SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the Fiscal Year Ended December 31, 2004

Commission File No. 1-12983

GENERAL CABLE CORPORATION

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

06-1398235
(I.R.S. Employer Identification No.)

4 Tesseneer Drive
Highland Heights, KY 41076-9753
(Address of principal executive offices)

(859) 572-8000
(Registrant's telephone number, including area code)

Securities Registered Pursuant to Section 12(b) of the Act:

<u>Title of Each Class</u>	<u>Name of Each Exchange on which registered</u>
Common Stock, \$.01 Par Value	New York Stock Exchange

Securities Registered Pursuant to Section 12(g) of the Act: None

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of the Regulation S-K is not contained herein, and need not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this form 10-K or any amendment to the Form 10-K.

Indicate by check mark whether the registrant is an accelerated filer (as defined in Exchange Act Rule 12b-2).

Yes No

The aggregate market value of the Registrant's Common Stock held by non-affiliates was \$329.3 million at June 30, 2004 (based upon non-affiliate holdings of 38,519,941 shares and a market price of \$8.55 per share).

At March 15, 2005, there were 39,408,419 shares of the Registrant's Common Stock outstanding.

Documents Incorporated by Reference:

Proxy Statement for the 2005 Annual Meeting of Shareholders (portions of which are incorporated by reference in Part III hereof).

PART I.

Item 1. Business

General Cable Corporation (the Company) is a leading global developer and manufacturer in the wire and cable industry. The Company's operations are divided into three main segments: energy, industrial & specialty and communications. Energy cable products include low-, medium- and high-voltage power distribution and power transmission products for overhead and buried applications. Industrial & specialty wire and cable products conduct electrical current for industrial, OEM, commercial and residential power and control applications. Communications wire and cable products transmit low-voltage signals for voice, data, video and control applications. The Company has a leading market position in each of the segments in which it competes due to product, geographic and customer diversity and the Company's ability to operate as a low cost provider. The Company sells a wide variety of copper, aluminum and fiber optic wire and cable products, which it believes represents the most diversified product line of any U.S. manufacturer. As a result, the Company is able to offer its customers a single source for most of their wire and cable requirements. The Company manufactures its product lines in 26 facilities and sells its products worldwide through its operations in North America, Europe and Oceania. Technical expertise and implementation of Lean Six Sigma strategies have contributed to the Company's ability to maintain its position as a low cost provider.

The Company is a Delaware corporation and was incorporated in April 1994. Its principal executive offices are located at 4 Tessenner Drive, Highland Heights, Kentucky 41076-9753 and its telephone number is (859) 572-8000. The Company's internet address is www.generalcable.com. General Cable's annual report on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, are made available free of charge at www.generalcable.com as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission (SEC). In addition, the Company will provide, at no cost, paper or electronic copies of our reports and other filings made with the SEC. Requests should be directed to: Investor Relations, General Cable Corporation, 4 Tessenner Drive, Highland Heights, KY 41076-9753.

The information on the website listed above is not and should not be considered part of this annual report on Form 10-K and is not incorporated by reference in this document. This website address is and is only intended to be an inactive textual reference.

The Company and its predecessors have served various wire and cable markets for over 150 years. The Company's immediate predecessor was a unit of American Premier Underwriters, Inc. (American Premier), previously known as The Penn Central Corporation. American Premier acquired the Company's existing wire and cable business in 1981 and significantly expanded the business between 1988 and 1991 by acquiring Carol Cable Company, Inc. and other wire and cable businesses and facilities. In June 1994, a subsidiary of Wassall PLC acquired the Predecessor by purchase of General Cable's outstanding subordinated promissory note, the General Cable common stock held by American Premier and a tender offer for the publicly-held General Cable common stock. Between May and August 1997, Wassall consummated public offerings for the sale of all of its interest in General Cable's common stock. The Company has operated as an independent public company since completion of the offerings.

Products and Markets

Financial information for each of the Company's three main operating segments is summarized below, in millions of dollars:

Year Ended December 31,

Edgar Filing: GENERAL CABLE CORP /DE/ - Form 10-K

	2004		2003		2002	
	Amount	%	Amount	%	Amount	%
Net sales:						
Energy	\$ 705.7	36%	\$ 560.2	37%	\$ 516.0	36%
Industrial & specialty	734.3	37%	542.4	35%	499.4	34%
Communications	530.7	27%	435.8	28%	438.5	30%

The principal products, markets, distribution channels and end-users of each of the Company's product categories are summarized below:

Product Category	Principal Products	Principal Markets	Principal End-Users
Energy Utility	Low-Voltage, Medium-Voltage Distribution; Bare Overhead Conductor; High-Voltage Transmission Cable	Power Utility	Investor-Owned Utility Companies; State and Local Public Power Companies; Rural Electric Associations; Contractors
Industrial & Specialty Instrumentation, Power, Control and Specialty	Rubber and Plastic-Jacketed Wire and Cable; Power and Industrial Cable; Instrumentation and Control Cable	Industrial Power and Control; Utility/Marine/Transit; Military; Mining; Oil and Gas; Industrial; Power Generation; Infrastructure; Residential Construction	Industrial Consumers; Contractors; OEMs; Military Customers; Telecommunication System Operators
Automotive	Ignition Wire Sets	Automotive Aftermarket	Consumers
Communications Outside Voice and Data (Telecommunications)	Outside Plant Telecommunications Exchange Cable; Outside Service Wire	Telecom Local Loop	Telecommunications System Operators
Data Communications	Multi-Conductor/Multi-Pair; Fiber Optic; Shipboard; Military Fiber Cable	Computer Networking and Multimedia Applications	Contractors; OEMs; Systems Integrators; Systems Operators;
Electronics	Multi-Conductor; Coaxial; Sound, Security/Fire Alarm Cable	Building Management; Entertainment; Equipment Control	Contractors; Consumers
Assemblies	Cable Harnesses; Connector Cable	Telecommunications; Industrial Equipment; Medical Equipment	Communications and Industrial Equipment Manufacturers

The Company operates its businesses globally, with 66% of net sales in 2004 generated from North American operations and 34% generated from International operations.

Industry and Market Overview

In North America, General Cable has been operating for some time in a difficult business environment. The wire and cable industry is competitive, mature and cost driven. In many business segments, there is little differentiation among industry participants from a manufacturing or technology standpoint. During 2004, the Company's end markets have shown signs of recovery. There has been significant merger and acquisition activity which, we believe, may lead to a reduction in the deployment of inefficient, high cost capacity in the industry. Wire and cable products are relatively low value added, higher weight (and therefore relatively expensive to transport) and often subject to regional or country specifications. The wire and cable industry is raw materials intensive with copper and aluminum comprising the major cost components for cable products. Changes in the cost of copper and aluminum are generally passed through to the customer, although there can be

Table of Contents

timing delays of varying lengths depending on the volatility in metal prices, the type of product, competitive conditions and particular customer arrangements.

Energy

The energy market consists of low-, medium- and high-voltage power distribution and power transmission products for overhead and buried applications. Growth in this market will be largely dependent on investment policy of electric utilities and infrastructure improvement. The Company believes that the increase in electricity consumption in North America has outpaced the rate of utility investment in power cables. As a result, the Company believes the average age of power transmission cables has increased, the current electric transmission infrastructure needs to be upgraded and the transmission grid is near capacity. In addition, the 2003 power outages in the U.S., Canada and Europe emphasized the need to upgrade the power transmission infrastructure used by electric utilities, which may, over time, cause an increase in demand for the Company's energy products. In addition, tax legislation was recently passed in the United States which includes the renewal of tax credits for producing power from wind. This may also cause an increase in demand for the Company's products as the Company is a significant manufacturer of wire and cable used in wind farms.

The Company is a leader in the supply of energy cables to the North America electric utility industry. The business manufactures low- and medium-voltage aluminum and copper distribution cable, bare overhead aluminum conductor and high-voltage transmission cable. Bare transmission cables are utilized by utilities in the transmission grid to provide electric power from the power generating stations to the distribution sub-stations. Medium-voltage energy cables are utilized in the primary distribution infrastructure to bring the power from the distribution sub-stations to the transformers. Low-voltage energy cables are utilized in the secondary distribution infrastructure to take the power from the transformers to the end-user's meter.

The Company's North American energy cables business has strategic alliances in the United States and Canada with a number of major customers and is strengthening its position through these agreements. This business utilizes a network of direct sales and authorized distributors to supply low- and medium-voltage and bare overhead cable products. This market is represented by approximately 3,500 utility companies.

The Company anticipates that sales volume for North American customers should improve over time as utility customers address capital projects that were previously deferred, including enhancements to the power transmission and distribution grid. There is proposed energy legislation in the United States which would provide future regulatory relief and allow North American utility companies to earn an adequate rate of return on their investment in upgrading the transmission grid infrastructure. In addition, certain other proposed legislation in the United States, if passed, will permit accelerated depreciation on transmission grids, certain tax credits and bonus depreciation on new equipment which could create an increased demand for the Company's products.

A majority of the Company's North America energy market customers have entered into written agreements with the Company for the purchase of wire and cable products. These agreements typically have 2-4 year terms and provide adjustments to selling prices to reflect fluctuations in the cost of raw materials. These agreements do not guarantee a minimum level of sales. Historically, approximately 70% of our North America energy business revenues are under contract prior to the start of each year.

The Company's European energy cables business is headquartered in Barcelona, Spain and is a strong regional wire and cable manufacturer in Europe. The business utilizes its broad product offering and its low cost manufacturing platform to gain market share. The business has also benefited from its competitors ongoing withdrawal of medium-voltage cable manufacturing capacity from the European market and from the trend in Europe to install power cables underground, which requires more highly engineered cables.

Industrial & Specialty

The industrial & specialty market consists of wire and cable products that conduct electrical current for industrial, OEM, commercial and residential power and control applications. The principal product categories in this market are portable cord, industrial cables and automotive products.

The global market for industrial & specialty cable products has many niches. Sales in North America have declined in recent years as the result of a substantial decline in industrial construction spending from mid-1990 peak levels. However the Company has seen strengthening demand in 2004 which may indicate a turnaround in industrial construction spending in North America. This segment has also experienced increased demand for cables utilized in industrial repairs and maintenance and the automotive aftermarket. Growth in the industrial & specialty markets will be largely dependent upon new industrial construction, investment in capital equipment and vehicle after-market maintenance spending.

Table of Contents

Many industrial and commercial wire and cable applications require cables with exterior armor and/or jacketing materials that can endure exposure to chemicals, extreme temperatures and outside elements. The Company offers products that are specifically designed for these applications.

Portable Cord and Specialty Cables. The Company manufactures and sells a wide variety of rubber and plastic insulated portable cord products for power and control applications serving industrial, mining, entertainment, OEM, farming and other markets. Portable cord products are used for the distribution of electrical power, but are designed and constructed to be used in dynamic and severe environmental conditions where a flexible but durable power supply is required. Portable cord products include both standard commercial cord and cord products designed to meet customer specifications. Portable rubber-jacketed power cord, the Company's largest selling cord product line, is typically manufactured without a connection device at either end and is sold in standard and customer-specified lengths. Portable cord is also sold to OEMs for use as power cords on their products and in other applications, in which case the cord is made to the OEMs' specifications. The Company also manufactures portable cord for use with moveable heavy equipment and machinery. The Company's portable cord products are sold primarily through electrical distributors and electrical retailers to industrial customers, OEMs, contractors and consumers.

The Company's portable cords are used in the installation of new industrial equipment and the maintenance of existing equipment, and to supply electrical power at temporary venues such as festivals, sporting events, concerts and construction sites. The Company expects demand for portable cord to be influenced by general economic activity.

The Company's industrial & specialty products sold under the Brand Rex name include low-voltage and data transmission cables, rail and mass transit cables, shipboard cables, off-shore cables, other industrial cables and cables that meet low-smoke, zero-halogen requirements in Europe. Primary uses for these products include various applications within power generating stations, marine, oil and gas, transit/locomotive, OEMs, machine builders, medical imaging, shipboard, aerospace industries, space flight and aircraft markets. Shipboard cables sold by the Company hold a leading position with the U.S. Navy. The Company's Polyrad XT marine wire and cable products also provide superior properties and performance levels that are necessary for heavy-duty industrial applications to both onshore and offshore platforms, ships and oil rigs.

Industrial cable products include medium and low voltage power, control and instrumentation cable, armored power cable, flexible control cables, festoon cables, robotic cables and industrial data communications cables. These products have various applications in power generating stations and substations, process control, mining, material handling, machine tool and robotics markets.

Automotive Products. The Company's principal automotive product is ignition wire sets for sale to the automotive aftermarket. The Company sells its automotive ignition wire sets primarily to automotive parts retailers and distributors, hardware and home center retail chains and hardware distributors. The Company's automotive products are also sold on a private label basis to retailers and other automotive parts manufacturers.

Communications

The communications market consists of wire and cable products that transmit low-voltage signals for voice, data, video and control applications. The principal product categories are:

outside voice and data products wire and cable products for voice, data and video transmission applications;

data communication products high-bandwidth twisted copper and fiber optic cables and multiconductor cables for customer premises, local area networks and telephone company central offices;

electronics specialty products for use in machinery and instrumentation interconnection, audio, computer, security and other applications; and

OEM products harnesses and assemblies for telecommunication, industrial and medical equipment manufacturers. In recent years, sales of communications wire and cable products have decreased, primarily the result of a significant decline from historic spending levels for outside plant telecommunications cables and a weak market for switching/local area networking cables. The industry has benefited from the consolidation of competitors during 2004. Growth in this market will be largely dependent upon the level of information technology spending on network infrastructure and capital spending by the regional bell operating companies, or RBOCs, on maintenance, repair and expansion of their copper cable infrastructure. The Company anticipates, based on recent regulatory announcements, further deployment of fiber optic products into the telephone network. Increased spending by the telephone companies on fiber deployment may negatively impact their purchases of the Company's copper based telecommunications cable products. However, this impact may be somewhat mitigated in that the Company believes it will benefit from the further investment in fiber broadband networks as its customers will most likely need to upgrade a portion of their copper network to support the fiber network.

Table of Contents

Outside Voice and Data Products. The Company's principal outside voice and data products are outside plant telecommunications exchange cable and service wire. Outside plant telecommunications exchange cable is short haul trunk, feeder or distribution cable from a telephone company's central office to the subscriber premises. It consists of multiple paired conductors (ranging from 2 pairs to 4,200 pairs) and various types of sheathing, water-proofing, foil wraps and metal jacketing. Service wire is used to connect telephone subscriber premises to curbside distribution cable.

The Company sells its outside voice and data products primarily to telecommunications system operators through its direct sales force under supply contracts of varying lengths, and also to telecommunications distributors. The contracts do not guarantee a minimum level of sales. Product prices are generally subject to periodic adjustment based upon changes in the cost of copper and other factors.

Data Communications Products. Data communications products are high-bandwidth twisted pair copper and fiber optic cable for the customer premise, local area networks, central office and OEM telecommunications equipment markets. Customer premise products are used for wiring at subscriber premises, and include computer, riser rated and plenum rated wire and cable. Riser cable runs between floors and plenum cable runs in air spaces, primarily above ceilings in non-residential structures. Local area network cables run between computers along horizontal raceways and in backbones between servers. Central office products interconnect components within central office switching systems and public branch exchanges. The Company sells data communications products primarily to distributors through agents and a direct sales force. The market for data communications products has been adversely affected by a decrease in information technology spending. However, this decrease has been partially offset by continued spending in this market on maintenance and repair.

Electronics. Electronics products include multi-conductor, multi-pair, coaxial, hook-up, audio and microphone cables, speaker and television lead wire, and high temperature and shielded electronic wire. Primary uses for these products are various applications within the commercial, industrial instrumentation and control, and residential markets. These markets require a broad range of multi-conductor products for applications involving programmable controllers, robotics, process control and computer integrated manufacturing, sensors and test equipment, as well as cable for fire alarm, smoke detection, sprinkler control, entertainment and security systems.

OEM Products. Assemblies are used in communications switching systems and industrial control applications as well as medical equipment applications. These assemblies are used in such products as data processing equipment; telecommunications network switches, diagnostic imaging equipment, office machines and industrial machinery. The Company's industrial instrumentation and control products are sold primarily through distributors and agents.

Geographic Groups

General Cable analyzes its worldwide operations in two geographic groups: 1) North America and 2) International. The following table sets forth net sales and operating income by geographic group for the periods presented, in millions of dollars:

	Fiscal Year Ended December 31,					
	2004		2003		2002	
	Amount	%	Amount	%	Amount	%
Net sales :						
North America	\$ 1,300.6	66%	\$ 1,074.2	70%	\$ 1,077.2	74%
International	670.1	34%	464.2	30%	376.7	26%

Edgar Filing: GENERAL CABLE CORP /DE/ - Form 10-K

Total net sales	\$ 1,970.7	100%	\$ 1,538.4	100%	\$ 1,453.9	100%
Operating income (loss):						
North America	\$ 17.1	25%	\$ 5.6	10%	\$ 15.0	31%
International	52.3	75%	48.3	90%	34.1	69%
Subtotal	69.4	100%	53.9	100%	49.1	100%
Corporate charges	(12.9)		(8.2)		(33.4)	
Total operating income	\$ 56.5		\$ 45.7		\$ 15.7	

	December 31,	
	2004	2003
Total long-lived assets:		
North America	\$ 213.4	\$ 219.0
International	142.6	114.3
Total long-lived assets	\$ 356.0	\$ 333.3

Table of Contents

The Company believes that it is the largest participant in the North American market. The Company's European business is headquartered in Barcelona, Spain, and has three manufacturing facilities in the Barcelona area, a manufacturing facility near Lisbon, Portugal and a plant in Brazil, all of which are supported by centralized marketing, sales and production planning. The main markets served are Spain, Portugal, France, United Kingdom, Norway, Belgium and Brazil, with approximately 90% of sales generated in the European market and the remaining 10% representing export sales. Over 90% of net sales in Europe and Oceania are derived from energy and industrial and specialty cable sales. The Company's Oceania business consists of a regional headquarters and manufacturing facility in Christchurch, New Zealand, a joint venture manufacturing facility in Fiji and sales offices in New Zealand and Australia. The business offers a broad product range in the energy, communications and electrical markets principally serving New Zealand, Australia, Fiji, and the Pacific Islands with certain products also sold into Asia.

Competition

The markets for all of the Company's products are highly competitive, and the Company experiences competition from several competitors within each market. The Company believes that it has developed strong customer relations as a result of its ability to supply customer needs across a broad range of products, its commitment to quality control and continuous improvement, its continuing investment in information technology, its emphasis on customer service, and its substantial product and distribution resources.

Although the primary competitive factors for the Company's products vary somewhat across the different product categories, the principal factors influencing competition are generally breadth of product line, inventory availability and delivery time, price, quality and customer service. Many of the Company's products are made to industry specifications, and are therefore essentially functionally interchangeable with those of competitors. However, the Company believes that significant opportunities exist to differentiate all of its products on the basis of quality, consistent availability, conformance to manufacturer's specifications and customer service. Within some markets such as specialty and LAN cables, conformance to manufacturer's specifications and technological superiority are also important competitive factors. Brand recognition is also a primary differentiating factor in the portable cord market and, to a lesser extent, in other product groups.

Raw Materials

The principal raw material used by General Cable in the manufacture of its wire and cable products is copper. The Company purchases copper from a number of major domestic and foreign producers, generally through annual supply contracts. Copper is available from many sources, and the Company believes that it is not dependent on any single supplier of copper. In 2004, the Company's largest supplier of copper accounted for approximately 48% of its North American copper purchases.

In North America, the Company has centralized the purchasing of its copper, and aluminum, another significant raw material, to capitalize on economies of scale and to facilitate the negotiation of favorable purchase terms from suppliers. The price of copper and aluminum has historically been subject to considerable volatility. The Company generally passes changes in copper and aluminum prices along to its customers, although there are timing delays of varying lengths depending upon the volatility in copper and aluminum prices, the type of product, competitive conditions and particular customer arrangements. A significant portion of the Company's energy and communications business and, to a lesser extent, the Company's industrial business has metal escalators written into customer contracts under a variety of price setting and recovery formulas. The remainder of the Company's business requires that the cost of higher metal prices be recovered through negotiated price increases with customers. In these instances, the ability to increase the Company's selling prices may lag the movement in metal prices by a period of time as the customer price increases are implemented. As a result of this and a number of other practices intended to match copper and aluminum purchases with sales, profitability over time has historically not been significantly affected by changes in copper and

aluminum prices. General Cable does not engage in speculative metals trading or other speculative activities. Also, the Company does not engage in activities to hedge the underlying value of its copper and aluminum inventory.

Other raw materials utilized by the Company include nylon, polyethylene resin and compounds and plasticizers, fluoropolymer compounds, optical fiber and a variety of filling, binding and sheathing materials. In 2004, the Company produced approximately 26% of its PVC compound requirements for its North American operations. The Company believes that all of these materials are available in sufficient quantities through purchases in the open market.

Patents and Trademarks

The Company believes that the success of its business depends more on the technical competence, creativity and marketing abilities of its employees than on any individual patent, trademark or copyright. Nevertheless, the Company has a policy of seeking patents when appropriate on inventions concerning new products and product improvements as part of its ongoing research, development and manufacturing activities.

Table of Contents

The Company owns a number of U.S. and foreign patents and has patent applications pending in the U.S. and abroad. The Company also owns a number of U.S. and foreign registered trademarks and has many applications for new registrations pending.

Although in the aggregate these patents and trademarks are of considerable importance to the manufacturing and marketing of many of the Company's products, it does not consider any single patent or trademark or group of patents or trademarks to be material to its business as a whole. While the Company occasionally obtains patent licenses from third parties, none are deemed to be material. Trademarks which are considered to be generally important are General Cable®, Anaconda®, BICC® and Carol®, and the Company's triad symbol. The Company believes that its products bearing these trademarks have achieved significant brand recognition within the industry.

The Company also relies on trade secret protection for its confidential and proprietary information. The Company routinely enters into confidentiality agreements with its employees. There can be no assurance, however, that others will not independently obtain similar information and techniques or otherwise gain access to the Company's trade secrets or that the Company will be able to effectively protect its trade secrets.

Environmental Matters

The Company is subject to a variety of federal, state, local and foreign laws and regulations covering the storage, handling, emission and discharge of materials into the environment, including CERCLA, the Clean Water Act, the Clean Air Act (including the 1990 amendments) and the Resource Conservation and Recovery Act.

The Company's subsidiaries in the United States have been identified as potentially responsible parties with respect to several sites designated for cleanup under CERCLA or similar state laws, which impose liability for cleanup of certain waste sites and for related natural resource damages without regard to fault or the legality of waste generation or disposal. Persons liable for such costs and damages generally include the site owner or operator and persons that disposed or arranged for the disposal of hazardous substances found at those sites. Although CERCLA imposes joint and several liability on all potentially responsible parties, in application, the potentially responsible parties typically allocate the investigation and cleanup costs based upon, among other things, the volume of waste contributed by each potentially responsible party.

Settlements can often be achieved through negotiations with the appropriate environmental agency or the other potentially responsible parties. Potentially responsible parties that contributed small amounts of waste (typically less than 1% of the waste) are often given the opportunity to settle as de minimus parties, resolving their liability for a particular site. The Company does not own or operate any of the waste sites with respect to which it has been named as a potentially responsible party by the government. Based on the Company's review and other factors, it believes that costs to the Company relating to environmental clean-up at these sites will not have a material adverse effect on its results of operations, cash flows or financial position.

In the transaction with Wassall PLC in 1994, American Premier Underwriters, Inc. agreed to indemnify the Company against liabilities (including all environmental liabilities) arising out of the Company's or the Company's predecessors ownership or operation of the Indiana Steel & Wire Company and Marathon Manufacturing Holdings, Inc. businesses (which were divested by the predecessor prior to the 1994 Wassall transaction), without limitation as to time or amount. American Premier also agreed to indemnify the Company against 66 2 / 3 % of all other environmental liabilities arising out of the Company's or the Company's predecessors ownership or operation of other properties and assets in excess of \$10 million but not in excess of \$33 million, which were identified during the seven-year period ended June 2001. Indemnifiable environmental liabilities through June 2001 were substantially below that threshold. In addition, the Company also has claims against third parties with respect to some of these liabilities.

During 1999, the Company acquired the worldwide energy cable and cable systems business of Balfour Beatty plc, previously known as BICC plc. As part of this acquisition, the seller agreed to indemnify the Company against environmental liabilities existing at the date of the closing of the purchase of the business. The indemnity is for an eight-year period ending in 2007, while the Company operates the businesses, subject to certain sharing of losses (with BICC plc covering 95% of losses in the first three years, 80% in years four and five and 60% in the remaining three years). The indemnity is also subject to the overall indemnity limit of \$150 million, which applies to all warranty and indemnity claims in the transaction. In addition, BICC plc assumed responsibility for cleanup of certain specific conditions at various sites operated by the Company and cleanup is mostly complete at these sites. In the sale of the businesses to Pirelli in August 2000, the Company generally indemnified Pirelli against any environmental liabilities on the same basis as BICC plc indemnified it in the earlier acquisition. However, the indemnity the Company received from BICC plc relating to the European businesses sold to Pirelli terminated upon the sale of those businesses to Pirelli. In addition, the Company generally indemnified Pirelli against other claims relating to the prior operation of the business. Pirelli has asserted claims under this indemnification. The Company is continuing to investigate these claims and believes that the reserves currently included in the Company's balance sheet are adequate to cover any obligations it may have.

Table of Contents

General Cable has agreed to indemnify Raychem HTS Canada, Inc. against certain environmental liabilities arising out of the operation of the business it sold to Raychem HTS Canada, Inc. prior to its sale. The indemnity generally is for a five year period from the closing of the sale and is subject to an overall limit of \$60 million. At this time, there are no claims outstanding under this indemnity.

General Cable has also agreed to indemnify Southwire Company against certain environmental liabilities arising out of the operation of the business it sold to Southwire prior to its sale. The indemnity is for a ten year period from the closing of the sale and is subject to an overall limit of \$20 million. At this time, there are no claims outstanding under this indemnity.

While it is difficult to estimate future environmental liabilities accurately, the Company does not currently anticipate any material adverse effect on its results of operations, financial condition or cash flows as a result of compliance with federal, state, local or foreign environmental laws or regulations or cleanup costs of the sites discussed above.

Employees

At December 31, 2004, approximately 6,300 persons were employed by General Cable, and collective bargaining agreements covered approximately 3,600 employees at various locations around the world. During the last five calendar years, the Company has experienced one strike in North America and one strike in Oceania both of which were settled on satisfactory terms. There have been no other major strikes at any of the Company's facilities during the last five calendar years. In North America, union contracts will expire at three facilities in 2005 and three in 2006. On March 21, 2005, union workers at the Company's Lincoln, Rhode Island manufacturing facility commenced a strike. As of the date of this filing, the parties had not reached agreement on a new contract and therefore the union workers remained on strike. Both parties are continuing to work together to reach a new contract. The Company does not expect that the strike will have a significant impact on its financial results for the first quarter of 2005. In Europe and Oceania, labor agreements are generally negotiated on an annual or bi-annual basis. The Company believes that its relationships with its employees are good.

Item 2. Properties

The Company's principal properties are listed below. The Company believes that its properties are generally well maintained and are adequate for the Company's current level of operations.

	Square	Use/Product	Owned
Location	Feet	Line(s)	or Leased
North America			
Manufacturing Facilities:			
Marion, IN	745,000	Industrial & specialty cables	Owned
Marshall, TX	692,000	Aluminum low-voltage energy cables	Owned

Lisbon, Portugal	255,000	Power distribution, industrial & specialty and communications cables	Owned

(1) Certain locations represent a collection of facilities in the local area.

Table of Contents

Item 3. Legal Proceedings

General Cable is subject to numerous federal, state, local and foreign laws and regulations relating to the storage, handling, emission and discharge of materials into the environment, including CERCLA, the Clean Water Act, the Clean Air Act (including the 1990 amendments) and the Resource Conservation and Recovery Act.

General Cable subsidiaries have been identified as potentially responsible parties with respect to several sites designated for cleanup under CERCLA or similar state laws, which impose liability for cleanup of certain waste sites and for related natural resource damages without regard to fault or the legality of waste generation or disposal. General Cable does not own or operate any of the waste sites with respect to which it has been named as a potentially responsible party by the government. Based on its review and other factors, management believes that costs relating to environmental clean-up at these sites will not have a material adverse effect on the Company's results of operations, cash flows or financial position.

American Premier Underwriters, Inc., in connection with the 1994 Wassall PLC transaction, agreed to indemnify General Cable against liabilities (including all environmental liabilities) arising out of General Cable or its predecessors' ownership or operation of the Indiana Steel & Wire Company and Marathon Manufacturing Holdings, Inc. businesses (which were divested by the predecessor prior to the 1994 Wassall transaction), without limitation as to time or amount. American Premier also agreed to indemnify General Cable against 66 2 / 3 % of all other environmental liabilities arising out of General Cable or its predecessors' ownership or operation of other properties and assets in excess of \$10 million but not in excess of \$33 million, which were identified during the seven-year period ended June 2001. Indemnifiable environmental liabilities through June 2001 were substantially below that threshold. In addition, General Cable also has claims against third parties with respect to some of these liabilities. While it is difficult to estimate future environmental liabilities accurately, the Company does not currently anticipate any material adverse effect on results of operations, financial condition or cash flows as a result of compliance with federal, state, local or foreign environmental laws or regulations or cleanup costs of the sites discussed above.

As part of the BICC plc acquisition, BICC agreed to indemnify General Cable against environmental liabilities existing at the date of the closing of the purchase of the business. The indemnity is for an eight-year period ending in 2007 while the Company operates the businesses subject to certain sharing of losses (with BICC plc covering 95% of losses in the first three years, 80% in years four and five and 60% in the remaining three years). The indemnity is also subject to the overall indemnity limit of \$150 million, which applies to all warranty and indemnity claims in the transaction. In addition, BICC plc assumed responsibility for cleanup of certain specific conditions at several sites operated by General Cable and cleanup is mostly complete at those sites. In the sale of the businesses to Pirelli in August 2000, General Cable generally indemnified Pirelli against any environmental liabilities on the same basis as BICC plc indemnified the Company in the earlier acquisition. However, the indemnity General Cable received from BICC plc related to the European businesses sold to Pirelli terminated upon the sale of those businesses to Pirelli. At this time, there are no claims outstanding under the general indemnity provided by BICC plc. The Company is continuing to investigate these claims and believes that the reserves currently included in the Company's balance sheet are adequate to cover any obligations it may have.

General Cable has agreed to indemnify Raychem HTS Canada, Inc. against certain environmental liabilities arising out of the operation of the business it sold to Raychem HTS Canada, Inc. prior to its sale. The indemnity generally is for a five year period from the closing of the sale and is subject to an overall limit of \$60 million. At this time, there are no claims outstanding under this indemnity.

General Cable has also agreed to indemnify Southwire Company against certain environmental liabilities arising out of the operation of the business it sold to Southwire prior to its sale. The indemnity is for a ten year period from the closing of the sale and is subject to an overall limit of \$20 million. At this time, there are no claims outstanding under

this indemnity.

General Cable has been a defendant in asbestos litigation for approximately 15 years. As of December 31, 2004, General Cable was a defendant in approximately 49,500 lawsuits. Approximately 33,200 of these lawsuits have been brought on behalf of plaintiffs by a single admiralty law firm (MARDOC) and seek unspecified damages. Plaintiffs in the MARDOC cases generally allege that they formerly worked in the maritime industry and sustained asbestos-related injuries from products that General Cable ceased manufacturing in the mid-1970 s. The MARDOC cases are managed and supervised by a federal judge in the United States District Court for the Eastern District of Pennsylvania (District Court) by reason of a transfer by the judicial panel on Multidistrict Litigation (MDL).

In the MARDOC cases in the MDL, the District Court in May 1996 dismissed all pending cases filed without prejudice and placed them on an inactive administrative docket. To reinstate a MARDOC case from the inactive docket, plaintiffs counsel must show that the plaintiff not only suffered from a recognized asbestos-related injury, but also must produce specific product identification evidence to proceed against an individual defendant. During 2002, plaintiffs counsel requested that the District Court allow discovery in approximately 15 cases. Prior to this discovery, plaintiffs counsel indicated that they believed that product identification could be established as to many of the approximately 100 defendants named in these

Table of Contents

MARDOC cases. To date, in this discovery, General Cable has not been identified as a manufacturer of asbestos-containing products to which any of these plaintiffs were exposed.

General Cable is also a defendant in approximately 15,000 cases brought in various jurisdictions throughout the United States. About 5,000 of these cases have been brought in federal court in Mississippi or other federal courts and then been transferred to the MDL, but are on a different docket from the MARDOC cases. The vast majority of cases on this MDL docket have been inactive for over four years. Cases may only be removed from this MDL proceeding via a petition filed by the plaintiff indicating that the matter is ready for trial and requesting it be returned to the originating federal district court for trial. Petitions usually only involve plaintiffs suffering from terminal diseases allegedly caused by exposure to asbestos-containing products. To date, in cases which General Cable is a defendant, no plaintiff has requested return of any action to the originating district court for trial.

With regard to the approximately 10,000 remaining cases, General Cable has aggressively defended these cases based upon either lack of product identification as to General Cable manufactured asbestos-containing product and/or lack of exposure to asbestos dust from the use of a General Cable product. In the last 10 years, General Cable has had no cases proceed to verdict. In many of the cases, General Cable was dismissed as a defendant before trial for lack of product identification.

Plaintiffs have asserted monetary damage claims in 365 cases as of the end of 2004. In 346 of these cases, plaintiffs allege only damages in excess of some dollar amount (about \$265,000 per plaintiff); there are no claims for specific dollar amounts requested as to any defendant. In 19 other cases pending in state and federal district courts (outside the MDL), plaintiffs seek approximately \$47 million in damages from each of about 110 defendants. In addition, in each of these 19 cases, there are claims of \$55 million in punitive damages from all of the defendants. However, almost all of the plaintiffs in these cases allege non-malignant injuries.

Based on our experience in this litigation, the amounts pleaded in the complaints are not typically meaningful as an indicator of the Company's potential liability. This is because (1) the amounts claimed usually bear no relation to the level of plaintiff's injury, if any; (2) complaints nearly always assert claims against multiple defendants (a typical complaint asserts claims against some 110 different defendants); (3) damages alleged are not attributed to individual defendants; (4) the defendants' share of liability may turn on the law of joint and several liability; (5) the amount of fault to be allocated to each defendant is different depending on each case; (6) many cases are filed against General Cable, even though the plaintiff did not use any of General Cable's products, and ultimately are withdrawn or dismissed without any payment; (7) many cases are brought on behalf of plaintiffs who have not suffered any medical injuries, and ultimately are resolved without any payment to that plaintiff; and (8) with regard to claims for punitive damages, potential liability generally is related to the amount of potential exposure to asbestos from a defendant's products. General Cable's asbestos-containing products contained only a minimal amount of fully encapsulated asbestos.

Further, as indicated above, General Cable has more than 15 years of experience in this litigation, and has, to date, resolved the claims of approximately 11,200 plaintiffs. The cumulative average settlement for these matters is less than \$210 per case. As of December 31, 2004, the Company had accrued on its balance sheet a liability of \$3.0 million for asbestos-related claims. This amount represents the Company's best estimate in order to cover resolution of future asbestos-related claims.

In January 1994, General Cable entered into a settlement agreement with certain principal primary insurers concerning liability for the costs of defense, judgments and settlements, if any, in all of the asbestos litigation described above. Subject to the terms and conditions of the settlement agreement, the insurers are responsible for a substantial portion of the costs and expenses incurred in the defense or resolution of this litigation. In recent years one of the insurers participating in the settlement that was responsible for a significant portion of the contribution under the settlement

agreement entered into insurance liquidation proceedings. As a result, the contribution of the insurers has been reduced and the Company has had to bear a larger portion of the costs relating to these lawsuits. Moreover, certain of the other insurers may be financially unstable, and if one or more of these insurers enter into insurance liquidation proceedings, General Cable will be required to pay a larger portion of the costs incurred in connection with these cases.

Based on (1) the terms of the insurance settlement agreement; (2) the relative costs and expenses incurred in the disposition of past asbestos cases; (3) reserves established on our books which are believed to be reasonable; and (4) defenses available to us in the litigation, the Company believes that the resolution of the present asbestos litigation will not have a material adverse effect on financial results, cash flows or financial position. However, since the outcome of litigation is inherently uncertain, the Company cannot give absolute assurance regarding the future resolution of the asbestos litigation. Liabilities incurred in connection with asbestos litigation are not covered by the American Premier indemnification.

Table of Contents

General Cable is also involved in various routine legal proceedings and administrative actions. In the opinion of the Company's management, these proceedings and actions should not, individually or in the aggregate, have a material adverse effect on its results of operations, cash flows or financial position.

Item 4. Submission of Matters to a Vote of Security Holders

None during the fourth quarter of 2004.

PART II.**Disclosure Regarding Forward-Looking Statements**

Certain statements in the 2004 Annual Report on Form 10-K including without limitation, statements regarding future financial results and performance, plans and objectives, capital expenditures and the Company's or management's beliefs, expectations or opinions, are forward-looking statements. Actual results may differ materially from those statements as a result of factors, risks and uncertainties over which the Company has no control. Such factors include economic and political consequences resulting from the September 2001 terrorist attack and the war with Iraq, domestic and local country price competition, particularly in certain segments of the power cable market and other competitive pressures; general economic conditions, particularly in construction; changes in customer or distributor purchasing patterns in our business segments; the Company's ability to increase manufacturing capacity and productivity; the financial impact of any future plant closures; the Company's ability to successfully complete and integrate acquisitions and divestitures; the Company's ability to negotiate extensions of labor agreements on acceptable terms; the Company's ability to service debt requirements and maintain adequate domestic and international credit facilities and credit lines; the Company's ability to pay dividends on its preferred stock; the impact of unexpected future judgments or settlements of claims and litigation; the Company's ability to achieve target returns on investments in its defined benefit plans; the Company's ability to avoid limitations on utilization of net losses for income tax purposes; the cost of raw materials, including copper and aluminum; the Company's ability to increase its selling prices during periods of increasing raw material costs; the impact of foreign currency fluctuations; the impact of technological changes; and other factors.

Item 5. Market for Registrant's Common Stock and Related Stockholder Matters

General Cable's common stock is listed on the New York Stock Exchange under the symbol "BGC". As of March 1, 2005, there were approximately 2,241 holders of the Company's common stock. The following table sets forth the high and low daily sales prices for the Company's common stock as reported on the New York Stock Exchange during the years ended December 31:

	2004		2003	
	High	Low	High	Low
First Quarter	\$ 9.19	\$ 6.87	\$ 4.25	\$ 3.11
Second Quarter	8.77	6.79	6.36	3.65
Third Quarter	11.14	7.95	10.06	5.30
Fourth Quarter	14.10	9.59	10.23	7.81

General Cable paid a \$0.05 per share dividend on its common stock each quarter beginning in the fourth quarter of 1997 and through the third quarter of 2002. In October 2002, as a result of an amendment to the Company's former credit facility, its board of directors suspended the payment of the quarterly cash dividends on common stock. The future payment of dividends on common stock is subject to the discretion of General Cable's board of directors, restrictions under the Series A redeemable convertible preferred stock, restrictions under the Company's current senior secured revolving credit facility and the senior notes and the requirements of Delaware General Corporation Law, and will depend upon general business conditions, financial performance and other factors the Company's board of directors may consider relevant. General Cable does not expect to pay cash dividends on common stock in the foreseeable future.

On November 24, 2003, the Company completed a comprehensive refinancing of its existing bank debt. The refinancing included the private placement of senior unsecured notes and redeemable convertible preferred stock. These securities were not registered under the Securities Act at the time of sale. The underwriters for both transactions were UBS Investment Bank and Merrill Lynch. The Company raised \$285.0 million through the sale of its 9.5% Senior Notes due 2010. The Company paid fees and expenses of \$8.7 million related to this transaction, which included an underwriting discount of \$7.5 million. The senior notes were offered only to qualified institutional buyers under Rule 144A of the Securities Act of 1933 and to certain non-U.S. persons in transactions outside the United States in reliance on Regulation S under the Securities Act of 1933. The Company raised \$103.5 million through the sale of 2,070,000 shares of General Cable 5.75% Series A Redeemable Convertible Preferred Stock. The Company paid fees and expenses of \$4.2 million related to this transaction, which included an underwriting discount of \$3.4 million. The preferred stock was offered only to qualified institutional buyers in reliance on Rule 144A under the Securities Act. The preferred stock has a liquidation preference of \$50.00 per

Table of Contents

share. Dividends accrue on the convertible preferred stock at the rate of 5.75% per annum and are payable quarterly in arrears starting on February 24, 2004. Dividends are payable in cash, shares of General Cable common stock or a combination thereof. Holders of the convertible preferred stock are entitled to convert any or all of their shares of convertible preferred stock into shares of General Cable common stock, at an initial conversion price of \$10.004 per share. The conversion price is subject to adjustments under certain circumstances. General Cable is obligated to redeem all outstanding shares of convertible preferred stock on November 24, 2013 at par. The Company may, at its option, elect to pay the redemption price in cash or in shares of General Cable common stock with an equivalent fair value, or any combination thereof. The Company has the option to redeem some or all of the outstanding shares of convertible preferred stock in cash beginning on the fifth anniversary of the issue date. The redemption premium will initially equal one-half the dividend rate on the convertible preferred stock and decline ratably to par on the date of mandatory redemption. In the event of a change in control, the Company has the right to either redeem the preferred stock for cash or to convert the preferred stock to common stock.

The following table sets forth information about General Cable's equity compensation plans as of December 31, 2004 (in thousands, except per share price):

	Number of securities to be issued upon exercise of outstanding options	Weighted-average exercise price of outstanding options	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in first column)
Shareholder approved plans:			
1997 Stock Incentive Plan (a)	2,229	\$ 12.07	569
Non-shareholder approved plans:			
2000 Stock Option Plan	1,057	\$ 7.80	278
Total	3,286	\$ 10.70	847

(a) Excludes matching restricted stock units (MRSU) and restricted stock of 82,932 and 1,410,686, respectively, awarded and outstanding through December 31, 2004.

Item 6. Selected Financial Data

The selected financial data for the last five years were derived from audited consolidated financial statements. The following selected financial data should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and the consolidated financial statements and related notes thereto. Certain reclassifications have been made to conform to the current year's presentation.

In August 2000, General Cable sold certain businesses acquired from BICC plc consisting primarily of the operations in the United Kingdom, Italy and Africa and a joint venture interest in Malaysia to Pirelli Cavi e Sistemi S.p.A. The financial data presented below contain those operations sold to Pirelli during 2000 up through the date of sale.

In September 2000, General Cable acquired Telmag S.A. de C.V., a Mexico-based manufacturer of telecommunications cables. The financial data presented below include the results of operations of this business after the closing date.

In March 2001, General Cable sold its Pyrotenax business unit to Raychem HTS Canada, Inc. The results of operations of this business are included in the financial data presented below for the periods prior to the closing date.

In September 2001, General Cable announced its decision to exit the consumer cordsets business. In October 2001, the Company sold substantially all of the manufacturing assets and inventory of its building wire business to Southwire Company. The results of operations of these businesses are included in the financial data presented below for the periods prior to the closing date. Beginning in the third quarter of 2001, General Cable reported the building wire and cordsets segment as discontinued operations for financial reporting purposes. Administrative expenses formerly allocated to this segment are now reported in the continuing operations segments. Prior periods presented reflect this change.

(1) As of January 1, 2001, General Cable changed its accounting method for non-North American metal inventories from the FIFO method to the LIFO method. The impact of the change was an increase in operating income of \$4.1 million, or \$0.08 of earnings per share, on both a basic and a diluted basis during 2001. As of January 1, 2000, the Company changed its accounting method for its North American non-metal inventories from the FIFO method to the LIFO method. The impact of the change was an increase in operating income of \$6.4 million, or \$0.12 of earnings per share, on both a basic and diluted basis during 2000.

(2) Working capital means current assets less current liabilities.

(3) Excludes off-balance sheet borrowings of \$67.8 million at December 31, 2001 and \$48.5 million at December 31, 2002. There were no off-balance sheet borrowings as of December 31, 2000, 2003 and 2004.

Table of Contents

**Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations
Overview**

The following Management's Discussion and Analysis (MD&A) is intended to help the reader understand General Cable Corporation. MD&A is provided as a supplement to the Company's Consolidated Financial Statements and the accompanying Notes to Consolidated Financial Statements (Notes) and should be read in conjunction with these Consolidated Financial Statements and Notes. This overview provides the Company's perspective on the sections included in MD&A. MD&A includes the following:

General a general description of the Company's business, financial information by geographic regions, raw material price volatility and seasonal trends.

Current Business Environment the Company's perspective on the challenges it faces and its relative competitive advantage.

Acquisitions and Divestitures a brief history of acquisitions and divestitures as they relate to the financial statements presented.

Critical Accounting Policies and Estimates a discussion of the accounting policies that require critical judgments and estimates.

The Refinancing a description of the comprehensive refinancing in the fourth quarter of 2003.

Results of Operations an analysis of the Company's results of operations for the financial statement periods presented.

Liquidity and Capital Resources an analysis of cash flows, sources and uses of cash.

General

General Cable is a leader in the development, design, manufacture, marketing and distribution of copper, aluminum and fiber optic wire and cable products for the energy, industrial & specialty and communications markets. Energy cables include low-, medium- and high-voltage power distribution and power transmission products for overhead and buried applications. Industrial & specialty wire and cable products conduct electrical current for industrial, OEM, commercial and residential power and control applications. Communications wire and cable products transmit low-voltage signals for voice, data, video and control applications.

Certain statements in this report including, without limitation, statements regarding future financial results and performance, plans and objectives, capital expenditures and the Company's or management's beliefs, expectations or opinions, are forward-looking statements. Actual results may differ materially from those statements as a result of factors, risks and uncertainties over which the Company has no control. Such factors include economic and political consequences resulting from the September 2001 terrorist attack and the war with Iraq, domestic and local country price competition, particularly in certain segments of the power cable market and other competitive pressures; general economic conditions, particularly in construction; changes in customer or distributor purchasing patterns in our business segments; the Company's ability to increase manufacturing capacity and productivity; the financial impact of any future plant closures; the Company's ability to successfully complete and integrate acquisitions and divestitures; the Company's ability to negotiate extensions of labor agreements on acceptable terms; the Company's ability to service debt requirements and maintain adequate domestic and international credit facilities and credit lines; the Company's ability to pay dividends on its preferred stock; the impact of unexpected future judgments or settlements of claims and litigation; the Company's ability to achieve target returns on investments in its defined benefit plans; the

Company's ability to avoid limitations on utilization of net operating losses for income tax purposes; the cost of raw materials, including copper; the Company's ability to increase its selling prices during periods of increasing raw material costs; the impact of foreign currency fluctuations; the impact of technological changes; and other factors.

Table of Contents

General Cable analyzes its worldwide operations in two geographic groups: 1) North America and 2) International. The following table sets forth net sales and operating income by geographic group for the periods presented, in millions of dollars:

	Year Ended December 31,					
	2004		2003		2002

Total operating income	\$ 56.5		\$ 45.7		\$ 15.7	

Approximately 90% of net sales in the Company's International operations are derived from energy and industrial & specialty cable sales and the European business specifically is currently benefiting from medium voltage energy cable capacity shortage in Europe and a shift towards environmentally friendly cables.

General Cable's reported net sales are directly influenced by the price of copper, and to a lesser extent, aluminum. The price of copper and aluminum has historically been subject to considerable volatility. The daily selling price of copper cathode on the COMEX averaged \$1.29 per pound in 2004, \$0.81 per pound in 2003 and \$0.72 per pound in 2002 and the daily price of aluminum rod averaged \$0.85 per pound in 2004, \$0.69 per pound in 2003 and \$0.65 per pound in 2002. General Cable generally passes changes in copper and aluminum prices along to its customers, although there are timing delays of varying lengths depending upon the volatility of metals prices, the type of product, competitive conditions and particular customer arrangements. A significant portion of the Company's energy and communications business and, to a lesser extent, the Company's industrial business has metal escalators written into customer contracts under a variety of price setting and recovery formulas. The remainder of the Company's business requires that the cost of higher metal prices be recovered through negotiated price increases with customers. In these instances, the ability to increase the Company's selling prices may lag the movement in metal prices by a period of time as the customer price increases are implemented. As a result of this and a number of other practices intended to match copper and aluminum purchases with sales, profitability over time has historically not been significantly affected by changes in copper and aluminum prices. General Cable does not engage in speculative metals trading or other speculative activities. Also, the Company does not engage in activities to hedge the underlying value of its copper and aluminum inventory.

The Company is also experiencing significant inflationary pressure on raw materials other than copper and aluminum used in cable manufacturing, such as insulating compounds, steel and wood reels, and higher energy costs. The Company has increased selling prices in most of its markets in order to offset the negative effect of increased raw

material prices and other costs. However, the Company's ability to ultimately realize these price increases will be influenced by competitive conditions in its markets, which includes underutilized manufacturing capacity. In addition, a continuing rise in raw material prices, when combined with the normal lag time between an announced customer price increase and its effective date in the market, may result in the Company not fully recovering these increased costs. If the Company was not able to adequately increase selling prices in a period of rising raw material costs, the Company would experience a decrease in reported earnings.

General Cable generally has experienced and expects to continue to experience certain seasonal trends in sales and cash flow. Larger amounts of cash are generally required during the first and second quarters of the year to build inventories in anticipation of higher demand during the spring and summer months, when construction activity increases. In general, receivables related to higher sales activity during the spring and summer months are collected during the fourth quarter of the year.

Table of Contents

Current Business Environment

In North America, General Cable has been operating for some time in a difficult business environment. The wire and cable industry is competitive, mature and cost driven. In many business segments, there is little differentiation among industry participants from a manufacturing or technology standpoint. During 2004, the Company's end markets have shown signs of recovery. There has been significant merger and acquisition activity which, we believe, may lead to a reduction in the deployment of inefficient, high cost capacity in the industry. In the energy segment, the 2003 power outages in the U.S., Canada and Europe emphasized a need to upgrade the power transmission infrastructure used by electric utilities, which may, over time, cause an increase in demand for General Cable's energy products. In addition, tax legislation was recently passed in the United States which includes the renewal of tax credits for producing power from wind. This may also cause an increase in demand for the Company's products as the Company is a significant manufacturer of wire and cable used in wind farms. In the industrial & specialty segment industrial construction spending in North America, which influences industrial cable demand, is significantly below the peak levels experienced over the last ten years. However, the Company has seen strengthening demand which may indicate a turnaround in industrial construction spending in North America. This segment has also experienced increased demand for cables utilized in industrial repairs and maintenance and the automotive aftermarket. Over the last two years, the communications segment also has experienced a significant decline from historical spending levels for outside plant telecommunications products and a weak market for switching/local area networking cables. Demand for communications wire and cable products has improved over the last several quarters and the Company believes it will benefit from the consolidation of competitors which occurred early this year in the communications market. The Company anticipates, based on recent regulatory announcements, further deployment of fiber optic products into the telephone network. Increased spending by the telephone companies on fiber deployment may negatively impact their purchases of the Company's copper based telecommunications cable products. However, this impact may be somewhat mitigated in that the Company believes it will benefit from the further investment in fiber broadband networks as its customers will most likely need to upgrade a portion of their copper network to support the fiber network. Additionally, the Company participates in the fiber cable market.

General Cable believes its investment in Lean Six Sigma training, coupled with effectively utilized manufacturing assets, provides a cost advantage compared to many of its competitors and generates cost savings which help offset rising raw material prices and other general economic cost increases. In addition, General Cable's customer and supplier integration capabilities, one-stop selling and geographic and product balance are sources of competitive advantage. As a result, the Company believes it is well positioned, relative to its competitors, in the current business environment.

As part of General Cable's ongoing efforts to reduce total operating costs, the Company continuously evaluates its ability to more efficiently utilize existing manufacturing capacity. Such evaluation includes the costs associated with and benefits to be derived from the combination of existing manufacturing assets into fewer plant locations and the possible outsourcing of certain manufacturing processes. In 2003, the Company announced the rationalization and refocusing of operations of certain of its industrial cable manufacturing plants which resulted in a \$7.6 million charge in the fourth quarter of 2003 (of which approximately \$1.3 million were cash payments) and a \$7.4 million charge in 2004 (of which approximately \$4.7 million were cash payments). During 2004, the Company also closed its rod mill operation and sold certain equipment utilized in that operation which resulted in a net gain of \$0.3 million.

Acquisitions and Divestitures

General Cable actively seeks to identify key trends in the industry to migrate its business to capitalize on expanding markets and new niche markets or exit declining or non-strategic markets in order to achieve better returns. The Company also sets aggressive performance targets for its business and intends to refocus or divest those activities which fail to meet targets or do not fit long-term strategies.

During the second quarter of 2002, General Cable formed a joint venture company to manufacture and market fiber optic cables. General Cable contributed assets, primarily inventory and machinery and equipment, to a subsidiary company which was then contributed to the joint venture in exchange for a \$10.2 million note receivable which resulted in a \$5.6 million deferred gain on the transaction. The December 31, 2003 balance sheets included a \$10.2 million note receivable from the joint venture partner in other non-current assets and a deferred gain from the initial joint venture formation of \$5.6 million in other liabilities. In January 2004, the Company reduced its ownership percentage in the joint venture from 49% to 40% and as a result the deferred gain was reduced to \$4.8 million. Beginning in the first quarter of 2004 the Company consolidated the joint venture company as a result of the adoption of FASB Interpretation (FIN) No. 46, as revised, Consolidation of Variable Interest Entities. For 2004, the joint venture had sales of \$21.4 million, an operating loss of \$(4.0) million and net loss of \$(4.1) million. Prior to the first quarter of 2004, the joint venture company was accounted for under the equity method of accounting. At December 31, 2003, other non-current assets included an investment in the joint venture of \$3.5 million.

Table of Contents

During the fourth quarter of 2004, the Company exchanged the note receivable from the former joint venture partner for the partner's ownership interest in the joint venture company. The ownership interest acquired was recorded at fair value which was \$2.4 million less than the carrying value of the note receivable, net of the deferred gain, which resulted in a \$2.4 million charge. As a result of this transaction, General Cable owned 100% of the fiber optic joint venture company at December 31, 2004.

Critical Accounting Policies and Estimates

The Company's consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. A summary of significant accounting policies is provided in Note 2 to the Consolidated Financial Statements. The application of these policies requires management to make estimates and judgments that affect the amounts reflected in the financial statements. Management bases its estimates and judgments on historical experience, information that is available to management about current events and actions the Company may take in the future and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. The most critical judgments impacting the financial statements include determinations with respect to inventory costing and valuation, pension accounting, the valuation allowance for deferred income taxes and revenue recognition which are discussed below. In addition, significant estimates and judgments are also involved in the valuation allowances for sales incentives and accounts receivable; legal, environmental, asbestos and customer reel deposit liabilities; assets and obligations related to other post-retirement benefits; and self insured workers compensation and health insurance reserves. Management periodically evaluates and updates the estimates used in the application of its accounting policies and adjusts amounts in the financial statements as necessary.

Inventory Costing and Valuation

General Cable utilizes the LIFO method of inventory accounting for its metals inventory. The Company's use of the LIFO method results in its income statement reflecting the current costs of metals, while metals inventories in the balance sheet are valued at historical costs as the LIFO layers were created. As a result of volatile copper prices, the replacement cost of the Company's copper inventory exceeded the historic LIFO cost by approximately \$38 million at December 31, 2004 and by approximately \$13 million at December 31, 2003. If LIFO inventory quantities are reduced in a period when replacement costs exceed the LIFO value of the inventory, the Company would experience an increase in reported earnings. Conversely, if LIFO inventory quantities are reduced in a period when replacement costs are lower than the LIFO value of the inventory, the Company would experience a decline in reported earnings. If the Company was not able to recover the LIFO value of its inventory at a profit in some future period when replacement costs were lower than the LIFO value of the inventory, the Company would be required to take a charge to recognize in its income statement all or a portion of the higher LIFO value of the inventory.

The Company periodically evaluates the realizability of its inventory. In circumstances where inventory levels are in excess of anticipated market demand, where inventory is deemed to be technologically obsolete or not saleable due to condition or where inventory costs exceeds net realizable value, the Company records a charge to cost of goods sold and reduces the inventory to its net realizable value.

Pension Accounting

Pension expense for the defined benefit pension plans sponsored by General Cable is determined based upon a number of actuarial assumptions, including an expected long-term rate of return on assets of 8.5%. This assumption was based on input from actuaries, including their review of historical 10 year, 20 year, and 25 year rates of inflation and real rates of return on various broad equity and bond indices in conjunction with the diversification of the asset portfolio. The expected long-term rate of return on assets is based on an asset allocation assumption of 65% allocated to equity

investments, with an expected real rate of return of 7%, and 35% to fixed-income investments, with an expected real rate of return of 3%, and an assumed long-term rate of inflation of 3%. Because of market fluctuations, the actual asset allocations as of December 31, 2004 and December 31, 2003 were 68% and 74%, respectively, of equity investments and 32% and 26%, respectively, of fixed-income investments. Management believes that long-term asset allocations on average will approximate the Company's assumptions and that an 8.5% long-term rate of return is a reasonable assumption.

The determination of pension expense for the defined benefit pension plans is based on the fair market value of assets as of the measurement date. Investment gains and losses are recognized in the measurement of assets immediately. Such gains and losses will be amortized and recognized as part of the annual benefit cost to the extent that unrecognized net gains and losses from all sources exceed 10% of the greater of the projected benefit obligation or the market value of assets.

The determination of future pension obligations utilizes a discount rate based on a review of long-term bonds that receive one of the two highest ratings given by a recognized rating agency which are expected to be available during the period to

Table of Contents

maturity of the projected pension benefit obligations, and input from our actuaries. The discount rate used at December 31, 2004 was 6.0%.

General Cable evaluates its actuarial assumptions at least annually, and adjusts them as necessary. In 2004, pension expense for the Company's defined benefit plans was \$5.5 million. Based on an expected rate of return on plan assets of 8.5% a discount rate of 6.0% and various other assumptions, the Company estimates its 2005 pension expense for its defined benefit plans will decrease approximately \$0.7 million from 2004, primarily due to improved investment performance during 2004. A 1% decrease in the assumed discount rate would increase pension expense by approximately \$1.7 million. Future pension expense will depend on future investment performance, changes in future discount rates and various other factors related to the populations participating in the plans. In the event that actual results differ from the actuarial assumptions, the funded status of the defined benefit plans may change and any such change could result in a charge or credit to equity and an increase or decrease in future pension expense and cash contributions.

Deferred Income Tax Valuation Allowance

General Cable records a valuation allowance to reduce deferred tax assets to the amount that it believes is more likely than not to be realized. The valuation of the deferred tax asset is dependent on, among other things, the ability of the Company to generate a sufficient level of future taxable income. In estimating future taxable income, the Company has considered both positive and negative evidence, such as historical results of operations, including the losses realized in recent periods, and has considered the implementation of prudent and feasible tax planning strategies. Approximately \$20 million of this deferred tax asset must be utilized prior to its expiration in the period 2006-2009. The remainder of the asset may be used for at least 15 years. This finite life has also been considered by the Company in the valuation of the asset. The Company has and will continue to review on a quarterly basis its assumptions and tax planning strategies and, if the amount of the estimated realizable net deferred tax asset is less than the amount currently on the balance sheet, the Company would reduce its deferred tax asset, recognizing a non-cash charge against reported earnings. At December 31, 2004, the Company had recorded a net deferred tax asset of \$73.0 million (\$22.6 million current and \$50.4 million long term). At December 31, 2004, the Company concluded that, more likely than not, the net deferred tax asset will be realized.

Revenue Recognition

Revenue is recognized when goods are shipped to the customer, title and risk of loss are transferred, pricing is fixed or determinable and collectibility is reasonably assured. Most revenue transactions represent sales of inventory. A provision for payment discounts, product returns and customer rebates is estimated based upon historical experience and other relevant factors and is recorded within the same period that the revenue is recognized. Given the nature of the Company's business, revenue recognition practices do not contain estimates that materially affect results of operations.

New Accounting Standards

In December 2004, SFAS No. 123(R), *Share-Based Payment* was issued. This statement will require compensation costs related to share-based payment transactions to be recognized in the financial statements. With limited exceptions, the amount of compensation cost will be measured based on the grant date fair value of the equity instruments issued. Compensation cost will be recognized over the period that an employee provides service in exchange for the award. SFAS No. 123 (R) replaces SFAS No. 123 and supersedes APB Opinion No. 25. SFAS No. 123 (R) is effective for fiscal quarters beginning after June 15, 2005. The Company is currently evaluating the impact of adopting SFAS No. 123 (R) on its financial position, results of operations and cash flows.

In November 2004, SFAS No. 151, Inventory Costs, an amendment of ARB No. 43, Chapter 4 was issued. This statement clarifies the accounting for abnormal amounts of idle facility expense, freight, handling costs and wasted material. SFAS No. 151 is effective for inventory costs incurred during fiscal years beginning after June 15, 2005. The Company is currently evaluating the impact of adopting SFAS No. 151 on its financial position, results of operations and cash flows.

The Refinancing

On November 24, 2003, the Company completed a comprehensive refinancing of its existing bank debt which improved its capital structure and provided increased financial and operating flexibility by reducing leverage, increasing liquidity and extending debt maturities. The refinancing included the following: (i) a new senior secured revolving credit facility, (ii) the private placement of 7-year senior unsecured notes, (iii) the private placement of redeemable convertible preferred stock and (iv) a public offering of common stock. The Company applied the net proceeds from these refinancing transactions to repay all amounts outstanding under its former senior secured revolving credit facility, senior secured term loans and accounts receivable asset-backed securitization facility and to pay fees and expenses of approximately \$23 million related to the refinancing. In the refinancing the Company raised \$47.6 million through the sale of 5,807,500 shares of common stock at \$8.20 per share (which included a 15% over-allotment option exercised on December 2, 2003) and \$103.5 million through

Table of Contents

the sale of 2,070,000 shares of redeemable convertible preferred stock at \$50.00 per share (which included the exercise of an option to purchase additional shares of preferred stock). The preferred stock has an annual dividend rate of 5.75% and a conversion price of \$10.004 per share. The refinancing also included \$285.0 million of 7-year senior unsecured notes due 2010 and a \$240.0 million secured revolving credit facility. The senior unsecured notes bear interest at a fixed rate of 9.5% while loans under the credit facility, as amended, bear interest at a rate of LIBOR plus 200 to 250 basis points, depending on the Company's fixed charge coverage as defined by the Credit Agreement. See further discussion of the amendment to the credit facility on page 27.

Results of Operations

The following table sets forth, for the periods indicated, statement of operations data in millions of dollars and as a percentage of net sales. Percentages may not add due to rounding.

	Fiscal Year Ended December 31,					
	2004		2003		2002	
	Amount	%	Amount	%	Amount	%
Net sales	\$ 1,970.7	100.0%	\$ 1,538.4	100.0%	\$ 1,453.9	100.0%
Cost of sales	1,756.0	89.1%	1,365.0	88.7%	1,287.3	88.5%
Gross profit	214.7	10.9%	173.4	11.3%	166.6	11.5%
Selling, general and administrative expenses	158.2	8.0%	127.7	8.3%	150.9	10.4%
Operating income	56.5	2.9%	45.7	3.0%	15.7	1.1%
Other income (expense)	(1.2)		1.5	0.1%		
Interest expense, net	(35.9)	(1.8)%	(43.1)	(2.8)%	(42.6)	(2.9)%
Other financial costs			(6.0)	(0.4)%	(1.1)	(0.1)%
Earnings (loss) from continuing operations before income taxes	19.4	1.0%	(1.9)	(0.1)%	(28.0)	(1.9)%
Income tax (provision) benefit	18.1	0.9%	(2.9)	(0.2)%	9.9	0.7%
Income (loss) from continuing operations	37.5	1.9%	(4.8)	(0.3)%	(18.1)	(1.2)%
Gain (loss) on disposal of discontinued operations (net of tax)	0.4				(5.9)	(0.4)%
Net income (loss)	37.9	1.9%	(4.8)	(0.3)%	(24.0)	(1.7)%
Less: preferred stock dividends	(6.0)	(0.3)%	(0.6)			
Net income (loss) applicable to common shareholders	\$ 31.9	1.6%	\$ (5.4)	(0.3)%	\$ (24.0)	(1.7)%

Year Ended December 31, 2004 Compared with Year Ended December 31, 2003

The net income applicable to common shareholders was \$31.9 million in 2004 compared to a net loss applicable to common shareholders of \$(5.4) million in 2003. The net income applicable to common shareholders for 2004 includes

pre-tax charges of \$7.1 million relating to the rationalization of certain manufacturing facilities, \$1.5 million for remediation costs, \$2.4 million related to the unwinding of the Company's former fiber optics joint venture and \$1.9 million related to the write-off of goodwill, a \$1.2 million pre-tax loss resulting from unfavorable foreign currency transactions, a \$0.4 after-tax gain from discontinued operations, and a \$23.3 million income tax benefit due to the elimination of certain prior year tax exposures.

The net loss applicable to common shareholders for 2003 includes pre-tax corporate charges of \$7.6 million related to the rationalization of certain of the Company's industrial cable manufacturing facilities and \$2.7 million for severance related to the Company's ongoing cost cutting efforts in Europe. These corporate charges were offset by \$2.1 million of income resulting from the reversal of unutilized restructuring reserves related to the closure in prior years of North American manufacturing facilities. The net loss applicable to common shareholders for 2003 also includes a \$6.0 million charge related to the refinancing of the Company's bank debt and a \$1.5 million foreign currency transaction gain resulting from a favorable change in exchange rates. The net loss applicable to common shareholders for 2003 also includes a \$4.4 million increase in the tax provision in the fourth quarter of 2003 resulting from the Company's refinancing. In conjunction with the refinancing, certain of the Company's foreign subsidiaries guaranteed the Company's new revolving credit facility, resulting in U.S. taxation of these foreign subsidiaries previously unrepatriated earnings and profits as a deemed dividend. This was a non-cash charge in 2003 because the Company utilized net operating losses to offset the additional taxable income.

Table of Contents*Net Sales*

The following tables set forth metal-adjusted net sales and metal pounds sold by segment, in millions. Net sales for 2003 have been adjusted to reflect the 2004 copper COMEX average price of \$1.29 per pound (a \$0.48 increase compared to the prior period) and the aluminum rod average price of \$0.85 per pound (a \$0.16 increase compared to the prior period).

	Metal-Adjusted Net Sales Year Ended December 31,			
	2004		2003	
	Amount	%	Amount	%
Energy	\$ 705.7	36%	\$ 621.2	35%
Industrial & specialty	734.3	37%	637.6	36%
Communications	530.7	27%	495.3	29%
Total metal-adjusted net sales	1,970.7	100%	1,754.1	100%
Metal adjustment			(215.7)	
Total net sales	\$ 1,970.7		\$ 1,538.4	

	Metal Pounds Sold Year Ended December 31,			
	2004		2003	
	Pounds	%	Pounds	%
Energy	275.6	43%	257.9	45%
Industrial & specialty	226.0	35%	197.2	34%
Communications	143.4	22%	123.5	21%
Total metal pounds sold	645.0	100%	578.6	100%

Net sales increased 28% to \$1,970.7 million in 2004 from \$1,538.4 million in 2003. The net sales increase included a 4% increase, or \$57.6 million, due to the favorable impact of foreign currency exchange rate changes. After adjusting 2003 net sales to reflect the \$0.48 increase in the average monthly COMEX price per pound of copper and the \$0.16 increase in the average aluminum rod price per pound in 2004, net sales increased 12% to \$1,970.7 million, up from \$1,754.1 million in 2003. The increase in metal-adjusted net sales reflects a 14% increase in the energy segment, a 15% increase in the industrial & specialty segment and a 7% increase in the communications segment. Metal pounds sold increased 11% compared to 2003. Metal pounds sold is provided herein as the Company believes this metric to be a good measure of sales volume since it is not impacted by metal prices or foreign currency exchange rate changes and the Company believes its product mix to be relatively constant year over year.

The 14% increase in metal-adjusted net sales for the energy segment reflects a 8% increase in net sales in North America and a 26% increase in net sales in the Company's international operations. The North American net sales reflect an increase in demand from power utilities for distribution cables compared to 2003 and an \$8.4 million favorable impact from changes in foreign currency exchange rates. The Company anticipates demand could accelerate if energy legislation in the United States aimed at improving the transmission grid infrastructure is passed. The

Company's international operations benefited from increased demand for distribution cables, increased wind farm projects and an \$18.6 million favorable impact from changes in foreign currency exchange rates.

The 15% increase in metal-adjusted net sales in the industrial & specialty segment reflects a 24% increase in the Company's international operations and a 7% increase in North America. The Company believes the continued improvement in North American sales volume indicates a recovery in the end markets for industrial cables. Additionally, this segment has benefited from growth in its domestic automotive aftermarket wire set business and an increase in sales of industrial cables utilized in maintenance, repair and plant operations. The net sales of the Company's international operations increased 24% which reflects strong demand related to its flexible zero-halogen cables in Europe, an area in which the European operation is a leader and a \$25.9 million favorable impact from changes in foreign currency exchange rates.

The 7% increase in the communications segment metal-adjusted net sales reflects an increase in all business units within this segment. Metal-adjusted net sales of telephone exchange cable increased in 2004 compared to 2003 as the Company benefited from the consolidation of competitors in 2004. The sales volume in data communication cables, primarily LAN cables, increased in 2004 compared to 2003, but continues to experience competitive price pressure. Additionally this segment experienced an increase in sales of electronics products resulting from sustained penetration into targeted niche markets and an increase in sales of wire harness and assembly products.

Table of Contents*Selling, General and Administrative Expense*

Selling, general and administrative expense increased to \$158.2 million in 2004 from \$127.7 million in 2003. The increase in SG&A was due in part to increased variable selling expenses related to higher sales volumes, changes in foreign currency exchange rates, \$4.7 million for the Company's Sarbanes-Oxley compliance activities and a change in the reporting of the results of the Company's fiber optics joint venture. Additionally, SG&A in 2004 included \$1.1 million of charges related to the rationalization of certain of the Company's manufacturing facilities, \$1.5 million of remediation costs, a \$2.4 million charge associated with the wind down of its former fiber optics joint venture and \$1.9 million related to the write-off of goodwill. As a result of these items, reported SG&A was 8.0% of net sales in 2004, up from 7.3% of metal-adjusted net sales in 2003.

Operating Income

The following table sets forth operating income by segment, in millions of dollars.

	Operating Income			
	Year Ended December 31, 2004		2003	
	Amount	%	Amount	%
Energy	\$ 39.8	57%	\$ 38.0	71%
Industrial & specialty	23.0	33%	9.9	18%
Communications	6.6	10%	6.0	11%
Subtotal excluding corporate charges	69.4	100%	53.9	100%
Corporate charges	(12.9)		(8.2)	
Total operating income	\$ 56.5		\$ 45.7	

Operating income of \$56.5 million for 2004 increased from \$45.7 million in 2003. The increase was primarily the result of strong performance from the Company's international operations, increased sales volume in all segments, ongoing cost cutting initiatives in manufacturing expenses and the favorable impact of foreign currency exchange rate changes. These increases were partially offset by increased raw material costs (both metal and non-metal) which were not fully recovered through customer price increases, \$4.7 million for the Company's Sarbanes-Oxley compliance activities, \$1.5 million of costs related to the remediation of a former manufacturing facility, and net corporate charges of \$11.4 million relating to the rationalization of certain industrial cable manufacturing facilities, the closure of the Company's rod mill operation and the unwinding of the Company's fiber optic joint venture and goodwill write-off.

Other Expense

Other expense of \$1.2 million in 2004 includes foreign currency transaction losses which resulted from changes in exchange rates between the designated functional currency and the currency in which the transaction is denominated.

Interest Expense

Net interest expense decreased to \$35.9 million in 2004 from \$49.1 million in 2003. The 2003 net interest expense includes \$6.0 million of costs related to the Company's refinancing which consisted of \$4.4 million for the write-off of

unamortized bank fees related to the Company's former credit facility, \$0.8 million related to the early termination of interest rate swaps and \$0.8 million related to the early termination of the accounts receivable asset-backed securitization financing. In addition to the prior year refinancing related costs, the decrease in interest expense is the result of lower outstanding borrowings and interest costs under the Company's new debt structure (see previous refinancing discussion) effective November 24, 2003, a lower credit spread under the Company's new credit facility and a reduction in the amortization of bank fees relating to the new credit facility compared to the former credit facility.

Tax Provision

The Company's effective tax rate for 2004 was (93.3)%. The negative effective tax rate was primarily attributable to the settlement of \$23.3 million of prior year tax exposures. Excluding the benefit of the settlement of prior year tax exposures, the Company's effective tax would have been 26.8% which reflects differences in the relative profitability of business operations in various taxing jurisdictions and the utilization of net operating loss carryforwards in foreign tax jurisdictions for which a tax benefit had not been previously recognized.

The 2003 income tax provision of \$2.9 million included \$4.4 million related to a deemed dividend related to the guarantee by certain of the Company's foreign subsidiaries of the Company's new revolving credit facility. The deemed dividend resulted in U.S. taxation of previously unrepatriated foreign earnings and profits, thereby increasing the tax provision but did not

Table of Contents

impact cash tax payments as the Company utilized net operating losses to offset this additional taxable income. This increase to the tax provision was offset by \$0.8 million related to foreign income tax differentials and other permanent differences.

Preferred Stock Dividends

During 2004, the Company accrued and paid \$6.0 million in dividends on its preferred stock.

Year Ended December 31, 2003 Compared with Year Ended December 31, 2002

The net loss applicable to common shareholders was \$(5.4) million in 2003 compared to a net loss applicable to common shareholders of \$(24.0) million in 2002. The net loss applicable to common shareholders for 2003 includes a \$0.6 million dividend on the preferred stock issued in the fourth quarter of 2003, pre-tax corporate charges of \$7.6 million related to the rationalization of certain of the Company's industrial cable manufacturing facilities and \$2.7 million for severance related to the Company's ongoing cost cutting efforts in Europe. These corporate charges were offset by \$2.1 million of income resulting from the reversal of unutilized restructuring reserves related to the closure in prior years of North American manufacturing facilities. The net loss applicable to common shareholders for 2003 also includes a \$6.0 million charge related to the refinancing of the Company's bank debt and a \$1.5 million foreign currency transaction gain resulting from a favorable change in exchange rates. The net loss applicable to common shareholders for 2003 also includes a \$4.4 million increase in the tax provision in the fourth quarter of 2003 resulting from the Company's refinancing.

The 2002 net loss and net loss applicable to common shareholders of \$(24.0) million includes pre-tax corporate charges of \$34.5 million, of which \$5.6 million was recorded in cost of sales, \$27.8 million was recorded in selling, general and administrative expense and \$1.1 million was recorded in other financial costs. The charges consisted of \$21.2 million to close two manufacturing plants in North America, \$6.9 million in severance and severance related costs worldwide, \$3.6 million to reduce to fair value certain assets contributed to the Company's Fiber Optic joint venture, \$1.7 million related to the sale of the Company's small non-strategic, United Kingdom based specialty cables business, and \$1.1 million related to the write-off of unamortized bank fees as a result of the October 2002 amendment to the Company's former credit facility. The 2002 net loss and net loss applicable to common shareholders of \$(24.0) million also includes a \$5.9 million discontinued operations after-tax charge principally related to an estimated lower net realizable value for real estate remaining from the Company's former building wire business, a longer than anticipated holding period for three distribution centers with unexpired lease commitments and certain other costs.

Net Sales

The following table sets forth metal-adjusted net sales by segment in millions of dollars. Net sales for the year 2002 have been adjusted to reflect the 2003 copper COMEX average price of \$0.81 per pound and the aluminum rod average price of \$0.69 per pound.

	Metal-Adjusted Net Sales Year Ended December 31,			
	2003		2002	
	Amount	%	Amount	%
Energy	\$ 560.2	37%	\$ 526.8	35%
Industrial & specialty	542.4	35%	520.0	35%
Communications	435.8	28%	447.6	30%

Total metal-adjusted net sales	1,538.4	100%	1,494.4	100%
Metal adjustment			(40.5)	
Total net sales	\$ 1,538.4		\$ 1,453.9	

Net sales increased 6% to \$1,538.4 million in 2003 from \$1,453.9 million in 2002. The net sales increase included an \$84 million favorable impact of foreign currency exchange rate changes principally related to the Company's European operations. After adjusting 2002 net sales to reflect the \$0.09 increase in the average monthly COMEX price per pound of copper and the \$0.04 increase in the average aluminum rod price per pound in 2003, net sales increased 3% to \$1,538.4 million, up from \$1,494.4 million in 2002. The increase in metal-adjusted net sales reflects a 6% increase in the energy segment, a 4% increase in the industrial & specialty segment and a 3% decrease in the communications segment.

The 6% increase in metal-adjusted net sales for the energy segment reflects a 19% increase in net sales in the Company's international operations and a 1% increase in net sales in North America. The Company's international operations have benefited from increased sales resulting from new contract awards throughout Europe and a \$39.5 million favorable impact from changes in foreign currency exchange rates. The North American net sales reflects lower sales volume during the first

Table of Contents

half of 2003 offset by strong demand from power utilities for bare transmission wire in the fourth quarter of 2003. The sales volume in the first quarter of 2003 was also negatively impacted by unseasonable weather in the Midwest and Northeast, which affected the ability of the Company's customers to install cables. The Company's management believes the timing of projects to enhance the power transmission and distribution grid slowed in 2003 in anticipation of pending energy legislation in the United States.

The 4% increase in metal-adjusted net sales in the industrial & specialty segment was principally due to a 19% increase in the Company's international operations, growth in its domestic automotive aftermarket business and an increase in sales of industrial cables utilized in plant maintenance, repairs and operations. The increase in net sales of our international operations includes a \$41.2 million favorable impact from changes in foreign currency exchange rates and the introduction of environmentally friendly cables in Europe, an area in which our European operation is a leader. These increases were partially offset by a 15% decrease in net sales of the North American industrial business, the result of the continued weakness in demand for cables utilized in new industrial construction and other major infrastructure projects.

The 3% decrease in the communications segment metal-adjusted net sales principally relates to a decrease in North American sales volume of telephone exchange cable and data communication cable. Metal-adjusted net sales of telephone exchange cable were off 4% for 2003 compared to 2002. However, sales to the Company's three largest telephone operating company customers increased in the third and fourth quarters of 2003 compared to same periods in 2002. As a result of the Company's position as a low cost producer, these products have historically been one of its most profitable business segments. The sales volume decrease in data communication cables was the result of weak general information technology spending in North America. These decreases were partially offset by an increase in sales of electronics products resulting from sustained penetration into targeted niche markets.

Selling, General and Administrative Expense

Selling, general and administrative expense decreased to \$127.7 million in 2003 from \$150.9 million in 2002. This decrease reflects the impact of actions taken to reduce fixed SG&A expense and controllable spending. These actions were partially offset by increased medical and pension related costs experienced during 2003 and the impact of increased SG&A expense in our European operations as a result of foreign currency exchange rate changes. SG&A expense for 2003 includes \$0.2 million of corporate charges related to plant rationalizations and the benefit of \$2.1 million related to the reversal of unutilized restructuring reserves. In 2002, SG&A expense included \$27.8 million of corporate charges, primarily relating to the closure of manufacturing plants and severance costs.

Operating Income

The following table sets forth operating income by segment, in millions of dollars.

	Operating Income			
	Year Ended December 31, 2003		2002	
	Amount	%	Amount	%
Energy	\$ 38.0	71%	\$ 36.9	75%
Industrial & specialty	9.9	18%	9.7	20%
Communications	6.0	11%	2.5	5%
Subtotal excluding corporate charges	53.9	100%	49.1	100%

Corporate charges	(8.2)	(33.4)
Total operating income	\$ 45.7	\$ 15.7

Operating income of \$45.7 million for 2003 increased from \$15.7 million in 2002. This increase is primarily the result of reduced corporate charges in 2003, as discussed above. Operating income also increased due to the Company's ongoing cost reduction initiatives in SG&A and manufacturing expenses, strong performance from the Company's European operations and the favorable impact of foreign currency exchange rate changes and a \$2.0 million reduction in the LIFO liquidation charge incurred in 2003 compared to 2002. Offsetting these increases were reduced selling prices in the North American communications segment. Additionally, increased raw material costs (most notably polyethylene) which were not fully recovered during 2003 and higher pension and employee fringe benefit costs negatively impacted operating income.

Other Income

Other income includes foreign currency transaction gains which result from changes in exchange rates between the designated functional currency and the currency in which a transaction is denominated.

Table of Contents

Interest Expense

Net interest expense, excluding other financial costs discussed below, increased to \$43.1 million in 2003 from \$42.6 million in 2002. The increase in interest expense is the result of higher interest costs under the Company's former credit facility during 2003 compared to the prior year, partially offset by reduced interest costs under the Company's new debt structure (see previous Refinancing discussion) effective November 24, 2003. The increase in interest cost under the Company's former credit facility was primarily the result of a higher credit spread for the Company's borrowings due to the former credit facility amendment which became effective in October 2002 and the amortization of bank fees related to the amendment, partially offset by lower average net borrowings and lower interest rates on the floating rate portion of the Company's debt.

As a result of the refinancing during the fourth quarter of 2003, the Company recorded other financial costs of \$6.0 million which consisted of pre-tax charges of \$4.4 million for the write-off of unamortized bank fees related to the Company's former credit facility, \$0.8 million related to the early termination of interest rate swaps and \$0.8 million related to the early termination of the accounts receivable asset-backed securitization financing.

In October 2002, General Cable recorded other financial costs of \$1.1 million related to the write-off of unamortized bank fees as a result of the October 2002 credit facility amendment. Of the \$1.1 million, \$0.6 million related to fees paid in April 2002 for a prior amendment, the terms of which were substantially amended by the October amendment and \$0.5 million was due to a reduction in the borrowing capacity available under the revolving portion of the former credit facility.

Tax Provision

The 2003 income tax provision of \$2.9 million includes \$4.4 million related to a deemed dividend related to the guarantee by certain of the Company's foreign subsidiaries of the Company's new revolving credit facility. The deemed dividend resulted in U.S. taxation of previously unrepatriated foreign earnings and profits, thereby increasing the tax provision but did not impact cash tax payments as the Company utilized net operating losses to offset this additional taxable income. This increase to the tax provision was offset by \$0.8 million related to foreign income tax differentials and other permanent differences. The Company's effective tax rate for 2002 was 35.5%.

Liquidity and Capital Resources

In general, General Cable requires cash for working capital, capital expenditures, debt repayment, salaries and related benefits, interest, preferred dividends and taxes. General Cable's working capital requirement increases when it experiences strong incremental demand for products and/or significant copper and aluminum price increases. Based upon historical experience and the expected availability of funds under the new credit facility, the Company believes its sources of liquidity will be sufficient to enable it to meet the Company's cash requirements for working capital, capital expenditures, debt repayment, salaries and related benefits, interest, preferred dividends and taxes for at least the next twelve months.

General Cable Corporation is a holding company with no operations of its own. All of the Company's operations are conducted, and net sales are generated, by its subsidiaries and investments. Accordingly, the Company's cash flow depends on the cash flows of its operations, in particular, the North American operations upon which it has historically depended the most. However, the Company's ability to use cash flow from its international operations, if necessary, has historically been adversely affected by limitations on the Company's ability to repatriate such earnings tax efficiently. The American Jobs Creation Act of 2004 provides that US corporations can repatriate earnings of foreign subsidiaries at a reduced tax rate under certain circumstances. As of December 31, 2004 the undistributed earnings of foreign subsidiaries that are considered to be indefinitely reinvested are approximately \$135 million. The

Company is currently in the process of evaluating how much, if any, of these foreign earnings will be repatriated. The Company will determine the sources and amounts, if any, of the foreign earnings repatriation and the related tax expense prior to December 31, 2005.

Cash flow provided by operating activities in 2004 was \$12.5 million. This reflects an increase in accounts payable, accrued and other liabilities of \$78.8 million and net income before depreciation and amortization, foreign currency exchange loss, deferred income taxes, settlement of tax items, loss on joint venture wind-down and gain on the disposal of property of \$55.5 million. The increase in accounts payable, accrued and other liabilities is primarily due to an increase in accounts payable which reflects greater manufacturing activity by the Company and the increase in raw material costs during 2004 as compared to 2003. These positive cash flows were largely offset by a \$63.7 million increase in accounts receivable, a \$45.3 million increase in inventories and an \$12.8 million increase in prepaid and other assets. The increase in accounts receivable reflects improved sales volume experienced in 2004 as a result of improving demand in the Company's end markets as well as increased pricing in response to increased raw material costs. Inventory has increased as a result of the Company's need to service the improving demand in its end markets. However, inventory turnover for the total Company improved slightly as compared to 2003 due to the Company's focus on supply chain management, application of Lean principles and increasing integration with its customers.

Table of Contents

The following table sets forth net cash provided by (used by) operating activities by geographic groups for the following periods (in millions):

	Year Ended December 31,	
	2004	2003
North America	\$ (35.6)	\$ (40.3)
International	48.1	25.8
Total	\$ 12.5	\$ (14.5)

Cash flow used by investing activities was \$36.3 million in 2004, principally reflecting \$37.0 million of capital expenditures. The Company anticipates capital spending to be approximately \$40 million in 2005. Additionally, the Company received proceeds of \$2.6 from the sale of property, primarily equipment from the Company's closed facilities.

Cash flow provided by financing activities in 2004 was \$28.8 million. This reflects an increase in borrowings under the Company's new revolving credit facility of \$35.6 million, which was due in part to the higher working capital requirements discussed above as a result of improving demand in the Company's end markets as well as the increase in raw material prices during 2004. In addition, the Company received \$0.4 million in partial payment of loans from shareholders and \$1.1 million in proceeds from the exercise of stock options. This source of cash was partially offset by the payment of preferred stock dividends of \$6.0 million and the \$2.3 million repayment of other debt.

The Company's current senior secured revolving credit facility, as amended, provides for up to \$240.0 million in borrowings, including a \$50.0 million sublimit for the issuance of commercial and standby letters of credit and a \$20.0 million sublimit for swingline loans. Advances under the credit facility are limited to a borrowing base computed using defined advance rates for eligible accounts receivable, inventory, equipment and owned real estate properties. The fixed asset component of the borrowing base is subject to scheduled reductions. At December 31, 2004, the Company had undrawn availability of \$126.0 million under the credit facility.

Indebtedness under the credit facility is guaranteed by the Company's North American subsidiaries and is secured by a first priority security interest in tangible and intangible property and assets of the Company's North American subsidiaries. Loans under the credit facility bear interest at the Company's option, equal to either an alternate base rate or an adjusted LIBOR rate plus an applicable margin percentage. The applicable margin percentage is subject to adjustments based upon the consolidated fixed charge coverage ratio, as defined.

The Company pays fees in connection with the issuance of letters of credit and a commitment fee equal to 50 basis points per annum on any unused commitments under the credit facility. Both fees are payable quarterly.

The credit facility requires that the Company comply with certain financial covenants, including a quarterly minimum fixed charge coverage ratio test and an annual maximum capital expenditures level. In addition, the senior secured revolving credit facility and the indenture governing the senior unsecured notes include negative covenants which restrict certain acts, including the payment of dividends to holders of common stock. However, the Company will be permitted to declare and pay dividends or distributions on the convertible preferred stock so long as there is no default under the senior secured revolving credit facility and the Company meets certain financial conditions.

The Company amended its Credit Agreement, effective October 22, 2004, which reduced the interest rate on borrowings under the credit facility by 50 basis points, increased the annual capital spending limit and provided for the ability to swap up to \$100 million of its existing fixed rate Senior notes to a floating interest rate.

The Company's European operations participate in arrangements with several European financial institutions that provide extended accounts payable terms to the Company on an uncommitted basis. In general, the arrangements provide for accounts payable terms of up to 180 days. At December 31, 2004, the arrangements had a maximum availability limit of the equivalent of approximately \$126 million, of which approximately \$95 million was drawn. Should the availability under these arrangements be reduced or terminated, the Company would be required to negotiate longer payment terms or repay the outstanding obligations with suppliers under this arrangement over 180 days and seek alternative financing arrangements which could increase the Company's interest expense. The Company also has approximately \$45 million of uncommitted facilities in Europe, which allow the Company to sell at a discount a portion of its accounts receivable to financial institutions. At December 31, 2004, these accounts receivable facilities were not drawn upon.

During the fourth quarter of 2002, as a result of declining returns in the investment portfolio of the Company's defined benefit pension plan, the Company was required to record a minimum pension liability equal to the under funded status of its plan. At December 31, 2002, the Company recorded an after-tax charge of \$29.2 million to accumulated other comprehensive income in the equity section of its balance sheet. During 2003, the investment portfolio experienced improved performance and as a result, the Company was able to reduce the after tax charge to accumulated other comprehensive income by \$7.3

Table of Contents

million. During 2004, the after tax charge to accumulated other comprehensive income was increased by \$0.2 million. In 2005, pension expense is expected to decrease approximately \$0.7 million from 2004, principally due to improved investment performance during 2004 and cash contributions are expected to decrease approximately \$2.2 million from 2004.

As part of General Cable's ongoing efforts to reduce total operating costs, the Company continuously evaluates its ability to more efficiently utilize existing manufacturing capacity. Such evaluation includes the costs associated with and benefits to be derived from the combination of existing manufacturing assets into fewer plant locations and the possible outsourcing of certain manufacturing processes. The Company previously announced the rationalization and refocusing of operations of certain of its industrial cable manufacturing plants which resulted in a \$7.6 million charge in the fourth quarter of 2003 (of which approximately \$1.3 million were cash payments) and a \$7.4 million in 2004 (of which approximately \$4.7 million were cash payments). These projects were completed at December 31, 2004. During 2004, the Company also closed its rod mill operation and sold certain equipment utilized in that operation which resulted in a net gain in the year of \$0.3 million.

Summarized information about the Company's contractual obligations and commercial commitments as of December 31, 2004 is as follows (in millions of dollars):

	Total	Payments Due by Period			
		Less than 1 Year	1 - 3 Years	4 - 5 Years	After 5 Years
Contractual obligations:					
Long-term debt	\$ 374.9	\$ 1.1	\$ 0.5	\$ 79.0	\$ 294.3
Interest payments on Senior Notes	162.6	27.1	54.2	54.2	27.1
Preferred Stock dividend payments	53.8	6.0	12.0	12.0	23.8
Operating leases	42.7	7.6	12.4	6.5	16.2
Commodity futures and forward pricing agreements	115.3	114.9	0.4		
Foreign currency contracts	33.6	33.6			
Total	\$ 782.9	\$ 190.3	\$ 79.5	\$ 151.7	\$ 361.4

The Company will be required to make future cash contributions to its defined benefit pension plans. The estimate for these contributions is approximately \$10.8 million during 2005. Estimates of cash contributions to be made after 2006 are difficult to make due to the number of variable factors which impact the calculation of defined benefit pension plan contributions. General Cable will also be required to make interest payments on its variable rate debt. The interest payments to be made on the Company's revolving loans and other variable debt are based on variable interest rates and the amount of the borrowings under the revolving credit facility depend upon the Company's working capital requirements. The Company's preferred stock dividends are payable in cash or common stock or a combination thereof.

The Company anticipates being able to meet its obligations as they come due based on historical experience and the expected availability of funds under its credit facility.

Off Balance Sheet Assets and Obligations

As part of the BICC plc acquisition, BICC agreed to indemnify General Cable against environmental liabilities existing at the date of the closing of the purchase of the business. In the sale of the businesses to Pirelli, General Cable generally indemnified Pirelli against any environmental liabilities on the same basis as BICC plc indemnified the

Company in the earlier acquisition. However, the indemnity the Company received from BICC plc related to the European business sold to Pirelli terminated upon the sale of those businesses to Pirelli. In addition, General Cable has agreed to indemnify Pirelli against any warranty claims relating to the prior operation of the business. General Cable agreed to indemnify Raychem HTS Canada, Inc., a business division of Tyco International, Ltd. for certain environmental liabilities existing at the date of the closing of the sale of the Company's former Pyrotenax business. General Cable has also agreed to indemnify Southwire Company against certain liabilities arising out of the operation of the business sold to Southwire prior to its sale.

Environmental Matters

The Company's expenditures for environmental compliance and remediation amounted to approximately \$1.4 million in 2004, \$0.8 million in 2003 and \$0.6 million in 2002. In addition, certain of General Cable's subsidiaries have been named as potentially responsible parties in proceedings that involve environmental remediation. The Company had accrued \$3.6 million at December 31, 2004 for all environmental liabilities. In the Wassall acquisition of General Cable from American

Table of Contents

Premier Underwriters, American Premier indemnified the Company against certain environmental liabilities arising out of General Cable or its predecessors' ownership or operation of properties and assets, which were identified during the seven-year period, ended June 2001. As part of the 1999 acquisition, BICC plc agreed to indemnify General Cable against environmental liabilities existing at the date of the closing of the purchase of the business. The Company has agreed to indemnify Pirelli, Raychem HTS, Canada, Inc. and Southwire Company against certain environmental liabilities arising out of the operation of the divested businesses prior to the sale. However, the indemnity the Company received from BICC plc related to the business sold to Pirelli terminated upon the sale of those businesses to Pirelli. While it is difficult to estimate future environmental liabilities, the Company does not currently anticipate any material adverse effect on results of operations, cash flows or financial position as a result of compliance with federal, state, local or foreign environmental laws or regulations or remediation costs.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

General Cable is exposed to various market risks, including changes in interest rates, foreign currency and commodity prices. To manage risk associated with the volatility of these natural business exposures, General Cable enters into interest rate, commodity and foreign currency derivative agreements as well as copper and aluminum forward pricing agreements. General Cable does not purchase or sell derivative instruments for trading purposes. General Cable does not engage in trading activities involving commodity contracts for which a lack of marketplace quotations would necessitate the use of fair value estimation techniques.

General Cable's reported net sales are directly influenced by the price of copper and to a lesser extent aluminum. The price of copper and aluminum has been subject to considerable volatility, with the daily selling price of copper cathode on the COMEX averaging \$1.29 per pound in 2004, \$0.81 per pound in 2003 and \$0.72 per pound in 2002 and the daily price of aluminum rod averaging \$0.85 per pound in 2004, \$0.69 per pound in 2003 and \$0.65 per pound in 2002.

General Cable utilizes the last-in first-out (LIFO) method of inventory accounting for its metals inventory. The Company's use of the LIFO method results in its income statement reflecting the current costs of metals, while metals inventories in the balance sheet are valued at historical costs as the LIFO layers were created. As a result of volatile copper prices, the replacement cost of the Company's copper inventory exceeded the historic LIFO cost by approximately \$38 million at December 31, 2004 and \$13 million at December 31, 2003. If LIFO inventory quantities were reduced in a period when the replacement cost of the inventory exceeded the LIFO value, the Company would experience an increase in reported margins. Conversely, if LIFO inventory quantities were reduced in a period when replacement costs were lower than the LIFO value of the inventory, the Company would experience a decline in reported margins. If the Company were not able to recover the LIFO value of its inventory at a profit in some future period when replacement costs were lower than the LIFO value of the inventory, the Company would be required to take a charge to recognize in its income statement all or a portion of the higher LIFO value of the inventory.

General Cable has utilized interest rate swaps and interest rate collars to manage its interest expense exposure by fixing its interest rate on a portion of the Company's floating rate debt. Under the swap agreements, General Cable typically pays a fixed rate while the counterparty pays to General Cable the difference between the average fixed rate and the three-month LIBOR rate. During 2001, the Company entered into several interest rate swaps which effectively fixed interest rates for borrowings under the former credit facility and other debt. In the fourth quarter of 2003 in conjunction with the refinancing of its bank debt, the Company incurred a cost of \$0.8 million to terminate the interest rate swaps related to the former credit facility. At December 31, 2004, the remaining outstanding interest rate swap had a notional value of \$9.0 million, an interest rate of 4.49% and matures in October 2011. The Company does not provide or receive any collateral specifically for this contract. The fair value of interest rate derivatives are based on quoted market prices and third party provided calculations, which reflect the present values of the difference between

estimated future variable-rate receipts and future fixed-rate payments. At December 31, 2004 and 2003, the net unrealized loss on interest rate derivatives and the related carrying value was \$(0.7) million. A 10% change in the variable rate would change the unrealized loss by \$0.2 million in 2004. All interest rate derivatives are marked-to-market with changes in the fair value of qualifying cash flow hedges recorded as other comprehensive income.

The Company enters into forward exchange contracts principally to hedge the currency fluctuations in certain transactions denominated in foreign currencies, thereby limiting the Company's risk that would otherwise result from changes in exchange rates. Principal transactions hedged during the year were firm sales and purchase commitments. The fair value of foreign currency contracts represents the amount required to enter into offsetting contracts with similar remaining maturities based on quoted market prices. At December 31, 2004 and 2003, the net unrealized loss on the net foreign currency contracts was \$(0.6) million and \$(0.8) million, respectively. A 10% change in the exchange rate for these currencies would change the unrealized loss by \$5.0 million in 2004.

Outside of North America, General Cable enters into commodity futures contracts for the purchase of copper and aluminum for delivery in a future month to match certain sales transactions. At December 31, 2004 and 2003, General Cable had an

Table of Contents

unrealized gain of \$3.5 million and \$0.1 million respectively, on the commodity futures. A 10% change in the price of copper and aluminum would result in a change in the unrealized gain of \$5.2 million in 2004.

The notional amounts and fair values of these financial instruments at December 31, 2004 and 2003 are shown below (in millions). The net carrying amount of the financial instruments was a net asset of \$2.2 million at December 31, 2004 and a net liability of \$1.4 million at December 31, 2003.

	2004		2003	
	Notional Amount	Fair Value	Notional Amount	Fair Value
Interest rate swap	\$ 9.0	\$ (0.7)	\$ 9.0	\$ (0.7)
Foreign currency forward exchange	33.6	(0.6)	38.4	(0.8)
Commodity futures	48.8	3.5	13.6	0.1
		\$ 2.2		\$ (1.4)

In the normal course of business, General Cable enters into forward pricing agreements for purchase of copper and aluminum for delivery in a future month to match certain sales transactions. At December 31, 2004 and 2003, General Cable had an unrealized gain of \$7.2 million and \$2.4 million, respectively. General Cable expects the unrealized gains under these agreements to be offset as a result of firm sales price commitments with customers.

None.

Item 9A. Controls and Procedures*Disclosure Controls and Procedures*

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's reports under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Company's Chief Executive Officer

(CEO) and Chief Financial Officer (CFO), as appropriate, to allow timely decisions regarding required disclosure. The Company periodically reviews the design and effectiveness of its disclosure controls and internal control over financial reporting. The Company makes modifications to improve the design and effectiveness of its disclosure controls and internal control structure, and may take other corrective action, if its reviews identify a need for such modifications or actions.

A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

In connection with the preparation of this Annual Report on Form 10-K, as of December 31, 2004, an evaluation was performed under the supervision and with the participation of the Company's management, including the CEO and CFO, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act). As disclosed in the Company's Form 8-K filed on March 16, 2005, the

Table of Contents

Company has concluded that control deficiencies in its internal control over financial reporting as of December 31, 2004 constitute material weaknesses within the meaning of the Public Company Accounting Oversight Board's Auditing Standard No. 2. Based on that evaluation, the Company's CEO and CFO concluded that the Company's disclosure controls and procedures were not effective as of December 31, 2004. The material weaknesses, which have been identified and reported to the Company's Audit Committee, relate to the following:

Control environment weaknesses, including access to computer applications, segregation of duties with respect to both its manual and computer based business processes and sufficiency of personnel with appropriate qualifications and training in certain key accounting roles in order to complete and document the monthly and quarterly financial closing processes.

Control procedures over inventory shipping and recognition of revenue in the proper accounting period.

Control procedures over receiving transactions and the recording of non-purchase order based accounts payable transactions in the proper accounting period.

Controls over the liability estimation and accrual process.

Controls over finished goods inventory on consignment at customer locations.

The design and effectiveness of internal controls over accounting for fixed assets, including returnable shipping reels.

Design of controls relating to purchasing procedures at Company headquarters and the maintenance of vendor master files.

Management, with oversight from the Audit Committee, has been addressing all of these issues aggressively and is committed to effectively remediating known weaknesses as expeditiously as possible. Although the Company's remediation efforts are well underway, control weaknesses will not be considered remediated until new internal controls over financial reporting are implemented and operational for a period of time and are tested, and management and its independent registered public accounting firm conclude that these controls are operating effectively.

Changes in internal control over financial reporting

In connection with the implementation of the provisions of Section 404 of Sarbanes-Oxley, the Company made various improvements to its system of internal control. Management continues to review, revise and improve the effectiveness of the Company's internal controls including strengthening controls over those material weaknesses noted above. Management has made no significant changes in the Company's internal controls over financial reporting in connection with its fourth quarter evaluation that would materially affect, or are reasonably likely to materially affect, its internal control over financial reporting.

Management's Annual Report on Internal Control over Financial Reporting and Attestation Report of our Independent Registered Public Accounting Firm

Management's Report on Internal Control over Financial Reporting and the Attestation Report of the Company's Independent Registered Public Accounting Firm thereon will be filed by amendment to this Annual Report on Form 10-K not later than 45 days after March 16, 2005, as permitted by SEC Release No. 34-50754 (November 30, 2004), Order Under Section 36 of the Securities Exchange Act of 1934 Granting an Exemption From Specified Provisions of Exchange Act Rules 13a-1 and 15d-1. If any other material weaknesses were to be identified between the date of this Form 10-K filing and the filing of the amendment to the Form 10-K which will include the Section 404

certification, they would be disclosed in the amended Form 10-K and the Company's Section 404 certification.

Item 9B. Other Information

None.

Table of Contents**PART III.****Item 10. Directors and Executive Officers of the Registrant**

General Cable's amended and restated by-laws provide that its board of directors is divided into three classes (Class I, Class II and Class III). At each annual meeting of the shareholders, directors constituting one class are elected for a three-year term. Each of the directors will be elected to serve until a successor is elected and qualified or until such director's earlier resignation or removal.

The following table sets forth certain information concerning the directors and executive officers of General Cable on February 1, 2005.

Name	Age	Position
Gregory B. Kenny	52	President, Chief Executive Officer and Class II Director
Christopher F. Virgulak	49	Executive Vice President, Chief Financial Officer and Treasurer
Robert J. Siverd	56	Executive Vice President, General Counsel and Secretary
John E. Welsh, III	53	Class I Director, Non-executive Chairman of the Board
Robert L. Smialek	60	Class II Director
Gregory E. Lawton	53	Class III Director
Craig P. Omtvedt	55	Class III Director

Mr. Kenny has been one of General Cable's directors since 1997 and has been President and Chief Executive Officer since August 2001. He served as President and Chief Operating Officer from May 1999 to August 2001. He served as Executive Vice President and Chief Operating Officer of General Cable from March 1997 to May 1999. From June 1994 to March 1997, he was Executive Vice President of General Cable's immediate predecessor. He is also a director of Corn Products International, Inc. (NYSE: CPO) and IDEX Corporation (NYSE: IEX).

Mr. Virgulak has been Executive Vice President, Chief Financial Officer and Treasurer since October 2002. From June 2000 to October 2002, he was Executive Vice President and Chief Financial Officer. He served as Executive Vice President, Chief Financial Officer and Treasurer from March 1997 to June 2000. From October 1994 until March 1997, he was Executive Vice President, Chief Financial Officer and Treasurer of the predecessor company.

Mr. Siverd has served as Executive Vice President, General Counsel and Secretary of General Cable since March 1997. From July 1994 until March 1997, he was Executive Vice President, General Counsel and Secretary of the predecessor company.

Mr. Welsh has been one of the Company's directors since 1997 and is Non-executive Chairman of the Board and a member of the Audit Committee, Compensation Committee and Corporate Governance Committee. He is currently President of Avalon Capital Partners, LLC, an investment firm focused on private equity and venture capital investments. From October 2000 to December 2002, he was a Managing Director of CIP Management LLC, the management company for Continuation Investments Group Inc. From November 1992 to December 1999, he served as Managing Director and Vice-Chairman of the board of directors of SkyTel Communications, Inc. and as a Director of SkyTel from September 1992 until December 1999. Prior to 1992, Mr. Welsh was a Managing Director in the Investment Banking Division of Prudential Securities, Inc.

Mr. Smialek has been one of the Company's directors since 1998 and is Chairman of the Compensation Committee and a member of the Audit Committee and Corporate Governance Committee. He was formerly President and Chief Executive Officer of Applied Innovation, Inc. (NASDAQ: AINN) from July 2000 until August 2002. From May 1993

until June 1999, he was the Chairman, President and Chief Executive Officer of Insilco Corporation (The Pink Sheets: INSL), a diversified manufacturing company based in Dublin, Ohio.

Mr. Lawton has been one of the Company's directors since 1998. He is Chairman of the Corporate Governance Committee and member of the Audit Committee and Compensation Committee. Since October 2000, Mr. Lawton has been President and Chief Executive Officer of Johnson Diversey, Inc., a supplier of cleaning and hygiene solutions. From January 1999 until September 2000, he was President and Chief Operating Officer of Johnson Wax Professional. Prior to joining Johnson Wax, Mr. Lawton was President of NuTone Inc., a subsidiary of Williams plc based in Cincinnati, Ohio, from 1994 to 1998. From 1989 to 1994, Mr. Lawton served with The Procter & Gamble Company (NYSE: PG) where he was Vice President and General Manager of several consumer product groups. Mr. Lawton is a director of Johnson Outdoor Inc. (NASDAQ: JOUT).

Mr. Omtvedt has been one of the Company's directors since August 2004 and is Chairman of the Audit Committee and a member of the Compensation Committee and Corporate Governance Committee. Mr. Omtvedt has been Senior Vice

Table of Contents

President and Chief Financial Officer of Fortune Brands, Inc. (NYSE: FO) since 2000. He has been with Fortune Brands, Inc. since 1989 and served in positions of increasing responsibility, including Senior Vice President and Chief Accounting Officer, before assuming his current position in January 2000. Before joining Fortune Brands, Mr. Omtvedt worked for Pillsbury Company from 1985 to 1989 in various audit and controller roles.

The Board of Directors of the Company has determined that Craig P. Omtvedt, Chairman of the Audit Committee, and Audit Committee members, Mr. Welsh, Mr. Lawton and Mr. Smialek, are audit committee financial experts as defined by Item 401(h) of Regulation S-K and are independent within the meaning of Item 7(d)(3)(iv) of Schedule 14A under the Exchange Act.

The Company has adopted a Code of Business Conduct and Ethics that applies to its directors, officers (including the Company's principal executive officer, principal financial officer and principal accounting officer) and employees. The Company has also adopted Corporate Governance Principles and Guidelines, an Audit Committee Charter, a Compensation Committee Charter and a Corporate Governance Committee Charter (collectively "Charters"). Copies of the Code of Business Conduct and Ethics, Corporate Governance Principles and Guidelines and each of the Charters are available on the Company's website, www.generalcable.com, and may be found under the Investor Information section by clicking on Corporate Governance. The Company intends to satisfy the disclosure requirement under Item 10 of Form 8-K regarding an amendment to, or waiver from, a provision of our Code of Ethics by posting such information on our website at the location specified above.

On May 11, 2004, the Company submitted its Annual Chief Executive Officer Certification to the New York Stock Exchange as required by Section 303A.12 (a) of the New York Stock Exchange Listed Company Manual.

The Chief Executive Officer and Chief Financial Officer Certifications required under Section 302 of the Sarbanes-Oxley Act are filed as exhibits to the Company's Form 10-K.

Except as set forth above, the additional information required by this item is included in the definitive Proxy Statement which General Cable intends to file with the Securities and Exchange Commission within 120 days after December 31, 2004, and is incorporated herein by reference.

Item 11. Executive Compensation

The information required by this item is included in the definitive Proxy Statement which General Cable intends to file with the Securities and Exchange Commission within 120 days after December 31, 2004, and is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management

The information required by this item is included in the definitive Proxy Statement which General Cable intends to file with the Securities and Exchange Commission within 120 days after December 31, 2004, and is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions

The information required by this item is included in the definitive Proxy Statement which General Cable intends to file with the Securities and Exchange Commission within 120 days after December 31, 2004, and is incorporated

herein by reference.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

General Cable Corporation:

We have audited the accompanying consolidated balance sheets of General Cable Corporation and subsidiaries (the Company) as of December 31, 2004 and 2003, and the related consolidated statements of operations, changes in shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2004. Our audits also included the financial statement schedule listed in the Index at Item 15. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of General Cable Corporation and subsidiaries as of December 31, 2004 and 2003, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2004, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

GENERAL CABLE CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements

1. General

General Cable Corporation and subsidiaries (General Cable) is a leading global developer and manufacturer in the wire and cable industry. The Company sells copper, aluminum and fiber optic wire and cable products worldwide. The Company's operations are divided into three main segments: energy, industrial & specialty and communications. As of December 31, 2004, General Cable operated 26 manufacturing facilities in nine countries and two regional distribution centers in North America in addition to the corporate headquarters in Highland Heights, Kentucky.

2. Summary of Significant Accounting Policies

Principles of Consolidation

The consolidated financial statements include the accounts of General Cable Corporation and its wholly-owned subsidiaries. Investments in 50% or less owned joint ventures are accounted for under the equity method of accounting. Other non-current assets included an investment in a fiber optics joint venture of \$3.5 million at December 31, 2003. The Company adopted FIN 46, as revised, Consolidation of Variable Interest Entities, which resulted in the consolidation of the fiber optic joint venture in the first quarter of 2004. In the fourth quarter of 2004, the Company unwound the joint venture and as of December 31, 2004 owned 100% of the business. All transactions and balances among the consolidated companies have been eliminated.

Reclassifications

Certain reclassifications have been made to the prior year to conform to the current year's presentation.

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates are based on historical experience and information that is available to management about current events and actions the Company may take in the future. Significant items subject to estimates and assumptions include valuation allowances for sales incentives, accounts receivable, inventory and deferred income taxes; legal, environmental, asbestos and customer reel deposit liabilities; assets and obligations related to pension and other post-retirement benefits; and self insured workers compensation and health insurance reserves. There can be no assurance that actual results will not differ from these estimates.

Revenue Recognition

Revenue is recognized when goods are shipped to the customer, title and risk of loss are transferred, pricing is fixed or determinable and collectibility is reasonably assured. Most revenue transactions represent sales of inventory. A provision for payment discounts, product returns and customer rebates is estimated based upon historical experience and other relevant factors and is recorded within the same period that the revenue is recognized. Given the nature of the Company's business, revenue recognition practices do not contain estimates that materially affect results of operations.

Earnings (Loss) Per Share

Earnings (loss) per common share and loss per common share-assuming dilution are computed based on the weighted average number of common shares outstanding. Earnings per common share-assuming dilution are computed based on the weighted average number of common shares outstanding and the dilutive effect of stock options and restricted stock units outstanding and the assumed conversion of the Company's preferred stock, if applicable.

Foreign Currency Translation

For operations outside the United States that prepare financial statements in currencies other than the U.S. dollar, results of operations and cash flows are translated at average exchange rates during the period, and assets and liabilities are translated at spot exchange rates at the end of the period. Foreign currency translation adjustments are included as a separate component of accumulated other comprehensive income (loss) in shareholders' equity. The effects of changes in exchange rates between the designated functional currency and the currency in which a transaction is denominated are recorded as foreign currency transaction gains (losses). See further discussion in Note 4.

Table of Contents

GENERAL CABLE CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

Inventories

General Cable values all of its North American inventories and all of its non-North American metal inventories using the LIFO method and all remaining inventories using the first-in first-out (FIFO) method. Inventories are stated at the lower of cost or market value. The Company determines whether a lower of cost or market provision is required on a quarterly basis by computing whether inventory on hand, on a last-in first-out (LIFO) basis, can be sold at a profit based upon current selling prices less variable selling costs. No provision was required in 2004 or 2003. In the event that a provision is required in some future period, the Company will determine the amount of the provision by writing down the value of the inventory to the level where its sales, using current selling prices less variable selling costs, will result in a profit.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. Costs assigned to property, plant and equipment relating to acquisitions are based on estimated fair values at that date. Depreciation is provided using the straight-line method over the estimated useful lives of the assets: new buildings, from 15 to 50 years; and machinery, equipment and office furnishings, from 3 to 15 years. Leasehold improvements are depreciated over the life of the lease. The Company's manufacturing facilities perform major maintenance activities during planned shutdown periods which traditionally occur in July and December. The costs related to these activities are accrued for evenly throughout the year.

Goodwill

Goodwill and intangible assets with indefinite useful lives are not amortized, but are reviewed annually for impairment. At December 31, 2003, the Company had no goodwill recorded on its balance sheet. During the first quarter of 2004, the Company began consolidating its fiber optic joint venture, which had \$1.9 million of goodwill. As part of the Company's business planning process in 2004, management determined that the initial business premise for the formation of the joint venture was not being realized and that the long-term prospects for the joint venture were significantly below previous expectations. Therefore, during the fourth quarter of 2004, the Company recorded a \$1.9 million charge for the write-off of this goodwill. The fair value of this business unit was estimated using the expected present value of future cash flows. There was no goodwill on the Company's balance sheet at December 31, 2004.

Fair Value of Financial Instruments

Financial instruments are defined as cash or contracts relating to the receipt, delivery or exchange of financial instruments. Except as otherwise noted, fair value approximates the carrying value of such instruments.

Forward Pricing Agreements for Purchases of Copper and Aluminum

In the normal course of business, General Cable enters into forward pricing agreements for purchases of copper and aluminum to match certain sales transactions. At December 31, 2004 and 2003, General Cable had \$62.4 million and \$30.5 million, respectively, of future copper and aluminum purchases that were under forward pricing agreements. The fair market value of the forward pricing agreements was \$69.6 million and \$32.9 million at December 31, 2004 and 2003, respectively. General Cable expects to recover the cost of copper and aluminum under these agreements as a result of firm sales price commitments with customers.

Concentration of Credit Risk

General Cable sells a broad range of products throughout primarily the United States, Canada, Europe and the Asia Pacific region. Concentrations of credit risk with respect to trade receivables are limited due to the large number of customers, including members of buying groups, composing General Cable's customer base. Ongoing credit evaluations of customers' financial condition are performed, and generally, no collateral is required. General Cable maintains reserves for potential credit losses and such losses, in the aggregate, have not exceeded management's estimates. Certain subsidiaries also maintain credit insurance for certain customer balances.

Derivative Financial Instruments

Derivative financial instruments are utilized to manage interest rate, commodity and foreign currency risk. General Cable does not hold or issue derivative financial instruments for trading purposes. Statement of Financial Accounting Standards (SFAS) No. 133, Accounting For Derivative Instruments and Hedging Activities, as amended, requires that all derivatives be recorded on the balance sheet at fair value. The accounting for changes in the fair value of the derivative depends on the intended use of the derivative and whether it qualifies for hedge accounting. SFAS No. 133, as applied to General Cable's risk management strategies, may increase or decrease reported net income, and stockholders' equity, or both, prospectively depending on changes in interest rates and other variables affecting the fair value of derivative instruments and hedged items, but will have no effect on cash flows or economic risk. See further discussion in Note 12.

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

General Cable has entered into interest rate swap and collar agreements designed to hedge underlying debt obligations. During the fourth quarter of 2003, the Company incurred a cost of \$0.8 million for the termination of interest rate swaps as a result of the refinancing of the Company's bank debt.

Foreign currency and commodity contracts are used to hedge future sales and purchase commitments. Unrealized gains and losses on such contracts are recorded in other comprehensive income until the underlying transaction occurs and is recorded in the income statement at which point such amounts included in other comprehensive income are recognized in income which generally will occur over periods less than one year.

Accounts Receivable Securitization

The Company accounted for the securitization of accounts receivable in accordance with SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, a replacement of FASB Statement No. 125. At the time the receivables were sold, the balances were removed from the Consolidated Balance Sheet. This statement modified certain standards for the accounting of transfers of financial assets and also required expanded financial statement disclosures related to securitization activities. During the fourth quarter of 2003, this securitization financing was terminated in connection with the refinancing of the Company's bank debt. See further discussion in Note 6.

Stock-Based Compensation

SFAS No. 123, Accounting for Stock-Based Compensation, encourages, but does not require, companies to record compensation cost for stock-based employee compensation plans at fair value. General Cable has chosen to continue to account for stock-based compensation using the intrinsic value method prescribed in Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations. Accordingly, compensation cost for stock options is measured as the excess, if any, of the quoted market price of the Company's stock at the date of the grant over the amount an employee must pay to acquire the stock. No compensation cost for stock options is reflected in net income, as all options granted had an exercise price equal to the market value of the underlying common stock on the date of grant. The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of SFAS No. 123 to stock-based employee compensation.

	Year Ended December 31,		
	2004	2003	2002
Net income (loss) as reported	\$ 37.9	\$ (4.8)	\$ (24.0)
Less: preferred stock dividends	(6.0)	(0.6)	
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(2.2)	(2.2)	(2.4)
Pro forma net income (loss) for basic EPS computation	\$ 29.7	\$ (7.6)	\$ (26.4)
Net income (loss) as reported	\$ 37.9	\$ (4.8)	\$ (24.0)
Less: preferred stock dividends, if applicable	n/a	(0.6)	

Edgar Filing: GENERAL CABLE CORP /DE/ - Form 10-K

Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(2.2)	(2.2)	(2.4)

Basic pro forma	\$ 0.76	\$ (0.23)	\$ (0.80)
Diluted as reported	\$ 0.75	\$ (0.16)	\$ (0.73)
Diluted pro forma	\$ 0.71	\$ (0.23)	\$ (0.80)

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

These proforma amounts may not be representative of future disclosures because the estimated fair value of stock options is amortized to expense over the vesting period, and additional options may be granted in future years. In determining the proforma amounts above, the fair value of each option was estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

	2004	2003	2002
Risk-free interest rate	4.0%	3.6%	3.2%
Expected dividend yield	N/A	N/A	1.5%
Expected option life	6.5 years	6.5 years	6.5 years
Expected stock price volatility	40.9%	70.1%	95.7%
Weighted average fair value of options granted	\$ 4.16	\$ 2.72	\$ 9.58

New Standards

In December 2004, SFAS No. 123(R), *Share-Based Payment* was issued. This statement will require compensation costs related to share-based payment transactions to be recognized in the financial statements. With limited exceptions, the amount of compensation cost will be measured based on the grant date fair value of the equity instruments issued. Compensation cost will be recognized over the period that an employee provides service in exchange for the award. SFAS No. 123 (R) replaces SFAS No. 123 and supersedes APB Opinion No. 25. SFAS No. 123 (R) is effective for fiscal quarters beginning after June 15, 2005. The Company is currently evaluating the impact of adopting SFAS No. 123 (R) on its consolidated financial position, results of operations and cash flows.

In November 2004, SFAS No. 151, *Inventory Costs*, an amendment of ARB No. 43, Chapter 4 was issued. This statement clarifies the accounting for abnormal amounts of idle facility expense, freight, handling costs and wasted material. SFAS No. 151 is effective for inventory costs incurred during fiscal years beginning after June 15, 2005. The Company is currently evaluating the impact of adopting SFAS No. 151 on its consolidated financial position, results of operations and cash flows.

3. Acquisitions and Divestitures

During the second quarter of 2002, General Cable formed a joint venture company to manufacture and market fiber optic cables. General Cable contributed assets, primarily inventory and machinery and equipment, to a subsidiary company, which was then contributed to the joint venture in exchange for a \$10.2 million note receivable, which resulted in a \$5.6 million deferred gain on the transaction. Beginning in the first quarter of 2004, the Company consolidated the joint venture company as a result of the adoption of FIN No. 46, as revised. During the fourth quarter of 2004, the Company exchanged the note receivable from the joint venture partner for the partner's ownership interest in the joint venture company. The acquired ownership interest was recorded at fair market value, which was \$2.4 million less than the carrying value of the note receivable, net of the deferred gain, resulting in a \$2.4 million charge to SG&A expense in the fourth quarter of 2004. In addition, the Company wrote-off the goodwill recorded on the joint venture company books resulting in a \$1.9 million charge. The December 31, 2003 balance sheet included a \$3.5 million investment in joint venture in other non-current assets, a \$10.2 million note receivable from the former joint venture partner and a \$5.6 million deferred gain in other liabilities.

4. Other Income (Expense)

Other income (expense) includes foreign currency transaction gains or losses which result from changes in exchange rates between the designated functional currency and the currency in which a transaction is denominated. During 2004 and 2003, the Company recorded a \$(1.2) million loss and a \$1.5 million gain, respectively, resulting from foreign currency transaction gains and losses.

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****5. Discontinued Operations**

In September 2001, the Company announced its decision to sell its building wire business and to exit its retail cordsets business, the results of which have been reported as discontinued operations. The gain (loss) on disposal of the discontinued operations were as follows (in millions):

	Year Ended December 31,		
	2004	2003	2002
Pre-tax gain (loss) on disposal of discontinued operations	\$ 0.6	\$	\$ (9.1)
Income tax (expense) benefit	(0.2)		3.2
Gain (loss) on disposal of discontinued operations	\$ 0.4	\$	\$ (5.9)

During 2004, the Company recorded a \$0.6 million pre-tax gain on the disposal of discontinued operations resulting from the reversal of provisions not expected to be utilized related to the disposal of these operations. During 2002, the Company recorded a \$9.1 million pre-tax loss on disposal of discontinued operations. The components of this charge principally related to an estimated lower net realizable value for real estate remaining from the Company's former building wire business unit which was sold in 2001, a longer than anticipated holding period for three distribution centers with unexpired lease commitments and certain other costs.

6. Accounts Receivable Asset-backed Securitization

In May 2001, the Company completed an Accounts Receivable Asset-backed Securitization Financing transaction (Securitization Financing). The Securitization Financing provided for certain domestic trade receivables to be transferred to a wholly-owned, special purpose bankruptcy-remote subsidiary without recourse. This subsidiary in turn transferred the receivables to a trust, which issued, via private placement, floating rate five-year certificates in an initial amount of \$145 million. In addition, a variable certificate component of up to \$45 million for seasonal borrowings was also established as a part of the Securitization Financing. This variable certificate component would fluctuate based on the amount of eligible receivables. As a result of the building wire asset sale and the exit from the retail cordsets business, the Securitization Financing program was downsized to \$80 million in the first quarter of 2002, through the repayment of a portion of the outstanding certificates. The repayment of the certificates was funded by the collection of the outstanding building wire and retail cordsets accounts receivable. The \$45 million seasonal borrowing component was unaffected.

Transfers of receivables under this program were treated as a sale and resulted in a reduction of total accounts receivable reported on the Company's consolidated balance sheet. The Company continued to service the transferred receivables and received annual servicing fees from the special purpose subsidiary of approximately 1% of the average receivable balance. The market cost of servicing the receivables offset the servicing fee income and resulted in a servicing asset equal to zero. The Company's retained interest in the receivables were carried at their fair value, which was estimated as the net realizable value. The net realizable value considered the relatively short liquidation period and an estimated provision for credit losses. The provision for credit losses was determined based on specific identification of uncollectible accounts and the application of historical collection percentages by aging category. The receivables were not subject to prepayment risk. The key assumptions used in measuring the fair value of retained

interests at the time of securitization were receivables days sales outstanding of 54 and interest rates on LIBOR based on borrowings of 4.92%. At December 31, 2002, key assumptions used in measuring the fair value of the retained interest were days sales outstanding of 49 and interest rates on LIBOR based borrowings of 2.0%.

At December 31, 2002, the Company's retained interest in accounts receivable was \$84.8 million and off balance sheet financing, net of cash held in the trust, was \$48.5 million. The effective interest rate in the securitization financing was approximately 2.0% at December 31, 2002. In 2002, proceeds from new sales totaled \$1,067.6 million and cash collections reinvested totaled \$1,030.8 million. The portfolio of accounts receivable that the Company serviced totaled approximately \$130 million at December 31, 2002. This securitization financing was terminated during the fourth quarter of 2003 in conjunction with the Company's refinancing of its bank debt. As a result of its early termination, the Company incurred costs of \$0.8 million in the fourth quarter of 2003.

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****7. Inventories**

Inventories consisted of the following (in millions):

	December 31,	
	2004	2003
Raw materials	\$ 33.2	\$ 25.5
Work in process	42.7	34.9
Finished goods	239.6	196.3
Total	\$ 315.5	\$ 256.7

At December 31, 2004 and December 31, 2003, \$266.8 million and \$202.4 million, respectively, of inventories were valued using the LIFO method. Approximate replacement costs of inventories valued using the LIFO method totaled \$310.1 million at December 31, 2004 and \$218.2 million at December 31, 2003.

If in some future period the Company was not able to recover the LIFO value of its inventory at a profit when replacement costs were lower than the LIFO value of the inventory, the Company would be required to take a charge to recognize in its income statement all or a portion of the higher LIFO value of the inventory. During 2002, the Company recorded a \$2.5 million LIFO charge for the liquidation of LIFO inventory in North America as the Company significantly reduced its inventory levels. The Company further reduced inventory quantities in North America during 2003 and recorded a \$0.5 million LIFO liquidation charge.

8. Property, Plant and Equipment

Property, plant and equipment consisted of the following (in millions):

	December 31,	
	2004	2003
Land	\$ 26.8	\$ 27.0
Buildings and leasehold improvements	62.5	63.9
Machinery, equipment and office furnishings	469.8	408.1
Construction in progress	8.7	7.8
Total gross book value	567.8	506.8
Less accumulated depreciation	(211.8)	(173.5)
Total net book value	\$ 356.0	\$ 333.3

Depreciation expense totaled \$31.8 million, \$29.8 million and \$28.1 million for the years ended December 31, 2004, 2003 and 2002, respectively.

9. Accrued Liabilities

Accrued liabilities consisted of the following (in millions):

	December 31,	
	2004	2003
Payroll related accruals	\$ 30.5	\$ 23.6
Customers deposits and prepayments	13.1	11.3
Taxes other than income	15.0	12.1
Customer rebates	13.3	8.6
Insurance claims and related expenses	5.4	5.4
Accrued restructuring costs	1.7	4.3
Current deferred tax liability	0.4	2.1
Other accrued liabilities	28.7	32.2
Total	\$ 108.1	\$ 99.6

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****10. Restructuring Charges**

Changes in accrued restructuring costs were as follows (in millions):

	Severance and Related Costs	Facility Closing Costs	Total
Balance, December 31, 2001	\$ 2.6	\$ 10.7	\$ 13.3
Provisions	14.0	10.0	24.0
Utilization	(12.2)	(9.9)	(22.1)
Balance, December 31, 2002	4.4	10.8	15.2
Provisions, net of reversals	2.5	5.7	8.2
Utilization	(5.5)	(13.6)	(19.1)
Balance, December 31, 2003	1.4	2.9	4.3
Provisions, net of reversals	3.3	3.2	6.5
Utilization	(4.2)	(4.9)	(9.1)
Balance, December 31, 2004	\$ 0.5	\$ 1.2	\$ 1.7

During 2004, \$7.1 million of provisions were recorded for severance and related costs (\$3.3 million) and facility closing costs (\$3.8 million) related to the rationalization of industrial cable manufacturing facilities. The Company completed its rationalization plans for these facilities at the end of 2004. During 2004, the Company also reversed unutilized provisions of \$0.6 million related to the Company's discontinued operations. Provisions of \$6.0 million were included in cost of sales, \$1.1 million were included in selling, general and administrative expenses and the reversal of unutilized provisions of \$0.6 million were included in gain on disposal of discontinued operations. All restructuring provisions, net of reversals, are reflected in the corporate segment.

The Company's Taunton, Massachusetts facility ceased operations on January 30, 2004, and employed approximately 50 associates and was comprised of approximately 131,000 square feet of space. The Company has also refocused and realigned production at its Marion, Indiana facility. The Company also closed its South Hadley, Massachusetts facility in the third quarter of 2004. This facility employed approximately 40 associates and was comprised of approximately 150,000 square feet of space. The Company's Plano, Texas rod mill facility ceased operations at the end of June 2004 and employed approximately 30 associates and was comprised of approximately 60,000 square feet of space. During the second quarter of 2004 the Company sold most of the equipment utilized in the rod mill facility. Proceeds from the sale of equipment were partially offset by costs related to closing the facility which resulted in a net gain of \$0.3 million in the year ended December 31, 2004.

During 2003, provisions of \$10.3 million were recorded for severance and related costs resulting from headcount reductions of approximately 110 associates at the Company's European operations (\$2.7 million) and the rationalization of industrial cable manufacturing facilities (\$7.6 million). Additionally, the Company reversed unutilized provisions of \$1.6 million related to severance costs and \$0.5 million related to facility closing costs.

Provisions of \$10.1 million were included in cost of sales while \$0.2 million were in selling, general and administrative expenses. The reversal of unutilized provisions of \$2.1 million was recorded in selling, general and administrative expense. All of the restructuring provisions, net of reversals are reflected in the corporate segment.

During 2002, \$24.0 million of provisions were recorded (\$14.9 million in continuing operations and \$9.1 million in discontinued operations). The \$9.1 million discontinued operations pre-tax charge principally related to an estimated lower net realizable value for real estate remaining from the Company's former building wire business, a longer than anticipated holding period for three distribution centers with unexpired lease commitments and certain other costs. The \$14.9 million continuing operations charge included \$6.9 million for severance and related costs resulting from worldwide headcount reductions of approximately 140 associates and \$8.0 million related to costs to close two manufacturing facilities. The \$8.0 million charge for the closure of manufacturing facilities included \$5.6 million for severance and related costs. The closed manufacturing facilities, located in Monticello, Illinois and Sanger, California, employed approximately 200 associates and ~S.CONTutilized more than 350,000 square feet in the production of service wire sold to the telecommunications industry and certain data communications cables.

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****11. Long-Term Debt**

Long-term debt consisted of the following (in millions):

	December 31,	
	2004	2003
Senior notes due 2010	\$ 285.0	\$ 285.0
Revolving loans	78.6	43.0
Other	11.3	12.4
Total debt	374.9	340.4
Less current maturities	1.1	2.3
Long-term debt	\$ 373.8	\$ 338.1

Weighted average interest rates at December 31, 2004 and 2003 were as follows:

Senior notes due 2010	9.5%	9.5%
Revolving loans	4.9%	3.9%
Other	3.9%	2.1%

On November 24, 2003, the Company completed a comprehensive refinancing of its bank debt that improved its capital structure and provided increased financial and operating flexibility by reducing leverage, increasing liquidity and extending debt maturities. The refinancing included the following: (i) the private placement of 7-year senior unsecured notes, (ii) a new senior secured revolving credit facility, (iii) the private placement of redeemable convertible preferred stock and (iv) a public offering of common stock. The Company applied the net proceeds from these refinancing transactions to repay all amounts outstanding under its former senior secured revolving credit facility, senior secured term loans and accounts receivable asset-backed securitization facility and to pay fees and expenses related to the refinancing.

The senior unsecured notes (the Notes) were issued in the amount of \$285.0 million, bear interest at a fixed rate of 9.5% and mature in 2010. The estimated fair value of the Notes was approximately \$322.1 million at December 31, 2004.

The senior secured revolving credit facility is a five year \$240.0 million asset based revolving credit agreement (the Credit Agreement). The Credit Agreement is secured by substantially all U.S. and Canadian assets. Borrowing availability is based on eligible U.S. and Canadian accounts receivable and inventory and certain U.S. fixed assets. As of December 31, 2004 and 2003, the Company had outstanding borrowings of \$78.6 million and \$43.0 million, respectively, and availability of \$126.0 million and \$147.6 million, respectively, under the terms of the Credit Agreement. Availability of borrowings under the fixed asset component of the new facility is reduced quarterly over a seven-year period by \$5.7 million per annum beginning in 2004. This may result in a reduction in the overall availability depending upon the calculation of eligible accounts receivable and inventory. The facility also includes a sub-facility for letters of credit of up to \$50.0 million. At December 31, 2004 and 2003, the Company had outstanding letters of credit of \$34.4 million and \$37.7 million, respectively.

During the fourth quarter of 2004, the Company amended the Credit Agreement which lowered the borrowing rate by 50 basis points, increased the annual capital spending limit and provided for the ability to swap up to \$100 million of existing fixed rate Senior notes to a floating interest rate.

Borrowings under the Credit Agreement, as amended, bear interest at a rate of LIBOR plus 2.00% to 2.50% and/or prime plus 0.75% to 1.25% depending upon the Company's fixed charge coverage, as defined by the Credit Agreement. The weighted average interest rate on borrowings under the Credit Agreement for the year ended December 31, 2004 was 4.57%. Under the Credit Agreement, the Company pays a commitment fee of 0.50% per annum on the unused portion of the commitment. In connection with the November 2003 refinancing and fourth quarter 2004 amendment to the Credit Agreement, the Company incurred fees and expenses aggregating \$7.7 million, which are being amortized over the term of the Credit Agreement. In addition, \$4.4 million of unamortized fees related to the former credit facility were written off in the fourth quarter of 2003.

The Credit Agreement, as amended, contains covenants that limit capital spending and the payment of dividends to holders of common stock and require a minimum fixed charge coverage ratio, as defined. At December 31, 2004 and 2003, the Company was in compliance with all covenants under the Credit Agreement.

Table of Contents

GENERAL CABLE CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

The Company's former credit facility was entered into in 1999 with one lead bank as administrative agent, and a syndicate of lenders. During 2002, the Company amended its former credit facility which resulted in the write-off of unamortized bank fees of \$1.6 million. The weighted average interest rate on borrowings under the former credit facility for the period January 1, 2003 through November 24, 2003 was 6.15%.

At December 31, 2004, maturities of long-term debt during each of the years 2005 through 2009 are \$1.1 million, \$0.2 million, \$0.3 million, \$78.8 million and \$0.2 million, respectively, and \$294.3 million thereafter.

12. Financial Instruments

General Cable is exposed to various market risks, including changes in interest rates, foreign currency and commodity prices. To manage risk associated with the volatility of these natural business exposures, General Cable enters into interest rate, commodity and foreign currency derivative agreements as well as copper and aluminum forward pricing agreements. General Cable does not purchase or sell derivative instruments for trading purposes.

General Cable has utilized interest rate swaps and interest rate collars to manage its interest expense exposure by fixing its interest rate on a portion of the Company's floating rate debt. Under the swap agreements, General Cable paid a fixed rate while the counterparty paid to General Cable the difference between the fixed rate and the three-month LIBOR rate.

During 2001, the Company entered into several interest rate swaps which effectively fixed interest rates for borrowings under the former credit facility and other debt. In December 2003 in conjunction with the refinancing of its bank debt, the Company incurred a cost of \$0.8 million to terminate the interest rate swaps related to the former credit facility. At December 31, 2004, the remaining outstanding interest rate swap had a notional value of \$9.0 million, an interest rate of 4.49% and matures in October 2011. The Company does not provide or receive any collateral specifically for this contract. The fair value of interest rate derivatives are based on quoted market prices and third party provided calculations, which reflect the present values of the difference between estimated future variable-rate receipts and future fixed-rate payments. At December 31, 2004 and 2003, the net unrealized loss on the interest rate derivative and the related carrying value was \$(0.7) million.

The Company enters into forward exchange contracts principally to hedge the currency fluctuations in certain transactions denominated in foreign currencies, thereby limiting the Company's risk that would otherwise result from changes in exchange rates. Principal transactions hedged during the year were firm sales and purchase commitments. The fair value of foreign currency contracts represents the amount required to enter into offsetting contracts with similar remaining maturities based on quoted market prices. At December 31, 2004 and 2003, the net unrealized loss on the net foreign currency contracts was \$(0.6) million and \$(0.8) million, respectively.

Outside of North America, General Cable enters into commodity futures contracts for the purchase of copper and aluminum for delivery in a future month to match certain sales transactions. At December 31, 2004 and 2003, General Cable had an unrealized gain of \$3.5 million and \$0.1 million, respectively, on the commodity futures.

Foreign currency and commodity contracts are used to hedge future sales and purchase commitments. Interest rate swaps are used to manage interest expense exposure by fixing the interest rate on a portion of floating rate debt. Unrealized gains and losses on these derivative financial instruments are recorded in other comprehensive income until the underlying transaction occurs and is recorded in the income statement at which point such amounts included

in other comprehensive income are recognized in income which generally will occur over periods less than one year. During the years ended December 31, 2004, 2003 and 2002, a \$(1.0) million loss, a \$(6.2) million loss, and a \$(6.3) million loss were reclassified from other comprehensive income to the income statement.

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The notional amounts and fair values of these financial instruments at December 31, 2004 and 2003 are shown below (in millions). The carrying amount of the financial instruments was a net asset of \$2.2 million and a net liability (\$1.4) million at December 31, 2004 and 2003, respectively.

	2004		2003	
	Notional Amount	Fair Value	Notional Amount	Fair Value
Interest rate swap	\$ 9.0	\$ (0.7)	\$ 9.0	\$ (0.7)
Foreign currency forward exchange	33.6	(0.6)	38.4	(0.8)
Commodity futures	48.8	3.5	13.6	0.1
		\$ 2.2		\$ (1.4)

In North America, General Cable enters into forward pricing agreements for the purchase of copper and aluminum for delivery in a future month to match certain sales transactions. General Cable had an unrealized gain of \$7.2 million at December 31, 2004 and \$2.4 million at December 31, 2003 related to these transactions. General Cable expects to offset the unrealized gains under these agreements as a result of firm sale price commitments with customers.

13. Income Taxes

The provision (benefit) for income taxes attributable to continuing operations consisted of the following (in millions):

	Year Ended December 31,		
	2004	2003	2002
Current tax expense (benefit):			
Federal	\$ (34.0)	\$	\$ (13.8)
State	(1.4)	0.2	0.1
Foreign	16.7	8.1	6.8
Deferred tax expense (benefit):			
Federal	(1.9)	(14.7)	(6.9)
State			2.9
Foreign	2.5	9.3	1.0
Total	\$ (18.1)	\$ 2.9	\$ (9.9)

The income tax provision (benefit) attributable to the operations and disposal of discontinued operations was \$0.2 million and \$(3.2) million for 2004 and 2002, respectively.

The reconciliation of reported income tax expense (benefit) to the amount of income tax expense that would result from applying domestic federal statutory tax rates to pretax income from continuing operations is as follows (in millions):

	Year Ended December 31,		
	2004	2003	2002
Statutory federal income tax	\$ 6.8	\$ (0.7)	\$ (9.8)
State and foreign income tax differential	(1.4)	(0.3)	0.8
Subpart F taxation of foreign profits	0.1	4.4	
Settlement of tax items	(23.3)		
Other, net	(0.3)	(0.5)	(0.9)
Total	\$ (18.1)	\$ 2.9	\$ (9.9)

See further discussion of the most significant settlement of tax items in Note 24.

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The components of deferred tax assets and liabilities were as follows (in millions):

	December 31,	
	2004	2003
Deferred tax assets:		
Net operating loss carryforwards	\$ 87.5	\$ 89.4
Pension and retiree benefits accruals	12.6	15.1
Asset and rationalization reserves	0.6	2.5
Inventory	14.1	5.8
Tax credit carryforwards	6.5	7.7
Other liabilities	11.1	11.3
Valuation allowance	(17.5)	(19.0)
Total deferred tax assets	114.9	112.8
Deferred tax liabilities:		
Inventory	0.6	5.6
Depreciation and fixed assets	41.3	30.2
Net deferred tax assets	\$ 73.0	\$ 77.0

As of December 31, 2004, the Company has recorded a valuation allowance for its state net operating loss carryforwards and a portion of its foreign net operating loss carryforwards due to uncertainties regarding the ability to obtain future tax benefits for these tax attributes. The December 31, 2004 valuation allowance of \$17.5 million decreased \$1.5 million from the prior year.

The valuation of the deferred tax asset is dependent on, among other things, the ability of the Company to generate a sufficient level of future taxable income. In estimating future taxable income, the Company has considered both positive and negative evidence, such as historical results of operations, including the losses realized in recent periods, and has considered the implementation of prudent and feasible tax planning strategies. Approximately \$20 million of the Company's deferred tax asset must be utilized prior to its expiration in the period 2006-2009. The remainder of the asset may be used for at least 15 years. This finite life has also been considered by the Company in the valuation of the asset. The Company has and will continue to review on a quarterly basis its assumptions and tax planning strategies and, if the amount of the estimated realizable net deferred tax asset is less than the amount currently on the balance sheet, the Company would reduce its deferred tax asset, recognizing a non-cash charge against reported earnings.

After taking into account 2001 and 2002 U.S. net operating loss carrybacks that resulted in tax refunds of \$50.9 million, the Company generated U.S. net operating loss carryforwards of \$47.5 million in 2000, \$49.4 million in 2002, \$36.2 million in 2003, and \$15.8 million in 2004. These U.S. net operating loss carryforwards expire in 2020, 2022, 2023 and 2024, respectively. The Company also has other U.S. net operating loss carryforwards that are subject to an annual limitation under Internal Revenue Code Section 382. These Section 382 limited net operating loss carryforwards expire in varying amounts from 2006-2009. The total Section 382 limited net operating loss carryforward that may be utilized prior to expiration is estimated at \$53.9 million. The Company has approximately

\$19.4 million of net operating loss carryforwards in various foreign jurisdictions. A valuation allowance has been established against \$15.9 million of these foreign net operating losses due to the uncertainty of utilization prior to expiration. The Company also has \$6.5 million of U.S. alternative minimum tax credits, which have no expiration date. Approximately \$3.1 million of these alternative minimum tax credit carryforwards are also subject to Section 382 limitations.

The American Jobs Creation Act of 2004 provides that US corporations can repatriate earnings of foreign subsidiaries at a reduced tax rate under certain circumstances. As of December 31, 2004 the undistributed earnings of foreign subsidiaries that are considered to be indefinitely reinvested are approximately \$135 million. The Company is currently in the process of evaluating how much, if any, of these foreign earnings will be repatriated. The Company will determine the sources and amounts, if any, of the foreign earnings repatriation and the related tax expense prior to December 31, 2005.

14. Pension Plans

General Cable provides retirement benefits through contributory and noncontributory pension plans for the majority of its regular full-time employees. Pension expense under the defined contribution plans sponsored by General Cable in the United

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

States equaled four percent of each eligible employee's covered compensation. In addition, General Cable sponsors employee savings plans under which General Cable may match a specified portion of contributions made by eligible employees.

Benefits provided under defined benefit pension plans sponsored by General Cable are generally based on years of service multiplied by a specific fixed dollar amount. Contributions to these pension plans are based on generally accepted actuarial methods, which may differ from the methods used to determine pension expense. The amounts funded for any plan year are neither less than the minimum required under federal law nor more than the maximum amount deductible for federal income tax purposes. Pension plan assets consist of various fixed-income investments and equity securities.

Net pension expense included the following components (in millions):

	Year ended December 31,		
	2004	2003	2002
Service cost	\$ 2.1	\$ 1.9	\$ 2.1
Interest cost	9.4	9.1	9.1
Expected return on plan assets	(9.6)	(7.4)	(10.2)
Net amortization and deferral	3.6	4.8	1.0
Net defined benefit pension expense	5.5	8.4	2.0
Net defined contribution pension expense	5.9	5.4	5.7
Total pension expense	\$ 11.4	\$ 13.8	\$ 7.7

The changes in the benefit obligation and plan assets, the funded status of the plan and the amounts recognized in the Consolidated Balance Sheets were as follows (in millions):

	December 31,	
	2004	2003
Changes in Benefit Obligation:		
Beginning benefit obligation	\$ 154.5	\$ 141.0
Impact of foreign currency exchange rate change	1.7	2.3
Service cost	2.1	1.9
Interest cost	9.4	9.1
Curtailment gain		(0.3)
Special termination benefits		0.3
Benefits paid	(10.8)	(10.1)
Amendments	2.0	
Assumption change		7.4
Actuarial loss	4.6	2.9

Ending benefit obligation	\$ 163.5	\$ 154.5
Changes in Plan Assets:		
Beginning fair value of plan assets	\$ 114.6	\$ 88.9
Impact of foreign currency exchange rate change	1.4	1.7
Actual return on plan assets	12.3	28.0
Company contributions	13.0	6.1
Benefits paid	(10.8)	(10.1)
Ending fair value of plan assets	\$ 130.5	\$ 114.6
Reconciliation of Funded Status:		
Funded status of the plan	\$ (33.0)	\$ (39.9)
Unrecognized net transition obligation		0.5
Unrecognized actuarial loss	36.2	35.4
Unrecognized prior service cost	10.1	9.2
Prepaid pension cost	\$ 13.3	\$ 5.2
Amounts Recognized in Consolidated Balance Sheet:		
Accrued pension liability	\$ (27.3)	\$ (35.4)
Prepaid pension cost		0.7
Intangible asset	5.2	5.1
Accumulated other comprehensive income	35.4	34.8
Net amount recognized	\$ 13.3	\$ 5.2

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The curtailment gain and special termination benefits in 2003 were the result of closing and selling certain manufacturing locations.

The weighted average interest rate assumptions used in determining current year assets and liabilities and determining subsequent year expenses were:

	2004	2003	2002
Discount rate	6.0%	6.0%	6.5%
Expected rate of increase in future compensation levels	4.0%	4.0%	4.0%
Long-term rate of return on plan assets	8.5%	8.5%	9.0%

Pension expense for the defined benefit pension plans sponsored by General Cable is determined based upon a number of actuarial assumptions, including an expected long-term rate of return on assets of 8.5%. This assumption was based on input from actuaries, including their review of historical 10 year, 20 year, and 25 year rates of inflation and real rates of return on various broad equity and bond indices in conjunction with the diversification of the asset portfolio. The expected long-term rate of return on assets is based on an asset allocation assumption of 65% allocated to equity investments, with an expected real rate of return of 7%, and 35% with fixed-income investments, with an expected real rate of return of 3%, and an assumed long-term rate of inflation of 3%. Because of market fluctuations, the actual asset allocations as of December 31, 2004 and 2003 were 68% and 74%, respectively, of equity investments and 32% and 26%, respectively, of fixed-income investments. Management believes that long-term asset allocation on average will approximate the Company's assumptions and that a 8.5% long-term rate of return is a reasonable assumption.

The determination of pension expense for the defined benefit pension plans is based on the fair market value of assets as of the measurement date which is December 31. Investment gains and losses are recognized in the measurement of assets immediately. Such gains and losses will be amortized and recognized as part of the annual benefit cost to the extent that unrecognized net gains and losses from all sources exceed 10% of the greater of the projected benefit obligation or the market value of assets.

The determination of future pension obligations utilizes a discount rate based on a review of long-term bonds that receive one of the two highest ratings given by a recognized rating agency which are expected to be available during the period to maturity of the projected pension benefit obligations, and input from our actuaries. The discount rate used at December 31, 2004 was 6.0%.

The accumulated benefit obligation for all of the Company's defined benefit pension plans was \$157.3 million and \$149.5 million at December 31, 2004 and 2003, respectively. The projected benefit obligation and accumulated benefit obligation for the pension plans with accumulated benefit obligations in excess of plan assets were \$150.0 million and \$147.7 million at December 31, 2004, and \$136.3 million and \$135.2 million at December 31, 2003.

The Company expects to contribute \$10.8 million to its defined benefit pension plans for 2005. The estimated future benefit payments expected to be paid for the Company's defined benefit plans are \$9.4 million in 2005, \$9.5 million in 2006, \$9.5 million in 2007, \$9.8 million in 2008, \$9.9 million in 2009 and \$53.4 million in the five years thereafter.

15. Post-Retirement Benefits Other Than Pensions

General Cable has post-retirement benefit plans that provide medical and life insurance for certain retirees and eligible dependents. General Cable funds the plans as claims or insurance premiums are incurred. Net post-retirement benefit expense included the following components (in millions):

	Year ended December 31,		
	2004	2003	2002
Service cost	\$ 0.3	\$ 0.3	\$ 0.3
Interest cost	0.6	0.6	0.7
Amortization of prior service cost	(0.1)	(0.6)	(0.7)
Curtailment loss			0.2
Net post-retirement benefit expense	\$ 0.8	\$ 0.3	\$ 0.5

The curtailment loss was the result of closing certain manufacturing locations in 2002.

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The change in the accrued post-retirement benefit liability was as follows (in millions):

	December 31,	
	2004	2003
Beginning benefit obligation balance	\$ 10.1	\$ 10.8
Impact of foreign currency exchange rate change	0.1	
Net periodic benefit expense	0.8	0.3
Benefits paid	(1.0)	(1.0)
Ending benefit obligation balance	\$ 10.0	\$ 10.1

The discount rate used in determining the accumulated post-retirement benefit obligation was 5.5% for the year ended December 31, 2004, 6.0% for the year ended December 31, 2003 and 6.5% for the year ended December 31, 2002. The assumed health-care cost trend rate used in measuring the accumulated post-retirement benefit obligation was 10.0%, decreasing gradually to 4.50% in year 2011 and thereafter. Increasing the assumed health-care cost trend rate by 1% would result in an increase in the accumulated post-retirement benefit obligation of \$0.7 million for 2004. The effect of this change would increase net post-retirement benefit expense by \$0.1 million. Decreasing the assumed health-care cost trend rate by 1% would result in a decrease in the accumulated post-retirement benefit obligation of \$0.6 million for 2004. The effect of this change would decrease the net post-retirement benefit expense by \$0.1 million.

The estimated future benefit payments expected to be paid for the Company's post-retirement benefits other than pensions are \$1.1 million in 2005, \$1.1 million in 2006, \$1.0 million in 2007, \$0.9 million in 2008, \$0.9 million in 2009 and \$4.6 million in the five years thereafter.

16. Shareholders' Equity

General Cable is authorized to issue 75 million shares of common stock and 25 million shares of preferred stock.

In the fourth quarter of 2003, the Company completed a comprehensive refinancing of its bank debt. The refinancing included the private placement of 2,070,000 shares of redeemable convertible preferred stock and a public offering of 5,807,500 shares of common stock.

The preferred stock has a liquidation preference of \$50.00 per share. Dividends accrue on the convertible preferred stock at the rate of 5.75% per annum and are payable quarterly in arrears starting on February 24, 2004. Dividends are payable in cash, shares of General Cable common stock or a combination thereof. Holders of the convertible preferred stock are entitled to convert any or all of their shares of convertible preferred stock into shares of General Cable common stock, at an initial conversion price of \$10.004 per share. The conversion price is subject to adjustments under certain circumstances. General Cable is obligated to redeem all outstanding shares of convertible preferred stock on November 24, 2013 at par. The Company may, at its option, elect to pay the redemption price in cash or in shares of General Cable common stock with an equivalent fair value, or any combination thereof. The Company has the option to redeem some or all of the outstanding shares of convertible preferred stock in cash beginning on the fifth anniversary of the issue date. The redemption premium will initially equal one-half the dividend rate on the

convertible preferred stock and decline ratably to par on the date of mandatory redemption. In the event of a change in control, the Company has the right to either redeem the preferred stock for cash or to convert the preferred stock to common stock.

The Company has two equity compensation plans, the 1997 Stock Incentive Plan and the 2000 Stock Option Plan. The 1997 Stock Incentive Plan authorizes a maximum of 4,725,000 shares, options or units of Common Stock to be granted. Stock options are granted to employees selected by the Compensation Committee of the Board or the Chief Executive Officer at prices which are not less than the closing market price on the date of grant. The Compensation Committee (or Chief Executive Officer) has authority to set all the terms of each grant. The majority of the options granted under the plan expire in 10 years and become fully exercisable ratably over three years of continued employment or become fully exercisable after three years of continued employment. Restrictions on the majority of shares awarded to employees under the plan expire ratably over a three-year period, expire after six years from the date of grant or expire ratably from the second anniversary to the sixth anniversary of the date of grant. Restricted stock units were awarded to employees in November 1998 as part of a Stock Loan Incentive Plan.

Table of Contents

GENERAL CABLE CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

The 2000 Stock Option Plan as amended authorizes a maximum of 1,500,000 non-incentive options to be granted. No other forms of award are authorized under this plan. Stock options are granted to employees selected by the Compensation Committee of the Board or the Chief Executive Officer at prices which are not less than the closing market price on the date of grant. The Compensation Committee (or Chief Executive Officer) has authority to set all the terms of each grant. The majority of the options granted under the plan expire in 10 years and become fully exercisable ratably over three years of continued employment or become fully exercisable after three years of continued employment.

During the first quarter of 2001, 355,500 shares of restricted common stock with performance accelerated vesting features were awarded to certain senior executives under the Company's 1997 Stock Incentive Plan, as amended. Under the terms of this plan, the Company can award restricted common stock to executives and key employees with such features. The restricted shares vest six years from the date of grant unless certain performance criteria are met. The performance measure used to determine vesting is the Company's stock price. The stock price targets must be sustained for 20 business days in order to trigger accelerated vesting. During the second quarter of 2001, as a result of the achievement of performance criteria, restrictions on 50% of the stock expired and the Company recognized accelerated amortization of \$1.2 million.

In January 2004, 340,500 shares of restricted common stock with performance accelerated vesting features were awarded to Company executives and key employees under the Company's 1997 Stock Incentive Plan as amended. The restricted shares vest ratably from the second anniversary of the date of grant to the sixth anniversary unless certain performance criteria are met. The performance measure used to determine accelerated vesting is earnings per share.

Amortization of all outstanding restricted stock awards was \$0.5 million, \$0.1 million and \$0.1 million during 2004, 2003 and 2002, respectively.

In November 1998, General Cable entered into a Stock Loan Incentive Plan (SLIP) with executive officers and key employees. Under the SLIP, the Company loaned \$6.0 million to facilitate open market purchases of General Cable common stock. A matching restricted stock unit (MRSU) was issued for each share of stock purchased under the SLIP. The fair value of the MRSUs at the grant date of \$6.0 million, adjusted for subsequent forfeitures, was amortized to expense over the initial five-year vesting period. In June 2003, all executive officers repaid their loans plus interest that were originally made under the SLIP in the amount of \$1.8 million. The Company accepted as partial payment for the loans common stock owned by the executive officers and restricted stock units previously awarded to them under the SLIP. In July 2003, the Company approved an extension of the loan maturity for the remaining participants in the SLIP for an additional three years to November 2006, subject in the extension period to a rate of interest of 5.0%. As part of the loan extension the vesting schedule on the MRSUs was also extended so that the MRSUs vest in November 2006. If the vesting requirements are met, one share of General Cable common stock will be issued in exchange for each MRSU. During the third quarter of 2004, certain employees repaid their loans plus interest that were originally made under the SLIP in the amount of \$1.4 million. The Company accepted, as partial payment for the loans, common stock owned by the employees and restricted stock units previously awarded to them under the SLIP. There are 82,932 MRSUs outstanding as of December 31, 2004. The MRSUs were fully amortized in 2003. Amortization expense related to the MRSUs was \$0.4 million and \$0.9 million during 2003 and 2002 respectively.

The components of accumulated other comprehensive income (loss) consisted of the following (in millions):

	December 31,	
	2004	2003
Foreign currency translation adjustment	\$ 41.5	\$ 17.6
Pension adjustments, net of tax	(23.5)	(23.3)
Change in fair value of derivatives, net of tax	1.9	(0.7)
Net unrealized investment gains	2.5	0.9
Total	\$ 22.4	\$ (5.5)

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

Other shareholder's equity consisted of the following (in millions):

	December 31,	
	2004	2003
Loans to shareholders	\$ (1.6)	\$ (2.8)
Restricted stock	(2.8)	(0.4)
Total	\$ (4.4)	\$ (3.2)

17. Stock Options

General Cable applies Accounting Principles Board Opinion No. 25 and related Interpretations in accounting for stock options issued under its 1997 Stock Incentive Plan and its 2000 Stock Option Plan (see description of plans in Note 16). Accordingly, no compensation cost has been recognized for stock option grants under the plans.

A summary of option information for the years ended December 31, 2004, 2003 and 2002 follows (options in thousands):

	Options Outstanding	Weighted Average Exercise Price
Balance at December 31, 2001	3,224	\$ 13.75
Granted	641	13.39
Exercised	(265)	8.99
Forfeited	(857)	15.47
Balance at December 31, 2002	2,743	13.55
Granted	1,126	4.05
Exercised	(15)	7.92
Forfeited	(363)	11.37
Balance At December 31, 2003	3,491	10.61
Granted	35	8.73
Exercised	(123)	8.01
Forfeited	(117)	10.37
Balance At December 31, 2004	3,286	\$ 10.70

The following table summarizes information about stock options outstanding at December 31, 2004 (options in thousands):

Range of Option Prices	Options Outstanding	Weighted Average Exercise Price	Weighted Average Contractual Life	Options Exercisable	Weighted Average Exercise Price
\$0 - \$7	1,039	\$ 4.03	8.1		
\$7 - \$14	1,723	\$ 11.69	5.2	1,117	\$ 10.95
\$14 - \$21	146	\$ 14.26	4.7	145	\$ 14.24
\$21 - \$28	378	\$ 23.10	3.6	378	\$ 23.10

As of December 31, 2004, 2003 and 2002, there were 1,640,000, 1,674,000 and 1,612,000 exercisable stock options, respectively.

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****18. Earnings (Loss) Per Common Share of Continuing Operations**

A reconciliation of the numerator and denominator of earnings (loss) per common share of continuing operations to earnings (loss) per common share of continuing operations assuming dilution is as follows (in millions):

	Year Ended December 31,		
	2004	2003	2002
EPS from continuing operations basic:			
Income (loss) from continuing operations	\$ 37.5	\$ (4.8)	\$ (18.1)
Less: preferred stock dividends	(6.0)	(0.6)	
Income (loss) from continuing operations for basic EPS computation ⁽¹⁾	\$ 31.5	\$ (5.4)	\$ (18.1)
Weighted average shares outstanding for basic EPS computation ⁽²⁾	39.0	33.6	33.0
Earnings (loss) per common share from continuing operations basic	\$ 0.81	\$ (0.16)	\$ (0.55)
EPS from continuing operations diluted:			
Income (loss) from continuing operations	\$ 37.5	\$ (4.8)	\$ (18.1)
Less: preferred stock dividends, if applicable	n/a	(0.6)	
Income (loss) from continuing operations for diluted EPS computation ⁽¹⁾	\$ 37.5	\$ (5.4)	\$ (18.1)
Weighted average shares outstanding	39.0	33.6	33.0
Dilutive effect of stock options and restricted stock units	1.0		
Dilutive effect of assumed conversion of preferred stock, if applicable	10.3	n/a	n/a
Weighted average shares outstanding for diluted EPS computation ⁽²⁾	50.3	33.6	33.0
Earnings (loss) per common share from continuing operations diluted	\$ 0.75	\$ (0.16)	\$ (0.55)

(1) Numerator

(2) Denominator

The earnings (loss) per common share assuming dilution computation excludes the impact of 1.6 million, 3.6 million, and 2.7 million stock options and restricted stock units in 2004, 2003 and 2002, respectively, because their impact was anti-dilutive. This computation also excludes the impact of the assumed conversion of the Company's preferred stock (which was issued in the fourth quarter of 2003) because its impact was anti-dilutive in 2003.

19. Segment Information

General Cable has three reportable operating segments: energy, industrial & specialty and communications. These segments are strategic business units organized around three product categories that follow management's internal organization structure.

The energy segment manufactures and sells wire and cable products that include low-, medium- and high-voltage power distribution and power transmission products. The industrial & specialty segment manufactures and sells wire and cable products that conduct electrical current for industrial, OEM, commercial and residential power and control applications. The communications segment manufactures and sells wire and cable products that transmit low-voltage signals for voice, data, video and control applications.

Segment net sales represent sales to external customers. Segment operating income (loss) represents income (loss) from continuing operations before interest income, interest expense, other income (expense), other financial costs or income taxes.

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The operating loss included in corporate for 2004 consisted of \$7.1 million related to the rationalization of certain of the Company's industrial cable manufacturing facilities, \$1.5 million for remediation costs of a former manufacturing facility \$2.4 million related to the unwinding of the former fiber optics joint venture and \$1.9 million related to the write-off of goodwill. The operating loss included in corporate for 2003 consisted of \$7.6 million related to the rationalization of certain of the Company's industrial cable manufacturing facilities and \$2.7 million for severance related to headcount reductions of approximately 110 associates in the Company's European operations. These charges were partially offset by \$2.1 million of income resulting from the reversal of unutilized restructuring reserves related to the closure in prior years of North American manufacturing facilities. The operating loss included in corporate for 2002 consisted of \$21.2 million related to the closure of two manufacturing plants, a \$1.7 million loss on the sale of a non-strategic United Kingdom-based specialty cables business, a \$3.6 million charge to reduce to fair value certain assets contributed to the Company's fiber optic joint venture, and \$6.9 million for severance and related costs for headcount reductions of approximately 140 associates worldwide. The accounting policies of the operating segments are the same as those described in the summary of significant accounting policies (see Note 2). The Company has recorded the operating items discussed above in the corporate segment rather than reflect such items in the energy, industrial & specialty or communications segments operating income because they are not considered in the operating performance evaluation of the energy, industrial & specialty or communications segment by the Company's chief operating decision-maker, its Chief Executive Officer.

Corporate assets included cash, deferred income taxes, certain property, including property held for sale and prepaid expenses and other current and non-current assets. Depreciation on corporate property has been allocated to the operating segments. Depreciation expense included in the corporate column represents accelerated depreciation related to the rationalization of certain Industrial plant locations.

Summarized financial information for the Company's operating segments for the years ended December 31 is as follows (in millions). Certain reclassifications have been made to the prior year to conform to the current year segment presentation.

	Energy	Industrial & Specialty	Communications	Corporate	Total
Net Sales:					
2004	\$ 705.7	\$ 734.3	\$ 530.7	\$	\$ 1,970.7
2003	560.2	542.4	435.8		1,538.4
2002	516.0	499.4	438.5		1,453.9
Operating Income (Loss):					
2004	39.8	23.0	6.6	(12.9)	56.5
2003	38.0	9.9	6.0	(8.2)	45.7
2002	36.9	9.7	2.5	(33.4)	15.7
Identifiable Assets:					
2004	342.9	401.0	333.5	143.4	1,220.8
2003	269.5	325.1	302.9	152.0	1,049.5
Capital Expenditures:					
2004	13.9	15.5	7.6		37.0
2003	6.6	8.7	3.8		19.1

2002	9.9	13.4	8.1		31.4
Depreciation Expense:					
2004	5.0	8.4	15.7	2.7	31.8
2003	5.7	9.6	14.5		29.8
2002	3.8	8.5	15.8		28.1

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

The following table presents revenues by geographic group based on the country of origin of the product or services for the years ended December 31 (in millions):

	2004	2003	2002
North America	\$ 1,300.6	\$ 1,074.2	\$ 1,077.2
International	670.1	464.2	376.7
Total	\$ 1,970.7	\$ 1,538.4	\$ 1,453.9

The following table presents property, plant and equipment by geographic group based on the location of the asset as of December 31 (in millions):

	2004	2003
North America	\$ 213.4	\$ 219.0
International	142.6	114.3
Total	\$ 356.0	\$ 333.3

20. Commitments and Contingencies

Certain present and former operating sites, or portions thereof, currently or previously owned or leased by current or former operating units of General Cable are the subject of investigations, monitoring or remediation under the United States Federal Comprehensive Environmental Response, Compensation and Liability Act (CERCLA or Superfund), the Federal Resource Conservation and Recovery Act or comparable state statutes or agreements with third parties. These proceedings are in various stages ranging from initial investigations to active settlement negotiations to implementation of the cleanup or remediation of sites.

Certain present and former operating units of General Cable in the United States have been named as potentially responsible parties (PRPs) at several off-site disposal sites under CERCLA or comparable state statutes in federal court proceedings. In each of these matters, the operating unit of General Cable is working with the governmental agencies involved and other PRPs to address environmental claims in a responsible and appropriate manner.

At December 31, 2004 and 2003, General Cable had an accrued liability of approximately \$3.6 million and \$5.4 million, respectively, for various environmental-related liabilities of which General Cable is aware. American Premier Underwriters Inc., a former parent of General Cable, agreed to indemnify General Cable against all environmental-related liabilities arising out of General Cable's or its predecessors' ownership or operation of the Indiana Steel & Wire Company and Marathon Manufacturing Holdings, Inc. businesses (which were divested by General Cable), without limitation as to time or amount. While it is difficult to estimate future environmental-related liabilities accurately, General Cable does not currently anticipate any material adverse impact on its results of operations, financial position or cash flows as a result of compliance with federal, state, local or foreign environmental laws or regulations or cleanup costs of the sites discussed above.

As part of the acquisition of the worldwide energy cable and cable systems business of BICC plc, BICC plc agreed to indemnify General Cable against environmental liabilities existing at the date of the closing of the purchase of the business. The indemnity is for an eight-year period ending in 2007 while General Cable operates the businesses subject to certain sharing of losses (with BICC plc covering 95% of losses in the first three years, 80% in years four and five and 60% in the remaining three years). The indemnity is also subject to the overall indemnity limit of \$150 million, which applies to all warranty and indemnity claims in the transaction. In addition, BICC plc assumed responsibility for cleanup of certain specific conditions at several sites operated by General Cable and cleanup is mostly complete at those sites. In the sale of the European businesses to Pirelli in August 2000, the Company generally indemnified Pirelli against any environmental-related liabilities on the same basis as BICC plc indemnified the Company in the earlier acquisition. However, the indemnity the Company received from BICC plc related to the European businesses sold to Pirelli terminated upon the sale of those businesses to Pirelli. At this time, there are no claims outstanding under the general indemnity provided by BICC plc. In addition, the Company generally indemnified Pirelli against other claims relating to the prior operation of the business. Pirelli has asserted claims under this indemnification. The Company is continuing to investigate these claims and believes that the reserves currently included in the Company's balance sheet are adequate to cover any obligation it may have.

General Cable has agreed to indemnify Raychem HTS Canada, Inc. against certain environmental liabilities arising out of the operation of the business it sold to Raychem HTS Canada, Inc. prior to its sale. The indemnity generally is for a five year

Table of Contents

GENERAL CABLE CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

period from the closing of the sale and is subject to an overall limit of \$60 million. At this time, there are no claims outstanding under this indemnity.

General Cable has also agreed to indemnify Southwire Company against certain environmental liabilities arising out of the operation of the business it sold to Southwire prior to its sale. The indemnity is for a ten year period from the closing of the sale and is subject to an overall limit of \$20 million. At this time, there are no claims outstanding under this indemnity.

In addition, Company subsidiaries have been named as defendants in lawsuits alleging exposure to asbestos in products manufactured by the Company. At December 31, 2004, there were approximately 16,300 non-maritime claims and 33,200 maritime asbestos claims outstanding. During 2004, some 418 new non-maritime claims and 173 maritime claims were filed; 22 non-maritime claims and no maritime claims were dismissed, settled or otherwise disposed of in that period. At December 31, 2004 and 2003, General Cable had accrued approximately \$3.0 million and \$1.6 million, respectively, for these lawsuits.

The Company does not believe that the outcome of the litigation will have a material adverse effect on its results of operations, financial position or cash flows.

General Cable is also involved in various routine legal proceedings and administrative actions. Such proceedings and actions should not, individually or in the aggregate, have a material adverse effect on its result of operations, cash flows or financial position.

General Cable has entered into various operating lease agreements related principally to certain administrative, manufacturing and distribution facilities and transportation equipment. Future minimum rental payments required under non-cancelable lease agreements at December 31, 2004 were as follows: 2005 \$7.6 million, 2006 \$7.4 million, 2007 \$5.0 million, 2008 \$3.6 million, 2009 \$2.9 million, and thereafter \$16.2 million. Rental expense recorded in income from continuing operations was \$10.3 million, \$11.9 million and \$10.3 million for the years ended December 31, 2004, 2003 and 2002, respectively.

21. Related Party Transactions

In May of 2002, General Cable formed a joint venture company to manufacture and market fiber optic cables. General Cable contributed assets, primarily inventory and machinery and equipment, to a subsidiary company, which was then contributed to the joint venture in exchange for a \$10.2 million note receivable, which resulted in a \$5.6 million deferred gain on the transaction. Beginning in the first quarter of 2004, the Company was required to consolidate the joint venture company as a result of the adoption of FIN No. 46, as revised. In January 2004, the Company reduced its ownership percentage from 49% to 40% and as a result the deferred gain was reduced to \$4.8 million. During the fourth quarter of 2004, the Company exchanged the note receivable from the joint venture partner for the partner's ownership interest in the joint venture company. The acquired ownership interest was recorded at fair market value, which was \$2.4 million less than the carrying value of the note receivable net of the deferred gain, resulting in a charge to SGA expense in the fourth quarter of 2004. As of December 31, 2004, General Cable owns 100% of the joint venture company.

The joint venture company manufactured and sold to General Cable all of the fiber optic cable products that General Cable sells to its customers. During the years ended December 31, 2004 and 2003 and the eight month period ended

December 31, 2002, General Cable purchased approximately \$16.0 million, \$20.2 million and \$12.2 million from the joint venture company. At December 31, 2003, General Cable had a \$1.0 million payable to the joint venture company for these purchases.

General Cable sold fiber to the joint venture company. During the years ended December 31, 2004 and 2003 and the eight month period ended December 31, 2002, General Cable sold approximately \$8.7 million, \$10.4 million and \$6.8 million to the joint venture company. At December 31, 2003, General Cable had a \$1.0 million receivable from the joint venture company for these transactions.

For the year ended December 31, 2004, the joint venture company had sales of \$21.4 million, an operating loss of \$(4.0) million and a net loss of \$(4.1) million. For the year ended December 31, 2003, the joint venture company had sales of \$20.6 million and an operating loss and net loss of \$(0.6) million. At December 31, 2003, the joint venture company had total assets of \$10.0 million, total liabilities of \$2.9 million and total equity of \$7.1 million. For the eight month period ended December 31, 2002,

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)**

the joint venture company had sales of \$12.3 million and an operating loss and net loss of \$(1.2) million. At December 31, 2002, the joint venture company had total assets of \$12.9 million, total liabilities of \$5.1 million and total equity of \$7.8 million.

22. Quarterly Operating Results (Unaudited)

The interim financial information is unaudited. In the opinion of management, the interim financial information reflects all adjustments necessary for a fair presentation of quarterly financial information. Quarterly results have been influenced by seasonal factors inherent in General Cable's businesses. The sum of the quarter's earnings (loss) per share amounts may not add to full year earnings per share because each quarter is calculated independently. Summarized historical quarterly financial data for 2004 and 2003 are set forth below (in millions, except per share data):

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2004 ⁽¹⁾				
Net sales	\$ 478.6	\$ 517.5	\$ 489.3	\$ 485.3
Gross profit	45.4	55.2	58.8	55.3
Income (loss) from continuing operations	(1.9)	5.2	7.4	26.8
Gain on disposal of discontinued operations				0.4
Net income (loss)	(1.9)	5.2	7.4	27.2
Net income (loss) applicable to common shareholders	(3.4)	3.7	5.9	25.7
Earnings (loss) per common share of continuing operations	\$ (0.09)	\$ 0.09	\$ 0.15	\$ 0.65
Earnings (loss) per common share of continuing operations assuming dilution	\$ (0.09)	\$ 0.09	\$ 0.15	\$ 0.53
Earnings of discontinued operations per common share	\$	\$	\$	\$ 0.01
Earnings of discontinued operations per common share assuming dilution	\$	\$	\$	\$ 0.01
Earnings (loss) per common share	\$ (0.09)	\$ 0.09	\$ 0.15	\$ 0.66
Earnings (loss) per common share assuming dilution	\$ (0.09)	\$ 0.09	\$ 0.15	\$ 0.54
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter ⁽²⁾
2003				
Net sales	\$ 352.6	\$ 398.0	\$ 382.5	\$ 405.3
Gross profit	42.4	46.6	45.4	39.0
Net income (loss)	0.1	3.0	2.1	(10.0)
Net income (loss) applicable to common shareholders	0.1	3.0	2.1	(10.6)
Earnings (loss) per common share	\$	\$ 0.09	\$ 0.06	\$ (0.30)
Earnings (loss) per common share assuming dilution	\$	\$ 0.09	\$ 0.06	\$ (0.30)

- (1) During 2004, charges related to the rationalization of industrial cable manufacturing facilities of \$2.7 million, \$1.6 million, \$2.0 million and \$0.8 million were included in the first, second, third and fourth quarters. Additionally, the third quarter of 2004 included a \$1.5 million charge for remediation costs and the fourth quarter of 2004 included a \$2.4 million charge related to the wind-down of the Company's former fiber optics joint venture, a \$1.9 million charge for the write-off of goodwill and a \$23.3 million income tax benefit due to the elimination of certain prior year tax exposures.
- (2) The fourth quarter of 2003 includes charges of \$7.6 million related to the rationalization of industrial cable manufacturing facilities, \$1.0 million for severance related to headcount reductions in Europe and income of \$2.1 million related to the reversal of unutilized restructuring reserves. See Note 10 for further discussion.

Table of Contents**GENERAL CABLE CORPORATION AND SUBSIDIARIES****Notes to Consolidated Financial Statements (Continued)****23. Supplemental Guarantor Information**

General Cable Corporation and its material North American wholly-owned subsidiaries fully and unconditionally guarantee the \$285.0 million of Senior Notes due 2010 of General Cable Corporation (the Issuer) on a joint and several basis. The following presents financial information about the Issuer, guarantor subsidiaries and non-guarantor subsidiaries in millions. All of the Company's subsidiaries are restricted subsidiaries for purposes of the Senior Notes. Intercompany transactions are eliminated.

GENERAL CABLE CORPORATION AND SUBSIDIARIES

Notes to Consolidated Financial Statements (Continued)

24. Subsequent Events

On March 14, 2005, the Company acquired certain assets of Draka Comteq's business in North America for \$7.5 million, subject to post-closing adjustments. The assets acquired included machinery and equipment, inventory and prepaid assets, net of the assumption of trade payables. The net assets acquired are located in Franklin, Massachusetts and manufacture specialty electronics and datacom products.

On March 21, 2005, union workers at the Company's Lincoln, Rhode Island manufacturing facility commenced a strike. As of March 30, 2005, the parties had not reached agreement on a new contract and therefore the union workers remained on strike. Both parties are continuing to work together to reach a new contract. The Company does not expect that the strike will have a significant impact on its financial results for the first quarter of 2005.

In March of 2005, the Company received notification that a tax audit had been settled. Certain tax exposures related to the periods under audit were eliminated. As a result, an income tax benefit of \$22.3 million was recognized in the financial statements for the period ended December 31, 2004.
