The stock prices and additional share amounts set forth above are based upon a closing sale price of \$4.37 on March 12, 2008 and an initial conversion price of approximately \$5.68.

Notwithstanding anything in the indenture to the contrary, we may not increase the conversion rate to more than 228.8329 shares per \$1,000 principal amount of notes pursuant to qualifying fundamental change events, though we will adjust such number of shares for the same events that require anti-dilution adjustments of the conversion rate as described in the Preliminary Prospectus Supplement under Description of the Notes Conversion Rate Adjustments, in the same manner as the conversion rate is adjusted under that section.

The exact stock prices and effective dates may not be set forth in the table above, in which case if the stock price is (i) between two stock price amounts in the table or the effective date is between two effective dates in the table, the number of additional shares will be determined by a straight-line interpolation between the number of additional shares set forth for the higher and lower stock price amounts and the two dates, as applicable, based on a 365-day year; (ii) in excess of \$20.00 per share (subject to adjustment), no increase in the conversion rate will be made; and (iii) less than \$4.37 per share (subject to adjustment), no increase in the conversion rate will be made.

Because we cannot calculate and deliver the additional conversion consideration due as a result of an increase in the conversion rate resulting from a given qualifying fundamental change until after the effective date of that qualifying fundamental change has occurred, we will not deliver such additional conversion consideration until after the effective date of the qualifying fundamental change it relates to even if the settlement date in respect of other conversion consideration occurs earlier. As a result, you may receive conversion consideration in two payments rather than one. We will deliver the portion of the conversion consideration that is payable on account of the increase in the conversion rate as soon as practicable, but in no event after the third business day after the later of (i) the date the holder surrenders the note for conversion; (ii) the last trading day in the applicable conversion settlement averaging period; and (iii) the effective date of the qualifying fundamental change.

If you surrender a note for conversion in connection with a qualifying fundamental change we have announced, but the qualifying fundamental change is not consummated, then you will not be entitled to the increased conversion rate referred to above in connection with the conversion.
