MESSAGE FROM THE MANAGEMENTS

We are pleased to present the outline of operation and financial results for Makita s 96th interim period, ended September 30, 2007.

n Consolidated Net Sales Reached a Record High for Three Consecutive Terms as Interim Period.

Consolidated business results for the interim period were as follows. Net Sales rose 28.5% over the previous years midterm period to 169,537 million yen, making the interim period the third consecutive period in which record-high sales were achieved, and the seventh consecutive midterm that showed year-on-year growth.

Sales by region showed the following results.

In Japan, in addition to firm growth of sales in lithium-ion battery products Makita leads our competitors in bringing out as a series, as a consequence of Fuji Robin (now named Makita Numazu Corporation) becoming a fully owned subsidiary in mid-May, an increase of 11.9% over the same period a year earlier was achieved and sales amount was 25,649 million yen.

At the same time, overseas net sales during the period rose 32.1% over the same period the previous year to 143,888 million yen, due to favorable performance in a number of areas, including the launch of high value-added products in response to user needs, such as lithium-ion battery products and hammer drills that incorporate Makita s proprietary Anti Vibration Technology.

Other contributing factors to the record-high performance during the period were growth in demand in Europe, an increase in business with large-scale retailers in the United States, a rise in sales accompanying growth in the emerging markets of Eastern Europe and Russia as well as Latin America, and advantageous foreign exchange rates influenced by a weaker yen.

A look at overseas net sales by region shows that all markets recorded solid year-on-year growth. In the European market, net sales rose 39.4% to 78,865 million yen, while in the North American market net sales rose 18.1% to 28,942 million yen.

In the Asian market net sales recorded an increase of 12.7%, finishing at 11,021 million yen, and the other markets (the Middle East, Africa, Oceania and Latin America) also recorded year-on-year growth of 38.3%, with net sales of 25,060 million yen.

Regarding profits, an increase in the share of our output originating in China and the weak yen contributed to an improved cost of sales ratio, and operating income were higher than in the midterm period a year earlier by 58.5%, at 33,899 million yen (operating profit ratio, 20%).

Further, before tax adjustments, net midterm profits were up 58.1% to 34,468 million yen (net profit ratio at midterm before tax adjustments, 20.3%), and net profits for the midterm period rose 53.3% year-on-year to 23,596 million yen (midterm net profit ratio, 13.9%).

n Globalization of Business and Strengthening the Gardening Tool Area

During the current interim period, we were able to achieve steady progress in the globalization of our business, with our overseas production ratio rising to 76% (on a product unit basis), and the overseas sales ratio climbing to 85% during this period.

In the area of production, in addition to expanding production capacity at our China plants and gradually increasing the scale of production in our Romania plant, which commenced production in April, we also began construction of a second plant in Brazil to boost our product supply capacity in the Latin America market, where demand continues to grow.

1

In the area of sales, we established a sales base in Vladivostok in Russia s far east where the market is growing, and we made further efforts to strengthen our sales and after-sales service networks in Peru, South America.

In efforts to expand our business to pave the way for future growth, we also made Fuji Robin Industries Ltd. a wholly owned subsidiary to strengthen our foothold in the area of gardening tools, including engine-powered tools.

We believe that boosting the product development capabilities of this company (which possesses its own engine technology in areas such as the mini 4-cycle engine that complies with US gas emissions regulations, which are the world s strictest), and effectively utilizing our own global sales and after-service network will contribute to increasing our corporate value over the long term.

n Issue to be addressed

In terms of the future outlook, a more severe market environment in the United States is expected amid concerns of a slowing in the economy and a decline in the number of new housing starts as the housing market continues to undergo adjustment.

On the other hand, it is necessary for Makita to waste no time in pushing ahead with the globalization of production, to accommodate the growing demand in emerging markets such as Eastern Europe and Russia, the Middle East, Africa, and Latin America, where demand at present is robust.

As part of our efforts to respond to these growing markets, we are expanding plant facilities in China and Romania as well as constructing a second plant in Brazil.

In view of these factors, the Makita group aims to become a strong company by establishing brand power that no other company will be able to match. We will achieve this goal by further strengthening our global production network, which combines new product development expertise and a level of quality that commands a high level of satisfaction among professional users, with cost competitiveness, and by further enhancing our sales and after-care services, which are second to none in Japan or overseas.

In essence, we aim to acquire and maintain top market share as a comprehensive international supplier of tools in every region of the world, in both professional power tools and the gardening and pneumatic tool sectors.

n The Interim Dividends of 30 Yen Per Share

Makita s basic policy on the distribution of profits is to maintain a dividend payout ratio of at least 30%, with a lower limit on annual cash dividends of 18 yen per share.

For the interim period under review, Makita declared to pay a dividend of 30 yen per share, augmented 5 yen to the dividend per share as announced in April 2007.

Based on its dividend policy, Makita s Board of Directors will decide on proposals for the dividend for the end of the fiscal year at their meeting to approve the financial statements after they are finalized near the end of April 2008. Their proposals will be presented for discussion and final approval at the Ordinary General Meeting of Shareholders.

We look forward to the continuing support and cooperation of our shareholders.

November 2007

Masahiko Goto President and Representative Director

sic policy regarding profit distribution	

Basic policy regarding profit distribution

Makita s basic policy on the distribution of profits is to maintain a dividend payout ratio of 30% or greater, with a lower limit on annual cash dividends of 18 yen per share. However, in the event special circumstances arise, computation of the amount of dividends will be based on consolidated net income after certain adjustments. With respect to repurchases of its outstanding shares, Makita aims to implement a flexible capital policy, augment the efficiency of its capital employment, and thereby boost shareholder profit. Also Makita continues to consider execution of own share repurchases in light of trends in stock prices.
