ETN Overview:

The RBS US Large Cap Alternator Exchange Traded Notes[] (the "RBS ETNs") track the RBS US Large Cap Alternator Index[] (USD) (the "Index") which is designed to provide exposure to the US large cap equity market by alternating between three popular indices, the SandP 500([R]) Total Return Index (MC), the SandP 500([R]) Low Volatility Total Return Index (LV) and the SandP 500([R]) Equal Weight Total Return Index (EW) (each, an "Underlying Index"). Each month, the Index will track the return of the Underlying Index with the highest relative strength score, which is based on average historical returns.

RBS US Large Cap Alternator Index[] Features

Strategy: Each month, the Index will track the return of the Underlying Index with the highest relative strength score at the end of the prior month.

Relative strength score: Simple average of the 1-month, 3-month, 6-month, 9-month and 12-month returns of each of the Underlying Indices.

Rebalanced monthly: Relative strength score is calculated with respect to the last business day of each month. The Index is rebalanced at the close of the first business day of the next month.

Hypothetical Market Cycle

[GRAPHIC OMITTED]

The graph above illustrates a hypothetical market cycle and which Underlying Index the relative strength Index methodology may select in the above stage of the market cycle. The illustrations above do not reflect an actual market cycle and they are not an indication of how a market cycle may develop, how long a stage of the market cycle could last in the future, which Underlying Index will be tracked during any part of a market cycle or whether any Underlying Index will be tracked at all or in any particular order.

SandP 500([R]) Total Return Index

[] Tracks the 500 largest U.S. stocks weighted by market capitalization.

[] Expected to outperform the other Underlying Indices during the last stage of a bull market.

Edgar Filing: ROYAL BANK OF SCOTLAND GROUP PLC - Form FWP

[] May underperform low volatility indices in falling and choppy markets.

SandP 500([R]) Low Volatility Total Return Index

[] Consists of the 100 stocks from the SandP 500([R]) Index with the lowest historical volatility over the past 12 months. The least volatile stocks have the largest weighting in the index.

[] Expected to outperform the other Underlying Indices in choppy markets and tracks the historically least volatile stocks of the SandP 500([R]) Index.

[] May underperform the other Underlying Indices in a rising market.

SandP 500([R]) Equal Weight Total Return Index

[] All 500 stocks rebalance to the same weight in the index on a quarterly basis.

[] Expected to outperform the other Underlying Indices at the beginning and middle of bull markets because the equal weighting creates a higher exposure to the smaller companies within the index.

[] May underperform the other Underlying Indices in falling markets.

Not FDIC Insured. May Lose Value.

CERTAIN RISK CONSIDERATIONS: The RBS ETNs involve risks not associated with an investment in conventional debt securities, including a possible loss of some or all of your investment. The level of the Index must increase by an amount sufficient to offset the aggregate investor fee applicable to the RBS ETNs in order for you to receive at least the principal amount of your investment back at maturity or upon early repurchase or redemption. The Index may underperform the SandP 500([R]) Index or any Underlying Index.

Even though the RBS ETNs are listed on the NYSE Arca, a trading market may not develop and the liquidity of the RBS ETNs may be limited and/or vary over time, as RBS plc is not required to maintain any listing of the RBS ETNs. The RBS ETNs are not principal protected and do not pay interest. Any payment on the RBS ETNs is subject to the ability of RBS plc, as the issuer, and RBS Group, as the guarantor, to pay their respective obligations when they become due. The intraday indicative value and the daily redemption value are not the same as the trading price or market price of the RBS ETNs in the secondary market. You should carefully consider whether the RBS ETNs are suited to your particular circumstances before you decide to purchase them. We urge you to consult with your investment, legal, accounting, tax and other advisors with respect to any investment in the RBS ETNs.

Edgar Filing: ROYAL BANK OF SCOTLAND GROUP PLC - Form FWP

The RBS ETNs are not suitable for all investors. You should carefully read the relevant pricing supplement and prospectus, including the more detailed explanation of the risks involved in any investment in the RBS ETNs as described in the "Risk Factors" section of the pricing supplement, before investing.

IMPORTANT INFORMATION: RBS plc and RBS Group have filed a registration statement (including a prospectus) with the U.S. Securities and Exchange Commission (SEC) for the offering of RBS ETNs to which this communication relates. Before you invest in any RBS ETNs, you should read the prospectus in that registration statement and other documents that have been filed by RBS plc and RBS Group with the SEC for more complete information about RBS plc and RBS Group, and the offering. You may get these documents for free by visiting EDGAR on the SEC's web site at www.sec.gov. Alternatively, RBS plc, RBS Securities Inc. (RBSSI) or any dealer participating in the offering will arrange to send you the prospectus and the pricing supplement at no charge if you request it by calling 1-855-RBS-ETPS (toll-free).

RECENT DEVELOPMENTS: On June 13, 2013, we announced that we would be exiting the structured retail investor products business that is responsible for issuing and maintaining the RBS ETNs, and that we expect to move such business into a runoff organization which will go through a process of restructuring and / or business sales (the "RBS Retail Investor Products Exit Plan"). The implementation of the RBS Retail Investor Products Exit Plan increases the likelihood that the RBS ETNs will be redeemed by us prior to maturity. We plan to continue to maintain and issue the RBS ETNs, but our plans could change. We cannot give you any assurances as to any minimum period of time that you may hold the RBS ETNs before we redeem them at our option.
