On September 18, 2008 Edward H. Bastian, President and Chief Financial Officer of Delta presented to the 2008 Calyon Securities U.S. Airline Conference. The following materials were used in conjunction with the presentation.

Statements in the following presentation that are not historical facts, including statements regarding our estimates, expectations, beliefs, intentions, projections or strategies for the future, may be “forward-looking statements” as defined in the Private Securities Litigation Reform Act of 1995. All forward-looking statements involve a number of risks and uncertainties that could cause actual results to differ materially from the estimates, expectations, beliefs, intentions, projections and strategies reflected in or suggested by the forward-looking statements. These risks and uncertainties include, but are not limited to, the cost of aircraft fuel; the impact that our indebtedness will have on our financial and operating activities and our ability to incur additional debt; the restrictions that financial covenants in our financing agreements will have on our financial and business operations; labor issues; interruptions or disruptions in service at one of our hub airports; our increasing dependence on technology in our operations; our ability to retain management and key employees; the ability of our credit card processors to take significant holdbacks in certain circumstances; the effects of terrorist attacks; and competitive conditions in the airline industry.

Forward-looking statements in the presentation that relate to our proposed merger transaction with Northwest Airlines Corporation include, without limitation, our expectations with respect to the synergies, costs and charges, capitalization and anticipated financial impacts of the merger transaction and related transactions; approval of the merger transaction and related transactions by shareholders; the satisfaction of the closing conditions to the merger transaction and related transactions; and the timing of the completion of the merger transaction and related transactions. Factors that may cause the actual results to differ materially from the expected results include, but are not limited to, the possibility that the expected synergies will not be realized, or will not be realized within the expected time period, due to, among other things, (1) the airline pricing environment; (2) competitive actions taken by other airlines; (3) general economic conditions; (4) changes in jet fuel prices; (5) actions taken or conditions imposed by the United States and foreign governments; (6) the willingness of customers to travel; (7) difficulties in integrating the operations of the two airlines; (8) the impact of labor relations; and (9) fluctuations in foreign currency exchange rates. Other factors include the possibility that the merger does not close, including due to the failure to receive required stockholder or regulatory approvals, or the failure of other closing conditions.

Additional information concerning risks and uncertainties that could cause differences between actual results and forward-looking statements is contained in Delta’s Securities and Exchange Commission filings, including its Annual Report on Form 10-K for the fiscal year ended December 31, 2007 and Form 10-Q for the quarterly period ended June 30, 2008. Caution should be taken not to place undue reliance on Delta’s forward-looking statements, which represent Delta’s views only as of September 18, 2008, and which Delta has no current intention to update.

Note: Delta's cost per available seat mile (CASM) excludes expenses related to Delta's providing maintenance and staffing services to third parties as these costs are not associated with the generation of a seat mile.

Delta presents mainline CASM excluding fuel expense and related taxes because management believes high fuel prices mask the progress achieved toward its business plan targets.
