription Agent or its nominees.

Completed subscription certificates must be sent together with proper payment of the Subscription Price for all Common Shares subscribed for in the Primary Subscription and the Over-Subscription Privilege (for eligible Record Date Common Shareholders) to the Subscription Agent by one of the methods described below. Alternatively, Notices of Guaranteed Delivery may be sent by facsimile to (617) 360-6810 to be received by the Subscription Agent prior to 5:00 p.m., New York City time, on the Expiration Date. Facsimiles should be confirmed by telephone at (781) 575-2332. The Fund will accept only properly completed and executed subscription certificates actually received at any of the addresses listed below, prior to 5:00 p.m., New York City time, on the Expiration Date or by the close of business on the third (3rd) business day after the Expiration Date following timely receipt of a Notice of Guaranteed Delivery. See “—Payment for Common Shares” below.

Edgar Filing: Avenue Income Credit Strategies Fund - Form N-2/A

Table of Contents

Delivery to an address other than one of the addresses listed above, or transmission via a facsimile number other than as listed above, will not constitute valid delivery.

Information Agent

The Information Agent is Georgeson Inc. Under the terms and subject to the conditions contained in an Information Agent Agreement between the Fund and the Information Agent, the Information Agent will provide communication, dissemination and other related services in connection with the Offer. The Fund has also agreed to indemnify the Information Agent and its stockholder, officers, directors, employees, agents and affiliates against any and all claims, costs, damages, liabilities, judgments and expenses, including the fees, costs and expenses of counsel retained by the Information Agent, which directly relate to or arise out of the Information Agent's performance of services under the Information Agent Agreement, except for costs, damages, liabilities, judgments or expenses resulting directly from the Information Agent's gross negligence or intentional misconduct.

Any questions or requests for assistance concerning the method of subscribing for Common Shares or for additional copies of this prospectus or subscription certificates or Notices of Guaranteed Delivery may be directed to the Information Agent at its telephone number and address listed below:

Georgeson Inc.  
199 Water Street, 26th Floor  
New York, NY 10038  
Banks and Brokers call: (212) 440-9800  
Call toll free: (888) 867-6963

Common Shareholders may also contact their brokers or nominees for information with respect to the Offer. The Information Agent will receive a fee estimated to be \$16,000, plus reimbursement for its out-of-pocket expenses related to the Offer.

Payment for Common Shares

Exercising Rights Holders may choose between the following methods of payment:

(1) An Exercising Rights Holder may send the subscription certificate together with payment for the Common Shares acquired in the Primary Subscription and any additional Common Shares subscribed for pursuant to the Over-Subscription Privilege (for eligible Record Date Common Shareholders) to the Subscription Agent based on the estimated Subscription Price of \$15.89 per Common Share (90% of \$17.65, the average of the last reported sales price of a Common Share on the NYSE on February 2, 2012 and each of the four (4) preceding trading days). To be accepted, the payment, together with a properly completed and executed subscription certificate, must be received by the Subscription Agent at one of the Subscription Agent's offices set forth above, prior to 5:00 p.m., New York City time, on the Expiration Date.

(2) An Exercising Rights Holder may have a bank, trust company or NYSE member send a Notice of Guaranteed Delivery by facsimile or otherwise guaranteeing delivery of (i) payment of the full Subscription Price for the Common Shares subscribed for in the Primary Subscription and any additional Common Shares subscribed for pursuant to the Over-Subscription Privilege (for eligible Record Date Common Shareholders) and (ii) a properly completed and executed subscription certificate. The Subscription Agent will not honor a Notice of Guaranteed Delivery unless a properly completed and executed subscription certificate and full payment for the Common Shares is received by the Subscription Agent by the close of business on March 28, 2012 (or, if the Offer is extended, on the third (3rd)

business day after the Expiration Date).

All payments by an Exercising Rights Holder must be in U.S. dollars by money order or check drawn on a bank or branch located in the United States and payable to "Computershare". The Subscription Agent will deposit all funds received by it prior to the final payment date into a segregated account pending proration and distribution of the Common Shares. The Subscription Agent may receive investment earnings on the funds deposited into such account.

Table of Contents

The method of delivery of subscription certificates and payment of the Subscription Price to the Fund will be at the election and risk of the Exercising Rights Holders, but if sent by mail, it is recommended that such Certificates and payments be sent by registered mail, properly insured, with return receipt requested, and that a sufficient number of days be allowed to ensure delivery to the Subscription Agent and clearance of payment prior to 5:00 p.m., New York City time, on the Expiration Date or the date guaranteed payments are due under a Notice of Guaranteed Delivery (as applicable). Because uncertified personal checks may take at least five business days to clear, you are strongly urged to pay, or arrange for payment, by means of certified or cashier's check or money order.

Within ten (10) business days following the Expiration Date (the "Confirmation Date"), the Subscription Agent will direct the Transfer Agent to send to each Exercising Rights Holder (or, if Common Shares are held by Cede or any other depository or nominee, to Cede or such other depository or nominee) a confirmation showing (i) the number of Common Shares purchased pursuant to the Primary Subscription; (ii) the number of Common Shares, if any, acquired pursuant to the Over-Subscription Privilege (for eligible Record Date Common Shareholders); (iii) the per Common Share and total purchase price for the Common Shares; and (iv) any additional amount payable to the Fund by the Exercising Rights Holder or any excess to be refunded by the Fund to the Exercising Rights Holder, in each case based on the Subscription Price as determined on the Expiration Date. If any Exercising Rights Holder, if eligible, exercises his right to acquire Common Shares pursuant to the Over-Subscription Privilege, any excess payment which would otherwise be refunded to him will be applied by the Fund toward payment for Common Shares acquired pursuant to the exercise of the Over-Subscription Privilege. Any additional payment required from an Exercising Rights Holder must be received by the Subscription Agent within ten (10) business days after the Confirmation Date. All payments by Rights holders must be in United States dollars by money order or check drawn on a bank located in the United States of America and payable to "Computershare". Any excess payment to be refunded by the Fund to an Exercising Rights Holder will be mailed by the Subscription Agent to the Rights Holder as promptly as practicable.

Whichever of the two methods described above is used, issuance of the Common Shares purchased is subject to collection of checks and actual receipt of payment. The Subscription Agent will deposit all checks it receives prior to the final due date of this Offer into a segregated account pending proration and distribution of the Common Shares. The Subscription Agent may receive investment earnings on the funds deposited into such account. If an Exercising Rights Holder who subscribes for Common Shares pursuant to the Primary Subscription or Over-Subscription Privilege (for eligible Record Date Common Shareholders) does not make payment of any amounts due by the Expiration Date or the date guaranteed payments are due under a Notice of Guaranteed Delivery, the Subscription Agent reserves the right to take any or all of the following actions: (i) sell subscribed and unpaid-for Common Shares to other eligible Record Date Common Shareholders; (ii) apply any payment actually received by it from the Exercising Rights Holder toward the purchase of the greatest whole number of Common Shares which could be acquired by such Exercising Rights Holder upon exercise of the Primary Subscription and/or the Over-Subscription Privilege; and/or (iii) exercise any and all other rights or remedies to which it may be entitled, including, without limitation, the right to set off against payments actually received by it with respect to such subscribed for Common Shares.

All questions concerning the timeliness, validity, form and eligibility of any exercise of Rights will be determined by the Fund, whose determinations will be final and binding. The Fund or the Adviser, each in its sole discretion may waive any defect or irregularity, or permit a defect or irregularity to be corrected within such time as it may determine, or reject the purported exercise of any Right. Subscriptions will not be deemed to have been received or accepted until all irregularities have been waived or cured within such time as the Fund or the Adviser determines in its sole discretion. The Subscription Agent and the Fund will not be under any duty to give notification of any defect or irregularity in connection with the submission of subscription certificates or incur any liability for failure to give such notification.

Exercising Rights Holders will have no right to rescind their subscription after receipt of their payment for Common Shares by the Subscription Agent, except as provided above under “—Notice of NAV Decline.”

## Table of Contents

### Dividend Reinvestment Plan Participants/Beneficial Owners Holding Through Nominees

Participants in the Fund's Dividend Reinvestment Plan will have any Common Shares acquired in the Primary Subscription and pursuant to the Over-Subscription Privilege credited to their accounts under the Dividend Reinvestment Plan. Participants in the Fund's Dividend Reinvestment Plan wishing to exercise Rights issued with respect to the Common Shares held in their accounts under the Dividend Reinvestment Plan must exercise such Rights in accordance with the procedures set forth above. Record Date Common Shareholders whose Common Shares are held of record by Cede or by any other depository or nominee on their behalf or their broker-dealer's behalf will have any Common Shares acquired in the Primary Subscription credited to the account of Cede or such other depository or nominee.

### U.S. Federal Income Tax Consequences of the Offer

See "Tax Matters—The Offer" for a discussion of the material U.S. federal income tax consequences of the Offer.

### ERISA Considerations

Common Shareholders that are employee benefit plans subject to the Employee Retirement Income Security Act of 1974, as amended ("ERISA") (including corporate savings and 401(k) plans), Keogh plans of self-employed individuals, Individual Retirement Accounts ("IRAs") and other plans eligible for special tax treatment under the Code collectively, the "Plans"), should be aware that additional contributions of cash to the Plan (other than rollover contributions or trustee-to-trustee transfers from other Plans) in order to exercise Rights would be treated as Plan contributions and, when taken together with contributions previously made, may subject a Plan to excise taxes for excess or nondeductible contributions. In the case of Plans qualified under Section 401(a) of the Code and certain other plans, additional cash contributions could cause the maximum contribution limitations of Section 415 of the Code or other qualification rules to be violated. Plans contemplating making additional cash contributions to exercise Rights should consult with their counsel prior to receiving or using such contributions.

Plans and other tax exempt entities, including governmental plans, should also be aware that if they borrow in order to finance their exercise of Rights, they may become subject to the tax on unrelated business taxable income under Section 511 of the Code. If any portion of an IRA is used as security for a loan, the portion so used is also treated as distributed to the IRA depositor.

ERISA contains fiduciary responsibility requirements, and ERISA and the Code contain prohibited transaction rules that may impact the exercise or transfer of Rights. Due to the complexity of these rules and the penalties for non-compliance, Plans should consult with their counsel regarding the consequences of their exercise or transfer of Rights under ERISA and the Code.

### Dilution and Effect of Non-Participation in the Offer

Upon the completion of the Offer, Record Date Common Shareholders who do not exercise their Rights fully will own a smaller proportional interest in the Fund than they owned prior to the Offer because there will be more Common Shares issued and outstanding if Rights are exercised. The percentage increase in Common Shares outstanding that will occur if all the Rights are exercised is 331/3%. The completion of the Offer will result in immediate voting dilution for such Common Shareholders. Further, both the sales load and the expenses associated with the Offer paid by the Fund will immediately reduce the net asset value of each Common Shareholder's Common Shares. In addition, if the Subscription Price is less than the NAV of our Common Shares as of the Expiration Date, the Offer will result in an immediate dilution of NAV for all Common Shareholders. It is anticipated that the existing Common Shareholders

will experience immediate dilution even if they fully exercise their Rights. Such dilution is not currently determinable because it is not known how many Common Shares will be subscribed for, what the NAV or market price of our Common Shares will be on the Expiration Date or what the Subscription Price will be. However, assuming full exercise of the Rights being offered at the Subscription Price and assuming that the Expiration Date were February 2, 2012, it is estimated that the per share dilution resulting from the Offer, as of February 2, 2012, would be \$0.64. Any such NAV dilution will disproportionately affect nonexercising Common Shareholders. If the Subscription Price is substantially less than the current NAV, this dilution could be substantial. For example, assuming all of the Common Shares are sold at the estimated

Table of Contents

Subscription Price (which includes a sales load) and after deducting all expenses related to the issuance of the Common Shares, our current NAV would be reduced by approximately \$0.64 or 3.6%. Record Date Common Shareholders will experience a decrease in the NAV of Common Shares held by them, irrespective of whether they exercise all or any portion of their Rights. The distribution of transferable Rights, which may themselves have value, will afford non-participating Common Shareholders the potential of receiving a cash payment upon the sale of Rights, receipt of which may be viewed as partial compensation for the economic dilution of their interests, although there can be no assurance that a market for the Rights will develop or, if such a market does develop, what the price of the Rights will be.

## Example of Dilution to NAV Resulting from the Offer

(a) Net asset value per Common Share (as of 2/2/12)	\$17.68
(b) Total net assets (as of 2/2/12)	\$129,946,893
(c) Estimated reduction in current net asset value per Common Share resulting from the Offer (“per share dilution”)(1)(2)	\$0.64
(d) Estimated percentage reduction in current net asset value per Common Share resulting from the Offer(1)(3)	3.6%

(1) Assumes full exercise of the Rights being offered, that the Expiration Date were February 2, 2012, that all of the Common Shares are sold at the estimated Subscription Price of \$15.89 and deducts all expenses related to the issuance of the Common Shares in the Offer. The Fund, not investors, pays the sales load, which is ultimately thus borne by all Common Shareholders.

(2) Item (c) was calculated by subtracting (A) the Fund’s estimated net asset value per Common Share immediately following the completion of the Offer from (B) the Fund’s net asset value per Common Share (as of 2/2/12). The Fund’s estimated net asset value per Common Share immediately following the completion of the Offer was estimated (using the assumptions described in note (1) above) by dividing (X) the estimated net asset value of the Fund immediately following the Offer by (Y) the estimated total number of Common Shares outstanding immediately following the completion of the Offer.

(3) Item (d) was calculated by dividing Item (c) by Item (a).

There can be no assurance that the dilution will be limited to the amounts shown in the table above. The final amounts of such dilution may be greater than those estimated due to many factors, including the Fund’s market price and NAV at the time of completion of the Offer and the level of participation in the Offer.

The number of Common Shares outstanding as of February 2, 2012 was 7,351,400. The number of Common Shares adjusted to give effect to the Offer, assuming that all Rights are exercised and the applicable Common Shares issued, would be 9,801,866. The percentage increase in Common Shares outstanding that will occur if all the Rights are exercised is 331/3%.

All of the costs of the Offer will be borne by the Fund’s Common Shareholders.

## Certain Effects of This Offer

The Avenue Managers will benefit from the Offer because the management and investment advisory fees are based on the Fund’s Managed Assets. For a description of these fees, see “Management of the Fund—Advisory Agreement and Subadvisory Agreement.” It is not possible to state precisely the amount of additional compensation the Avenue

Managers will receive as a result of the Offer because it is not known how many Common Shares will be subscribed for and because the proceeds of the Offer will be invested in additional portfolio securities, which will fluctuate in value. However, assuming (i) all Rights are exercised, (ii) the proceeds of the Offer are leveraged at 331/3% after giving effect to the Offer and (iii) the Subscription Price is \$15.89 per Common Share, and after giving effect to the Dealer Manager fee and other expenses related to the Offer, the Avenue Managers would receive additional annualized management fees of \$695,207. One of the Fund's trustees who voted to authorize the Offer is an interested person (as defined in Section 2(a)(19) of the 1940 Act) of the Avenue Managers. The other trustees who approved the Offer are not interested persons of the Avenue Managers.

Table of Contents

The Fund

The Fund is a recently organized, non-diversified, closed-end management investment company registered under the 1940 Act. The Fund was organized as a statutory trust under the laws of the State of Delaware on October 12, 2010. The Fund has a limited operating history. The Adviser and Subadviser are registered with the SEC under the Investment Advisers Act of 1940, as amended. The Avenue Managers are both part of Avenue Capital Group, which comprises four registered investment advisers that have expertise investing in stressed and distressed obligations throughout the world. Avenue Capital Group was founded in 1995 by Marc Lasry and Sonia E. Gardner. As of January 31, 2012, Avenue Capital Group had approximately \$12.5 billion in assets under management. Avenue Capital Group, the Adviser and the Subadviser are located at 399 Park Avenue, 6th Floor, New York, New York 10022 and their telephone number is (212) 878-3500. The Adviser has not previously managed a registered investment company and the Subadviser previously served as the subadviser to another registered investment company. The Fund is currently the only registered investment company advised by either of the Avenue Managers. The Investment Committee, which is composed of representatives of the Avenue Managers, is responsible for allocating the portions of the Fund's assets to be invested by the Adviser and the Subadviser, respectively.

The Fund's primary investment objective is to seek a high level of current income with a secondary objective of capital appreciation. No assurance can be given that the Fund's investment objectives will be achieved.

Use of Proceeds

The net proceeds of the Offer, assuming all Common Shares offered hereby are sold, are estimated to be approximately \$37,077,733, after deducting expenses associated with the Offer, including the sales load. The Adviser and the Subadviser anticipate that investment of the net proceeds of the Offer in accordance with the Fund's investment objectives and policies will take approximately thirty (30) to sixty (60) days after completion of the Offer. The Fund intends to use the proceeds of the Offer to make investments consistent with its investment objectives. However, the investment of the net proceeds may take up to three (3) months from completion of the Offer, depending on market conditions and the availability of appropriate securities. See "The Offer—Purpose of the Offer," "Investment Objectives and Principal Investment Strategy" and, in the SAI, "Investment Restrictions." Pending such investment, it is anticipated that the net proceeds will be invested in fixed income securities and other permitted investments. See "Investment Objectives and Principal Investment Strategy."

Description of Common Shares

The Fund is authorized to issue an unlimited number of Common Shares. All Common Shares have equal voting, dividend, distribution and liquidation rights. The Common Shares outstanding are, and the Common Shares issuable upon the exercise of the Rights, when issued and paid for pursuant to the terms of the Offer, will be, fully paid and non-assessable. Common Shares are not redeemable and have no preemptive rights, conversion rights, cumulative voting rights or appraisal rights.

The number of Common Shares outstanding as of February 2, 2012 was 7,351,400. The number of Common Shares adjusted to give effect to the Offer, assuming that all Rights are exercised and the applicable Common Shares issued, would be 9,801,866.

The Fund's Common Shares are publicly held and are listed and traded on the NYSE. The following table sets forth for the quarters indicated the highest and lowest daily prices at the close of market on the NYSE per Common Share,

Edgar Filing: Avenue Income Credit Strategies Fund - Form N-2/A

the highest and lowest closing NAV and the highest and lowest premium or discount from NAV.

During Month Ended(4)	Net Asset Value per Common Share(1)		NYSE Market Price(2)		Premium/ (Discount)(3)

On February 2, 2012, the Fund's NAV was \$17.68 and the last reported sale price of a Common Share on the NYSE was \$17.73, representing a 0.28% premium to such NAV.

Table of Contents

Investment Objectives and Principal Investment Strategy

Investment Objectives and Principal Investment Strategy

The Fund's primary investment objective is to seek a high level of current income with a secondary objective of capital appreciation.

Depending on current market conditions and the Fund's outlook over time, the Fund seeks to achieve its investment objectives by opportunistically investing primarily in credit obligations of issuers that operate in a variety of industries and geographic regions.

The Fund seeks to emphasize high current income, with a secondary emphasis on capital appreciation, by investing generally in Senior Loans and in second lien or other subordinated loans or debt instruments, including non-stressed and stressed credit obligations, and related derivatives. The Fund seeks to capitalize on market inefficiencies and to reallocate the portfolio of the Fund to opportunistically emphasize those investments, categories of investments and geographic exposures believed to be best suited to the current investment and interest rate environment and market outlook. An investment committee of the Avenue Managers seeks to manage the allocation of the portfolio of the Fund between the Adviser and Subadviser based on the availability of opportunities at the time. There is no minimum or maximum limit on the amount of the Fund's assets that may be invested in non-U.S. credit obligations, generally, or in emerging market credit obligations, specifically. In pursuing the Fund's investment objectives or for hedging purposes, the Fund may invest in instruments that give it short exposure to credit obligations.

The types of derivative instruments that the Fund currently invests in (or considers for investment) are: structured products, swaps, futures contracts, forward contracts and options (including options on swaps, futures contracts and foreign currencies). In the future, the Fund may invest in other types of derivative instruments if deemed advisable by the Adviser or Subadviser. The Fund may commence investing in such other types of derivative instruments without notice to Common Shareholders.

There can be no assurance that the Fund will achieve its investment objectives. The Fund's investment objectives and principal investment strategy are not considered to be fundamental by the Fund and can be changed without the vote of the Fund's shareholders by the Board with at least 60 days written notice provided to shareholders.

Investment advisory services for the Fund are provided by affiliates of Avenue Capital Group. The Fund's investment adviser is Avenue Capital Management II, L.P. and the Fund's investment subadviser is Avenue Europe International Management, L.P.

Strategy Rationale

The Avenue Managers believe that changing investment and interest rate environments over time offer attractive investment opportunities in the markets for credit obligations, as well as varying degrees of investment risk. To both capitalize on attractive investments and effectively manage potential risk, the Avenue Managers believe that the combination of a thorough and continuous credit analysis (including an analysis of an issuer's ability to make loan or debt payments when due) and the ability to reallocate the portfolio of the Fund among different categories of investments at different points in the credit cycle (i.e., the cycle between overall positive economic environments and less positive economic environments for credit obligations) is critical to achieving higher risk-adjusted returns, including higher current income and/or capital appreciation, relative to other high-yielding investments. The Avenue Managers seek to emphasize high current income, with a secondary emphasis on capital appreciation, by investing generally in Senior Loans, and in second lien or other subordinated loans or debt instruments, including non-stressed

and stressed credit obligations, and related derivatives. The Fund seeks to capitalize on market inefficiencies and to reallocate the portfolio of the Fund to opportunistically emphasize those investments, geographies and categories of investments best suited to the current investment and interest rate environment and market outlook. The Investment Committee seeks to manage the allocation of the portfolio of the Fund between the Adviser and the Subadviser based on the availability of opportunities at the time.

## Table of Contents

The Fund's portfolio turnover rate may vary from year to year. The Fund believes that, under normal market conditions, its portfolio turnover may be up to 100%. Because it is difficult to predict accurately portfolio turnover rates, actual turnover may be higher or lower. A high portfolio turnover rate increases a fund's transaction costs (including brokerage commissions and dealer costs), which would adversely impact a fund's performance. Higher portfolio turnover may result in the realization of more short-term capital gains than if a fund had lower portfolio turnover.

### Portfolio

**Portfolio Construction Guidelines.** Under normal market conditions, the Fund invests at least 80% of its Managed Assets in any combination of the following credit obligations and related instruments: (i) Senior Loans (including those that, at the time of investment, are rated below investment grade by a NRSRO or are unrated but deemed by an Avenue Manager to be of comparable quality; these types of below investment grade instruments are commonly known as "junk" securities and are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal); (ii) second lien or other subordinated or unsecured floating rate and fixed rate loans or debt (including those that, at the time of investment, could be considered "junk" securities as described above); (iii) other debt obligations, including high-yield, high-risk obligations (i.e., instruments that are commonly known as "junk" securities as described above); (iv) structured products including collateralized debt and loan obligations (collectively, "structured products") that provide long or short exposure to other credit obligations; (v) swaps and other derivative instruments (including credit default, total return, index and interest rate swaps, options, forward contracts, futures contracts and options on futures contracts) that provide long or short exposure to other credit obligations; and (vi) short-term debt securities such as U.S. government securities, commercial paper and other money market instruments and cash equivalents (including shares of money market funds). Certain types of structured products, swaps and other derivative instruments provide short exposure to other credit obligations because the value of such instruments is inversely related to the value of one or more other credit obligations. Managed Assets are the total assets of the Fund (including any assets attributable to money borrowed for investment purposes, including proceeds from (and assets subject to) reverse repurchase agreements, any credit facility and any issuance of preferred shares or notes) minus the sum of the Fund's accrued liabilities (other than Fund liabilities incurred for the purpose of leverage).

The Fund does not invest in credit obligations or related instruments that, at the time of investment, are in default. The Fund may invest in credit obligations or related instruments that, at the time of investment, are likely to default. The credit obligations and related instruments in which the Fund may invest include mortgage-backed and asset-backed securities and securities whose value depends on the value of mortgage-backed or asset-backed securities. These types of investments present special risks. See "Risk Factors—Risks Relating to Investing in the Fund's Common Shares—Asset-Backed and Mortgage-Backed (or Mortgage-Related) Instruments Risk." The Fund may act as a lender originating a Senior Loan.

Under normal market conditions, the Fund may also invest up to 20% of its Managed Assets in any combination of the following: (i) structured products that do not provide long or short exposure to other credit obligations; (ii) swaps and other derivative instruments (including total return, index and interest rate swaps, options, warrants, forward contracts, futures contracts and options on futures contracts) that do not provide long or short exposure to other credit obligations; (iii) foreign currencies and foreign currency derivatives (including foreign currency related swaps, futures contracts and forward contracts) acquired for the purpose of hedging the currency risk arising from the credit obligations in the Fund's portfolio; and (iv) equity securities obtained through the conversion or exchange of convertible or exchangeable instruments, debt restructurings or bankruptcy proceedings and hedges on such positions. Structured products, swaps and other derivative instruments that do not provide long or short exposure to other credit obligations are those instruments whose reference or underlying assets or indices are not credit obligations or indices of credit obligations. Examples of such instruments include equity- and commodity-linked notes, total

return swaps based on the value of an equity security and commodity futures contracts. The Fund may invest in such instruments in order, for example, (i) to seek current income or capital appreciation or (ii) to reduce the Fund's exposure solely to credit obligations. The Avenue Managers believe that the flexibility afforded by being able to invest in such instruments may benefit the Fund by (i) allowing the Fund to invest in potentially attractive investment opportunities that are not credit obligations and (ii) increasing the mix of instruments in the Fund's portfolio which could reduce the overall risk of the Fund's portfolio (although the Fund intends to remain a

Table of Contents

non-diversified investment company). There can be no assurance that these benefits will be realized and such instruments may expose the Fund to risks not presented by credit obligations.

If the Fund receives equity securities in a debt restructuring or bankruptcy proceeding in an amount that would cause it to exceed the foregoing 20% limitation, the Fund will not be required to reduce its positions in such securities, or in any related hedges or any other investment, if the Adviser or Subadviser believes it would not be in the best interest of the Fund to do so.

Percentage limitations described in this prospectus are as of the time of investment by the Fund and may be exceeded after such time because of changes in the market value of the Fund's assets.

The Fund does not invest in a derivative (other than a credit default swap or a currency hedging instrument) if, immediately after the investment, derivatives (other than credit default swaps and currency hedging instruments) would represent more than 30% of the Fund's Managed Assets on a marked-to-market basis. The Fund may use derivative instruments for hedging, as well as speculative, purposes.

The Fund's policy of investing, under normal market conditions, in accordance with the foregoing portfolio construction guidelines is not considered to be fundamental by the Fund and can be changed, without the vote of the Fund's shareholders, by the Board with at least sixty (60) days' written notice provided to shareholders.

**Credit Quality, Liquidity and Geographic Origin of Portfolio Investments.** The Fund may invest, without limitation, in credit obligations that are rated below investment grade by a NRSRO such as S&P or Moody's or unrated credit obligations that are deemed by the Adviser or the Subadviser to be of comparable quality, commonly known in either case as "junk" securities. Such securities are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations and involve significant risk exposure to adverse conditions. Any of the Fund's investments may be issued, at the time of investment by the Fund, by "non-stressed" or "stressed" issuers. The Fund may invest in credit obligations of any maturity or duration. "Non-stressed issuers" generally refers to those issuers that are in compliance with respect to their financial obligations and are not stressed or distressed issuers. "Non-stressed obligations" generally refers to credit obligations issued by non-stressed issuers. "Stressed issuers" generally refers to those issuers that the market expects to become distressed issuers in the near future. "Stressed obligations" generally refers to credit obligations issued by stressed issuers. "Distressed issuers" generally refers to those issuers that are unable to service their debt. "Distressed obligations" generally refers to credit obligations issued by distressed issuers. The Fund does not intend to invest in credit obligations issued by issuers that, at the time of investment, the Adviser and Subadviser believe to be distressed issuers.

In making investments in accordance with the foregoing portfolio construction guidelines, the Fund may invest globally in U.S. and non-U.S. issuers' obligations and such obligations may be U.S. dollar denominated as well as non-U.S. dollar denominated. The Fund typically seeks to limit its exposure to foreign currency risks by entering into forward transactions and other hedging transactions to the extent practical. There can be no assurance that the Fund's currency hedging strategies will succeed. Under normal market conditions, the Fund expects to continue investing in both U.S. and non-U.S. issuers. The Fund's initial areas of geographic focus are the United States and, secondarily, Europe. The Fund is also, among other areas, considering investments in Canada and South Africa. The geographic areas of focus are subject to change from time to time and may be changed without notice to the Fund's shareholders. There is no minimum or maximum limit on the amount of the Fund's assets that may be invested in non-U.S. credit obligations, generally, or in emerging market credit obligations, specifically.

The Fund may invest in loans and bonds issued by issuers of any size. The Fund currently intends to focus on middle market issuers. Middle market issuers are issuers with between approximately \$100 million and \$5 billion in balance sheet debt. The Fund's focus with respect to borrower size is subject to change from time to time and may be changed without notice to the Fund's shareholders. The Fund may invest in credit obligations at all levels of the capital structure. In investing in credit obligations, the Fund currently intends to focus on senior secured debt and other senior debt (including senior unsecured debt issued by an issuer that has also issued senior secured debt). The Fund's focus in this regard is subject to change from time to time and may be changed without notice to the Fund's shareholders.

## Table of Contents

### Investment Philosophy

The Avenue Managers have expertise in Senior Loans and subordinated debt instruments, including those of stressed and distressed issuers, and are responsible for the overall management of the Fund.

The Avenue Managers seek to maximize risk adjusted returns, including by seeking to manage risk through shorting and other hedging strategies when deemed advisable by the Avenue Managers. There can be no assurance that the Fund's hedging strategies will succeed. The Avenue Managers seek to achieve the Fund's investment objectives while carefully evaluating risk/return within the capital structure of a company, as well as the industry and asset class. The Avenue Managers look to maintain trading flexibility and to preserve capital. They conduct thorough in-depth research and employ a disciplined investment philosophy and a consistent investment approach in their focus on credit opportunities. The Avenue Managers' investment teams use a robust credit process that includes research and analysis using a top-down/bottom-up approach to find mispriced or undervalued opportunities: from the top down, they consider macroeconomic themes of the overall credit market and industries, and from the bottom up, they conduct detailed fundamental analysis related to credit obligations of specific issuers, including examining issuers' financials and operations, including sales, earnings, growth potential, assets, debt, management and competition. The Avenue Managers also seek to understand historic and prospective industry trends affecting an investment opportunity. The Avenue Managers seek to ensure that the Fund's portfolio will not consist of a large number of issuers to permit a more thorough analysis of each issuer and to focus on the investments the Avenue Managers believe to be most attractive. The potential concentration of the Fund's portfolio creates risk. See "Risk Factors—Risks Relating to Investing in the Fund's Common Shares—Non-Diversification Risk." The Fund typically seeks to balance interest rate risk with investment performance by investing, when deemed advisable by the Avenue Managers, in both floating rate credit obligations, which are more likely to maintain their value in changing interest rate environments, and fixed rate credit obligations, which are more likely to lose value in rising interest rate environments but may pay higher rates of interest than floating rate credit obligations.

See "Risk Factors—Risks Relating to Investing in the Fund's Common Shares—Market Risk." The Fund typically seeks to balance credit risk with investment performance by investing, when deemed advisable by the Avenue Managers, in both Senior Loans, which may pose less credit risk, and other credit obligations, which may offer the prospect of higher returns with more credit risk. See "Risk Factors—Risks Relating to Investing in the Fund's Common Shares—Credit Risk." The Avenue Managers' investment process is subject to change in their discretion.

When investing in credit obligations, the Avenue Managers invest the Fund's assets in credit obligations with total yields that at the time of purchase are equal to or below the applicable Avenue Credit Threshold. See "Risk Factors—Risks Relating to Investing in the Fund's Common Shares—Potential Conflicts of Interest Risk" and "Management of the Fund—Potential Conflicts of Interest of the Avenue Managers" in the SAI. The Avenue Credit Thresholds are determined by the Investment Committee in its sole discretion, and may be revised as markets change. Along the credit spectrum of non-stressed and stressed obligations, obligations with total yields at or below the Avenue Credit Thresholds generally will be less stressed obligations. Because the Adviser invests primarily in U.S. and Canadian investments, and the Subadviser invests primarily in non-North American investments, the Avenue Credit Thresholds applicable to the Adviser and the Subadviser may differ. There is no guarantee that the yield on the Fund's portfolio will equal or exceed the Avenue Credit Thresholds.

As an example, as of the date of this prospectus, the following types of U.S. and Canadian credit obligations would be at or below the applicable "Avenue Credit Thresholds" if, at the time of investment, they have yields at or below the following benchmarks plus the indicated credit spreads:

- for floating rate obligations, LIBOR plus 950 basis points; and

- for fixed rate obligations, current U.S. Treasury plus 950 basis points.

As an additional example, as of the date of this prospectus, the following types of non-North American credit obligations would be at or below the applicable “Avenue Credit Thresholds” if, at the time of investment, they have yields at or below the following benchmarks plus the indicated credit spreads:

Table of Contents

- for floating rate obligations, LIBOR plus 800 basis points, EURIBOR plus 800 basis points, and Sterling LIBOR plus 800 basis points, as applicable, depending upon the currency and term of the investment; and
- for fixed rate obligations, current U.S. Treasury plus 800 basis points, Bundesobligationen (Bobl) (of the Federal Republic of Germany) plus 800 basis points, Bundesschatzanweisungen (Schätzel) (of the Federal Republic of Germany) plus 800 basis points and UK Gilt rates plus 800 basis points, as applicable, depending upon the currency and term of the investment.

“LIBOR” is an acronym for “London Interbank Offered Rate” and refers to the average interest rate that leading banks in London charge when lending to other banks. A “basis point” is a unit equal to 1/100th of a percentage point or 0.0001. “Current U.S. Treasury” refers to the U.S. Treasury obligation closest in maturity to an evaluated asset in question. “EURIBOR” is an acronym for “Euro-area InterBank Offered Rate” and refers to the average interest rate that leading banks in the euro-area charge when lending on an unsecured basis to other banks in euros, in the euro-area. “Sterling LIBOR” or LIBOR-BBA is an acronym for “London InterBank Offered Rate-British Bankers Association” and refers to the average interest rate that leading banks charge when lending on an unsecured basis to other banks in British Pounds Sterling. “Bundesobligation (Bobl)” is a five year bond issued by the German government. “Bundesschatzanweisungen (Schätzel)” is a two year note issued by the German government. “UK Gilt” refers to the UK government securities issued by the UK Debt Management Office on behalf of HM Treasury closest in maturity to a evaluated asset in question.

The Adviser and Subadviser manage assets for accounts other than the Fund, including private funds. The risk and return profile for the Fund is generally lower than for most of the Avenue Managers’ other accounts. Thus, the Fund and most of the Avenue Managers’ other accounts generally do not invest in the same credit obligations (although their investments may include different obligations of the same issuer). (For example, the Fund might invest in a Senior Loan issued by a borrower and one or more of the Avenue Managers’ other accounts might invest in the borrower’s junior debt.) In particular, except in the limited cases described below, the Avenue Managers generally allocate credit obligations with a total yield at the time of investment at or below the applicable Avenue Credit Thresholds to the Fund and credit obligations with a total yield above the Avenue Credit Thresholds to the Avenue Managers’ other accounts.

In the following cases, credit obligations with a total yield at the time of investment at or below the applicable Avenue Credit Thresholds may also be allocated to the Avenue Managers’ other accounts (and thus at times an Avenue Manager may purchase and/or sell the same obligations for both its other clients and the Fund). Each of the Avenue Managers, on behalf of its other accounts, is able to sell short or otherwise take short positions in obligations (including purchasing a credit default swap) at or below the applicable Avenue Credit Thresholds. Also, each of the Avenue Managers, in making an investment (including an investment that comprises multiple component transactions) for its other accounts that is focused on an obligation above the applicable Avenue Credit Threshold (or on an instrument that is not subject to the Avenue Credit Thresholds), may purchase or sell obligations at or below the applicable Avenue Credit Threshold in order to hedge or otherwise limit the investment in the obligation or other instrument that is the focus of such investment. In addition, for purposes of covering or closing a short position, each of the Avenue Managers, on behalf of its other accounts, is able to borrow or buy investments at or below the applicable Avenue Credit Thresholds. Further, investments, such as equities and currencies, that do not have credit-based yields, are not subject to the Avenue Credit Thresholds. In addition, a portfolio management team (the “CLO Team”) in the Adviser manages certain accounts (including private funds) that invest in certain types of credit obligations in which the Fund may also invest. The CLO Team operates on a different trading system than the Avenue Managers’ other investment professionals and the Avenue Managers employ various policies and procedures intended to separate the CLO Team from such other professionals, including policies and procedures regarding physical separation and regarding limitations on the sharing of information. The CLO Team is not involved in the

management of the Fund and the Fund's portfolio managers are not involved in the management of the CLO Team's accounts. The Avenue Credit Thresholds do not apply to investments made by the CLO Team and the CLO Team, on behalf of its accounts, may invest in credit obligations that have a total yield at the time of investment at or below (or above) the applicable Avenue Credit Thresholds. Investment opportunities in credit obligations sourced by the CLO Team are solely allocated to the CLO Team's accounts and not to the Fund. The Avenue Managers may amend, modify, supplement and/or eliminate, from time to time, the foregoing policies, procedures, operations, involvement and/or relationships with respect to the CLO Team in any manner they believe to be consistent with law and regulatory requirements.

## Table of Contents

To the extent that the Adviser or Subadviser serves as an investment manager to other accounts in the future that have the same investment strategy as the Fund, investment opportunities within such strategy will, to the extent practicable, be allocated among the Fund and such other accounts on a pro rata basis or on such other basis as the Avenue Managers determine to be fair and equitable to the Fund and such other accounts.

Investors should note that the investment advisory fee structure for the Avenue Capital Group's accounts that are not registered investment companies or managed by the CLO Team is different and generally higher than the investment advisory fee structure for the Fund. See "Management of the Fund—Potential Conflicts of Interest of the Avenue Managers" in the SAI for more information on the Avenue Credit Thresholds, advisory fees and the Adviser's and Subadviser's policies and procedures to address conflicts of interest. The Fund offers an opportunity for its investors to have some indirect access to the Avenue Managers, which normally is not directly available to retail investors, albeit only at the lower risk and return segment of the market.

## Portfolio Composition

The Fund's investments (primarily in Senior Loans, subordinated loans and debt, other debt obligations, structured products and swaps—each of which is described in more detail below) may be all or substantially in investments that are generally considered to have a credit quality rated below investment grade by a NRSRO or unrated credit obligations that are deemed to be of comparable quality by the Adviser and Subadviser. Below investment grade securities (that is, securities rated Ba or lower by Moody's or BB or lower by S&P) are commonly referred to as "junk" securities and are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations and involve major risk exposure to adverse conditions. Generally, lower-grade securities provide a higher yield than higher-grade securities of similar maturity but are subject to greater risks, such as greater credit risk, greater market risk and volatility, greater liquidity concerns and potentially greater manager risk. Lower-grade securities are more susceptible to non-payment of interest and principal and default than higher-grade securities. Adverse changes in the economy or to the individual issuer often have a more significant impact on the ability of lower-grade issuers to make payments, meet projected goals or obtain additional financing. When an issuer of such securities is in financial difficulties, the Fund may incur additional expenditures or invest additional assets in an effort to obtain partial or full recovery on amounts due. Some of the securities held by the Fund, which may not be paying interest currently or may be in payment default, may be comparable to securities rated as low as C by Moody's or CCC or lower by S&P. These securities are considered to have extremely poor prospects of ever attaining any real investment standing, to have a current identifiable vulnerability to default, to be unlikely to have the capacity to pay interest and repay principal when due in the event of adverse business, financial or economic conditions and/or to be in default or not current in the payment of interest or principal.

While all credit obligations tend to fluctuate inversely with changes in interest rates, the prices of lower-grade securities generally are less sensitive to changes in interest rates and are more sensitive to specific issuer developments or real or perceived general adverse economic changes than higher-grade securities. A projection of an economic downturn, for example, could cause a decline in prices of lower-grade securities because the advent of a recession could lessen the ability of a highly leveraged company to make principal and interest payments on its securities or obtain additional financing when necessary. A significant increase in market interest rates or a general economic downturn could severely disrupt the market as well as the market values of such securities. Such securities also often experience more volatility in prices than higher-grade securities. The secondary trading market for lower-grade securities may be less liquid than the market for higher-grade securities. Prices of lower-grade securities may decline rapidly in the event a significant number of holders decide to sell. Changes in expectations regarding an individual issuer, an industry or lower-grade securities generally could reduce market liquidity for such securities and make their sale by the Fund more difficult, at least in the absence of price concessions. The market for lower-grade securities may also have less information available, further complicating evaluations and valuations of such securities

and placing more emphasis on the Avenue Managers' experience, judgment and analysis than higher-grade securities. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may also decrease the values and liquidity of securities rated below investment grade and unrated securities especially in a market characterized by a low volume of trading.

The Fund may invest in the credit obligations of stressed issuers, including obligations that are in covenant or payment default. Credit obligations that are or become stressed generally trade at prices below par, thus creating

## Table of Contents

opportunities for capital appreciation (or loss) as the values of such securities change over time. Such obligations are subject to a multitude of legal, industry, market, economic and governmental forces each of which make analysis of these companies inherently difficult. The Avenue Managers rely on company management, outside experts, market participants and personal experience to analyze potential investments. There can be no assurance that any of these sources will provide credible information, or that the analysis of the Adviser or the Subadviser will produce conclusions that lead to profitable investments for the respective portion of the Fund's portfolio managed by each. Obligations of stressed issuers generally trade significantly below par and are considered speculative. The repayment of defaulted obligations is subject to significant uncertainties. Defaulted obligations might be repaid only after lengthy workout or bankruptcy proceedings or result in only partial recovery of cash payments or an exchange of the defaulted obligation for other debt or equity securities of the issuer or its affiliates, which may in turn be illiquid or speculative.

There are a number of significant risks inherent in the bankruptcy process. Many events in a bankruptcy are the product of contested matters and adversary proceedings and are beyond the control of the creditors. There can be no assurance that a bankruptcy court would not approve actions that would be contrary to the interests of the Fund. A bankruptcy filing by an issuer may cause such issuer to lose its market position and key employees and otherwise become incapable of restoring itself as a viable entity, and its liquidation value may be less than its value was believed to be at the time of investment. In addition, the duration of a bankruptcy proceeding is difficult to predict and as such, a creditor's return on investment can be adversely affected by delays while the plan of reorganization is being negotiated, approved by the creditors and confirmed by the bankruptcy court and until it ultimately becomes effective. The administrative costs in connection with a bankruptcy proceeding are frequently high and would be paid out of the debtor's estate prior to any return to creditors. Further, in the early stages of the bankruptcy process it is often difficult to estimate the extent of any contingent claims that might be made and as such, there is a risk that the Fund's influence with respect to the class of obligations it owns can be lost by increases in the number and amount of claims in that class or by different classification and treatment. A creditor, such as the Fund, can also lose its ranking and priority if it is determined that such creditor exercised "domination and control" over a debtor and other creditors can demonstrate that they have been harmed by such actions. In addition, certain claims have priority by law, such as claims for taxes, which may be substantial and could affect the ability of the Fund to be repaid.

In any investment involving stressed obligations, there is a risk that the transaction involving such debt obligations will be unsuccessful, take considerable time or will result in a distribution of cash or a new security or obligation in exchange for the stressed obligations, the value of which may be less than the Fund's purchase price of such obligations. Furthermore, if an anticipated transaction does not occur, the Fund may be required to sell its investment at a loss.

The Fund may sell portfolio securities without regard to the length of time they have been held to take advantage of new investment opportunities, when the Adviser or the Subadviser believe the potential for high current income or capital appreciation has lessened, or for other reasons. The Fund's portfolio turnover rate may vary from year to year.

### Senior Loans

Senior Loans are business loans made to borrowers that may be corporations, partnerships or other entities that operate in a variety of industries and geographic regions. Senior Loans generally are negotiated between a borrower and several financial institution lenders represented by one or more lenders acting as agent of all the lenders. The agent is responsible for negotiating the loan agreement that establishes the terms and conditions of the Senior Loan and the rights of the borrower and the lenders. The Fund may act as one of the original lenders originating a Senior Loan, may purchase portions of Senior Loans through assignments from lenders and may invest in participations in Senior Loans. Senior Loans have the most senior position in a borrower's capital structure or share the senior position

with other senior debt securities of the borrower. This capital structure position generally gives holders of Senior Loans a claim on some or all of the borrower's assets that is senior to that held by unsecured creditors, subordinated debt holders and stockholders of the borrowers. Senior Loans also have contractual terms designed to protect lenders. The Fund will generally acquire Senior Loans of borrowers that, among other things, in the Adviser's or the Subadviser's judgment, can make timely payments on their Senior Loans and that satisfy other credit standards established by the Adviser or the Subadviser. Because of the protective features of Senior Loans,

Table of Contents

the Fund and the Avenue Managers believe that Senior Loans of borrowers that are experiencing, or are more likely to experience, financial difficulty may represent attractive investment opportunities.

Interest rates on Senior Loans may be fixed or may float periodically. On floating rate Senior Loans, the interest rates typically are adjusted based on a base rate plus a premium or spread over the base rate. The base rate usually is a standard inter-bank offered rate, such as LIBOR, the prime rate offered by one or more major U.S. banks, or the certificate of deposit rate or other base lending rates used by commercial lenders. Floating rate Senior Loans may adjust over different time periods, including daily, monthly, quarterly, semi-annually or annually. The Fund may use interest rate swaps and other investment practices to shorten the effective interest rate adjustment period of floating rate Senior Loans or to adjust the overall interest rate exposure of the Fund.

When interest rates rise, the values of fixed income securities generally decline. When interest rates fall, the values of fixed income securities generally increase. The prices of adjustable, variable or floating rate income securities tend to have less fluctuation in response to changes in interest rates, but will have some fluctuation particularly when the next interest rate adjustment on such security is further away in time or adjustments are limited in amount over time.

The Fund's Senior Loan investments will typically be secured by specific assets of the borrower that qualify as collateral, such as trademarks, accounts receivable, inventory, buildings, real estate, franchises and common and preferred stock in its subsidiaries and affiliates. Collateral may also include guarantees or other credit support by affiliates of the borrower. In some cases, a Senior Loan may be secured only by stock of the borrower or its subsidiaries. The borrower may experience financial difficulty and/or the value of collateral may decline over time. The loan agreement may or may not require the borrower to pledge additional collateral to secure the Senior Loan if the value of the initial collateral declines. In certain circumstances, the loan agreement may authorize the agent to liquidate the collateral and to distribute the liquidation proceeds pro rata among the lenders. As described below, the Fund may also invest in loans that are not secured by specific collateral. Investments in such unsecured loans involve a greater risk of loss.

Senior Loans also have contractual terms designed to protect lenders. Loan agreements often include restrictive covenants that limit the activities of the borrower. These covenants may include mandatory prepayment out of excess cash flows, restrictions on dividend payments, the maintenance of minimum financial ratios, limits on indebtedness and other financial tests. Breach of these covenants generally is an event of default and, if not waived by the lenders, may give lenders the right to accelerate principal and interest payments.

The proceeds of Senior Loans that the Fund will purchase typically will be used by borrowers to finance leveraged buyouts, recapitalizations, mergers, acquisitions, stock repurchases, debt refinancings and, to a lesser extent, for general operating and other purposes.

The Fund may purchase and retain in its portfolio Senior Loans of borrowers that have filed for protection under the federal bankruptcy laws or similar laws or that have had involuntary bankruptcy petitions filed against them by creditors. Investing in Senior Loans involves investment risk, and some borrowers default on their Senior Loan payments. The Fund attempts to manage these risks through selection of a varied portfolio of Senior Loans and analysis and monitoring of borrowers.

The Fund generally invests in a Senior Loan if, in the Adviser's or the Subadviser's judgment, the borrower can meet its future payment obligations. An Avenue Manager will perform its own independent credit analysis of the borrower in addition to utilizing information prepared and supplied by the agent or other lenders with respect to the portion of the Fund's portfolio managed by each. When evaluating a borrower, an Avenue Manager will consider many factors, including the borrower's past and future projected financial performance. The Avenue Manager also considers a

borrower's management, collateral and industry. The Fund generally acquires a collateralized Senior Loan if the Adviser or the Subadviser believes that the collateral coverage equals or exceeds the outstanding principal amount of the Senior Loan. The Adviser or the Subadviser continues to monitor a borrower on an ongoing basis for so long as the Fund continues to own the Senior Loan. Although the Avenue Managers use their best judgment in selecting Senior Loans, there can be no assurance that such analysis will disclose factors that may impair the value of a Senior Loan. The Fund's NAV of the Common Shares fluctuates as a result of changes in the credit quality of borrowers and other factors. A serious deterioration in the credit quality of a borrower could cause

Table of Contents

a permanent decrease in the Fund's NAV of the Common Shares. See "Risk Factors—Risks Relating to Investing in the Fund's Common Shares—Risks of Senior Loans."

There is no minimum rating or other independent evaluation of a borrower or its securities limiting the Fund's investments. Although a Senior Loan may not be rated by a NRSRO at the time the Fund purchases the Senior Loan, NRSROs have become more active in rating Senior Loans, and at any given time a substantial portion of the Senior Loans in the Fund's portfolio may be rated. There is no limit on the percentage of the Fund's assets that may be invested in Senior Loans that are rated below investment grade or that are unrated but deemed by the Adviser or Subadviser to be of comparable quality.

**Original Lender.** When the Fund acts as an original lender, it may participate in structuring the Senior Loan. When the Fund is an original lender, it will have a direct contractual relationship with the borrower, may enforce compliance of the borrower with the terms of the loan agreement and may have rights with respect to any funds acquired by other lenders through set-off. Lenders typically also have full voting and consent rights under loan agreements. Certain actions of the borrower typically requires the vote or consent of the holders of some specified percentage of the outstanding principal amount of the Senior Loan. Certain decisions, such as reducing the amount of interest on or principal of a Senior Loan, releasing collateral, changing the maturity of a Senior Loan or a change in control of the borrower, frequently require the unanimous vote or consent of all lenders affected. The Fund intends never to act as the agent or principal negotiator or administrator of a Senior Loan, except to the extent it might be considered to be the principal negotiator of a loan negotiated by an Avenue Manager for the Fund and/or one or more other registered investment companies managed by an Avenue Manager.

The Fund will not act as an original lender for a loan if, after making such loan, loans originated by the Fund would exceed 20% of the Fund's Managed Assets. The Fund will generally only act as an original lender for a loan if, among other things, in the Adviser's or the Subadviser's judgment, the borrower can make timely payments on its loans and satisfy other credit standards established by the Adviser or the Subadviser. Each of the Avenue Managers relies primarily on its own evaluation of the credit quality of such a borrower. As a result, the Fund is particularly dependent on the analytical abilities of the Avenue Managers. Because of the nature of its investments, the Fund may be subject to allegations of lender liability and other claims. See "Risks Factors—Risks Relating to Investing in the Fund's Common Shares—Lender Liability Risk." In addition, the Securities Act deems certain persons to be "underwriters" if they purchase a security from an issuer and later sell it to the public. Although it is not believed that the application of this Securities Act provision would cause the Fund to be engaged in the business of underwriting, a person who purchases an instrument from the Fund that was acquired by the Fund from the issuer of such instrument could allege otherwise. Under the Securities Act, an underwriter may be liable for material omissions or misstatements in an issuer's registration statement or prospectus.

The Fund will not originate a loan (i) to a borrower that is a portfolio company controlled by a fund managed by the Avenue Capital Group or (ii) where a member of the Avenue Capital Group or a fund managed by the Avenue Capital Group is the agent, principal negotiator or administrator of the loan, except to the extent that an Avenue Manager or another registered investment company managed by an Avenue Manager might be considered to be the principal negotiator of a loan it negotiates for the Fund and/or one or more other registered investment companies managed by an Avenue Manager.

**Senior Loan assignments and participations.** The Fund may purchase Senior Loans by assignment from a lender in the original syndicate of lenders or from subsequent assignees. The purchaser of an assignment typically succeeds to all the rights and obligations under the loan agreement of the assigning lender and becomes a lender under the loan agreement. Assignments may, however, be arranged through private negotiations, and the rights and obligations acquired by the purchaser of an assignment may differ from, and be more limited than, those held by the assigning

lender. The Fund may also purchase participations from lenders in the original syndicate making Senior Loans. When the Fund purchases a participation in a Senior Loan, the Fund will usually have a contractual relationship only with the lender selling the participation and not with the borrower. The Fund may have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the participation and only upon receipt by the lender of such payments from the borrower. As a result, the Fund may assume the credit risk of both the borrower and the lender selling the participation. In the event of insolvency of the lender selling a participation, the Fund may be treated as a general creditor of the lender.

## Table of Contents

In the case of a participation, the Fund generally will not have the right to enforce compliance by the borrower with the loan agreement, nor rights to any funds acquired by other lenders through set-off against the borrower. In addition, when the Fund holds a participation in a Senior Loan, it may not have the right to vote on whether to waive enforcement of any restrictive covenant breached by a borrower. Lenders voting in connection with a potential waiver of a restrictive covenant may have interests different from those of the Fund and may not consider the interests of the Fund. The Fund may not benefit directly from the collateral supporting a Senior Loan in which it has purchased the participation, although lenders that sell participations generally are required to distribute liquidation proceeds received by them pro rata among the holders of such participations.

### Second Lien or Other Subordinated or Unsecured Loans or Debt

The Fund may invest in second lien or other subordinated or unsecured loans or debt. Such loans or debt are made by public and private corporations and other non-governmental entities and issuers for a variety of purposes. As in the case of Senior Loans, the Fund may purchase interests in second lien or other subordinated or unsecured loans or debt through assignments or participations (each as described above).

Second lien loans are secured by a second priority security interest in or lien on specified collateral securing the borrower's Senior Loans on a first lien basis. This means that Senior Loans are repaid in full with proceeds of the collateral before second lien loans are repaid. Second lien loans typically have less protections and rights as Senior Loans. Second lien loans are not (and by their terms cannot become) junior in lien priority to any obligation of the related borrower other than Senior Loans of such borrower. Second lien loans may have fixed or floating rate interest payments. Because second lien loans are secured on a junior basis to Senior Loans, they present a greater degree of investment risk but often pay interest at higher rates reflecting this additional risk. In addition, second lien loans of below investment grade quality share many of the risk characteristics of other non-investment grade securities. Second lien and subordinated loans typically have greater price volatility than Senior Loans and may be less liquid.

Subordinated loans or debt may, and generally will, rank lower in priority of payment to Senior Loans and second lien loans of the borrower. Subordinated secured loans or debt typically are secured by a lower priority security interest in or lien on specified collateral, and typically have more subordinated protections and rights than Senior Loans and second lien loans. Subordinated loans may have fixed or adjustable floating rate interest payments. Because subordinated loans may rank lower as to priority of payment than Senior Loans and second lien loans of the borrower, they may present a greater degree of investment risk than Senior Loans and second lien loans but often pay interest at higher rates reflecting this additional risk. Other than their more subordinated status, such investments have many characteristics and risks similar to Senior Loans and second lien loans discussed above. Subordinated interests of below investment grade quality share risks similar to those of below investment grade securities.

Unsecured loans or debt generally have lower priority in right of payment compared to holders of secured loans of the borrower. Unsecured loans are not secured by a security interest in or lien on specified collateral. Unsecured loans by their terms may be or may become subordinate in right of payment to other obligations of the borrower, including Senior Loans, second lien loans and other debt. Unsecured loans may have fixed or adjustable floating rate interest payments. Because unsecured loans are subordinate to the Senior Loans and secured debt of the borrower, they may present a greater degree of investment risk but often pay interest at higher rates reflecting this additional risk. Unsecured interests of below investment grade quality share risks similar to those associated with other below investment grade securities.

### Structured Products

The Fund may also invest in structured products, including CDOs, CBOs, CLOs, structured notes, credit-linked notes and other types of structured products. Generally, investments in structured products are interests in entities organized and operated for the purpose of restructuring the investment characteristics of the underlying investment interests or securities. These investment entities may be structured as trusts or other types of pooled investment vehicles. This type of restructuring generally involves the deposit with or purchase by an entity of the underlying investments and the issuance by that entity of one or more classes of securities backed by, or representing interests in, the underlying investments or referencing an indicator related to such investments. The cash flow or rate of

Table of Contents

return on the underlying investments may be apportioned among the newly issued securities to create different investment characteristics, such as varying maturities, credit quality, payment priorities and interest rate provisions. The cash flow or rate of return on a structured product may be determined by applying a multiplier to the rate of total return on the underlying investments or referenced indicator. Application of a multiplier is comparable to the use of financial leverage, both being speculative techniques. Leverage magnifies the potential for gain and the risk of loss. As a result, a relatively small decline in the value of the underlying investments or referenced indicator could result in a relatively large loss in the value of a structured product. Holders of structured products bear risks of the underlying investment, index or reference obligation (including income risk, credit risk and market risk) and are subject to counterparty risk. Certain structured products may be terminated early by the issuer if it is unable to hedge its obligations under the product, which could result in a loss to the Fund. In addition, the Fund may invest in other derivative instruments that are developed over time if their use would be consistent with the objectives of the Fund.

CDOs, CBOs and CLOs are types of asset-backed securities issued by special purpose vehicles created to reapportion the risk and return characteristics of a pool of assets. The underlying pool for a CLO, for example, may include domestic and foreign Senior Loans, senior unsecured loans and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. For CDOs, CBOs and CLOs, the cashflows are split into two or more portions, called tranches, varying in risk and yield. The assets, typically Senior Loans, are used as collateral supporting the various debt tranches issued by the special purpose vehicle. The key feature of these structures is the prioritization of the cash flows from a pool of underlying securities among the several classes of securities issued by a structured product. CBOs are structured debt securities backed by a diversified pool of high yield, public or private fixed income securities. These may be fixed pools or may be “market value” (or managed) pools of collateral. The riskiest portion is the “equity” tranche which bears the bulk of defaults from the bonds or loans in the trust and serves to protect to some degree the other, more senior tranches from default. Since it is partially protected from defaults, a senior tranche typically has higher ratings and lower yields than its underlying securities, and can be rated investment grade. Despite the protection from the equity tranche, the various tranches can experience substantial losses due to actual defaults, increased sensitivity to defaults due to collateral default and disappearance of protecting tranches, market anticipation of defaults, as well as aversion to such securities as a class.

Certain structured products may be thinly traded or have a limited trading market and may have the effect of increasing the Fund’s illiquidity to the extent that the Fund, at a particular point in time, may be unable to find qualified buyers for, and may have difficulty valuing, these securities. CBOs, CLOs and other CDOs are typically privately offered and sold, and thus, are not registered under the securities laws. As a result, investments in CDOs may be characterized by the Fund as illiquid securities; however, an active dealer market may exist for CDOs allowing a CDO to be considered liquid in some circumstances. In addition to the general risks associated with fixed income securities discussed herein, CDOs carry additional risks including, but not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or the collateral may go into default; (iii) the possibility that the CDOs are subordinate to other classes of obligations issued by the same issuer; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

Structured notes are derivative securities for which the amount of principal repayment and/or interest payments is based on the movement of one or more “factors.” These factors include, but are not limited to: currency exchange rates, interest rates (such as the prime lending rate or LIBOR), referenced bonds and stock indices. Some of these factors may or may not correlate to the total rate of return on one or more underlying instruments referenced in such notes. In some cases, the impact of the movements of these factors may increase or decrease through the use of multipliers or deflators. A credit-linked note is a derivative instrument that is an obligation between two or more parties where the payment of principal and/or interest is based on the performance of some obligation (a reference obligation).

The Fund may have the right to receive payments to which it is entitled only from the issuer of the structured product, and generally does not have direct rights against the issuer of, or the entity that sold, the assets underlying the structured product. While certain structured products enable the investor to acquire interests in a pool of securities without the brokerage and other expenses associated with directly holding such securities, investors in structured products generally pay their share of the structured product's administrative and other expenses.

## Table of Contents

Structured products may be private investment funds (structured as trusts or other types of pooled investment companies that are excluded from the definition of “investment company” under the 1940 Act by the operation of Section 3(c)(1) or 3(c)(7) thereof) or investment companies that are registered under the 1940 Act. Investment in such products involves operating expenses and fees that are in addition to the expenses and fees of the Fund, and such expenses and fees are borne indirectly by holders of the Fund’s Common Shares. For structured products that are registered under the 1940 Act, please also see “Investment Objectives and Principal Investment Strategy—Other Investments—Securities of Other Investment Companies.”

### Swaps

The Fund may enter into swap transactions, including credit default, total return, index and interest rate swap agreements, as well as options thereon, and may purchase or sell interest rate caps, floors and collars. A swap is a derivative in the form of an agreement to exchange the return generated by one instrument for the return generated by another instrument. A swap transaction involves swapping one or more investment characteristics of a security or a basket of securities with another party. The payment streams are calculated by reference to the investment characteristic(s) chosen applied to an agreed upon notional amount.

A credit default swap is an agreement between two parties to exchange the credit risk of a particular issuer or reference entity. In a credit default swap transaction, a buyer pays periodic fees in return for payment by the seller which is contingent upon an adverse credit event occurring in the underlying issuer or reference entity. The seller collects periodic fees from the buyer and profits if the credit of the underlying issuer or reference entity remains stable or improves while the swap is outstanding, but the seller in a credit default swap contract would be required to pay an agreed upon amount to the buyer (which may be the entire notional amount of the swap) in the event of an adverse credit event in the reference entity. A buyer of a credit default swap is said to buy protection whereas a seller of a credit default swap is said to sell protection.

Total return and index swaps are used as substitutes for owning the physical securities that compose a given market index or to obtain non-leveraged exposure in markets where no physical securities are available such as an interest rate index. Total return refers to the payment (or receipt) of an index’s total return, which is then exchanged for the receipt (or payment) of a floating interest rate. Total return swaps provide the Fund with the additional flexibility of gaining exposure to a market or sector index by using the most cost-effective vehicle available.

An interest rate swap involves the exchange by the Fund with another party of their respective commitments to pay or receive interest. The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index exceeds a predetermined interest rate, to receive payments of interest on a contractually-based principal amount from the party selling the interest rate cap. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a contractually-based principal amount from the party selling the interest rate floor. An interest rate collar combines the elements of purchasing a cap and selling a floor. The collar protects against an interest rate rise above the maximum amount but foregoes the benefit of an interest rate decline below the minimum amount.

The Fund may write (sell) and purchase put and call swap options. A swap option is a contract that gives a counterparty the right (but not the obligation) to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms.

Swaps generally do not involve the delivery of securities, other underlying assets or principal. Accordingly, the risk of loss with respect to swaps is limited to the net amount of payments that the Fund is contractually obligated to make. However, because some swap agreements have a leverage component, adverse changes in the value or level of

the underlying asset, reference rate, or index can result in a loss substantially greater than the amount invested in the swap itself. If the other party to a swap defaults, the Fund's risk of loss consists of the net amount of payments that the Fund is contractually entitled to receive. Currency swaps usually involve the delivery of the entire principal value of one designated currency in exchange for the other designated currency. Therefore, the entire principal value of a currency swap is subject to the risk that the other party to the swap will default on its contractual delivery obligations. If there is a default by the counterparty, the Fund may have contractual remedies pursuant to the agreements related to the transaction. The swap market has grown substantially in recent years with a large number of banks and investment banking firms acting both as principals and as agents utilizing standardized swap

## Table of Contents

documentation. Caps, floors and collars are more recent innovations for which standardized documentation has not yet been fully developed and, accordingly, they are less liquid than swaps.

The Fund may engage in swap options for hedging purposes, to manage and mitigate credit and interest rate risks and to gain exposure to credit obligations. The use of swap options involves risks, including, among others, (i) changes in the market value of securities held by the Fund, and of swap options relating to those securities may not be proportionate, (ii) there may not be a liquid market to sell a swap option, which could result in difficulty closing a position, (iii) swap options can magnify the extent of losses incurred due to changes in the market value of the securities to which they relate and (iv) counterparty risk.

The Fund will usually enter into swaps on a net basis, i.e., the two payment streams are netted out in a cash settlement on the payment date or dates specified in the instrument, with the Fund receiving or paying, as the case may be, only the net amount of the two payments. The Fund's obligations under a swap agreement will be accrued daily (offset against any amounts owing to the Fund) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by the maintenance of a segregated account consisting of cash or liquid securities to avoid any potential leveraging of the Fund. The Fund may enter into over-the-counter derivatives transactions (swaps, caps, floors and puts).

It is possible that government regulation of various types of derivative instruments, including futures and swap agreements, may limit or prevent the Fund from using such instruments as part of its investment strategy, which could negatively impact the Fund. For example, through its comprehensive new regulatory regime for derivatives, the Dodd-Frank Act will impose mandatory clearing, exchange-trading and margin requirements on many derivatives transactions (including formerly unregulated over-the-counter derivatives) in which the Fund may engage. The Dodd-Frank Act also creates new categories of regulated market participants, such as "swap dealers," "security-based swap dealers," "major swap participants," and "major security-based swap participants" who will be subject to significant new capital, registration, recordkeeping, reporting, disclosure, business conduct and other regulatory requirements. The details of these requirements and the parameters of these categories remain to be clarified through rulemaking and interpretations by the Commodity Futures Trading Commission, the SEC, the Federal Reserve Board and other regulators in a regulatory implementation process which is expected to take a significant amount of time.

Nonetheless, the possible effect of the Dodd-Frank Act likely will be to increase the Fund's overall costs of entering into derivatives transactions. In particular, new margin requirements, position limits and capital charges, even if not directly applicable to the Fund, may cause an increase in the pricing of derivatives transactions sold by market participants to whom such requirements apply. Administrative costs, due to new requirements such as registration, recordkeeping, reporting, and compliance, even if not directly applicable to the Fund, may also be reflected in higher pricing of derivatives. New exchange-trading and trade reporting requirements may lead to reductions in the liquidity of derivative transactions, causing higher pricing or reduced availability of derivatives, or the reduction of arbitrage opportunities for the Fund, adversely affecting the performance of certain of the Fund's trading strategies.

The Fund intends to comply with applicable regulatory requirements when implementing swaps, including the segregation of cash and/or liquid securities on the books of the Fund's custodian, as mandated by SEC rules or SEC staff positions.

### Use of Segregated and Other Accounts

Many transactions in derivative instruments (including swaps), in addition to other requirements, require that the Fund segregate cash and/or liquid securities to the extent Fund obligations are not covered or subject to offsetting positions or transactions. In general, either the full amount of any obligation by the Fund to pay or deliver securities or assets

must be covered at all times by the securities, instruments or currency required to be delivered (or securities convertible into the needed securities without additional consideration), or, subject to any regulatory restrictions, the Fund must segregate cash and/or liquid securities in an amount at least equal to the current amount of the obligation. In the case of a futures contract or an option on a futures contract, the Fund must deposit initial margin and possible daily variation margin in addition to segregating cash and/or liquid securities sufficient to meet its obligation to purchase or provide securities or currencies, or to pay the amount owed at the

## Table of Contents

expiration of a cash settled futures contract. Transactions in derivative instruments may be covered by other means when consistent with applicable regulatory policies. The Fund may also enter into offsetting transactions so that its combined position, coupled with any segregated cash and/or liquid securities, equals its net outstanding obligation.

### Foreign Securities

The Fund may invest without limitation in securities of borrowers that are organized or located in countries other than the United States, including non-U.S. dollar denominated securities and may invest without limitation in obligations of issuers located in emerging market countries. The percentage of assets invested in securities of a particular country or denominated in a particular currency will vary in accordance with the Fund's assessment of the relative yield, appreciation potential and the relationship of a country's currency to the U.S. dollar, which is based upon such factors as fundamental economic strength, credit quality and interest rate trends. Investments in securities of foreign issuers present certain risks not ordinarily associated with investments in securities of U.S. issuers, including that non-U.S. issuers may be subject to less rigorous accounting and reporting requirements than U.S. issuers, less rigorous regulatory requirements, different and perhaps not as well formulated and defined legal systems and laws relating to creditors' rights, the potential inability to enforce legal judgments and the potential for political, social and economic adversity. Investments by the Fund in non-U.S. dollar denominated investments will be subject to substantially similar risks to those associated with direct investment in securities of foreign issuers, and are subject to currency risk as well. Currency risk is the risk that fluctuations in the exchange rates between the U.S. dollar and non-U.S. currencies may negatively affect an investment. The value of investments denominated in non-U.S. currencies may fluctuate based on changes in the value of those currencies relative to the U.S. dollar, and a decline in applicable foreign exchange rates could reduce the value of such investments held by the Fund. The Fund may also hold non-U.S. dollar denominated Senior Loans or other securities received as part of a reorganization or restructuring. In addition, the underlying issuers of certain depositary receipts, particularly unsponsored or unregistered depositary receipts, are under no obligation to distribute shareholder communications to the holders of such receipts, or to pass through to them any voting rights with respect to the deposited securities.

The foreign securities in which the Fund may invest may be issued by companies or governments located in emerging market countries. Investing in the securities of issuers operating in emerging markets involves a high degree of risk and special considerations not typically associated with investing in the securities of other foreign or U.S. issuers. Compared to the United States and other developed countries, emerging market countries may have relatively unstable governments, economies based on only a few industries and securities markets that trade a small number of securities. Securities issued by companies or governments located in emerging market countries tend to be especially volatile and may be less liquid than securities traded in developed countries. Securities in these countries have been characterized by greater potential loss than securities of companies and governments located in developed countries. Investments in the securities of issuers located in emerging markets could be affected by risks associated with expropriation and/or nationalization, political or social instability, pervasiveness of corruption and crime, armed conflict, the impact on the economy of civil war, religious or ethnic unrest and the withdrawal or non-renewal of any license enabling the Fund to trade in securities of a particular country, confiscatory taxation, restrictions on transfers of assets, lack of uniform accounting and auditing standards, less publicly available financial and other information, diplomatic development which could affect U.S. investments in those countries and potential difficulties in enforcing contractual obligations.

Since the Fund may invest in securities of foreign issuers denominated in the local currency, changes in foreign currency exchange rates will affect the value of securities in the Fund's portfolio and the unrealized appreciation or depreciation of investments. In addition to changes in the value of the Fund's portfolio investments resulting from currency fluctuations, the Fund may incur costs in connection with conversions between various currencies. The Fund may also invest directly in currencies for hedging purposes. The Fund is subject to the risk that those currencies will

decline in value relative to the U.S. dollar. The values of the currencies of the emerging market countries in which the Fund may invest may be subject to a high degree of fluctuation due to changes in interest rates, the effects of monetary policies issued by the United States, foreign governments, central banks or supranational entities, the imposition of currency controls or due to other national or global political or economic developments. Foreign exchange dealers realize a profit based on the difference between the prices at which they are buying and selling various currencies. Thus, a dealer normally will offer to sell a foreign currency to the Fund at one rate, while offering a lesser rate of exchange should the Fund desire immediately to resell that currency to the dealer. The Fund conducts its foreign currency exchange transactions either on a spot (i.e., cash) basis at the spot

Table of Contents

rate prevailing in the foreign currency exchange market, or through entering into forward, futures or options contracts to purchase or sell foreign currencies. Therefore, the Fund's exposure to foreign currencies may result in reduced returns to the Fund. The Fund may also engage in foreign currency hedging transactions. See "—Foreign currency transactions" below.

Investing in Euro-denominated (or other European currency-denominated) securities entails risk of being exposed to a currency that may not fully reflect the strengths and weaknesses of the disparate European economies. In addition, it is possible that the Euro could be abandoned in the future by countries that have already adopted its use. The effects of such an abandonment on the applicable country and the rest of the European Economic and Monetary Union ("EMU") are uncertain but could be negative and severe. Many European countries rely heavily upon export-dependent businesses and any change in the exchange rate between the Euro and the U.S. dollar can have either a positive or a negative effect upon corporate profits and the performance of investments in the European Union. Moreover, as the European debt crisis has progressed, the possibility of one or more European countries exiting the EMU, or even of the collapse of the Euro as a common currency, has arisen. The effects of the collapse of the Euro, or of the exit of one or more countries from the EMU, on the United States and global economy and securities markets are impossible to predict and any such events could have a significant adverse impact on the value and risk profile of the Fund's portfolio.

Foreign currency transactions. The Fund may enter into forward foreign currency exchange contracts ("forward contracts") for hedging purposes. A forward contract involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are traded in the interbank market conducted directly between currency traders (usually large, commercial and investment banks) and their customers. A non-deliverable currency forward contract is a short-term forward contract on a thinly traded non-convertible foreign currency where the profit and loss is the difference between a specified exchange rate and the spot rate at the time of settlement. A forward contract generally has no deposit requirement, and no commissions are charged at any stage for trades. By entering into a forward contract for the purchase or sale, for a fixed amount of dollars or other currency, of the amount of foreign currency involved in the underlying security transactions, the Fund may be able to protect itself against a possible loss resulting from an adverse change in the relationship between the U.S. dollar or other currency which is being used for the security purchase and the foreign currency in which the security is denominated during the period between the date on which the security is purchased or sold and the date on which payment is made or received. They may also be used to lock in the current exchange rate of the currency in which those securities anticipated to be purchased are denominated. At times, the Fund may enter into "cross-currency" hedging transactions involving currencies other than those in which securities that are held or proposed to be purchased are denominated. The Fund may also enter into currency swap transactions. A currency swap generally involves an agreement to pay interest streams in one currency based on a specified index in exchange for receiving interest streams denominated in another currency. Such swaps also usually involve initial and final exchanges of the designated currency that correspond to an agreed upon notional amount. Currency swaps usually involve the delivery of the entire principal value of one designated currency in exchange for the other designated currency. Therefore, the entire principal value of a currency swap is subject to the risk that the other party to the swap will default on its contractual delivery obligations.

The Fund may conduct its foreign currency exchange transactions either on a spot (i.e., cash) basis at the spot rate prevailing in the foreign currency exchange market, or through entering into forward contracts to purchase or sell foreign currencies. The Fund will not enter into forward contracts or maintain a net exposure to these contracts where the consummation of the contracts would obligate the Fund to deliver an amount of foreign currency in excess of the value of the Fund's portfolio securities. When required by law, the Fund will cause its custodian bank to earmark cash or other liquid portfolio securities in an amount equal to the net amounts of the Fund's currency exposure under its forward contracts. If the value of the securities so earmarked declines, additional cash or liquid securities will be

earmarked on a daily basis so that the value of such securities will equal the net amount of the Fund's currency exposure with respect to such contracts. Forward contracts may limit gains on portfolio securities that could otherwise be realized had they not been utilized and could result in losses. The contracts may also increase the Fund's volatility and may involve a significant amount of risk relative to the investment of cash.

Although the Fund values its assets daily in terms of U.S. dollars, it does not intend to convert its holdings of foreign currencies into U.S. dollars on a daily basis. It will, however, do so from time to time, and investors should

## Table of Contents

be aware of the costs of currency conversion. Although foreign exchange dealers do not charge a fee for conversion, they do realize a profit based on the spread between the prices at which they are buying and selling various currencies. Thus, a dealer may offer to sell a foreign currency to the Fund at one rate, while offering a lesser rate of exchange should the Fund desire to resell that currency to the dealer.

### Other Derivative Instruments

The Fund generally seeks to use certain derivative instruments as portfolio management or hedging techniques. In doing so, the Fund seeks to protect against possible adverse changes in the market value of securities held in or to be purchased for the Fund's portfolio, protect the Fund's unrealized gains, facilitate the sale of certain securities for investment purposes, protect against changes in currency exchange rates or adjust the exposure to a particular currency, manage the effective maturity or duration of the Fund's portfolio, or establish positions in the derivatives markets as a substitute for purchasing or selling particular securities. The Fund may also use derivative instruments to earn income. Among derivative instruments the Fund may utilize are forward contracts, options, futures contracts and options on futures contracts. In addition, the Fund may invest in other derivative instruments that are developed over time if their use would be consistent with the objectives of the Fund.

Derivative instruments have risks, including the imperfect correlation between the value of such instruments and the underlying assets, the possible default of the other party to the transaction and illiquidity of the derivative instrument. Furthermore, the ability to successfully use derivative instruments depends on the ability of the Fund to predict pertinent market movements, which cannot be assured. In addition, transactions in such instruments may involve commissions and other costs, which may increase the Fund's expenses and reduce its return. Thus, the use of derivative instruments may result in losses greater than if they had not been used, may require the Fund to sell or purchase portfolio securities at inopportune times or for prices other than current market values, may limit the amount of appreciation the Fund can otherwise realize on an investment, or may cause the Fund to hold a security that it might otherwise sell. In addition, amounts paid as premiums and cash or other assets held in margin accounts with respect to derivative instruments are not otherwise available to the Fund for investment purposes.

When conducted outside the United States, transactions in derivative instruments may not be regulated as rigorously as in the United States, may not involve a clearing mechanism and related guarantees, and are subject to the risk of governmental actions affecting trading in, or the prices of, foreign securities, currencies and other instruments. The value of such positions also could be adversely affected by: (i) other complex foreign political, legal and economic factors, (ii) lesser availability than in the United States of data on which to make trading decisions, (iii) delays in the Fund's ability to act upon economic events occurring in foreign markets during non-business hours in the United States, (iv) the imposition of different exercise and settlement terms and procedures and margin requirements than in the United States and (v) lower trading volume and liquidity.

The Fund can engage in options transactions on securities, indices or on futures contracts to attempt to manage the Fund's risk in advancing or declining markets. For example, the value of a put option generally increases as the value of the underlying security declines. Value is protected against a market decline to the degree the performance of the put correlates with the performance of the Fund's investment portfolio. If the market remains stable or advances, the Fund can refrain from exercising the put and its portfolio will participate in the advance, having incurred only the premium cost for the put. The Fund may purchase and sell listed and over-the-counter options ("OTC Options"). OTC Options are subject to certain additional risks including default by the other party to the transaction and the liquidity of the transactions.

The Fund may enter into contracts for the purchase or sale for future delivery of securities or contracts based on financial indices including any index of domestic or foreign government securities (futures contracts) and may

purchase and write put and call options to buy or sell futures contracts (options on futures contracts). A sale of a futures contract means the acquisition of a contractual obligation to deliver the securities called for by the contract at a specified price on a specified date. A purchase of a futures contract means the incurring of a contractual obligation to acquire the securities called for by the contract at a specified price on a specified date. The purchaser of a futures contract on an index agrees to take delivery of an amount of cash equal to the difference between a specified multiple of the value of the index on the expiration date of the contract and the price at which the contract was originally struck. No physical delivery of the securities underlying the index is made. These investment techniques generally are used to protect against anticipated future changes in interest rates which otherwise might either

## Table of Contents

adversely affect the value of the Fund's portfolio securities or adversely affect the price of securities which the Fund intends to purchase at a later date. In addition, some strategies can be performed with greater ease and at lower cost by utilizing the options and futures contracts markets rather than purchasing or selling portfolio securities. However, such transactions involve risks different from those involved with direct investments in underlying securities.

The Fund intends to comply with applicable regulatory requirements when implementing derivative instruments including the segregation of cash and/or liquid securities on the books of the Fund's custodian, as mandated by SEC rules or SEC staff positions. See "Investment Objectives, Policies and Risks—Additional Risks of Other Derivative Instruments" in the SAI.

### Equity Securities

Common stock generally represents an ownership or equity interest in an issuer, without preference over any other class of securities, including such issuer's debt securities, preferred stock and other senior equity securities. Common stocks are entitled to the income and increase in the value of the assets and business of the issuer after all its debt obligations and obligations to preferred stockholders are satisfied. Common stocks generally have voting rights. Common stocks fluctuate in price in response to many factors including historical and prospective earnings of the issuer, the value of its assets, general economic conditions, interest rates, investor perceptions and market liquidity. They may or may not pay dividends, as some issuers reinvest all of their profits back into their businesses, while others pay out some of their profits to stockholders as dividends, while others do not generate sufficient income to support a dividend.

### Other Investments

#### Securities of Other Investment Companies

The Fund may invest its assets in securities of other open- and closed-end investment companies, including affiliated registered investment companies to the extent permitted by the 1940 Act. As a shareholder in an investment company, the Fund will bear its ratable share of that investment company's expenses, and will remain subject to payment of the Fund's investment advisory and other fees and expenses with respect to assets so invested. Common Shareholders will therefore be subject to duplicative expenses to the extent that the Fund invests in other investment companies. Expenses will be taken into account when evaluating the merits of such investments. In addition, the securities of other investment companies may also be leveraged and will therefore be subject to certain leverage risks. The net asset value and market value of leveraged securities will be more volatile and the yield to stockholders will tend to fluctuate more than the yield generated by unleveraged securities. Investment companies may have investment policies that differ from those of the Fund. If the Fund invests in securities issued by an investment company that are not credit obligations, such investment will only count toward the Fund's 80% portfolio guideline if the investment company itself has a policy to invest at least 80% of its assets in credit obligations. If the Fund invests in affiliated registered investment companies, it is not anticipated that such investment companies would waive any sales load or other fees for the Fund.

### Zero Coupon Bonds

Certain debt obligations purchased by the Fund may take the form of zero coupon bonds. A zero coupon bond is a bond that does not pay interest either for the entire life of the obligation or for an initial period after the issuance of the obligation. When held to its maturity, its return comes from the difference between the purchase price and its maturity value. A zero coupon bond is normally issued and traded at a deep discount from face value. Zero coupon bonds allow an issuer to avoid or delay the need to generate cash to meet current interest payments and, as a result, may

involve greater market risk and credit risk than bonds that pay interest currently or in cash. The Fund would be required to distribute the income on any of these instruments as it accrues, even though the Fund will not receive all of the income on a current basis or in cash. Thus, the Fund may have to sell other investments, including when it may not be advisable to do so, to make income distributions to its shareholders. Distributions attributable to the Fund's "original issue discount" income accruing on zero coupon bonds, and of all other ordinary income, will generally be taxable to the Common Shareholders as ordinary income. As a consequence of selling investments in order to make distributions of "original issue discount" income and other income in respect of which the Fund has not received a corresponding amount of cash, the Fund may realize additional income that gives rise to additional

## Table of Contents

distribution requirements; distributions of such additional income may be taxable to the Common Shareholders as ordinary income or as long-term capital gain depending on which investments are sold. See “Tax Matters—Distributions” in the SAI.

### Repurchase Agreements and Reverse Repurchase Agreements

The Fund may engage in repurchase agreements with broker-dealers, banks and other financial institutions to earn incremental income on temporarily available cash which would otherwise be uninvested. A repurchase agreement is a short-term investment in which the purchaser (i.e., the Fund) acquires ownership of a security and the seller agrees to repurchase the obligation at a future time and set price, thereby determining the yield during the holding period. Repurchase agreements involve certain risks in the event of default by the other party. The Fund may enter into repurchase agreements with broker-dealers, banks and other financial institutions deemed to be creditworthy.

Repurchase agreements are required to be fully collateralized by the underlying securities and are considered to be loans under the 1940 Act. The Fund pays for such securities only upon physical delivery or evidence of book entry transfer to the account of a custodian or bank acting as agent. The seller under a repurchase agreement will be required to maintain the value of the underlying collateral securities marked-to-market daily at not less than the repurchase price. The underlying securities (normally securities of the U.S. government and its agencies or instrumentalities) may have maturity dates exceeding one (1) year.

The Fund may borrow through entering into reverse repurchase agreements under which the Fund sells portfolio investments to financial institutions such as banks and broker-dealers and generally agrees to repurchase them at a mutually agreed future date and price. Generally, the effect of a reverse repurchase agreement is that, during the term of the agreement, the Fund can obtain and reinvest all or most of the cash value of the portfolio investment it sold under the agreement and still be entitled to the returns associated with such portfolio investment—thereby resulting in a transaction similar to a borrowing and giving rise to leverage for the Fund. The Fund may utilize reverse repurchase agreements when it is anticipated that the interest income to be earned from the investment of the proceeds of the transaction is greater than the interest expense of the transaction.

In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the Fund’s use of the proceeds of the agreement may be restricted pending a determination by the other party, or its trustee or receiver, whether to enforce the Fund’s obligation to repurchase the securities. Reverse repurchase agreements are considered to be borrowings under the 1940 Act unless the Fund segregates an amount of cash and/or liquid securities equal to the Fund’s obligations under the reverse repurchase agreements (or segregates such other amount permitted by the 1940 Act or SEC guidance from time to time).

### When-Issued and Delayed Delivery Securities

The Fund may purchase and sell securities on a “when-issued” or “delayed delivery” basis whereby the Fund buys or sells a security with payment and delivery taking place in the future. The payment obligation and the interest rate are fixed at the time the Fund enters into the commitment. No income accrues to the Fund on securities in connection with such transactions prior to the date the Fund actually takes delivery of such securities. These transactions are subject to market risk as the value or yield of a security at delivery may be more or less than the purchase price or the yield generally available on securities when delivery occurs. In addition, the Fund is subject to counterparty risk because it relies on the buyer or seller, as the case may be, to consummate the transaction, and failure by the other party to complete the transaction may result in the Fund missing the opportunity of obtaining a price or yield considered to be advantageous. When the Fund is the buyer in such a transaction, however, it will segregate cash and/or liquid securities having an aggregate value at least equal to the amount of such purchase commitments until payment is

made. An increase in the percentage of the Fund's assets committed to the purchase of securities on a when-issued or delayed delivery basis may increase the volatility of the Fund's NAV.

#### Private Placements and Restricted Securities

The Fund may invest in securities which are subject to restrictions on resale because they have not been registered under the Securities Act. These securities are generally referred to as private placements or restricted securities. Limitations on the resale of these securities may have an adverse effect on their marketability, and may

## Table of Contents

prevent the Fund from disposing of them promptly at reasonable prices. The Fund may have to bear the expense of registering the securities for resale and the risk of substantial delays in effecting the registration.

The Fund has no liquidity limitation or restriction; thus, some or all of the Fund investments may be in illiquid securities. At times, private placements or restricted securities, as well as other securities in which the Fund may invest, may be deemed illiquid. Investments in illiquid securities tend to restrict the Fund's ability to dispose of instruments in a timely fashion and restrict the Fund's ability to take advantage of market opportunities.

### Short Sales

The Fund may engage in short sales. A short sale is a transaction in which the Fund sells an instrument that it does not own in anticipation that the market price will decline. To deliver the securities to the buyer, the Fund arranges through a broker to borrow the securities and, in so doing, the Fund becomes obligated to replace the securities borrowed at their market price at the time of replacement. When selling short, the Fund intends to replace the securities at a lower price and therefore, profit from the difference between the cost to replace the securities and the proceeds received from the sale of the securities. When the Fund makes a short sale, the proceeds it receives from the sale will be held on behalf of a broker until the Fund replaces the borrowed securities. The Fund may have to pay a premium to borrow the securities and must pay any dividends or interest payable on the securities until they are replaced. The Fund's obligation to replace the securities borrowed in connection with a short sale will be secured by collateral deposited with the broker that consists of cash and/or liquid securities. In addition, the Fund will place in a segregated account an amount of cash and/or liquid securities equal to the difference, if any, between (i) the market value of the securities sold at the time they were sold short, and (ii) any cash and/or liquid securities deposited as collateral with the broker in connection with the short sale. Short sales involve certain risks and special considerations. If the Fund incorrectly predicts that the price of the borrowed security will decline, the Fund will have to replace the securities with securities with a greater value than the amount received from the sale. As a result, losses from short sales differ from losses that could be incurred from a purchase of a security, because losses from short sales may be unlimited, whereas losses from purchases can equal only the total amount invested.

### Warrants

Warrants give holders the right, but not the obligation, to buy common stock of an issuer at a given price, usually higher than the market price at the time of issuance, during a specified period. The risk of investing in a warrant is that the warrant may expire prior to the market value of the common stock exceeding the price fixed by the warrant. Warrants have a subordinate claim on a borrower's assets compared with Senior Loans. As a result, the values of warrants generally are dependent on the financial condition of the borrower and less dependent on fluctuations in interest rates than are the values of many debt securities. The values of warrants may be more volatile than those of Senior Loans and this may increase the volatility of the Fund's NAV of the Common Shares.

### Temporary Investments

During the period in which the net proceeds of this offering are being invested, in order to keep the Fund's cash fully invested and, for defensive purposes, during periods in which the Avenue Managers believe that changes in economic, financial or political conditions make it advisable to do so, the Fund may reduce its primary investment holdings (when taking a defensive position) and invest in certain short-term (less than one (1) year to maturity) and medium-term (not greater than five (5) years to maturity) debt securities or hold cash. The short-term and medium-term debt securities in which the Fund may invest consist of: (i) obligations of the U.S. government, its agencies or instrumentalities; (ii) bank deposits and bank obligations (including certificates of deposit, time deposits and bankers' acceptances) of U.S. or foreign banks denominated in any currency; (iii) floating rate securities and other

instruments denominated in any currency issued by various governments or international development agencies; (iv) finance company and corporate commercial paper and other short-term corporate debt obligations of U.S. or foreign corporations; (v) repurchase agreements with banks and broker-dealers with respect to such securities; and (vi) shares of money market funds. The Fund intends to invest for these temporary purposes only in short-term and medium-term debt securities that the Avenue Managers believe to be of high quality, i.e., subject to relatively low risk of loss of interest or principal. In taking such positions, the Fund temporarily would not be pursuing and may not achieve its investment objectives. It is impossible to predict when, or for how long, the Fund will use these alternative strategies. There can be no assurance that such strategies will be successful.

Table of Contents

Use of Leverage and Related Risks

The Fund currently intends to utilize financial leverage for investment purposes (i.e., to purchase additional portfolio securities consistent with the Fund's investment objectives and primary investment strategy). The Fund has utilized leverage since shortly after it began investment operations and expects to continue to use leverage, although there can be no assurance, however, that the Fund will continue to engage in any leveraging techniques. The Fund is currently a party to the Credit Facility and, as of February 2, 2012, had \$40,000,000 in borrowings outstanding under the Credit Facility which represented 24% of the Fund's total assets as of such date (including the proceeds of such leverage). At the completion of the rights offering, the percentage of the Fund's total assets represented by borrowings or other forms of leverage is to remain approximately the same as immediately before completion. Although the Fund is permitted to borrow money and issue senior securities to the extent permitted by the 1940 Act (as described in "Investment Restrictions" in the SAI), the Fund's current Credit Facility does not permit the Fund to have more than \$65 million in borrowings outstanding at any one time and imposes other limits on indebtedness that are more stringent than the 1940 Act. The Fund's portfolio investments, among other property of the Fund, have been pledged as collateral to secure the loans made under the Credit Facility. Under the Credit Facility, the Fund is required to prepay outstanding loans or incur a penalty rate of interest upon the occurrence of certain events of default. Under the Credit Facility, the Fund has agreed to indemnify the lender, its affiliates and other related parties against liabilities they may incur relating to the Credit Facility. Further, until the lender's commitment to make loans has terminated and the Fund's borrowings have been repaid, the Credit Facility imposes on the Fund customary covenants, including all of the restrictive covenants described below in the last paragraph of "Description of Capital Structure—Credit Facility/Commercial Paper Program/Notes" (other than a covenant requiring currency hedging). The Credit Facility expires on March 9, 2012 (although, subject to certain conditions including the payment of an additional fee, the Fund may extend the maturity date of its outstanding loans for up to approximately one (1) year following such expiration date). The Fund intends to renew the existing Credit Facility and is currently in negotiations to do so. Although the Fund currently intends to renew the Credit Facility, there can be no assurance that the Fund will be able to do so or do so on terms similar to the current Credit Facility, which may adversely affect the ability of the Fund to pursue its investment objectives and strategies. Following completion of the rights offering, the Fund currently intends to adjust leverage in its portfolio from time to time through the Credit Facility.

The Fund may also enter into other transactions that may give rise to a form of leverage including, among others, derivative transactions, loans of portfolio securities, and when-issued, delayed delivery and forward commitment transactions. Although it has no current intention to do so in the next twelve months, the Fund may also determine to issue preferred shares or notes to add leverage to its portfolio. Although the Fund currently intends to use leverage as discussed below, there can be no assurance that the Fund will continue to utilize financial leverage or that, if utilized, the Fund will be successful during any period in which leverage is employed. Generally speaking, if the Fund can invest the proceeds from financial leverage in portfolio securities that have higher rates of return than the costs of such financial leverage and other expenses of the Fund, then the Common Shareholders would have a net benefit.

The Fund is permitted to obtain leverage using any form or combination of financial leverage instruments, including reverse repurchase agreements, credit facilities such as bank loans or commercial paper, and the issuance of preferred shares or notes. Subject to prevailing market conditions, the Fund intends to use leveraging instruments to add financial leverage to its portfolio representing up to approximately 331/3% of the Fund's total assets (including the assets subject to, and obtained with the proceeds of, such instruments). The Fund's intention to limit its use of financial leverage to 331/3% of the Fund's total assets is not a fundamental policy of the Fund and may be changed without notice to the Fund's Common Shareholders. The Fund intends to use leverage opportunistically and may choose to increase or decrease its leverage, or use different types or combinations of leveraging instruments, at any time based on the Fund's assessment of market conditions and the investment environment.

The 1940 Act generally limits the extent to which the Fund may utilize “uncovered” reverse repurchase agreements and borrowings, together with any other senior securities representing indebtedness. Under the 1940 Act, the Fund is not permitted to incur indebtedness unless immediately after such incurrence the Fund has an asset coverage of at least 300% of the aggregate outstanding principal balance of the indebtedness (i.e., such indebtedness may not exceed 331/3% of the Fund’s total assets (including the proceeds from leverage)). Additionally, under the 1940 Act, the Fund generally may not declare any dividend or other distribution upon any class of its capital shares,

Table of Contents

or purchase any such capital shares, unless the aggregate indebtedness of the Fund has, at the time of the declaration of such dividend or distribution, or at the time of any such purchase, an asset coverage of at least 300% after deducting the amount of such dividend, distribution or purchase price, as the case may be. With respect to asset coverage for preferred shares, under the 1940 Act, the Fund is not permitted to issue preferred shares unless immediately after such issuance the net asset value of the Fund's portfolio is at least 200% of the liquidation value of the outstanding preferred shares (i.e., such liquidation value may not exceed 50% of the Fund's total assets (less the Fund's obligations under uncovered reverse repurchase agreements, borrowings and other senior securities representing indebtedness)). In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless, at the time of such distribution, the net asset value of the Fund's portfolio (determined after deducting the amount of such dividend or other distribution) is at least 200% of such liquidation value. If the Fund uses a combination of borrowing (including notes and other securities representing indebtedness) and issuing preferred shares, the maximum asset coverage required would be between 300% and 200% depending on the relative amounts of borrowings and preferred shares.

The asset coverage requirements under the 1940 Act set forth in the foregoing paragraph would only apply to the Fund's "uncovered" reverse repurchase agreements. "Covered" reverse repurchase agreements will not be counted against the foregoing limits under the 1940 Act (although the proceeds of, and assets subject to, such agreements would still be counted as part of the Fund's total assets). A reverse repurchase agreement will be considered "covered" if the Fund segregates an amount of cash and/or liquid securities equal to the Fund's obligations under such reverse repurchase agreement (or segregates such other amounts as may be permitted by the 1940 Act or SEC guidance from time to time); otherwise, a reverse repurchase agreement will be considered "uncovered." The Fund may not cover a reverse repurchase agreement if it does not need to do so to comply with the foregoing 1940 Act requirements and, in the view of an Avenue Manager, the assets that would have been used to cover could be better used for a different purpose.

The Fund's Board regularly reviews the Fund's use of financial leverage (i.e., the relative costs and benefits of leverage on the Fund's Common Shares) and reviews the alternative means to leverage (i.e., the relative benefits and costs of using reverse repurchase agreements, credit facilities such as bank loans or commercial paper, the issuance of preferred shares or notes, or combinations thereof).

Leverage creates risks for holders of the Common Shares, including the likelihood of greater volatility in the NAV and market price of, and distributions on, the Common Shares. There is a risk that fluctuations in the distribution rates on any outstanding preferred shares or notes may adversely affect the return to the holders of the Common Shares. If the income from the investments purchased with such funds is not sufficient to cover the cost of leverage, the return on the Fund will be less than if leverage had not been used, and therefore the amount available for distribution to Common Shareholders will be reduced. The Fund in its reasonable judgment nevertheless may determine to maintain the Fund's leveraged position if it deems such action to be appropriate in the circumstances.

Changes in the value of the Fund's investment portfolio (including investments bought with the proceeds of leverage) will be borne entirely by the Common Shareholders. If there is a net decrease (or increase) in the value of the Fund's investment portfolio, the leverage will decrease (or increase) the NAV to a greater extent than if the Fund were not leveraged. The use of leverage by the Fund may magnify the Fund's losses when there is a decrease in the value of a Fund investment and even totally eliminate the Fund's equity in its portfolio or a Common Shareholder's equity in the Fund. During periods in which the Fund is using leverage, the fees paid by the Fund for investment advisory services will be higher than if the Fund did not use leverage because the investment advisory fees paid will be calculated on the basis of the Fund's Managed Assets, which include proceeds from leverage. As discussed under "Description of Capital Structure," if preferred shares are used, holders of preferred shares will have rights to elect a minimum of two trustees. This voting power may negatively affect Common Shareholders, and the interests of holders of preferred

shares may otherwise differ from the interests of Common Shareholders. Any trustees elected by preferred shareholders will represent both Common Shareholders as well as holders of preferred shares. Such trustees may have a conflict of interest when the interests of Common Shareholders differ from those of holders of preferred shares.

Capital raised through leverage will be subject to distribution and/or interest payments, which may exceed the income and appreciation on the assets purchased. The issuance of preferred shares or notes involves expenses

Table of Contents

associated with the Offer and other costs and may limit the Fund's freedom to pay distributions on Common Shares or to engage in other activities. All costs of offering and servicing any of the leverage methods the Fund may use will be borne entirely by the Fund's Common Shareholders. The interests of persons with whom the Fund enters into leverage arrangements (such as bank lenders, note holders and preferred shareholders) will not necessarily be aligned with the interests of the Fund's Common Shareholders and such persons will have claims on the Fund's assets that are senior to those of the Fund's Common Shareholders. Leverage creates an opportunity for a greater return per Common Share, but at the same time it is a speculative technique that will increase the Fund's exposure to capital risk. Unless the income and appreciation, if any, on assets acquired with leverage exceeds the cost of such leverage, the use of leverage will diminish the investment performance of the Fund's Common Shares compared with what it would have been without leverage.

Any lender in connection with a credit facility may impose specific restrictions as a condition to borrowing. The credit facility fees may include, among other things, up front structuring fees and ongoing commitment fees (including fees on amounts undrawn on the facility) in addition to the traditional interest expense on amounts borrowed. The credit facility may involve a lien on the Fund's assets. Similarly, to the extent the Fund issues preferred shares or notes, the Fund currently intends to seek an AAA or equivalent credit rating from one or more NRSROs on any preferred shares or notes it issues and the Fund may be subject to fees, covenants and investment restrictions required by the NRSRO as a result. Such covenants and restrictions imposed by a NRSRO or lender may include asset coverage or portfolio composition requirements that are more stringent than those imposed on the Fund by the 1940 Act. It is not anticipated that these covenants or restrictions will significantly impede the Avenue Managers in managing the Fund's portfolio in accordance with its investment objectives and policies. Nonetheless, if these covenants or guidelines are more restrictive than those imposed by the 1940 Act, the Fund may not be able to utilize as much leverage as it otherwise could have, which could reduce the Fund's investment returns. In addition, the Fund expects that any notes or a credit facility/commercial paper program would contain covenants that, among other things, will likely impose geographic exposure limitations, credit quality minimums, liquidity minimums, concentration limitations and currency hedging requirements on the Fund. These covenants would also likely limit the Fund's ability to pay distributions in certain circumstances, incur additional debt, change fundamental investment policies and engage in certain transactions, including mergers and consolidations. Such restrictions could cause the Avenue Managers to make different investment decisions than if there were no such restrictions and could limit the ability of the Board and Common Shareholders to change fundamental investment policies.

The Fund must distribute in each taxable year at least 90% of its net investment income (including net interest income and net short-term gain) to qualify for the special tax treatment available to regulated investment companies. The Fund also will be required to distribute annually substantially all of its income and capital gain, if any, to avoid imposition of a nondeductible 4% federal excise tax. Prohibitions on dividends and other distributions on the Fund's Common Shares could impair the Fund's ability to qualify as a regulated investment company under the Code.

If the Fund is precluded from making distributions on the Common Shares because of any applicable asset coverage requirements, the terms of the preferred shares (if any) may provide that any amounts so precluded from being distributed, but required to be distributed for the Fund to meet the distribution requirements for qualification as a regulated investment company, will be paid to the holders of the preferred shares as a special distribution. This distribution can be expected to decrease the amount that holders of preferred shares would be entitled to receive upon redemption or liquidation of the shares.

If the Fund failed to qualify as a regulated investment company or failed to satisfy the 90% distribution requirement in any taxable year, the Fund would be subject to U.S. federal income tax at regular corporate rates on its taxable income, including its net capital gain, even if such income were distributed to its shareholders, and all distributions out of earnings and profits would be taxed to shareholders as ordinary dividend income. Requalifying as a regulated

investment company could subject the Fund to significant tax costs. See “Tax Matters—Taxation of the Fund” in the SAI.

The Fund’s willingness to utilize leverage, and the amount of leverage the Fund will assume, will depend on many factors, the most important of which are market conditions and interest rates. Successful use of a leveraging strategy may depend on the Fund’s ability to predict correctly interest rates and market movements, and there is no

Table of Contents

assurance that a leveraging strategy will be successful during any period in which it is employed. Any leveraging of the Common Shares cannot be achieved until the proceeds resulting from the use of leverage have been invested in accordance with the Fund's investment objectives and policies.

The following table is furnished in response to requirements of the SEC. It is designed to illustrate the effects of leverage on Common Share total return, assuming investment portfolio total returns (consisting of income and changes in the value of investments held in the Fund's portfolio) of -10%, -5%, 0%, 5% and 10%. These assumed investment portfolio returns are hypothetical figures and are not necessarily indicative of the investment portfolio returns expected to be experienced by the Fund. The table assumes that the Fund adds financial leverage to its portfolio through bank borrowings representing 33 1/3% of the Fund's total assets (including the assets subject to, and obtained with the proceeds of, such instruments) with an estimated annual interest rate of 1.25%.

Assumed portfolio return (net of expenses)	(10)%	(5)%	0%	5%	10%
Corresponding Common Share return assuming 33 1/3% leverage through bank borrowings	(15.63)%	(8.13)%	(0.63)%	6.88%	14.38%

Common Share total return is composed of two elements—the Common Share dividends paid by the Fund (the amount of which is largely determined by the net investment income of the Fund) and gains or losses on the value of the securities the Fund owns. As required by SEC rules, the table above assumes that the Fund is more likely to suffer capital losses than to enjoy capital appreciation. For example, to assume a total return of 0% the Fund must assume that the interest it receives on its investments is entirely offset by losses in the value of those investments.

In addition to leverage for investment purposes, the Fund may also borrow money as a temporary measure for extraordinary or emergency purposes, including the payment of distributions and the settlement of securities transactions which otherwise might require untimely dispositions of Fund investments.

Table of Contents

Risk Factors

RISKS RELATING TO THE OFFER

Dilution Risk

As a result of this Offer, it is anticipated that even if you fully exercise your Rights, you should expect to incur immediate economic dilution and, if you do not exercise all of your Rights, you will incur voting dilution. Further, both the sales load and the expenses associated with the Offer paid by the Fund will immediately reduce the NAV of each Common Shareholder's Common Shares. To the extent that the number of Common Shares outstanding after the Offer will have increased proportionately more than the increase in the size of the Fund's net assets, you will, at the completion of the Offer, experience immediate dilution of NAV. The percentage increase in Common Shares outstanding that will occur if all the Rights are exercised is 331/
