LEAP WIRELESS INTERNATIONAL, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1. The Company

Leap Wireless International, Inc. (“Leap”), a Delaware corporation, together with its subsidiaries and consolidated joint ventures, is a wireless communications carrier that offers digital wireless services in the United States under the “Cricket” brand. Cricket service offerings provide customers with unlimited nationwide wireless services for a flat rate without requiring a fixed-term contract or a credit check. The Company's primary service is Cricket Wireless, which offers customers unlimited nationwide voice and data services for a flat monthly rate. Leap conducts operations through its subsidiaries and has no independent operations or sources of income other than interest income and through dividends, if any, from its subsidiaries.

Cricket service is offered by Cricket Communications, Inc. (“Cricket”), a wholly-owned subsidiary of Leap. Cricket service is also offered in South Texas by the Company's joint venture, STX Wireless Operations, LLC (“STX Operations”), which Cricket controls through a 75.75% controlling membership interest in its parent company STX Wireless, LLC (“STX Wireless”). In addition, Cricket owns an 85% non-controlling membership interest in Savary Island Wireless, LLC (“Savary Island”), which holds wireless spectrum in the upper Midwest portion of the U.S. and which leases a portion of that spectrum to Cricket. For more information regarding the ventures described above, see “Note 7. Significant Acquisitions and Other Transactions.”

Leap, Cricket and their subsidiaries and consolidated joint ventures are collectively referred to herein as the “Company.”

Note 2. Basis of Presentation and Significant Accounting Policies

Basis of Presentation

The accompanying interim condensed consolidated financial statements have been prepared without audit, in accordance with the instructions to Form 10-Q and therefore do not include all information and footnotes required by accounting principles generally accepted in the United States of America (“GAAP”) for a complete set of financial statements. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2011. In the opinion of management, the unaudited financial information for the interim periods presented reflects all adjustments necessary for a fair presentation of the Company's results for the periods presented, with such adjustments consisting only of normal recurring adjustments. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses. By their nature, estimates are subject to an inherent degree of uncertainty. Actual results could differ from management's estimates and operating results for interim periods are not necessarily indicative of operating results for an entire fiscal year.

Principles of Consolidation

The condensed consolidated financial statements include the operating results and financial position of Leap and its wholly-owned subsidiaries and consolidated joint ventures. The Company consolidates its non-controlling interest in Savary Island in accordance with the authoritative guidance for the consolidation of variable interest entities because Savary Island is a variable interest entity and, among other things, the Company has entered into an agreement with Savary Island's other member which establishes a specified purchase price in the event that it exercised its right to sell its membership interest to the Company. The Company consolidates STX Wireless in accordance with the

authoritative guidance for consolidations based on the voting interest model. All intercompany accounts and transactions have been eliminated in the condensed consolidated financial statements.

Segment and Geographic Data

The Company operates in a single operating segment and a single reporting unit as a wireless communications carrier that offers digital wireless services in the United States. As of and for the three and six months ended June 30, 2012 and 2011, all of the Company's revenues and long-lived assets related to operations in the United States.

Revenues

The Company's business revenues principally arise from the sale of wireless services, devices (handsets and broadband modems) and accessories. Wireless services are provided primarily on a month-to-month basis. The Company's customers are required to pay for their service in advance and the Company does not require customers to sign fixed-term contracts or pass a credit check. Service revenues are recognized only after payment has been received and services have been rendered.

When the Company activates service for a new customer, it often sells that customer a device along with a period of service. In accordance with the authoritative guidance for revenue arrangements with multiple deliverables, the sale of a device along with service constitutes a multiple element arrangement. Under this guidance, once a company has determined the best estimate of selling price of the elements in the sales transaction, the total consideration received from the customer must be allocated among those elements on a relative selling price basis. Applying the guidance to these transactions results in the Company recognizing the total consideration received, less amounts allocated to the wireless service period (generally the customer's monthly service plan), as equipment revenue.

Amounts allocated to equipment revenues and related costs from the sale of devices are recognized when service is activated by new customers. Revenues and related costs from the sale of devices and accessories to existing customers are recognized at the point of sale. The costs of devices and accessories sold are recorded in cost of equipment. In addition to devices that the Company sells directly to its customers at Cricket-owned stores, the Company sells devices to third-party dealers, including nationwide retailers. These dealers then sell the devices to the ultimate Cricket customer, similar to the sale made at a Cricket-owned store. Sales of devices to third-party dealers are recognized as equipment revenues only when service is activated by customers, since the level of price reductions and commissions ultimately available to such dealers is not reliably estimable until the devices are sold by such dealers to customers. Thus, revenues from devices sold to third-party dealers are recorded as deferred equipment revenue and the related costs of the devices are recorded as deferred charges upon shipment of the devices by the Company. The deferred charges are recognized as equipment costs when the related equipment revenue is recognized, which occurs when service is activated by the customer.

During the second half of 2012, the Company plans to broaden its use of a third-party logistics provider to manage the planning, purchasing and fulfillment of handsets and other devices, whereby the Company's third-party dealers, including nationwide retailers, will increasingly purchase handsets and other devices directly from the logistics provider. Under this arrangement, the Company, in most cases, will not hold title to, or have ownership in, the related device inventory shipped to its dealers. Accordingly, the Company will not record deferred equipment revenues or deferred charges on its balance sheet related to devices purchased by third-party dealers. Therefore, upon customer activation of these handsets and other devices, the Company will no longer record equipment revenue or cost of equipment. Amounts paid to the logistics provider will be recorded as deferred costs upon shipment of devices to the dealers and be recognized in cost of equipment when service is activated by the customer. Handsets and other devices purchased by company-owned stores will continue to be accounted for as inventory and deferred equipment revenues until sold and activated by the customers at which time, equipment revenue and the related cost of equipment will be recognized.

Through a third-party provider, the Company's customers may elect to participate in an extended warranty program for devices they purchase. The Company recognizes revenue on replacement devices sold to its customers under the program when the customer purchases the device.

Sales incentives offered to customers and commissions and sales incentives offered to the Company's third-party dealers are recognized as a reduction of revenue when the related service or equipment revenue is recognized.

Customers have limited rights to return devices and accessories based on time and/or usage, and customer returns of devices and accessories have historically been insignificant.

Amounts billed by the Company in advance of customers' wireless service periods are not reflected in accounts receivable or deferred revenue since collectability of such amounts is not reasonably assured. Deferred revenue consists primarily of cash received from customers in advance of their service period and deferred equipment revenue related to devices sold to third-party dealers.

Universal Service Fund, E-911 and other telecommunications-related regulatory fees are assessed by various federal and state governmental agencies in connection with the services that the Company provides to its customers. The service plans the Company currently offers are "all-inclusive" of telecommunications and regulatory fees, in that the Company does not separately bill and collect amounts owed and remitted to government agencies from its customers. For the Company's legacy service plans, which are not "all-inclusive," the Company separately bills and collects from its customers amounts owed and remitted to government agencies. Regulatory fees and telecommunications taxes separately billed and collected from the Company's customers are recorded

in service revenues. Amounts owed to government agencies are recorded in cost of service. During the three and six months ended June 30, 2012, the total amount of regulatory fees and telecommunications taxes separately billed and collected from customers and recorded in service revenues was \$2.7 million and \$6.8 million, respectively. During the three and six months ended June 30, 2011, the total amount of regulatory fees and telecommunications taxes separately billed and collected from customers and recorded in service revenues was \$9.5 million and \$20.9 million, respectively. Sales, use and excise taxes for all service plans are reported on a net basis.

Restricted Cash, Cash Equivalents and Short-Term Investments

The Company has set aside certain amounts of cash, cash equivalents and short term investments to satisfy certain contractual obligations and has classified such amounts as restricted in its condensed consolidated balance sheets. Restricted cash, cash equivalents and short-term investments are included in either other current assets or other assets, depending on the nature of the underlying contractual obligation. As of June 30, 2012, the Company had approximately \$5.1 million and \$8.8 million of restricted cash, cash equivalents and short-term investments included in other current assets and other assets, respectively. As of December 31, 2011, the Company had approximately \$3.6 million and \$8.8 million of restricted cash, cash equivalents and short-term investments included in other current assets and other assets, respectively.

Goodwill

The Company records the excess of the purchase price over the fair value of net assets acquired in a business combination as goodwill. As of June 30, 2012 and December 31, 2011, goodwill of \$31.9 million primarily represented the excess of the purchase price over the fair value of the assets acquired (net of liabilities assumed, including the related deferred tax effects) by STX Wireless in connection with the formation of the joint venture. For more information regarding the joint venture, see "Note 7. Significant Acquisitions and Other Transactions."

The Company assesses its goodwill for impairment annually at the reporting unit level by applying a fair value test during the third quarter of each year. This fair value test involves a two-step process. The first step is to compare the book value of the Company's net assets to their fair value. If the fair value is determined to be less than the book value, a second step is performed to measure the amount of the impairment, if any. In addition, on a quarterly basis, the Company evaluates the triggering event criteria outlined in the authoritative guidance to determine whether events or changes in circumstances indicate that an impairment condition may exist.

As of June 30, 2012, the Company performed its quarterly evaluation which included consideration of whether there had been any significant adverse changes in macroeconomic, industry or market factors or in the Company's business climate, cost factors, unanticipated competition, loss of key personnel or likely sale or disposal of all or a significant portion of a reporting unit. Based upon this evaluation, the Company concluded that there had not been any triggering events or changes in circumstances that indicated an impairment condition existed as of June 30, 2012.

The closing price of Leap common stock was \$6.43 on June 29, 2012 and Leap's market capitalization was above the Company's book value as of such date. Since that time, the closing price of Leap common stock has ranged from a high of \$6.68 per share to a low of \$4.49 per share. If the price of Leap common stock continues to trade at or near current levels, the Company may be required to perform the second step of its third quarter annual goodwill impairment test to determine the fair value of its net assets, which may require the Company to recognize a non-cash impairment charge for some or all of the \$31.9 million carrying value of its goodwill.

Note 3. Supplementary Balance Sheet Information (in thousands):

	June 30, 2012	December 31, 2011

Other	19,772	17,863	
	\$231,711	\$256,357	

Accounts receivable, net, consists primarily of amounts billed to third-party dealers for devices and accessories and (1) amounts due from service providers related to interconnect and roaming agreements, net of an allowance for doubtful accounts.

As of June 30, 2012 and December 31, 2011, approximately \$44.0 million and \$32.3 million of assets were held by (2) the Company under capital lease arrangements, respectively. Accumulated amortization relating to these assets totaled \$20.5 million and \$18.5 million as of June 30, 2012 and December 31, 2011, respectively.

(3) Deferred service revenue consists primarily of cash received from customers in advance of their service period.

(4) Deferred equipment revenue relates to devices sold to third-party dealers which have not yet been purchased and activated by customers.

Note 4. Fair Value of Financial Instruments and Non-Financial Assets

Fair Value of Financial Instruments

The authoritative guidance for fair value measurements defines fair value for accounting purposes, establishes a framework for measuring fair value and provides disclosure requirements regarding fair value measurements. The guidance defines fair value as an exit price, which is the price that would be received upon the sale of an asset or paid upon the transfer of a liability in an orderly transaction between market participants at the measurement date. The degree of judgment utilized in measuring the fair value of assets and liabilities generally correlates to the level of pricing observability. Assets and liabilities with readily available, actively quoted prices or for which fair value can be measured from actively quoted prices in active markets generally have more pricing observability and require less judgment in measuring fair value. Conversely, assets and liabilities that are rarely traded or not quoted have less pricing observability and are generally measured at fair value using valuation models that require more judgment. These valuation techniques involve some level of management estimation and judgment, the degree of which is dependent on the price transparency of the asset, liability or market and the nature of the asset or liability.

The Company has categorized its assets and liabilities measured at fair value into a three-level hierarchy in accordance with the authoritative guidance for fair value measurements. Assets and liabilities measured at fair value using quoted prices in active markets for identical assets or liabilities are generally categorized as Level 1; assets and liabilities measured at fair value using observable market-based inputs or unobservable inputs that are corroborated by market data for similar assets or liabilities are generally categorized as Level 2; and assets and liabilities measured at fair value using unobservable inputs that cannot be corroborated by market data are generally categorized as Level 3. Assets and liabilities presented at fair value in the Company's condensed consolidated balance sheets are generally categorized as follows:

- Level 1: Quoted prices in active markets for identical assets or liabilities. The Company did not have any Level 1 assets or liabilities as of June 30, 2012 or December 31, 2011.
- Level 2: Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. The Company's Level 2 assets as of June 30, 2012 and December 31, 2011 included its cash equivalents, its short-term investments in obligations of the U.S. government and government agencies and its short-term investments in commercial paper.
- Level 3: Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Such assets and liabilities may have values determined using pricing models, discounted cash flow methodologies, or similar techniques, and include instruments for which the determination of fair value requires significant management judgment or estimation. The Company did not have any Level 3 assets or liabilities as of June 30, 2012 or December 31, 2011.

The following tables set forth by level within the fair value hierarchy the Company's assets and liabilities that were recorded at fair value as of June 30, 2012 and December 31, 2011 (in thousands). As required by the guidance for fair value measurements, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Thus, assets and liabilities categorized as Level 3 may be measured at fair value using inputs that are observable (Levels 1 and 2) and unobservable (Level 3). Management's assessment of the significance of a particular input to the fair value measurement requires judgment, which may affect the valuation of assets and liabilities and their placement within the fair value hierarchy levels.

At Fair Value as of June 30, 2012

Assets in the tables above are reported on the condensed consolidated balance sheets as components of cash and cash equivalents, short-term investments, other current assets and other assets.

Unrealized gains (losses) are presented in accumulated other comprehensive loss within stockholders' equity in the condensed consolidated balance sheets. Realized gains (losses) are presented in other income (expense), net in the condensed consolidated statements of comprehensive income.

Cash Equivalents and Short-Term Investments

As of June 30, 2012 and December 31, 2011, all of the Company's short-term investments were debt securities with contractual maturities of less than one year and were classified as available-for-sale. The fair value of the Company's cash equivalents, short-term investments in obligations of the U.S. government and government agencies and its short-term investments in commercial paper is determined using observable market-based inputs for similar assets, which primarily include yield curves and time-to-maturity factors. Such investments are therefore considered to be Level 2 items.

Available-for-sale securities were comprised as follows as of June 30, 2012 and December 31, 2011 (in thousands):

	As of June 30, 2012	
	Cost	Fair Value
Money market funds	\$126,634	\$126,634
Commercial paper	85,469	85,468
U.S. government or government agency securities	127,227	127,231
	\$339,330	\$339,333
	As of December 31, 2011	
	Cost	Fair Value
Money market funds	\$224,383	\$224,383
Commercial paper	165,201	165,202
U.S. government or government agency securities	293,626	293,610
	\$683,210	\$683,195

Long-Term Debt

The Company reports its long-term debt obligations at amortized cost; however, for disclosure purposes, the Company is required to measure the fair value of outstanding debt on a recurring basis. The fair value of the Company's outstanding long-term debt is determined primarily by using quoted prices in active markets and was \$3,261.0 million and \$3,073.6 million as of June 30, 2012 and December 31, 2011, respectively. The Company's debt was considered

to be a Level 1 item for disclosure purposes.

Assets Measured at Fair Value on a Nonrecurring Basis

As of June 30, 2012 and December 31, 2011, there were no non-financial assets that were measured and recorded at fair value on a non-recurring basis.

Note 5. Long-Term Debt, net

Long-term debt, net as of June 30, 2012 and December 31, 2011 was comprised of the following (in thousands):

	June 30, 2012	December 31, 2011
Convertible senior notes due 2014	\$250,000	\$250,000
Unsecured senior notes due 2015	300,000	300,000
Non-negotiable promissory note due 2015	21,911	21,911
Senior secured notes due 2016	1,100,000	1,100,000

	3,224,383	3,220,660
Current maturities of long-term debt	(21,911) (21,911
	\$3,202,472	\$3,198,749

Senior Notes

Convertible Senior Notes Due 2014

In June 2008, Leap issued \$250 million of unsecured convertible senior notes due 2014 in a private placement to institutional buyers. The notes bear interest at the rate of 4.50% per year, payable semi-annually in cash in arrears, which interest payments commenced in January 2009. The notes are Leap's general unsecured obligations and rank equally in right of payment with all of Leap's existing and future senior unsecured indebtedness and senior in right of payment to all indebtedness that is contractually subordinated to the notes. The notes are structurally subordinated to the existing and future claims of Leap's subsidiaries' creditors, including under the secured and unsecured senior notes described below. The notes are effectively junior to all of Leap's existing and future secured obligations, including those under the senior secured notes described below, to the extent of the value of the assets securing such obligations.

Holders may convert their notes into shares of Leap common stock at any time on or prior to the third scheduled trading day prior to the maturity date of the notes, July 15, 2014. If, at the time of conversion, the applicable stock price of Leap common stock is less than or equal to approximately \$93.21 per share, the notes will be convertible into 10.7290 shares of Leap common stock per \$1,000 principal amount of the notes (referred to as the "base conversion rate"), subject to adjustment upon the occurrence of certain events. If, at the time of conversion, the applicable stock price of Leap common stock exceeds approximately \$93.21 per share, the conversion rate will be determined pursuant to a formula based on the base conversion rate and an incremental share factor of 8.3150 shares per \$1,000 principal amount of the notes, subject to adjustment.

Leap may be required to repurchase all outstanding notes in cash at a repurchase price of 100% of the principal amount of the notes, plus accrued and unpaid interest, if any, thereon to the repurchase date if (1) any person acquires beneficial ownership, directly or indirectly, of shares of Leap's capital stock that would entitle the person to exercise 50% or more of the total voting power of all of Leap's capital stock entitled to vote in the election of directors, (2) Leap (i) merges or consolidates with or into any other person, another person merges with or into Leap, or Leap conveys, sells, transfers or leases all or substantially all of its assets to another person or (ii) engages in any recapitalization, reclassification or other transaction in which all or substantially all of Leap common stock is exchanged for or converted into cash, securities or other property, in each case subject to limitations and excluding in the case of (1) and (2) any merger or consolidation where at least 90% of the consideration consists of shares of

common stock traded on NYSE, ASE or NASDAQ, (3) a majority of the members of Leap's board of directors ceases to consist of individuals who were directors on the date of original issuance of the notes or whose election or nomination for election was previously approved by the board of directors, (4) Leap is liquidated or dissolved or holders of common stock approve any plan or proposal for its liquidation or dissolution or (5) shares of Leap common stock are not listed for trading on any of the New York Stock Exchange, the NASDAQ Global Market or the NASDAQ Global Select Market (or any of their respective successors). Leap may not redeem the notes at its option.

Unsecured Senior Notes Due 2015

In June 2008, Cricket issued \$300 million of 10.0% unsecured senior notes due 2015 in a private placement to institutional buyers. The notes bear interest at the rate of 10.0% per year, payable semi-annually in cash in arrears, which interest payments commenced in January 2009. The notes are guaranteed on an unsecured senior basis by Leap and each of its existing and future domestic subsidiaries (other than Cricket, which is the issuer of the notes) that guarantees indebtedness for borrowed money of Leap, Cricket or any subsidiary guarantor. The notes and the guarantees are Leap's, Cricket's and the guarantors' general senior unsecured obligations and rank equally in right of payment with all of Leap's, Cricket's and the guarantors' existing and future unsubordinated unsecured indebtedness. The notes and the guarantees are effectively junior to Leap's, Cricket's and the guarantors' existing and future secured obligations, including those under the senior secured notes described below, to the extent of the value of the assets securing such obligations, as well as to existing and future liabilities of Leap's and Cricket's subsidiaries that are not guarantors (including STX Wireless and Cricket Music Holdco, LLC ("Cricket Music") (a wholly-owned subsidiary of Cricket that holds certain hardware, software and intellectual property relating to Cricket's Muve Music® service)) and Savary Island and their respective subsidiaries. In addition, the notes and the guarantees are senior in right of payment to any of Leap's, Cricket's and the guarantors' future subordinated indebtedness.

The notes may be redeemed, in whole or in part, at any time at a redemption price of 105.0% and 102.5% of the principal amount thereof if redeemed during the twelve months beginning on July 15, 2012 and 2013, respectively, or at 100% of the principal amount if redeemed during the twelve months beginning on July 15, 2014 or thereafter, plus accrued and unpaid interest, if any, thereon to the redemption date. If a "change of control" occurs (which includes the acquisition of beneficial ownership of 35% or more of Leap's equity securities, a sale of all or substantially all of the assets of Leap and its restricted subsidiaries and a change in a majority of the members of Leap's board of directors that is not approved by the board), each holder of the notes may require Cricket to repurchase all of such holder's notes at a purchase price equal to 101% of the principal amount of the notes, plus accrued and unpaid interest, if any, thereon to the repurchase date.

Non-Negotiable Promissory Note Due 2015

Cricket service was previously offered in greater Chicago and Southern Wisconsin by Denali Spectrum, LLC ("Denali"), an entity in which the Company owned an 82.5% non-controlling membership interest. In December 2010, Cricket purchased the remaining 17.5% controlling membership interest in Denali that it did not previously own. As part of the purchase price, Cricket issued a five-year \$45.5 million non-negotiable promissory note in favor of the former holder of such controlling membership interest, which matures on December 27, 2015. Interest on the outstanding principal balance of the note varies from year to year at rates ranging from approximately 5.0% to 8.3% and compounds annually. Under the note, Cricket is required to make principal payments of \$8.5 million per year, with the remaining principal balance and all accrued interest payable at maturity. Cricket's obligations under the note are secured on a first-lien basis by certain assets of Savary Island. In May 2011, Cricket prepaid approximately \$15.1 million in principal amount of the note. As of June 30, 2012 and December 31, 2011, \$21.9 million in principal amount of indebtedness was outstanding under the note.

On November 3, 2011, Savary Island entered into a license purchase agreement with Cellco Partnership d/b/a Verizon Wireless ("Verizon Wireless"), as further discussed in Note 7, in which Savary Island has agreed to sell certain AWS spectrum in various markets to Verizon Wireless for \$172 million. Certain of the spectrum Savary Island has agreed to sell to Verizon Wireless is secured by a lien in favor of the holder of the non-negotiable promissory note. Accordingly, in connection with the closing of the Verizon Wireless transaction, the Company expects to repay the balance of the non-negotiable promissory note in full. The closing of the Verizon Wireless transaction is subject to customary closing conditions, including the consent of the FCC. As the Company expects that the closing of the transaction will occur within a year, it has classified the entire balance of the non-negotiable promissory note as

current maturities of long-term debt on its consolidated balance sheets as of June 30, 2012 and December 31, 2011.

Senior Secured Notes Due 2016

In June 2009, Cricket issued \$1,100 million of 7.75% senior secured notes due 2016 in a private placement to institutional buyers at an issue price of 96.134% of the principal amount, which notes were exchanged in December 2009 for identical notes that had been registered with the SEC. The \$42.5 million discount to the net proceeds the Company received in connection with the issuance of the notes has been recorded in long-term debt, net in the condensed consolidated financial statements and is being accreted as an increase to interest expense over the term of the notes. At June 30, 2012, the effective interest rate on the notes was 7.94%, which includes the effect of the discount accretion.

The notes bear interest at the rate of 7.75% per year, payable semi-annually in cash in arrears, which interest payments commenced in November 2009. The notes are guaranteed on a senior secured basis by Leap and each of its existing and future domestic

subsidiaries (other than Cricket, which is the issuer of the notes) that guarantees any indebtedness of Leap, Cricket or any subsidiary guarantor. The notes and the guarantees are Leap's, Cricket's and the guarantors' senior secured obligations and are equal in right of payment with all of Leap's, Cricket's and the guarantors' existing and future unsubordinated indebtedness.

The notes and the guarantees are effectively senior to all of Leap's, Cricket's and the guarantors' existing and future unsecured indebtedness (including Cricket's \$1,900 million aggregate principal amount of unsecured senior notes and, in the case of Leap, Leap's \$250 million aggregate principal amount of convertible senior notes), as well as to all of Leap's, Cricket's and the guarantors' obligations under any permitted junior lien debt that may be incurred in the future, in each case to the extent of the value of the collateral securing the senior secured notes and the guarantees.

The notes and the guarantees are secured on a pari passu basis with all of Leap's, Cricket's and the guarantors' obligations under any permitted parity lien debt that may be incurred in the future. Leap, Cricket and the guarantors are permitted to incur debt under existing and future secured credit facilities in an aggregate principal amount outstanding (including the aggregate principal amount outstanding of the senior secured notes) of up to the greater of \$1,500 million and 2.5 times Leap's consolidated cash flow (excluding the consolidated cash flow of Savary Island, STX Wireless and Cricket Music) for the prior four fiscal quarters.

The notes and the guarantees are effectively junior to all of Leap's, Cricket's and the guarantors' obligations under any permitted priority debt that may be incurred in the future (up to the lesser of 0.30 times Leap's consolidated cash flow (excluding the consolidated cash flow of Savary Island, STX Wireless and Cricket Music) for the prior four fiscal quarters and \$300 million in aggregate principal amount outstanding), to the extent of the value of the collateral securing such permitted priority debt, as well as to existing and future liabilities of Leap's and Cricket's subsidiaries that are not guarantors (including STX Wireless and Cricket Music) and Savary Island and their respective subsidiaries. In addition, the notes and the guarantees are senior in right of payment to any of Leap's, Cricket's and the guarantors' future subordinated indebtedness.

The notes and the guarantees are secured on a first-priority basis, equally and ratably with any future parity lien debt, by liens on substantially all of the present and future personal property of Leap, Cricket and the guarantors, except for certain excluded assets and subject to permitted liens (including liens on the collateral securing any future permitted priority debt).

The notes may be redeemed, in whole or in part, at any time, at a redemption price of 105.813%, 103.875% and 101.938% of the principal amount thereof if redeemed during the twelve months beginning on May 15, 2012, 2013 and 2014, respectively, or at 100% of the principal amount if redeemed during the twelve months beginning on May 15, 2015 or thereafter, plus accrued and unpaid interest thereon to the redemption date.

If a "change of control" occurs (which includes the acquisition of beneficial ownership of 35% or more of Leap's equity securities (other than a transaction where immediately after such transaction Leap will be a wholly-owned subsidiary of a person of which no person or group is the beneficial owner of 35% or more of such person's voting stock), a sale of all or substantially all of the assets of Leap and its restricted subsidiaries and a change in a majority of the members of Leap's board of directors that is not approved by the board), each holder of the notes may require Cricket to repurchase all of such holder's notes at a purchase price equal to 101% of the principal amount of the notes, plus accrued and unpaid interest thereon to the repurchase date.

Unsecured Senior Notes Due 2020

In November 2010, Cricket issued \$1,200 million of 7.75% unsecured senior notes due 2020 in a private placement to institutional buyers at an issue price of 98.323% of the principal amount, which were exchanged in January 2011 for

identical notes that had been registered with the SEC. The \$20.1 million discount to the net proceeds the Company received in connection with the issuance of the notes has been recorded in long-term debt, net in the condensed consolidated financial statements and is being accreted as an increase to interest expense over the term of the notes. In May 2011, Cricket issued an additional \$400 million of 7.75% unsecured senior notes due 2020 in a private placement to institutional buyers at an issue price of 99.193% of the principal amount, which were exchanged in November 2011 for identical notes that had been registered with the SEC. The \$3.2 million discount to the net proceeds the Company received in connection with the issuance of the additional notes was recorded in long-term debt, net in the condensed consolidated financial statements and is being accreted as an increase to interest expense over the term of the notes. At June 30, 2012, the effective interest rates on the initial \$1,200 million tranche and the additional \$400 million tranche of the notes were 7.87% and 7.81%, respectively, both of which include the effect of the discount accretion.

The notes bear interest at the rate of 7.75% per year, payable semi-annually in cash in arrears, which interest payments commenced in April 2011. The notes are guaranteed on an unsecured senior basis by Leap and each of its existing and future domestic subsidiaries (other than Cricket, which is the issuer of the notes) that guarantees indebtedness of Leap, Cricket or any subsidiary guarantor. The notes and the guarantees are Leap's, Cricket's and the guarantors' general senior unsecured obligations and rank equally in right of payment with all of Leap's, Cricket's and the guarantors' existing and future unsubordinated unsecured

indebtedness. The notes and the guarantees are effectively junior to Leap's, Cricket's and the guarantors' existing and future secured obligations, including those under the senior secured notes described above, to the extent of the value of the assets securing such obligations, as well as to existing and future liabilities of Leap's and Cricket's subsidiaries that are not guarantors (including STX Wireless and Cricket Music) and Savary Island and their respective subsidiaries. In addition, the notes and the guarantees are senior in right of payment to any of Leap's, Cricket's and the guarantors' future subordinated indebtedness.

Prior to October 15, 2013, Cricket may redeem up to 35% of the aggregate principal amount of the notes at a redemption price of 107.750% of the principal amount thereof, plus accrued and unpaid interest, if any, thereon to the redemption date, from the net cash proceeds of specified equity offerings. Prior to October 15, 2015, Cricket may redeem the notes, in whole or in part, at a redemption price equal to 100% of the principal amount thereof plus the applicable premium and any accrued and unpaid interest, if any, thereon to the redemption date. The applicable premium is calculated as the greater of (i) 1.0% of the principal amount of such notes and (ii) the excess of (a) the present value at such date of redemption of (1) the redemption price of such notes at October 15, 2015 plus (2) all remaining required interest payments due on such notes through October 15, 2015 (excluding accrued but unpaid interest to the date of redemption), computed using a discount rate equal to the Treasury Rate plus 50 basis points, over (b) the principal amount of such notes. The notes may be redeemed, in whole or in part, at any time on or after October 15, 2015, at a redemption price of 103.875%, 102.583% and 101.292% of the principal amount thereof if redeemed during the twelve months beginning on October 15, 2015, 2016 and 2017, respectively, or at 100% of the principal amount if redeemed during the twelve months beginning on October 15, 2018 or thereafter, plus accrued and unpaid interest, if any, thereon to the redemption date.

If a "change of control" occurs (which includes the acquisition of beneficial ownership of 35% or more of Leap's equity securities (other than a transaction where immediately after such transaction Leap will be a wholly-owned subsidiary of a person of which no person or group is the beneficial owner of 35% or more of such person's voting stock), a sale of all or substantially all of the assets of Leap and its restricted subsidiaries and a change in a majority of the members of Leap's board of directors that is not approved by the board), each holder of the notes may require Cricket to repurchase all of such holder's notes at a purchase price equal to 101% of the principal amount of the notes, plus accrued and unpaid interest, if any, thereon to the repurchase date.

Note 6. Basic and Diluted Earnings (Loss) Per Share

Basic earnings (loss) per share is computed by dividing net income (loss) attributable to common stockholders by the weighted-average number of common shares outstanding during the period. Diluted earnings per share is computed by dividing net income attributable to common stockholders by the sum of the weighted-average number of common shares outstanding during the period and the weighted-average number of dilutive common share equivalents outstanding during the period, using the treasury stock method and the if-converted method, where applicable. Dilutive common share equivalents are comprised of stock options, restricted stock awards, deferred stock units, employee stock purchase rights and convertible senior notes. Since the Company incurred losses for the three and six months ended June 30, 2012 and 2011, 8.9 million and 9.0 million common share equivalents were excluded in the computation of diluted loss per share, for the three and six months ended June 30, 2012 and 2011, respectively.

Note 7. Significant Acquisitions and Other Transactions

Other Transactions

On April 2, 2012, the Company and Savary Island entered into license exchange agreements with entities affiliated with T-Mobile USA, Inc. (collectively, "T-Mobile"). The transactions would result in the Company acquiring 10 MHz of additional AWS spectrum in Phoenix, Houston and two other Texas markets to supplement the spectrum the Company currently operates in those markets. The Company and Savary Island have agreed to assign T-Mobile spectrum in various markets in Alabama, Illinois, Missouri, Minnesota and Wisconsin. The transactions also include intra-market exchanges between the Company and T-Mobile in Philadelphia, Wilmington, Atlantic City and various markets in Texas and New Mexico. In connection with the closing of these transactions, the Company will cancel a portion of the indebtedness owed by Savary Island to Cricket. The closing of each transaction is subject to customary closing conditions, including the consent of the FCC. The FCC granted its consent to one of these transactions in June 2012. The wireless licenses to be assigned by the Company and Savary Island to T-Mobile have been classified as assets held for sale at their carrying value of \$186.5 million in the Company's condensed consolidated balance sheet as of June 30, 2012.

On November 3, 2011, the Company entered into license purchase agreements to acquire 12 MHz of 700 MHz A block spectrum in Chicago from Verizon Wireless for \$204 million and to sell excess PCS and AWS spectrum in various markets across the U.S. to Verizon Wireless for \$188 million. The closing of both transactions is subject to customary closing conditions, including the consent of the FCC. The Company currently anticipates that both transactions will close simultaneously. The wireless licenses to be sold by the Company to Verizon Wireless have been classified as assets held for sale at their carrying value of \$119.0 million and \$119.1 million in the condensed consolidated balance sheets as of June 30, 2012 and December 31, 2011, respectively.

Also on November 3, 2011, Savary Island entered into a license purchase agreement with Verizon Wireless to sell AWS spectrum in various markets to Verizon Wireless for \$172 million. Savary Island has agreed to use substantially all of the proceeds from this sale to prepay a portion of its indebtedness to Cricket under the Savary Island Credit Agreement at the closing of the transaction. The closing of the transaction is subject to customary closing conditions, including the consent of the FCC. The wireless licenses to be sold by Savary Island to Verizon Wireless have been classified as assets held for sale at their carrying value of \$85.2 million in the condensed consolidated balance sheets as of June 30, 2012 and December 31, 2011.

On February 11, 2011, the Company entered into an agreement with Global Tower, LLC ("GTP") to sell certain of the Company's telecommunications tower assets in one or more closings. During the second and third quarters of 2011, the Company sold those telecommunications towers and related assets for approximately \$25.8 million in cash. The transaction was structured as a sale lease-back financing, in which the Company entered into a 10-year lease agreement with GTP to continue the Company's commercial use of the towers. Accordingly, the Company recorded a capital lease obligation of \$25.8 million, which was equal to the proceeds received from GTP.

STX Wireless Joint Venture

Cricket service is offered in South Texas by the Company's joint venture STX Operations, which Cricket controls through a 75.75% controlling membership interest in its parent company STX Wireless. The joint venture was created in October 2010 through the contribution by the Company and various entities doing business as Pocket Communications ("Pocket") of substantially all of their respective wireless spectrum and operating assets in the South Texas region. In exchange for such contributions, Cricket received a 75.75% controlling membership interest in STX Wireless and Pocket received a 24.25% non-controlling membership interest. Additionally, in connection with the transaction, the Company made payments to Pocket of approximately \$40.7 million in cash.

The Company accounted for the acquisition of Pocket's business as a business purchase combination in accordance with the authoritative guidance for business combinations, with the Company as the acquirer. The consideration provided to Pocket in exchange for Pocket's business, was allocated to the tangible and intangible assets acquired and liabilities assumed by STX Wireless based on their fair values as of October 1, 2010. The excess of the purchase price over the fair values of the net assets acquired was recorded as goodwill.

Pocket's 24.25% non-controlling membership interest in STX Wireless was recorded in mezzanine equity as a component of redeemable non-controlling interests. The non-controlling interest was initially recognized as part of the purchase accounting in the amount of \$51.5 million. The \$51.5 million amount comprised the sum of Pocket's proportionate share (24.25%) of the fair value in the business contributed to the joint venture by Pocket plus its proportionate share (24.25%) of the net equity of the business contributed by Cricket.

Cricket controls and manages the joint venture under the terms of the amended and restated limited liability company agreement (the "STX LLC Agreement"). Under the STX LLC Agreement, Pocket has the right to put, and the Company has the right to call, all of Pocket's membership interests in STX Wireless, which rights are generally exercisable on or after April 1, 2014. In addition, in the event of a change of control of Leap, Pocket is obligated to sell to the Company all of its membership interests in STX Wireless. The purchase price for Pocket's membership interests would be equal to 24.25% of the product of Leap's enterprise value-to-revenue multiple for the four most recently completed fiscal quarters multiplied by the total revenues of STX Wireless and its subsidiaries over that same period, subject to adjustment in certain circumstances. In the event optional cash distributions are made to the members of STX Wireless pursuant to the STX LLC Agreement, the purchase price is reduced by the total amount of such distributions made to Pocket plus an amount equal to an 8.0% per annum return on each such distribution from the date it was made. The purchase price is payable in either cash, Leap common stock or a combination thereof, as determined by Cricket in its discretion (provided that, if permitted by Cricket's debt instruments, at least \$25 million of the purchase price must be paid in cash). The Company has the right to deduct from or set off against the purchase price certain distributions made to Pocket, as well as any obligations owed to the Company by Pocket. Under the STX LLC Agreement, Cricket is permitted to purchase Pocket's membership interests in STX Wireless over multiple closings in the event that the block of shares of Leap common stock issuable to Pocket at the closing of the purchase would be greater than 9.9% of the total number of shares of Leap common stock then issued and outstanding.

To the extent the redemption price for Pocket's non-controlling membership interest varies from the value of Pocket's net interest in STX Wireless at any period (after the attribution of profits or losses), the value of such interest is accreted to the redemption price for such interest with a corresponding adjustment to additional paid-in capital. For the six months ended June 30, 2012 and for the year ended December 31, 2011, the Company recorded a net accretion benefit of approximately \$2.2 million and \$8.9 million, respectively, to bring the carrying value of Pocket's membership interests in STX Wireless to its estimated redemption value.

In accordance with the STX LLC Agreement, STX Wireless made pro-rata tax distributions of \$2.7 million and \$1.0 million to Cricket and Pocket, respectively, in connection with their estimated tax liabilities resulting from STX Wireless' earnings for the six months ended June 30, 2012. During the six months ended June 30, 2011, STX Wireless made similar pro-rata tax distributions of \$5.7 million and \$1.7 million to Cricket and Pocket, respectively. The Company recorded these tax distributions to Pocket as an adjustment to additional paid-in-capital in the condensed consolidated balance sheets and as a component of accretion of redeemable non-controlling interests and distributions, net of tax, in the condensed consolidated statements of comprehensive income. The distributions made to Cricket were eliminated in consolidation.

Subsequent to the end of the quarter, on July 12, 2012, STX Wireless made an optional pro-rata cash distribution of \$50.7 million and \$16.2 million to Cricket and Pocket, respectively. Under the STX LLC Agreement, this optional distribution to Pocket (plus an annual return, as discussed above), is deducted from the purchase price payable to Pocket in the event of a put, call or mandatory buyout following a change of control of Leap.

At the closing of the formation of the joint venture, STX Wireless entered into a loan and security agreement with Pocket pursuant to which, commencing in April 2012, STX Wireless agreed to make quarterly limited-recourse loans to Pocket out of excess cash in an aggregate principal amount not to exceed \$30 million, which loans are secured by Pocket's membership interests in STX Wireless. As of June 30, 2012, Pocket had approximately \$3.8 million in outstanding borrowings under the loan and security agreement. Borrowings under the loan and security agreement bear interest at 8.0% per annum, compounded annually, and will mature on the earlier of October 2020 and the date on which Pocket ceases to hold any membership interests in STX Wireless. Cricket has the right to set off all outstanding principal and interest under this loan and security agreement against the payment of the purchase price for Pocket's membership interests in STX Wireless in the event of a put, call or mandatory buyout following a change of control of Leap. Accordingly, outstanding borrowings and accrued interest under the loan and security agreement have been

recorded as a deduction from the purchase price payable to Pocket as discussed above in the condensed consolidated balance sheets and as a component of accretion of redeemable non-controlling interests and distributions, net of tax, in the condensed consolidated statements of comprehensive income. The offset of the outstanding borrowings and accrued interest against the purchase price for Pocket's membership interest, coupled with the accretion benefit recorded to adjust the redemption value of Pocket's net interest in STX Wireless, brought the carrying value of Pocket's membership interests in STX Wireless to an estimated redemption value of \$84.6 million and \$90.7 million as of June 30, 2012 and December 31, 2011, respectively.

In a separate transaction, on January 3, 2011, the Company acquired Pocket's customer assistance call center for \$850,000. The Company accounted for this transaction as a business purchase combination in accordance with the authoritative guidance for business combinations. A portion of the purchase price was assigned to property and equipment and the remaining amount was allocated to goodwill.

During 2011, the Company completed the integration of Cricket and Pocket operating assets in the South Texas region to enable the combined network and retail operations of the STX Wireless joint venture to operate more efficiently. During the three and six months ended June 30, 2011, the Company incurred approximately \$631,000 of such integration costs, which were recorded in impairments and other charges within the Company's condensed consolidated statements of comprehensive income.

Savary Island Venture

Cricket owns an 85% non-controlling membership interest in Savary Island, which holds wireless spectrum in the upper Midwest portion of the U.S. and which leases a portion of that spectrum to Cricket. Cricket service was previously offered in greater Chicago and Southern Wisconsin by Denali, an entity in which the Company owned an 82.5% non-controlling membership interest. In December 2010, Cricket purchased the remaining 17.5% controlling membership interest in Denali that it did not previously own. Immediately prior to such purchase, Denali contributed all of its wireless spectrum outside of the Chicago and Southern Wisconsin operating markets and a related spectrum lease to Savary Island, a newly formed venture, in exchange for an 85% non-controlling membership interest. Savary Island acquired this spectrum as a "very small business" designated entity under FCC regulations. Ring Island Wireless, LLC ("Ring Island") contributed \$5.1 million of cash to Savary Island in exchange for a 15% controlling membership interest. On March 31, 2011, Denali and its subsidiaries were merged with and into Cricket, with Cricket as the surviving entity.

Under the amended and restated limited liability company agreement of Savary Island (the "Savary Island LLC Agreement"), Ring Island had the right to put its entire controlling membership interest in Savary Island to Cricket during the 30-day period commencing on May 1, 2012. Ring Island exercised this put right on May 14, 2012. The purchase price for such sale is an amount equal to Ring Island's equity contributions to Savary Island of \$5.1 million less any optional distributions made pursuant to the Savary Island LLC Agreement, plus \$150,000 if the sale is consummated prior to May 1, 2017 without incurring any unjust enrichment payments. The consummation of the sale is subject to customary closing conditions, including FCC approval. The Company has recorded this obligation to purchase Ring Island's controlling membership interest in Savary Island as a component of redeemable non-controlling interest in the condensed consolidated balance sheets. Savary Island has guaranteed Cricket's put obligations under the Savary Island LLC Agreement, which guaranty is secured on a first-lien basis by certain assets of Savary Island. Under the Savary Island LLC Agreement, Savary Island is also required to make monthly mandatory distributions to Ring Island. Savary Island is also party to a management services agreement with Cricket, pursuant to which Cricket provides management services to Savary Island in exchange for a management fee.

The Company attributes profits and losses to Ring Island's redeemable non-controlling interest each reporting period. To the extent that the redemption price for Ring Island's controlling membership interest exceeds the value of Ring Island's net interest in Savary Island at any period (after the attribution of profits or losses), the value of such interest is accreted to the redemption price for such interest with a corresponding adjustment to additional paid-in capital. However, the Company would not reduce the carrying amount of the redeemable non-controlling interest below the redemption price. Both the attribution of profit or loss and the accretion of the redeemable non-controlling interest are presented as a component of accretion of redeemable non-controlling interests and distributions, net of tax, in the condensed consolidated statements of comprehensive income. As of June 30, 2012 and December 31, 2011, this redeemable non-controlling interest had a carrying value of \$5.3 million.

At the closing of the formation of the venture, Savary Island assumed \$211.6 million of the outstanding loans then owed by Denali and its subsidiaries to Cricket. In connection with Savary Island's assumption of such loans, Cricket, Savary Island and Savary Island's subsidiaries entered into an amended and restated senior secured credit agreement, dated as of December 27, 2010 (the "Savary Island Credit Agreement") to amend and restate the terms of the Denali senior secured credit agreement applicable to the assumed loans. Under the Savary Island Credit Agreement, Cricket

also agreed to loan Savary Island up to an additional \$5.0 million to fund its working capital needs. In connection with the closing of a prior license exchange transaction with T-Mobile on November 30, 2011, Savary Island assigned 10 MHz of unused wireless spectrum in Indianapolis, IN and Minneapolis, MN to T-Mobile and Cricket canceled \$41.1 million in principal amount of indebtedness owed by Savary Island under the Savary Island Credit Agreement. As of June 30, 2012 and December 31, 2011, borrowings outstanding under the Savary Island Credit Agreement (excluding accrued interest) totaled \$170.5 million. Loans under the Savary Island Credit Agreement (including the assumed loans) accrue interest at the rate of 9.5% per annum and such interest is added to principal annually. All outstanding principal and accrued interest is due in May 2021. Outstanding principal and accrued interest are due in quarterly installments commencing May 2018. Savary Island may prepay loans under the Savary Island Credit Agreement at any time without premium or penalty. The obligations of Savary Island and its subsidiaries under the Savary Island Credit Agreement are secured by all of the personal property, fixtures and owned real property of Savary Island and its subsidiaries, subject to certain permitted liens. The Savary Island Credit Agreement and the related security agreements contain customary representations, warranties, covenants and conditions.

Note 8. Arrangements with Variable Interest Entities and Joint Ventures

As described in Note 2, the Company consolidates its non-controlling membership interest in Savary Island in accordance with the authoritative guidance for the consolidation of variable interest entities because Savary Island is a variable interest entity and, among other things, the Company has entered into an agreement with Savary Island's other member which establishes a specified purchase price in the event that Ring Island exercised its right to sell its membership interest to the Company. Also, as described in Note 2, the Company consolidates its controlling membership interest in STX Wireless in accordance with the authoritative guidance for consolidations based on the voting interest model. All intercompany accounts and transactions have been eliminated in the condensed consolidated financial statements.

The aggregate carrying amount and classification of the assets and liabilities of Savary Island, excluding intercompany accounts and transactions, as of June 30, 2012 and December 31, 2011 are presented in the table below (in thousands):

	June 30, 2012	December 31, 2011
Assets		
Cash and cash equivalents	\$ 10,664	\$ 7,084
Wireless licenses	34,022	41,947
Assets held for sale (1)	\$ 93,115	\$ 85,190
Total assets	\$ 137,801	\$ 134,221
Liabilities		
Other current liabilities	\$ —	\$ 5
Total liabilities	\$ —	\$ 5

Represents the carrying value of wireless licenses to be sold to Verizon Wireless and assigned to T-Mobile at the (1) closings under the license purchase and exchange agreements discussed in "Note 7. Significant Acquisitions and Other Transactions."

The following table provides a summary of the changes in value of the Company's redeemable non-controlling interests (in thousands):

	Six Months Ended June 30,	
	2012	2011
Beginning balance, January 1	\$ 95,910	\$ 104,788
Accretion of redeemable non-controlling interests, before tax	(1,720) 14,796
Loans made to joint venture partner	(3,750) —
Other	(546) (524
Ending balance, June 30,	\$ 89,894	\$ 119,060

Note 9. Unrestricted Subsidiaries

In July 2011, the Company's board of directors designated Cricket Music and Cricket Music's wholly-owned subsidiary Muve USA, LLC ("Muve USA") as "Unrestricted Subsidiaries" under the indentures governing Cricket's senior notes. Muve USA holds certain hardware, software and intellectual property relating to Cricket's Muve Music service. The financial position and results of operations of Cricket Music and Muve USA are included in the Company's condensed consolidated financial statements included in this report. Together with STX Wireless and Savary Island, Cricket Music and Muve USA and their subsidiaries are presented as "Non-Guarantors" within the Company's

condensed consolidating financial statements included in Note 12.

As required by the indentures governing Cricket's senior notes, the Company is presenting the aggregate carrying amount and classification of the components of the financial position as of June 30, 2012 and December 31, 2011 and results of operations of Cricket Music and Muve USA for the three and six months ended June 30, 2012 in the following tables separately (in thousands):

	June 30, 2012	December 31, 2011
Assets		
Cash and cash equivalents	\$—	\$1
Property and equipment, net	7,186	9,435
Total assets	\$7,186	\$9,436

	Three Months Ended June 30, 2012	Six Months Ended June 30, 2012
Revenues	\$—	\$—
Operating expenses		
Depreciation and amortization	\$1,124	\$2,248
Other	1	5
Total operating expenses	1,125	2,253
Operating loss	(1,125)	(2,253)
Net loss	\$(1,125)	\$(2,253)

Note 10. Income Taxes

The computation of the Company's annual effective tax rate includes a forecast of the Company's estimated "ordinary" income (loss), which is its annual income (loss) from continuing operations before tax, excluding unusual or infrequently occurring (discrete) items. Significant management judgment is required in projecting the Company's ordinary income (loss). The Company's projected ordinary income tax expense for the full year 2012 consists primarily of the deferred tax effect of the Company's investments in joint ventures that are in a deferred tax liability position and the amortization of wireless licenses for income tax purposes. Because the Company's projected 2012 income tax expense is a relatively fixed amount, a small change in the ordinary income (loss) projection can produce a significant variance in the effective tax rate, therefore making it difficult to determine a reliable estimate of the annual effective tax rate. As a result, and in accordance with the authoritative guidance for accounting for income taxes in interim periods, the Company has computed its provision for income taxes as of and for the three and six months ended June 30, 2012 and 2011 by applying the actual effective tax rate to the year-to-date income (loss).

The Company periodically assesses the likelihood that its deferred tax assets will be recoverable from future taxable income. Deferred tax liabilities associated with wireless licenses and investments in certain joint ventures cannot be considered a source of taxable income to support the realization of deferred tax assets because these deferred tax liabilities will not reverse until some indefinite future period when these assets are either sold or impaired for book purposes. To the extent the Company believes it is more likely than not that its deferred tax assets will not be recovered, it must establish a valuation allowance. As part of this periodic assessment for the three and six months ended June 30, 2012, the Company weighed the positive and negative factors and, at this time, does not believe there is sufficient positive evidence to support a conclusion that it is more likely than not that all or a portion of its deferred

tax assets will be realized, except with respect to the realization of a \$1.9 million Texas Margins Tax ("TMT") credit. Accordingly, at June 30, 2012 and December 31, 2011, the Company recorded a valuation allowance offsetting substantially all of its deferred tax assets.

The Company has substantial federal and state net operating losses ("NOLs") for income tax purposes. Subject to certain requirements, the Company may "carry forward" its federal NOLs for up to 20 years to offset future taxable income and reduce its income tax liability. For state income tax purposes, the NOL carryforward period ranges from five to 20 years. As of June 30, 2012, the Company had federal and state NOLs of approximately \$2.6 billion which begin to expire in 2022 for federal income

tax purposes and of which \$37.2 million will expire at the end of 2012 for state income tax purposes. While these NOL carryforwards have a potential to be used to offset future ordinary taxable income and reduce future cash tax liabilities by approximately \$991.4 million, the Company's ability to utilize these NOLs will depend upon the availability of future taxable income during the carryforward period and, as such, there is no assurance the Company will be able to realize such tax savings.

The Company's ability to utilize NOLs could be further limited if it were to experience an "ownership change," as defined in Section 382 of the Internal Revenue Code and similar state provisions. In general terms, an ownership change can occur whenever there is a cumulative shift in the ownership of a company by more than 50 percentage points by one or more "5% stockholders" within a three-year period. The occurrence of such a change generally limits the amount of NOL carryforwards a company could utilize in a given year to the aggregate fair market value of the company's common stock immediately prior to the ownership change, multiplied by the long-term tax-exempt interest rate in effect for the month of the ownership change.

The determination of whether an ownership change has occurred for purposes of Section 382 is complex and requires significant judgment. The occurrence of such an ownership change would accelerate cash tax payments the Company would be required to make and likely result in a substantial portion of its NOLs expiring before the Company could fully utilize them.

On August 30, 2011, the Company's board of directors adopted a Tax Benefit Preservation Plan to help deter acquisitions of Leap common stock that could result in an ownership change under Section 382 and thus help preserve the Company's ability to use its NOL carryforwards. The Tax Benefit Preservation Plan was approved by the Company's stockholders in May 2012. The Tax Benefit Preservation Plan is designed to deter acquisitions of Leap common stock that would result in a stockholder owning 4.99% or more of Leap common stock (as calculated under Section 382), or any existing holder of 4.99% or more of Leap common stock acquiring additional shares, by substantially diluting the ownership interest of any such stockholder unless the stockholder obtains an exemption from the Company's board of directors.

The Company's unrecognized income tax benefits and uncertain tax positions, as well as any associated interest and penalties, are recorded through income tax expense; however, such amounts have not been significant in any period.

Note 11. Commitments and Contingencies

As more fully described below, the Company is involved in a variety of lawsuits, claims, investigations and proceedings concerning intellectual property, commercial, business practices and other matters. Due in part to the expansion and development of its business operations, the Company has become subject to increased amounts of litigation, including disputes alleging intellectual property infringement.

The Company believes that any damage amounts alleged by plaintiffs are not necessarily meaningful indicators of its potential liability. The Company determines whether it should accrue an estimated loss for a contingency in a particular legal proceeding by assessing whether a loss is deemed probable and whether the amount can be reasonably estimated. Unless otherwise indicated, the Company cannot reasonably estimate the possible loss or range of losses for the matters discussed below. The Company reassesses its views on estimated losses on a quarterly basis to reflect the impact of any developments in the matters in which it is involved.

Legal proceedings are inherently unpredictable, and the matters in which the Company is involved often present complex legal and factual issues. The Company vigorously pursues defenses in legal proceedings and engages in discussions where possible to resolve these matters on favorable terms. The Company's policy is to recognize legal costs as incurred. It is possible, however, that the Company's business, financial condition and results of operations in

future periods could be materially adversely affected by increased litigation expense, significant settlement costs and/or unfavorable damage awards.

Patent Litigation

On June 14, 2012, a matter brought against the Company by Realtime Data, LLC ("Realtime") on September 23, 2010 in the United States District Court for the Eastern District of Texas was dismissed with prejudice in connection with a settlement between the parties. Realtime had alleged that the Company and the other defendants, which included AT&T, Verizon Wireless, Sprint, T-Mobile and MetroPCS, each infringed U.S. Patent Nos. 7,161,506, 7,321,937, 7,352,300 and 7,415,530 through their use of third-party compression software and servers for data optimization over their networks. The complaint sought unspecified monetary damages as well as costs and attorneys' fees.

Other Litigation, Claims and Disputes

In addition to the matter described above, the Company is often involved in certain other matters which generally arise in the ordinary course of business and which seek monetary damages and other relief. Based upon information currently available to the Company, none of these other matters is expected to have a material adverse effect on the Company's business, financial condition or results of operations.

Indemnification Agreements

From time to time, the Company enters into indemnification agreements with certain parties in the ordinary course of business, including agreements with manufacturers, licensors and suppliers who provide it with equipment, software and technology that it uses in its business, as well as with purchasers of assets, lenders, lessors and other vendors. Indemnification agreements are generally entered into in commercial and other transactions in an attempt to allocate potential risk of loss.

Wholesale Agreement

In August 2010, the Company entered into a wholesale agreement with an affiliate of Sprint Nextel which the Company uses to offer Cricket services in nationwide retailers outside of the Company's current network footprint. The initial term of the wholesale agreement runs until December 31, 2015, and automatically renews for successive one-year periods unless either party provides 180-day advance notice to the other. Under the agreement, the Company pays Sprint a specified amount per month for each subscriber activated on its network, subject to periodic market-based adjustments. The Company agreed to provide Sprint with a minimum of \$300 million of revenue under the agreement, as amended, over the initial five-year term (against which the Company can credit up to \$100 million of revenue under other existing commercial arrangements between the companies), with a minimum of \$20 million of revenue to be provided in 2011, a minimum of \$75 million of revenue to be provided in 2012, a minimum of \$80 million of revenue to be provided in 2013, a minimum of \$75 million of revenue to be provided in 2014 and a minimum of \$50 million of revenue to be provided in 2015. Any revenue provided by the Company in a given year above the minimum revenue commitment for that particular year is credited to the next succeeding year. However, to the extent the Company's revenues were to fall beneath the applicable commitment amount for any given year, excess revenues from a subsequent year could not be carried back to offset such shortfall. The Company's obligation to provide the minimum revenue amount for any calendar year is subject to Sprint's compliance with specified covenants in the wholesale agreement. Based upon a review of information provided to the Company by Sprint, the Company recently informed Sprint that certain of those covenants had not been met and that, as a result, the Company is not subject to the minimum revenue commitment for 2012. Sprint has disputed that assertion.

In addition, in the event Leap is involved in a change-of-control transaction with another facilities-based wireless carrier with annual revenues of at least \$500 million in the fiscal year preceding the date of the change of control agreement (other than MetroPCS Communications, Inc. ("MetroPCS")), either the Company (or the Company's successor in interest) or Sprint may terminate the wholesale agreement within 60 days following the closing of such a transaction. In connection with any such termination, the Company (or its successor in interest) would be required to pay to Sprint a specified percentage of the remaining aggregate minimum revenue commitment, with the percentage to be paid depending on the year in which the change of control agreement was entered into, being 30% for any such agreement entered into in 2012, 20% for any such agreement entered into in 2013 and 10% for any such agreement entered into in 2014 or 2015.

In the event that Leap is involved in a change-of-control transaction with MetroPCS during the term of the wholesale agreement, then the agreement would continue in full force and effect, subject to certain revisions, including, without limitation, an increase to the total minimum revenue commitment to \$350 million, taking into account any revenue

contributed by Cricket prior to the date thereof.

In the event Sprint is involved in a change-of-control transaction, the agreement would bind Sprint's successor-in-interest.

iPhone Purchase Commitment

In May 2012, the Company entered into a three-year minimum purchase commitment with Apple Inc. to purchase iPhones. The commitment began upon the Company's launch of sales of the iPhone in certain markets in June 2012 and is currently estimated to be approximately \$900 million, with annual commitments during the three-year period that increase moderately in the second and third years. The actual amount that the Company spends over the term of the commitment will depend on many factors, including customer acceptance and availability of current and future versions of the device and costs for the device.

Note 12. Guarantor Financial Information

The \$3,000 million of senior notes issued by Cricket (the “Issuing Subsidiary”) are comprised of \$300 million of unsecured senior notes due 2015, \$1,100 million of senior secured notes due 2016 and \$1,600 million of unsecured senior notes due 2020. The notes are jointly and severally guaranteed on a full and unconditional basis by Leap (the “Guarantor Parent Company”) and Cricket License Company, LLC, a wholly-owned subsidiary of Cricket (the “Guarantor Subsidiary”).

The indentures governing these notes limit, among other things, the Guarantor Parent Company's, Cricket's and the Guarantor Subsidiary's ability to: incur additional debt; create liens or other encumbrances; place limitations on distributions from restricted subsidiaries; pay dividends; make investments; prepay subordinated indebtedness or make other restricted payments; issue or sell capital stock of restricted subsidiaries; issue guarantees; sell assets; enter into transactions with affiliates; and make acquisitions or merge or consolidate with another entity.

Condensed consolidating financial information of the Guarantor Parent Company, the Issuing Subsidiary, the Guarantor Subsidiary, Non-Guarantor Subsidiaries (STX Wireless, Savary Island, Cricket Music and their respective subsidiaries) and total consolidated Leap and subsidiaries as of June 30, 2012 and December 31, 2011 and for the three and six months ended June 30, 2012 and 2011 is presented below. The equity method of accounting is used to account for ownership interests in subsidiaries, where applicable.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

As used in this report, unless the context suggests otherwise, the terms “we,” “our,” “ours,” “us,” and the “Company” refer to Leap Wireless International, Inc., or Leap, and its subsidiaries and consolidated joint ventures, including Cricket Communications, Inc., or Cricket. Unless otherwise specified, information relating to population and potential customers, or POPs, is based on 2012 population estimates provided by Claritas Inc., a market research company.

The following information should be read in conjunction with the unaudited condensed consolidated financial statements and notes thereto included in Part I— Item 1 of this Quarterly Report and the audited consolidated financial statements and notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended December 31, 2011 filed with the SEC on February 21, 2012.

Cautionary Statement Regarding Forward-Looking Statements

Except for the historical information contained herein, this report contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements reflect management's current forecast of certain aspects of our future. You can generally identify forward-looking statements by forward-looking words such as “believe,” “think,” “may,” “could,” “will,” “estimate,” “continue,” “anticipate,” “intend,” “seek,” “plan,” “project,” “should,” “would” and similar expressions in this report. Such statements are based on currently available operating, financial and competitive information and are subject to various risks, uncertainties and assumptions that could cause actual results to differ materially from those anticipated in or implied by our forward-looking statements. Such risks, uncertainties and assumptions include, among other things:

- our ability to attract and retain customers in an extremely competitive marketplace;
- the duration and severity of the current economic downturn in the United States and changes in economic conditions, including interest rates, consumer credit conditions, consumer debt levels, consumer confidence, unemployment rates, energy and transportation costs and other macro-economic factors that could adversely affect demand for the services we provide;
- the impact of competitors' initiatives;
- our ability to successfully implement product and service plan offerings, enhance our retail distribution and execute effectively on our other strategic activities;
- our ability to obtain and maintain roaming and wholesale services from other carriers at cost-effective rates;
- our ability to maintain effective internal control over financial reporting;
- our ability to attract, integrate, motivate and retain an experienced workforce, including members of senior management;
- future customer usage of our wireless services, which could exceed our expectations, and our ability to manage or increase network capacity to meet increasing customer demand, in particular demand for data services;
- our ability to acquire or obtain access to additional spectrum in the future at a reasonable cost or on a timely basis;
- our ability to refinance our indebtedness under, and comply with the covenants in, any credit agreement, indenture or similar instrument governing any of our existing or future indebtedness;
- failure of our network or information technology systems to perform according to expectations and risks associated with the upgrade or transition of certain of those systems, including our customer billing system; and
- other factors detailed in “Part II - Item 1A. Risk Factors” below.

All forward-looking statements in this report should be considered in the context of these risk factors. These forward-looking statements speak only as of the filing date of this report, and we undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. In light of these risks and uncertainties, the forward-looking events and circumstances discussed in this report may not occur and actual results could differ materially from those anticipated or implied in the forward-looking statements.

Accordingly, users of this report are cautioned not to place undue reliance on the forward-looking statements.

Overview

Company Overview

We are a wireless communications carrier that offers digital wireless services in the U.S. under the “Cricket®” brand. Our Cricket service offerings provide customers with unlimited nationwide wireless services for a flat rate without requiring a fixed-term contract or a credit check.

Cricket service is offered by Cricket, a wholly-owned subsidiary of Leap. Cricket service is also offered in South Texas by our joint venture, STX Wireless Operations, LLC, or STX Operations, which Cricket controls through a 75.75% controlling membership interest in its parent company STX Wireless, LLC, or STX Wireless. In addition, Cricket owns an 85% non-controlling membership interest in Savary Island Wireless, LLC, or Savary Island, which holds wireless spectrum in the upper Midwest portion of the U.S. and which leases a portion of that spectrum to us. For more information regarding the ventures described above, see “—Capital Expenditures, Significant Acquisitions and Other Transactions” below.

As of June 30, 2012, Cricket service was offered in 48 states and the District of Columbia across an extended area covering approximately 290 million POPs. As of June 30, 2012, we had approximately 5.9 million customers, and we and Savary Island owned wireless licenses covering an aggregate of approximately 181.5 million POPs (adjusted to eliminate duplication from overlapping licenses). The combined network footprint in our operating markets covered approximately 95.4 million POPs as of June 30, 2012. The licenses we own provide 20 MHz of coverage and the opportunity to offer enhanced data services in almost all markets in which we currently operate.

In addition to our Cricket network footprint, we have entered into roaming relationships with other wireless carriers that enable us to offer Cricket customers nationwide voice and data roaming services over an extended service area. We have also entered into a wholesale agreement which we use to offer Cricket services in nationwide retailers outside of our current network footprint. These arrangements have enabled us to offer enhanced Cricket products and services, continue to strengthen our growing retail presence in our existing markets and expand our distribution nationwide in thousands of mass-market retail locations. Since originally introducing products in nationwide retailers in September 2011, we have determined to focus our efforts on those retailers which we believe provide the most attractive opportunities for our business. As a result, we expect to reduce our total presence in the nationwide retail channel from approximately 13,000 locations at June 30, 2012 to approximately 8,000 locations by the end of 2012.

The foundation of our business is to provide unlimited, nationwide wireless services and to design and market our products and services to appeal to customers seeking increased value. None of our services require customers to enter into long-term commitments or pass a credit check. The service plans we currently offer are “all-inclusive,” with telecommunication taxes and certain fees included within the service plan price. We introduced these “all-inclusive” service plans together with smartphones in August 2010 and we introduced our Muve Music® service (an unlimited music download service designed specifically for mobile handsets) in early 2011. In May 2012, we announced the addition of the iPhone® 4 and 4S to our handset portfolio, which became available in certain markets in June 2012. We believe these changes made our services more attractive to customers, improved our competitive positioning in the marketplace and improved our financial and operational performance. Since their introduction, these initiatives have generally led to higher average monthly revenue per customer and lower churn, although they have also resulted in increased costs, including equipment subsidy for new and upgrading customers and incremental service costs. On balance, we believe that the changes we implemented to our product and service offerings have strengthened our business and are leading to greater lifetime customer value. The extent to which these initiatives will positively impact our future financial and operational results will depend upon our efforts to enhance our retail distribution, continued customer acceptance of our product and service offerings and our ability to retain these customers. The evolving competitive landscape may result in more competitive pricing, slower growth, higher costs and increased customer

turnover. Any of these results or actions could have a material adverse effect on our business, financial condition and operating results.

We are continuing to pursue investment initiatives to enhance our network coverage and capacity. We plan to offer next-generation LTE network technology services to customers in at least two-thirds of our network footprint over the next two to three years. We plan to cover up to approximately 21 million POPs with LTE in 2012. We are continuing to explore cost-effective ways to deliver LTE services to our customers, including by deploying facilities-based coverage and by entering into partnerships or joint ventures with other carriers. Other investment initiatives include the ongoing maintenance and development of our network and other business assets to allow us to continue to provide customers with high-quality service. We intend to be disciplined as we pursue any investment initiatives and to remain focused on our position as a low-cost provider of wireless telecommunications.

Our customer activity is influenced by seasonal effects related to traditional retail selling periods and other factors that arise in connection with our target customer base. Based on historical results, we generally expect new sales activity to be highest in the

first and fourth quarters, and churn to be highest in the third quarter and lowest in the first quarter. Sales activity and churn, however, can be strongly affected by other factors, including changes in service plan pricing, device availability, economic conditions, high unemployment (particularly in the lower-income segment of our customer base), competitive actions, and the relative amount of time a market has been in operation, any of which may either offset or magnify certain seasonal effects. Customer activity can also be strongly affected by promotional efforts that we may undertake. For example, we frequently offer existing customers the opportunity to activate an additional line of voice service on a previously activated Cricket device not currently in service. Customers accepting this offer receive a free first month of service on the additional line of service after paying an activation fee. In addition, from time to time, we offer port-in promotions in which we lower the price on select smartphones, which is intended to drive significant, new customer activity for our smartphone handsets and their accompanying higher-priced service plans. We believe that promotional activity can provide important long-term benefits to us, including by helping us attract new customers for our wireless services or by extending the period of time over which customers use our services. The success of any of our promotional efforts depends upon many factors, including the cost that we incur to attract or retain customers and the length of time these customers continue to use our services. Sales activity that would otherwise have been expected based on seasonal trends can also be negatively impacted by factors such as the billing system disruptions we experienced in 2011 and the inventory shortages for certain of our strongest-selling devices we have experienced at various times.

Our principal sources of liquidity are our existing unrestricted cash, cash equivalents and short-term investments and cash generated from operations. From time to time we may generate additional liquidity through capital markets transactions and asset sales. We expect to refinance all or substantially all of our senior indebtedness due between 2014 and 2016 by accessing the capital markets from time to time. See “—Liquidity and Capital Resources” below.

Critical Accounting Policies and Estimates

Our discussion and analysis of our results of operations and liquidity and capital resources are based on our condensed consolidated financial statements which have been prepared in accordance with accounting principles generally accepted in the United States of America, or GAAP. These principles require us to make estimates and judgments that affect our reported amounts of assets and liabilities, our disclosure of contingent assets and liabilities and our reported amounts of revenues and expenses. On an ongoing basis, we evaluate our estimates and judgments, including those related to revenue recognition and the valuation of deferred tax assets, long-lived assets and indefinite-lived intangible assets. We base our estimates on historical and anticipated results and trends and on various other assumptions that we believe are reasonable under the circumstances, including assumptions as to future events. These estimates form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. By their nature, estimates are subject to an inherent degree of uncertainty. Actual results may differ from our estimates. Since the filing of our Annual Report on Form 10-K for the year ended December 31, 2011 on February 21, 2012, there have been no significant changes to our critical accounting policies and estimates, except as set forth below:

Revenues

Our business revenues principally arise from the sale of wireless services, devices (handsets and broadband modems) and accessories. Wireless services are provided primarily on a month-to-month basis. Our customers are required to pay for their service in advance and we do not require customers to sign fixed-term contracts or pass a credit check. Service revenues are recognized only after payment has been received and services have been rendered.

When we activate service for a new customer, we often sell that customer a device along with a period of service. In accordance with the authoritative guidance for revenue arrangements with multiple deliverables, the sale of a device

along with service constitutes a multiple element arrangement. Under this guidance, once a company has determined the best estimate of selling price of the elements in the sales transaction, the total consideration received from the customer must be allocated among those elements on a relative selling price basis. Applying the guidance to these transactions results in our recognition of the total consideration received, less amounts allocated to the wireless service period (generally the customer's monthly service plan), as equipment revenue.

Amounts allocated to equipment revenues and related costs from the sale of devices are recognized when service is activated by new customers. Revenues and related costs from the sale of devices and accessories to existing customers are recognized at the point of sale. The costs of devices and accessories sold are recorded in cost of equipment. In addition to devices that we sell directly to our customers at Cricket-owned stores, we sell devices to third-party dealers, including nationwide retailers. These dealers then sell the devices to the ultimate Cricket customer, similar to the sale made at a Cricket-owned store. Sales of devices to third-party dealers are recognized as equipment revenues only when service is activated by customers, since the level of price reductions and commissions ultimately available to such dealers is not reliably estimable until the devices are sold by such dealers

to customers. Thus, revenues from devices sold to third-party dealers are recorded as deferred equipment revenue and the related costs of the devices are recorded as deferred charges upon shipment of the devices by us. The deferred charges are recognized as equipment costs when the related equipment revenue is recognized, which occurs when service is activated by the customer.

During the second half of 2012, we plan to broaden our use of a third-party logistics provider to manage the planning, purchasing and fulfillment of handsets and other devices, whereby our third-party dealers, including nationwide retailers, will increasingly purchase handsets and other devices directly from the logistics provider. Under this arrangement, we, in most cases, will not hold title to, or have ownership in, the related device inventory shipped to our dealers. Accordingly, we will not record deferred equipment revenues or deferred charges on our balance sheet related to devices purchased by third-party dealers. Therefore, upon customer activation of these handsets and other devices, we will no longer record equipment revenue or cost of equipment. Amounts paid to the logistics provider will be recorded as deferred charges upon shipment of devices to the dealers and be recognized in cost of equipment when service is activated by the customer. Handsets and other devices purchased by company-owned stores will continue to be accounted for as inventory and deferred equipment revenues until sold and activated by the customers, at which time, equipment revenues and the related cost of equipment will be recognized.

Through a third-party provider, our customers may elect to participate in an extended warranty program for devices they purchase. We recognize revenue on replacement devices sold to its customers under the program when the customer purchases the device.

Sales incentives offered to customers and commissions and sales incentives offered to our third-party dealers are recognized as a reduction of revenue when the related service or equipment revenue is recognized. Customers have limited rights to return devices and accessories based on time and/or usage, and customer returns of devices and accessories have historically been insignificant.

Amounts that are billed in advance of customers' wireless service periods are not reflected in accounts receivable or deferred revenue since collectability of such amounts is not reasonably assured. Deferred revenue consists primarily of cash received from customers in advance of their service period and deferred equipment revenue related to devices sold to third-party dealers.

Universal Service Fund, E-911 and other telecommunications-related regulatory fees are assessed by various federal and state governmental agencies in connection with the services that we provide to our customers. The service plans we currently offer are "all-inclusive" of telecommunications and regulatory fees, in that we do not separately bill and collect amounts owed and remitted to government agencies from our customers. For our legacy service plans, which are not "all-inclusive," we separately bill and collect from our customers amounts owed and remitted to government agencies. Regulatory fees and telecommunications taxes separately billed and collected from our customers are recorded in service revenues. Amounts owed to government agencies are recorded in cost of service. During the three and six months ended June 30, 2012, the total amount of regulatory fees and telecommunications taxes separately billed and collected from customers and recorded in service revenues was \$2.7 million and \$6.8 million, respectively. During the three and six months ended June 30, 2011, the total amount of regulatory fees and telecommunications taxes separately billed and collected from customers and recorded in service revenues was \$9.5 million and \$20.9 million, respectively. Sales, use and excise taxes for all service plans are reported on a net basis.

Goodwill

We record the excess of the purchase price over the fair value of net assets acquired in a business combination as goodwill. As of June 30, 2012 and December 31, 2011, goodwill of \$31.9 million primarily represented the excess of the purchase price over the fair value of the assets acquired (net of liabilities assumed, including the related deferred

tax effects) by STX Wireless in connection with the formation of the joint venture. For more information regarding the joint venture, see Note 7 to our condensed consolidated financial statements included in “Part I— Item 1. Financial Statements” of this report.

We assess goodwill for impairment annually at the reporting unit level by applying a fair value test during the third quarter of each year. This fair value test involves a two-step process. The first step is to compare the book value of our net assets to their fair value. If the fair value is determined to be less than book value, a second step is performed to measure the amount of impairment, if any. In addition, on a quarterly basis, we evaluate the triggering event criteria outlined in the authoritative guidance to determine whether events or changes in circumstances indicate that an impairment condition may exist.

As of June 30, 2012, we performed our quarterly evaluation which included consideration of whether there had been any significant adverse changes in macroeconomic, industry or market factors or in our business climate, cost factors, unanticipated competition, loss of key personnel or likely sale or disposal of all or a significant portion of a reporting unit. Based upon this evaluation, we concluded that there had not been any triggering events or changes in circumstances that indicated an impairment

condition existed as of June 30, 2012.

The closing price of Leap common stock was \$6.43 on June 29, 2012 and Leap's market capitalization was above our book value as of such date. Since that time, the closing price of Leap common stock has ranged from a high of \$6.68 per share to a low of \$4.49 per share. If the price of Leap common stock continues to trade at or near current levels, we may be required to perform the second step of our third quarter annual goodwill impairment test to determine the fair value of our net assets, which may require us to recognize a non-cash impairment charge for some or all of the \$31.9 million carrying value of our goodwill.

Results of Operations

Operating Items

The following tables summarize operating data for our condensed consolidated operations for the three and six months ended June 30, 2012 and 2011 (in thousands, except percentages):

	Three Months Ended June 30,				Change from Prior Year			
	2012	% of 2012 Service Revenues	2011	% of 2011 Service Revenues	Dollars	Percent

			Amount	Percent
Gross customer additions	1,352,267	1,475,027	(122,760)	(8.3)%
Net customer additions (losses)	(31,210)	227,434	(258,644)	(113.7)%
Weighted-average number of customers	6,008,737	5,708,394	300,343	5.3%
As of June 30, Total customers	5,902,803	5,745,613	157,190	2.7%

(1) We recognize a gross customer addition for each Cricket Wireless, Cricket Broadband and Cricket PAYGo line of service activated by a customer.

Three and Six Months Ended June 30, 2012 Compared to Three and Six Months Ended June 30, 2011

Gross Customer Additions

Gross customer additions for the three months ended June 30, 2012 were 492,720 compared to 622,863 for the corresponding period of the prior year. The 20.9% decrease in the number of gross customer additions was due primarily to promotional activities that did not perform as expected and certain device quality and selection issues.

Gross customer additions for the six months ended June 30, 2012 were 1,352,267 compared to 1,475,027 for the corresponding period of the prior year. The 8.3% decrease in the number of gross customer additions was due primarily to promotional activities that did not perform as expected and certain device quality and selection issues.

Net Customer Additions (Losses)

Net customer losses for the three months ended June 30, 2012 were 289,270 compared to 103,140 for the corresponding period of the prior year. The 180.5% increase in the number of net customer losses was primarily due to the decrease in gross customer additions discussed above, device quality issues and higher churn in some national retail channels.

Net customer losses for the six months ended June 30, 2012 were 31,210 compared to 227,434 net customer activations for the corresponding period of the prior year. The 113.7% change was primarily due to the decrease in gross customer additions discussed above, device quality issues and increase in the number of deactivating customers.

Service Revenues

Service revenues increased \$47.2 million, or 6.7%, for the three months ended June 30, 2012 compared to the corresponding period of the prior year. This increase resulted from a 3.9% increase in the weighted-average number of customers and a 3.7% increase in ARPU, primarily due to increased uptake of our higher-priced service plans for our smartphones and our Muve Music service.

Service revenues increased \$142.8 million, or 10.3%, for the six months ended June 30, 2012 compared to the corresponding period of the prior year. This increase resulted from a 5.3% increase in the weighted-average number of customers, and a 6.0% increase in ARPU, primarily due to increased uptake of our higher-priced service plans for our smartphones and our Muve Music service.

Equipment Revenues

Equipment revenues decreased \$21.0 million, or 37.1%, for the three months ended June 30, 2012 compared to the corresponding period of the prior year. This decrease was due to a 6.6% decrease in the number of devices sold to new and upgrading customers, which was primarily due to our decreased gross customer additions in the current year period as discussed above, as well as a decrease in the average revenue per device sold of 32.7%, which was primarily due to a decrease in the average sales price per device.

Equipment revenues decreased \$70.8 million, or 44.9%, for the six months ended June 30, 2012 compared to the corresponding period of the prior year. This decrease was mainly due to a 46.3% decrease in the average revenue per device sold primarily due to various device promotions offered to new and upgrading customers earlier in the year and increased indirect channel commission and sales incentive costs as we continued to add additional premier dealer locations as part of our sales and distribution strategy to increase our market penetration. This was partially offset by a 2.7% increase in the number of devices sold to new and upgrading customers during the six months ended June 30,

2012.

Cost of Service

Cost of service increased \$11.7 million, or 4.8%, for the three months ended June 30, 2012 compared to the corresponding period of the prior year. As a percentage of service revenues, such expenses decreased to 34.1% from 34.8% in the prior year period. Principal factors contributing to this increase in cost of service were a 3.9% increase in the weighted-average number of customers, which resulted in increased nationwide roaming costs and telecommunication taxes, as well as increased operating costs associated with our Muve Music service.

Cost of service increased \$37.1 million, or 7.7%, for the six months ended June 30, 2012 compared to the corresponding period of the prior year. As a percentage of service revenues, such expenses decreased to 34.0% from 34.8% in the prior year period.

37

Principal factors contributing to this increase in cost of service were a 5.3% increase in the weighted-average number of customers, which resulted in increased nationwide roaming costs and telecommunication taxes, as well as increased operating costs associated with our Muve Music service.

Cost of Equipment

Cost of equipment decreased \$11.0 million, or 6.0%, for the three months ended June 30, 2012 compared to the corresponding period of the prior year. This decrease was primarily due to a 6.6% decrease in the number of devices sold to new and upgrading customers, partially offset by an increase in the average cost per device sold of 0.6%.

Cost of equipment increased \$7.0 million, or 1.7%, for the six months ended June 30, 2012 compared to the corresponding period of the prior year. This increase was primarily due to a 2.7% increase in the number of devices sold to new and upgrading customers, partially offset by a 1.0% decrease in the average cost per device sold.

Selling and Marketing Expenses

Selling and marketing expenses decreased \$9.9 million, or 11.4%, for the three months ended June 30, 2012 compared to the corresponding period of the prior year. As a percentage of service revenues, such expenses decreased to 10.3% from 12.4% in the prior year period. This percentage decrease was largely attributable to the increase in service revenues and consequent benefits of scale, as well as a decrease in selling costs primarily due to the sale and transfer of select company-owned retail locations to indirect dealers, which lowered our fixed costs associated with store facilities and employee-related costs.

Selling and marketing expenses decreased \$24.2 million, or 12.3%, for the six months ended June 30, 2012 compared to the corresponding period of the prior year. As a percentage of service revenues, such expenses decreased to 11.3% from 14.3% in the prior year period. This percentage decrease was largely attributable to the increase in service revenues and consequent benefits of scale, as well as a decrease in selling costs primarily due to the sale and transfer of select company-owned retail locations to indirect dealers, which lowered our fixed costs associated with store facilities and employee-related costs.

General and Administrative Expenses

General and administrative expenses increased \$2.8 million, or 3.1%, for the three months ended June 30, 2012 compared to the corresponding period of the prior year. As a percentage of service revenues, such expenses decreased to 12.6% from 13.1% in the prior year period primarily due to continued benefits from our cost-management initiatives and the increase in service revenues and consequent benefits of scale.

General and administrative expenses decreased \$2.9 million, or 1.5%, for the six months ended June 30, 2012 compared to the corresponding period of the prior year. As a percentage of service revenues, such expenses decreased to 12.1% from 13.6% in the prior year period primarily due to continued benefits from our cost-management initiatives and the increase in service revenues and consequent benefits of scale.

Depreciation and Amortization

Depreciation and amortization expense increased \$18.3 million, or 13.5%, for the three months ended June 30, 2012 compared to the corresponding period of the prior year. The increase in depreciation and amortization expense was due primarily to network upgrades which related, in part, to our deployment of LTE technology.

Depreciation and amortization expense increased \$38.2 million, or 14.5%, for the six months ended June 30, 2012 compared to the corresponding period of the prior year. The increase in depreciation and amortization expense was due primarily to network upgrades which related, in part, to our deployment of LTE technology.

Impairments and Other Charges

During the three and six months ended June 30, 2011, we incurred approximately \$631,000 in costs related to the integration of Cricket and Pocket operating assets in the South Texas region to enable the combined network and retail operations of the STX Wireless joint venture to operate more efficiently. As of December 31, 2011, integration activities were substantially complete.

Loss on Sale or Disposal of Assets, Net

Loss on sale or disposal of assets, net reflected losses of \$0.3 million and \$4.6 million recognized during the three months ended

June 30, 2012 and 2011, respectively, upon the disposal of certain property and equipment.

Loss on sale or disposal of assets, net reflected losses of \$0.8 million and \$5.0 million recognized during the six months ended June 30, 2012 and 2011, respectively, upon the disposal of certain property and equipment.

Non-Operating Items

The following table summarizes non-operating data for our condensed consolidated operations for the three and six months ended June 30, 2012 and 2011 (in thousands):

	Three Months Ended June 30,			
	2012	2011	Change	
Equity in net income (loss) of investees, net	\$(59) \$1,010	\$(1,069)
Interest income	28	59	(31)
Interest expense	(66,983) (61,923) (5,060)
Other expense, net	—	(32) 32)
Income tax expense	(10,562) (9,893) (669)
	Six Months Ended June 30,			
	2012	2011	Change	
Equity in net income of investees, net	\$134	\$2,189	\$(2,055)
Interest income	57	123	(66)
Interest expense	(134,025) (120,742) (13,283)
Other expense, net	—	(32) 32)
Income tax expense	(22,273) (20,647) (1,626)

Three and Six Months Ended June 30, 2012 Compared to Three and Six Months Ended June 30, 2011

Equity in Net Income (Loss) of Investees, Net

Equity in net income (loss) of investees, net reflects our share of net income or losses of regional wireless service providers in which we hold investments.

Interest Expense

Interest expense increased \$5.1 million during the three months ended June 30, 2012 compared to the corresponding period of the prior year. The increase in interest expense resulted primarily from our issuance of \$400 million of additional 7.75% senior notes due 2020 in May 2011, as well as increased interest related to capital leases.

Interest expense increased \$13.3 million during the six months ended June 30, 2012 compared to the corresponding period of the prior year. The increase in interest expense resulted primarily from our issuance of \$400 million of additional 7.75% senior notes due 2020 in May 2011, as well as increased interest related to capital leases.

Income Tax Expense

During the three months ended June 30, 2012, we recorded income tax expense of \$10.6 million compared to income tax expense of \$9.9 million for the three months ended June 30, 2011. The \$0.7 million increase in income tax

expense resulted primarily from a \$0.9 million deferred tax benefit relating to our joint venture investments which was recorded during the three months ended June 30, 2012 compared to a nonrecurring \$1.5 million net tax benefit associated with the dividend received from our investment in an equity method investee recorded during the three months ended June 30, 2011.

During the six months ended June 30, 2012, we recorded income tax expense of \$22.3 million compared to income tax expense of \$20.6 million for the six months ended June 30, 2011. The \$1.7 million increase in income tax expense was primarily due to a nonrecurring \$1.5 million net tax benefit associated with the dividend received from our investment in an equity method investee recorded during the six months ended June 30, 2011.

Unrestricted Subsidiaries

In July 2011, Leap's board of directors designated Cricket Music Holdco, LLC (a wholly-owned subsidiary of Cricket, or Cricket Music) and Cricket Music's wholly-owned subsidiary Muve USA, LLC, or Muve USA, as "Unrestricted Subsidiaries" under the indentures governing our senior notes. Cricket Music and Muve USA hold certain hardware, software and intellectual property relating to our Muve Music service. During the six months ended June 30, 2012, Cricket Music and Muve USA had no operations or revenues. Therefore, the most significant components of the financial position and results of operations of our unrestricted subsidiaries were property and equipment and depreciation expense. As of June 30, 2012, property and equipment of our unrestricted subsidiaries was approximately \$7.2 million, and for the three and six months ended June 30, 2012, depreciation expense of our unrestricted subsidiaries was approximately \$1.1 million and \$2.2 million, respectively, resulting in a net loss of approximately \$1.1 million and \$2.3 million, respectively.

Customer Recognition and Disconnect Policies

We recognize a new customer as a gross addition in the month that he or she activates a Cricket service. We recognize a gross customer addition for each Cricket Wireless, Cricket Broadband and Cricket PAYGo line of service activated. For our Cricket Wireless and Cricket Broadband services, the customer must pay his or her service amount by the payment due date or his or her service will be suspended. These customers, however, may elect to purchase our BridgePay service, which entitles them to an additional seven days of service. When service is suspended, the customer is generally not able to make or receive calls or access the internet. Any call attempted by a suspended customer is routed directly to our customer service center in order to arrange payment. If a new customer does not pay all amounts due on the first bill he or she receives after initial activation within 30 days of the due date, the account is disconnected and deducted from gross customer additions during the month in which the customer's service was discontinued. If a customer has made payment on the first bill received after initial activation and in a subsequent month does not pay all amounts due within 30 days of the due date, the account is disconnected and counted as churn. For Cricket Wireless customers who have elected to use BridgePay to receive an additional seven days of service, those customers must still pay all amounts otherwise due on their account within 30 days of the original due date or their account will also be disconnected and counted as churn. Pay-in-advance customers who ask to terminate their service are disconnected when their paid service period ends.

Prior to October 31, 2011, customers for our Cricket PAYGo service were generally disconnected from service and counted as churn if they had not replenished, or "topped-up," their account within 60 days after the end of their current term of service, and the length of their current term of service depended upon the dollar amount of service they had purchased. Beginning October 31, 2011, we modified our policies to provide more uniform disconnection procedures between our Cricket PAYGo and Cricket Wireless services. Cricket PAYGo customers generally now have 60 days from the date they activated their account, were charged a daily or monthly access fee for service or last "topped-up" their account (whichever is later) to do so again, or they will have their account suspended for a subsequent 60-day period before being disconnected.

Customer turnover, frequently referred to as churn, is an important business metric in the telecommunications industry because it can have significant financial effects. Because we do not require customers to sign fixed-term contracts or pass a credit check, our service is available to a broad customer base and, as a result, some of our customers may be more likely to have their service terminated due to an inability to pay.

Performance Measures

In managing our business and assessing our financial performance, management supplements the information provided by financial statement measures with several customer-focused performance metrics that are widely used in the telecommunications industry. These metrics include ARPU, which measures average service revenue per customer; CPGA, which measures the average cost of acquiring a new customer; cash costs per user per month, or CCU, which measures the non-selling cash cost of operating our business on a per customer basis; churn, which measures turnover in our customer base; and adjusted operating income before depreciation and amortization, or OIBDA, which measures operating performance. ARPU, CPGA, CCU and adjusted OIBDA are non-GAAP financial measures. A non-GAAP financial measure, within the meaning of Item 10 of Regulation S-K promulgated by the SEC, is a numerical measure of a company's financial performance or cash flows that (a) excludes amounts, or is subject to adjustments that have the effect of excluding amounts, which are included in the most directly comparable measure calculated and presented in accordance with generally accepted accounting principles in the condensed consolidated balance sheets, condensed

consolidated statements of comprehensive income or condensed consolidated statements of cash flows; or (b) includes amounts, or is subject to adjustments that have the effect of including amounts, which are excluded from the most directly comparable measure so calculated and presented. See “Reconciliation of Non-GAAP Financial Measures” below for a reconciliation of ARPU, CPGA, CCU and adjusted OIBDA to the most directly comparable GAAP financial measures.

ARPU is service revenues, less pass-through regulatory fees and telecommunications taxes, divided by the weighted-average number of customers, divided by the number of months during the period being measured. Management uses ARPU to identify average revenue per customer, to track changes in average customer revenues over time, to help evaluate how changes in our business, including changes in our service offerings, affect average revenue per customer, and to forecast future service revenue. In addition, ARPU provides management with a useful measure to compare our subscriber revenue to that of other wireless communications providers. Our customers are generally disconnected from service after a specified period following their failure to either pay a monthly bill or replenish, or “top-up,” their account. Because our calculation of weighted-average number of customers includes customers who are not currently paying for service but who have not yet been disconnected from service because they have not paid their last bill or have not replenished their account, ARPU may appear lower during periods in which we have significant disconnect activity. We believe investors use ARPU primarily as a tool to track changes in our average revenue per customer and to compare our per customer service revenues to those of other wireless communications providers. Other companies may calculate this measure differently.

CPGA is selling and marketing costs (excluding applicable share-based compensation expense included in selling and marketing expense), and equipment subsidy (generally defined as cost of equipment less equipment revenue), less the net loss on equipment transactions and third-party commissions unrelated to customer acquisition, divided by the total number of gross new customer additions during the period being measured. The net loss on equipment transactions unrelated to customer acquisition includes the revenues and costs associated with the sale of wireless devices to existing customers as well as costs associated with device replacements and repairs (other than warranty costs which are the responsibility of the device manufacturers). Commissions unrelated to customer acquisition are commissions paid to third parties for certain activities related to the continuing service of customers. We deduct customers who do not pay the first bill they receive following initial activation from our gross customer additions in the month in which they are disconnected, which tends to increase CPGA because we incur the costs associated with a new customer without receiving the benefit of a gross customer addition. Management uses CPGA to measure the efficiency of our customer acquisition efforts, to track changes in our average cost of acquiring new subscribers over time, and to help evaluate how changes in our sales and distribution strategies affect the cost-efficiency of our customer acquisition efforts. In addition, CPGA provides management with a useful measure to compare our per customer acquisition costs with those of other wireless communications providers. We believe investors use CPGA primarily as a tool to track changes in our average cost of acquiring new customers and to compare our per customer acquisition costs to those of other wireless communications providers. Other companies may calculate this measure differently.

CCU is cost of service and general and administrative costs (excluding applicable share-based compensation expense included in cost of service and general and administrative expense) plus net loss on equipment transactions and third-party commissions unrelated to customer acquisition (which includes the gain or loss on the sale of devices to existing customers, costs associated with device replacements and repairs (other than warranty costs which are the responsibility of the device manufacturers) and commissions paid to third parties for certain activities related to the continuing service of customers), less pass-through regulatory fees and telecommunications taxes, divided by the weighted-average number of customers, divided by the number of months during the period being measured. CCU does not include any depreciation and amortization expense. Management uses CCU as a tool to evaluate the non-selling cash expenses associated with ongoing business operations on a per customer basis, to track changes in these non-selling cash costs over time, and to help evaluate how changes in our business operations affect non-selling cash costs per customer. In addition, CCU provides management with a useful measure to compare our non-selling

cash costs per customer with those of other wireless communications providers. We believe investors use CCU primarily as a tool to track changes in our non-selling cash costs over time and to compare our non-selling cash costs to those of other wireless communications providers. Other companies may calculate this measure differently.

Churn, which measures customer turnover, is calculated as the net number of customers that disconnect from our service divided by the weighted-average number of customers divided by the number of months during the period being measured. Customers who do not pay the first bill they receive following initial activation are deducted from our gross customer additions in the month in which they are disconnected; as a result, these customers are not included in churn. Customers of our Cricket Wireless and Cricket Broadband service are generally disconnected from service approximately 30 days after failing to pay a monthly bill, and pay-in-advance customers who ask to terminate their service are disconnected when their paid service period ends. Cricket PAYGo customers generally have 60 days from the date they activated their account, were charged a daily or monthly access fee for service or last “topped-up” their account (whichever is later) to do so again, or they will have their account suspended for a subsequent 60-day period before being disconnected. Management uses churn to measure our retention of customers, to measure changes in customer retention over time, and to help evaluate how changes in our business affect customer retention. In addition, churn

provides management with a useful measure to compare our customer turnover activity to that of other wireless communications providers. We believe investors use churn primarily as a tool to track changes in our customer retention over time and to compare our customer retention to that of other wireless communications providers. Other companies may calculate this measure differently.

Adjusted OIBDA is a non-GAAP financial measure defined as operating income (loss) before depreciation and amortization, adjusted to exclude the effects of: (gain)/loss on sale, exchange or disposal of assets, net; impairments and other charges; and share-based compensation expense. Adjusted OIBDA should not be construed as an alternative to operating income (loss) or net income (loss) as determined in accordance with GAAP, or as an alternative to cash flows from operating activities as determined in accordance with GAAP or as a measure of liquidity.

In a capital-intensive industry such as wireless telecommunications, management believes that adjusted OIBDA, and the associated percentage margin calculations, are meaningful measures of our operating performance. We use adjusted OIBDA as a supplemental performance measure because management believes it facilitates comparisons of our operating performance from period to period and comparisons of our operating performance to that of other companies by backing out potential differences caused by the age and book depreciation of fixed assets (affecting relative depreciation expenses) as well as the items described above for which additional adjustments were made. While depreciation and amortization are considered operating costs under GAAP, these expenses primarily represent the non-cash current period allocation of costs associated with long-lived assets acquired or constructed in prior periods. Because adjusted OIBDA facilitates internal comparisons of our historical operating performance, management also uses this metric for business planning purposes and to measure our performance relative to that of our competitors. In addition, we believe that adjusted OIBDA and similar measures are widely used by investors, financial analysts and credit rating agencies as measures of our financial performance over time and to compare our financial performance with that of other companies in our industry.

Adjusted OIBDA has limitations as an analytical tool, and should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP. Some of these limitations include:

- it does not reflect capital expenditures;
- although it does not include depreciation and amortization, the assets being depreciated and amortized will often have to be replaced in the future and adjusted OIBDA does not reflect cash requirements for such replacements;
- it does not reflect costs associated with share-based awards exchanged for employee services;
- it does not reflect the interest expense necessary to service interest or principal payments on indebtedness;
- it does not reflect expenses incurred for the payment of income taxes and other taxes; and
- other companies, including companies in our industry, may calculate this measure differently than we do, limiting its usefulness as a comparative measure.

Management understands these limitations and considers adjusted OIBDA as a financial performance measure that supplements but does not replace the information provided to management by our GAAP results.

The following table shows metric information for the three and six months ended June 30, 2012 and 2011 (unaudited; Adjusted OIBDA in thousands):

Three Months Ended June 30,		Six Months Ended June 30,	
2012	2011	2012	2011

Edgar Filing: LEAP WIRELESS INTERNATIONAL INC - Form 10-Q

ARPU	\$41.64	\$40.15	\$42.12	\$39.75	
CPGA	\$296	\$251	\$253	\$217	
CCU	\$22.91	\$21.83	\$23.73	\$22.43	
Churn	4.4	% 4.2	% 3.8	% 3.6	%
Adjusted OIBDA	\$190,834	\$160,697	\$321,348	\$273,189	

Reconciliation of Non-GAAP Financial Measures

We utilize certain financial measures, as described above, that are widely used in the telecommunications industry but that are not calculated based on GAAP. Certain of these financial measures are considered “non-GAAP” financial measures within the meaning of Item 10 of Regulation S-K promulgated by the SEC.

ARPU - The following table reconciles total service revenues used in the calculation of ARPU to service revenues, which we consider to be the most directly comparable GAAP financial measure to ARPU (unaudited; in thousands, except weighted-average number of customers and ARPU):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Service revenues	\$751,285	\$704,087	\$1,525,283	\$1,382,498
Less pass-through regulatory fees and telecommunications taxes	(2,678)) (9,455) (6,815) (20,914
Total service revenues used in the calculation of ARPU	748,607	694,632	1,518,468	1,361,584
Weighted-average number of customers	5,992,047	5,766,438	6,008,737	5,708,394
ARPU	\$41.64	\$40.15	\$42.12	\$39.75

CPGA - The following table reconciles total costs used in the calculation of CPGA to selling and marketing expense, which we consider to be the most directly comparable GAAP financial measure to CPGA (unaudited; in thousands, except gross customer additions and CPGA):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Selling and marketing expense	\$77,247	\$87,161	\$172,801	\$197,013
Less share-based compensation expense included in selling and marketing expense	(616)) (261) (639) (308
Plus cost of equipment	171,673	182,677	419,520	412,472
Less equipment revenue	(35,487)) (56,451) (87,108) (157,954
Less net loss on equipment transactions and third-party commissions unrelated to customer acquisition	(66,932)) (56,920) (163,029) (131,044
Total costs used in the calculation of CPGA	\$145,885	\$156,206	\$341,545	\$320,179
Gross customer additions	492,720	622,863	1,352,267	1,475,027
CPGA	\$296	\$251	\$253	\$217

CCU - The following table reconciles total costs used in the calculation of CCU to cost of service, which we consider to be the most directly comparable GAAP financial measure to CCU (unaudited; in thousands, except weighted-average number of customers and CCU):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Cost of service	\$256,555	\$244,870	\$517,866	\$480,815
Plus general and administrative expense	94,892	92,079	184,591	187,488
Less share-based compensation expense included in cost of service and general and administrative expense	(3,813) (6,685) (3,096) (10,217
Plus net loss on equipment transactions and third-party commissions unrelated to customer acquisition	66,932	56,920	163,029	131,044
Less pass-through regulatory fees and telecommunications taxes	(2,678) (9,455) (6,815) (20,914
Total costs used in the calculation of CCU	\$411,888	\$377,729	\$855,575	\$768,216
Weighted-average number of customers	5,992,047	5,766,438	6,008,737	5,708,394
CCU	\$22.91	\$21.83	\$23.73	\$22.43

Adjusted OIBDA - The following table reconciles adjusted OIBDA to operating income (loss), which we consider to be the most directly comparable GAAP financial measure to adjusted OIBDA (unaudited; in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2012	2011	2012	2011
Operating income (loss)	\$31,589	\$12,337	\$15,786	\$(5,773
Plus depreciation and amortization	154,483	136,137	301,026	262,811
OIBDA	\$186,072	\$148,474	\$316,812	\$257,038
Plus loss on sale or disposal of assets, net	333	4,646	801	4,995
Plus impairments and other charges	—	631	—	631
Plus share-based compensation expense	4,429	6,946	3,735	10,525
Adjusted OIBDA	\$190,834	\$160,697	\$321,348	\$273,189

Liquidity and Capital Resources

Overview

Our principal sources of liquidity are our existing unrestricted cash, cash equivalents and short-term investments and cash generated from operations. From time to time we may generate additional liquidity through capital markets transactions and asset sales. We had a total of \$524.4 million in unrestricted cash, cash equivalents and short-term investments as of June 30, 2012. We generated \$50.6 million of net cash from operating activities during the six months ended June 30, 2012 and expect that cash from operations will continue to be a significant source of liquidity. We believe that our existing unrestricted cash, cash equivalents and short term investments, together with cash generated from operations, provide us with sufficient liquidity to meet the operating and capital requirements for our current business operations and investment initiatives until our senior indebtedness begins to mature in 2014. We expect to refinance all or substantially all of our senior indebtedness due between 2014 and 2016 by accessing the capital markets from time to time.

Our investment initiatives include our plans to offer next-generation LTE network technology services to customers in at least two-thirds of our network footprint over the next two to three years. We plan to cover up to approximately 21 million POPs with LTE in 2012. We are continuing to explore cost-effective ways to deliver LTE services to our customers, including by deploying facilities-based coverage and by entering into partnerships or joint ventures with other carriers. In addition to deploying LTE technology, our other investment initiatives include the ongoing maintenance and development of our network and other business assets to allow us to continue to provide customers with high-quality service. For our estimate of total capital expenditures for fiscal 2012, and projected capital expenditures for these investment initiatives over the next several years, see the discussion below under “-Capital Expenditures, Significant Acquisitions and Other Transactions.”

We had \$3,224.4 million in senior indebtedness outstanding as of June 30, 2012, which was comprised of \$250 million in aggregate principal amount of 4.5% convertible senior notes due 2014, \$300 million in aggregate principal amount of 10.0% unsecured senior notes due 2015, \$21.9 million in principal amount of a non-negotiable promissory note maturing in 2015, \$1,100 million in aggregate principal amount of 7.75% senior secured notes due 2016 and \$1,600 million in aggregate principal amount of 7.75% unsecured senior notes due 2020, as more fully described below.

We determine our future capital and operating requirements and liquidity based, in large part, upon our current and projected financial and operating performance, and we regularly review and update these projections due to changes in general economic conditions, our current and projected financial and operating results, the competitive landscape and other factors. There are a number of risks and uncertainties (including those set forth in “Part II - Item 1A. Risk Factors” of this report) that could cause our financial and operating results and capital requirements to differ materially from our projections and that could cause our liquidity to differ materially from the assessment set forth above.

Although our significant outstanding indebtedness results in certain risks to our business that could materially affect our financial condition and performance, we believe that these risks are manageable and that we are taking appropriate actions to monitor and address them. For example, in connection with our financial planning process and capital raising activities, we seek to maintain an appropriate balance between our debt and equity capitalization, and we regularly review our business plans and forecasts to monitor our ability to service our debt and to assess our capacity to incur additional debt under the indentures governing Cricket's secured and unsecured senior notes. In addition, although our \$3,224.4 million of senior indebtedness bears interest at fixed rates, we continue to review changes and trends in interest rates to evaluate possible hedging activities we could consider implementing. As a result of the actions described above, and our expected cash generated from operations and other sources of liquidity, we believe we have the ability to effectively manage our levels of indebtedness and address risks to our business and financial condition related to our indebtedness.

Cash Flows

Operating Activities

Net cash provided by operating activities decreased \$51.0 million, or 50.2%, for the six months ended June 30, 2012 compared to the corresponding period of the prior year. This decrease was primarily attributable to changes in working capital.

Investing Activities

Net cash used in investing activities was \$2.6 million during the six months ended June 30, 2012, which included the effects of the following transactions during the period:

- We purchased \$265.4 million of property and equipment for the ongoing maintenance and development of our network and other business assets.

- We made investment purchases of \$173.1 million, offset by sales or maturities of investments of \$440.7 million.

Financing Activities

Net cash used in financing activities was \$6.9 million for the six months ended June 30, 2012, which related to capital lease payments and distributions made to our joint venture partners.

Senior Notes

Convertible Senior Notes Due 2014

In June 2008, Leap issued \$250 million of unsecured convertible senior notes due 2014 in a private placement to institutional buyers. The notes bear interest at the rate of 4.50% per year, payable semi-annually in cash in arrears, which interest payments commenced in January 2009. The notes are Leap's general unsecured obligations and rank equally in right of payment with all of Leap's existing and future senior unsecured indebtedness and senior in right of payment to all indebtedness that is contractually subordinated to the notes. The notes are structurally subordinated to the existing and future claims of Leap's subsidiaries' creditors, including under the secured and unsecured senior notes described above and below. The notes are effectively junior to all of Leap's existing and future secured obligations, including those under the senior secured notes described below, to the extent of the value of the assets securing such obligations.

Holders may convert their notes into shares of Leap common stock at any time on or prior to the third scheduled trading day prior to the maturity date of the notes, July 15, 2014. If, at the time of conversion, the applicable stock price of Leap common stock is less than or equal to approximately \$93.21 per share, the notes will be convertible into 10.7290 shares of Leap common stock per \$1,000 principal amount of the notes (referred to as the “base conversion rate”), subject to adjustment upon the occurrence of certain events. If, at the time of conversion, the applicable stock price of Leap common stock exceeds approximately \$93.21 per share, the conversion rate will be determined pursuant to a formula based on the base conversion rate and an incremental share factor of 8.3150 shares per \$1,000 principal amount of the notes, subject to adjustment.

Leap may be required to repurchase all outstanding notes in cash at a repurchase price of 100% of the principal amount of the notes, plus accrued and unpaid interest, if any, thereon to the repurchase date if (1) any person acquires beneficial ownership, directly or indirectly, of shares of Leap's capital stock that would entitle the person to exercise 50% or more of the total voting power of all of Leap's capital stock entitled to vote in the election of directors, (2) Leap (i) merges or consolidates with or into any other person, another person merges with or into Leap, or Leap conveys, sells, transfers or leases all or substantially all of its assets to another person or (ii) engages in any recapitalization, reclassification or other transaction in which all or substantially all of Leap common stock is exchanged for or converted into cash, securities or other property, in each case subject to limitations and excluding in the case of (1) and (2) any merger or consolidation where at least 90% of the consideration consists of shares of common stock traded on NYSE, ASE or NASDAQ, (3) a majority of the members of Leap's board of directors ceases to consist of individuals who were directors on the date of original issuance of the notes or whose election or nomination for election was previously approved by the board of directors, (4) Leap is liquidated or dissolved or holders of common stock approve any plan or proposal for its liquidation or dissolution or (5) shares of Leap common stock are not listed for trading on any of the New York Stock Exchange, the NASDAQ Global Market or the NASDAQ Global Select Market (or any of their respective successors). Leap may not redeem the notes at its option.

Unsecured Senior Notes Due 2015

In June 2008, Cricket issued \$300 million of 10.0% unsecured senior notes due 2015 in a private placement to institutional buyers. The notes bear interest at the rate of 10.0% per year, payable semi-annually in cash in arrears, which interest payments commenced in January 2009. The notes are guaranteed on an unsecured senior basis by Leap and each of its existing and future domestic subsidiaries (other than Cricket, which is the issuer of the notes) that guarantees indebtedness for borrowed money of Leap, Cricket or any subsidiary guarantor. The notes and the guarantees are Leap's, Cricket's and the guarantors' general senior unsecured obligations and rank equally in right of payment with all of Leap's, Cricket's and the guarantors' existing and future unsubordinated unsecured indebtedness. The notes and the guarantees are effectively junior to Leap's, Cricket's and the guarantors' existing and future secured obligations, including those under the senior secured notes described below, to the extent of the value of the assets securing such obligations, as well as to existing and future liabilities of Leap's and Cricket's subsidiaries that are not guarantors (including STX Wireless and Cricket Music) and Savary Island and their respective subsidiaries. In addition, the notes and the guarantees are senior in right of payment to any of Leap's, Cricket's and the guarantors' future subordinated indebtedness.

The notes may be redeemed, in whole or in part, at any time at a redemption price of 105.0% and 102.5% of the principal amount thereof if redeemed during the twelve months beginning on July 15, 2012 and 2013, respectively, or at 100% of the principal amount if redeemed during the twelve months beginning on July 15, 2014 or thereafter, plus accrued and unpaid interest, if any, thereon to the redemption date. If a “change of control” occurs (which includes the acquisition of beneficial ownership of 35% or more of Leap's equity securities, a sale of all or substantially all of the assets of Leap and its restricted subsidiaries and a change in a majority of the members of Leap's board of directors that is not approved by the board), each holder of the notes may require Cricket to repurchase all of such holder's

notes at a purchase price equal to 101% of the principal amount of the notes, plus accrued and unpaid interest, if any, thereon to the repurchase date.

The indenture governing the notes limits, among other things, our ability to: incur additional debt; create liens or other encumbrances; place limitations on distributions from restricted subsidiaries; pay dividends; make investments; prepay subordinated indebtedness or make other restricted payments; issue or sell capital stock of restricted subsidiaries; issue guarantees; sell assets; enter into transactions with our affiliates; and make acquisitions or merge or consolidate with another entity.

Non-Negotiable Promissory Note Due 2015

Cricket service was previously offered in greater Chicago and Southern Wisconsin by Denali Spectrum, LLC, or Denali, an entity in which Cricket owned an 82.5% non-controlling membership interest. In December 2010, Cricket purchased the remaining 17.5% controlling membership interest in Denali that it did not previously own. As part of the purchase price, Cricket issued a five-year \$45.5 million non-negotiable promissory note in favor of the former holder of such controlling membership interest, which matures on December 27, 2015. Interest on the outstanding principal balance of the note varies from year to year at rates

ranging from approximately 5.0% to 8.3% and compounds annually. Under the note, Cricket is required to make principal payments of \$8.5 million per year, with the remaining principal balance and all accrued interest payable at maturity. Cricket's obligations under the note are secured on a first-lien basis by certain assets of Savary Island. In May 2011, Cricket prepaid approximately \$15.1 million in principal amount of the note. As of June 30, 2012 and December 31, 2011, \$21.9 million in principal amount of indebtedness was outstanding under the note.

On November 3, 2011, Savary Island entered into a license purchase agreement with Verizon Wireless, as further discussed below in “-Capital Expenditures, Significant Acquisitions and Other Transactions,” in which Savary Island has agreed to sell AWS spectrum in various markets to Verizon Wireless for \$172 million. Certain of the spectrum Savary Island has agreed to sell to Verizon Wireless is secured by a lien in favor of the holder of the non-negotiable promissory note. Accordingly, in connection with the closing of the Verizon Wireless transaction, we expect to repay the balance of the non-negotiable promissory note in full. The closing of the Verizon Wireless transaction is subject to customary closing conditions, including the consent of the FCC. As we expect that the closing of the Verizon Wireless transaction will occur within a year, we have classified the entire balance of the non-negotiable promissory note as current maturities of long-term debt on our consolidated balance sheets as of June 30, 2012 and December 31, 2011.

Senior Secured Notes Due 2016

In June 2009, Cricket issued \$1,100 million of 7.75% senior secured notes due 2016 in a private placement to institutional buyers at an issue price of 96.134% of the principal amount, which notes were exchanged in December 2009 for identical notes that had been registered with the SEC. The \$42.5 million discount to the net proceeds we received in connection with the issuance of the notes has been recorded in long-term debt, net in the condensed consolidated financial statements and is being accreted as an increase to interest expense over the term of the notes. At June 30, 2012, the effective interest rate on the notes was 7.94%, which includes the effect of the discount accretion.

The notes bear interest at the rate of 7.75% per year, payable semi-annually in cash in arrears, which interest payments commenced in November 2009. The notes are guaranteed on a senior secured basis by Leap and each of its existing and future domestic subsidiaries (other than Cricket, which is the issuer of the notes) that guarantees any indebtedness of Leap, Cricket or any subsidiary guarantor. The notes and the guarantees are Leap's, Cricket's and the guarantors' senior secured obligations and are equal in right of payment with all of Leap's, Cricket's and the guarantors' existing and future unsubordinated indebtedness.

The notes and the guarantees are effectively senior to all of Leap's, Cricket's and the guarantors' existing and future unsecured indebtedness (including Cricket's \$1,900 million aggregate principal amount of unsecured senior notes and, in the case of Leap, Leap's \$250 million aggregate principal amount of convertible senior notes), as well as to all of Leap's, Cricket's and the guarantors' obligations under any permitted junior lien debt that may be incurred in the future, in each case to the extent of the value of the collateral securing the senior secured notes and the guarantees.

The notes and the guarantees are secured on a pari passu basis with all of Leap's, Cricket's and the guarantors' obligations under any permitted parity lien debt that may be incurred in the future. Leap, Cricket and the guarantors are permitted to incur debt under existing and future secured credit facilities in an aggregate principal amount outstanding (including the aggregate principal amount outstanding of the senior secured notes) of up to the greater of \$1,500 million and 2.5 times Leap's consolidated cash flow (excluding the consolidated cash flow of Savary Island, STX Wireless and Cricket Music) for the prior four fiscal quarters

The notes and the guarantees are effectively junior to all of Leap's, Cricket's and the guarantors' obligations under any permitted priority debt that may be incurred in the future (up to the lesser of 0.30 times Leap's consolidated cash flow (excluding the consolidated cash flow of Savary Island, STX Wireless and Cricket Music) for the prior four fiscal quarters and \$300 million in aggregate principal amount outstanding), to the extent of the value of the collateral

securing such permitted priority debt, as well as to existing and future liabilities of Leap's and Cricket's subsidiaries that are not guarantors (including STX Wireless and Cricket Music) and Savary Island and their respective subsidiaries. In addition, the notes and the guarantees are senior in right of payment to any of Leap's, Cricket's and the guarantors' future subordinated indebtedness.

The notes and the guarantees are secured on a first-priority basis, equally and ratably with any future parity lien debt, by liens on substantially all of the present and future personal property of Leap, Cricket and the guarantors, except for certain excluded assets and subject to permitted liens (including liens on the collateral securing any future permitted priority debt).

The notes may be redeemed, in whole or in part, at any time at a redemption price of 105.813%, 103.875% and 101.938% of the principal amount thereof if redeemed during the twelve months beginning on May 15, 2012, 2013 and 2014, respectively, or at 100% of the principal amount if redeemed during the twelve months beginning on May 15, 2015 or thereafter, plus accrued and

unpaid interest thereon to the redemption date. If a "change of control" occurs (which includes the acquisition of beneficial ownership of 35% or more of Leap's equity securities (other than a transaction where immediately after such transaction Leap will be a wholly-owned subsidiary of a person of which no person or group is the beneficial owner of 35% or more of such person's voting stock), a sale of all or substantially all of the assets of Leap and its restricted subsidiaries and a change in a majority of the members of Leap's board of directors that is not approved by the board), each holder of the notes may require Cricket to repurchase all of such holder's notes at a purchase price equal to 101% of the principal amount of the notes, plus accrued and unpaid interest thereon to the repurchase date.

The indenture governing the notes limits, among other things, our ability to: incur additional debt; create liens or other encumbrances; place limitations on distributions from restricted subsidiaries; pay dividends; make investments; prepay subordinated indebtedness or make other restricted payments; issue or sell capital stock of restricted subsidiaries; issue guarantees; sell assets; enter into transactions with our affiliates; and make acquisitions or merge or consolidate with another entity.

Unsecured Senior Notes Due 2020

In November 2010, Cricket issued \$1,200 million of 7.75% unsecured senior notes due 2020 in a private placement to institutional buyers at an issue price of 98.323% of the principal amount, which were exchanged in January 2011 for identical notes that had been registered with the SEC. The \$20.1 million discount to the net proceeds we received in connection with the issuance of the notes has been recorded in long-term debt, net in the condensed consolidated financial statements and is being accreted as an increase to interest expense over the term of the notes. In May 2011, Cricket issued an additional \$400 million of 7.75% unsecured senior notes due 2020 in a private placement to institutional buyers at an issue price of 99.193% of the principal amount, which were exchanged in November 2011 for identical notes that had been registered with the SEC. The \$3.2 million discount to the net proceeds we received in connection with the issuance of the additional notes was recorded in long-term debt, net in the condensed consolidated financial statements and is being accreted as an increase to interest expense over the term of the notes. At June 30, 2012, the effective interest rates on the initial \$1,200 million tranche and the additional \$400 million tranche of the notes were 7.87% and 7.81%, respectively, both of which include the effect of the discount accretion.

The notes bear interest at the rate of 7.75% per year, payable semi-annually in cash in arrears, which interest payments commenced in April 2011. The notes are guaranteed on an unsecured senior basis by Leap and each of its existing and future domestic subsidiaries (other than Cricket, which is the issuer of the notes) that guarantees indebtedness of Leap, Cricket or any subsidiary guarantor. The notes and the guarantees are Leap's, Cricket's and the guarantors' general senior unsecured obligations and rank equally in right of payment with all of Leap's, Cricket's and the guarantors' existing and future unsubordinated unsecured indebtedness. The notes and the guarantees are effectively junior to Leap's, Cricket's and the guarantors' existing and future secured obligations, including those under the senior secured notes described above, to the extent of the value of the assets securing such obligations, as well as to existing and future liabilities of Leap's and Cricket's subsidiaries that are not guarantors (including STX Wireless and Cricket Music) and Savary Island and their respective subsidiaries. In addition, the notes and the guarantees are senior in right of payment to any of Leap's, Cricket's and the guarantors' future subordinated indebtedness.

Prior to October 15, 2013, Cricket may redeem up to 35% of the aggregate principal amount of the notes at a redemption price of 107.750% of the principal amount thereof, plus accrued and unpaid interest, if any, thereon to the redemption date, from the net cash proceeds of specified equity offerings. Prior to October 15, 2015, Cricket may redeem the notes, in whole or in part, at a redemption price equal to 100% of the principal amount thereof plus the applicable premium and any accrued and unpaid interest, if any, thereon to the redemption date. The applicable premium is calculated as the greater of (i) 1.0% of the principal amount of such notes and (ii) the excess of (a) the present value at such date of redemption of (1) the redemption price of such notes at October 15, 2015 plus (2) all remaining required interest payments due on such notes through October 15, 2015 (excluding accrued but unpaid

interest to the date of redemption), computed using a discount rate equal to the Treasury Rate plus 50 basis points, over (b) the principal amount of such notes. The notes may be redeemed, in whole or in part, at any time on or after October 15, 2015, at a redemption price of 103.875%, 102.583% and 101.292% of the principal amount thereof if redeemed during the twelve months beginning on October 15, 2015, 2016 and 2017, respectively, or at 100% of the principal amount if redeemed during the twelve months beginning on October 15, 2018 or thereafter, plus accrued and unpaid interest, if any, thereon to the redemption date.

If a “change of control” occurs (which includes the acquisition of beneficial ownership of 35% or more of Leap's equity securities (other than a transaction where immediately after such transaction Leap will be a wholly-owned subsidiary of a person of which no person or group is the beneficial owner of 35% or more of such person's voting stock), a sale of all or substantially all of the assets of Leap and its restricted subsidiaries and a change in a majority of the members of Leap's board of directors that is not approved by the board), each holder of the notes may require Cricket to repurchase all of such holder's notes at a purchase price equal to 101% of the principal amount of the notes, plus accrued and unpaid interest, if any, thereon to the repurchase date.

The indenture governing the notes limits, among other things, our ability to: incur additional debt; create liens or other encumbrances; place limitations on distributions from restricted subsidiaries; pay dividends; make investments; prepay subordinated indebtedness or make other restricted payments; issue or sell capital stock of restricted subsidiaries; issue guarantees; sell assets; enter into transactions with our affiliates; and make acquisitions or merge or consolidate with another entity.

Fair Value of Financial Instruments and Non-Financial Assets

As more fully described in Note 4 to our condensed consolidated financial statements included in “Part I — Item 1. Financial Statements” of this report, we apply the authoritative guidance for fair value measurements to our assets and liabilities. The guidance defines fair value as an exit price, which is the price that would be received upon the sale of an asset or paid upon the transfer of a liability in an orderly transaction between market participants at the measurement date. The degree of judgment utilized in measuring the fair value of assets and liabilities generally correlates to the level of pricing observability. Assets and liabilities with readily available, actively quoted prices or for which fair value can be measured from actively quoted prices in active markets generally have more pricing observability and require less judgment in measuring fair value. Conversely, assets and liabilities that are rarely traded or not quoted have less pricing observability and are generally measured at fair value using valuation models that require more judgment. These valuation techniques involve some level of management estimation and judgment, the degree of which is dependent on the price transparency of the asset, liability or market and the nature of the asset or liability.

We have categorized our assets and liabilities measured at fair value into a three-level hierarchy in accordance with the authoritative guidance for fair value measurements. Assets and liabilities measured at fair value using quoted prices in active markets for identical assets or liabilities are generally categorized as Level 1; assets and liabilities measured at fair value using observable market-based inputs or unobservable inputs that are corroborated by market data for similar assets or liabilities are generally categorized as Level 2; and assets and liabilities measured at fair value using unobservable inputs that cannot be corroborated by market data are generally categorized as Level 3. Such Level 3 assets and liabilities have values determined using pricing models, discounted cash flow methodologies, or similar techniques, and include instruments for which the determination of fair value requires significant management judgment and estimation. As of June 30, 2012 and December 31, 2011, none of our financial assets required fair value to be measured using Level 3 inputs.

Generally, our results of operations are not significantly impacted by our assets and liabilities accounted for at fair value due to the nature of each asset and liability.

We continue to report our long-term debt obligations at amortized cost and disclose the fair value of such obligations.

Capital Expenditures, Significant Acquisitions and Other Transactions

Capital Expenditures

During the six months ended June 30, 2012, we incurred approximately \$265.4 million in capital expenditures. These capital expenditures were primarily for the ongoing maintenance and development of our network and other business assets and the initial deployment of next-generation LTE network technology.

Total capital expenditures for 2012 are expected to be between \$530 million and \$560 million. These capital expenditures are primarily expected to support the ongoing maintenance and development of our network and other business assets, our deployment of LTE network technology and other capital projects.

As we prepare to offer next-generation LTE network technology services over the next several years, we are generally targeting annual capital expenditures to support the ongoing maintenance and development of our network and other business assets (excluding capital expenditures relating to LTE technology) in the low-teens as a percentage of annual, in-network service revenues. The actual amount of capital expenditures we spend in future years for these purposes may vary as a result of numerous factors, including our then-available capital resources and customer usage of our network resources.

As previously noted, we plan to offer next-generation LTE network technology services to customers in at least two-thirds of our network footprint over the next two to three years. We plan to cover up to approximately 21 million POPs with LTE in 2012. We are continuing to explore cost-effective ways to deliver LTE services to our customers, including by deploying facilities-based coverage and by entering into partnerships or joint ventures with other carriers. Capital expenditures for the deployment of LTE are currently anticipated to be less than \$10 per covered POP. The actual amount we spend to deploy LTE each year will depend upon multiple factors, including the scope and pace of our deployment activities.

Other Transactions

On April 2, 2012, we and Savary Island entered into license exchange agreements with entities affiliated with T-Mobile USA, Inc., or, collectively, T-Mobile. The transactions would result in us acquiring 10 MHz of additional AWS spectrum in Phoenix, Houston and two other Texas markets to supplement the spectrum we currently operate in those markets. We and Savary Island have agreed to assign T-Mobile spectrum in various markets in Alabama, Illinois, Missouri, Minnesota and Wisconsin. The transactions also include intra-market exchanges between us and T-Mobile in Philadelphia, Wilmington, Atlantic City and various markets in Texas and New Mexico. In connection with the closing of these transactions, we will cancel a portion of the indebtedness owed by Savary Island to Cricket. The closing of each transaction is subject to customary closing conditions, including the consent of the FCC. The FCC granted its consent to one of these transactions in June 2012. The wireless licenses to be assigned by us and Savary Island to T-Mobile have been classified as assets held for sale at their carrying value of \$186.5 million in our condensed consolidated balance sheet as of June 30, 2012.

On November 3, 2011, we entered into license purchase agreements to acquire 12 MHz of 700 MHz A block spectrum in Chicago from Verizon Wireless for \$204 million and to sell excess PCS and AWS spectrum in various markets across the U.S to Verizon Wireless for \$188 million. The closing of both transactions is subject to customary closing conditions, including the consent of the FCC. We currently anticipate that both transactions will close simultaneously. The wireless licenses to be sold by us to Verizon Wireless have been classified as assets held for sale at their carrying value of \$119.0 million and \$119.1 million in our condensed consolidated balance sheets as of June 30, 2012 and December 31, 2011, respectively. As a result of the closing of these two license purchase transactions, and the one between Savary Island and Verizon Wireless described above, we expect to receive aggregate net cash proceeds of more than \$100 million (after deducting related expenses and the repayment in full of our non-negotiable promissory note due 2015). However, the closings under these license purchase agreements are not conditioned upon one another, and we cannot assure you that any or all of these transactions will be consummated.

Also on November 3, 2011, Savary Island entered into a license purchase agreement with Verizon Wireless to sell AWS spectrum in various markets to Verizon Wireless for \$172 million. Savary Island has agreed to use substantially all of the proceeds from this sale to prepay a portion of its indebtedness to Cricket at the closing of the transaction. The closing of the transaction is subject to customary closing conditions, including the consent of the FCC. The wireless licenses to be sold by Savary Island to Verizon Wireless have been classified as assets held for sale at their carrying value of \$85.2 million in our condensed consolidated balance sheets as of June 30, 2012 and December 31, 2011.

On February 11, 2011, we entered into an agreement with Global Tower, LLC or GTP, to sell certain of our telecommunications tower assets in one or more closings. During the second and third quarters of 2011, we sold those telecommunications towers and related assets for approximately \$25.8 million. The transaction was structured as a sale lease-back financing, in which we entered into a 10-year lease agreement with GTP to continue our commercial use of the towers. Accordingly, we recorded a capital lease obligation of \$25.8 million, which was equal to the proceeds received from GTP.

Wholesale Agreement

In August 2010, we entered into a wholesale agreement with an affiliate of Sprint Nextel which we use to offer Cricket services in nationwide retailers outside of our current network footprint.

The initial term of the wholesale agreement runs until December 31, 2015, and automatically renews for successive one-year periods unless either party provides 180-day advance notice to the other. Under the agreement, we pay Sprint a specified amount per month for each subscriber activated on its network, subject to periodic market-based

adjustments. We agreed to provide Sprint with a minimum of \$300 million of revenue under the agreement, as amended, over the initial five-year term (against which we can credit up to \$100 million of revenue under other existing commercial arrangements between the companies), with a minimum of \$20 million of revenue to be provided in 2011, a minimum of \$75 million of revenue to be provided in 2012, a minimum of \$80 million of revenue to be provided in 2013, a minimum of \$75 million of revenue to be provided in 2014 and a minimum of \$50 million of revenue to be provided in 2015. Any revenue we provided in a given year above the minimum revenue commitment for that particular year is credited to the next succeeding year. However, to the extent our revenues were to fall beneath the applicable commitment amount for any given year, excess revenues from a subsequent year could not be carried back to offset such shortfall. Our obligation to provide the minimum revenue amount for any calendar year is subject to Sprint's compliance with specified covenants in the wholesale agreement. Based upon a review of information provided to us by Sprint, we recently informed Sprint that certain of those covenants had not been met and that, as a result, we are not subject to the minimum revenue commitment for 2012. Sprint has disputed that assertion. Notwithstanding our release from the 2012 minimum revenue commitment, we expect to purchase services from Sprint that would satisfy a significant majority of the original \$75 million revenue commitment for 2012.

In addition, in the event we are involved in a change-of-control transaction with another facilities-based wireless carrier with annual revenues of at least \$500 million in the fiscal year preceding the date of the change of control agreement (other than MetroPCS Communications, Inc., or MetroPCS, either we (or our successor in interest) or Sprint may terminate the wholesale agreement within 60 days following the closing of such a transaction. In connection with any such termination, we (or our successor in interest) would be required to pay to Sprint a specified percentage of the remaining aggregate minimum revenue commitment, with the percentage to be paid depending on the year in which the change of control agreement was entered into, being 30% for any such agreement entered into in 2012, 20% for any such agreement entered into in 2013 and 10% for any such agreement entered into in 2014 or 2015.

In the event that we are involved in a change-of-control transaction with MetroPCS during the term of the wholesale agreement, then the agreement would continue in full force and effect, subject to certain revisions, including, without limitation, an increase to the total minimum revenue commitment to \$350 million, taking into account any revenue contributed by Cricket prior to the date thereof. In the event Sprint is involved in a change-of-control transaction, the agreement would bind Sprint's successor-in-interest.

iPhone Purchase Commitment

In May 2012 we entered into a three-year minimum purchase commitment with Apple Inc., or Apple, to purchase iPhones. The commitment began upon our launch of sales of the iPhone in certain markets in June 2012 and is currently estimated to be approximately \$900 million, with annual commitments during the three-year period that increase moderately in the second and third years. The actual amount that we spend over the term of the commitment will depend on many factors, including customer acceptance and availability of current and future versions of the device and costs for the device. We currently project that the minimum number of iPhones we purchase from Apple over the term of the commitment will represent less than 10% of the total number of handsets we will sell to new and upgrading customers over this period.

STX Wireless Joint Venture

Cricket service is offered in South Texas by our joint venture STX Operations, which Cricket controls through a 75.75% controlling membership interest in its parent company STX Wireless. The joint venture was created in October 2010 through the contribution by us and various entities doing business as Pocket Communications, or Pocket, of substantially all of our respective wireless spectrum and operating assets in the South Texas region. In exchange for such contributions, Cricket received a 75.75% controlling membership interest in STX Wireless and Pocket received a 24.25% non-controlling membership interest. Additionally, in connection with the transaction, we made payments to Pocket of approximately \$40.7 million in cash.

Cricket controls and manages the joint venture under the terms of the amended and restated limited liability company agreement of STX Wireless, or the STX LLC Agreement. Under the STX LLC Agreement, Pocket has the right to put, and we have the right to call, all of Pocket's membership interests in STX Wireless, which rights are generally exercisable on or after April 1, 2014. In addition, in the event of a change of control of Leap, Pocket is obligated to sell to us all of its membership interests in STX Wireless. The purchase price for Pocket's membership interests would be equal to 24.25% of the product of Leap's enterprise value-to-revenue multiple for the four most recently completed fiscal quarters multiplied by the total revenues of STX Wireless and its subsidiaries over that same period, subject to adjustment in certain circumstances. In the event optional cash distributions are made to the members of STX Wireless pursuant to the STX LLC Agreement, the purchase price is reduced by the total amount of such distributions made to Pocket plus an amount equal to an 8.0% per annum return on each such distribution from the date it was made. The purchase price is payable in either cash, Leap common stock or a combination thereof, as determined by Cricket in its discretion (provided that, if permitted by Cricket's debt instruments, at least \$25 million of the purchase

price must be paid in cash). We have the right to deduct from or set off against the purchase price certain distributions made to Pocket, as well as any obligations owed to us by Pocket. Under the STX LLC Agreement, Cricket is permitted to purchase Pocket's membership interests in STX Wireless over multiple closings in the event that the block of shares of Leap common stock issuable to Pocket at the closing of the purchase would be greater than 9.9% of the total number of shares of Leap common stock then issued and outstanding.

To the extent the redemption price for Pocket's non-controlling membership interest varies from the value of Pocket's net interest in STX Wireless at any period (after the attribution of profits or losses), the value of such interest is accreted to the redemption price for such interest with a corresponding adjustment to additional paid-in capital. For the six months ended June 30, 2012 and for the year ended December 31, 2011, we recorded a net accretion benefit of approximately \$2.2 million and \$8.9 million, respectively, to bring the carrying value of Pocket's membership interests in STX Wireless to its estimated redemption value.

In accordance with the STX LLC Agreement, STX Wireless made pro-rata tax distributions of \$2.7 million and \$1.0 million to Cricket and Pocket, respectively, in connection with their estimated tax liabilities resulting from STX Wireless' earnings for the six months ended June 30, 2012. During the six months ended June 30, 2011, STX Wireless made similar pro-rata tax distributions of \$5.7 million and \$1.7 million to Cricket and Pocket, respectively. We recorded these tax distribution to Pocket as an adjustment to additional paid-in-capital in the condensed consolidated balance sheets and as a component of accretion of redeemable non-controlling interests and distributions, net of tax, in the condensed consolidated statements of comprehensive income. The distributions made to Cricket were eliminated in consolidation.

Subsequent to the end of the quarter, on July 12, 2012, STX Wireless made an optional pro-rata cash distribution of \$50.7 million and \$16.2 million to Cricket and Pocket, respectively. Under the STX LLC Agreement, this optional distribution to Pocket (plus an annual return, as discussed above), is deducted from the purchase price payable to Pocket in the event of a put, call or mandatory buyout following a change of control of Leap.

At the closing of the formation of the joint venture, STX Wireless entered into a loan and security agreement with Pocket pursuant to which, commencing in April 2012, STX Wireless agreed to make quarterly limited-recourse loans to Pocket out of excess cash in an aggregate principal amount not to exceed \$30 million, which loans are secured by Pocket's membership interests in STX Wireless. As of June 30, 2012, Pocket had approximately \$3.8 million in outstanding borrowings under the loan and security agreement. Borrowings under the loan and security agreement bear interest at 8.0% per annum, compounded annually, and will mature on the earlier of October 2020 and the date on which Pocket ceases to hold any membership interests in STX Wireless. Cricket has the right to set off all outstanding principal and interest under this loan and security agreement against the payment of the purchase price for Pocket's membership interests in STX Wireless in the event of a put, call or mandatory buyout following a change of control of Leap. Accordingly, outstanding borrowings and accrued interest under the loan and security agreement have been recorded as a deduction from the purchase price payable to Pocket as discussed above in the condensed consolidated balance sheets and as a component of accretion of redeemable non-controlling interests and distributions, net of tax, in the condensed consolidated statements of comprehensive income. The offset of the outstanding borrowings and accrued interest against the purchase price for Pocket's membership interest, coupled with the accretion benefit recorded to adjust the redemption value of Pocket's net interest in STX Wireless, brought the carrying value of Pocket's membership interests in STX Wireless to an estimated redemption value of \$84.6 million and \$90.7 million as of June 30, 2012 and December 31, 2011, respectively.

In a separate transaction, on January 3, 2011, we acquired Pocket's customer assistance call center for \$850,000. We accounted for this transaction as a business purchase combination in accordance with the authoritative guidance for business combinations. A portion of the purchase price was assigned to property and equipment and the remaining amount was allocated to goodwill.

During 2011, we completed the integration of Cricket and Pocket operating assets in the South Texas region to enable the combined network and retail operations of the STX Wireless joint venture to operate more efficiently. During the three and six months ended June 30, 2011, we incurred approximately \$631,000 of such integration costs, which were recorded in impairments and other charges within our condensed consolidated statements of comprehensive income.

Savary Island Venture

Cricket owns an 85% non-controlling membership interest in Savary Island, which holds wireless spectrum in the upper Midwest portion of the U.S. and which leases a portion of that spectrum to us. Cricket service was previously offered in greater Chicago and Southern Wisconsin by Denali, an entity in which Cricket owned an 82.5% non-controlling membership interest. In December 2010, Cricket purchased the remaining 17.5% controlling membership interest in Denali that it did not previously own. Immediately prior to such purchase, Denali contributed

all of its wireless spectrum outside of the Chicago and Southern Wisconsin operating markets and a related spectrum lease to Savary Island, a newly formed venture, in exchange for an 85% non-controlling membership interest. Savary Island acquired this spectrum as a “very small business” designated entity under FCC regulations. Ring Island Wireless, LLC, or Ring Island, contributed \$5.1 million of cash to Savary Island in exchange for a 15% controlling membership interest. On March 31, 2011, Denali and its subsidiaries were merged with and into Cricket, with Cricket as the surviving entity.

Under the amended and restated limited liability company agreement of Savary Island, or the Savary Island LLC Agreement, Ring Island had the right to put its entire controlling membership interest in Savary Island to Cricket during the 30-day period commencing on May 1, 2012. Ring Island exercised this put right on May 14, 2012. The purchase price for such sale is an amount equal to Ring Island's equity contributions to Savary Island of \$5.1 million less any optional distributions made pursuant to the Savary Island LLC Agreement, plus \$150,000 if the sale is consummated prior to May 1, 2017 without incurring any unjust enrichment payments. The consummation of the sale is subject to customary closing conditions, including FCC approval. We have recorded this obligation to purchase Ring Island's controlling membership interest in Savary Island as a component of redeemable non-controlling interest in the condensed consolidated balance sheets. Savary Island has guaranteed Cricket's put obligations under the Savary Island LLC Agreement, which guaranty is secured on a first-lien basis by certain assets of Savary Island. Under the

Savary Island LLC Agreement, Savary Island is also required to make monthly mandatory distributions to Ring Island. Savary Island is also party to a management services agreement with Cricket, pursuant to which Cricket provides management services to Savary Island in exchange for a management fee.

We attribute profits and losses to Ring Island's redeemable non-controlling interest each reporting period. To the extent that the redemption price for Ring Island's controlling membership interest exceeds the value of Ring Island's net interest in Savary Island at any period (after the attribution of profits or losses), the value of such interest is accreted to the redemption price for such interest with a corresponding adjustment to additional paid-in capital. However, we would not reduce the carrying amount of the redeemable non-controlling interest below the redemption price. Both the attribution of profit or loss and the accretion of the redeemable non-controlling interest are presented as a component of accretion of redeemable non-controlling interests and distributions, net of tax, in our condensed consolidated statements of comprehensive income. As of June 30, 2012 and December 31, 2011, this redeemable non-controlling interest had a carrying value of \$5.3 million.

At the closing of the formation of the venture, Savary Island assumed \$211.6 million of the outstanding loans then owed by Denali and its subsidiaries to Cricket. In connection with Savary Island's assumption of such loans, Cricket, Savary Island and Savary Island's subsidiaries entered into an amended and restated senior secured credit agreement, or the Savary Island Credit Agreement, to amend and restate the terms of the Denali senior secured credit agreement applicable to the assumed loans. Under the Savary Island Credit Agreement, Cricket also agreed to loan Savary Island up to an additional \$5.0 million to fund its working capital needs. In connection with the closing of a prior license exchange transaction with T-Mobile on November 30, 2011, Savary Island assigned 10 MHz of unused wireless spectrum in Indianapolis, IN and Minneapolis, MN to T-Mobile and Cricket canceled \$41.1 million in principal amount of indebtedness owed by Savary Island under the Savary Island Credit Agreement. As of June 30, 2012 and December 31, 2011, borrowings outstanding under the Savary Island Credit Agreement (excluding accrued interest) totaled \$170.5 million. Loans under the Savary Island Credit Agreement (including the assumed loans) accrue interest at the rate of 9.5% per annum and such interest is added to principal annually. All outstanding principal and accrued interest is due in May 2021. Outstanding principal and accrued interest are due in quarterly installments commencing May 2018. Savary Island may prepay loans under the Savary Island Credit Agreement at any time without premium or penalty. The obligations of Savary Island and its subsidiaries under the Savary Island Credit Agreement are secured by all of the personal property, fixtures and owned real property of Savary Island and its subsidiaries, subject to certain permitted liens. The Savary Island Credit Agreement and the related security agreements contain customary representations, warranties, covenants and conditions.

Off-Balance Sheet Arrangements

We do not have and have not had any material off-balance sheet arrangements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Interest Rate Risk

Our senior secured, senior and convertible senior notes all bear interest at fixed rates, and our non-negotiable promissory note bears interest that varies from year to year at rates ranging from approximately 5.0%-8.3% and compounds annually. As a result, we do not expect fluctuations in interest rates to have a material adverse effect on our business, financial condition or results of operations.

Our investment portfolio consists of highly liquid, fixed-income investments with contractual maturities of less than one year. The fair value of such a portfolio is less sensitive to market fluctuations than a portfolio of longer term securities. Accordingly, we believe that a sharp change in interest rates would not have a material effect on our

investment portfolio.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified by the SEC and that such information is accumulated and communicated to management, including our CEO and CFO as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Management, with participation by our CEO and CFO, has designed our disclosure controls and procedures to provide reasonable assurance of achieving desired objectives. As required by SEC Rule 13a-15(b), in connection with filing this Quarterly Report on Form 10-Q, management conducted an evaluation, with the participation of our CEO and our CFO, of the effectiveness of the design and operation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Exchange Act, as of June 30, 2012, the end of the period covered by this report. Based upon that evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of June 30, 2012.

(b) Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the fiscal quarter ended June 30, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II

OTHER INFORMATION

Item 1. Legal Proceedings

As more fully described below, we are involved in a variety of lawsuits, claims, investigations and proceedings concerning intellectual property, commercial, business practices and other matters. Due in part to the expansion and development of our business operations, we have become subject to increased amounts of litigation, including disputes alleging intellectual property infringement.

We believe that any damage amounts alleged by plaintiffs are not necessarily meaningful indicators of our potential liability. We determine whether we should accrue an estimated loss for a contingency in a particular legal proceeding by assessing whether a loss is deemed probable and whether its amount can be reasonably estimated. Unless otherwise indicated, we cannot reasonably estimate the possible loss or range of losses for the matters discussed below. We reassess our views on estimated losses on a quarterly basis to reflect the impact of any developments in the matters in which we are involved.

Legal proceedings are inherently unpredictable, and the matters in which we are involved often present complex legal and factual issues. We vigorously pursue defenses in legal proceedings and engage in discussions where possible to resolve these matters on terms favorable to us. It is possible, however, that our business, financial condition and results of operations in future periods could be materially adversely affected by increased litigation expense, significant settlement costs and/or unfavorable damage awards.

Patent Litigation

On June 14, 2012, a matter brought against us by Realtime Data, LLC ("Realtime") on September 23, 2010 in the United States District Court for the Eastern District of Texas was dismissed with prejudice in connection with a settlement between the parties. Realtime had alleged that we and the other defendants, which included AT&T, Verizon Wireless, Sprint, T-Mobile and MetroPCS, each infringed U.S. Patent Nos. 7,161,506, 7,321,937, 7,352,300 and 7,415,530 through our use of third-party compression software and servers for data optimization over their networks. The complaint sought unspecified monetary damages as well as costs and attorneys' fees.

Other Litigation, Claims and Disputes

In addition to the matter described above, we are often involved in certain other matters which generally arise in the ordinary course of business and which seek monetary damages and other relief. Based upon information currently available to us, none of these other matters is expected to have a material adverse effect on our business, financial condition or results of operations.

Item 1A. Risk Factors

There have been no material changes to the Risk Factors described under "Part I - Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2011 filed with the SEC on February 21, 2012, as amended and supplemented by the Risk Factors described under "Part II - Item 1A. Risk Factors" in our Quarterly Report on Form 10-Q for the three months ended March 31, 2012 filed with SEC on April 27, 2012, other than:

Changes to the risk factor below entitled "We Have Entered into Agreements with Significant Purchase or Revenue Commitments and Cannot Guarantee that We Will Meet These Commitments or Realize the Expected Benefits from These Agreements," which has been updated to reflect our entry into a new purchase commitment;

Changes to the risk factor entitled "To Service Our Indebtedness and Fund Our Working Capital and Capital Expenditures, We Will Require a Significant Amount of Cash. Our Ability to Generate Cash Depends on Many Factors Beyond Our Control", now titled "The Operation of Our Business Requires a Significant Amount of Cash. Our Ability to Generate Cash Depends on Many Factors Beyond Our Control," which has been updated to reflect our cash flow requirements;

Changes to the risk factor below entitled "We May Be Unable to Refinance Our Indebtedness," which has been updated to reflect risks related to our plans to refinance portions of our senior indebtedness from time to time;

Changes to the risk factor below entitled "The Loss of Key Personnel and Difficulty Attracting, Integrating and Retaining Qualified Personnel Could Harm Our Business," which has been updated to reflect changes in senior management;

Changes to the risk factor below entitled "Action by Congress or Government Agencies May Increase Our Costs of Providing Service or Require Us to Change Our Services," which has been updated to reflect risks related to the federal government's "Lifeline" program; and

Changes to the risk factor below entitled "Declines in Our Operating or Financial Performance Could Result in an Impairment of Our Indefinite-Lived Assets, Including Goodwill," which has been updated to reflect risks relating to impairment of our goodwill.

Risks Related to Our Business and Industry

We Have Experienced Net Losses, and We May Not Be Profitable in the Future.

We experienced net losses of \$46.0 million and \$140.3 million for the three and six months ended June 30, 2012 and net losses of \$317.7 million, \$785.1 million and \$238.0 million for the years ended December 31, 2011, 2010 and 2009, respectively. We may not generate profits in the future on a consistent basis or at all. Our strategic objectives depend on our ability to successfully and cost-effectively operate our markets, on our ability to forecast and respond appropriately to changes in the competitive and economic environment, on the successful enhancement of our distribution channels, and on customer acceptance of our Cricket product and service offerings. If we fail to attract additional customers for our Cricket products and services and fail to achieve consistent profitability in the future, that failure could have a material adverse effect on our financial condition.

We May Not Be Successful in Increasing Our Customer Base Which Would Negatively Affect Our Business Plans and Financial Outlook.

Our growth on a quarter-by-quarter basis has varied substantially in the past. We believe that this uneven growth generally reflects seasonal trends in customer activity, promotional activity, competition in the wireless telecommunications market, our launch of products and services in new markets and varying national economic conditions. Our current business plans assume that we will continue to increase our customer base over time, providing us with increased economies of scale. However, from time to time we have experienced quarterly net customer losses that decreased our total number of customers, including in the second quarter of 2012. Our ability to continue to grow our customer base and to achieve the customer penetration levels we currently believe are possible in

our markets is subject to a number of risks, including, among other things, increased competition from existing or new competitors, higher-than-anticipated churn, our inability to manage or increase our network capacity to meet increasing customer demand, billing or other system disruptions, inventory shortages, unfavorable economic conditions (which may have a disproportionate negative impact on portions of our customer base), our inability to successfully enhance our distribution channels, changes in the demographics of our markets, adverse changes in the legislative and regulatory environment and other factors that may limit our ability to grow our customer base. If we are unable to attract and retain a growing customer base, our current business plans and financial outlook may be harmed.

We Face Significant Competition Which Could Have a Material Adverse Effect on Demand for Cricket Service.

The wireless telecommunications industry is very competitive. In general, we compete with national facilities-based wireless

providers and their prepaid affiliates or brands, local and regional carriers, non-facilities-based MVNOs, voice-over-internet-protocol service providers, traditional landline service providers, cable companies and mobile satellite service providers.

Many of our competitors have greater name and brand recognition, larger spectrum holdings, larger footprints, access to greater amounts of capital, greater technical, sales, marketing and distribution resources and established relationships with a larger base of current and potential customers. These advantages may allow our competitors to provide service offerings with more extensive features and options than those we currently provide, offer the latest and most popular devices through exclusive vendor arrangements, market to broader customer segments and offer service over larger geographic areas than we can, offer bundled service offerings which include landline phone, television and internet services that we are not able to duplicate, and purchase equipment, supplies, devices and services at lower prices than we can. As device selection and pricing become increasingly important to customers, any restriction on our ability to offer customers the latest and most popular devices as a result of exclusive dealings between device manufacturers and our larger competitors could put us at a significant competitive disadvantage and make it more difficult for us to attract and retain customers. In addition, some of our competitors are able to offer their customers roaming services at lower rates. As consolidation in the industry creates even larger competitors, advantages that our competitors may have, as well as their bargaining power as wholesale providers of roaming services, may increase. For example, in connection with the offering of our nationwide voice and data roaming services, we have encountered problems with certain large wireless carriers in negotiating terms for roaming arrangements that we believe are reasonable, and we believe that consolidation has contributed significantly to some carriers' control over the terms and conditions of wholesale roaming services.

The competitive pressures of the wireless telecommunications industry and the attractive growth prospects in the prepaid segment have continued to increase and have caused a number of our competitors to offer competitively-priced unlimited prepaid and postpaid service offerings or increasingly large bundles of minutes of use at increasingly lower prices, which are competing with the predictable and unlimited Cricket Wireless service plans. For example, AT&T, Sprint Nextel, T-Mobile and Verizon Wireless each now offer unlimited service offerings. Sprint Nextel also offers competitively-priced unlimited service offerings under its Boost Unlimited and Virgin Mobile brands, which are similar to our Cricket Wireless service. T-Mobile also offers an unlimited plan that is competitively priced with our Cricket Wireless service. In addition, a number of MVNOs offer competitively-priced service offerings. For example, Tracfone Wireless sells wireless offerings in Wal-Mart under its "Straight Talk" brand using a number of carriers' wireless networks. We also face additional competition in the prepaid segment from lifeline service offerings by competitors including Tracfone (through its SafeLink offerings) and Sprint Nextel (through its Assurance Wireless offerings). Lifeline services are available to consumers at reduced costs (and in some cases at no cost) because carriers offering this service receive a subsidy payment from the federal universal service fund, or USF, program. Moreover, some competitors offer prepaid wireless plans that are being advertised heavily to the same demographic segments we target. These various service offerings have presented, and are expected to continue to present, strong competition in markets in which our offerings overlap.

In addition to our voice offerings, many companies offer other products and services that compete with those we offer. For example, there are numerous music services that compete with our Muve Music service, including the iTunes service offered by Apple, Inc. and various streaming services offered by Rhapsody, Pandora, Spotify and others. In addition, there are a number of mobile broadband services that compete with our Cricket Broadband service, including those offered by AT&T, Sprint Nextel, T-Mobile and Verizon Wireless. In addition, Clearwire Corporation has launched unlimited 4G wireless broadband service in a number of markets in which we offer Cricket Broadband. Best Buy also offers a mobile broadband product using Sprint's wireless network. These service offerings have presented, and are expected to continue to present, strong competition in markets in which our service offerings overlap.

We may also face additional competition from new entrants in the wireless marketplace, many of whom may have significantly more resources than we do. The FCC is pursuing policies designed to increase the number of wireless licenses and spectrum available for the provision of voice, data and mobile broadband services in each of our markets, as well as policies to increase the level of broadband competition. For example, the FCC has adopted rules that allow the partitioning, disaggregation and leasing of wireless licenses, which may increase the number of our competitors. The FCC announced in March 2010, as part of its National Broadband Plan, the goal of making an additional 500 MHz of spectrum available for broadband use within the next 10 years, of which the FCC stated that 300 MHz should be made available for mobile use within five years. The FCC has also adopted policies to allow satellite operators to use portions of their spectrum for ancillary terrestrial use and recently made further changes intended to facilitate the terrestrial use of this spectrum for voice, data and mobile broadband services. Taking advantage of such developments, at least one new entrant, LightSquared, announced plans to launch a new wholesale, nationwide 4G-LTE wireless broadband network integrated with satellite coverage to allow partners to offer terrestrial-only, satellite-only or integrated satellite-terrestrial services to their customers, although LightSquared faces substantial obstacles with respect to the construction and deployment of its proposed network. The FCC has also permitted the offering of broadband services over power lines. The auction and licensing of new spectrum, the re-purposing of other spectrum or the pursuit of policies designed to encourage broadband adoption across wireline and wireless platforms may result in new or existing competitors acquiring additional capacity, which could allow them to offer services that we may not be able to offer cost effectively, or at all, with the licenses we hold or to which

we have access.

Our ability to remain competitive will depend, in part, on our ability to anticipate and respond to various competitive factors and to keep our costs low. The evolving competitive landscape negatively impacted our financial and operating results beginning in 2009, resulting in fewer new customers, lower average monthly revenue per customer and increased costs. We substantially revised our product and service offerings beginning in the second half of 2010 to respond to the evolving competitive landscape, including revising the features of a number of our Cricket service offerings, offering “all-inclusive” service plans, eliminating certain late fees we previously charged to customers who reinstated their service after having failed to pay their monthly bill on time, entering into a new wholesale agreement and nationwide data roaming agreement and offering “smartphones” and other new handsets and devices. We believe that these changes to our business made our product and service offerings more attractive to customers, improved our competitive position in the marketplace and improved our financial and operational performance. Since their introduction, these initiatives have also resulted in increased costs, including equipment subsidy for new and upgrading customers and incremental service costs. The extent to which these initiatives will positively impact our future financial and operational results will depend upon our efforts to enhance our retail distribution, continued customer acceptance of our product and service offerings and our ability to retain these customers. The evolving competitive landscape may result in more competitive pricing, slower growth, higher costs and increased customer turnover. Any of these results or actions could have a material adverse effect on our business, financial condition and operating results.

General Economic Conditions May Adversely Affect Our Business, Financial Performance or Ability to Obtain Debt or Equity Financing on Reasonable Terms or at All.

Our business and financial performance are sensitive to changes in general economic conditions, including changes in interest rates, consumer credit conditions, consumer debt levels, consumer confidence, rates of inflation (or concerns about deflation), unemployment rates, energy costs and other macro-economic factors. Market and economic conditions have been unprecedented and challenging in recent years. Continued concerns about the systemic impact of a long-term downturn, high unemployment, high energy costs, the availability and cost of credit and unstable housing and mortgage markets have contributed to increased market volatility and economic uncertainty. Concern about the stability of the financial markets and the strength of counterparties has led many lenders and institutional investors to reduce or cease to provide credit to businesses and consumers, and less liquid credit markets have adversely affected the cost and availability of credit. These factors have led to a decrease in spending in recent years by businesses and consumers alike.

Continued market turbulence and weak economic conditions may materially adversely affect our business and financial performance in a number of ways. Because we do not require customers to sign fixed-term contracts or pass a credit check, our service is available to a broad customer base and may be attractive to a market segment that is more vulnerable to weak economic conditions. As a result, during general economic downturns, we may have greater difficulty in gaining new customers within this base for our services and existing customers may be more likely to terminate service due to an inability to pay. For example, high unemployment levels have historically impacted our customer base, especially the lower-income segment of our customer base, by decreasing their discretionary income and affecting their ability to maintain service. Continued weak economic conditions and tight credit conditions may also adversely impact our vendors and dealers, some of which have filed for or may be considering bankruptcy, or may experience cash flow or liquidity problems, any of which could adversely impact our ability to distribute, market or sell our products and services. Sustained difficult, or worsening, general economic conditions could have a material adverse effect on our business, financial condition and results of operations.

In addition, U.S. credit markets have in recent years experienced significant dislocations and liquidity disruptions. Uncertainty in the capital markets could negatively impact our ability to access additional debt financing or to

refinance existing indebtedness in the future on favorable terms or at all. These general economic conditions, combined with intensified competition in the wireless telecommunications industry and other factors, have also adversely affected the trading prices of equity securities of many U.S. companies, including Leap, which could significantly limit our ability to raise additional capital through the issuance of common stock, preferred stock or other equity securities. Any of these risks could impair our ability to fund our operations or limit our ability to expand our business, which could have a material adverse effect on our business, financial condition and results of operations.

If We Experience Low or Negative Rates of Customer Acquisition or High Rates of Customer Turnover, Our Ability to Become Profitable Will Decrease.

Our rates of customer acquisition and turnover are affected by a number of competitive factors in addition to the macro-economic factors described above, including the size of our service areas, network performance and reliability issues, our device and service offerings, customer perceptions of our services, customer care quality and wireless number portability. Managing these factors and customers' expectations is essential in attracting and retaining customers. Although we have implemented programs to attract

new customers and address customer turnover, we cannot assure you that these programs or our strategies to address customer acquisition and turnover will be successful. A high rate of customer turnover or low or negative rate of new customer acquisition would reduce revenues and increase the total marketing expenditures required to attract the minimum number of customers required to sustain our business plan which, in turn, could have a material adverse effect on our business, financial condition and results of operations.

We May Be Unable to Obtain or Maintain the Roaming and Wholesale Services We Need From Other Carriers to Remain Competitive.

Many of our competitors have regional or national networks which enable them to offer automatic roaming services to their subscribers at a lower cost than we can offer. The networks we operate do not, by themselves, provide national coverage and we must pay fees to other carriers who provide roaming and wholesale services to us. We currently rely on roaming agreements with several carriers for the majority of our roaming services and generally on one key carrier for 3G data roaming services. We have also entered into a wholesale agreement which we use to offer Cricket services in nationwide retailers outside of our current network footprint. Most of our roaming agreements cover voice but not data services and some of these agreements may be terminated on relatively short notice. In addition, we believe that the rates charged to us by some of these carriers are higher than the rates they charge to certain other roaming partners. Furthermore, we do not currently have 4G data agreements with any carriers currently providing these services.

The FCC has adopted rules requiring commercial mobile radio service providers to provide automatic roaming for voice and SMS text messaging services on just, reasonable and non-discriminatory terms. The FCC has also adopted rules generally requiring carriers to offer data roaming services. These orders, however, do not provide or mandate any specific mechanism for determining the reasonableness of roaming rates for voice, SMS text messaging or data services and require that roaming complaints be resolved on a case-by-case basis, based on a non-exclusive list of factors that can be taken into account in determining the reasonableness of particular conduct or rates. In addition, the FCC's data roaming order is not final. Verizon Wireless has challenged the FCC's data roaming order and rules in the United States Court of Appeals for the District of Columbia Circuit and requested that the rules be vacated, and the order is also subject to a petition for reconsideration at the FCC. In light of the current FCC rules, orders and proceedings, if we were unexpectedly to lose the benefit of one or more key roaming or wholesale agreements, we may be unable to obtain similar replacement agreements and as a result may be unable to continue providing nationwide voice and 3G data roaming services for our customers or may be unable to provide such services on a cost-effective basis. In addition, we may be unable to obtain cost-effective roaming arrangements for 4G data roaming services. Our inability to obtain new or replacement roaming services on a cost-effective basis may limit our ability to compete effectively for wireless customers, which may increase our churn and decrease our revenues, which in turn could materially adversely affect our business, financial condition and results of operations.

We Have Entered into Agreements with Significant Purchase or Revenue Commitments and Cannot Guarantee that We Will Meet These Commitments or Realize the Expected Benefits from These Agreements.

In August 2010, we entered into a wholesale agreement with an affiliate of Sprint Nextel which we use to offer Cricket services in nationwide retailers outside of our current network footprint. We agreed, among other things, to provide a minimum of \$300 million of revenue under the agreement, as amended, over its initial five-year term (against which we can credit up to \$100 million of revenue under other existing commercial arrangements between the companies), with a minimum of \$20 million of revenue to be provided in 2011, a minimum of \$75 million of revenue to be provided in 2012, a minimum of \$80 million of revenue to be provided in 2013, a minimum of \$75 million of revenue to be provided in 2014 and a minimum of \$50 million of revenue to be provided in 2015. Any revenue we provide in a given year above the minimum revenue commitment for that particular year is credited to the next succeeding year. However, to the extent our revenues were to fall beneath the applicable commitment amount for any given year, excess revenues from a subsequent year could not be carried back to offset such shortfall. Our obligation

to provide the minimum revenue amount for any calendar year is subject to Sprint's compliance with specified covenants in the wholesale agreement. Based upon a review of information provided by us to Sprint, we recently informed Sprint that certain of those covenants had not been met and that, as a result, we are not subject to the minimum revenue commitment for 2012. Sprint has disputed that assertion. Notwithstanding our release from the 2012 minimum revenue commitment, we expect to purchase services from Sprint that would satisfy a significant majority of the original \$75 million revenue commitment for 2012.

In the event we are involved in a change-of-control transaction with another facilities-based wireless carrier with annual revenues of at least \$500 million in the fiscal year preceding the date of the change of control agreement (other than MetroPCS), either we (or our successor in interest) or Sprint may terminate the agreement within 60 days following the closing of such a transaction. In connection with any such termination, we (or our successor in interest) would be required to pay to Sprint a specified percentage of the remaining aggregate minimum revenue commitment, with the percentage to be paid depending on the year in which the change of control agreement was entered into, being 30% for any such agreement entered into in 2012, 20% for any such agreement

entered into in 2013 and 10% for any such agreement entered into in 2014 or 2015. In the event that we are involved in a change-of-control transaction with MetroPCS during the term of the wholesale agreement, then the agreement would continue in full force and effect, subject to certain revisions, including, without limitation, an increase to the total minimum revenue commitment to \$350 million, taking into account any revenue contributed by Cricket prior to the date thereof.

In addition, in May 2012 we entered into a three-year minimum purchase commitment with Apple Inc. to purchase iPhones. The commitment began upon our launch of sales of the iPhone in certain markets in June 2012 and is currently estimated to be approximately \$900 million, with annual commitments during the three-year period that increase moderately in the second and third years. The actual amount that we spend over the term of the commitment will depend on many factors, including customer acceptance and availability of current and future versions of the device and costs for the device.

Other agreements that we have entered into with significant purchase or revenue commitments include our agreements with music content providers that require us to purchase certain minimum amounts of content for our Muve Music service. As we continue to expand the size and scope of our business, we may enter into additional agreements with vendors with significant purchase or revenue commitments to enable us to offer enhanced products and services or to obtain more favorable overall purchasing terms and conditions.

There are numerous risks and uncertainties that could impact our ability to realize the expected benefits from these arrangements or any new ones we may enter into. We cannot guarantee that customers will accept our products and service offerings at the levels we expect, that prices will not decline to levels below what we have negotiated to pay or that we will be able to satisfy any purchase or revenue commitments. In addition, we also cannot guarantee that we will be able to renew these agreements or any future agreement on terms that will be acceptable to us. If we are unable to attract new wireless customers and sell our products and services at the levels we expect, our ability to derive benefits from these agreements or any future agreement we enter into could be limited, which could materially adversely affect our business, financial condition and results of operations.

Our Business and Stock Price May Be Adversely Affected if Our Internal Controls Are Not Effective.

Section 404 of the Sarbanes-Oxley Act of 2002 requires companies to conduct a comprehensive evaluation of their internal control over financial reporting. To comply with this statute, each year we are required to document and test our internal control over financial reporting; our management is required to assess and issue a report concerning our internal control over financial reporting; and our independent registered public accounting firm is required to report on the effectiveness of our internal control over financial reporting.

In our quarterly and annual reports (as amended) for the periods ended from December 31, 2006 through September 30, 2008, we reported a material weakness in our internal control over financial reporting which related to the design of controls over the preparation and review of the account reconciliations and analysis of revenues, cost of revenues and deferred revenues, and ineffective testing of changes made to our revenue and billing systems in connection with the introduction or modification of service offerings. In addition, we previously reported that certain material weaknesses in our internal control over financial reporting existed at various times during the period from September 30, 2004 through September 30, 2006. These material weaknesses included excessive turnover and inadequate staffing levels in our accounting, financial reporting and tax departments, weaknesses in the preparation of our income tax provision, and weaknesses in our application of lease-related accounting principles, fresh-start reporting oversight, and account reconciliation procedures.

Although we believe we took appropriate actions to remediate the control deficiencies we identified and to strengthen our internal control over financial reporting, we cannot assure you that we will not discover other material weaknesses

in the future or that no material weakness will result from any difficulties, errors, delays or disruptions while we implement and transition to significant new internal systems, including the recent transition to our new customer billing system. The existence of one or more material weaknesses could result in errors in our financial statements, and substantial costs and resources may be required to rectify these or other internal control deficiencies. If we cannot produce reliable financial reports, investors could lose confidence in our reported financial information, the market price of Leap common stock could decline significantly, we may be unable to obtain additional financing to operate and expand our business, and our business and financial condition could be harmed.

Our Primary Business Strategy May Not Succeed in the Long Term.

A major element of our business strategy is to offer consumers unlimited wireless services for a flat rate without requiring them to enter into a fixed-term contract or pass a credit check. We provide nationwide voice, data and mobile broadband wireless services through our own Cricket network footprint and through roaming agreements that we have entered into with other carriers. In addition, we have entered into a wholesale agreement which we use to offer Cricket services in nationwide retailers outside of our current network footprint. Our strategy of offering unlimited wireless services nationwide may not prove to be successful in the

long term. From time to time, we also evaluate our product and service offerings and the demands of our target customers and may modify, change, adjust or discontinue our product and service offerings or offer new products and services on a permanent, trial or promotional basis. We cannot assure you that these product or service offerings will be successful or prove to be profitable.

We Are Subject to Numerous Surcharges, Taxes and Fees from Federal, State and Local Governments, and the Applicability and Amount of These Fees Can Be Uncertain.

We calculate and remit surcharges, taxes and fees to numerous federal, state and local jurisdictions in connection with the services we provide. These fees include federal USF fees and common carrier regulatory fees. In addition, many state and local governments impose various surcharges, taxes and fees on our activities, including with respect to sales of our products and services and to our purchases of telecommunications services from various carriers. In many cases, the applicability and method of calculating these surcharges, taxes and fees may be uncertain, and our calculation, assessment and remittance of these amounts may be contested. In the event that we have incorrectly assessed and remitted amounts that were due, we could be subject to fines and penalties which could materially impact our financial condition. In addition, although we remit applicable surcharges, taxes and fees that are due with respect to the services we provide, we do not recover these amounts (other than sales taxes) as additional charges from customers subscribing to our “all-inclusive” service plans, which are priced to include telecommunications taxes and certain other fees. In the event that federal, state and/or local municipalities were to significantly increase taxes and regulatory fees on our services, it could have a significant adverse effect on our margins and financial and operational results.

If We Are Unable to Manage Our Growth, Our Operations Could Be Adversely Impacted.

We have experienced substantial growth in a relatively short period of time, and we expect to continue to experience growth in the future in our markets. In recent years, we have pursued opportunities to strengthen and expand our business. These activities have included the broadening of our portfolio of products and services, including through the introduction of “all-inclusive” service plans and our Muve Music service. We have also pursued activities to strengthen and expand the available network service area for Cricket products and services, which have included enhancing network coverage and capacity in our existing markets, entering into agreements to provide Cricket customers with nationwide voice and data roaming services as well as a wholesale agreement which we use to offer Cricket services in nationwide retailers outside of our current network footprint. In addition, we plan to offer next-generation LTE network technology services to customers in at least two-thirds of our network footprint over the next two to three years. We have also pursued activities to continue to strengthen our growing retail presence in our existing markets and expand our distribution nationwide in thousands of mass-market retail locations.

The management of our growth requires, among other things, continued development of our financial controls, budgeting and forecasting processes and information management systems, stringent control of costs, diligent management of our network infrastructure and its growth, increased spending associated with marketing activities and the acquisition of new customers, the ability to attract and retain qualified management personnel and the training of new personnel. Furthermore, the implementation of new or expanded systems or platforms to accommodate our growth, and the transition to such systems or platforms from our existing infrastructure, could result in unpredictable technological or other difficulties. Failure to successfully manage our expected growth and development, to effectively manage our markets, to enhance our processes and management systems or to timely and adequately resolve any such difficulties could have a material adverse effect on our business, financial condition and results of operations.

In addition, growth in our markets, the integration of newly-acquired markets or businesses, the introduction of new device offerings and changes in our distribution channels require continued management and control of our device

inventories. From time to time, we have experienced inventory shortages, most notably with certain of our strongest-selling devices, and these shortages have had the effect of limiting customer activity. We have implemented a new inventory management system and have undertaken other efforts to address inventory forecasting. We have entered into a new inventory logistics and supply chain outsourcing arrangement with a third party to manage the planning, purchasing and fulfillment of handsets and other devices. However, there can be no assurance that this new agreement will improve device inventory management or that we will not experience inventory shortages in the future. Any failure to effectively manage and control our device inventories could adversely affect our ability to gain new customers and have a material adverse effect on our business, financial condition and results of operations.

We Have Made Significant Investments, and May Continue to Invest, in Ventures That We Do Not Control.

We own an 85% non-controlling membership interest in Savary Island. Savary Island is a “very small business” designated entity under FCC regulations, which holds wireless spectrum in the upper Midwest portion of the U.S. and which leases a portion of that spectrum to us. Our participation in Savary Island is structured as a non-controlling membership interest in accordance with FCC rules and regulations. We have agreements with our venture partner in Savary Island that are intended to allow us to

participate to a limited extent in the development of the business through the venture. However, these agreements do not provide us with control over the business strategy, financial goals, build-out plans or other operational aspects of the venture, and may be terminated for convenience by the controlling member. The FCC's rules restrict our ability to acquire controlling membership interests in designated entities during the period that such entities must maintain their eligibility as a designated entity, as defined by the FCC.

The entities or persons that control Savary Island or any other non-controlled ventures in which we may invest may have interests and goals that are inconsistent or different from ours which could result in the venture taking actions that negatively impact our business or financial condition. In addition, if any of the members of any such ventures files for bankruptcy or otherwise fails to perform its obligations or does not manage the venture effectively, or if the venture files for bankruptcy, we may lose our equity investment in, and any present or future opportunity to acquire the assets (including wireless licenses) of, such entity (although a substantial portion of our investment in Savary Island consists of secured debt).

The FCC has implemented rules and policies to ensure that only legitimate small businesses benefit from the program, and that such small businesses are not controlled or manipulated by larger wireless carriers or other investors that do not meet the small business qualification tests. For example, designated entity structures are subject to a requirement that they seek approval for any event that might affect their ongoing eligibility (for example, changes in agreements that the FCC has previously reviewed), annual reporting requirements and a commitment by the FCC to audit each designated entity at least once during the license term. While we believe that our Savary Island venture is in compliance with these rules, we cannot predict whether and to what extent the FCC will seek to further modify the designated entity rules. In addition, third parties and the federal government have in the past challenged certain designated entity structures, alleging violations of federal qui tam and other laws and seeking significant monetary damages. We cannot predict the degree to which rule changes, federal court litigation surrounding designated entity structures, increased regulatory scrutiny or third party or government lawsuits will affect our current or future business ventures, including our arrangements with Savary Island, or our or Savary Island's current license holdings or our participation in future FCC spectrum auctions. Our failure to comply with the FCC's designated rules could lead to fines or the mandatory restructuring by the agency of our designated entity venture, and in extreme cases, license revocation, third-party lawsuits and/or criminal penalties.

We May Have Difficulty Managing and Integrating New Joint Ventures or Partnerships That We Form or Companies or Businesses That We Acquire.

In addition to growing our business through the operation of our existing and new markets, we may also expand or enhance our business by entering into joint ventures or partnerships with others or acquiring all or portions of other wireless communications companies or complementary businesses. For example, in October 2010, we and Pocket contributed substantially all of our respective wireless spectrum and operating assets in the South Texas region to STX Wireless to create a joint venture to provide Cricket service in the South Texas region, with Cricket receiving a 75.75% controlling membership interest in the venture and Pocket receiving a 24.25% non-controlling membership interest.

Entering into joint ventures and partnerships or acquiring other companies or businesses may create numerous risks and uncertainties, including unanticipated costs and liabilities, possible difficulties associated with the integration of the parties' various operations and the potential diversion of management's time and attention from our existing operations. In addition, the consolidation of operating assets and operations following an acquisition or the formation of a joint venture may result in significant costs. For example, during 2011 we integrated Cricket and Pocket operating assets in the South Texas region to enable the combined network and retail operations of the STX Wireless joint venture to operate more efficiently. During the year ended December 31, 2011, we incurred approximately \$26.4 million of integration charges relating primarily to certain leased cell site and retail store locations contributed to STX

Wireless that it no longer used, which were recorded in impairments and other charges within our consolidated statements of operations. Our failure to effectively manage STX Wireless or other new partnerships that we may enter into or companies or businesses that we could acquire could have a material adverse effect on our business, financial condition and results of operations.

Our Significant Indebtedness Could Adversely Affect Our Financial Health and Prevent Us From Fulfilling Our Obligations.

We have now and will continue to have a significant amount of indebtedness. As of June 30, 2012, our total outstanding indebtedness was \$3,224.4 million, including \$250 million in aggregate principal amount of convertible senior notes due 2014, \$300 million in aggregate principal amount of senior notes due 2015, \$21.9 million in principal amount of a non-negotiable promissory note maturing in 2015, \$1,100 million in aggregate principal amount of senior secured notes due 2016 and \$1,600 million in aggregate principal amount of senior notes due 2020.

Our significant indebtedness could have material consequences. For example, it could:

- make it more difficult for us to service or refinance our debt obligations;
- increase our vulnerability to general adverse economic and industry conditions;
- impair our ability to obtain additional financing in the future for working capital needs, capital expenditures, network build-out and other activities, including acquisitions and general corporate purposes;
 - require us to dedicate a substantial portion of our cash flows from operations to the payment of principal and interest on our indebtedness, thereby reducing the availability of our cash flows to fund working capital needs, capital expenditures, acquisitions and other general corporate purposes;
- limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate; and
- place us at a disadvantage compared to our competitors that have less indebtedness.

Any of these risks could impact our ability to fund our operations or limit our ability to expand our business, which could have a material adverse effect on our business, financial condition and results of operations. Furthermore, any significant capital expenditures or increased operating expenses associated with the launch of new product or service offerings or other business investment initiatives will decrease OIBDA and free cash flow for the periods in which we incur such costs, increasing the risk that we may not be able to service our indebtedness.

Despite Current Indebtedness Levels, We May Incur Additional Indebtedness. This Could Further Increase the Risks Associated with Our Leverage.

The terms of the indentures governing Cricket's secured and unsecured senior notes permit us, subject to specified limitations, to incur additional indebtedness, including secured indebtedness. The indenture governing Leap's convertible senior notes does not limit our ability to incur debt.

We may incur additional indebtedness in the future, as market conditions permit, to enhance our liquidity and to provide us with additional flexibility to pursue business investment initiatives, which could consist of debt financing from the public and/or private capital markets. If new indebtedness is added to our current levels of indebtedness, the related risks that we now face could intensify. In addition, depending on the timing and extent of any additional indebtedness that we could incur and our then-current consolidated leverage ratio, such additional amounts could potentially result in the issuance of adverse credit ratings affecting us and/or our outstanding indebtedness. For example, following the issuance of \$400 million of additional 7.75% senior notes due 2020 in May 2011, our unsecured debt was downgraded by one credit rating agency, although we did not experience any changes to our overall credit rating. Any future adverse credit ratings could make it more difficult or expensive for us to borrow in the future and could affect the trading prices of our secured and unsecured senior notes, our convertible senior notes and our common stock.

The Operation of Our Business Requires a Significant Amount of Cash. Our Ability to Generate Cash Depends on Many Factors Beyond Our Control.

Our business requires that we generate a significant amount of cash flow from operations to fund ongoing liquidity requirements, including payments on our indebtedness. Our ability to generate cash flow from operations is subject to our operational performance and to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. We cannot assure you that our business will generate sufficient cash flow from operations

to fund our ongoing liquidity needs. If cash flow from operations is insufficient, we may be required to take actions, such as delaying or reducing capital expenditures, attempting to restructure or refinance our indebtedness prior to maturity, reducing operating expenses, selling assets or seeking additional capital. Any or all of these actions may be insufficient to allow us to fund our liquidity needs. Further, we may be unable to take any of these actions on commercially reasonable terms or at all.

We May Be Unable to Refinance Our Indebtedness.

We had \$3,224.4 million in senior indebtedness outstanding as of June 30, 2012, which was comprised of \$250 million of 4.50% unsecured convertible senior notes due 2014, \$300 million of 10.0% unsecured senior notes due 2015, \$21.9 million in principal amount of a non-negotiable promissory note maturing in 2015, \$1,100 million of 7.75% senior secured notes due 2016, and \$1,600 million of 7.75% unsecured senior notes due 2020. We expect to refinance all or substantially all of our senior indebtedness due

between 2014 and 2016 by accessing the capital markets from time to time. We may also generate additional liquidity through asset sales, proceeds from which could be used to repay portions of our indebtedness or for other general corporate purposes. If we are unable to refinance our indebtedness as planned, we will likely be required to take additional actions to generate liquidity such as delaying or reducing capital expenditures, reducing operating expenses, selling additional assets or seeking additional equity capital. There can be no assurance, however, that we will be able to obtain sufficient funds to enable us to repay or refinance any of our indebtedness on commercially reasonable terms or at all.

Covenants in Our Indentures or in Credit Agreements or Indentures That We May Enter into in the Future May Limit Our Ability to Operate Our Business.

The indentures governing Cricket's secured and unsecured senior notes contain covenants that restrict the ability of Leap, Cricket and their restricted subsidiaries to make distributions or other payments to our investors or subordinated creditors unless we satisfy certain financial tests or other criteria. In addition, these indentures include covenants restricting, among other things, the ability of Leap, Cricket and their restricted subsidiaries to:

- incur additional indebtedness;
- create liens or other encumbrances;
- place limitations on distributions from restricted subsidiaries;
- pay dividends, make investments, prepay subordinated indebtedness or make other restricted payments;
- issue or sell capital stock of restricted subsidiaries;
- issue guarantees;
- sell or otherwise dispose of all or substantially all of our assets;
- enter into transactions with affiliates; and
- make acquisitions or merge or consolidate with another entity.

The restrictions in the indentures governing Cricket's secured and unsecured senior notes could limit our ability to make borrowings, obtain debt financing, repurchase stock, refinance or pay principal or interest on our outstanding indebtedness, complete acquisitions for cash or debt or react to changes in our operating environment. Any credit agreement or indenture that we may enter into in the future may have similar or more onerous restrictions.

Under the indentures governing our secured and unsecured senior notes and convertible senior notes, if certain "change of control" events occur, each holder of notes may require us to repurchase all of such holder's notes at a purchase price equal to 101% of the principal amount of secured or unsecured senior notes, or 100% of the principal amount of convertible senior notes, plus accrued and unpaid interest.

If we default under any of the indentures governing our secured or unsecured senior notes or convertible senior notes because of a covenant breach or otherwise, all outstanding amounts thereunder could become immediately due and payable. We cannot assure you that we would be able to obtain a waiver should a default occur. Any acceleration of amounts due would have a material adverse effect on our liquidity and financial condition, and we cannot assure you that we would have sufficient funds to repay all of the outstanding amounts under the indentures governing our

secured and unsecured senior notes and convertible senior notes.

Our Ability to Use Our Net Operating Loss Carryforwards to Reduce Future Possible Tax Payments Could Be Negatively Impacted if There Is an “Ownership Change” (as Defined Under Section 382 of the Internal Revenue Code); Our Tax Benefit Preservation Plan May Not Be Effective to Prevent an Ownership Change.

We have substantial federal and state net operating losses, or NOLs, for income tax purposes. Subject to certain requirements, we may “carry forward” our federal NOLs for up to 20 years to offset future taxable income and reduce our income tax liability. For state income tax purposes, the NOL carryforward period ranges from five to 20 years. At June 30, 2012, we had federal and state NOLs of approximately \$2.6 billion (which begin to expire in 2022 for federal income tax purposes and of which \$37.2 million will expire at the end of 2012 for state income tax purposes). While these NOL carryforwards have a potential to be used to offset future ordinary taxable income and reduce future cash tax liabilities by approximately \$991.4 million, our ability to utilize

these NOLs will depend upon the availability of future taxable income during the carryforward period and, as such, there is no assurance we will be able to realize such tax savings.

Our ability to utilize NOLs could be further limited if we were to experience an “ownership change,” as defined in Section 382 of the Internal Revenue Code and similar state provisions. In general terms, an ownership change can occur whenever there is a cumulative shift in the ownership of a company by more than 50 percentage points by one or more “5% stockholders” within a three-year period. The occurrence of such a change in our ownership would generally limit the amount of NOL carryforwards we could utilize in a given year to the aggregate fair market value of Leap common stock immediately prior to the ownership change, multiplied by the long-term tax-exempt interest rate in effect for the month of the ownership change.

The determination of whether an ownership change has occurred for purposes of Section 382 is complex and requires significant judgment. The occurrence of such an ownership change would accelerate cash tax payments we would be required to make and likely result in a substantial portion of our NOLs expiring before we could fully utilize them. As a result, any restriction on our ability to utilize these NOL carryforwards could have a material adverse impact on our business, financial condition and future cash flows.

On August 30, 2011, our board of directors adopted a Tax Benefit Preservation Plan to help deter acquisitions of Leap common stock that could result in an ownership change under Section 382 and thus help preserve our ability to use our NOL carryforwards. The Tax Benefit Preservation Plan was approved by our stockholders in May 2012. The Tax Benefit Preservation Plan is designed to deter acquisitions of Leap common stock that would result in a stockholder owning 4.99% or more of Leap common stock (as calculated under Section 382), or any existing holder of 4.99% or more of Leap common stock acquiring additional shares, by substantially diluting the ownership interest of any such stockholder unless the stockholder obtains an exemption from our board of directors. Because the number of shares of Leap common stock outstanding at any particular time for purposes of the Tax Benefit Preservation Plan is determined in accordance with Section 382, it may differ from the number of shares that we report as outstanding in our SEC filings.

Although the Tax Benefit Preservation Plan is intended to reduce the likelihood of an adverse ownership change under Section 382, the Tax Benefit Preservation Plan may not prevent such an ownership change from occurring and does not protect against all transactions that could cause an ownership change, such as sales of Leap common stock by certain greater than 5% stockholders or transactions that occurred prior to the adoption of the Tax Benefit Preservation Plan. Accordingly, we cannot assure you that an ownership change under Section 382 will not occur and significantly limit the use of our NOLs.

A Significant Portion of Our Assets Consists of Wireless Licenses, Goodwill and Other Intangible Assets.

As of June 30, 2012, 41.9% of our assets consisted of wireless licenses (including assets held for sale), goodwill and other intangible assets. The value of our assets will depend on market conditions, the availability of buyers and similar factors. While the value of these assets is determined by using the market approach for purposes of our impairment testing, those values may differ from what would ultimately be realized by us in a sales transaction and that difference may be material. By their nature, our intangible assets may not be readily saleable or, if saleable, there may be substantial delays in their liquidation. For example, prior FCC approval is required in order for us to sell, or for any remedies to be exercised by our lenders with respect to, our wireless licenses, and obtaining such approval could result in significant delays and reduce the proceeds obtained from the sale or other disposition of our wireless licenses.

The Wireless Industry Is Experiencing Rapid Technological Change; We Plan to Deploy LTE Network Technology, Which Will Require Us to Make Significant Capital Investments.

The wireless communications industry continues to experience significant technological change, as evidenced by the ongoing improvements in the capacity and quality of digital technology, the development and commercial acceptance of wireless data services, shorter development cycles for new products and enhancements and changes in end-user requirements and preferences. Our continued success will depend, in part, on our ability to anticipate or adapt to technological changes and to offer, on a timely basis, services that meet customer demands.

Competitors have begun providing competing wireless telecommunications service through the use of next-generation technologies, such as LTE, WiMax and HSPA+. We plan to offer next-generation LTE network technology services to customers in at least two-thirds of our network footprint over the next two to three years, directly and through partnerships or joint ventures with other carriers. We cannot predict, however, which of the many possible future technologies, standards, products or services will be important to maintain our competitive position. The evolutionary path that we have selected or may select in the future for LTE or other technologies may not be demanded by customers or provide the advantages that we expect. If such services are not broadly adopted within the industry or commercially accepted by our customers, our revenues and competitive position could be

materially and adversely affected. In addition, the cost of implementing or competing against alternative or future technological innovations may be prohibitive to us, and we may lose customers if we fail to keep up with these changes.

Our deployment of LTE will require significant capital investment. We successfully launched a commercial LTE trial market in late 2011 and plan to cover up to approximately 21 million POPs with LTE in 2012. We are continuing to explore cost-effective ways to deliver LTE services to our customers, including by deploying facilities-based coverage and by entering into partnerships or joint ventures with other carriers. Capital expenditures for the deployment of LTE are currently anticipated to be less than \$10 per covered POP. The actual amount we spend to deploy LTE each year will depend upon multiple factors, including the scope and pace of our deployment activities. We may, however, have unanticipated or unforeseen costs in connection with the deployment of LTE and the maintenance of our network.

In addition, we expect that we will likely be required over time to acquire or access additional spectrum or take other actions to enable us to provide LTE at service levels that will meet future customer expectations. We currently own an average of 23 MHz of spectrum in the markets we operate, which generally include an initial spectrum reserve that we plan to use to deploy LTE. The national wireless carriers against which we compete generally have greater spectrum capacity than we do in the markets in which we plan to launch LTE. Because the efficiency of an LTE network and the peak speeds that it can deliver depend upon the amount of contiguous spectrum that is available, competitors who have access to more spectrum than we do are likely to offer faster speeds for their next-generation services or operate those networks more efficiently than we can. As a result, we may be required to take various actions to meet consumer demand, including acquiring additional spectrum, entering into third-party wholesale or roaming arrangements, leasing additional cell sites, spending additional capital to deploy equipment or other actions. We cannot assure you that we would be able to take any of these actions at reasonable costs, on a timely basis or at all.

We cannot assure you that widespread demand for advanced data services will develop at a price level that will allow us to earn a reasonable return on our investment. In addition, there are risks that other wireless carriers on whose networks our customers roam may change their technology to other technologies or pursue standards that are incompatible with ours. As a result, the ability of our customers to roam on such carriers' wireless networks could be adversely affected. If these risks materialize, our business, financial condition or results of operations could be materially adversely affected. Further, we may not be able to negotiate or maintain cost-effective data roaming agreements on LTE or other data networks, and we are not able to assure you that customer devices that operate on LTE or other data networks will be available at costs that will make them attractive to customers.

The Loss of Key Personnel and Difficulty Attracting, Integrating and Retaining Qualified Personnel Could Harm Our Business.

We believe our success depends heavily on the contributions of our employees and on attracting, motivating and retaining our officers and other management and technical personnel. We do not, however, generally provide employment contracts to our employees. If we are unable to attract and retain the qualified employees that we need, our business may be harmed.

Our business is managed by a small number of key executive officers, including our CEO, S. Douglas Hutcheson. In May 2012, Jerry V. Elliott joined us as our executive vice president and CFO. In February 2012, we hired Robert A. Strickland as our executive vice president and chief technical officer. In early 2011, we hired new members of senior management to help support our corporate and field operations, which included the appointment of Robert A. Young as our executive vice president, field operations and Raymond J. Roman as our executive vice president and chief operating officer. Mr. Roman resigned from the Company in July 2012. We also implemented a regional president structure in 2011 to oversee customer and sales activity, hiring new members of management to oversee two of our three new regions.

As several members of senior management have been hired recently, it may take time to fully integrate these individuals into their new roles. In addition, if we were to lose the services of key individuals in the future, any such departures could materially and adversely impact how we manage and operate our business. We may also have difficulty attracting and retaining key personnel in future periods, particularly if we were to experience poor operating or financial performance.

Risks Associated With Wireless Devices Could Pose Product Liability, Health and Safety Risks That Could Adversely Affect Our Business.

We do not manufacture devices or other equipment sold by us and generally rely on our suppliers to provide us with safe equipment. Our suppliers are required by applicable law to manufacture their devices to meet certain governmentally imposed safety criteria. However, even if the devices we sell meet the regulatory safety criteria, we could be held liable with the equipment manufacturers and suppliers for any harm caused by products we sell if such products are later found to have design or manufacturing defects. We generally seek to enter into indemnification agreements with the manufacturers who supply us with devices to protect us from direct losses associated with product liability, but we cannot guarantee that we will be fully protected against all losses

associated with a product that is found to be defective.

Media reports have suggested that the use of wireless handsets may be linked to various health concerns, including cancer, and may interfere with various electronic medical devices, including hearing aids and pacemakers. Certain class action lawsuits have been filed in the industry claiming damages for alleged health problems arising from the use of wireless handsets. The World Health Organization's International Agency for Research of Cancer has also stated that exposure to wireless handsets may be carcinogenic. In addition, interest groups have requested that the FCC investigate claims that wireless technologies pose health concerns and cause interference with airbags, anti-lock brakes, hearing aids and other medical devices, and the FCC recently indicated that it plans to gather additional data regarding wireless handset emissions. The media has also reported incidents of handset battery malfunction, including reports of batteries that have overheated. Malfunctions have caused at least one major handset manufacturer to recall certain batteries used in its handsets, including batteries in a handset sold by Cricket and other wireless providers.

Concerns over possible health and safety risks associated with radio frequency emissions and defective products may discourage the use of wireless handsets, which could decrease demand for our services, or result in regulatory restrictions or increased requirements on the location and operation of cell sites, which could increase our operating expenses. Concerns over possible safety risks could decrease the demand for our services. If one or more Cricket customers were harmed by a defective product provided to us by a manufacturer and subsequently sold in connection with our services, our ability to add and maintain customers for Cricket service could be materially adversely affected by negative public reactions.

There also are some safety risks associated with the use of wireless devices while operating vehicles or equipment. Concerns over these safety risks and the effect of any legislation that has been and may be adopted in response to these risks could limit our ability to sell our wireless service.

We Rely Heavily on Third Parties to Provide Specialized Services; a Failure or Inability by Such Parties to Provide the Agreed Upon Products or Services Could Materially Adversely Affect Our Business, Results of Operations and Financial Condition.

We depend heavily on suppliers and contractors with specialized expertise in order for us to efficiently operate our business. Generally, there are multiple sources for the types of products and services we purchase or use. However, we currently rely on one key vendor for billing services, a single vendor to support the platform for our Muve Music service, a single vendor for the operation of our network operations center, a limited number of vendors for voice and data communications transport services and a limited number of vendors for payment processing services. We have also entered into a new inventory logistics and supply chain outsourcing arrangement with a third party to manage the planning, purchasing and fulfillment of handsets and other devices.

In the past, our suppliers, contractors and third-party retailers have not always performed at the levels we expect or at the levels required by their contracts. If key suppliers, contractors, service providers or third-party retailers fail to comply with their contracts, fail to meet our performance expectations or refuse or are unable to supply or provide services to us in the future, our business could be severely disrupted. In addition, the costs and time lags that can be associated with transitioning from one supplier or service provider to another could cause further disruptions if we were required to replace the products or services of one or more major suppliers or service providers with those from another source, especially if the replacement became necessary on short notice. Any such disruptions could have a material adverse effect on our business, results of operations and financial condition.

System Failures, Security Breaches, Business Disruptions and Unauthorized Use or Interference with Our Network or Other Systems Could Result in Higher Churn, Reduced Revenue and Increased Costs, and Could Harm Our Reputation.

Our network and information technology (IT) infrastructure and the infrastructure of our vendors (including systems supporting service activation, billing, point of sale, inventory management, customer care and financial reporting) are vulnerable to damage and disruption from technology failures, power surges or outages, system or equipment failures, natural disasters, fires, human error, hacking and cyber attacks, computer viruses, terrorism, intentional wrongdoing and similar events. In particular, cyber attacks on companies have increased in frequency, scope and potential harm in recent years. Any such failure, damage or disruption could affect the quality of our services, cause network service interruptions and result in material remediation costs, litigation, higher churn, reduced revenue, increased costs and lost market share. Unauthorized access to or use of customer or account information, including credit card or other personal data, could also result in harm to our customers and legal actions against us, and could damage our reputation. In addition, earthquakes, floods, hurricanes, fires and other unforeseen natural disasters or events could materially disrupt our business operations or the provision of Cricket service in one or more markets. In the past, our operations in certain markets have been adversely affected by hurricanes and related weather systems. Costs we incur to restore, repair or replace our network or IT infrastructure, as well as costs associated with detecting, monitoring or reducing the incidence of unauthorized use and other security breaches, may be substantial and increase our cost of providing service. Any failure in,

damage to or disruption of our or our vendors' network and IT infrastructure could also materially impact our ability to timely and accurately record, process and report information important to our business. While we maintain insurance coverage for some of the above events, the potential liabilities associated with these events could exceed the insurance coverage we maintain. If any of the above events were to occur, we could experience higher churn, reduced revenues, increased costs and reputational harm, any of which could have a material adverse effect on our business, financial condition or results of operations.

We Have Upgraded a Number of Significant Business Systems, Including Our Customer Billing System, and Any Unanticipated Difficulties, Delays or Interruptions with the Transition Could Negatively Impact Our Business.

During recent years, we have upgraded a number of our significant, internal business systems, including implementing a new inventory management system, a new point-of-sale system and a new customer billing system. The implementation of significant new systems often involves delays and disruptions in connection with the transition to and operation of the new systems.

From time to time since the launch of our customer billing system in the second quarter of 2011, we have experienced intermittent disruptions with certain aspects of the system, which have limited our ability to activate new customers and to provide account services to current customers. We believe that these system issues had the effect of reducing our gross customer additions and increasing churn. Although we believe that we have largely identified the cause of these disruptions and are implementing plans to remedy them, we cannot assure you that we will not experience additional disruptions with our customer billing system in the future.

Future significant difficulties in operating our customer billing system or other new systems could materially impact our ability to attract and retain customers or to timely and accurately record, process and report information that is important to our business. If any of the above events were to occur, we could experience decreased gross customer additions, higher churn, reduced revenues and increased costs or could suffer a material weaknesses in our internal control over financial reporting, any of which could harm our reputation and have a material adverse effect on our business, financial condition or results of operations.

We May Not Be Successful in Protecting and Enforcing Our Intellectual Property Rights.

We rely on a combination of patent, service mark, trademark, and trade secret laws and contractual restrictions to establish and protect our proprietary rights, all of which offer only limited protection. We endeavor to enter into agreements with our employees and contractors and agreements with parties with whom we do business in order to limit access to and disclosure of our proprietary information. Despite our efforts, the steps we have taken to protect our intellectual property may not prevent the misappropriation of our proprietary rights. Moreover, others may independently develop processes and technologies that are competitive to ours. The enforcement of our intellectual property rights may depend on any legal actions that we undertake against such infringers being successful, but we cannot be sure that any such actions will be successful, even when our rights have been infringed.

We cannot assure you that our pending, or any future, patent applications will be granted, that any existing or future patents will not be challenged, invalidated or circumvented, that any existing or future patents will be enforceable, or that the rights granted under any patent that may issue will provide us with any competitive advantages.

In addition, we cannot assure you that any trademark or service mark registrations will be issued with respect to pending or future applications or that any registered trademarks or service marks will be enforceable or provide adequate protection of our brands. Our inability to secure trademark or service mark protection with respect to our brands could have a material adverse effect on our business, financial condition and results of operations.

We Use Equipment, Software, Technology and Content in the Operation of Our Business Which May Subject Us to Third-Party Infringement Claims.

The technologies used in the telecommunications industry are protected by and subject to a wide array of patents and other intellectual property rights. As a result, third parties have asserted and may in the future assert infringement claims against us or our suppliers based on our or their general business operations and the equipment, software, technology or other content that we or they use or provide. Due in part to the expansion and development of our business operations, we have become subject to increased amounts of litigation, including disputes alleging patent and other intellectual property infringement relating to the operation of our networks and our sale of handsets and other devices. If plaintiffs in any patent litigation that may be brought against us were to prevail, we could be required to pay substantial damages or settlement costs, and we could be required to alter the way we conduct business to avoid future infringement, which could have a material adverse effect on our business, financial condition and results of operations.

In addition, we rely on third-party intellectual property and digital content to provide certain of our wireless services to customers, including Muve Music, an unlimited music download service we offer that is designed specifically for mobile handsets. The Muve Music service requires us to license music and other intellectual property rights of third parties. We cannot guarantee that these licenses will continue to be available to us on commercially reasonable terms or at all. Our licensing arrangements with these third parties are generally short-term in nature and do not guarantee the continuation or renewal of these arrangements on reasonable terms, if at all. Our inability to continue to offer customers a wide variety of content at reasonable costs to us could limit the success of our Muve Music service. In addition, we could become subject to infringement claims and potential liability for damages or royalties related to music and intellectual property rights of third parties, including as a result of any unauthorized access to the third-party content we have licensed.

We generally seek to enter into indemnification agreements with the manufacturers, licensors and vendors who provide us with the equipment, software and technology that we use in our business to help protect us against possible infringement claims. However, we do not have indemnification arrangements with all of our partners and suppliers. In addition, to the extent that there is an indemnification arrangement in place, depending on the nature and scope of a possible claim, we may not be entitled to seek indemnification under the terms of the agreement. In addition, we cannot guarantee that the financial condition of an indemnifying party would be sufficient to protect us against all losses associated with infringement claims or that we would be fully indemnified against all possible losses associated with a possible claim. In addition, our suppliers may be subject to infringement claims that could prevent or make it more expensive for them to supply us with the products and services we require to run our business, which could have the effect of slowing or limiting our ability to introduce products and services to our customers. Moreover, we may be subject to claims that products, software and services provided by different vendors which we combine to offer our services may infringe the rights of third parties, and we may not have any indemnification from our vendors for these claims. Whether or not an infringement claim against us or a supplier is valid or successful, it could materially adversely affect our business, financial condition or results of operations by diverting management attention, involving us in costly and time-consuming litigation, requiring us to enter into royalty or licensing agreements (which may not be available on acceptable terms, or at all) or requiring us to redesign our business operations or systems to avoid claims of infringement. In addition, infringement claims against our suppliers could also require us to purchase products and services at higher prices or from different suppliers and could adversely affect our business by delaying our ability to offer certain products and services to our customers.

Action by Congress or Government Agencies May Increase Our Costs of Providing Service or Require Us to Change Our Services.

The FCC regulates the licensing, construction, modification, operation, ownership, sale and interconnection of wireless communications systems, as do some state and local regulatory agencies. We cannot assure you that the FCC or any state or local agencies having jurisdiction over our business will not adopt regulations or take other enforcement or other actions that would adversely affect our business, impose new costs or require changes in current or planned operations. In addition, state regulatory agencies are increasingly focused on the quality of service and support that wireless carriers provide to their customers and several agencies have proposed or enacted new and potentially burdensome regulations in this area. We also cannot assure you that Congress will not amend the Communications Act, from which the FCC obtains its authority, or enact other legislation in a manner that could be adverse to us.

Under existing law, no more than 20% of an FCC licensee's capital stock may be owned, directly or indirectly, or voted by non-U.S. citizens or their representatives, by a foreign government or its representatives or by a foreign corporation. If an FCC licensee is controlled by another entity (as is the case with Leap's ownership and control of subsidiaries that hold FCC licenses), up to 25% of that entity's capital stock may be owned or voted by non-U.S. citizens or their representatives, by a foreign government or its representatives or by a foreign corporation.

Foreign ownership above the 25% holding company level may be allowed if the FCC finds such higher levels consistent with the public interest. The FCC has ruled that higher levels of foreign ownership, even up to 100%, are presumptively consistent with the public interest with respect to investors from certain nations. If our foreign ownership were to exceed the permitted level, the FCC could revoke our wireless licenses, which would have a material adverse effect on our business, financial condition and results of operations. Although we could seek a declaratory ruling from the FCC allowing the foreign ownership or could take other actions to reduce our foreign ownership percentage in order to avoid the loss of our licenses, we cannot assure you that we would be able to obtain such a ruling or that any other actions we may take would be successful.

In addition, legislative or regulatory action could be taken which could limit our ability to use certain foreign vendors to supply us with equipment, materials or other services that we use in our business operations. For example, we have previously purchased equipment used in our wireless network from a Chinese company. Members of the U.S. Congress and certain regulatory agencies have raised concerns about American companies purchasing equipment and software from Chinese companies, including Chinese telecommunications companies, including concerns relating to the U.S. trade imbalance with China, alleged violations of intellectual property rights by Chinese companies and potential security risks posed by U.S. companies purchasing technical

equipment and software from Chinese companies. Any legislative or regulatory action that might restrict us from purchasing equipment or software from Chinese or other foreign companies could require changes in our equipment procurement activities.

The Digital Millennium Copyright Act, or DMCA, prohibits the circumvention of technological measures employed to protect a copyrighted work, or access control. However, under the DMCA, the Copyright Office has the authority to exempt for three years certain activities from copyright liability that otherwise might be prohibited by that statute. In July 2010, the Copyright Office granted an exemption to the DMCA to allow circumvention of software locks and other firmware that prohibit a wireless handset from connecting to a wireless network when such circumvention is accomplished for the sole purpose of lawfully connecting the wireless handset to another wireless telephone network. The DMCA copyright exemption facilitates our current practice of allowing customers to bring in unlocked, or “reflashed,” phones that they already own and may have used with another wireless carrier, and activate them on our network. To the extent that the Copyright Office determines in the future not to extend this exemption for an extended period of time and this prevents us from “flashing” devices or activating “reflashed” devices on our network, this could have a material adverse impact on our business, financial condition and results of operations.

We participate in the federal government's Lifeline program, which provides support from the USF, to subsidize discounted telecommunications services for qualified low-income consumers. In order to participate in the Lifeline program in any given state, a carrier must be designated as an eligible telecommunications carrier, or ETC, in that state. As of June 30, 2012, Cricket had been designated as an ETC in 21 states and the District of Columbia. In January 2012, the FCC adopted an order regarding the Lifeline program, the stated purpose of which is to streamline the administration of the program and to implement measures to curb perceived waste, fraud and abuse in the program. In addition, various states are considering or enacting rules with similar stated purposes as the FCC order. Future action by the FCC with respect to the Lifeline program or by states in which we have been designated as an ETC could reduce or eliminate the amount of universal support funds we receive for providing wireless service to certain qualifying low income customers.

We also are subject, or potentially subject, to numerous additional rules and requirements, including universal service obligations; number portability requirements; number pooling rules; rules governing billing, subscriber privacy and customer proprietary network information; roaming obligations; rules that require wireless service providers to configure their networks to facilitate electronic surveillance by law enforcement officials; rate averaging and integration requirements; rules governing spam, telemarketing and truth-in-billing; and rules requiring us to offer equipment and services that are accessible to and usable by persons with disabilities, among others. There are also pending proceedings exploring the imposition of various types of nondiscrimination, open access and broadband management obligations on our devices and networks; the prohibition of device exclusivity; the possible re-imposition of bright-line spectrum aggregation requirements; further regulation of special access used for wireless backhaul services; and the effects of the siting of communications towers on migratory birds, among others. Some of these requirements and pending proceedings (of which the foregoing examples are not an exhaustive list) pose technical and operational challenges to which we, and the industry as a whole, have not yet developed clear solutions. These requirements generally are the subject of pending FCC or judicial proceedings, and we are unable to predict how they may affect our business, financial condition or results of operations.

In addition, certain states in which we provide service are considering legislation that would require companies selling prepaid wireless services to verify a customer's identity using government identification. Although we request identification from new customers, we currently do not require them to provide identification in order to initiate service with us, and such a requirement could adversely impact our ability to attract new customers for our services.

Our operations are subject to various other laws and regulations, including those regulations promulgated by the Federal Trade Commission, the Federal Aviation Administration, the Environmental Protection Agency, the

Occupational Safety and Health Administration, other federal agencies and state and local regulatory agencies and legislative bodies. Adverse decisions or regulations of these regulatory bodies could negatively impact our operations and costs of doing business. Because of our smaller size, legislation or governmental regulations and orders can significantly increase our costs and affect our competitive position compared to other larger telecommunications providers. We are unable to predict the scope, pace or financial impact of regulations and other policy changes that could be adopted by the various governmental entities that oversee portions of our business.

If Customer Usage of Our Services Exceeds Our Expectations, Our Costs of Providing Service Could Increase, Which Could Have a Material Adverse Effect on Our Operating Expenses.

Our most popular Cricket Wireless service plans bundle unlimited local and U.S. long distance service and unlimited text messaging, with mobile web, 411 services, navigation, data back-up and other features, for a fixed monthly fee to more effectively compete with other telecommunications providers. Our smartphones and other devices use greater amounts of network capacity than the handsets and devices we previously offered. We also offer Cricket Broadband, our unlimited mobile broadband service, and Cricket PAYGo, a pay-as-you-go unlimited prepaid wireless service. In 2011, we successfully launched Muve Music in all

our markets, an unlimited music download service designed specifically for mobile handsets. We provide nationwide voice, data, mobile broadband and music download services through our own Cricket network footprint and through roaming and wholesale agreements that we have entered into with other carriers. Customers usage of our wireless services has been significant.

If customers exceed expected usage for our voice, data, mobile broadband or music download services, we could face capacity problems and our costs of providing the services could increase. Although we own less spectrum in many of our markets than our competitors, we seek to design our network to accommodate our expected high rates of usage for our services, and we continue to assess and seek to implement technological improvements to increase the efficiency of our wireless spectrum. We currently manage our network and users of our Cricket Broadband service by limiting throughput speeds if their usage adversely impacts our network or service levels or if usage exceeds certain thresholds. However, if future wireless use by Cricket customers increases faster than we anticipate and exceeds the then-available capacity of our network, service quality may suffer. In addition, our roaming or wholesale costs may be higher than we anticipate. Depending on the extent of customers' use of our network and roaming or wholesale services we expect to provide in the future, we may be forced to raise the price or alter the service offerings of our wireless or mobile broadband services, further limit data quantities or speeds, otherwise limit the number of new customers for certain services, acquire additional spectrum or incur substantial additional capital expenditures to enhance network capacity or quality.

We May Be Unable to Acquire Additional Spectrum in the Future at a Reasonable Cost or on a Timely Basis.

Because we offer unlimited voice, data, mobile broadband and music download services for a flat monthly rate, our customers' average usage of these services per month is substantially above U.S. averages. We intend to meet demand for our services by utilizing spectrally efficient technologies or by entering into roaming or partnering agreements with other carriers. We currently own an average of 23 MHz of spectrum in the markets we operate, which generally include an initial spectrum reserve that we plan to use to deploy LTE. However, we expect that we will likely be required over time to acquire or access additional spectrum in the future to satisfy increasing demand for data and mobile broadband services, to maintain an acceptable grade of service and to provide or support new services or technologies to meet increasing customer demands. We cannot assure you that additional spectrum will become available at auction or in the after-market at a reasonable cost, or at all, or that we will have sufficient capital resources, or the capacity to raise sufficient capital resources, to acquire additional spectrum that we may require to meet customer demands and remain competitive. In addition, the FCC may impose conditions on the use of new wireless broadband mobile spectrum, such as heightened build-out requirements or open access requirements, which may make it less attractive or uneconomical for us. If we are unable to acquire or obtain access to additional spectrum in the future to meet customer demands, such inability may materially and adversely affect our competitive position and our business, financial condition and results of operations.

Our and Savary Island's Wireless Licenses Are Subject to Renewal and May Be Revoked in the Event That We Violate Applicable Laws.

Our and Savary Island's existing wireless licenses are subject to renewal upon the expiration of the 10-year or 15-year period for which they are granted, which renewal period commenced for some of our PCS wireless licenses in 2006. The FCC will award renewal expectancy to a wireless licensee that timely files a renewal application, has provided substantial service during its past license term and has substantially complied with applicable FCC rules and policies and the Communications Act. Historically, the FCC has approved our license renewal applications. However, the Communications Act provides that licenses may be revoked for cause and license renewal applications denied if the FCC determines that a renewal would not serve the public interest. In addition, if we fail to timely file to renew any wireless license, or fail to meet any regulatory requirements for renewal, including construction and substantial service requirements, we could be denied a license renewal. Many of our wireless licenses are subject to interim or

final construction requirements and there is no guarantee that the FCC will find our construction, or the construction of prior licensees, sufficient to meet the build-out or renewal requirements. FCC rules provide that applications competing with a license renewal application may be considered in comparative hearings, and establish the qualifications for competing applications and the standards to be applied in hearings. The FCC has pending a rulemaking proceeding to re-evaluate, among other things, its wireless license renewal showings and standards and may in this or other proceedings promulgate changes or additional substantial requirements or conditions to its renewal rules, including revising license build-out requirements. We cannot assure you that the FCC will renew our wireless licenses upon their expiration. If any of our wireless licenses were to be revoked or not renewed upon expiration, we would not be permitted to provide services under that license, which could have a material adverse effect on our business, results of operations and financial condition.

Future Declines in the Fair Value of Our Wireless Licenses Could Result in Future Impairment Charges.

As of June 30, 2012, the carrying value of our and Savary Island's wireless licenses (excluding assets held for sale) was approximately \$1.6 billion. During the years ended December 31, 2011, 2010 and 2009, we recorded impairment charges of \$0.4

million, \$0.8 million and \$0.6 million, respectively, with respect to our wireless licenses.

The market values of wireless licenses have varied over the last several years, and may vary significantly in the future. Valuation swings could occur for a variety of reasons relating to supply and demand, including:

• consolidation in the wireless industry allows or requires carriers to sell significant portions of their wireless spectrum holdings;

• a sudden large sale of spectrum by one or more wireless providers occurs; or

• market prices decline as a result of the sale prices in FCC auctions.

In addition, the price of wireless licenses could decline as a result of the FCC's pursuit of policies designed to increase the number of wireless licenses available in each of our markets. For example, during recent years, the FCC auctioned additional spectrum in the 1700 MHz to 2100 MHz band in Auction #66 and the 700 MHz band in Auction #73, and has announced that it intends to auction additional spectrum in the future for mobile wireless use. If the market value of wireless licenses were to decline significantly, the value of our wireless licenses could be subject to non-cash impairment charges.

We assess potential impairments to our indefinite-lived intangible assets, including wireless licenses, annually and when there is evidence that events or changes in circumstances indicate that an impairment condition may exist. We conduct our annual tests for impairment of our wireless licenses during the third quarter of each year. Estimates of the fair value of our wireless licenses are based primarily on available market prices, including successful bid prices in FCC auctions and selling prices observed in wireless license transactions, pricing trends among historical wireless license transactions, our spectrum holdings within a given market relative to other carriers' holdings and qualitative demographic and economic information concerning the areas that comprise our markets. A significant impairment loss could have a material adverse effect on our operating income and on the carrying value of our wireless licenses on our balance sheet.

Declines in Our Operating or Financial Performance Could Result in an Impairment of Our Indefinite-Lived Assets, Including Goodwill.

We assess potential impairments to our long-lived assets, including property and equipment and certain intangible assets, when there is evidence that events or changes in circumstances indicate that the carrying value may not be recoverable. We also assess potential impairments to indefinite-lived intangible assets, including goodwill and wireless licenses, annually during the third quarter of each year and on a quarterly basis when there is evidence that events or changes in circumstances indicate that an impairment condition may exist.

The closing price of Leap common stock was \$6.43 on June 29, 2012 and Leap's market capitalization was above our book value as of such date. Since that time, the closing price of Leap common stock has ranged from a high of \$6.68 per share to a low of \$4.49 per share. If the price of Leap common stock continues to trade at or near current levels, we may be required to perform both the first and the second step of our third quarter annual goodwill impairment test to determine the fair value of our net assets, which may require us to recognize a non-cash impairment charge equal to the \$31.9 million carrying value of our goodwill.

We May Incur Higher Than Anticipated Intercarrier Compensation Costs.

When our customers use our service to call customers of local exchange carriers, we are required under the current intercarrier compensation scheme to pay the carrier that serves the called party, and any intermediary or transit carrier,

for the use of their networks. While in most cases we have been successful in negotiating agreements with other carriers that impose reasonable reciprocal compensation arrangements, some local exchange carriers have claimed a right to unilaterally impose what we believe to be unreasonably high charges on us. Some of these carriers have threatened to pursue, have initiated, or may in the future initiate, claims against us to recover these charges, and the outcome of any such claims is uncertain.

The FCC has been considering whether a unified intercarrier compensation regime can or should be established for all traffic exchanged between carriers, including commercial mobile radio services carriers. The FCC recently adopted an order which, among other things, institutes a uniform, national bill-and-keep framework for telecommunications traffic exchanged with a local exchange carrier, which will be phased in under a multi-year transition period. The order also clarifies certain aspects relating to compensation between wireless carriers and local exchange carriers in an effort to reduce disputes and address existing ambiguity with respect to these arrangements. There are also various other pending proceedings in the courts, at the FCC and before state regulatory bodies that may affect intercarrier compensation. New or modified intercarrier compensation rules, federal or state proceedings implementing or interpreting those rules and other judicial or regulatory decisions may increase the charges we are

required to pay other carriers for terminating calls or transiting calls over telecommunications networks, increase the costs of, or make it more difficult to negotiate, new agreements with carriers, decrease the amount of revenue we receive for terminating calls from other carriers on our network, or result in significant costs to us for past and future termination charges. Any of these changes could have a material adverse effect on our business, financial condition and operating results.

We resell third party long distance services in connection with our offering of unlimited international long distance service. The charges for these services may be subject to change by the terminating or interconnecting carrier, or by the regulatory body having jurisdiction in the applicable foreign country. If the charges are modified, the terminating or interconnecting carrier may attempt to assess such charges retroactively on us or our third party international long distance provider. If such charges are substantial, or we cease providing service to the foreign destination, prospective customers may elect not to use our service and current customers may choose to terminate service. Such events could limit our ability to grow our customer base, which could have a material adverse effect on our business, financial condition and operating results.

If We Experience High Rates of Credit Card, Subscription or Dealer Fraud, Our Ability to Generate Cash Flow Will Decrease.

Our operating costs could increase substantially as a result of fraud, including customer credit card, subscription or dealer fraud. We have implemented a number of strategies and processes to detect and prevent efforts to defraud us, and we believe that our efforts have substantially reduced the types of fraud we have identified. However, if our strategies are not successful in detecting and controlling fraud, the resulting loss of revenue or increased expenses could have a material adverse impact on our financial condition and results of operations.

Related to Ownership of Leap Common Stock

Our Stock Price May Be Volatile, and You May Lose All or Some of Your Investment.

The trading prices of the securities of telecommunications companies have been highly volatile. Accordingly, the trading price of Leap common stock has been, and is likely to continue to be, subject to wide fluctuations. Factors affecting the trading price of Leap common stock may include, among other things:

- variations in our operating results or those of our competitors;
- announcements of technological innovations, new services or service enhancements, strategic alliances or significant agreements by us or by our competitors;
- entry of new competitors into our markets, changes in product and service offerings by us or our competitors, changes in the prices charged for product and service offerings by us or our competitors, or changes or upgrades in the network technologies used by us or our competitors;
- significant developments with respect to intellectual property or other litigation;
- announcements of and bidding in auctions for new spectrum;
- recruitment or departure of key personnel;
- changes in the estimates of our operating results or changes in recommendations by any securities analysts that elect to follow Leap common stock, or changes in our credit ratings or those of our competitors;

• changes in the levels of our indebtedness;

• any default under any of the indentures governing our secured or unsecured senior notes or convertible senior notes because of a covenant breach or otherwise;

• rumors or speculation in the marketplace regarding acquisitions or consolidation in our industry, including regarding transactions involving Leap; and

• market conditions in our industry and the economy as a whole.

The occurrence of any one or more of these events could significantly impact the trading price of Leap common stock, and you

73

could lose all or some of your investment.

Our Directors and Affiliated Entities Have Substantial Influence over Our Affairs, and Our Ownership Is Highly Concentrated. Sales of a Significant Number of Shares by Large Stockholders May Adversely Affect the Market Price of Leap Common Stock.

Our directors and entities affiliated with them beneficially owned in the aggregate approximately 30% of Leap common stock as of July 31, 2012. Moreover, our four largest stockholders and entities affiliated with them beneficially owned in the aggregate approximately 54% of Leap common stock as of July 31, 2012. These stockholders have the ability to exert substantial influence over all matters requiring approval by our stockholders. These stockholders will be able to influence the election and removal of directors and any merger, consolidation or sale of all or substantially all of Leap's assets and other matters. This concentration of ownership could have the effect of delaying, deferring or preventing a change in control or impeding a merger or consolidation, takeover or other business combination.

Our resale shelf registration statements register for resale 23,533,869 shares of Leap common stock held by entities affiliated with one of our directors, or approximately 30% of Leap's outstanding common stock as of July 31, 2012. We have also agreed to register for resale any additional shares of common stock that these entities or their affiliates acquire. We are unable to predict the potential effect that sales into the market of any material portion of such shares, or any of the other shares held by our other large stockholders and entities affiliated with them, may have on the then-prevailing market price of Leap common stock. If any of Leap's stockholders cause a large number of securities to be sold in the public market, these sales could reduce the trading price of Leap common stock. These sales could also impede our ability to raise future capital.

We Could Elect to Raise Additional Equity Capital Which Could Dilute Existing Stockholders.

During the second quarter of 2009 we sold 7,000,000 shares of Leap common stock in an underwritten public offering. We could raise additional capital in the future, as market conditions permit, to enhance our liquidity and to provide us with additional flexibility to pursue business investment initiatives. Any additional capital we could raise could be significant and could consist of debt, convertible debt or equity financing from the public and/or private capital markets. To the extent that we were to elect to raise equity capital, this financing may not be available in sufficient amounts or on terms acceptable to us and could be dilutive to existing stockholders. In addition, these sales could reduce the trading price of Leap common stock and impede our ability to raise future capital.

Your Ownership Interest in Leap Will Be Diluted upon Issuance of Shares We Have Reserved for Future Issuances, and Future Issuances or Sales of Such Shares May Adversely Affect the Market Price of Leap Common Stock.

As of July 31, 2012, 79,225,042 shares of Leap common stock were issued and outstanding, and 5,399,418 additional shares of Leap common stock were reserved for issuance, including 4,000,878 shares reserved for issuance upon the exercise of outstanding stock options and deferred stock units under our 2004 Stock Option, Restricted Stock and Deferred Stock Unit Plan, as amended, 766,694 shares of common stock available for future issuance under our 2004 Stock Option, Restricted Stock and Deferred Stock Unit Plan, 481,175 shares reserved for issuance upon the exercise of outstanding stock options under our 2009 Employment Inducement Equity Incentive Plan, 24,400 shares of common stock available for future issuance under our 2009 Employment Inducement Equity Incentive Plan, and 126,271 shares available for future issuance under our Employee Stock Purchase Plan.

Leap has also reserved up to 4,761,000 shares of its common stock for issuance upon conversion of its \$250 million in aggregate principal amount of convertible senior notes due 2014. Holders may convert their notes into shares of Leap common stock at any time on or prior to the third scheduled trading day prior to the maturity date of the notes,

July 15, 2014. If, at the time of conversion, the applicable stock price of Leap common stock is less than or equal to approximately \$93.21 per share, the notes will be convertible into 10.7290 shares of Leap common stock per \$1,000 principal amount of the notes (referred to as the “base conversion rate”), subject to adjustment upon the occurrence of certain events. If, at the time of conversion, the applicable stock price of Leap common stock exceeds approximately \$93.21 per share, the conversion rate will be determined pursuant to a formula based on the base conversion rate and an incremental share factor of 8.3150 shares per \$1,000 principal amount of the notes, subject to adjustment. At an applicable stock price of approximately \$93.21 per share, the number of shares of common stock issuable upon full conversion of the convertible senior notes would be 2,682,250 shares. Upon the occurrence of a “make-whole fundamental change” of Leap under the indenture, under certain circumstances the maximum number of shares of common stock issuable upon full conversion of the convertible senior notes would be 4,761,000 shares.

In addition, we have registered all shares of common stock that we may issue under our 2004 Stock Option, Restricted Stock and Deferred Stock Unit Plan, under our 2009 Employment Inducement Equity Incentive Plan and under our Employee Stock Purchase Plan. When we issue shares under these stock plans, they can be freely sold in the public market after the recipient

satisfies any vesting period applicable to the shares. If any of Leap's stockholders causes a large number of securities to be sold in the public market, these sales could reduce the trading price of Leap common stock. These sales also could impede our ability to raise future capital.

Provisions in Our Amended and Restated Certificate of Incorporation and Bylaws, under Delaware Law, in Our Indentures, or in Our Tax Benefit Preservation Plan Might Discourage, Delay or Prevent a Change in Control of Our Company or Changes in Our Management and, Therefore, Depress the Trading Price of Leap Common Stock.

Our amended and restated certificate of incorporation and bylaws contain provisions that could depress the trading price of Leap common stock by acting to discourage, delay or prevent a change in control of our company or changes in our management that our stockholders may deem advantageous. These provisions:

- require super-majority voting to amend some provisions in our amended and restated certificate of incorporation and bylaws;

- authorize the issuance of “blank check” preferred stock that our board of directors could issue to increase the number of outstanding shares to discourage a takeover attempt;

- prohibit stockholder action by written consent, and require that all stockholder actions be taken at a meeting of our stockholders;

- provide that the board of directors is expressly authorized to make, alter or repeal our bylaws; and

- establish advance notice requirements for nominations for elections to our board or for proposing matters that can be acted upon by stockholders at stockholder meetings.

We are also subject to Section 203 of the Delaware General Corporation Law, which generally prohibits a Delaware corporation from engaging in any of a broad range of business combinations with any “interested” stockholder for a period of three years following the date on which the stockholder became an “interested” stockholder and which may discourage, delay or prevent a change in control of our company.

In addition, under the indentures governing our secured and unsecured senior notes and convertible senior notes, if certain “change of control” events occur, each holder of notes may require us to repurchase all of such holder's notes at a purchase price equal to 101% of the principal amount of secured or unsecured senior notes, or 100% of the principal amount of convertible senior notes, plus accrued and unpaid interest. See “Part I - Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations -Liquidity and Capital Resources” of this report.

On August 30, 2011, our board of directors adopted a Tax Benefit Preservation Plan as a measure intended to help deter acquisitions of Leap common stock that could result in an ownership change under Section 382 of the Internal Revenue Code and thus help preserve our ability to use our NOL carryforwards. The Tax Benefit Preservation Plan was approved by our stockholders in May 2012. The Tax Benefit Preservation Plan is designed to deter acquisitions of Leap common stock that would result in a stockholder owning 4.99% or more of Leap common stock (as calculated under Section 382), or any existing holder of 4.99% or more of Leap common stock acquiring additional shares, by substantially diluting the ownership interest of any such stockholder unless the stockholder obtains an exemption from our board of directors. Because the Tax Benefit Preservation Plan may restrict a stockholder's ability to acquire Leap common stock, it could discourage a tender offer for Leap common stock or make it more difficult for a third party to acquire a controlling position in our stock without our approval, and the liquidity and market value of Leap common stock may be adversely affected while the Tax Benefit Preservation Plan is in effect.
