KIRKLAND S REPORTS FIRST QUARTER RESULTS

JACKSON, Tenn. (May 19, 2004) Kirkland s, Inc. (NASDAQ/NM: KIRK) today reported financial results for the 13-week period ended May 1, 2004.

Net sales for the 13 weeks ended May 1, 2004, increased 12.5% to \$82.6 million from \$73.4 million for the 13 weeks ended May 3, 2003. Comparable store sales for the first quarter of fiscal 2004 increased 1.5%. The Company s comparable store sales increased 5.1% for the first quarter of fiscal 2003.

Net income for the first quarter of fiscal 2004 was \$850,000, or \$0.04 per diluted share, compared with net income of \$1.1 million, or \$0.06 per diluted share for the first quarter of fiscal 2003. The Company had previously issued earnings guidance for the first quarter of \$0.04 to \$0.05 per diluted share.

Robert E. Alderson, Kirkland s President and Chief Executive Officer, said, For the first quarter, we were able to produce reasonable earnings even though comparable store sales were less than we had originally projected. Good expense control enabled us to offset the sales and gross margin pressures imposed by a retail environment that became more challenging as the quarter progressed. Several merchandise initiatives drove an increase in our average retail price for the quarter, but this positive trend was offset by lower transaction volumes compared with the prior year. We continued to make good progress toward the anticipated second quarter relocation to our new distribution center, and we believe the investments we are making to enhance our distribution and logistics efforts will produce long-term rewards.

Second Quarter and Fiscal 2004 Outlook

The Company issued guidance for the second quarter ending July 31, 2004, of a net loss of \$0.03 to a net loss of \$0.07 per diluted share, compared with earnings of \$0.04 per diluted share in the prior-year period. Net sales are expected to be \$85 million to \$87 million, with a comparable store sales decrease of 2% to 4% compared with a decrease of 0.9% in the prior-year period. The Company s earnings estimates for the second quarter reflect the impact of the previously disclosed incremental expenses of \$0.03 per diluted share related to its new distribution center and the implementation of a wide-area network linking the Company s stores and corporate headquarters.

Based on its second quarter guidance and current business outlook, the Company now expects to report earnings for fiscal 2004 in a range of \$0.90 to \$1.00 per diluted share and net sales of approximately \$417 million to \$427 million. Comparable store sales are estimated to be flat to up 3% when compared with the prior year. The Company's fiscal 2004 estimate includes 50 to 55 new store openings and 10 to 15 store closings as well as the collective impact of transition costs relating to the Company's new distribution center and the implementation of a wide-area network linking the Company's stores and corporate headquarters. The Company estimates that the distribution center transition will be completed in the second quarter, while the wide-area network project will result in incremental expenses of \$0.01 per diluted share in each of the third and fourth quarters of fiscal 2004.

Mr. Alderson commented, "Since reporting our first quarter sales results on May 6, we have continued to see weak traffic in all regions of the country. Mother's Day weekend, which is typically the busiest weekend of our first half, was significantly slower than we had expected, and business has remained soft over the last ten days. In light of this trend, which follows a general softening of our business in the latter part of the first quarter, we remain cautious on the near-term sales outlook. We have several events planned for the second quarter, including our Big Sale and the introduction of our proprietary credit card, that we hope will spark better sales and enable us to build momentum for the second half of the year. Driving traffic to our stores in this sluggish sales environment continues to be a priority for us, and we expect to be very responsive during the quarter with a number of initiatives to achieve that goal.

Another factor that will influence our results for the balance of the year is the timing of new store openings. We have recently experienced some delays in our new store leasing and construction activity that will push several store openings later than originally planned. Some of these delays have resulted from decisions we have made in the best interest of securing solid locations with attractive economics; in other cases, we have encountered landlord delivery delays that were not anticipated. The result will be more of a back-end weighting of our openings in the second and third quarters of the year than we would have preferred, but we are still on target to accomplish our stated goal of 50 to 55 new store openings for the year.
