- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 8.01.

Other Events

On November 27, 2013, Pioneer Natural Resources Company ("Pioneer" or the "Company") announced that severe winter weather in Texas had adversely affected the Company's production and drilling operations in the Spraberry/Wolfcamp, Eagle Ford Shale and Barnett Shale Combo plays. The Spraberry/Wolfcamp area was especially hard hit as heavy icing and low temperatures resulted in extensive power outages, facilities freeze-ups, trucking curtailments and limited access to production and drilling facilities. The Company believes that the additional severe winter weather that occurred beginning December 4, 2013 in the Spraberry/Wolfcamp area did not cause a significant amount of incremental damage, although it temporarily interrupted ongoing operations and the Company's recovery efforts.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form 8-K

The severe weather events are expected to result in Pioneer's production for the fourth quarter of 2013 falling below the guidance provided by the Company in its Quarterly Report on Form 10-Q for the quarter ended September 30, 2013. The Company's financial guidance for the fourth quarter of 2013 is also expected to be adversely affected. Pioneer will not be able to update its production and financial guidance until the full impact of the weather-related downtime and associated required repairs can be completely assessed.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
