REPORT OF INDEPENDENT ACCOUNTANTS

To the Board of Directors and Stockholders of Companhia Vale do Rio Doce

We have reviewed the accompanying unaudited condensed consolidated balance sheet of Companhia Vale do Rio Doce and subsidiaries as of June 30, 2003, and the unaudited condensed consolidated statements of income, of cash flows and of changes in stockholders' equity for the three-month periods ended June 30, 2003, March 31, 2003 and June 30, 2002 and for the six-month periods ended June 30, 2003 and 2002. This financial information is the responsibility of the Company's management. The unaudited financial information of certain affiliates, the investments in which total US\$ 260 million at June 30, 2003 and equity in earnings (losses) which total US\$ 9 million, US\$ 10 million, US\$ (23) million, US\$ 19 million and US\$ 4 million for the three-month periods ended June 30, 2003, March 31, 2003 and June 30, 2002 and for the six-month periods ended June 30, 2003 and 2002, respectively, and that of certain subsidiaries, which statements reflect total revenues of US\$ 72 million and US\$ 143 million for the three-month and six-month periods ended June 30, 2002, respectively, were reviewed by other independent accountants whose reports thereon have been furnished to us.

We conducted our reviews in accordance with standards established by the American Institute of Certified Public Accountants. A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the United States of America, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews and the reports of other accountants, we are not aware of any material modifications that should be made to the condensed consolidated interim financial statements referred to above for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet of Companhia Vale do Rio Doce and subsidiaries as of December 31, 2002, and the related consolidated statements of income, shareholders' equity, and cash flows for the year then ended (not presented herein). In our report dated February 21, 2003, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2002 is fairly stated in all material respects, in relation to the consolidated balance sheet from which it has been derived.

As discussed in Note 4 to the financial statements, the Company changed its method of accounting for asset retirement obligations, as from January 1, 2003.

2 Basis of consolidation

All majority-owned subsidiaries where we have both share and management control are consolidated, with elimination of all significant intercompany accounts and transactions. Investments in unconsolidated affiliates and joint ventures are reported at cost plus our equity in undistributed earnings or losses. Included in this category are certain joint ventures in which we have majority ownership but, by force of shareholders' agreements, do not have effective management control. We provide for losses on equity investments with negative stockholders' equity where applicable (see Note 8).

We evaluate the carrying value of our listed investments relative to publicly available quoted market prices. If the quoted market price is below book value, and such decline is considered other than temporary, we write-down our equity investments to quoted market value.

We define joint ventures as businesses in which we and a small group of other partners each participate actively in the overall entity management, based on a shareholders' agreement. We define affiliates as businesses in which we participate as a minority stockholder but with significant influence over the operating and financial policies of the investee.

3 Summary of significant accounting policies

Our condensed consolidated interim financial information as of June 30, 2003 for the three-month periods ended June 30, 2003, March 31, 2003 and June 30, 2002 and for the six month periods ended June 30, 2003 and 2002 is unaudited. However, in our opinion, such condensed consolidated financial information includes all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the results for interim periods. The results of operations for the six-month period ended June 30, 2003 are not necessarily indicative of the results to be expected for the full fiscal year ending December 31, 2003.

This condensed interim financial information should be read in conjunction with our consolidated financial statements for the year ended December 31, 2002.

The provision for losses on equity investments relates to our investments in affiliates which have reported negative stockholders equity in their financial information prepared in accordance with US GAAP and in circumstances where we have assumed commitments to fund our share of the accumulated losses, if necessary, through additional capital contributions or other means. Accordingly we (a) first reduce the value of the investment to zero and (b) subsequently provide for our portion of negative equity.

Other current assets includes \$30 related to ships held for sale, at June 30, 2003.

4 Change in accounting practice

In June 2001, the FASB issued SFAS 143 - "Accounting for Asset Retirement Obligations". We adopted SFAS 143 as from January 1, 2003, as a consequence an additional \$26 for asset retirement obligations was recorded as "Others - long-term liabilities", a net increase of \$11 in mine development costs was registered within "Property, plant and equipment" and a resulting change of \$10 was registered as "Change in Accounting Practice for Asset Retirement Obligations" on the Statement of Income, net of income tax (\$15 gross of deferred income tax). Over time the liabilities will be accreted for the change in their present value and initial capitalized costs will be depleted over the useful lives of the related assets.

5 Recently-issued accounting pronouncements

In June 2002, the FASB has issued SFAS 146 - "Accounting for Costs Associated with Exit or Disposal Activities". The standard requires companies to recognize costs associated with exit or disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. SFAS 146 is to be applied prospectively to exit or disposal activities initiated after December 31, 2002. We adopted SFAS 146 as from January 1, 2003. We have not committed to disposal of or disposed of any significant activities since adoption.

In November 2002 the FASB issued FIN 45 - "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others". The Interpretation elaborates on the existing disclosure requirements for most guarantees, including loan guarantees such as standby letters of credit. It also clarifies that at the time a company issues a guarantee, the company must recognize an initial liability for the fair value, or market value, of the obligations it assumes under that guarantee and must disclose that information in its interim and annual financial information. The initial recognition and initial measurement provisions apply on a prospective basis to guarantees issued or modified after December 31, 2002, regardless of the guarantor's fiscal year-end. The disclosure requirements in the Interpretation, applicable as from December 31, 2002 are disclosed in Note 9. We have not issued any material guarantees since December 31, 2002.

In January 2003, FASB issued Interpretation No. 46 (FIN 46) Consolidation of Variable Interest Entities. FIN 46 provides guidance on when certain entities should be consolidated or the interests in those entities should be disclosed by enterprises that do not control them through majority voting interest. This interpretation applies immediately to variable interest entities created after January 31, 2003. We do not have any entities or transactions which are subject to the requirements of FIN 46 and does not expect FIN 46 to have a material impact on our financial statements.

In April 2003, FASB issued Statement of Financial Accounting Standards No. 149, an amendment of SFAS 133 on Derivative Instruments and Hedging Activities (SFAS 149). This statement amends and clarifies financial accounting and reporting for derivative instruments, including certain derivative instruments embedded in other contracts (collectively referred to as derivatives) and for hedging activities under SFAS 133. This statement is effective for contracts entered into or modified after June 30, 2003, except as stated in the following sentence and for hedging relationships designated after June 30, 2003. The provisions of this statement that relate to Statement 133 Implementation Issues that have been effective for fiscal quarters that began prior to June 15, 2003, should continue to be applied in accordance with their respective effective dates. We are evaluating the impact of this standard.

In May 2003, FASB issued SFAS No. 150, Accounting For Certain Financial Instruments with Characteristics of both Liabilities and Equity (SFAS 150) this Statement establishes standards for how an issuer classifies and measures certain financial instruments with characteristics of both liabilities and equity. It requires that an issuer classify a financial instrument that is within its scope as a liability (or an asset in some circumstances). The Board decided to make this statement effective shortly after issuance for contracts created or modified after it is issued and for existing contracts at the beginning of the first interim period beginning after June 15, 2003. We have not created or modified any such contracts since June 15, 2003.

We have certain tax incentives relative to our iron ore and manganese operations in Carajás and relative to alumina in Barcarena. The incentives relative to iron ore and manganese comprise full income tax exemption on defined production levels up to 2005 and partial exemption up to 2013. Both incentives relative to alumina expires in 2010. An amount equal to the tax saving must be appropriated to a reserve account within stockholders' equity and may not be distributed in the form of cash dividends.

[Back to Contents](#)**9 Commitments and contingencies**

(a) At June 30, 2003, we had extended guarantees for borrowings obtained by affiliates and joint ventures in the amount of \$484, of which \$350 is denominated in United States dollars and the remaining \$134 in local currency, as follows:

<u>Affiliate or Joint Venture</u>	<u>Amount of guarantee</u>	<u>Denominated currency</u>	<u>Purpose</u>	<u>Final maturity</u>	<u>Counter guarantees</u>
ALBRAS	267	US\$	Debt guarantee	2007	None

VALESUL	1	R\$	Debt guarantee	2006	None
					Collateral
NIBRASCO	2	US\$	Debt guarantee	2004	Pledge

We expect no losses to arise as a result of the above guarantees. We have made no charges for extending these guarantees except in the case of Albras and Samarco.

(b) CVRD and its subsidiaries are defendants in numerous legal actions in the normal course of business. Based on the advice of our legal counsel, management believes that the provision made against contingent losses is sufficient to cover probable losses in connection with such actions.

The provision for contingencies and the related judicial deposits are composed as follows:

	June 30, 2003		December 31, 2002	
	Provision for contingencies	Judicial deposits	Provision for contingencies	Judicial deposits
Labor claims	156	68	109	52
Civil claims	123	43	95	32
Tax - related actions	297	349	220	153
Others	1	2	4	2
	577	462	428	239

Labor - related actions principally comprise employee claims for (i) payment of time spent travelling from their residences to the work-place, (ii) additional payments for alleged dangerous or unhealthy working conditions and (iii) various other matters, often in connection with disputes about the amount of indemnities paid upon dismissal.

Civil actions principally relate to claims made against us by contractors in connection with losses alleged to have been incurred by them as a result of various past government economic plans during which full indexation of contracts for inflation was not permitted.

Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

Tax - related actions principally comprise our challenges of changes in basis of calculation and rates of certain revenue taxes and of the tax on financial movements CPMF.

We continue to vigorously pursue our interests in all the above actions but recognize that probably we will incur some losses in the final instance, for which we have made provisions.

[Back to Contents](#)

Our judicial deposits are made as required by the courts for us to be able to enter or continue a legal action. When judgment is favorable to us, we receive the deposits back; when unfavorable, the deposits are delivered to the prevailing party. The increase of \$196 for tax deposits relates to an action in which we challenged the annual limitation on use our tax loss carryforward.

Contingencies settled in the three-month period ended June 30, 2003, and 2002 and March 31, 2003 aggregated \$32, \$28 and \$21, respectively, and additional provisions aggregated \$18, \$74 and \$30, respectively.

- (c) We are defendants in two actions seeking substantial compensatory damages brought by the Municipality of Itabira, State of Minas Gerais, which we believe are without merit. Due to the remote likelihood that any loss will arise therefrom no provision has been made in the financial information with respect to these two actions.
- (d) We are committed under a take-or-pay agreement to take annual delivery of approximately 207,060 metric tons per year of aluminum from ALBRAS at market prices. This estimate is based on 51% of ALBRAS expected production and, at a market price of \$1,366.00 per metric ton at June 30, 2003, represents an annual commitment of \$283. Actual take from Albras was \$67, \$71 and \$65 during the three-month period ended June 30, 2003 and 2002 and March 31, 2003, respectively.
- (e) We and BNDES entered into a contract, known as the Mineral Risk Contract, in March 1997, relating to prospecting authorizations for mining regions where drilling and exploration are still in their early stages. The Mineral Risk Contract provides for the joint development of certain unexplored mineral deposits in approximately two million identified hectares of land in the Carajás region, as well as proportional participation in any financial benefits earned from the development of such resources. Iron ore and manganese deposits already identified and subject to development are specifically excluded from the Mineral Risk Contract.

Pursuant to the Mineral Risk Contract, we and BNDES each agreed to provide \$205, which represents half of the \$410 in expenditures estimated as necessary to complete geological exploration and mineral resource development projects in the region over a period of five years. This period was extended for an additional two years. We oversee these projects and BNDES advances us half of our costs on a quarterly basis. Under the Mineral Risk Contract, as of June 30, 2003, both we and BNDES had remaining commitments to contribute an additional \$54 towards exploration and development activities. In the event that either of us wishes to conduct further exploration and development after having spent such \$205, the contract provides that each party may either choose to match the other party's contributions, or may choose to have its financial interest proportionally diluted. If a party's participation in the project is diluted to an amount lower than 40% of the amount invested in connection with exploration and development projects, then the Mineral Risk Contract provides that the diluted party will lose (1) all the rights and benefits provided for in the Mineral Risk Contract and (2) any amount previously contributed to the project.

Under the Mineral Risk Contract, BNDES has agreed to compensate us through a finder's fee production royalty on their share of mineral resources that are discovered and placed into production. This finder's fee is equal to 3.5% of the revenues derived from the sale of gold, silver and platinum group metals and 1.5% of the revenues derived from the sale of other minerals, including copper, except for gold and other minerals discovered at Serra Leste, for which the finder's fee is equal to 6.5% of revenues.

- (f) At the time of our privatization in 1997, we issued shareholder revenue interests known in Brazil as "debentures" to our then-existing shareholders, including the Brazilian Government. The terms of the "debentures", were set to ensure that our pre-privatization shareholders, including the Brazilian Government, would participate alongside us in potential future financial benefits that we are able to derive from exploiting our mineral resources.
- (g) At June 30, 2003 we have provided \$54 for environmental liabilities and asset retirement obligations.

[Back to Contents](#)

We use various judgments and assumptions when measuring our environmental liabilities and asset retirement obligations. Changes in circumstances, law or technology may affect our estimates and we periodically review the amounts accrued and adjust them as necessary. Our accruals do not reflect unasserted claims because we are currently not aware of any such issues. Also the amounts provided are not reduced by any potential recoveries under cost sharing, insurance or indemnification arrangements because such recoveries are considered uncertain.

10 Segment and geographical information

In 1999 we adopted SFAS 131 Disclosures about Segments of an Enterprise and Related Information with respect to the information we present about our operating segments. SFAS 131 introduced a management approach concept for reporting segment information, whereby financial information is required to be reported on the basis that the top decision-maker uses such information internally for evaluating segment performance and deciding how to allocate resources to segments. Our business segments are currently organized as follows:

Ferrous products comprises iron ore mining and pellet production, as well as the Northern and Southern transportation systems, including railroads, ports and terminals, as they pertain to mining operations. Manganese mining and ferroalloys are also included in this segment.

Non-ferrous products comprises the production of gold and other non-ferrous minerals.

Logistics comprises our transportation systems as they pertain to operation of our ships, ports and railroads for third-party cargos.

Holdings divided into the following sub-groups:

Aluminum - comprises aluminum trading activities, alumina refining and investments joint ventures and affiliates engaged in bauxite mining and aluminum metal smelting.

Steel - comprises our investments in joint ventures and affiliates operating in the steel industry.

Others - comprises our investments in joint ventures and affiliates engaged in other businesses.

Information presented to top management with respect to the performance of each segment is generally derived directly from the accounting records maintained in accordance with Brazilian corporate law together with certain minor inter-segment allocations.

11 Derivative financial instruments

Volatility of interest rates, exchange rates and commodity prices are the main market risks to which we are exposed - all three are managed through derivative operations. These have the exclusive aim of reducing exposure to risk. We do not use derivatives for speculation purposes.

We monitor and evaluate our derivative positions on a regular basis and adjust our strategy in response to market conditions. We also periodically review the credit limits and credit worthiness of our counter-parties in these transactions. In view of the policies and practices established for operations with derivatives, management considers the occurrence of non-measurable risk situations as unlikely.

(a) Interest Rate and Exchange Rate Risk

Interest rate risks mainly relate to that part of the foreign debt borrowed at floating rates. The foreign currency debt is largely subject to fluctuations in the London Interbank Offered Rate - LIBOR. That portion of local currency denominated debt that is subject to floating rates is linked to the Long Term Interest Rate - TJLP, fixed quarterly by the Brazilian Central Bank. Since May 1998, we have used derivative instruments to protect ourselves against fluctuations in the LIBOR rate.

There is an exchange rate risk associated with our foreign currency denominated debt. On the other hand, 89% of our revenues are denominated in, or automatically indexed to, the U.S. dollar, while 49% of our costs are expressed in reais. This provides a natural hedge against any devaluation of the Brazilian real against the U.S. dollar. When events of this nature occur, the immediate negative impact on foreign currency denominated debt is offset over time by the positive effect of devaluation on future cash flows.

With the advent of a floating exchange rate regime in Brazil in January 1999, we adopted a strategy of monitoring market fluctuations, using derivatives to protect against specific risks from exchange rate variation.

From time to time we enter into foreign exchange derivative swap transactions seeking to change the characteristics of our real-denominated cash investments to US dollar-indexed instruments. The extent of such transactions depends on our perception of market and currency risk, but is never speculative in nature. All such operations are marked-to-market at each balance sheet date and the effect included in financial income or expense. During the three-month periods ended June 30, 2003, March 31, 2003 and June 30, 2002 and for the six-month periods ended June 30, 2003 and 2002 our use of such instruments was not significant.

(b) Commodity Price Risk

We also use derivative instruments to manage exposure to changing gold prices and to ensure an average minimum profit level for future and alumina production. However, they may also have the effect of eliminating potential gains on certain price increases in the spot market. We manage our contract positions actively, and the results are reviewed at least monthly, allowing adjustments to targets and strategy to be made in response to changing market conditions.

In the case of gold and alumina derivatives, our policy has been to settle all contracts through cash payments or receipts, without physical delivery of product.

Supplemental Financial Information

The following information provides additional details in relation to the balance sheet and financial performance of equity investees as well as certain financial ratios.

EBITDA represents operating income plus depreciation, amortization and depletion plus impairment/gain on sale of property, plant and equipment plus dividends received from equity investees. EBITDA is not a US GAAP measurement and does not represent cash flow for the periods presented and should not be considered as an alternative to net income (loss), as an indicator of our operating performance or as an alternative to cash flow as a source of liquidity. Our definition of EBITDA may not be comparable with EBITDA as defined by other companies. Although EBITDA, as defined above, does not provide a US GAAP measure of operating cash flows, our management uses it to measure our operating performance and it is commonly used by financial analysts in evaluating our business.

1- MANAGEMENT'S DISCUSSION AND ANALYSIS OF THE OPERATING RESULTS FOR THE FIRST SEMESTER OF 2003 COMPARED WITH THE FIRST SEMESTER OF 2002

1.1- General Aspects

(a) The Companhia Vale do Rio Doce's segments of business are mining, logistics and energy, directly or through its interests, as follows:

ferrous minerals: iron ore and pellets as well as manganese and ferroalloys;

non-ferrous minerals: gold, potash, kaolin and copper;

logistics: railroads, ports and maritime terminals and shipping;

energy: electric power generation; and

shareholdings: equity holdings in producers of aluminum, steel and fertilizers.

(b) The variations of the main currencies and indices in terms of percentages in relation to the *real*, which impacted the results of the Company and its subsidiaries, jointly controlled companies and affiliates, were as follows:

Currencies / Indices Period	%					Parity	
	U.S. DOLLAR	YEN	GOLD	IGP-M	TJLP	US\$ x R\$	US\$ x Yen
Until 06/30/03	(18.7)	(19.4)	(0.4)	5.9	5.6	2.8720	119.94
2Q/03	(14.3)	(15.6)	3.3	(0.4)	2.9	2.8720	119.94
1Q/03	(5.1)	(4.6)	(3.6)	6.3	2.6	3.3531	118.20
Until 12/31/02	52.3	68.2	25.0	25.3	9.9	3.5333	118.87
Until 06/30/02	22.6	34.3	14.7	3.5	4.8	2.8444	119.80
2Q/02	22.4	35.8	6.5	3.0	2.3	2.8444	119.80

About 61% of the Company's gross revenue for six months ended June 30, 2003 is derived from exports and part of domestic sales is denominated in U.S. dollars, as well as 37% of total costs. Consequently, fluctuations in the exchange rate between the two currencies have a significant impact on the operating cash flows.

Approximately 95% of the short-term and long-term loans of the Company at 06/30/03 are denominated in U.S. dollars. As a result, exchange rate fluctuations have a significant impact on the financial expenses (Notes 6.10 and 6.15).

(c) For the first semester of 2003, the consolidated trade balance of US\$ 1,551 million was generated:

	Consolidated (in US\$ millions)

1.2-Comments on the Parent Company Results

The net income of the Company for the six months ended June 30, 2003 was R\$ 2,438,555 (net income of R\$ 1,274,727 in the second quarter and net income of R\$ 1,163,828 in the first quarter), compared with net income of R\$ 718,388 in the six months ended June 30, 2002 (the earnings per share corresponds to R\$ 6.35 in the six months ended June 30, 2003 versus R\$ 1.87 in the six months ended June 30, 2002).

1.2.1-Gross Revenues

The 37.2% increase in gross revenue (R\$ 4,724,031 on 06/30/03 against R\$ 3,444,193 on 06/30/02) is a result of the devaluation of the *real* against the United States dollar, affecting 83% of the Company's revenue, and the higher volumes sold of iron ore, pellets, as shown in the table below. The increase in iron ore sales was due to growth in the Chinese, North American and European markets.

(a) Provisions for contingencies and judicial deposits (booked under long-term liabilities and long-term assets, respectively), considered by management and its legal counsel as sufficient to cover possible losses from any type of lawsuit, were as follows:

	Judicial deposits		Provisions for contingencies	
	06/30/03	03/31/03	06/30/03	03/31/03

The Company is party to labor, civil, tax and other suits and has been contesting these matters both administratively and in the courts. When necessary, these are backed by judicial deposits. Provisions for eventual losses are estimated and restated monetarily by management upon the advice of the legal department and outside counsel.

Tax contingencies relate principally to a suit claiming unconstitutionality of the change in the calculation basis of PIS and Cofins social contributions introduced by Law 9,718/98, and to CPMF (tax on bank transactions).

Labor-related actions principally comprise employee claims in connection with disputes about the amount of indemnities paid upon dismissal and outstanding one-third extra holiday pay.

Civil actions principally relate to claims made against the Company by contractors in connection with losses alleged to have been incurred as a result of various past government economic plans.

- (c) Upon privatization of the Company in 1997, the Brazilian government stipulated the issuance of non-convertible debentures (Debentures) to the stockholders of record, including the federal government. The maturity dates of these Debentures were established to guarantee that pre-privatization stockholders, including the federal government, would share any future benefits from mineral resources held by the Company and its subsidiary and affiliated companies that were not evaluated at the time of setting the minimum price of CVRD shares at the privatization auction.

A total of 388,559,056 Debentures were issued at a par value of R\$ 0.01 (one centavo), whose value is to be restated in accordance with the variation in the General Market Price Index (IGP-M), as set forth in the Issue Deed.

On October 4, 2002, the Comissão de Valores Mobiliários - CVM (Brazilian Securities Commission) approved the Company's registration request, filed on June 28, 2002, for public Debentures trading. As of October 28, 2002, the Debentures can be

traded on the secondary market.

6.12- Environmental and Site Reclamation and Restoration Costs

Expenditures relating to ongoing compliance with environmental regulations are charged to production costs or capitalized as incurred. The Company manages its environmental policies according to the specifications of ISO 14,001 and maintains ongoing programs to minimize the environmental impact of its mining operations as well as to reduce the costs that will be incurred upon termination of activities at each mine. On 06/30/03, the provision for environmental liabilities amounted to R\$ 47,837 (R\$ 49,901 on 03/31/03), which was accounted for in "Others" in long-term liabilities.

The special Golden Share created during the privatization in 1997 belongs to the Brazilian Government. This share gives it the right to a permanent veto of changes in the Company's name, headquarters location, nature as a mining enterprise, continuous operation of the integrated mining, transportation and loading systems and other matters determined in the Bylaws.

6.14- Treasury Stock

The Board of Directors, under the terms of subparagraph XV of Article 13 of the Bylaws and based on Article 30 of Law 6,404/76 and CVM Instructions 10 of 02/14/80 and 268 of 11/13/97, approved the acquisition by the Company of its own shares to be held in treasury for later sale or cancellation.

As of June 30, 2003, 4,715,170 common shares and 4,235 preferred shares were purchased, which are held in treasury in the amount of R\$ 131,320. The 4,715,170 common shares guarantees a loan given to our subsidiary Alunorte.

6.16- Financial Instruments - Derivatives

The Company's risk management follows policies and guidelines reviewed and approved by the Board of Directors and Executive Board. These policies and guidelines prohibit speculative trading and short selling and require diversification of transactions and counterparts. Interest Rate Risk

Interest rate risk derives from floating-rate debt, mainly from trade finance operations. The portion of floating-rate debt denominated in foreign currency is mainly subject to fluctuations in the LIBOR - London Interbank Offered Rate. The portion of floating-rate debt expressed in *reais* refers basically to the Brazilian long-term interest rate (TJLP), established by the Brazilian Central Bank. Since May 1998, CVRD has been using derivatives to limit its exposure to fluctuations in the LIBOR.

The interest rate derivatives portfolio consists mainly of options trades aiming to cap exposure to interest rate fluctuations, establishing upper and lower limits. Some operations are subject to knock-out provisions which, if triggered, eliminate the protection provided by the cap.

The table below provides information regarding the interest rate derivatives portfolio for 06/30/03 and 06/30/02.

Type	06/30/03				06/30/02		
	Notional value (in US\$ million)	Rate range	Unrealized gain (loss) (in R\$ thousand)	Final maturity	Notional value (in US\$ million)	Rate range	Unrealized gain (loss) (in R\$ thousand)

Total			(187,216)				(79,279)

Exchange Rate Risk

Exchange rate risk arises from foreign currency debts. On the other hand, a substantial part of the Company's revenues are denominated or indexed in U.S. dollars, while the majority of costs are in *reais*. This provides a natural hedge against possible devaluation of Brazilian currency. Events of this nature have an immediate negative impact on foreign currency debt, offset by the positive effect on future cash flows.

The Company adopts a strategy of monitoring market fluctuations and, if necessary, carrying out derivatives operations to cover risks related to these variations.

The portion of debt denominated in euros and Japanese yen (main components of basket of currencies) is protected by derivatives to cover risks of exchange rate movements of these currencies.

The table below shows the exchange rate derivatives portfolio for 06/30/03 and 06/30/02. These operations are forwards and range forwards which were structured to ensure the purchase price of the following currencies:

Commodities Price Risk

The prices of iron ore, the Company's main product, are set in annual negotiations between producers and consumers and are notably stable over time. The Company does not enter into derivatives operations to hedge iron ore price exposure.

The Company uses hedge instruments to manage its exposure to changes in the price of gold. These derivatives operations allow establishment of a minimum profit level for future output. The Company actively manages its open positions, with the results reported monthly to senior management to allow adjustment of targets and strategies in response to market conditions.

9- REPORT OF THE INDEPENDENT ACCOUNTANTS

(A free translation of the original opinion in Portuguese expressed on quarterly information prepared in accordance with the accounting principles prescribed by Brazilian Corporate Law)

August 07, 2003

To the Board of Directors and Stockholders
Companhia Vale do Rio Doce

- 1 We have carried out limited reviews of the Quarterly Financial Information - ITR of Companhia Vale do Rio Doce for the quarters and periods ended June 30 and March 31, 2003 and June 30, 2002. This financial information is the responsibility of the Company's management.
- 2 Except as mentioned in paragraph three, our limited reviews were carried out in accordance with the specific procedures established by the Institute of Independent Auditors of Brazil (IBRACON), in conjunction with the Federal Accounting Board, and consisted mainly of: (a) inquires and discussion with the officers responsible for the Company's accounting, financial and operational areas about the procedures adopted for preparing the Quarterly Financial Information - ITR, and (b) review of the information and subsequent events which have, or may have, relevant effects on the Company's financial position and operations.
- 3 The financial statements at June 30, 2003 and 2002, of some subsidiary, jointly-owned and associated companies, in which there are relevant investments, have not been reviewed by independent accountants. Accordingly, the conclusions resulting from our reviews do not cover the amounts of R\$ 6,363,719 thousand (March 31, 2003 - R\$ 8,156,541 thousand and June 30, 2002 - R\$ 6,909,059 thousand) of these investments and R\$ 459,265 thousand (March 31, 2003 - R\$ 418,620 thousand and June 30, 2002 - R\$ 909,701 thousand) of the income produced by them for the quarters then ended.
- 4 Based on our limited reviews, except for the effects of any adjustments which might have been required if the financial statements of the subsidiary, jointly-owned and associated companies mentioned in paragraph 3 had been reviewed by independent accountants, we are not aware of any relevant adjustments which should be made to the Quarterly Financial Information - ITR, referred to in paragraph 1, for it to be in accordance with the rules issued by the Brazilian Securities Commission - CVM specifically applicable to the preparation of obligatory Quarterly Financial Information - ITR.
- 5 Our limited reviews were conducted for the purpose of issuing our report on the quarterly financial information referred to in paragraph one, taken as a whole. The statement of cash flow is presented as additional information, and is not a required part of the quarterly report. Such information has been subjected to the auditing procedures described in paragraph two and we are not aware of any material adjustments that should be made to this statement for it to be adequately presented in relation to the quarterly financial information.
