## NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

## NOTE 1 – THE COMPANY AND BASIS OF PREPARATION.

T. Rowe Price Group (Price Group) derives its consolidated revenues and net income primarily from investment advisory services that its subsidiaries provide to individual and institutional investors in the sponsored T. Rowe Price U.S. mutual funds and other investment portfolios, including separately managed accounts, subadvised funds, and other sponsored investment portfolios. We also provide our investment advisory clients with related administrative services, including distribution, mutual fund transfer agent, accounting, and shareholder services; participant recordkeeping and transfer agent services for defined contribution retirement plans; brokerage; and trust services.

Investment advisory revenues depend largely on the total value and composition of assets under our management. Accordingly, fluctuations in financial markets and in the composition of assets under management impact our revenues and results of operations.

These unaudited condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States, which require the use of estimates and reflect all adjustments that are, in the opinion of management, necessary to a fair statement of our results for the interim periods presented. All such adjustments are of a normal recurring nature. Actual results may vary from our estimates. Certain prior year amounts have been reclassified to conform to the 2017 presentation.

The unaudited interim financial information contained in these condensed consolidated financial statements should be read in conjunction with the consolidated financial statements contained in our 2016 Annual Report.

## NEW ACCOUNTING GUIDANCE

We early adopted Accounting Standards Update No. 2016-09 — Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting on July 1, 2016, which changed the accounting for certain aspects of stock-based compensation awards, including the accounting for income taxes upon settlement of awards, the classification of cash flows associated with awards, the accounting for award forfeitures, and the treatment of hypothetical tax benefits when calculating weighted-average shares outstanding assuming dilution. The guidance required adjustments to be reflected as of January 1, 2016, so we recognized adjustments related to the first and second quarter of 2016 in our condensed consolidated financial statement results for the nine months ended September 30, 2016. As such, we have revised the three- and six-months ended June 30, 2016 financial statements reported in these statements to reflect the impact of the new guidance.

For the three and six months ended June 30, 2016, the recognition of net tax benefits on exercised options and vested restricted stock relative to the stock-based compensation expense reduced our previously reported income tax provisions by \$8 million and \$16.9 million, respectively. The impact (in millions) on our condensed consolidated statement of income and earnings per share on common stock data three- and six-months is as follows:

	Three months ended 6/30/2016		Six months ended 6/30/2016	
	As previously reported	As reported herein	As previously reported	As reported herein
Income before income taxes	\$ 325.0	\$ 325.0	\$ 821.0	\$ 821.0

## Weighted-average common shares

Outstanding	246.9	246.9	246.8	246.8
Outstanding assuming dilution	252.1	252.6	251.8	252.2

The impact (in millions) of reporting excess tax benefits from stock-based compensation as an operating activity rather than a financing activity in the consolidated statements of cash flows for the six months ended June 30, 2016, follows:

	As previously reported	As reported herein
Net cash provided by operating activities	\$ (31.5 )	\$ (14.2 )
Net cash (used in) provided by financing activities	\$ 101.1	\$ 83.8

## NOTE 2 – INFORMATION ABOUT RECEIVABLES, REVENUES, AND SERVICES.

Accounts receivable from our sponsored investment portfolios, including our U.S. mutual funds, for advisory fees and advisory-related administrative services aggregate \$303.1 million at December 31, 2016, and \$320.7 million at June 30, 2017.

Other investment portfolios include advisory revenues of \$94.0 million and \$108.6 million for the three months ended June 30, 2016 and 2017, respectively, that were earned from other sponsored investment portfolios. Fees earned during the six months ended June 30, 2016 and 2017, total \$182.2 million and \$214.7 million respectively.

We voluntarily waived \$3.3 million and \$7.3 million in money market related fees, including advisory fees and fund expenses, during the three and six months ended June 30, 2016 respectively, in order to maintain a positive yield for investors. We did not waive any money market related fees during 2017.

The following table summarizes the investment portfolios and assets under management (in billions) on which we earn advisory fees.

## NOTE 3 - INVESTMENTS.

The carrying values of investments (in millions) we do not consolidate are as follows:

	12/31/2016	6/30/2017
Available-for-sale sponsored investment portfolios	\$ 709.0	\$ 524.4

Total	\$ 1,257.5	\$ 1,333.7

During the first six months of 2016 and 2017, certain sponsored investment portfolios in which we provided initial seed capital at the time of formation were deconsolidated, as we no longer had a controlling interest. Additionally, during the first six months of 2016 and 2017, certain sponsored investment portfolios that were being accounted for as equity method investments were consolidated, as we regained a controlling interest. The net impact of these changes on our condensed consolidated balance sheets and income statements as of the dates the portfolios were deconsolidated or reconsolidated is detailed below.

	Three months ended		Six months ended	
	6/30/2016	6/30/2017	6/30/2016	6/30/2017

Gain (loss) recognized upon deconsolidation	\$—	\$—	\$—	\$—

We did not recognize any additional gain or loss in our consolidated statements of income upon deconsolidation as the sponsored investment portfolios' functional currencies were U.S. dollars and were carried at fair value. Depending on our ownership interest, we are now reporting our residual interests in these sponsored investment portfolios as either equity method or available-for-sale investments.

## AVAILABLE-FOR-SALE SPONSORED INVESTMENT PORTFOLIOS.

The available-for-sale sponsored investment portfolios (in millions) include:

	Aggregate cost	Unrealized gains	holding losses	Aggregate fair value
December 31, 2016				
Stock and blended asset funds	\$ 162.9	\$ 88.0	\$(1.9 )	\$ 249.0
Bond funds	463.3	1.7	(5.0 )	460.0

Stock and blended asset funds	\$ 106.0	\$ 12.0	\$ —	\$ 118.0
Bond funds	405.6	3.8	(3.0 )	406.4
Total	\$ 511.6	\$ 15.8	\$(3.0 )	\$ 524.4

The following table details the number of holdings, the unrealized holding losses, and the aggregate fair value of available-for-sale sponsored investment portfolios with unrealized losses categorized by the length of time they have been in a continuous unrealized loss position:

	Number of holdings	Unrealized holding losses	Aggregate fair value
December 31, 2016			
Less than 12 months	8	\$ (4.2 )	\$ 328.1
12 months or more	2	(2.7 )	169.5
Total	10	\$ (6.9 )	\$ 497.6

June 30, 2017

Less than 12 months	3	\$ (.8 )	\$ 24.5
12 months or more	1	(2.2 )	168.3
Total	4	\$ (3.0 )	\$ 192.8

In addition to the duration of the impairments, we reviewed the severity of the impairment as well as our intent and ability to hold the investments for a period of time sufficient for an anticipated recovery in fair value. Accordingly, impairment of these investment holdings is considered temporary at December 31, 2016 and June 30, 2017.

#### VARIABLE INTEREST ENTITIES.

Our investments at December 31, 2016 and June 30, 2017, include interests in variable interest entities that we do not consolidate as we are not deemed the primary beneficiary. Our maximum risk of loss (in millions) related to our involvement with these entities is as follows:

	12/31/2016	6/30/2017
Investment carrying values	\$ 149.2	\$ 116.4
Unfunded capital commitments	46.4	45.7

The unfunded capital commitments totaling \$45.7 million relate primarily to investment partnerships in which we have an existing investment. In addition to such amounts, a percentage of prior distributions may be called under certain circumstances.

#### NOTE 4 – FAIR VALUE MEASUREMENTS.

We determine the fair value of our cash equivalents and certain investments using the following broad levels of inputs as defined by related accounting standards:

Level 1 – quoted prices in active markets for identical securities.

Level 2 – observable inputs other than Level 1 quoted prices including, but not limited to, quoted prices for similar securities, interest rates, prepayment speeds, and credit risk. These inputs are based on market data obtained from independent sources.

Level 3 – unobservable inputs reflecting our own assumptions based on the best information available. We do not value any investments using Level 3 inputs.

These levels are not necessarily an indication of the risk or liquidity associated with our investments. There have been no transfers between the levels. The following table summarizes our investments (in millions) that are recognized in our condensed consolidated balance sheets using fair value measurements determined based on the differing levels of inputs.

	Level 1	Level 2

The table above excludes investments held by consolidated sponsored investment portfolios which are presented separately on our condensed consolidated balance sheets and are detailed in Note 5.

#### NOTE 5 - CONSOLIDATED SPONSORED INVESTMENT PORTFOLIOS.

The sponsored investment portfolios that we consolidate in our condensed consolidated financial statements are generally those products we provided initial seed capital at the time of their formation and have a controlling interest. Our U.S. sponsored investment portfolios are considered voting interest entities, while those regulated outside the U.S. are considered variable interest entities.

The following table details the net assets of the consolidated sponsored investment portfolios:

<sup>(1)</sup>Cash and cash equivalents includes \$8.8 million and \$5.9 million at December 31, 2016 and June 30, 2017, respectively, of investments in sponsored money market mutual funds.

<sup>(2)</sup>Investments includes \$4.2 million and \$9.0 million at December 31, 2016 and June 30, 2017, respectively, of investments in sponsored portfolios.

Although we can redeem our net interest in these sponsored investment portfolios at any time, we cannot directly access or sell the assets held by the portfolios to obtain cash for general operations. Additionally, the assets of these investment portfolios are not available to our general creditors.

Since third party investors in these investment funds have no recourse to our credit, our overall risk related to the net assets of consolidated sponsored investment portfolios is limited to valuation changes associated with our net interest. We, however, are

required to recognize the valuation changes associated with all underlying investments held by these portfolios in our condensed consolidated statements of income, and disclose the portion attributable to third party investors as net income attributable to redeemable non-controlling interests.

The operating results (in millions) of the consolidated sponsored investment portfolios for the three- and six- months ended June 30, 2016 and 2017, are reflected in our condensed consolidated statements of income as follows:

The operating expenses of these consolidated portfolios are reflected in other operating expenses. In preparing our condensed consolidated financial statements, we eliminated operating expenses of \$1.8 million and \$1.0 million for the three months ended June 30, 2016 and 2017, respectively, against the investment advisory and administrative fees earned from these portfolios. Operating expenses eliminated for the six months ended June 30, 2016 and 2017, were \$3.1 million and \$1.8 million, respectively. The net investment income reflected in non-operating income includes dividend and interest income and realized and unrealized gains and losses on the underlying securities held by the consolidated sponsored investment portfolios.

The table below details the impact of these consolidated investment portfolios on the individual lines of our condensed consolidated statements of cash flows (in millions) for the six months ended June 30, 2016 and 2017.

The net cash provided by financing activities during the first half of 2016 and 2017 includes 193.7 million and \$66.7 million, respectively, of net subscriptions we made into the consolidated sponsored investment portfolios, net of dividends received. These cash flows were eliminated in consolidation.

#### FAIR VALUE MEASUREMENTS.

We determine the fair value of investments held by consolidated sponsored investment portfolios using the following broad levels of inputs as defined by related accounting standards:

Level 1 – quoted prices in active markets for identical securities.

Level 2 – observable inputs other than Level 1 quoted prices including, but not limited to, quoted prices for similar securities, interest rates, prepayment speeds, and credit risk. These inputs are based on market data obtained from independent sources.

Level 3 – unobservable inputs reflecting our own assumptions based on the best information available. The value of investments using Level 3 inputs is insignificant.

These levels are not necessarily an indication of the risk or liquidity associated with these investment holdings. There have been no material transfers between the levels. The following table summarizes the investment holdings held by our consolidated sponsored investment portfolios (in millions) using fair value measurements determined based on the differing levels of inputs.

## NOTE 8 – EARNINGS PER SHARE CALCULATIONS.

The following table presents the reconciliation (in millions) of net income attributable to T. Rowe Price Group to net income allocated to our common stockholders and the weighted-average shares (in millions) that are used in calculating the basic and diluted earnings per share on our common stock. Weighted-average common shares outstanding assuming dilution reflect the potential dilution, determined using the treasury stock method, that could occur if outstanding stock options were exercised and non-participating stock awards vested.

# NOTE 10 - DELL APPRAISAL RIGHTS MATTER.

In 2016, we paid \$166.2 million to compensate certain T. Rowe Price mutual funds, trusts, separately managed accounts, and subadvised clients (collectively, Clients) for the denial of their appraisal rights by the Delaware Chancery Court (Court) in connection with the 2013 leveraged buyout of Dell, Inc. (Dell).

The Court ruled on May 11, 2016, that the Clients could not pursue an appraisal of any shares they held that were voted in favor of the Dell merger. The appraisal statute governing the transaction required the record holder to vote against or abstain from voting on the transaction in order to assert appraisal rights. After previously voting against prior transaction proposals, the voting instructions submitted on behalf of the Clients in connection with voting on the final proposed transaction were incorrectly submitted in favor of the transaction. On May 31, 2016, the Court determined that the fair value of Dell at the time of the merger was \$17.62 per share, as opposed to the \$13.75 price offered in the transaction. As a result, any shareholder perfecting appraisal rights is entitled to a payment at \$17.62 per

share plus statutory interest from the date the Dell transaction closed. The compensation to Clients was intended to make them whole for the voting discrepancy that resulted in the denial of their appraisal rights.

On December 30, 2016, we signed a settlement agreement with our insurance carrier for insurance proceeds totaling \$100.0 million related to this matter. We recognized the proceeds as a reduction to the \$166.2 million nonrecurring charge that we recognized in the second quarter of 2016 and as a receivable in other assets at December 31, 2016. We received the insurance proceeds on January 24, 2017. In the first quarter of 2017, we recognized a reduction in operating expenses from insurance recoveries from other insurance carriers totaling an additional \$50 million, of which \$40 million was paid during the first quarter and the remaining \$10 million was paid during the second quarter.

#### NOTE 11 - COMMITMENTS AND CONTINGENCIES.

On February 14, 2017, T. Rowe Price Group, Inc., T. Rowe Price Associates, Inc., T. Rowe Price Trust Company, current and former members of the management committee, and trustees of the T. Rowe Price U.S. Retirement Program were named as defendants in a lawsuit filed in the United States District Court for the District of Maryland. The plaintiff is a former employee who alleges breaches of ERISA's fiduciary duty and prohibited transaction provisions on behalf of a class of all participants and beneficiaries of the T. Rowe Price 401(k) Plan from February 14, 2011, to the time of judgment. The plaintiff is seeking certification of the complaint as a class action. T. Rowe Price believes the claims are without merit and intends to vigorously defend the action. This matter is in the early stages of litigation and we cannot predict the eventual outcome or whether it will have a material negative impact on our financial results, or estimate the possible loss or range of loss that may arise from any negative outcome.

On April 27, 2016, certain shareholders in the T. Rowe Price Blue Chip Growth Fund, T. Rowe Price Capital Appreciation Fund, T. Rowe Price Equity Income Fund, T. Rowe Price Growth Stock Fund, T. Rowe Price International Stock Fund, T. Rowe Price High Yield Fund, T. Rowe Price New Income Fund and T. Rowe Price Small Cap Stock Fund (the "Funds") filed a Section 36(b) complaint under the caption Zoidis v. T. Rowe Price Assoc., Inc., against T. Rowe Price Associates, Inc. ("T. Rowe Price") in the United States District Court for the Northern District of California. The complaint alleges that the management fees for the identified funds are excessive because T. Rowe Price charges lower advisory fees to subadvised clients with funds in the same strategy. The complaint seeks to recover the allegedly excessive advisory fees received by T. Rowe Price in the year preceding the start of the lawsuit, along with investments' returns and profits. In the alternative, the complaint seeks the rescission of each fund's investment management agreement and restitution of any allegedly excessive management fees. T. Rowe Price believes the claims are without merit and intends to vigorously defend the action. This matter is in the early stages of litigation and we cannot predict the eventual outcome or whether it will have a material negative impact on our financial results, or estimate the possible loss or range of loss that may arise from any negative outcome.

In addition to the matters discussed above, various claims against us arise in the ordinary course of business, including employment-related claims. In the opinion of management, after consultation with counsel, the likelihood of an adverse determination in one or more of these pending ordinary course of business claims that would have a material adverse effect on our financial position or results of operations is remote.

## NOTE 12 - SUPPLEMENTARY CONSOLIDATING CASH FLOW STATEMENT.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders  
T. Rowe Price Group, Inc.:

We have reviewed the condensed consolidated balance sheet of T. Rowe Price Group, Inc. and subsidiaries (“the Company”) as of June 30, 2017, the related condensed consolidated statements of income and comprehensive income for the three- and six- month periods ended June 30, 2017 and 2016, the related condensed consolidated statements of cash flows for the six-month periods ended June 30, 2017 and 2016, and the related condensed consolidated statement of stockholders’ equity for the six-month period ended June 30, 2017. These condensed consolidated financial statements are the responsibility of the Company’s management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of T. Rowe Price Group, Inc. and subsidiaries as of December 31, 2016, and the related consolidated statements of income, comprehensive income, stockholders’ equity, and cash flows for the year then ended (not presented herein); and in our report dated February 7, 2017, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2016, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

GENERAL.

Our revenues and net income are derived primarily from investment advisory services provided to individual and institutional investors in our sponsored U.S. mutual funds and other investment portfolios. The other investment portfolios include: separately managed accounts, subadvised funds, and other sponsored investment portfolios including collective investment trusts, target-date retirement trusts, open-ended investment products offered to investors outside the U.S., and portfolios offered through variable annuity life insurance plans in the U.S. Investment advisory clients domiciled outside the U.S. account for nearly 5% of our assets under management at June 30, 2017.

We manage a broad range of U.S., international and global stock, bond, and money market mutual funds and other investment portfolios, which meet the varied needs and objectives of individual and institutional investors. Investment advisory revenues depend largely on the total value and composition of assets under our management. Accordingly, fluctuations in financial markets and in the composition of assets under management affect our revenues and results of operations. We incur significant expenditures to develop new products and services, and improve and expand our capabilities and distribution channels in order to attract new investment advisory clients and additional investments from our existing clients. These efforts often involve costs that precede any future revenues that we may recognize from an increase to our assets under management.

We remain debt-free with ample liquidity and resources that allow us to take advantage of attractive growth opportunities; invest in key capabilities, including investment professionals, technologies, and new product offerings; and, most importantly, provide our clients with strong investment management expertise and service both now and in the future. We expect to continue our investment in long-term initiatives to sustain and deepen our investment talent, add investment capabilities both in terms of new strategies and new investment vehicles, expand capabilities through enhanced technology, and broaden our distribution reach globally.

We expect to sustain our current pace of spending on a series of key strategic priorities to address evolving client needs and to grow and further diversify our business. Based on these planned initiatives, we currently expect that our planned operating expenses, excluding the operating expense impact of the Dell appraisal rights matter, will grow about 10% in 2017 versus 2016. For 2018, we currently expect our operating expenses could grow by up to 7% over 2017 levels. We could elect to moderate the pace of spending on our planned initiatives should markets decline significantly. In addition, other events not currently planned or expected could impact our expense levels.

BACKGROUND.

Major U.S. stock indexes rose, and many reached all-time highs, during the second quarter of 2017. Large-cap shares outperformed their smaller peers, and growth stocks surpassed value stocks across all market capitalizations. Strong first-quarter corporate earnings outweighed negative factors such as mediocre first-quarter economic growth, a mid-June interest rate increase from the Federal Reserve, domestic political controversies, and increased global geopolitical tensions.

Stocks in developed non-U.S. markets outperformed U.S. shares, as returns to U.S. investors were boosted by a weaker dollar versus most major non-U.S. currencies. Japan and most other developed Asian markets produced positive returns in U.S. dollar terms. European equity markets were broadly higher, buoyed by signs of a pickup in economic growth and continued central bank stimulus efforts. UK market generally lagged.

Emerging markets equities performed in line with developed markets, helped by a generally improving growth backdrop. In dollar terms, markets in Asia strongly outperformed other regions. Major Latin American markets were mixed. Several emerging European markets rose sharply, but Russian shares skidded almost 10%, as oil prices and the ruble declined.

Returns of several major equity market indexes for the three- and six-month periods ended June 30, 2017, are as follows:

Index	Three months ended 6/30/2017	Six months ended 6/30/2017
S&P 500 Index	3.1%	9.3%
NASDAQ Composite Index <sup>(1)</sup>	3.9%	14.1%
Russell 2000 Index	2.5%	5.0%
MSCI EAFE (Europe, Australasia, and Far East) Index	6.4%	14.2%
MSCI Emerging Markets Index	6.4%	18.6%

<sup>(1)</sup> returns exclude dividends

Global bond returns were broadly positive in the second quarter of 2017. In the U.S., investment-grade bond prices rose as long-term interest rates declined, even though the Fed raised short-term rates again in June. Fed officials also provided some details of their plan to begin reducing the size of the central bank's balance sheet-possibly later this year. The 10-year Treasury note yield slipped from 2.4% to 2.3% during the second quarter of 2017. Among high-quality taxable bonds, long-term Treasuries and corporate bonds performed best. Municipal bonds surpassed taxable fixed income securities, helped by steady demand and limited supply. High yield issues generally outperformed investment-grade issues, as investors continued to seek attractive yields.

Bonds in developed non-U.S. markets produced good returns in dollar terms, helped by stronger European currencies. Near the end of the quarter, UK and eurozone bond prices fell and yields spiked as comments from central bank officials raised expectations that the Bank of England and the European Central Bank would begin to reduce their accommodative monetary policies in the months ahead. Japanese bond yields remained very low, as the Bank of Japan's bond purchases kept the 10-year Japanese government bond yield near 0%. Emerging markets bonds produced positive returns in dollar terms, with local currency bonds faring better than dollar-denominated issues. Major emerging markets currencies were mixed.

Returns for several major bond market indexes for the three- and six-month periods ended June 30, 2017, are as follows:

Index	Three months ended 6/30/2017	Six months ended 6/30/2017
Bloomberg Barclays U.S. Aggregate Bond Index	1.5%	2.3%
JPMorgan Global High Yield Index	2.1%	5.0%

Bloomberg Barclays Global Aggregate Ex-U.S. Dollar Bond Index	3.6%	6.1%
JPMorgan Emerging Markets Bond Index Plus	2.4%	6.3%

#### ASSETS UNDER MANAGEMENT.

Assets under management ended the second quarter of 2017 at \$903.6 billion, an increase of \$42.0 billion from March 31, 2017 and \$92.8 billion from December 31, 2016. We had net cash inflows of \$3.7 billion in the second quarter of 2017 and \$4.4 billion for the first half of 2017. The following table presents our assets under management (in billions) at December 31, 2016, and June 30, 2017, by investment portfolio and asset class.

	As of 12/31/2016	As of 6/30/2017
Sponsored U.S. mutual funds	\$514.2	\$ 566.5
Other investment portfolios	296.6	337.1
Total assets under management	\$810.8	\$ 903.6
	As of 12/31/2016	As of 6/30/2017
Equity	\$450.6	\$ 508.9
Fixed income	121.2	125.4
Asset allocation	239.0	269.3
Total assets under management	\$810.8	\$ 903.6

Our target date retirement portfolios, which invest in a broadly diversified portfolio of other T. Rowe Price funds or T. Rowe Price collective investment trusts and automatically rebalance to maintain their specific asset allocation weightings, continue to be a significant part of our assets under management. Assets under management at June 30,

2017, in these target date portfolios totaled \$213.8 billion, including \$164.9 billion in target date retirement funds and \$48.9 billion in target date retirement trusts.

The following table details the changes in our assets under management (in billions) during the three- and six-month periods ended June 30, 2017:

	Three months ended 6/30/2017			Six months ended 6/30/2017		
	Sponsored U.S. mutual funds	Other investment portfolios	Total	Sponsored U.S. mutual funds	Other investment portfolios	Total
Assets under management at beginning of period	\$548.3	\$ 313.3	\$861.6	\$514.2	\$ 296.6	\$810.8
Net cash flows before client transfers	1.9	1.8	3.7	4.4	—	4.4
Client transfers from mutual funds to other portfolios	(7.6 )	7.6	—	(7.9 )	7.9	—
Net cash flows after client transfers	(5.7 )	9.4	3.7	(3.5 )	7.9	4.4
Net market appreciation and income	23.9	14.4	38.3	55.8	32.6	88.4
Change during the period	18.2	23.8	42.0	52.3	40.5	92.8
Assets under management at June 30, 2017	\$566.5	\$ 337.1	\$903.6	\$566.5	\$ 337.1	\$903.6

The client transfers from mutual funds to other investment portfolios noted in the table above were primarily transfers from the target date retirement funds to target date retirement trusts.

The net cash flows (in billions) during the three- and six-month periods ended June 30, 2017, include the following:

	Three months ended 6/30/2017	Six months ended 6/30/2017
Stock and blended asset	\$ (1.4 )	\$ (5.3 )
Bond, money market, and stable value	5.1	9.7
Total net cash flows	3.7	4.4

Net cash inflows into our target date retirement portfolios were \$3.1 billion in the second quarter of 2017 and \$5.4 billion in the first half of 2017.

## RESULTS OF OPERATIONS.

The table below presents financial results on a U.S. GAAP basis as well as a non-GAAP basis that adjusts for the impact of the Dell appraisal rights matter, the firm's consolidated sponsored investment portfolios and other non-operating income. We believe the non-GAAP financial measures below provide relevant and meaningful information to investors about our core operating results.

<sup>(1)</sup> As discussed in Note 1, The Company and Basis of Preparation, to the condensed consolidated financial statements, prior year amounts have been adjusted to reflect the impact of implementing new stock-based compensation accounting guidance in the third quarter of 2016.

<sup>(2)</sup> See the reconciliation to the comparable U.S. GAAP measures at the end of the results of operations sections of this management discussion and analysis.

Investment advisory fees earned in the second quarter of 2017 increased over the comparable 2016 quarter as average assets under our management increased \$113.2 billion, or 14.6%, to \$885.9 billion. Recent increases in money market fund yields have resulted in no fee waivers for those portfolios in the second quarter of 2017. Comparably, we waived \$3.3 million in advisory fees from certain of our money market mutual funds in the second quarter of 2016 quarter.

The average annualized effective fee rate earned on our assets under management during the second quarter of 2017 was 47.3 basis points, compared with 47.9 basis points earned during the second quarter of 2016. Our effective fee rate has declined in part due to fee reductions we made to certain mutual funds and other portfolios since the second quarter of 2016. The impact of the fee reductions was offset in part by higher equity valuations, which resulted in a greater percentage of our assets under management being attributable to higher fee equity portfolios. We regularly assess the competitiveness of our investment advisory fees and will continue to make adjustments as deemed appropriate.

The second quarter of 2016 results included a nonrecurring operating charge of \$166.2 million related to our decision to compensate certain clients in regard to the Dell appraisal rights matter. This nonrecurring charge reduced net income in the second quarter of 2016 by \$100.7 million, or \$.39 in diluted earnings per common share. A quarterly summary of the financial impact of the Dell matter on our pre-tax operating expenses and pre-tax operating cash flows (in millions) since the matter arose is as follows:

Three months ended	Pre-tax operating expense	Pre-tax operating cash flow
June 30, 2016	\$ 166.2	\$(164.0 )
September 30, 2016	—	(.9 )
December 31, 2016	(100.0 )	(1.3 )
Total - 2016	66.2	(166.2 )
March 31, 2017	(50.0 )	140.0
June 30, 2017	—	10.0
Total impact from Dell appraisal rights matter	\$ 16.2	\$(16.2 )

Our operating margin in the second quarter of 2017 was 43.3%, compared to 27.1% earned in the 2016 quarter. Excluding the nonrecurring charge related to the Dell appraisal rights matter, our operating margin in the second quarter of 2016 would have been 43.0%.

#### Net revenues

Investment advisory revenues earned in the second quarter of 2017 from the T. Rowe Price mutual funds distributed in the U.S. were \$754.3 million, an increase of \$85.2 million, or 12.7%, from the comparable 2016 quarter. Average mutual fund assets under management in the second quarter of 2017 were \$560.2 billion, an increase of 13.8% from the average in the second quarter of 2016.

Investment advisory revenues earned in the second quarter of 2017 from the other investment portfolios were \$289.6 million, an increase of \$38.1 million, or 15.1%, from the comparable 2016 quarter. Average assets under management for these portfolios in the second quarter of 2017 were \$325.7 billion, an increase of 16.1% from the average in the second quarter of 2016. The second quarter of 2016 and 2017 include the elimination of \$2.0 million and \$1.1 million, respectively, in advisory fees against the related management fee expense recorded by our consolidated sponsored investment portfolios.

Administrative fee revenues in the second quarter of 2017 were \$91.3 million, an increase of \$2.8 million from the comparable 2016 quarter. The increase is primarily attributable to the servicing activities we provide to the sponsored U. S. mutual funds and their investors. These changes in administrative fee revenues are generally offset by similar changes in related operating expenses that are incurred to provide such services to the funds and their investors.

#### Operating expenses

Compensation and related costs were \$403.8 million in the second quarter of 2017, an increase of \$32.8 million, or 8.8%, compared to the second quarter of 2016. Our base salaries and related benefits have increased \$26.6 million from the second quarter of 2016 primarily as a result of a 6.8% increase in our average staff size and modest increases in base salaries at the beginning of 2017. Our interim accrual for annual variable compensation increased \$9.7 million from the 2016 quarter. Our interim accrual for annual variable compensation program is recognized ratably over the year using the ratio of recognized quarterly net operating income to forecasted annual net operating income. Higher market valuations on a larger supplemental savings plan liability resulted in \$4.4 million in additional compensation expense in the second quarter of 2017 compared with the 2016 period. These higher costs were offset, in part, by a

\$9.1 million increase in labor capitalization related to internally developed software as we continue to invest in technology capabilities. We employed 6,651 associates at June 30, 2017.

Occupancy and facility costs, together with depreciation expense, were \$83.1 million in the second quarter of 2017, an increase of \$8.5 million, or 11.4%, compared to the second quarter of 2016. The increase is attributable to higher facilities costs as well as the added costs to update and enhance technology capabilities, including related maintenance programs.

Other operating expenses in the second quarter of 2017 were up \$23.2 million from the comparable 2016 quarter. More than half of the increase is attributable to professional fees incurred to support the firm's continued investment in its operating capabilities. The remainder of the change from the second quarter of 2016 is a result of increases in other operating costs to meet the growing operational and regulatory business demands. These costs include those related to our defined contribution recordkeeping business, third-party service costs, and travel costs.

#### Non-operating income

Net non-operating income in the second quarter of 2017 was \$112.0 million, an increase of \$70.5 million from the 2016 quarter. The following table details the components of non-operating income (in millions) during the second quarter of 2016 and 2017 and the related dollar change.

	Three months ended		Dollar change
	6/30/2016	6/30/2017	
Net gains realized on dispositions of available-for-sale investments	\$—	\$ 30.3	\$ 30.3
Ordinary dividend distributions from sponsored fund investments	1.8	3.5	1.7
Unrealized gains on sponsored equity method and trading investments	7.5	32.0	24.5
Net investment income on sponsored fund investments not consolidated	9.3	65.8	56.5
Other investment income	6.0	5.6	(.4 )
Total earned from investments	15.3	71.4	56.1
Net investment income of consolidated sponsored investment portfolios	26.4	39.4	13.0
Other non-operating (expense) income, including net foreign currency gains	(.2 )	1.2	1.4
Non-operating income	\$41.5	\$ 112.0	\$ 70.5

Nearly all of the \$30.3 million in net realized gains and \$23.6 million of the \$32.0 million in unrealized gains on sponsored funds recognized during the second quarter of 2017 resulted from our decision to economically hedge the market exposure associated with our supplemental savings plan liability. In order to fund the hedge portfolio, we used the proceeds from the sale of certain available-for-sale sponsored investment holdings as well as designated a sponsored fund that was held as available-for-sale. The designation of the sponsored fund investment resulted in the reclassification of the investment's unrealized holding gain to the income statement from the balance sheet where it was previously recognized as it was transferred from an available-for-sale security to a trading security.

The impact (in millions) of consolidating certain sponsored investment portfolios on the individual lines of our condensed consolidated statements of income for the 2016 and 2017 quarters is as follows:

	Three months ended	
	6/30/2016	6/30/2017
Operating expenses reflected in net operating income	\$(3.5 )	\$( 2.7 )
Net investment income reflected in non-operating income	26.4	39.4
Impact on income before taxes	\$22.9	\$ 36.7
Net income attributable to T. Rowe Price Group's interest in the consolidated sponsored investment portfolios	\$15.0	\$ 20.6
Net income attributable to redeemable non-controlling interests (unrelated third party investors)	7.9	16.1
Impact on income before taxes	\$22.9	\$ 36.7

## Provision for income taxes

The effective tax rate for the second quarter of 2017 was 37.1%. We currently estimate our effective tax rate for the full-year 2017 will be 37.4%. We expect there to be volatility in our effective tax rate in future periods as the stock-based compensation benefits now recognized in our tax provision are impacted by market fluctuations in our stock price and the timing of when option holders exercise their awards. Our effective tax rate will also be impacted by changes in our consolidated sponsored investment portfolios that are driven by the market and changes in the non-controlling interest. Our effective income tax rate also reflects the relative contribution of pre-tax income generated by our foreign subsidiaries that are subject to tax rates lower than our U.S. rates. Changes in the relative contribution of pre-tax income from U.S. and foreign sources or changes in tax rates in relevant jurisdictions may affect our effective income tax rate and overall net income in the future.

First half of 2016 versus first half of 2017.

<sup>(2)</sup> See the reconciliation to the comparable U.S. GAAP measures at the end of the results of operations sections of this management discussion and analysis.

Investment advisory revenues earned in the first half of 2017 increased 13.6% over the comparable 2016 period as average assets under our management increased \$115.2 billion, or 15.4%, to \$865.6 billion. We waived no money

market fees in the first half of 2017, compared to \$7.3 million in the 2016 period. The average annualized fee rate earned on our assets under management was 47.4 basis points in the first half of 2017, compared with the 48.0 basis points earned in the first half of 2016. Our effective fee rate has declined in part due to fee reductions we made to certain mutual funds and other portfolios since the end of 2015. The impact of the fee reductions was offset in part by higher equity valuations, which resulted in a greater percentage of our assets under management being attributable to higher fee equity portfolios.

As discussed previously, we recognized in the second quarter of 2016 a nonrecurring operating charge of \$166.2 million related to our decision to compensate certain clients in regard to the Dell appraisal rights matter. During the first quarter of 2017, we recognized insurance recoveries totaling \$50 million from claims filed in 2016 related to this matter. A summary of the financial impact of the Dell appraisal rights matter on our periodic financial results since the matter arose is summarized in a table on page 25.

Our operating margin in the first half of 2017 was 45.0%, compared to 34.1% in the 2016 period. Excluding the impact of the Dell matter, our operating margin was 42.9% in the first six months of 2017, and 42.2% for the comparable 2016 period.

#### Net revenues

Investment advisory revenues earned from the T. Rowe Price mutual funds distributed in the U.S. increased 13.0%, or \$168.9 million, to \$1.5 billion. Average mutual fund assets in the first half of 2017 were \$548.4 billion, an increase of 14.5% from the average for the comparable 2016 period. The increase in advisory revenues was also due in part to the reduction in money market fee waivers made in the first half of 2017 compared with the 2016 period.

Investment advisory revenues earned on the other investment portfolios for the first half of 2017 were \$564.9 million, an increase of \$74.7 million, or 15.2%, from the \$490.2 million earned in the comparable 2016 period. The first half of 2017 includes the elimination of \$2.1 million in advisory fees against the related management fee expense recorded by our consolidated sponsored investment portfolios. Average assets in these portfolios were \$317.2 billion during the first half of 2017, up 16.8% from the comparable 2016 period.

Distribution and servicing fee revenues earned from 12b-1 plans of the Advisor, R, and Variable Annuity II class shares of our sponsored portfolios were \$71.6 million in the first half of 2017, an increase of \$2.1 million from the comparable 2016 period on higher average assets under management in these share classes. The 12b-1 fees earned are offset entirely by the costs paid to third party intermediaries who source these assets. These costs are reported as distribution and servicing costs in the condensed consolidated income statements.

#### Operating expenses

Compensation and related costs were \$801.2 million in the first half of 2017, an increase of \$75.0 million, or 10.3%, compared to the 2016 period. The largest part of the increase is attributable to a \$47.6 million increase in base salaries and related benefits which resulted from an increase of 5.8% in average headcount from the 2016 period combined with a modest increase in salaries at the beginning of 2017. The interim accrual for our annual variable compensation in the 2017 period rose \$28.1 million over the interim accrual in the 2016 period. Increased market values underlying our supplemental savings plan drove costs higher by \$11.1 million over the comparable 2016 period. We also experienced an increase in recruiting and other employee-related costs as a result of the increase in headcount from the 2016 year-to-date period. The increases in these compensation and related expenses were offset in part by an increase of \$18.5 million in the level of labor capitalized in 2017 compared with the 2016 period.

Advertising and promotion costs were \$44.2 million in the second quarter of 2017, compared with \$38.0 million in the 2016 period. We currently expect advertising and promotion costs for 2017 will be up to 10% higher than the 2016 year as we execute on a number of strategic initiatives.

Occupancy and facility costs, together with depreciation expense, increased \$15.9 million, or 10.7%, compared to the first half of 2016. The increase is attributable to higher facilities costs as well as the added costs to update and enhance technology capabilities, including related maintenance programs.

Other operating expenses were \$224.8 million in the first half of 2017, an increase of \$28.5 million from the comparable 2016 period. About half of the increase is attributable to professional fees incurred to support the firm's continued investment in its operating capabilities. The remainder of the change from the first half of 2016 is a result of increases in other operating costs to meet the growing operational and regulatory business demands. These costs include those related to our defined contribution recordkeeping business, information and third-party service costs, and travel costs.

## Non-operating income

Net non-operating investment activity during the first half of 2017 resulted in income of \$227.0 million, an increase of \$100.4 million from the 2016 period. The following table details the components of non-operating income (in millions) during the first half of 2016 and 2017.

	Six months ended		
	6/30/2016	6/30/2017	Dollar change
Net gains realized on dispositions of available-for-sale investments	\$52.3	\$ 77.9	\$ 25.6

Other non-operating expenses, including net foreign currency gains	(.2 )	2.5	2.7
Non-operating income	\$126.6	\$ 227.0	\$ 100.4

During the first six months of 2017, non-operating income includes \$30.8 million in gains realized from the disposition of certain available-for-sale investments and \$23.6 million in unrealized gains recognized on sponsored trading investments as a result of our decision to economically hedge the market exposure associated with our supplemental savings plan liability. In order to fund the hedge portfolio, we used the proceeds from the sale of certain available-for-sale sponsored investment holdings as well as designated a sponsored fund that was held as available-for-sale. The designation of the sponsored fund investment resulted in the reclassification of the investment's unrealized holding gain to the income statement from the balance sheet where it was previously recognized as it was transferred from an available-for-sale security to a trading security.

# Non-GAAP information and reconciliation

We believe the non-GAAP financial measures below provide relevant and meaningful information to investors about our core operating results. These measures have been established in order to increase transparency for the purpose of evaluating our core business, for comparing current results with prior period results, and to enable more appropriate comparison with industry peers. However, non-GAAP financial measures should not be considered a substitute for financial measures calculated in accordance with U.S. GAAP and may be calculated differently by other companies. The following schedule reconciles (in millions, except for per-share amounts) U.S. GAAP financial measures to non-GAAP measures for the three- and six-month periods ended June 30, 2016 and 2017.

<sup>(1)</sup> We implemented new consolidation accounting guidance on January 1, 2016, that resulted in a larger number of our sponsored investment portfolios, that we provide seed capital to at formation, to be consolidated in our financial statements as we were deemed to have a controlling financial interest. The non-GAAP adjustments add back the management fees we earn from the consolidated sponsored investment portfolios and remove the investment income and operating expenses of these portfolios that have been included in our U.S. GAAP condensed consolidated statements of income. We believe the consolidated sponsored investment portfolios may impact the reader's ability to understand our core operating results.

(2) This non-GAAP adjustment removes the non-operating income that remains after backing out the portion related to the consolidated sponsored investment portfolios. We believe excluding non-operating income helps the reader's ability to understand the firm's core operating results and increases comparability to prior years. Additionally, we do not emphasize the impact of non-operating income when managing our firm and evaluating our performance.

Total other non-operating income	\$15.1	\$ 72.6	\$76.4	\$ 138.7

(3) In the second quarter of 2016, we recognized a nonrecurring charge of \$166.2 million related to our decision to compensate certain clients in regard to the Dell appraisal rights matter. In the first quarter of 2017, we recognized insurance recoveries of \$50 million as a reduction in operating expenses from claims that were filed in relation to the matter. We believe it is useful to readers of our consolidated statements of income to adjust for these non-recurring insurance recoveries in arriving at adjusted operating expenses and net income attributable to T. Rowe Price Group, Inc. and diluted earnings per share, as this will aid with comparability to prior periods and analyzing our core business results.

(4) These were calculated using the effective tax rate applicable to the related items.

(5) This non-GAAP measure was calculated by applying the two-class method to adjusted net income attributable to T. Rowe Price Group, Inc. divided by the weighted-average common shares outstanding assuming dilution.

## CAPITAL RESOURCES AND LIQUIDITY.

We increased our quarterly recurring dividend per share by 5.6% to \$.57 per share in the second quarter of 2017. Additionally, we expended \$447.0 million to repurchase 6.5 million shares, or 2.6%, of our outstanding common stock in the first half of 2017. These dividends and repurchases were expended using existing cash balances and cash generated from operations. We will generally repurchase our common stock over time to offset the dilution created by our equity-based compensation plans.

Since the end of 2014, we have returned nearly \$4.0 billion to stockholders through stock repurchases, our regular quarterly dividends, and a special dividend in 2015.

The following table details (in millions) the line items of the condensed consolidated balance sheet as of June 30, 2017, where our cash and sponsored portfolio investment holdings are presented as well as the amount of other investments that make up the remainder of the investments line. The investment presentation on the balance sheet is based on the type of investment, as well as how we account for the item.

Our condensed consolidated balance sheet reflects the cash and cash equivalents, investments, other assets and liabilities of those sponsored portfolios we consolidate, as well as redeemable non-controlling interests for the portion of these sponsored portfolios that are held by unrelated third party investors. Although we can redeem our net interest in these sponsored investment portfolios at any time, we cannot directly access or sell the assets held by the portfolios to obtain cash for general operations. Additionally, the assets of these investment portfolios are not available to our general creditors. Our interest in these sponsored investment portfolios was used as initial seed capital and is recategorized as discretionary when it is determined by management that the seed capital is no longer needed. We assess the discretionary investment portfolio and liquidate our interest, if decided, in a way as to not impact the portfolio and ultimately, the unrelated third party investors.

We anticipate property and equipment expenditures for the full-year 2017 to be up to \$200 million, of which about two-thirds is planned for technology initiatives. Given the availability of our financial resources, we expect to fund our anticipated capital expenditures with operating resources, and do not maintain an available external source of liquidity.

The following table summarizes the cash flows (in millions) for the six months ended June 30, 2016 and 2017, that are attributable to T. Rowe Price Group, our consolidated sponsored investment portfolios, and the related eliminations required in preparing the statement.

Operating activities attributable to T. Rowe Price Group during the first half of 2017 provided cash flows of 876.1 million, an increase of \$213.9 million from the 2016 period. More than half of the increase is attributable to the \$150.0 million in insurance proceeds received in the first six months of 2017 from insurance claims filed in 2016 in regard to the Dell appraisal rights matter. The remaining increase in cash flows is primarily related to the timing of settlement of our other assets and liabilities offset by new investments made in sponsored investment portfolios held as trading in order to economically hedge our supplemental savings plan liability. Our interim operating cash flows do not include the cash impact of variable compensation that is accrued throughout the year before being substantially paid out in December. The net cash provided by operating activities attributable to T. Rowe Price Group was offset in part by the net change in trading securities held in our consolidated sponsored investments' underlying investment portfolios.

Net cash used in investing activities that are attributable to T. Rowe Price Group totaled \$114.1 million in the first half of 2017, an increase of \$217.2 million from the comparable 2016 period. During the first half of 2017, we realized \$204.5 million more proceeds from the sale of our available-for-sale investments compared with the 2016 period. Additionally, the amount of seed capital investments we provided in the first half of 2017 decreased by \$127.4 million compared with the 2016 period. Since we consolidate these sponsored investment portfolios, the seed capital that we provided less any seed capital received back was eliminated in preparing our consolidated condensed statement of cash flow. During the 2016 period we recognized \$85 million in proceeds from the sale of equity method investments compared with \$1.2 million in 2017 period. The cash flow attributable to consolidated sponsored investment portfolios of \$45.9 million represents the net cash removed from our balance sheet from consolidating and deconsolidating portfolios during the first half of 2017. During the 2016 period the equivalent cash flow added \$68.3 million to our balance sheet.

Net cash used in financing activities attributable to T. Rowe Price Group were \$652.9 million in the first half of 2017 compared with \$456.2 million in the 2016 period. The increase in cash used in financing activities is largely related to the \$202.9 million more we expended in common stock purchases in the first half of 2017 compared to the 2016 period. This increase was offset by higher cash proceeds of \$15.0 million received from stock option exercises in the first half of 2017 compared with the 2016 period. The increase in net cash used in financing activities attributable to T. Rowe Price Group was largely offset by the \$177.7 million increase in cash provided by consolidated sponsored investment portfolios from the net subscriptions received from redeemable non-controlling interest holders.

#### CRITICAL ACCOUNTING POLICIES.

The preparation of financial statements often requires the selection of specific accounting methods and policies from among several acceptable alternatives. Further, significant estimates and judgments may be required in selecting and applying those methods and policies in the recognition of the assets and liabilities in our consolidated balance sheets, the revenues and expenses in our consolidated statements of income, and the information that is contained in our significant accounting policies and notes to consolidated financial statements. Making these estimates and judgments requires the analysis of information concerning events that may not yet be complete and of facts and circumstances that may change over time. Accordingly, actual amounts or future results can differ materially from those estimates that we include currently in our consolidated financial statements, significant accounting policies, and notes.

There have been no material changes in the critical accounting policies previously identified in our 2016 Annual Report on Form 10-K.

#### NEW ACCOUNTING STANDARDS.

In May 2014, the FASB issued Accounting Standards Update No. 2014-09 — Revenue from Contracts with Customers, and subsequently has issued five related accounting standard updates clarifying several aspects of ASU 2014-09,

including technical corrections and improvements. The overall objective of the new standards updates is to provide a single, comprehensive revenue recognition model for all contracts with customers to improve comparability within industries, across industries, and across capital markets. The revenue standard contains principles that will be applied to determine the measurement of revenue and timing of when it is recognized. We anticipate adopting the new standard on its effective date, January 1, 2018, though we have not yet selected whether we would adopt using the retrospective approach with adjustments to each prior period or the retrospective method with the cumulative effect of initial application recognized at the date of initial application. Our implementation efforts include a detailed review of revenue contracts within the scope of the guidance and evaluation of the impact on the Company's revenue recognition policies. While we are continuing to assess all potential impacts these standards will have on our financial position and results of operations, early conclusions indicate that these standards will not have a material impact. While we have not identified material changes in the timing of revenue recognition, we continue to evaluate the presentation of certain revenue-related costs on a gross versus net basis and related disclosures of revenue.

In January 2016, the FASB issued Accounting Standards Update No. 2016-01 — Financial Instruments — Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. The amendments in this update address certain aspects of recognition, measurement, presentation, and disclosure of financial instruments. The ASU is effective for fiscal years and interim periods within those years beginning after December 15, 2017, and requires a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption. Early adoption is not permitted. The new guidance will require the change in fair value of equity investments with readily determinable fair values to be recognized through the income statements. We are currently evaluating the full impact of the standard, however, upon adoption the change in the fair value of our available-for-sale investments will be recognized in our consolidated income statement rather than our consolidated statement of comprehensive income.

In February 2016, the FASB issued Accounting Standards Update No. 2016-02 — Leases (Topic 842). The objective of the update is to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. The amendments in this update are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted. We are currently evaluating the impact this standard will have on our financial position and results of operations.

In August 2016, the FASB issued Accounting Standards Update No. 2016-15 — Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (a consensus of the Emerging Issues Task Force). The amendments in this update provide guidance on eight specific cash flow issues. The new guidance is intended to reduce diversity in practice in how certain transactions are classified in the statement of cash flows. The amendments in this update are effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted. We evaluated the impact of the standard and believe it will not have a material impact on our consolidated statements of cash flows.

We have considered all other newly issued accounting guidance that is applicable to our operations and the preparation of our condensed consolidated statements, including those we have not yet adopted. We do not believe that any such guidance has or will have a material effect on our financial position or results of operations.

#### FORWARD-LOOKING INFORMATION.

From time to time, information or statements provided by or on behalf of T. Rowe Price, including those within this report, may contain certain forward-looking information, including information or anticipated information relating to: our revenues, net income and earnings per share on common stock; changes in the amount and composition of our assets under management; our expense levels; our estimated effective income tax rate; and our expectations regarding financial markets, future transactions and strategic initiatives, dividends, investments, capital expenditures, stock repurchases, and other conditions. Readers are cautioned that any forward-looking information provided by or on behalf of T. Rowe Price is not a guarantee of future performance. Actual results may differ materially from those in forward-looking information because of various factors including, but not limited to, those discussed below and in Item 1A, Risk Factors, of our Form 10-K Annual Report for 2016. Further, forward-looking statements speak only as of the date on which they are made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which it is made or to reflect the occurrence of unanticipated events.

Our future revenues and results of operations will fluctuate primarily due to changes in the total value and composition of assets under our management. Such changes result from many factors including, among other things: cash inflows and outflows in the T. Rowe Price U.S. mutual funds (Price funds) and other managed investment portfolios; fluctuations in global financial markets that result in appreciation or depreciation of the assets under our management; our introduction of new products, including mutual funds and investment portfolios, and services; and changes in retirement savings trends relative to participant-directed investments and defined contribution plans. The

ability to attract and retain investors' assets under our management is dependent on investor sentiment and confidence; the relative investment performance of the Price funds and other managed investment portfolios as compared to competing offerings and market indexes; the ability to maintain our investment management and administrative fees at appropriate levels; competitive conditions in the mutual fund, asset management, and broader financial services sectors; and our level of success in implementing our strategy to expand our business. Our revenues are substantially dependent on fees earned under contracts with the Price funds and could be adversely affected if the independent directors of one or more of the Price funds terminated or significantly altered the terms of the investment management or related administrative services agreements. Non-operating income will also fluctuate as a result of the consolidation of certain of our investment portfolios as well as the size of our investments, changes in their market valuations, and any other-than-temporary impairments that may arise, or in the case of our equity method investments, our proportionate share of the investees net income.

Our future results are also dependent upon the level of our expenses, which are subject to fluctuation for the following or other reasons: changes in the level of our advertising expenses in response to market conditions, including our efforts to expand our investment advisory business to investors outside the U.S., and to further penetrate our distribution channels within the U.S.; the pace and level of our planned increase in spending to support key strategic priorities; variations in the level of total compensation expense due to, among other things, bonuses, restricted stock units and other equity grants, other incentive awards, fluctuations in our supplemental savings plan liability due to changes in market valuations, changes in our employee count and mix, and competitive factors; any goodwill or other asset impairment that may arise; fluctuation in foreign currency exchange rates applicable to our investment in and the costs of our international operations; expenses and capital costs, such as technology assets, depreciation, amortization, and research and development, incurred to maintain and enhance our administrative and operating services infrastructure; unanticipated costs that may be incurred to protect investor accounts and the goodwill of our clients; and disruptions of services, including those provided by third parties, such as fund accounting and other recordkeeping services, facilities, communications, power, and the mutual fund transfer agent and accounting systems.

Our business is also subject to substantial governmental regulation, and changes in legal, regulatory, accounting, tax, and compliance requirements may have a substantial effect on our operations and results, including but not limited to effects on costs that we incur and effects on investor interest in mutual funds and investing in general, or in particular classes of mutual funds or other investments.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There has been no material change in the information provided in Item 7A of the Form 10-K Annual Report for 2016.

### Item 4. Controls and Procedures.

Our management, including our principal executive and principal financial officers, has evaluated the effectiveness of our disclosure controls and procedures as of June 30, 2017. Based on that evaluation, our principal executive and principal financial officers have concluded that our disclosure controls and procedures as of June 30, 2017 are effective at the reasonable assurance level to ensure that the information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, including this Form 10-Q quarterly report, is recorded, processed, summarized, and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms, and to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Our management, including our principal executive and principal financial officers, has evaluated any change in our internal control over financial reporting that occurred during the second quarter of 2017, and has concluded that there was no change during the second quarter of 2017 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

## PART II – OTHER INFORMATION

### Item 1. Legal Proceedings.

On February 14, 2017, T. Rowe Price Group, Inc., T. Rowe Price Associates, Inc., T. Rowe Price Trust Company, current and former members of the management committee, and trustees of the T. Rowe Price U.S. Retirement Program were named as defendants in a lawsuit filed in the United States District Court for the District of Maryland. The plaintiff is a former employee who alleges breaches of ERISA's fiduciary duty and prohibited transaction provisions on behalf of a class of all participants and beneficiaries of the T. Rowe Price 401(k) Plan from February 14, 2011, to the time of judgment. The plaintiff is seeking certification of the complaint as a class action. T. Rowe Price believes the claims are without merit and intends to vigorously defend the action.

On April 27, 2016, certain shareholders in the T. Rowe Price Blue Chip Growth Fund, T. Rowe Price Capital Appreciation Fund, T. Rowe Price Equity Income Fund, T. Rowe Price Growth Stock Fund, T. Rowe Price International Stock Fund, T. Rowe Price High Yield Fund, T. Rowe Price New Income Fund and T. Rowe Price Small Cap Stock Fund (the "Funds") filed a Section 36(b) complaint under the caption Zoidis v. T. Rowe Price Assoc., Inc., against T. Rowe Price Associates, Inc. ("T. Rowe Price") in the United States District Court for the Northern District of California. The complaint alleges that the management fees for the identified funds are excessive because T. Rowe Price charges lower advisory fees to subadvised clients with funds in the same strategy. The complaint seeks to recover the allegedly excessive advisory fees received by T. Rowe Price in the year preceding the start of the lawsuit, along with investments' returns and profits. In the alternative, the complaint seeks the rescission of each fund's investment management agreement and restitution of any allegedly excessive management fees. T. Rowe Price believes the claims are without merit and intends to vigorously defend the action.

In addition to the matters discussed above, various claims against us arise in the ordinary course of business, including employment-related claims. In the opinion of management, after consultation with counsel, the likelihood of an adverse determination in one or more of these pending ordinary course of business claims that would have a material adverse effect on our financial position or results of operations is remote.

### Item 1A. Risk Factors.

With the exception of the following additions or updates to the Legal and Regulatory Risks discussed in Item 1A of our Form 10-K Annual Report for 2016, there have been no material changes in the risk factors previously provided.

Legal and regulatory developments in the mutual fund and investment advisory industry could increase our regulatory burden, impose significant financial and strategic costs on our business, and cause a loss of, or impact the servicing of, our clients and fund shareholders.

Our regulatory environment is frequently altered by new regulations and by revisions to, and evolving interpretations of, existing laws and regulations. New laws and regulations present areas of uncertainty susceptible to alternative interpretations; regulators and prospective litigants may not agree with reasoned interpretations we adopt. Future changes could require us to modify or curtail our investment offerings and business operations, or impact our expenses and profitability. Additionally, some laws and regulations may not directly apply to our business but may impact the capital markets, service providers or have other indirect effects on our ability to provide services to our clients.

Potential impacts of current or proposed legal or regulatory requirements include, without limitation, the following:

The revised Markets in Financial Instruments Directive (MiFID II Directive) and Regulation (MiFIR) (together "MiFID II") will apply across the European Union ("EU") and member states of the European Economic Area beginning

on January 3, 2018, unless this date is extended. Implementation of MiFID II will significantly impact both the structure and operation of EU financial markets. Some of the main changes introduced under MiFID II include applying enhanced disclosure requirements, enhancing conduct of business and governance requirements, broadening the scope of pre and post trade transparency, increasing transaction reporting requirements, transforming the relationship between client commissions and research, and further regulation of trading venues. Compliance with MiFID II may materially impact the manner in which we obtain research and increase our costs.

We cannot predict the nature of future changes to the legal and regulatory requirements applicable to our business, nor the extent of the impacts that will result from current or future proposals. However, any such changes are likely to increase the costs of compliance and the complexity of our operations. They may also result in changes to our product or service offerings. The changing regulatory landscape may also impact a number of our service providers and, to the extent such providers alter their services or increase their fees, it may impact our expenses or those of the products we offer.

We are subject to regulatory and governmental inquiries and civil litigation. An adverse outcome of any such proceeding could involve substantial financial penalties. From time to time, various claims against us arise in the ordinary course of business, including employment-related claims. There also has been an increase in litigation and in regulatory investigations in the financial services industry in recent years, including customer claims, class action suits, and government actions alleging substantial monetary damages and penalties.

We carry insurance in amounts and under terms that we believe are appropriate. We cannot be assured that our insurance will cover every liability and loss to which we may be exposed, or that our insurance policies will continue to be available at acceptable terms and fees. Certain insurance coverage may not be available or may be prohibitively expensive in future periods. As our insurance policies come up for renewal, we may need to assume higher deductibles or co-insurance liabilities, or pay higher premiums, which would increase our expenses and reduce our net income.

In 2016, we paid \$166.2 million to compensate certain T. Rowe Price mutual funds, trusts, separately managed accounts, and subadvised clients (collectively, “Clients”) for the denial of their appraisal rights by the Delaware Chancery Court (Court) in connection with the 2013 leveraged buyout of Dell, Inc. (Dell). The Court ruled on May 11, 2016, that the Clients could not pursue an appraisal of any shares they held that were voted in favor of the Dell merger. The appraisal statute governing the transaction required the record holder to vote against or abstain from voting on the transaction in order to assert appraisal rights. After previously voting against prior transaction proposals, the voting instructions submitted on behalf of the Clients in connection with voting on the final proposed transaction were incorrectly submitted in favor of the transaction. On May 31, 2016, the Court determined that the fair value of Dell at the time of the merger was \$17.62 per share, as opposed to the \$13.75 price offered in the transaction. As a result, any shareholder perfecting appraisal rights is entitled to a payment at \$17.62 per share plus statutory interest from the date the Dell transaction closed. The compensation to Clients was intended to make them whole for the voting discrepancy that resulted in the denial of their appraisal rights. On December 30, 2016, we signed a settlement agreement with our insurance carrier for insurance proceeds totaling \$100.0 million related to this matter. We received the settlement in the first quarter of 2017. Additionally, we signed settlement agreements totaling \$50 million in the first quarter of 2017. As of June 30, 2017, we have received the entire \$150 million in related proceeds.

In accordance with the compensation payment, the Clients agreed that in the event the findings made by the Court regarding the fair value of Dell or the amount of interest to be applied were modified by the Supreme Court of Delaware on appeal, T. Rowe Price and the Clients would make an appropriate adjustment between themselves, calculated in a manner that is consistent with the methodology used to compensate Clients. In December 2016, several parties, including Dell and the successful appraisal petitioners, filed appeals to the Delaware Supreme Court to challenge the Chancery Court’s valuation ruling. Our settlement agreements with our insurance carriers provide that if the fair value of Dell is reduced, we would work together to make appropriate adjustments.

## Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.
