Zurich, February 12, 2004 Credit Suisse Group today announced a net profit of CHF 5.2 billion for 2003, representing a significant turnaround from the net loss of CHF 3.3 billion in 2002. The Group's fourth quarter 2003 net profit amounted to CHF 1.2 billion, compared to a net loss of CHF 950 million in the fourth quarter of 2002. At Credit Suisse Financial Services, a lower fourth quarter 2003 result in the banking segments was more than offset by strong investment results in the insurance segments; net profit for 2003 amounted to CHF 4.3 billion. Credit Suisse First Boston reported a net profit of USD 870 million (CHF 1.2 billion) for 2003 and had steady operating income in the fourth quarter, demonstrating strong investment banking results and sustainable business activity.

Oswald J. Gruebel, Co-CEO of Credit Suisse Group and CEO of Credit Suisse Financial Services, and John J. Mack, Co-CEO of Credit Suisse Group and CEO of Credit Suisse First Boston, stated, "At the end of 2002, we defined the measures necessary to return the Group to profitability. Those measures included reducing costs in our banking business, realigning our onshore private banking activities in Europe, returning Winterthur to profitability, strengthening our capital base and reducing the impact of the legacy asset portfolios at Credit Suisse First Boston. We are pleased that, thanks to our strong management teams and dedicated staff, the Group has successfully completed these measures and more in 2003."

Oswald J. Gruebel added, "Credit Suisse Financial Services achieved a strong performance last year, with a remarkable turnaround at Winterthur and continued good results in Private Banking and Corporate & Retail Banking. We will continue to strive to offer our clients outstanding service, while keeping costs firmly under control and actively capturing market opportunities to further enhance revenues in 2004."

John J. Mack concluded, "2003 was clearly a critical turning point for CSFB. We set out to be consistently profitable, and we were. Now that we have strict and effective cost controls in place, we will focus on growing revenues and continuing to build a one-firm culture that emphasizes and rewards effective teamwork. I am confident that CSFB is now well positioned to build on its progress and achieve growth in 2004 as global markets rebound."

#### **Swiss GAAP Changes**

As pre-announced with the third quarter 2003 results, the Group adopted mandatory changes in Swiss Federal Banking Commission guidelines (Swiss GAAP) in the fourth quarter of 2003, which were retroactively applied as of January 1, 2003. Significant changes for Credit Suisse Group relate to accounting for own shares and derivatives. The total impact of these changes in the fourth quarter of 2003 was a decrease of CHF 189 million in the Group's net profit.

### **Capital Management**

Credit Suisse Group strengthened its balance sheet and its capital base in 2003 through earnings generation and the divestitures at Winterthur, as well as the sale of Credit Suisse First Boston's settlement and clearing platform Pershing. The Group's consolidated BIS tier 1 ratio stood at 11.7% as of December 31, 2003, up from 11.1% as of September 30, 2003 reflecting earnings generation and a reduction of risk-weighted assets and up from 9.0% as of December 31, 2002.

Note: net operating profit is net profit excluding the amortization of acquired intangible assets and goodwill, exceptional items and the cumulative effect of changes in accounting principles, all net of tax.

Credit Suisse Financial Services posted a net profit of CHF 977 million in the fourth quarter of 2003. This compared to a net profit of CHF 620 million in the fourth quarter of 2002 and a net profit of CHF 1.8 billion in the third quarter of 2003, which included an after-tax gain of CHF 1.3 billion net of related provisions from divestitures at Winterthur, and certain provisions of CHF 383 million related to its current and former international business portfolio. Included in the fourth quarter 2003 result are: a charge of CHF 46 million after tax related to the further realignment of European Private Banking; extraordinary income of CHF 106 million (CHF 81 million after tax) from a divestiture at Private Banking; and a tax credit of CHF 782 million in the insurance segments related to tax law changes in Germany, which after the related increase in dividends to policyholders incurred of CHF 711 million resulted in a positive impact on net profit of CHF 71 million. For the full year 2003, the business unit recorded a net profit of CHF 4.3 billion compared to a net loss of CHF 271 million in 2002.

#### **CSFS Segment Results**

in CHF million	4Q2003	4Q2002	Change in % vs 4Q2002	12 months 2003	12 months 2002	Change in % vs 12 mths 2002
Private Banking	508	314	62	1,914	1,696	13

Life & Pensions	369	93	297	723	-1,400	n/ a
Insurance	153	6	n/ a	1,338	-992	n/ a

At <u>Private Banking</u>, fourth quarter 2003 operating income increased 5% compared to the fourth quarter of 2002 but was down 9% from the third quarter of 2003. This decline was primarily due to lower commission income, impacted by the weaker US dollar, as well as fewer trading days and lower transaction volumes.

Page 3 of 10

For the full year 2003, operating income was down slightly to CHF 5.9 billion. Operating expenses decreased 7% compared to the fourth quarter of 2002 and remained almost unchanged compared to the third quarter of 2003. For the full year 2003, operating expenses were down 8%. The cost/income ratio decreased 3.3 percentage points to 59.8% for the full year 2003. The gross margin was almost stable at 121.3 bp for the full year 2003.

At <u>Corporate & Retail Banking</u>, operating income increased 7% compared to the fourth quarter of 2002 and remained almost unchanged compared to the third quarter of 2003. Operating income also remained virtually unchanged for the full year 2003 compared to 2002. Operating expenses decreased 9% in the fourth quarter of 2003 compared to the fourth quarter of 2002 but rose 7% compared to the third quarter of 2003 due mainly to IT project costs and marketing activities. For the full year 2003, operating expenses were 9% lower than in 2002, and the cost/income ratio improved 5.9 percentage points to 67.2% in 2003.

The insurance segments achieved a strong recovery in 2003, driven primarily by significant improvements in investment performance, substantially reduced administration costs and improved underwriting results and claims management. <u>Life & Pensions</u> reported a 9% decrease in gross written premiums in 2003, due primarily to profit-oriented underwriting reflecting market conditions. Adjusted for divestitures and exchange rate impacts, premium volumes were down 3%. Total operating expenses, comprising acquisition and administration costs, declined 9% in 2003 compared to 2002, reflecting ongoing efficiency measures. Administration costs decreased 24% over the same period. The total return on invested assets rose to 5.2% in 2003, from 1.4% in 2002.

The <u>Insurance</u> segment recorded a 7% decrease in net premiums earned in 2003. Adjusted for divestitures and exchange rate impacts, net premiums earned increased 6% due primarily to tariff increases across all major markets. The segment's net underwriting result before dividends to policyholders incurred rose by CHF 392 million in 2003 compared to 2002, and the combined ratio improved by 2.4 percentage points to 101.0% over the same period. In the fourth quarter of 2003, the combined ratio fell below 100% for the first time to stand at 98.3%. Administration costs decreased 17% in 2003 compared to 2002. The total return on invested assets was 3.8% in 2003, compared to -0.1% in 2002.

Credit Suisse First Boston reported a net profit of USD 870 million (CHF 1.2 billion) in 2003, a substantial improvement from the net loss of USD 1.2 billion (CHF 1.8 billion) in 2002. Net operating profit for 2003 which excludes the amortization of goodwill and acquired intangible assets and the related impairment charge, the cumulative effect of changes in accounting principles from prior periods and, for the fourth quarter of 2002, exceptional items, all net of tax rose to USD 1.4 billion (CHF 1.9 billion), from USD 156 million (CHF 245 million) in 2002. Excluding the impact of mandatory Swiss GAAP changes, full year 2003 net profit would have been USD 933 million (CHF 1.3 billion) and net operating profit would have totaled USD 1.6 billion (CHF 2.1 billion).

For the fourth quarter of 2003, Credit Suisse First Boston reported a net profit of USD 220 million (CHF 290 million), compared to a net loss of USD 795 million (CHF 1.2 billion) in the fourth quarter of 2002. The fourth quarter 2003 results include an impairment of USD 200 million (CHF 270 million), or USD 130 million (CHF 176 million) net of tax, of acquired intangible assets related to Credit Suisse First Boston's high-net-worth asset management business. Net operating profit was USD 344 million (CHF 455 million) for the fourth quarter of 2003, up from USD 27 million (CHF 40 million) in the fourth quarter of 2002. Excluding the impact of the mandatory Swiss GAAP changes, fourth quarter 2003 net profit would have been USD 283 million (CHF 375 million), representing a significant improvement from the loss in the fourth quarter of 2002, and net operating profit would have increased significantly to USD 545 million (CHF 726 million) from USD 27 million (CHF 40 million) in the fourth quarter of 2002.

As previously announced, Credit Suisse Group now expenses stock options, and Credit Suisse First Boston has introduced a three-year vesting period for share awards in line with its long-term retention strategy as well as industry practice. As a result of its updated compensation policies, Credit Suisse First Boston increased the amount of compensation deferred in the form of shares, versus its previous practice of combining share awards with other performance-based plans as well as option awards.

The <u>Institutional Securities</u> segment reported a 2% increase in operating income for the full year 2003 excluding Swiss GAAP changes compared to 2002, as favorable Fixed Income markets were partially offset by volume declines and margin compression in the US cash equity business as well as lower equity new issuance and M&A investment banking fees. Full year 2003 operating expenses decreased 4% compared to 2002, primarily as a result of reduced headcount and cost containment efforts. Segment profit was up 298% in 2003, excluding Swiss GAAP changes, compared to 2002. In the fourth quarter of 2003, the Institutional Securities segment recorded strong operating income compared to the fourth quarter of 2002, primarily as a result of improvements in Fixed Income and lower write-downs related to the legacy portfolio despite a one-time gain on the sale of a private equity investment in the fourth quarter of 2002. Fourth quarter 2003 operating expenses were up 18% compared to the fourth quarter of 2002 as a result of higher compensation costs related to increased operating income, partially offset by lower operating expenses from cost containment efforts.

Page 6 of 10

Within the <u>CSFB Financial Services</u> segment, Credit Suisse Asset Management reported a 3% increase in operating income for the full year 2003, mainly reflecting an increase in assets under management on a US dollar basis. The segment's operating expenses decreased over the same period primarily due to the sale of Pershing. Furthermore, the sale of its interest in a Japanese online broker generated USD 99 million (CHF 134 million), or USD 71 million (CHF 96 million) net of tax.

#### **Net New Assets**

# Net New Assets and Assets under Management (AuM) for the full year 2003

Credit Suisse First Boston	-11.7	478.6	-0.8
Credit Suisse Group	4.8	1,199.0	3.4

Credit Suisse Group's net new asset inflow for the fourth quarter and full year 2003 was driven primarily by inflows from Private Banking of CHF 4.2 billion and CHF 17.9 billion, respectively. For the full year 2003, Corporate & Retail Banking reported a net asset outflow of CHF 1.4 billion. CSFB Financial Services recorded a net asset outflow of CHF 14.0 billion for 2003, only slightly offset by a net new asset inflow of CHF 2.3 billion from the Institutional Securities segment. The net result for Credit Suisse Group was a net new asset inflow of CHF 2.9 billion in the fourth quarter of 2003 and of CHF 4.8 billion for the full year 2003. As of December 31, 2003, the Group's total assets under management amounted to CHF 1,199.0 billion, an increase of 3.4% compared to December 31, 2002, and flat compared to September 30, 2003.

#### **Dividend Proposal**

The Board of Directors of Credit Suisse Group has decided to propose a reduction in par value of CHF 0.50 per share for the financial year 2003 in lieu of a dividend to the Annual General Meeting on April 30, 2004. This compares to a dividend of CHF 0.10 per share for the financial year 2002. If approved by the shareholders at the Annual General Meeting on April 30, 2004, this capital reduction is expected to be paid out on July 12, 2004.

Page 7 of 10

#### **Change In Primary Accounting Standard**

As a result of its long-term plan to move to an internationally recognized accounting standard, as well as the requirement of the Swiss Exchange for listed companies to adopt US GAAP or IFRS, Credit Suisse Group switched from Swiss GAAP to US GAAP for all its business activities on January 1, 2004. Credit Suisse Group's reconciled 2003 US GAAP net profit will differ substantially from its 2003 net profit reported under Swiss GAAP. These differences include, among other factors, the difference in the accounting treatment of the combination of Credit Suisse Group and Winterthur in 1997, which was accounted for as a 'pooling of interest' under Swiss GAAP and as a 'purchase' under US GAAP. This alone will result in a reduction of over CHF 3 billion in the 2003 net profit under US GAAP versus Swiss GAAP, due primarily to the movement in the balance of goodwill related to the combination when accounted for in accordance with US GAAP, as announced in the third quarter 2003 earnings release. The charge in the US GAAP net profit related to this movement in goodwill is absorbed by corresponding additional shareholders' equity under US GAAP, which resulted from the 'purchase accounting' treatment of the combination between Credit Suisse Group and Winterthur in 1997. Other factors contributing to a differing reconciled net profit under US GAAP include accounting for derivatives, software capitalization, taxation and pension costs.

Going forward, the primary drivers in the Group's businesses remain unchanged. Credit Suisse Group plans to publish its reconciled 2003 US GAAP results on its website on April 27, 2004. Key first quarter 2004 results will be pre-released in connection with the Annual General Meeting on April 30, 2004, and first quarter 2004 results will be disclosed in full on May 5, 2004.

#### Outlook

Given Credit Suisse Group's return to sound profitability in 2003, the Group is well positioned to compete successfully in its primary markets. While the Group's businesses remain tied to fluctuations and risks in the capital markets, management is optimistic about 2004 given the current levels of client activity and improving economic conditions. The Group's accomplishments were significant in 2003 and it expects to continue to make progress towards achieving leading performance in its respective businesses.

<sup>&</sup>lt;sup>1)</sup> This category comprises the real estate investments of Winterthur, Credit Suisse First Boston's commercial real estate exposures, Credit Suisse First Boston's residential real estate exposures, Credit Suisse First Boston's asset-backed securities exposures as well as the real estate acquired at auction and real estate for own use in Switzerland.

<sup>&</sup>lt;sup>2)</sup> Excludes ERC for discontinued businesses.

<sup>&</sup>lt;sup>2)</sup> The CSFB VaR is calculated using the USD as the base currency. For the purpose of this disclosure, the CSFB VaR estimates are translated into CHF using the respective currency translation rates. Specifically, the average, maximum and minimum daily VaR estimates in CHF are calculated using the respective month end closing rates; the period end VaR and the risk type breakdown at period end are calculated using the CSG closing rate at quarter end.

<sup>&</sup>lt;sup>3)</sup> As Credit Suisse Group does not manage its trading portfolios on a consolidated level, consolidated VaR calculations are performed on a monthly basis only. The average, maximum and minimum values therefore are based on the three month-ends during the quarter. The consolidated VaR calculations for Credit Suisse Group are net of diversification benefits between Credit Suisse First Boston and Credit Suisse Financial Services.

<sup>&</sup>lt;sup>1)</sup> The operating basis business unit results reflect the results of the separate segments comprising the business unit. Certain acquisition-related costs, including amortization of acquired intangible assets and goodwill, exceptional items and cumulative effect of change in accounting principle, not allocated to the segments are included in the business

unit results. Certain other items, including credit-related valuation adjustments resulting from the difference between the statistical and actual credit provisions and gains/losses from sales of investments within the insurance business are presented in the operating basis business unit results based on the Group's segment reporting principles. For a reconciliation and a discussion of the material reconciling items, please refer to "Reconciliation of operating results to Swiss GAAP". In 4Q2003 Credit Suisse Group applied mandatory changes in Swiss Federal Banking Commission guidelines retroactively as of January 1, 2003. In line with these guidelines, prior periods have not been restated. The impact on the results of Credit Suisse Financial Services was not considered material.

<sup>2)</sup> For the purpose of the consolidated financial statements, operating income for the insurance business is defined as net premiums earned, less claims incurred and change in technical provisions and expenses for processing claims, less commissions, plus net investment income from the insurance business. Gains or losses related to sales of investments within the insurance business are recorded as operating income at the business unit level and reclassified to extraordinary income/(expenses) in the consolidated financial statements in accordance with Swiss GAAP.

<sup>&</sup>lt;sup>6)</sup> Increased/(decreased) credit-related valuation adjustments before tax of CHF 119 m, CHF 14 m, CHF 85 m, CHF 82 m and CHF 120 m for 4Q2003, 3Q2003, 4Q2002, 12 months 2003 and 12 months 2002, respectively. Reconciliation to net operating profit/(loss)

<sup>&</sup>lt;sup>1)</sup> The operating basis business unit results reflect the results of the separate segments comprising the business unit. Certain acquisition-related costs, including acquisition interest, amortization of retention payments and amortization of acquired intangible assets and goodwill, exceptional items and cumulative effect of change in accounting principle not allocated to the segments are included in the business unit results. Certain other items, including brokerage, execution and clearing expenses, contractor and recruitment costs and expenses related to certain redeemable preferred securities classified as minority interests are presented in the operating basis business unit results based on the Group's segment reporting principles. For a reconciliation and a discussion of the material reconciling items, please refer to "Reconciliation of operating results to Swiss GAAP". In 4Q2003 Credit Suisse Group applied mandatory changes in Swiss Federal Banking Commission guidelines retroactively as of January 1, 2003. In line with these guidelines, prior periods have not been restated. The impact on the results of Credit Suisse First Boston is shown on page 27.

#### **CONVERSION TO US GAAP**

(1/3)

## **BACKGROUND**

On January 1, 2004, Credit Suisse Group converted to US GAAP Decision to convert to US GAAP was driven by:

The Swiss Exchange (SWX) requirement to adopt US GAAP or IFRS(1)

US GAAP and IFRS are expected to converge over time transition to US GAAP was more cost-effective and appropriate given our activities

### Next steps:

Swiss GAAP Annual Report to be published on March 31, 2004

Full year and quarterly 2003 US GAAP financial results to be published on April 27, 2004 on the Credit Suisse Group website

Pre-release of key figures from the first quarter 2004 results at the Annual General Meeting on April 30, 2004

Full first quarter 2004 results to be reported on May 5, 2004

Filing of US GAAP Annual Report 2003 on Form 20-F with the SEC planned for late June, 2004

(1) International Financial Reporting Standards

#### CONVERSION TO US GAAP

(2/3)

# IMPLICATIONS FOR CREDIT SUISSE GROUP

Differences are primarily a result of differing accounting treatments regarding the combination of Credit Suisse Group and Winterthur

Increase in goodwill and shareholders equity

Different cost basis for investments affecting gains and losses and depreciation of real estate

Other differences include derivatives/hedges, amortization of goodwill, software capitalization, taxes and pension costs

It is important to note that the primary business drivers remain unaffected:

Balance sheet business and interest margins

Buying and selling securities

Fees and commission

Premium income

Operating costs

More earnings volatility under US GAAP

First relevant US GAAP results to be published for the first quarter of 2004
