**NOTE TO UNITED STATES READERS -
DIFFERENCES IN UNITED STATES AND CANADIAN REPORTING PRACTICES**

The Company is permitted, under a multi-jurisdictional disclosure system adopted by the United States, to prepare this annual report in accordance with Canadian disclosure requirements, which are different from those of the United States. The Company prepares its financial statements, which are filed with this annual report on Form 40-F, in accordance with Canadian generally accepted accounting principles which are reconciled to United States generally accepted accounting principles in Note 25 Reconciliation to United States Generally Accepted Accounting Principles to the audited consolidated financial statements of the Company as of December 31, 2009 and 2008 and for each of the years in the three year period ended December 31, 2009, including the report of the Independent Registered Chartered Accountants with respect thereto, which are attached as Exhibit 99.3 to this annual report on Form 40-F (the Audited Financial Statements) and incorporated by reference herein.

CURRENCY

Unless otherwise indicated, all dollar amounts in this annual report on Form 40-F are in United States dollars. The exchange rate of Canadian dollars into United States dollars, on December 31, 2009, based upon the noon buying rate in New York City for cable transfers

payable in Canadian dollars as certified for customs purposes by the Federal Reserve Bank of New York, was U.S.\$1.00=CDN\$1.0466.

RESOURCE AND RESERVE ESTIMATES

The Company's Annual Information Form (the "AIF") for the financial year ended December 31, 2009 attached as Exhibit 99.1 to this annual report on Form 40-F and incorporated by reference herein has been prepared in accordance with the requirements of the securities laws in effect in Canada, which differ from the requirements of United States securities laws. The terms "mineral reserve", "proven mineral reserve" and "probable mineral reserve" are Canadian mining terms as defined in accordance with Canadian National Instrument 43-101 *Standards of Disclosure for Mineral Projects* (NI 43-101) and the Canadian Institute of Mining, Metallurgy and Petroleum (the "CIM") *CIM Definition Standards on Mineral Resources and Mineral Reserves*, adopted by the CIM Council, as amended. These definitions differ from the definitions in SEC Industry Guide 7 (SEC Industry Guide 7) under the Securities Act. Under SEC Industry Guide 7 standards, a "final" or "bankable" feasibility study is required to report reserves, the three-year historical average price is used in any reserve or cash flow analysis to designate reserves and the primary environmental analysis or report must be filed with the appropriate governmental authority.

In addition, the terms "mineral resource", "measured mineral resource", "indicated mineral resource" and "inferred mineral resource" are defined in and required to be disclosed by NI 43-101; however, these terms are not defined terms under SEC Industry Guide 7 and are normally not permitted to be used in reports and registration statements filed with the SEC. Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves. "Inferred mineral resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to a higher category. Under Canadian rules, estimates of inferred mineral resources may not form the basis of feasibility or pre-feasibility studies, except in rare cases. Investors are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable. Disclosure of "contained ounces" in a resource is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute "reserves" by SEC standards as in place tonnage and grade without reference to unit measures.

Accordingly, information contained in this annual report on Form 40-F and the documents incorporated by reference herein containing descriptions of the Company's mineral deposits may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder.

ANNUAL INFORMATION FORM

The AIF is attached as Exhibit 99.1 to this annual report on Form 40-F and incorporated by reference herein.

Purchasing, holding or disposing of securities of the Company may have tax consequences under the laws of the United States and Canada that are not described in this annual report on Form 40-F.

DISCLOSURE CONTROLS AND PROCEDURES

At the end of the period covered by this annual report on Form 40-F, an evaluation was carried out under the supervision of and with the participation of the Company's management, including the Chief Executive Officer (CEO) and the Chief Financial Officer (CFO), of the effectiveness of the design and operations of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) under the Exchange Act). Based on that evaluation, the CEO and the CFO have concluded that as of the end of the period covered by this annual report on Form 40-F, the Company's disclosure controls and procedures were adequately designed and effective in ensuring that: (i) information required to be disclosed by the Company in reports that it files or submits to the SEC under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms and (ii) material information required to be disclosed in the Company's reports filed under the Exchange Act is accumulated and communicated to the Company's management, including the CEO and the CFO, as appropriate, to allow for accurate and timely decisions regarding required disclosure.

MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management's Responsibility, Evaluation and Report

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation and fair presentation of financial statements for external purposes in accordance with generally accepted accounting principles.

Management conducted an evaluation of the design and operation of the Company's internal control over financial reporting as of March 11, 2010, based on the criteria set forth in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. This evaluation included review of the documentation of controls, evaluation of the design effectiveness of controls, testing of the operating effectiveness of controls and a conclusion on this evaluation. Based on this evaluation, management concluded in its report that the Company's internal control over financial reporting was effective as of December 31, 2009.

Management's annual report on internal control over financial reporting (the Report) is included with the Audited Financial Statements which are attached as Exhibit 99.3 to this annual report on Form 40-F and incorporated by reference herein.

Scope of Management's Report on Internal Control Over Financial Reporting

As noted in the Report, management has not evaluated the internal control over financial reporting at Minera Alumbra Limited (Alumbra), an entity in which the Company holds a 37.5% interest. Management's conclusion regarding the effectiveness of the Company's internal controls over financial reporting does not extend to the internal controls of Alumbra, as management does not have the ability to dictate or modify controls at this entity and management does not have the ability to assess, in practice, the controls at the entity. The Report also includes key percentages, such as total and net assets, revenues and net income that result from the proportionate consolidation of Alumbra.

**ATTESTATION REPORT OF THE
INDEPENDENT CHARTERED ACCOUNTANTS**

The Company's Independent Registered Chartered Accountants have issued an attestation report on the Company's internal control over financial reporting as of December 31, 2009 included with the Audited Financial Statements which are attached as Exhibit 99.3 to this annual report on Form 40-F and incorporated by reference herein.

CHANGES IN INTERNAL CONTROLS OVER FINANCIAL REPORTING

During the period covered by this annual report on Form 40-F, no changes occurred in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

The Company's management, including its CEO and CFO, does not expect that its disclosure controls and procedures or internal controls and procedures will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs.

Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

CORPORATE GOVERNANCE

The Company is listed on the Toronto Stock Exchange and is required to describe its practices and policies with regard to corporate governance with specific reference to National Instrument 58-101 *Disclosure of Corporate Governance Practices* on an annual basis by way of certain disclosures contained in the Company's management information circular. The Company is also listed on the New York Stock Exchange (NYSE) and additionally complies with the applicable rules and guidelines of the NYSE as well as the SEC, including those applicable rules and regulations resulting from the Sarbanes-Oxley Act of 2002. As a result, the Company believes that there are no significant differences between its corporate governance practices and those required to be followed by United States domestic issuers under the applicable rules and guidelines of the NYSE.

The Company's Board of Directors (Board) has the following four separately designated and standing committees:

Audit Committee Financial Experts

The Board has determined that Lawrence I. Bell, Beverley A. Briscoe, A. Dan Rovig and Kenneth F. Williamson, are all audit committee financial experts under the applicable criteria prescribed by the NYSE and the SEC in the general instructions of Form 40-F.
