PELICAN FINANCIAL, INC.

Notes to the Consolidated Financial Statements (Unaudited)

NOTE 1 - PRINCIPLES OF CONSOLIDATION

The unaudited consolidated financial statements as of and for the three and nine month periods ended September 30, 2001 and 2000, include the accounts of Pelican Financial Inc. (Pelican Financial) and its wholly owned subsidiaries Pelican National Bank (Pelican National) and Washtenaw Mortgage Company (Washtenaw) for all periods. All references herein to Pelican Financial include the consolidated results of its subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation. Assets held in an agency or fiduciary capacity are not assets of Pelican Financial and, accordingly, are not included in the accompanying consolidated financial statements.

NOTE 2 BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements were prepared in accordance with instructions for Form 10-Q and, therefore, do not include information or footnotes necessary for a complete presentation of consolidated financial condition, results of operations, and cash flows in conformity with generally accepted accounting principles. However, all adjustments, consisting of normal recurring accruals, which, in the opinion of management, are necessary for fair presentation of the consolidated financial statements have been included. The results of operations for the period ended September 30, 2001, are not necessarily indicative of the results which may be expected for the entire fiscal year or for any other period. For further information, refer to the consolidated financial statements and footnotes thereto for the year ended December 31, 2000 included in Pelican Financial's Form 10-K.

Certain prior year amounts have been reclassified to conform with the current presentation.

NOTE 3 LOANS RECEIVABLE

Loans receivable consist of the following:

	September 30,		December 31,
	2001		2000
Commercial, financial and agricultural	\$ 2,904,066	\$	1,115,718
Commercial real estate	32,853,753		32,363,539
Residential real estate	52,707,542		50,713,118

Balance at end of period	\$	772,009	\$	471,503

NOTE 4 STOCK DIVIDEND

On June 4, 2001, Pelican Financial declared a 10% stock dividend payable July 2, 2001 to shareholders of record June 18, 2001. As a result of the stock dividend, common stock was increased by \$3,993, additional paid in capital was increased by \$1,553,211 and retained earnings was decreased by \$1,557,204. All references in the accompanying financial statements to per share amounts have been restated to reflect the stock dividend.

Diluted average shares outstanding		4,400,344		4,392,120
Diluted earnings per share	\$	0.68	\$	0.04

NOTE 6 - SEGMENT INFORMATION

Pelican Financial's operations include two primary segments: mortgage banking and retail banking. The mortgage banking segment involves the origination and purchase of single-family residential mortgage loans in approximately 41 states; the sale of such loans in the secondary market, generally on a pooled and securitized basis; and the servicing of mortgage loans for investors. The retail-banking segment involves attracting deposits from the general public and using such funds to originate and purchase existing consumer, commercial, commercial real estate, residential construction, and single-family residential mortgage loans, from its offices in Naples, Sarasota and Fort Myers, Florida.

Of the two segments, Pelican National comprises the retail-banking segment, with net interest income from loans, investments and deposits accounting for its primary revenues. Washtenaw comprises the mortgage-banking segment, with gains on sales of mortgage servicing rights (MSR) and loans, as well as loan servicing income accounting for its primary revenues.

The following segment financial information has been derived from the internal financial statements of Pelican National and Washtenaw, which are used by management to monitor and manage the financial performance of Pelican Financial. The accounting policies of the two segments are the same as those of Pelican Financial.

The evaluation process for segments does not include holding company income and expense. Holding company amounts are the primary difference between segment amounts and consolidated totals, and are reflected in the Other column below, along with minor amounts to eliminate transactions between segments.

NOTE 7 NEW ACCOUNTING PRONOUNCEMENT

Beginning January 1, 2001, a new accounting standard (SFAS No. 133) requires all derivatives to be recorded at fair value. Unless designated as hedges, changes in these fair values will be recorded in the income statement. Fair value changes involving hedges will generally be recorded by offsetting gains and losses on the hedge and on the hedged item, even if the fair value of the hedged item is not otherwise recorded.

At January 1 and September 30, 2001 derivatives held included forward contracts to deliver loans and mortgage backed securities. Periodically, U.S. Treasury options are derivatives that will also be held. Forward contracts and Treasury options are used to manage interest rate risk on loans held for sale and the pipeline of loans in-process. Under SFAS 133, forward contracts and Treasury options will be carried at fair value, while the change in fair value of loans held for sale will be recorded to offset the value of forward contracts designated as a hedge. The effect of adopting SFAS 133 at January 1, 2001 was a pre-tax expense of \$635,495, consisting of \$689,152 of expense to record the loss on the forward contracts offset by income of \$53,657 on hedged loans held for sale. The expense at adoption was recorded as a cumulative effect of change in accounting principle. During the quarter ended September 30, 2001, a reduction of pre-tax income of \$2,012,347 was recorded under SFAS 133, primarily to reflect the loss on forward contracts, and is included in gain on sales of mortgage servicing rights and loans, net. For the nine months ended September 30, 2001, SFAS 133 resulted in a reduction of \$1,639,459 to gain on sales of mortgage servicing rights and loans, net.

The pipeline of loans in process includes commitments to make loans at specific interest rates (rate lock commitments). Under FAS 133 it is unclear if rate lock commitments meet the attributes of a derivative. The Derivative Implementation Group (DIG) of the Financial Accounting Standards Board (FASB) addressed the issue of such rate lock commitments and issued tentative guidance in January 2001 that categorizes rate lock commitments intended for sale as derivatives. The status of DIG guidance is tentative until formally cleared by FASB, and the Company's policy has been to adopt DIG guidance on this matter after such guidance is cleared by FASB. As of the date of these financial statements, such guidance continues to remain tentative, and the Company has not adopted the DIG guidance. Should the DIG guidance on this matter be cleared by FASB as presently written, the Company would record the fair value of rate lock commitments as derivatives and, depending on the amount and attributes of derivatives held at the time, the resulting fair value adjustments would be expected to partially or largely, offset the fair value adjustments on forward commitments.

In June 2001, FASB issued SFAS No. 141, "Business Combinations." SFAS No. 141 requires all business combinations within its scope to be accounted for using the purchase method, rather than the pooling-of-interests method. The provisions of the Statement apply to all business combinations initiated after June 30, 2001. The adoption of this statement will only have an impact on the financial statements if the company enters into a business combination.

Also in June 2001, the FASB issued SFAS No. 142, "Goodwill and Other Intangible Assets," which addresses the accounting for such assets arising from prior and future business combinations. Upon the adoption of this statement, goodwill arising from business combinations will no longer be amortized, but rather will be assessed regularly for impairment, with any such impairment recognized as a reduction to earnings in the period identified. Other identified intangible assets, such as core deposit intangible assets, will continue to be amortized over their estimated useful lives. The Company is required to adopt this statement on January 1, 2002, and early adoption is not permitted. The adoption of this statement is not expected to have a material impact on the financial statements.

Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward Looking Statements

Certain information in this Form 10-Q may constitute forward-looking information that involves risks and uncertainties that could cause actual results to differ materially from those estimated. Persons are cautioned that such forward-looking statements are not guarantees of future performance and are subject to various factors that could cause actual results to differ materially from those estimated. These factors include, but are not limited to, changes in general economic and market conditions, legislative and regulatory changes, monetary and fiscal policies of the federal government, demand for loan and deposit products and the development of an interest rate environment that adversely affects the interest rate spread or other income from Pelican Financial's investments and operations.

EARNINGS PERFORMANCE

Pelican Financial reported net income of \$834,000 for the quarter ended September 30, 2001, an increase of \$773,000 when compared to net income of \$61,000 for the same period in 2000. Earnings per share, basic and diluted, were \$0.19 per share compared to net income of \$0.01 per share for the three months ended September 30, 2001 and 2000 respectively.

For the nine months ended September 30, 2001 Pelican Financial reported net income of \$3.0 million compared to \$186,000 for the same period in 2000. This includes a \$420,000 after tax charge as the result of a cumulative effect of change in accounting principle. Earnings per share, basic and diluted, were \$0.68 per share compared to \$0.04 for the nine months ended September 30, 2001 and 2000 respectively.

The cumulative effect of change in accounting principle is the result of the adoption of a new accounting standard (SFAS No. 133) that requires all derivatives to be recorded at fair value. Unless designated as hedges, changes in these fair values will be recorded in the income statement. Fair value changes involving hedges will generally be recorded by offsetting gains and losses on the hedge and on the hedged item, even if the fair value of the hedged item is not otherwise recorded. Forward contracts and Treasury options are used to manage interest rate risk on loans held for sale and the pipeline of loans in-process. Under SFAS 133, forward contracts and Treasury options will be carried at fair value, while the change in fair value of loans held for sale will be recorded to offset the value of forward contracts designated as a hedge. The effect of adopting SFAS 133 at January 1, 2001 was a pre-tax expense of \$635,495, consisting of \$689,152 of expense to record the loss on the forward contracts offset by income of \$53,657 on hedged loans held for sale. The effect of adopting SFAS 133 on earnings from operations for the quarter ended September 30, 2001 was pre-tax expense of \$2,012,347, primarily consisting of expenses to record the loss on the forward contracts. This was included as offset to the gain on sales of mortgage servicing rights and loans.

For further explanation of the earnings performance, please see the discussion on the retail and mortgage banking segments to follow.

RESULTS OF OPERATIONS

Retail Banking

The following discussion provides information that relates specifically to Pelican Financial's retail banking line of business.

For the three months ended September 30, 2001, Pelican Financial's net income from retail banking activities primarily conducted by Pelican National totaled \$206,000. For the three months ended September 30, 2000 Pelican National's comparable net income was \$330,000. For the nine months ended September 30, 2001, Pelican Financial's net income from retail banking activities primarily conducted by Pelican National totaled \$559,000. For the nine months ended September 30, 2000 Pelican National's comparable net income was 952,000.

The decrease in net income for both the three and nine month periods was primarily attributable to an increase in other operating expenses, including employee compensation. This is due to the additional staff being hired to manage the current and future growth of the retail banking line of business.

Edgar Filing: PELICAN FINANCIAL INC - Form 10-Q

Net Interest Income

Net Interest Income was \$1.3 million and \$1.1 million for the three months ended September 30, 2001 and 2000, respectively. For the nine months ended September 30, 2001 and 2000 net interest income was \$3.8 million and \$3.5 million respectively. The increase in net interest income was due primarily to an increase in the average interest bearing assets outstanding and a reduction in the cost of new funding sources. This was offset by a decrease in yield on interest earning assets.

Average Balance Sheet

The following tables summarize the average yields earned on interest-earning assets and the average rates paid on interest-bearing liabilities for Pelican Financial. With the exception of loans held for sale and other borrowings, the interest earning-assets and interest-bearing liabilities are attributable to Pelican National.

	Three months ended September 30,

Interest rate spread			1.50			2.67 %
Net interest income and net interest Margin		\$ 7,642	3.54 %		\$ 4,846	3.77 %

Net interest income represents the excess of income on interest-earning assets over interest expense on interest bearing liabilities. The principal interest-earning assets are federal funds sold, investment securities and loans receivable. Interest-bearing liabilities primarily consist of notes payable, repurchase agreements, time deposits, interest-bearing checking accounts (NOW accounts), savings, deposits and money market accounts. Funds attracted by these interest-bearing liabilities are invested in interest-earning assets. Accordingly, net interest income depends upon the volume of average interest-earning assets and average interest bearing liabilities and the interest rates earned or paid on them.

Noninterest Income

Retail Banking

Edgar Filing: PELICAN FINANCIAL INC - Form 10-Q

Noninterest income for the three months ended September 30, 2001 was \$66,000, compared to \$62,000 for the same period in 2000, an increase of \$4,000 or 6%. For the nine months ended September 30, 2001, noninterest income was \$187,000 compared to \$119,000 for the same period in 2000. The increase of \$68,000, or 57%, was primarily the result of an increase in gain on sale of mortgage servicing rights and loans of \$38,000. The increase in the gain on sale of mortgage servicing right and loans is due to increased loan production. In addition, service charges on deposit accounts increased \$20,000 resulting from the increase in number of deposit accounts.

Noninterest Expense

Total noninterest expense for the three months ended September 30, 2001 was \$901,000, compared to \$637,000 for the same period in 2000, an increase of \$264,000 or 41%. This increase was primarily due to the following; increases in compensation and employee benefits of \$157,000 or 58%, occupancy and equipment expense of \$32,000 or 24%, and other operating expenses of \$67,000 or 32%. The increases were the result of expenses related to additional support staff hired due to the growth of the bank.

For the nine months ended September 30, 2001, noninterest expense was \$2.7 million compared to \$2.0 million for the same period in 2000. The increase of \$700,000 or 35% was also attributable to the aforementioned expenses incurred as a result of the overall growth of the bank.

Mortgage Banking

The following discussion provides information that relates specifically to Pelican Financial's mortgage banking line of business.

For the three months ended September 30, 2001, Pelican Financial's net income from mortgage banking activities primarily conducted by Washtenaw totaled \$695,000. For the three months ended September 30, 2000 Washtenaw's comparable net loss was \$186,000. For the nine months ended September 30, 2001, the net income from mortgage banking activities totaled \$2.7 million compared to a net loss of \$469,000 for the same period in 2000. The increase in the net income for both periods was primarily attributable to a increase in mortgage loan production as a result of the decrease in mortgage interest rates.

The volume of loans produced for the three months ended September 30, 2001 totaled \$688.0 million as compared to \$249.4 million for the three months ended September 30, 2000, an increase of \$438.6 million or 176%. For the nine months ended September 30, loan production totaled \$2.1 billion and \$814.5 million for 2001 and 2000 respectively. This represents an increase of \$1.3 billion or 158%. The decrease in mortgage interest rates increased the amount of loan refinancing that occurred in the first nine months of 2001. This is the primary factor for the increase in loan volume.

Noninterest Income

Total noninterest income for the three months ended September 30, 2001 was \$6.4 million, compared to \$2.4 million for the three months ended September 30, 2000, an increase of \$4.0 million or 167%. This increase was primarily due to a 219% increase in the gain on sales of mortgage servicing rights and loans of \$3.6 million. For the nine months ended September 30, 2001 noninterest income was \$18.6 million, compared to \$7.7 million for the nine months ended September 30, 2000, an increase of \$10.9 million or 142%. This increase was primarily due to a 206% increase in the gain on sales of mortgage servicing rights and loans of \$10.5 million.

The increase in gain on sale of mortgage servicing rights and loans was primarily due to an increase in the overall new loan origination volume in the first nine months of 2001. In addition, the gains on sale of mortgage servicing rights and loans was effected by an increase of the profit margins on each new loan origination as a result of the increased loan origination volume in the market place. The increase in new loan originations and the increased profit margins are the result of the decrease in mortgage interest rates.

Loan Servicing

At September 30, 2001 and 2000, Washtenaw serviced \$984.2 million and \$1.1 billion of loans respectively. Washtenaw has retained the servicing on a portion of its new production to offset the normal portfolio runoff that occurs when mortgage interest rates decline. This includes both fixed and variable rate conventional loans as well loans insured by the Government National Mortgage Association. However, the rapid decrease in residential mortgage rates has resulted in loans running off at a higher than anticipated rate. During the fourth quarter, management plans to retain a larger percentage of new loan production to maintain its current servicing portfolio size. At September 30, 2001 and 2000, with the exception of servicing related to loans held for sale in Washtenaw's loan portfolio and servicing sold but not yet delivered, all loan servicing was serviced for others.

Service fee income, net of amortization, was \$103,000 and \$89,000 for the three months ended September 30, 2001 and 2000 respectively. For the nine months ended September 30, 2001 and 2000, service fee income net of amortization was \$444,000 and \$474,000 respectively.

Noninterest Expense

Total noninterest expense for the three months ended September 30, 2001 was \$6.9 million, compared to \$3.1 million for the same period in 2000, an increase of \$3.8 million or 123%. This increase was primarily due to the increase in employee compensation and benefits expenses of approximately \$2.2 million and an increase in the mortgage servicing rights valuation adjustment of \$657,000. The increase in employee compensation and benefits was primarily the result of an increase in personnel and overtime as well as an increase in total commissions paid to the existing sales force as a result of the increase in new loan originations. Washtenaw's sales force is comprised primarily of commission based business consultants who are paid a percentage of the loan production from their customers. The mortgage servicing rights valuation adjustment increased due to the decrease in mortgage interest rates. As mortgage interest rates drop, the value of the mortgage servicing rights asset decreases because of the higher likelihood the loans will be refinanced.

For the nine months ended September 30, 2001 and 2000, noninterest expense was \$17.9 million and \$9.9 million, a difference of \$8.0 million between the comparable periods. The increase was primarily the result of an increase in personnel and total commissions paid to the existing sales force as a result of the increase in new loan originations and the increase in the mortgage servicing rights valuation adjustment as previously discussed.

BALANCE SHEET ANALYSIS

The following is a discussion of the consolidated balance sheet of Pelican Financial.

ASSETS

At September 30, 2001, total assets of Pelican Financial equaled \$279.3 million as compared to \$201.2 million at December 31, 2000, an increase of \$78.1 million or 39%. This increase is primarily due to increases in loans held for sale, loans receivable and mortgage servicing rights offset by a decrease in cash and cash equivalents.

Cash and Cash Equivalents

Cash and cash equivalents were \$7.3 million at September 30, 2001 compared to \$10.2 million at December 31, 2000. The decrease of \$2.9 million or 28% was primarily the result of a decrease in federal funds sold of \$2.2 million. Pelican National had excess liquidity that was used to fund loan originations and the purchase of additional investment securities.

Investment Securities

Pelican National utilizes investments in securities for liquidity management and as a method of deploying excess funding not utilized for investment in loans. Pelican National has invested primarily in U. S. government and agency securities, federal funds, and U. S. government sponsored agency issued mortgage-backed securities. As required by SFAS No. 115, Pelican National classifies securities as held-to-maturity, available-for-sale, or trading. At September 30, 2001 and at December 31, 2000, all of the investment securities held in Pelican National's investment portfolio were classified as available for sale.

The following table contains information on the carrying value of Pelican National's investment portfolio at the dates indicated. At September 30, 2001, the market value of Pelican National's investment portfolio totaled \$7.3 million. During the periods indicated and except as otherwise noted, Pelican National had no securities of a single issuer that exceeded 10% of stockholders' equity.

Federal Reserve Bank and Federal Home Loan Bank Stock		1,070		970
Total investment securities	\$	7,328	\$	6,834

Loans Held for Sale

Loans held for sale were \$136.8 million at September 30, 2001 compared to \$80.1 million at December 31, 2000. This increase of \$56.7 million or 71% was caused by the increased refinance activity at Washtenaw resulting from the decrease in mortgage interest rates.

Loans Receivable

Total loans receivable were \$106.5 million at September 30, 2001, an increase of \$17.6 million or 20% from \$88.9 million at December 31, 2000. This increase resulted primarily from increases in commercial, residential real estate and boat lending production at Pelican National. This was offset by a higher level of loans that paid in full due to the declining interest rate environment.

Edgar Filing: PELICAN FINANCIAL INC - Form 10-Q

The following table contains selected data relating to the composition of Pelican Financial's loan portfolio by type of loan at the dates indicated. This table includes mortgage loans available for sale and mortgage loans held for investment. Pelican Financial had no concentration of loans exceeding 10% of total loans that are not otherwise disclosed below.

	September 30, 2001		December 31, 2000

(1) Includes loans held for sale and loans receivable, net

Mortgage Servicing Rights

Total mortgage servicing rights were \$10.2 million at September 30, 2001, an increase of \$3.4 million or 72% from \$6.8 million at December 31, 2000. Washtenaw has retained the servicing rights on a portion of current mortgage loan production. Mortgage servicing rights increased during the period due to loan volume and values on newly originated rights. The majority of the increase relates to the volume of loans sold in

Edgar Filing: PELICAN FINANCIAL INC - Form 10-Q

September, for which the related servicing rights are recorded as an asset until the rights are sold in October under a flow sale agreement.

Asset Quality

Pelican Financial is exposed to certain credit risks related to the value of the collateral that secures loans held in its portfolio and the ability of borrowers to repay their loans during the term thereof. Pelican Financial's senior officers closely monitor the loan and real estate owned portfolios for potential problems on a continuing basis and report to the Board of Directors of Pelican Financial at regularly scheduled meetings. These officers regularly review the classification of loans and the allowance for losses. Pelican Financial also has a quality control department, the function of which is to provide the Board of Directors with an independent ongoing review and evaluation of the quality of the process by which lending assets are generated.

The following table sets forth certain information on nonperforming loans and other real estate owned, the ratio of such loans and other real estate owned to total loans and total assets as of the dates indicated.

Edgar Filing: PELICAN FINANCIAL INC - Form 10-Q

Provision and Allowance for Loan Losses

Pelican National establishes an allowance for loan losses based upon a quarterly or more frequent evaluation by management of various factors inherent in the loan portfolio. These factors include the estimated market value of the underlying collateral, the growth and composition of the portfolio, current delinquency trends and prevailing economic conditions, including property values, employment and occupancy rates, interest rates, and other conditions that may affect the borrowers' ability to comply with repayment terms. If actual losses exceed the amount of the allowance for loan losses, earnings could be adversely affected. As Pelican National's provision for loan losses is based on management's assessment of the general risk inherent in the loan portfolio based on all relevant factors and conditions, the allowance for loan losses represents both general and specific reserves. The provision for loan losses for the three months ended September 30, 2001 was \$150,000. The provision for loan losses for the three months ended September 30, 2000 was \$60,000. The provision for loan losses for the nine months ended September 30, 2001 was \$412,000. The provision for loan losses for the nine months ended September 30, 2000 was \$187,000. The increase is due to the increase in the size of the loan portfolio and the overall downturn in the economy that has contributed to an increase in total nonperforming loans.

The allowance for loan losses represented .72% of the loans receivable outstanding as of September 30, 2001 compared with .57% of the loans receivable outstanding as of December 31, 2000. The amount of the provision for loan losses charged to expense in each of these periods represents management's best estimate during those periods of the addition necessary to establish appropriate allowances for estimated, incurred credit losses. Such estimates were based on management's assessment of the current general economic conditions in Pelican National's market areas, the risk levels associated with the particular composition of the loan portfolio during such periods, and Pelican National's past collection experience.

LIABILITIES

At September 30, 2001, the total liabilities of Pelican Financial were \$254.9 million as compared to \$179.9 million at December 31, 2000, an increase of \$75.0 million or 42%. This increase was primarily due to increases in deposits, notes payable and repurchase agreements.

Deposits

Total deposits were \$94.1 million at September 30, 2001 compared to \$82.0 million at December 31, 2000 an increase of \$12.1 million or 15%. The primary cause of the increase was due to increased balances in the custodial accounts at Pelican National for Washtenaw's various investors. These accounts are for the principal, interest, taxes and insurance collected from the loans currently being serviced by Washtenaw. The balance in these accounts typically increase as the balance in loans held for sale increases or the size of the loan servicing portfolio increases.

Due to Bank

Due to bank was \$26.3 million at September 30, 2001 compared to \$12.5 at December 31, 2000. The increase of \$13.8 million or 110% was due to the increase of mortgage loan production at Washtenaw. Due to Bank represents the drafts provided to fund the loans purchased by Washtenaw that have not yet been presented and cleared the bank.

Notes Payable

Notes payable was \$53.8 million at September 30, 2001 compared to \$27.8 million at December 31, 2000. This increase of \$26.0 million or 94% was primarily caused by an increase in the loans held for sale balance. Since the notes payable represent the warehouse line of credit that Washtenaw uses to fund its loan production until such time that the loans are sold to the secondary market, the balance will generally move in direct correlation with the loans held for sale balance.

Repurchase Agreements

Repurchase agreements were \$54.9 million at September 30, 2001 compared to \$39.0 million at December 31, 2000. This increase of \$15.9 million or 41% in the repurchase agreements was primarily the result of an increase in the balance of loans held for sale. Washtenaw uses repurchase agreements, in addition to its warehouse line of credit, as a means to fund the loans that it purchases. Therefore, much like the notes payable balance, the repurchase agreements balance will move in direct correlation to the loans held for sale balance.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity Management

The objective of liquidity management is to ensure the availability of sufficient resources to meet all financial commitments and to capitalize on opportunities for business expansion. Liquidity management addresses the ability to meet deposit withdrawals either on demand or by contractual maturity, to repay other borrowings as they mature and to make new loans and investments as opportunities arise.

To date Pelican Financial has conducted no business other than managing its investments in Pelican National and Washtenaw. Pelican Financial's source of funds is dividends paid by Washtenaw and Pelican National. Washtenaw's sources of funds include cash from gains on sales of mortgage loans and servicing, net interest income, servicing fees and borrowings. Washtenaw sells its mortgage loans generally on a monthly basis to generate cash for operations. Washtenaw's uses of cash in the short-term include the funding of mortgage loan purchases and originations and purchases of mortgage servicing rights, payment of interest, repayment of amounts borrowed pursuant to warehouse lines of credit, operating and administrative expenses, income taxes and capital expenditures. Long-term uses of cash may also include the funding of securitization activities or portfolios of loan or servicing assets.

Pelican Financial is currently negotiating a \$3.0 million line of credit. This will be used to pay off its existing term loan and fund growth either at Washtenaw or Pelican National. Management anticipates signing the new loan agreement prior to the end of the year.

Washtenaw funds its business through the use of a warehouse line of credit and the use of agreements to repurchase. The agreements to repurchase typically have terms of less than 90 days and are treated as a source of financing. The warehouse line of credit has a limit of \$80 million, of which \$12.0 million represents a sublimit for servicing under contract for sale, and \$6 million represents a working capital sublimit. Borrowing pursuant to the warehouse line of credit totaled \$52.3 million at September 30, 2001 and \$26.0 million at December 31, 2000. The interest rate on the warehouse line of credit is the Federal Funds Rate plus 1.50% resulting in an effective rate of 4.0% at September 30, 2001 and 8.50% at December 31, 2000. The effective interest rate on the agreements to repurchase was 3.40% at June 30, 2001 and 7.90% at December 31, 2000.

LIABILITIES

Edgar Filing: PELICAN FINANCIAL INC - Form 10-Q

Washtenaw purchases its loans either by wiring funds to the closing agent or sending a draft. The decision is based on the requirements of the state where the loan is being purchased. When a draft is used, Washtenaw begins earning interest on the day the draft is issued but does not incur any cost of funds until the draft is presented to bank. When the draft clears the bank, Washtenaw will either borrow money on its warehouse line of credit or through its agreements to repurchase depending on the type of loan. Outstanding drafts totaled \$26.3 million at September 30, 2001 and \$12.5 million at December 31, 2000. The increase is the result of the increase in mortgage lending activity during the period.

Pelican National's sources of funds include net increases in deposits, principal and interest payments on loans, proceeds from sales of loans held for sale, proceeds from maturities and sales and calls of available for sale securities.

The liquidity reserve may consist of cash on hand, cash on demand deposits with other correspondent banks, and other investments and short-term marketable securities as determined by the rules of the Office of the Comptroller of the Currency (OCC), such as federal funds sold and United States securities and securities guaranteed by the United States. At September 30, 2001, Pelican National had a liquidity ratio of 11.73%. Liquidity, as measured in the form of cash and cash equivalents totaled \$7.3 million at September 30, 2001, a decrease of \$2.9 million from December 31, 2000 to September 30, 2001. The decrease is primarily the result of a \$2.2 million decrease in the outstanding federal funds sold at September 30, 2001.

Pelican Financial's ability to continue to purchase loans and mortgage servicing rights and to originate new loans is dependent in large part upon its ability to sell the mortgage loans at par or for a premium or to sell the mortgage servicing rights in the secondary market in order to generate cash proceeds to repay borrowings pursuant to the warehouse facility, thereby creating borrowing capacity to fund new purchases and originations. The value of and market for Pelican Financial's loans and mortgage servicing rights are dependent upon a number of factors, including the borrower credit risk classification, loan-to-value ratios and interest rates, general economic conditions, warehouse facility interest rates and governmental regulations.

Washtenaw generally grants commitments to fund mortgage loans for up to 30 days at a specified term and interest rate. The commitments are commonly known as rate-lock commitments. At September 30, 2001, Washtenaw had outstanding rate-lock commitments to lend \$148.1 million for mortgage loans. Because these commitments may expire without being drawn upon, they do not necessarily represent future cash commitments. Also, as of September 30, 2001, Washtenaw had outstanding commitments to sell \$154.9 million of mortgage loans. These commitments usually are funded within 90 days.

Capital Resources

The Board of Governors of the Federal Reserve System's (FRB) capital adequacy guidelines mandate that minimum ratios be maintained by bank holding companies such as Pelican Financial. Pelican National is governed by capital adequacy guidelines mandated by the OCC.

Based upon their respective regulatory capital ratios at September 30, 2001 Pelican Financial and Pelican National are both well capitalized, based upon the definitions in the regulations issued by the FRB and the OCC setting forth the general capital requirements mandated by the Federal Deposit Insurance Corporation Improvement Act of 1991.

The table below indicates the regulatory capital ratios of Pelican Financial and Pelican National and the regulatory categories for a well capitalized and adequately capitalized bank under the regulatory framework for prompt corrective action (all three capital ratios) at September 30, 2001 and December 31, 2000, respectively:

Actual

Edgar Filing: PELICAN FINANCIAL INC - Form 10-Q

September 30,
2001

December 31,
2000

	September 30, 2001		December 31, 2000		Required to be	
	Pelican National	Pelican Financial	Pelican National	Pelican Financial	Adequately Capitalized	Well Capitalized
Total Equity Capital to risk-weighted assets	12.60 %	13.57 %	14.85 %	17.04 %	8.00 %	10.00 %
Tier 1 Capital to risk-weighted assets	11.74 %	13.14 %	14.14 %	16.64 %	4.00 %	6.00 %
Tier 1 Capital to adjusted total assets	9.11 %	7.54 %	9.85 %	10.50 %	4.00 %	5.00 %

Item 3: Quantitative and Qualitative Disclosure About Market Risk

For a discussion of Pelican Financial's asset/liability management policies as well as the potential impact of interest rate changes upon the market value of Pelican Financial's portfolio, see Pelican Financial's Annual Report to Shareholders and Form 10-K. Management believes that there has been no material change in Pelican Financial's asset/liability position or the market value of Pelican Financial's portfolio since December 31, 2000.

Part II. Other Information

Item 1. Legal Proceedings

A case involving yield spread premiums was granted class-action status by the⁴ U.S. Circuit Court of Appeals. However, during the third quarter, the Department of Housing and Urban Development (HUD) issued a Clarification of Statement of Policy which appears to imply that each yield spread premium case will need to be considered based on the individual circumstances surrounding the loan and therefore eliminate the possibility of class action status. This decision does not directly effect Pelican Financial since they were not named as a defendant. However, as described in the filing of the registrant s 2001 Form 10-K, Pelican Financial is the defendant in two similar cases. At this time, management cannot express an opinion on the impact of these cases or the ultimate outcome of this matter.

Item 2. Changes in Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

Not Applicable.

Item 4. Submission of Matters to a Vote of Shareholders

None

Item 5. Other Information

None

Item 6. Exhibits and Reports on Form 8-K

(a) Exhibits

None

(b) Reports on Form 8-K

There were no reports on Form 8-K filed during the three month period September 30, 2001.
