SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, and Section 21E of the Securities Exchange Act of 1934. These statements relate to future events or our future financial performance. We have attempted to identify forward-looking statements by terminology including “anticipates”, “believes”, “expects”, “can”, “continue”, “could”, “estimates”, “expects”, “intends”, “may”, “plans”, “predict”, “should” or “will” or the negative of these terms or other comparable terminology. These statements are only predictions. Uncertainties and other factors, including the risks outlined under Risk Factors contained in Item 1A of this Form 10-K, may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels or activity, performance or achievements expressed or implied by these forward-looking statements.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Our expectations are as of the date this Form 10-K is filed, and we do not intend to update any of the forward-looking statements after the filing date to conform these statements to actual results, unless required by law.

We file annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and proxy and information statements and amendments to reports filed or furnished pursuant to Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended. You may read and copy these materials at the SEC’s Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. You may obtain information on the operation of the public reference room by calling the SEC at 1-800-SEC-0330. The SEC also maintains a website (<http://www.sec.gov>) that contains reports, proxy and information statements and other information regarding us and other companies that file materials with the SEC electronically. You may also obtain copies of reports filed with the SEC, free of charge, via a link included on our website at www.chinanet-online.com.

PART I

ITEM 1 BUSINESS

We are a holding company that conducts our primary businesses through our PRC subsidiaries and operating entities (the “VIEs”). We are one of China’s leading business-to-businesses (“B2B”), fully integrated Internet technology company providing online-to-offline (O2O) sales channel expansion, precision marketing and the related data services for small and medium-sized enterprises (SMEs) and entrepreneurial management and networking services for entrepreneurs in the People’s Republic of China. Our services were founded on proprietary internet, advertising, cloud and Big Data technologies that include (i) preparing and publishing rich media enabled advertising and marketing campaigns for clients on the Internet, mobile phone, television and other valued added communication channels, (ii) hosting mini-sites with online messaging and consulting functionalities, (iii) generating effective sales leads, (iv) providing search engine marketing services; (v) providing data services and (vi) providing social networking and information sharing services to entrepreneurs to help SMEs manage the expansion of their sales networks. Our goal is to strengthen our position as the leading diversified one-stop O2O sales channel expansion, precision marketing and the related data services provider to SMEs and entrepreneurial management and networking services provider for entrepreneurs in China. We expect to grow from a business opportunities platform to a comprehensive one on one digital advertising, precision marketing and the related data services provider with a total solution for the business to business to customer (“B2b2c”) ecosystem, helping businesses expand sales and customers through mobile and Internet.

We primarily operate a one-stop services for our clients on our integrated service platforms, primarily including multi-channel advertising and promotion platform and social networking and services distribution platform. Our multi-channel advertising and promotion platform primarily consists of internet advertising and marketing portals and our TV production and advertising unit. We provide varieties of marketing campaigns through this platform by the combination of the Internet, mobile and TV, we also generate effective sales leads and provide search engine marketing services through this platform to maximize market exposure and effectiveness for our clients. Our social networking and services distribution platform is an information and service portal for entrepreneurs or any individual who plans to start their own business. It is built to serve the community of entrepreneurs to assist them with developing their business, as well as sharing their resources. We also use this platform to develop the distribution channels for our online to offline (O2O) sales channel expansion services in different cities in the PRC. During the past two years, we developed our SMEs intelligent operation and marketing data service applications, which consists of several online cloud technology based sales, client membership management and other administrative operational management tools specifically designed for small business in China to match their simplicity. We intend to use these applications to create community-based consumption ecosystem, deploy our Big Data technologies and analyze offline businesses’ operational data and customers’ consumption data to help the SMEs improve the conversion rate of the purchase from their clients and provide them with related data services.

We derive our revenue principally by:

1 selling internet advertising space on our web portals and providing related value-added technical services to our clients through the internet advertising management systems and platforms developed and managed by us;

1 selling effective sales lead information;

1 providing search engine marketing services to increase the sales lead conversion rate for our clients' business promotion on both mobile and PC searches; and

1 selling advertising time slots on our television shows.

For the year ended December 31, 2015, in order to concentrate all resources on our core business, which is internet advertising and online to offline (O2O) sales channel expansion, precision marketing and the related data services, we decided to exit our bank kiosk advertising and brand management and sales channel building services. We have also committed to a plan to sell our internet advertising and marketing business operated under www.liansuo.com ("liansuo.com"), which is primarily aimed to serve larger SMEs through membership fees, in exchange for cash, to continue the expansion of our service distribution channels and to support the development of our data services. As a result, the assets and liabilities of liansuo.com, the disposal group were classified as held for sale as of December 31, 2015, and loss incurred from our brand management and sales channel building services business segment was reported as a loss from discontinued operations as a separate component in our statements of operations and comprehensive loss for the years ended December 31, 2015 and 2014, respectively. We did not consider the classification of assets and liabilities of liansuo.com as held for sale and the exiting of bank kiosk advertising business qualifying for presentation as discontinued operations, as they were not a strategic shift that have (or will have) a major effect on our operations and financial results.

Excluding revenues generated and net loss incurred from discontinued operations, we generated total revenues of US\$32.3 million for the year ended December 31, 2015, compared to US\$38.0 million in 2014, and incurred a net loss from continued operations (before allocation to the noncontrolling interest shareholders) of US\$7.7 million, compared to a net loss from continued operations (before allocation to the noncontrolling interest shareholders) of US\$12.4 million in 2014. Excluding the approximately US\$1.8 million and US\$4.7 million of share-based compensation expenses recognized in relation to the restricted common stock and common stock purchase options granted to our management, employees and directors in September 2015 and December 2014, our adjusted net loss from continued operations (before allocation to the noncontrolling interest shareholders) was US\$5.9 million and US\$7.7 million, respectively, for the years ended December 31, 2015 and 2014. Loss from discontinued operations (i.e. brand management and sale channel building channel business segment) was approximately US\$1.47 million for the years ended December 31, 2015 and 2014.

Our Corporate History, Subsidiaries, Variable Interest Entities (VIEs) and Equity Investment Affiliates

As of December 31, 2015, our corporate structure is set forth below:

We were incorporated in the State of Texas in April 2006 and re-domiciled to become a Nevada corporation in October 2006. From the date of our incorporation until June 26, 2009, when we consummated the Share Exchange (as defined below), our business development activities were primarily concentrated in web server access and company branding in hosting web based e-games.

Our wholly owned subsidiary, China Net Online Media Group Limited, was incorporated in the British Virgin Islands on August 13, 2007 (“China Net BVI”). On April 11, 2008, China Net BVI became the parent holding company of a group of companies comprised of CNET Online Technology Limited, a Hong Kong company (“China Net HK”), which established, and is the parent company of, Rise King Century Technology Development (Beijing) Co., Ltd., a wholly foreign-owned enterprise (“WFOE”) established in the People's Republic of China (“Rise King WFOE”). We refer to the transactions that resulted in China Net BVI becoming an indirect parent company of Rise King WFOE as the “Offshore Restructuring.”

Restructuring

In October 2008, a restructuring plan was developed (the “Restructuring”). The Restructuring was accomplished in two steps. The first step was for Rise King WFOE to acquire control over Business Opportunity Online (Beijing) Network Technology Co., Ltd. (“Business Opportunity Online”) and Beijing CNET Online Advertising Co., Ltd. (“Beijing CNET

Online”) (collectively the “PRC Operating Entities” or the “VIEs”) by entering into a series of contracts (the “Contractual Agreements” or the “VIE Agreements”), which enabled Rise King WFOE to operate the business and manage the affairs of the PRC Operating Entities. Both of the PRC Operating Entities at that time were, and currently are, owned by Messrs. Handong Cheng, Xuanfu Liu and Ms. Li Sun (the “PRC Shareholders” or the “Control Group”). Mr. Cheng is now our Chief Executive Officer. After the PRC Restructuring was consummated, the second step was for China Net BVI to enter into and complete a transaction with a U.S. public reporting company, whereby that company would acquire China Net BVI, China Net HK and Rise King WFOE, and control the PRC Operating Entities (the “China Net BVI Companies”). Business Opportunity Online and Beijing CNET Online were incorporated on December 8, 2004 and January 27, 2003, respectively.

Legal Structure of the PRC Restructuring

The PRC Restructuring was consummated in a manner so as not to violate PRC laws relating to restrictions on foreign ownership of businesses in certain industries in the PRC and the PRC M&A regulations.

The Foreign Investment Industrial Guidance Catalogue jointly issued by the Ministry of Commerce (“MOFCOM”) and the National Development and Reform Commission in 2007, which latest amendment became effective on April 10, 2015, classified various industries/business into three different categories: (i) encouraged for foreign investment, (ii) restricted to foreign investment and (iii) prohibited from foreign investment. For any industry/business not covered by any of these three categories, they will be deemed to be industries/business permitted to have foreign investment. Except for those expressly provided restrictions, encouraged and permitted industries/businesses are usually open to foreign investment and ownership. With regard to those industries/businesses restricted to or prohibited from foreign investment, there is always a limitation on foreign investment and ownership.

The business of the PRC Operating Entities falls under the class of a business that provides Internet content or information services, a type of value added telecommunication services, for which restrictions upon foreign ownership apply. The latest Foreign Investment Industrial Guidance Catalogue, which became effective in April 2015, retains the restrictions on foreign ownership related to value added telecommunication services. As a result, Rise King WFOE is not allowed to do the business the PRC Operating Entities companies are currently pursuing. Advertising business is open to foreign investment but one of the requirements is that the foreign investors of a WFOE shall have been carrying out advertising business for over three years pursuant to the Foreign Investment Advertising Measures as amended by MOFCOM and the State Administration of Industry and Commerce (“SAIC”) on August 22, 2008. Rise King WFOE is not allowed to engage in the advertising business because its shareholder, China Net HK, does not meet such requirements. In order to control the business and operations of the PRC Operating Entities, and consolidate the financial results of the two companies in a manner that does not violate current PRC laws, Rise King WFOE executed the Contractual Agreements with the PRC Shareholders and each of the PRC Operating Entities. The Contractual Agreements allow us, through Rise King WFOE, to, among other things, secure significant rights to influence the two companies’ business operations, policies and management, approve all matters requiring shareholder approval, and receive 100% of the income earned by the PRC Operating Entities. In return, Rise King WFOE provides consulting services to the PRC Operating Entities. In addition, to ensure that the PRC Operating Entities and the PRC Shareholders perform their obligations under the Contractual Arrangements, the PRC Shareholders have pledged all of their equity interests in the PRC Operating Entities to Rise King WFOE. They have also entered into an option agreement with Rise King WFOE which provides that at such time as when the current restrictions under PRC law on foreign ownership of Chinese companies engaging in the Internet content or information services in China are lifted, Rise King WFOE may exercise its option to purchase the equity interests in the PRC Operating Entities, directly.

Each of the PRC Shareholders entered into a share transfer agreement (the “Share Transfer Agreement”) with Mr. Yang Li, the sole shareholder of Rise King Investment Limited, a British Virgin Islands company (“Rise King BVI”), which was a 55% shareholder of China Net BVI at that time. In entering into the Share Transfer Agreement, Ms. Li Sun was acting as the nominee of Mr. Zhige Zhang, our chief financial officer. Mr. Zhang did not report his indirect ownership of ChinaNet BVI’s common stock by virtue of Ms. Li acting as his nominee on his original Form 3 filed with the SEC.

The PRC Shareholders were granted the incentive options for the contributions that they made and continue to make to Rise King BVI. Under the Share Transfer Agreements Mr. Li granted each of the PRC Shareholders an option to acquire, in the aggregate 10,000 shares of Rise King BVI, representing 100% of the issued and outstanding shares of Rise King BVI, provided that certain financial performance thresholds were met by the China Net BVI Companies. The Share Transfer Agreement was formalized and entered into on April 28, 2009. There is no prohibition under PRC laws for the PRC Shareholders to earn an interest in Rise King BVI after the PRC Restructuring is consummated in compliance with PRC law.

On March 30, 2011, Ms. Li Sun transferred the Option Shares held by her to Mr. Zhang. On March 30, 2011, pursuant to the terms of the Share Transfer Agreement, each of Mr. Cheng, Mr. Liu and Mr. Zhang exercised their rights to acquire the Option Shares. Due to the fact that the China Net BVI Companies had achieved the performance targets set forth in the Share Transfer Agreement, each of Mr. Cheng, Mr. Liu and Mr. Zhang paid an exercise price of \$1.00 per share to Mr. Yang Li. As a result of this exercise, Mr. Cheng, Mr. Liu and Mr. Zhang became the shareholders of Rise King BVI. As of April 12, 2016, through Rise King BVI, Mr. Cheng, Mr. Liu and Mr. Zhang collectively hold 25% of the issued and outstanding shares of our common stock.

Summary of the material terms of the VIE Agreements:

Exclusive Business Cooperation Agreements:

Pursuant to the Exclusive Business Cooperation Agreements entered into by and between Rise King WFOE and each of the PRC Operating Entities, Rise King WFOE has the exclusive right provide to the PRC Operating Entities complete technical support, business support and related consulting services during the term of these agreements, which includes but is not limited to technical services, business consultations, equipment or property leasing, marketing consultancy, system integration, product research and development, and system maintenance. In exchange for such services, each PRC Operating Entity has agreed to pay a service fee to Rise King WFOE equal to 100% of the net income of each PRC Operating Entity. Adjustments may be made upon approval by Rise King WFOE based on services rendered by Rise King WFOE and operational needs of the PRC Operating Entities. The payment shall be made on a monthly basis, if at year end, after an audit of the financial statements of any PRC Operating Entities, there is determined to be any shortfall in the payment of 100% of the annual net income, such PRC Operating Entity shall pay such shortfall to Rise King WFOE. Each agreement has a ten-year term. The term of these agreements may be extended if confirmed in writing by Rise King WFOE, prior to the expiration of the term. The extended term shall be determined by Rise King WFOE, and the PRC Operating Entities shall accept such extended term unconditionally.

Exclusive Option Agreements:

Under the Exclusive Option Agreements entered into by and among Rise King WFOE, each of the PRC Shareholders irrevocably granted to Rise King WFOE, or its designated person, an exclusive option to purchase, to the extent permitted by PRC law, a portion or all of their respective equity interest in any PRC Operating Entities for a purchase price of RMB10, or a purchase price to be adjusted to be in compliance with applicable PRC laws and regulations. Rise King WFOE, or its designated person, has the sole discretion to decide when to exercise the option, whether in part or in full. Each of these agreements has a ten-year term, subject to renewal at the election of Rise King WFOE.

Equity Pledge Agreements:

Under the Equity Pledge Agreements entered into by and among Rise King WFOE, the PRC Operating Entities and each of the PRC Shareholders, the PRC Shareholders pledged all of their equity interests in the PRC Operating Entities to guarantee the PRC Operating Entities' performance of its obligations under the Exclusive Business Cooperation Agreements. If the PRC Operating Entities or any of the PRC Shareholders breaches its/his/her respective contractual obligations under these agreements, or upon the occurrence of one of the events regarded as an event of default under each such agreement, Rise King WFOE, as pledgee, will be entitled to certain rights, including the right to dispose of the pledged equity interests. The PRC Shareholders of the PRC Operating Entities agreed not to dispose of the pledged equity interests or take any actions that would prejudice Rise King WFOE's interest, and to

notify Rise King WFOE of any events or upon receipt of any notices which may affect Rise King WFOE's interest in the pledge. Each of the equity pledge agreements will be valid until all the payments related to the services provided by Rise King WFOE to the PRC Operating Entities due under the Exclusive Business Cooperation Agreements have been fulfilled. Therefore, the equity pledge agreements shall only be terminated when the payments related to the ten-year Exclusive Business Cooperation Agreement are paid in full and the WFOE does not intend to extend the term of the Exclusive Business Cooperation Agreement.

Irrevocable Powers of Attorney:

The PRC Shareholders have each executed an irrevocable power of attorney to appoint Rise King WFOE as their exclusive attorneys-in-fact to vote on their behalf on all PRC Operating Entities matters requiring shareholder approval. The term of each power of attorney is valid so long as such shareholder is a shareholder of the respective PRC Operating Entity.

As a result of these VIE Agreements, we through our wholly-owned subsidiary, Rise King WFOE, was granted with unconstrained decision making rights and power over key strategic and operational functions that would significantly impact the PRC Operating Entities or the VIEs' economic performance, which includes, but is not limited to, the development and execution of the overall business strategy; important and material decision making; decision making for merger and acquisition targets and execution of merger and acquisition plans; business partnership strategy development and execution; government liaison; operation management and review; and human resources recruitment and compensation and incentive strategy development and execution. Rise King WFOE also provides comprehensive services to the VIEs for their daily operations, such as operational technical support, OA technical support, accounting support, general administration support and technical support for products and services. As a result of the Exclusive Business Cooperation Agreements, the Equity Pledge Agreements and the Exclusive Option Agreements, we will bear all of the VIEs' operating costs in exchange for 100% of the net income of the VIEs. Under these agreements, we have the absolute and exclusive right to enjoy economic benefits similar to equity ownership through the VIE Agreements with our PRC Operating Entities and their shareholders.

Accounting Treatment of the Restructuring:

The Restructuring is accounted for as a transaction between entities under common control in a manner similar to pooling of interests, with no adjustment to the historical basis of the assets and liabilities of the PRC Operating Entities. The operations of the PRC Operating Entities are consolidated as if the current corporate structure had been in existence throughout the period presented in the audited financial statements. The Restructuring is accounted for in this manner because, pursuant to an Entrustment Agreement dated June 5, 2009 (the "Entrustment Agreement") between Rise King BVI and the PRC Shareholders, Rise King BVI granted to the PRC Shareholders, on a collective basis, managerial control over each of the China Net BVI Companies by delegating the PRC Shareholders its shareholder rights, including the right to vote, and its rights to designate management of China Net BVI. The Entrustment Agreement, together with the Contractual Arrangements demonstrates the ability of the PRC Shareholders to continue to control Business Opportunity Online and Beijing CNET Online, which are under our common control. On March 30, 2011, in connection with the exercise of the options pursuant to the Share Transfer Agreement, the Entrustment Agreement was terminated.

Share Exchange and Name Change

On June 26, 2009, we entered into a Share Exchange Agreement (the “Exchange Agreement”), with (i) ChinaNet BVI, (ii) ChinaNet BVI’s shareholders, who together own shares constituting 100% of the issued and outstanding ordinary shares of ChinaNet BVI (the “ChinaNet BVI Shares”), and (iii) G. Edward Hancock, the former principal stockholder of the Company. Pursuant to the terms of the Exchange Agreement, the ChinaNet BVI Shareholders transferred to the Company all of the ChinaNet BVI Shares in exchange for the issuance of 13,790,800 (the “Exchange Shares”) shares of Common Stock (the “Share Exchange”). As a result of the Share Exchange, ChinaNet BVI became a wholly owned subsidiary of our company. Prior to July 14, 2009, our company name was Emazing Interactive, Inc. On July 14, 2009, our company formed a corporation under the laws of the State of Nevada called ChinaNet Online Holdings, Inc. (the “Merger Sub”) and acquired one hundred shares of its common stock for cash. As such, Merger Sub was merged with and into our company. As a result of the merger, the separate corporate existence of the Merger Sub ceased. As a further result of the merger, our corporate name was changed to “ChinaNet Online Holdings, Inc.” We are the surviving corporation in the merger and, except for the name change provided for in the Agreement and Plan of Merger, there was no change in our directors, officers, capital structure or business.

Our VIEs, VIEs’ subsidiaries and equity/cost investment affiliates

As discussed above, through Rise King WFOE we beneficially own two VIEs: Business Opportunities Online and Beijing CNET Online.

As of December 31, 2015, Business Opportunity Online has the following directly or indirectly wholly-owned subsidiaries: Business Opportunity Online (Hubei) Network Technology Co., Ltd. (“Business Opportunity Online Hubei”), Hubei CNET Advertising Media Co., Ltd. (“Hubei CNET”), Sheng Tian Network Technology (Hubei) Co., Ltd. (“Sheng Tian Hubei”), Beijing Chuang Shi Xin Qi Advertising Media Co., Ltd. (“Beijing Chuang Shi Xin Qi”), Beijing Hong Da Shi Xing Network Technology Co., Ltd. (“Beijing Hong Da Shi Xing”), Beijing Shi Ji Cheng Yuan Advertising Media Co., Ltd. (“Beijing Shi Ji Cheng Yuan”), and Quanzhou City Zhi Lang Network Technology Co., Ltd. (“Quanzhou Zhi Lang”). Except Hubei CNET, which is primarily engaged in providing TV advertising services, and Quanzhou Zhi Lang, which was primarily engaged in offline brand management and sales channel building services, which business we had decided to exit in late 2015, the rest wholly-owned subsidiaries of Business Opportunity Online are all engaged in providing internet advertising and marketing, O2O precision marketing and related value-added technical services and data services to the SMEs. Business Opportunity Online also beneficially own 51% equity interest in Beijing Chuang Fu Tian Xia Network Technology Co., Ltd. (“Beijing Chuang Fu Tian Xia”), which we have planned to sell in the near future in exchange for cash to finance our new services and future business development.

As of December 31, 2015, Business Opportunities Online also beneficially own 23.18% and 25.5% equity interest in Shenzhen City Mingshan Network Technology Co., Ltd. (“Shenzhen Mingshan”) and Zhao Shang Ke Network Technology (Hubei) Co., Ltd. (“Zhao Shang Ke Hubei”), respectively. The business of these two equity investment affiliate are currently dormant.

As of December 31, 2015, Beijing CNET Online beneficially own 19% equity interest in Guohua Shiji (Beijing) Communication Co., Ltd. (“Guohua Shiji”), which is primarily engaged in providing internet and information technical services, 10% equity interest in Beijing Saturday Education Technology Co., Ltd. (“Beijing Saturday”), which is primarily engaged in children’s playground operation management and franchise business and 10% equity interest in Chuangshi Meiwei (Beijing) International Investment Management Co., Ltd. (“Chuangshi Meiwei”), which is primarily engaged in franchise investment consulting and management business. Beijing CNET Online also beneficially own 51% equity interest in Shanghai Borongdingsi Computer Technology Co., Ltd. (“Shanghai Borongdingsi”), primarily engaged in providing bank kiosks advertising services, which business we had decided to exit in late 2015.

During 2015, we incorporated two new wholly-owned investment holding companies, ChinaNet Investment Holding Ltd, a British Virgin Islands company (“ChinaNet Investment BVI”), and ChinaNet Online Holdings Co., Ltd., a PRC company (“ChinaNet Online PRC”). ChinaNet Investment BVI co-incorporated ChinaNet Online Holdings Korea (“ChinaNet Korea”) with three unaffiliated individuals and beneficially own 40% equity interest in ChinaNet Korea. ChinaNet Online PRC co-incorporated ChinaNet Chuang Tou (Shenzhen) Co., Ltd. (“ChinaNet Chuang Tou”) with two unaffiliated individuals and beneficially own 19% equity interest in ChinaNet Chuang Tou. As of the date hereof, there companies have not started its operations, respectively.

Industry and Market Overview

Overview of the Advertising Market in China

According to ZenithOptimedia in 2015, between 2015 and 2018, the global advertising market will expand by US\$77 billion. The United States will contribute 26% of this extra ad expenditure, closely followed by China, which will contribute 24%. China's ad market is slowing in step with its economy, however, China still remains one of the key drivers of global growth. China's ad spending grew by 9.3% to US\$50 billion in 2015, below the 10.5% annual growth it averaged over the past five years, but more than twice the rate of the world as a whole. Between 2014 and 2017, ZenithOptimedia expects the China's ad market to enjoy an average growth rate of 8.5% a year.

The growth of China's advertising market is driven by a number of factors, including the sustained economic growth and increases in disposable income and consumption in China. China was the second largest economy in the world in terms of gross domestic product ("GDP"), which amounted to US\$10.9 trillion in 2015. According to the National Bureau of Statistics of China, the annual disposable income per capita in urban households increased to RMB31,195 in 2015, adjusted by the price factors, the actual increase was 6.6%.

Overview of the Internet Advertising Industry

According to ZenithOptimedia in 2015, the internet is still the fastest growing medium, and mobile internet is by some distance the main driver of global advertising spending growth. ZenithOptimedia forecasts mobile internet to account for 51% of all new advertising dollars between 2014 and 2017 and expects mobile internet advertising to grow by an average of 38% a year between 2014 and 2017, driven by the rapid spread of devices, innovations in advertising technology and improvements in user experiences. Within China, the internet advertising market grew by 36.5% to approximately US\$34.3 billion in 2015, according to Enfodesk (January 2016). This growth is expected to stem primarily from a higher internet penetration rate of just 50.3% by the end of 2015. (The 37th China Internet Network Development Statistical Report issued by China Internet Network Information Center (the “CNNIC”), January 2016), the use of search engine, rich media and video and game embedded advertisements. According to the 37th CNNIC report, as of December 2015, the mobile internet user reached 688 million people. 90.1% of the internet users also use mobile devices to connect to the internet, an increase from 85.8% as of December 2014.

According to iResearch Consulting Group (March 2016), China online advertising revenue skyrocket to RMB209.7 billion Yuan (approximately US\$34 billion) in 2015, jumping 36.1% year over year. The growth occurred at a slower pace than it did in 2014. With more than 200 billion Yuan in revenue, the market is gradually maturing. In the future, the growth will most likely slow down. It is forecasted that the market revenue will reach 410.5 billion Yuan in 2018. The diagram below depicts the Market Scale of China Online Advertising from 2011 to 2018:

Also according to iResearch Consulting Group (May 2015), Revenues of China mobile marketing market is expected to reach RMB61.01 billion Yuan (approximately US\$9.8 billion) in 2015, up 105.5% versus 2014. Mobile advertising market significantly outgrew online advertising market. Underpinning the impressive growth is the fast penetration of mobile devices, constantly expanding user base and numerous mobile advertising platforms. Advertisers are gradually aware of the importance of mobile marketing and the display, and as interaction forms of mobile advertising keep changing, this revenue is expected to maintain its growth and surpass 220 billion Yuan (approximately US\$35 billion) in 2018. The Diagram below depicts the China Mobile Marketing from 2012 to 2018:

High Demand for the Internet Advertising from SMEs and O2O Business in China

We believe that the Internet advertising market in China also has significant potential for future growth due to high demand from the rapid development of SMEs and O2O business.

The development of the SME market is still in its early stages in China and since their sales channels and distribution networks are still underdeveloped, they are driven to search for new participants by utilizing Internet advertising and precision marketing. The SMEs tend to be smaller, less-developed brands primarily focused on restaurants, garments, building materials, home appliances, and entertainment with low start-up costs, ranging between US\$1,000 to US\$15,000. The Chinese government has promulgated a series of laws and regulations to protect and promote the development of SMEs which appeals to entrepreneurs looking to benefit from the central government's support of increased domestic demand. SMEs are now responsible for about 60% of China's industrial output and employment of approximately 80% of the urban Chinese workforce. SMEs are creating new urban jobs, and they are the main destination for new graduates entering the workforce and workers laid-off from state-owned enterprises (SOEs) that re-enter the workforce.

In recent years, the capital market, internet giants and traditional offline services business in China have all accelerated their O2O business arrangement and development. With the advent of the mobile Internet era, the innovation of user needs and applications have become the main trend of the Internet, including online payments, location-based services, online and offline interaction and more. Due to the decline of China's economy since the second half of 2011, the competitive market pressure within the local life services industry has increased. Under these circumstances, more and more traditional offline service providers started to use the internet (PC, tablet and mobile) to market and promote their products and services. The rapid development of social media and tools, such as: Wechat and Webo, also have had a very important influence on the development of the O2O market, using social media and tools to promote brands and maintain customer relationships has become an important advertising and marketing tool for all offline business.

Rapid development of Big Data Marketing

Massive amounts of data profoundly changed the way people describe objective things, but also provided people with new tools to explore the objective laws behind the data. Advertising as a marketing activity based on in-depth analysis on a target audience to locate, process and precisely release the related information, has resulted in strong sensitivity to the value of Big Data application. According to Gfk, one of the largest international market research companies, 62% of marketing service providers have begun to change their role and use the new Big Data tools for marketing, and 86% said that in future will continue to rely on Big Data for market development planning and execution.

Our Principal Products and Services

Internet Advertising and Marketing

Founded in 2003, 28.com is a leading Internet portal for information relating to small business opportunities in China, which is one of the earliest entrants in this sector. In the past two years, we further developed and upgraded the system and tools of this website portal, including customer user interface, and integrated our mobile function and cloud-based search engine marketing and optimization in preparation for mobile search marketing and mobile search optimization.

Our internet advertising and marketing services provide advertisers with tools to build sales channels directly in the form of franchisees, sales agents, distributors, and/or resellers, and have the following features which enable them to be attractive to the advertisers:

- Allowing potential entrepreneurs interested in inexpensive franchise and other business ventures to find in-depth details about these businesses in various industries and business categories, with real-time and online assistance through an instant messenger;

- Providing one-stop integrated internet marketing and advertising services for SMEs by offering customized services such as design, website and mini-site setup, and advertisement placement on various communication channels through intelligent based promotion systems;

- Generating effective sales leads information; and

- Bundling with advanced traffic generation techniques, search-engine optimization and marketing and other internet advertising management tools to assist our clients with monitoring, analyzing and managing their advertising on our

web portal.

We typically charge our clients a fixed monthly or annual membership fee for the internet advertising services and the related value-added technical services that we provide. For search engine marketing service, we charge our clients a certain percentage of service fee based on the related direct cost consumed for providing this service. A certain group of our clients also purchase effective sales lead information collected by our online advertising system. Separately, we charge a fixed fee, which varies for different business types, for each effective sales lead information delivered to clients. As of December 31, 2015, we have approximately 850 clients, who used our internet advertising and marketing services, compared to approximately 1,200 clients as of December 31, 2014. During 2015, we continued to place a persistent effort in integrating and upgrading our internet advertising and marketing services to our SME clients. As a result, starting from the second fiscal quarter of 2015, the performance of our internet advertising segment improved. Along with eliminating smaller non-profitable clients, the number of larger customers served by us continued to increase, and our client's average consumption amount for our internet advertising services also increased as compared with last year. For the year ended December 31, 2015, the gross profit margin of our internet advertising service (excluding search engine marketing service) improved to 34% from 26% for the year ended December 31, 2014. We also continued to invest in developing new services for our clients. We believe that the launch of new services in future periods will help to increase our market penetration in the SME segment, thereby increasing our recurring revenues in the future. We achieved both approximately US\$31 million of internet advertising and the related technical service net revenue for the years ended December 31, 2015 and 2014, respectively. The overall gross profit margin of this business segment improved to 24% for the year ended December 31, 2015 as compared to 18% in 2014.

Along with the rapid development of Cloud technology and Big Data technology, Big Data collection and analysis based precision marketing and online to offline (O2O) sales channel expansion has become the new trend of the industry. During the past two years, we integrated various resources and developed our SMEs intelligent operation and marketing data service applications, which consists of several online cloud technology based sales, client membership management and other administrative operational management tools specifically designed for small business in China to match their simplicity. We intend to use these applications to create a community-based consumption ecosystem, deploy our Big Data collection technologies, analyze offline businesses' operational data and customers' consumption data and provide data storage, analysis and exchange services to our SMEs clients to help them manage their business operations and sales channel and customers expansion. We are currently in test trials for these applications and expect to officially launch these services in the first half of 2016.

Television Advertising

As part of our advertising and marketing services, we produced and distributed television shows that were comprised of advertisements similar to infomercials. Our clients paid us for advertising spots, production and editorial coverage. The shows produced by our TV unit are distributed during airtime purchased from provincial satellite television stations. Our revenues generated from this segment decreased to US\$1.1 million in 2015 from US\$6.4 million in 2014. Due to the rapid development of Internet and mobile advertising and the further restriction on content, air time and duration of these infomercials imposed by the State Administration of Press, Publication, Radio, Film and Television of the PRC in recent years, the demands of our TV advertising service decreased accordingly. We will continue to monitor our clients' needs of this service and improve the financial performance of this business segment.

Bank Kiosks

We placed our kiosk machines, which include a large LCD advertising display, in bank branches to target banking patrons. We market our LCD display network to advertisers in the financial services and insurance industries. For the year ended December 31, 2015, we generated US\$0.16 million revenue from this segment, compared to US\$0.28 million revenue for the year ended December 31, 2014. It was not a significant contributor to our revenue for either the year ended December 31, 2015 and 2014. We decided to exit this business segment and to concentrate all of our resources for business development of our online advertising, precision marketing and related data services.

Brand management and sales channel building

Brand management and sales channel building services, primarily include brand "iMAP" management services (investigation, modulizaiton, application and promotion) and offline sales channel building and expansion services. We started this business in 2011 and primarily conduct this service through our operating VIE in Quanzhou City, Fujian province, the PRC. This business unit generated approximately US\$0.27 million and US\$0.93 million revenue in 2015 and 2014, respectively. Due to the overall decline of the Chinese economy in recent years, as well as the rapid

development of online advertising, which has adversely affected the performance of our traditional offline marketing services, we decided to exit this business segment and shift our resources for the further development of our Big Data collection and analysis based online to offline sales channel expansion services. The results of operations of this business segment was reported in loss from discontinued operations as a separate component in our statements of operations and comprehensive loss for the years ended December 31, 2015 and 2014, respectively.

Our Competitive Strengths

Over our thirteen-year operating history, we believe that we have built a strong track record of significant competitive strengths. We believe that these competitive strengths include:

Innovative Operations

Client-based innovation. Our advertising and marketing services are intended to be a one-stop shop for advertising and marketing solutions to our clients. These services are based on the needs of our existing clients. All of our value added services, including lead generation and capture, online messaging and consulting, search engine marketing and optimization, mini-site hosting, content management, marketing and operational management tools and related data services, simplify the business process for our clients by allowing them to effectively allocate their resources and budget for various advertising and marketing tools and channels.

Target market innovation and expansion of audience base. We believe that by offering a multichannel communication platform, we enable SMEs to reach a wide range of consumers with complementary and mutually reinforcing advertising and marketing campaigns. We are better able to attract business owners who want to reach targeted consumer groups through a number of different advertising channels in different venues and regions, and at different times of the day.

Strong Technological Advantages

Advanced campaign tracking, monitoring & data collection and analysis tools. We have deployed advanced tracking, search engine optimization, resource scheduling and content management and ad campaign management tools to achieve effective and efficient advertising effects. We have also deployed cloud technology and Big Data collection and analysis technology into our intelligent operation and marketing data service applications to provide effective and efficient precision marketing and O2O sales channel expansion services to our clients.

Valuable intellectual property. We have twenty-four copyright certificates in connection with the advertising business, most of which were developed by our research and development team.

Experienced management team. We have an experienced management team. In particular, Handong Cheng, our founder, chairman and chief executive officer has over fifteen years' experience in management. He demonstrated his entrepreneurship and business leadership by starting our business and he has successfully grown our business to become a leader in online media marketing and advertising services. George Chu, our Chief Operating Officer, has diversified and international industry experience that will help us to scale to the next level. Zhige Zhang, our Chief Financial Officer has over ten years' experience in software development and Internet ad technology. In February 2015, we appointed Mr. Ken Wu as our Chief Information Officer, who will responsible for our Information Technology (IT) strategy, services and operations. With in-depth knowledge in a number of technological fields, such as computer science, software engineering and information systems, Mr. Wu will also help our efforts to integrate the Internet into both our long-term strategy and immediate business plans.

First Mover Advantages

We have over nine years of operations as a vertically integrated ad portal and ad agency. We have thirteen years of experience as an Internet advertising agency. We commenced our Internet advertising services business in 2003 and were among the first companies in China to create a site and a business focused on Internet advertising. We rapidly established a sizeable national network, secured a significant market share and enhanced awareness of our brand. Our early entry into the market has also enabled us to accumulate a significant amount of knowledge, experience and data in this segment of the advertising industry to be able to maintain a strong market share position. We are also the first company that is providing O2O (online-to-offline) sales channel expansion services in China to small business.

Growth Strategy

Our objectives are to strengthen our position as the leading diversified one-stop O2O sales channel expansion, precision marketing and related data services provider to SMEs and entrepreneurial management and network services provider for entrepreneurs in China, and to continue to achieve sustainable and healthy growth on a consistent basis. We expect to grow from a business opportunities platform to a comprehensive one on one digital advertising, precision marketing and related data services provider, with a total solution for the business to business to customer (“B2b2c”) ecosystem, helping businesses expand sales and customers through mobile and the Internet. We intend to achieve these objectives by implementing the following strategies:

Continue expanding the size of our potential client base with online advertising and marketing solution provided by us

We have been expanding our target client group to the non-franchised SMEs in recent years with a focus on enterprises which have been in the manufacturing and exporting business. These businesses all experienced sharp decline in sales account of slow economic recovery and lower consumption demand in Europe and United States. We estimate that there are four million businesses that fall into the category of non-franchised SMEs, and we aim to assist them in expanding their business nationally in China.

Monetizing the existing customer base through the addition of cloud technology based mobile services and management tools

Due to the overall decline of Chinese economy in recent years, the competitive market pressure within the local life services industry has increased. Under these circumstances, more and more traditional offline services providers started to use the Internet to market and promote their products and services. Using social media and tools, like WeChat, to promote brands and maintain customer relationships has become an important advertising and marketing tool for all offline business. With the advent to mobile Internet era, we intend to launch integrated cloud technology based mobile services, intelligent marketing management tools and/or solutions to our existing clients in the first half of 2016. These tools include, among other things, elite point of sales (POS), inventory supply chain management, office automation (OA) and customer relationship management (CRM) and related data collection, storage and analysis solutions. These services are intended to increase our recurring revenues and enhance the loyalty and service satisfaction of our clients. Throughout the next few years, we intend to increase the depth of these types of services through partnerships and/or through mergers and acquisitions.

Building up a competitive barrier by means of technology and strategic partnerships with key internet and mobile players in China or globally

Technology and strategic partnerships will allow us to solidify our industry's leading position and broaden our client base through higher customer satisfaction and market awareness for our services. It will also enhance our ability to target discrete consumer groups. These technologies include mobile advertising with location based functionality, advertising tracking and conversion, database mining and management. Strategic partnerships include partnerships with key Internet and mobile search engines in China, key social media platforms as well as other Internet portals.

Gradually grow to comprehensive one on one digital advertising and marketing services provider with a total solution for the B2b2c ecosystem through Big Data Collecting and Analysis System

We intend to launch more value-added services to our existing and potential clients, including cloud technology based mobile services, intelligent marketing management tools and/or solutions in the first half of 2016 to enable our clients to experience multi-channel, management systems and data collection and analysis based advertising and marketing services. We expect that launching these services will increase our recurring revenues and service satisfaction from clients. Most importantly, it will enable us to build our Big Data collection and analysis system, which is intended to collect all relevant information from clients, franchisers and entrepreneurs to form effective and reliable research reports to be further utilized by our clients to physically expand their business and client base offline.

Sales and Marketing

For the year ended December 31, 2015, we derived 96% our revenues from our Internet advertising and the provision of related technical services, compared to 82% for the year ended December 31, 2014.

The following table sets forth a breakdown of our revenue from Internet advertising and related technical services, by industry, for the year ended December 31, 2015:

Industry	Percentage of total revenue	
Food and Beverage	48	%
Women Accessories	3	%
Footwear, Apparel and Garments	8	%
Home Goods and Construction Materials	7	%
Environmental Protection Equipment	7	%
Cosmetic and Health Care	7	%
Education Network	3	%
E-Commerce Platform	11	%
Others	6	%
Total	100	%

For the year ended December 31, 2015, our TV advertising revenues were primarily achieved from food and beverage, and home goods and construction materials industries.

We employ experienced advertising sales people. We provide in-house education and training to our sales people to ensure that they provide our current and prospective clients with comprehensive information about our services, the benefits of using our advertising and marketing services and relevant information regarding the advertising industry. We also market our advertising services from time to time by placing advertisements on television and other well-known portals in China, participating in domestic and international franchise exhibitions in China and other countries and acting as a sponsor to third-party programming, as well as to our own shows.

We believe our clients derive substantial value from our ability to provide advertising and marketing services targeted at specific segments of consumer markets. Market research is an important part of evaluating the effectiveness and value of our business to our clients. We conduct market research, consumer surveys, demographic analysis and other advertising industry research for internal use to evaluate new and existing advertising and marketing channels. We also purchase or commission studies containing relevant market data from reputable third-party market research firms when necessary. We typically consult such studies to assist us in evaluating the effectiveness of our network to our advertisers. A number of these studies contain research on the numbers and socio-economic and demographic profiles of the people who visit our network.

Suppliers

Our suppliers are major search engines, other internet gateways and regional television stations. Among these suppliers, for the year ended December 31, 2015, resources purchased from two of the largest search engines in China counted for approximately 38% and 45% of our internet resource cost, respectively, compared to 89% and 6% in 2014, respectively. For television, we have one regional television stations which supplied us with television airtime in 2015 and 2014.

Research and Development

We intend to continue to optimize our Standard Operating Environment (the “SOE”) technology in order to reduce costs and the time to deploy, configure, maintain, support and manage computer servers and systems. Whether we continue to further deploy newer technology will depend upon cost and network security. We also continue to develop proprietary software and systems in connection with the operation of and provision of services through our portal website and intelligent operation and marketing data service applications to enhance ease of use by both operators and clients. We focus on enhancing related software systems enabling us to track and monitor advertiser demands. With the introduction of cloud-computing based technology, we will continue to integrate this technology into our online marketing management tools services through self-development and also by entering into alliances, partnerships, and/or mergers and acquisitions. In the next few years, we intend to move our research and development efforts to mobile-based application system and data collection and analysis tools more aggressively.

Intellectual Property

As of December 31, 2015, we had twenty-four software copyright certificates issued by the State Copyright Office of the PRC (“SCO”), including, but not limited to, software systems covering monitoring and management platforms on internet advertising effects, analysis systems on internet traffic statistics and internet user behavior, analysis systems on log-based visit hotspot and browsing trails and analysis systems on search engine marketing.

With this intellectual property, we can continue to provide value-added services that are in demand by our clients and can track end users to help our clients assess and adjust their marketing strategies and enhance the effectiveness and efficiency of their advertisements placed through our multi-channel advertising and marketing service platforms on both PC and mobile devices.

We increased, and plan to continue increasing, expenditures to enhance the safety of our hardware and server which we depend on to support our network and manage and monitor programs on the network. We also increased, and plan to continue increasing, investment in research and development as we continue to expand, optimize and enhance the technologies of our portal website, upgrade our advertising and internet management software and develop our cloud-computing and mobile based operational management tools for our SMEs clients.

Competition

We compete with other internet advertising companies in China, including companies that operate Internet advertising portals, such as u88.cn, 3158.com and 78.cn. We compete for clients primarily on the basis of network size and coverage, location, price, the range of services that we offer and our brand name. We also compete for overall advertising spending with other alternative advertising media companies, such as wireless telecommunications, street furniture, billboards, frame and public transport advertising companies, and with traditional advertising media, such as newspapers, magazines and radio.

Government Regulation

The PRC government imposes extensive controls and regulations over the media industry, including on television, radio, newspapers, magazines, advertising, media content production, and the market research industry. This section summarizes the principal PRC regulations that are relevant to our lines of business.

Regulations on the Advertising Industry in China

Foreign Investments in Advertising

Under the Administrative Provision on Foreign Investment in the Advertising Industry, jointly promulgated by the SAIC and MOFCOM on March 2, 2004, or the 2004 Provision, foreign investors can invest in PRC advertising companies either through wholly owned enterprises or joint ventures with Chinese parties. Since December 10, 2005,

foreign investors have been allowed to own up to 100% equity interest in PRC advertising companies. However, the foreign investor must have at least three years of direct operations outside China in the advertising industry as its core business. This requirement is reduced to two years if foreign investment in the advertising company is in the form of a joint venture. Such requirement is also included in the newly promulgated regulation that replaced the 2004 Provision as of October 1, 2008, except that according to the new regulation, the establishment of wholly foreign-owned advertising companies must be approved by the SAIC or its authorized provincial counterparts and provincial MOFCOM, instead of the SAIC and MOFCOM only. Foreign-invested advertising companies can engage in advertising design, production, publishing and agency, provided that certain conditions are met and necessary approvals are obtained.

We have not engaged in direct operations outside China in the advertising industry as our core business. Therefore, our subsidiary in China, Rise King WFOE, is ineligible to apply for the required licenses for providing advertising services in China. Our advertising business is operated by Business Opportunity Online and Beijing CNET Online in China. We have been, and are expected to continue to be, dependent on these companies to operate our advertising business. We do not have any equity interest in our PRC Operating Entities, but Rise King WFOE, receives the economic benefits of the same through the Contractual Arrangements.

We have been advised by our PRC counsel, that each of the Contractual Agreements complies, and immediately after the completion of the transactions contemplated herein, with all existing applicable PRC laws and regulations and does not violate, breach, contravene or otherwise conflict with any existing applicable PRC laws, rules or regulations.

However, there exist substantial uncertainties regarding the application, interpretation and enforcement of current and future PRC laws and regulations and their potential effect on corporate structure and contractual arrangements. The MOFCOM published a discussion draft of the proposed Foreign Investment Law (the "Draft") in January 2015 aiming to, upon its enactment, replace the trio of existing laws regulating foreign investment in China. The Draft embodies an expected PRC regulatory trend to rationalize its foreign investment regulatory regime in line with prevailing international practice and the legislative efforts to unify the corporate legal requirements for both foreign and domestic investments. The Draft, if enacted as proposed, may materially impact the viability of our current corporate structure, corporate governance and business operations. The Draft expands the definition of foreign investment and introduces the principle of "actual control" in determining whether a company is considered a Foreign Investment Enterprise ("FIE"). Under the Draft, VIEs that are controlled via contractual arrangement would be deemed as FIEs, if they are ultimately "controlled" by foreign investors. Therefore, for any companies with a VIE structure in an industry category that falls under restricted to foreign investment or prohibited from foreign investment, the VIE structure may be deemed legitimate only if the ultimate controlling person(s) is/are of PRC nationality (either PRC companies or PRC citizens). Conversely, if the actual controlling person(s) is/are of foreign nationalities, then the VIEs will be treated as FIEs and any operation in the industry category falls under restricted to foreign investment or prohibited from foreign investment, without market entry clearance may be considered as illegal. Moreover, for the enterprises which are not incorporated under the laws of China (foreign investors) but are "controlled" by Chinese investors, they may submit documentary evidence to apply for identifying their investment as the investment by Chinese investors when they applying for the market entry clearance to engage in any investment as set out in industries restricted to foreign investment or prohibited from foreign investment in China. The competent authorities of foreign investment will grant the review opinion on whether the said investment is identified as the investment by Chinese investors. In conclusion, if the Draft enacted as proposed, it is possible that the conduct of certain of our operations and businesses through the VIEs could be found by PRC authorities to be in violation of PRC laws and regulations prohibiting or restricting foreign ownership of companies that engage in such operations and businesses.

The MOFCOM is currently soliciting comments on the Draft and substantial uncertainties exist with respect to its enactment timetable, interpretation and implementation, in accordance with relevant legislative requirements in the PRC, the next step is for MOFCOM to gather comments, revise the Draft EIT Law and prepare the Draft EIT Law for examination. MOFCOM will then prepare a bill, which will be deliberated and revised by the National Peoples' Congress, and finally put forward for a vote. If the bill is passed, it will become law. Therefore, we do not anticipate the above discussed proposed provisions in this Draft will have an immediate impact on our current VIE arrangements in the next two to three years. However, we cannot assure you the progress of the promulgation and implementation of the Draft will be consistent with our expectations. We are currently evaluating the potential impacts of this Draft to our business and our company and looking at all of the options available with respect to eliminate the adverse impacts could be resulted from the proposed new law.

Business License for Advertising Companies

On October 27, 1994, the Tenth Session of the Standing Committee of the Eighth National People's Congress adopted the Advertising Law which became effective on February 1, 1995, which was subsequently amended on April 24, 2015 by the Fourteenth Session of the Standing Committee of the Twelfth National People's Congress, which adopted the Revised Advertising Law. The Revised Advertising Law became effective on September 1, 2015. According to the Revised Advertising Law and its various implementing rules, companies engaging in advertising activities must obtain

from the SAIC or its local branches a business license which specifically includes within its scope the operation of an advertising business. Companies conducting advertising activities without such a license may be subject to penalties, including fines, confiscation of advertising income and orders to cease advertising operations. The business license of an advertising company is valid for the duration of its existence, unless the license is suspended or revoked due to a violation of any relevant law or regulation. We have obtained such a business license from the local branches of the SAIC as required by existing PRC regulations. We do not expect to encounter any difficulties in maintaining the business license. However, if we seriously violate the relevant advertising laws and regulations, the SAIC or its local branches may revoke our business licenses.

Outdoors

The Revised Advertising Law in China stipulates that the exhibition and display of outdoor advertisements must comply with certain requirements. It provides that the exhibition and display of outdoors advertisements must not:

- utilize traffic safety facilities and traffic signs;
- impede the use of public facilities, traffic safety facilities, traffic signs, firefighting facilities, firefighting safety signs;
- obstruct commercial and public activities or create an unpleasant sight in urban areas;
- be placed in restrictive areas near government offices, cultural landmarks or historical or scenic sites; or
- be placed in areas prohibited by the local governments above the county level from having outdoor advertisements.

In addition to the Advertising Law, the SAIC promulgated the Outdoor Advertising Registration Administrative Regulations on December 8, 1995, as amended on December 3, 1998 and May 22, 2006, which also governs the outdoor advertising industry in China. Under these regulations, outdoor advertisements in China must be registered with the local SAIC before dissemination. The advertising distributors are required to submit a registration application form and other supporting documents for registration. After review and examination, if an application complies with the requirements, the local SAIC will issue an Outdoor Advertising Registration Certificate for such advertisement. The content, quantity, format, specifications, periods, distributors' name, and locations of dissemination of the outdoor advertisement must be submitted for registration with the local SAIC. A change of registration with local SAICs must be effected in the event of a change in the distributor, the location of dissemination, the periods, the content, the format, or the specifications of the advertisements. It is unclear whether the SAIC, or any of its local branches in the municipalities and provinces covered by our network, will deem our business as an outdoor advertising business, and thus require us to obtain the Outdoor Advertising Registration Certificate. If the PRC government determines that we are obligated to complete outdoor advertisement registration as an outdoor advertising network operator, we may be subject to administrative sanctions, including discontinuation of its business for failure to complete such registration."

In addition, on December 6, 2007, the State Administration of Radio, Film and Television ("SARFT") promulgated the December 2007 Notice pursuant to which the broadcasting of audio and visual programs, including news, drama series, sports, technology, entertainment and other programs, through radio and television networks, the Internet and other information systems affixed to vehicles and buildings and in airports, bus and railway stations, shopping malls, banks, hospitals and other outdoor public media would be subject to approval by the SARFT. The December 2007 Notice required the local branches of SARFT to investigate and record any organization or company engaging in the activities described in the December 2007 Notice without permission, to send written notices to such organizations or companies demanding their compliance with the December 2007 Notice, and to report the results of such

investigations to SARFT by January 15, 2008. We have not yet received any notice from the SARFT or any of its local branches demanding compliance with the December 2007 Notice. We may, however, be required to obtain an approval from SARFT under the December 2007 Notice, or may be required to remove entertainment programs from its advertising network.

Advertising Content

PRC advertising laws, rules and regulations set forth certain content requirements for advertisements in China including, among other things, prohibitions on false or misleading content, superlative wording, socially destabilizing content or content involving obscenities, superstition, violence, discrimination or infringement of the public interest. Advertisements for anesthetic, psychotropic, toxic or radioactive drugs are prohibited. There are also specific restrictions and requirements regarding advertisements that relate to matters such as patented products or processes, pharmaceutical products, medical procedures, alcohol, tobacco, and cosmetics. In addition, all advertisements relating to pharmaceuticals, medical instruments, agrochemicals and veterinary pharmaceuticals, together with any other advertisements which are subject to censorship by administrative authorities according to relevant laws or regulations, must be submitted to relevant authorities for content approval prior to dissemination.

Advertisers, advertising operators, including advertising agencies, and advertising distributors are required by PRC advertising laws and regulations to ensure that the content of the advertisements they prepare or distribute is true and in full compliance with applicable laws. In providing advertising services, advertising operators and advertising distributors must review the supporting documents provided by advertisers for advertisements and verify that the content of the advertisements complies with applicable PRC laws, rules and regulations. Prior to distributing advertisements that are subject to government censorship and approval, advertising distributors are obligated to verify that such censorship has been performed and approval has been obtained. Violation of these regulations may result in penalties, including fines, confiscation of advertising income, orders to cease dissemination of the advertisements and orders to publish an advertisement correcting the misleading information. In circumstances involving serious violations, the SAIC or its local branches may revoke violators' licenses or permits for their advertising business operations. Furthermore, advertisers, advertising operators or advertising distributors may be subject to civil liability if they infringe on the legal rights and interests of third parties in the course of their advertising business.

In October 2013, the SARFT issued a notice to enhance the management of TV shopping infomercials broadcasted in provincial satellite television stations, which further restricts the contents, air time and duration of these infomercials. These restrictions have had and may continue to have a negative impact on our TV advertising business.

We do not believe that advertisements containing content subject to restriction or censorship comprise a material portion of the advertisements displayed on our media network. However, there can be no assurance that each advertisement displayed on our network complies with relevant PRC advertising laws and regulations. Failure to comply with PRC laws and regulations relating to advertisement content restrictions governing the advertising industry in China may result in severe penalties.

Regulation on Intellectual Property

Regulation on Trademark

The Trademark Law of the PRC was adopted at the 24th meeting of the Standing Committee of the Fifth National People's Congress on August 23, 1982 and amended on February 22, 1993 and October 27, 2001. The Trademark Law sets out the guidelines on administration of trademarks and protection of the exclusive rights of trademark owners. In order to enjoy an exclusive right to use a trademark, one must register the trademark with the Trademark Bureau of the SAIC and obtain a registration certificate.

Regulation on Patents

The Patent Law of the PRC was adopted at the 4th Meeting of the Standing Committee of the Sixth National People's Congress on March 12, 1984 and subsequently amended in 1992 and 2000. The Patent Law extends protection to three kinds of patents: invention patents, utility patents and design patents. According to the Implementing Regulations of the Patent Law, promulgated by the State Council of the PRC on December 28, 2002 and effective on February 1, 2003, an invention patent refers to a new technical solution relating to a product, a process or improvement. When compared to existing technology, an invention patent has prominent substantive features and represents notable progress. A utility patent refers to any new technical solution relating to the shape, the structure, or their combination, of a product. Utility patents are granted for products only, not processes. A design patent (or industrial design) refers to any new design of the shape, pattern or color of a product or their combinations, which creates an aesthetic feeling and are suitable for industrial application. Inventors or designers must register with the State Intellectual Property Office to obtain patent protection. The term of protection is twenty years for invention patents and ten years for utility patents and design patents. Unauthorized use of patent constitutes an infringement and the patent holders are entitled to claims of damages, including royalties, to the extent reasonable, and lost profits.

Regulation on Copyright

The Copyright Law of the PRC was adopted at the 15th Meeting of the Standing Committee of the Seventh National People's Congress on September 7, 1990 and amended on October 27, 2001. Unlike patent and trademark protection, copyrighted works do not require registration for protection in China. However, copyright owners may wish to voluntarily register with China's National Copyright Administration to establish evidence of ownership in the event enforcement actions become necessary. Consent from the copyright owners and payment of royalties are required for the use of copyrighted works. Copyrights of movies or other audio or video works usually expire fifty years after their first publication. We believe that we are in compliance with the PRC regulations on copyright.

Regulations on Foreign Currency Exchange

Foreign Currency Exchange

Pursuant to the Foreign Currency Administration Rules promulgated on August 25, 2008 and various regulations issued by SAFE and other relevant PRC government authorities, the Renminbi is freely convertible only to the extent of current account items, such as trade-related receipts and payments, interest and dividends. Capital account items, such as direct equity investments, loans and repatriation of investment, require the prior approval from SAFE or its local branch for conversion of the Renminbi into a foreign currency, such as U.S. dollars, and remittance of the foreign currency outside the PRC. Payments for transactions that take place within the PRC must be made in Renminbi. Domestic companies or individuals can repatriate foreign currency payments received from abroad or deposit these payments abroad subject to applicable regulations that expressly require repatriation within certain period. Foreign-invested enterprises may retain foreign exchange in accounts with designated foreign exchange banks subject to a cap set by SAFE or its local branch. Foreign currencies received under current account items can be either retained or sold to financial institutions engaged in the foreign exchange settlement or sales business without prior approval from SAFE by complying with relevant regulations. Foreign exchange income under capital account can be retained or sold to financial institutions engaged in foreign exchange settlement and sales business, with prior approval from SAFE unless otherwise provided.

Our business operations, which are subject to the foreign currency exchange regulations, have all been implemented in accordance with these regulations. We will take steps to ensure that our future operations comply with these regulations.

Dividend Distribution

The principal laws, rules and regulations governing dividends paid by PRC operating subsidiaries and VIEs include the Company Law of the PRC (1993), as amended in 2006, the Wholly Foreign Owned Enterprise Law (1986), as amended in 2000, and the Wholly Foreign Owned Enterprise Law Implementation Rules (1990), as amended in 2001. Under these laws and regulations, PRC subsidiaries and VIEs, including wholly owned foreign enterprises, or WFOEs, and domestic companies in China, may pay dividends only out of their accumulated profits, if any, determined in accordance with PRC accounting standards and regulations. In addition, its PRC significant subsidiaries and VIEs, including WFOEs and domestic companies, are required to set aside at least 10% of their after-tax profit based on PRC accounting standards each year to their statutory capital reserve fund until the cumulative amount of such reserve reaches 50% of their respective registered capital. These reserves are not distributable as cash dividends.

Tax

On March 16, 2007, the Fifth Session of the Tenth National People's Congress of PRC passed the Enterprise Income Tax Law of the People's Republic of China, or EIT Law, which became effective on January 1, 2008. On November 28, 2007, the State Council at the 197th Executive Meeting passed the Regulation on the Implementation of the Income Tax Law of the People's Republic of China, which became effective on January 1, 2008. The EIT Law adopted a uniform tax rate of 25% for all enterprises (including foreign-invested enterprises) and revoked the existing tax exemption, reduction and preferential treatments applicable to foreign-invested enterprises.

Under the EIT Law, enterprises are classified as either "resident enterprises" or "non-resident enterprises." Pursuant to the EIT Law and the Implementation Rules, enterprises established under PRC laws, or enterprises established outside China whose "de facto management bodies" are located in China, are considered "resident enterprises" and subject to the uniform 25% enterprise income tax rate for their global income. According to the Implementation Rules, "de facto management body" refers to a managing body that in practice exercises overall management and control over the production and business, personnel, accounting and assets of an enterprise. Our management is currently based in China and is expected to remain in China in the future. In addition, although the EIT Law provides that "dividends, bonuses and other equity investment proceeds between qualified resident enterprises" is exempted income, and the Implementation Rules refer to "dividends, bonuses and other equity investment proceeds between qualified resident enterprises" as the investment proceeds obtained by a resident enterprise from its direct investment in another resident enterprise, however, it is unclear whether our circumstance is eligible for exemption.

Furthermore, the EIT Law and Implementation Rules provide that the “non-resident enterprises” are subject to the enterprise income tax rate of 10% on their income sourced from China, if such “non-resident enterprises” (i) do not have establishments or premises of business in China or (ii) have establishments or premises of business in China, but the relevant income does not have actual connection with their establishments or premises of business in China. Such income tax may be exempted or reduced by the State Council of the PRC or pursuant to a tax treaty between China and the jurisdictions in which its non-PRC shareholders reside. Under the Double Tax Avoidance Arrangement between Hong Kong and Mainland China, if the Hong Kong resident enterprise owns more than 25% of the equity interest in a company in China, the 10% withholding tax on the dividends the Hong Kong resident enterprise received from such company in China is reduced to 5%. If China Net HK is considered to be a Hong Kong resident enterprise under the Double Tax Avoidance Arrangement and is considered to be a “non-resident enterprise” under the EIT Law, the dividends paid to us by Rise King WFOE may be subject to the reduced income tax rate of 5% under the Double Tax Avoidance Arrangement. However, based on the Notice on Certain Issues with Respect to the Enforcement of Dividend Provisions in Tax Treaties, issued on February 20, 2009 by the State Administration of Taxation, if the relevant PRC tax authorities determine, in their discretion, that a company benefits from such reduced income tax rate due to a structure or arrangement that is primarily tax-driven, such PRC tax authorities may adjust the preferential tax treatment.

Provisions Regarding Mergers and Acquisitions of Domestic Enterprises by Foreign Investors

On August 8, 2006, six PRC regulatory agencies, including CSRC, MOC, SAT, SASAC, SAIC and SAFE, jointly promulgated the M&A Rules, which became effective on September 8, 2006, to regulate foreign investment in PRC domestic enterprises. The M&A Rules provide that the MOC must be notified in advance of any change-of-control transaction in which a foreign investor takes control of a PRC domestic enterprise and any of the following situations exist: (i) the transaction involves an important industry in China; (ii) the transaction may affect national “economic security”; or (iii) the PRC domestic enterprise has a well-known trademark or historical Chinese trade name in China. The M&A Rules also contain a provision requiring offshore SPVs formed for the purpose of the overseas listing of equity interests in PRC companies and controlled directly or indirectly by PRC companies or individuals, to obtain the approval of the CSRC prior to publicly listing their securities on an overseas stock exchange. On September 21, 2006, the CSRC issued a clarification that sets forth the criteria and procedures for obtaining any required approval from the CSRC.

To date, the application of the M&A Rules is unclear. Our PRC counsel has advised us that:

- the CSRC approval requirement applies to SPVs that acquire equity interests in PRC companies through share exchanges and cash, and seek overseas listings; and

- based on their understanding of the current PRC laws, rules and regulations and the M&A Rules, unless there are new PRC laws and regulations or clear requirements from the CSRC in any form that require the prior approval of the CSRC for the listing and trading of any overseas SPV’s securities on an overseas stock exchange, the M&A Rules do not require that we obtain prior CSRC approval because: (i) the Share Exchange is a purely foreign related

transaction governed by foreign laws, not subject to the jurisdiction of PRC laws and regulations; (ii) we are not a special purpose vehicle formed or controlled by PRC companies or PRC individuals; and (iii) we are owned or substantively controlled by foreigners.

However, the interpretation and application of the M&A Rules remain unclear, and the PRC government authorities have the sole discretion to determine whether the transaction is subject to the approval of the CSRC, especially when taking into consideration of the performance-based incentive option arrangement by way of the Share Transfer Agreements. If the CSRC or another PRC regulatory agency subsequently determines that CSRC approval is required for the transaction, we cannot predict how long it would take to obtain the approval. In addition, we may need to apply for a remedial approval from the CSRC and may be subject to certain administrative or other sanctions from these regulatory agencies.

Further, new rules and regulations or relevant interpretations may be issued from time to time that may require us to obtain retroactive approval from the CSRC in connection with the business combination. If this were to occur, our failure to obtain or delay in obtaining the CSRC approval for the business combination would subject us to sanctions imposed by the CSRC and other PRC regulatory agencies. These sanctions could include fines and penalties on our operations in China, restrictions or limitations on our ability to pay dividends outside of China, and other forms of sanctions that may materially and adversely affect our business, results of operations and financial condition.

If the CSRC or another PRC regulatory agency subsequently determines that CSRC approval is required for the business combination, we may need to apply for a remedial approval from the CSRC and may be subject to certain administrative punishments or other sanctions from these regulatory agencies. New rules and regulations or relevant interpretations may require that we retroactively obtain approval from the CSRC in connection with the business combination. If this were to occur, our failure to obtain or delay in obtaining the CSRC approval for the transaction would subject us to sanctions imposed by the CSRC and other PRC regulatory agencies. These sanctions could include fines and penalties on our operations in China, restrictions or limitations on our ability to pay dividends outside of China, and other forms of sanctions that may materially and adversely affect our business, results of operations and financial condition.

The M&A Rules also established additional procedures and requirements expected to make merger and acquisition activities in China by foreign investors more time-consuming and complex, including requirements in some instances that the MOC be notified in advance of any change-of-control transaction in which a foreign investor takes control of a PRC domestic enterprise. These rules may also require the approval from the MOC where overseas companies established or controlled by PRC enterprises or residents acquire affiliated domestic companies. Complying with the requirements of the new regulations to complete such transactions could be time-consuming, and any required approval processes, including MOC approval, may delay or inhibit our ability to complete such transactions, which could affect our ability to expand our business.

Employees

As of December 31, 2015, we had 383 full-time employees, 92 of whom are in sales and marketing, 118 of whom are in operations and support, 66 of whom are in management and administration and 107 of whom are in technology support and R&D.

We are compliant with local prevailing wage, contractor licensing and insurance regulations, and have good relations with our employees.

As required by PRC regulations, we participate in various employee benefit plans that are organized by municipal and provincial governments, including pension, work-related injury benefits, maternity insurance, medical and

unemployment benefit plans. We are required under PRC laws to make contributions to the employee benefit plans at specified percentages of the salaries, bonuses and certain allowances of our employees, up to a maximum amount specified by the local government from time to time. Members of the retirement plan are entitled to a pension equal to a fixed proportion of the salary prevailing at the member's retirement date.

Generally, we enter into a standard employment contract with our officers and managers for a set period of years and a standard employment contract with other employees for a set period of years. According to these contracts, all of our employees are prohibited from engaging in any activities that compete with our business during the period of their employment with us. Furthermore, the employment contracts with officers or managers include a covenant that prohibits officers or managers from engaging in any activities that compete with our business for two years after the period of employment.

Corporation Information

Our principal executive offices are located at No. 3 Min Zhuang Road, Building 6, Yu Quan Hui Gu Tuspark, Haidian District, Beijing, PRC. Our telephone number at this address is (86 10) 69005520 and our fax number is (86 10) 88857816. For more information, see www.chinanet-online.com.

ITEM 1A. RISK FACTORS

In addition to the other information in this Form 10-K, readers should carefully consider the following important factors. These factors, among others, in some cases have affected, and in the future could affect, our financial condition and results of operations and could cause our future results to differ materially from those expressed or implied in any forward-looking statements that appear in this on Form 10-K or that we have made or will make elsewhere.

Risks Related to Our Business

The decline of global and Chinese economy has had, and may continue to have, a negative effect on our business, and could have a material adverse effect on our business, financial condition, results of operations and cash flow.

The Chinese economy is starting to slow after years of blistering growth with increasing housing price and inflation, which has impacted overall consumer spending power. With lower consumption, small businesses or so-called small and medium enterprises, have less incentive to spend more on their advertising as they look to slow down their expansion plans. The global and Chinese economy slowdown has caused the tightening in the credit markets, lower levels of liquidity, higher default and bankruptcy rates for small businesses, lower consumer and business spending, and lower consumer net worth, in China and other parts of the world. These global economic uncertainties and the slowdown of the Chinese economy have had, and may continue to have, a negative effect on the market price of our business, the volatility of which has increased as a result of the disruption in the financial markets. It may also impair our ability to borrow funds or enter into other financial arrangements, if and when additional funds become necessary for our operations. We believe many of our advertisers have also been affected by the current economic slowdown in China. Current or potential advertisers may no longer be in business, may be unable to continue to purchase advertising, or further reduce their spending. All of which would lead to reduced demand for our advertising services, reduced gross margins, and increased delays of payments of accounts receivable or defaults of payments. We are also limited in our ability to reduce costs to offset the results of a prolonged or severe economic downturn given our fixed costs associated with our operations. Therefore, the global uncertainties and the downward trend of the Chinese economy could have a material adverse effect on our business, financial condition, results of operations and cash flow. In addition, the timing and nature of any recovery in the credit and financial markets remains uncertain, and there can be no assurance that market conditions will improve in the near future or that our results will not continue to

be materially and adversely affected.

We operate in a fast-evolving industry, which may make it difficult to evaluate our business and prospects.

We began our Internet advertising service via 28.com in 2003, and entered into the TV production and advertising with China Net TV in May 2008. Both our Internet and TV advertising platforms are primarily targeting SME clients. The SME market in China is still in its early stages and is rapidly developing. Accordingly, the early stage of development of the markets in which we operate makes it difficult to evaluate the viability and sustainability of our business and its acceptance by advertisers and clients. We cannot assure you that we will be profitable every year. We expect that our operating expenses will increase as we expand. Any significant failure to realize anticipated revenue growth could result in operating losses.

We may be subject to, and may expend significant resources in defending against, government actions and civil suits based on the content and services we provide through our Internet, TV and bank kiosk advertising platforms.

PRC advertising laws and regulations require advertisers, advertising operators and advertising distributors, including businesses such as ours, to ensure that the content of the advertisements they prepare or distribute is fair, accurate and in full compliance with applicable laws, rules and regulations. Although we comply with the requirements by reviewing the business licenses and the profiles of our clients, clients may post advertisements about business opportunities that are not legitimate and over which we have no control. On April 24, 2015, the Fourteenth Session of the Standing Committee of the Twelfth National People's Congress adopted the Revised Advertising Law, which became effective on September 1, 2015. The Revised Advertising Law further established the advertisement standards and restrictions of certain industries, such as: medical instruments, education and training, franchise and investments; defined separate standards and restrictions for Internet advertisements and reinforced the regulatory responsibilities of the related competent authorities. We cannot assure you that our operating entities will be fully in compliance with these new rules during normal course of business. Violation of these laws, rules or regulations may result in penalties, including fines, confiscation of advertising fees, orders to cease dissemination of the advertisements and orders to publish an advertisement correcting the misleading information. In circumstances involving serious violations, the PRC government may revoke a violator's license for its advertising business operations.

We operate in the advertising industry, which is particularly sensitive to changes in economic conditions and advertising trends.

Advertising spending by our clients is particularly sensitive to changes in general economic conditions. For example, advertising expenditures typically decrease during periods of economic downturn. Advertisers may reduce the amount of money they spend to advertise on our advertising platforms for a number of reasons, including:

- a general decline in economic conditions;
- a decline in economic conditions in the particular cities where we conduct business;
- a decision to shift advertising expenditures to other available less expensive advertising media; and
- a decline in advertising spending in general.

A decrease in the demand for advertising media in general, and for our advertising services in particular, would materially and adversely affect our ability to generate revenues, and have a material adverse effect on our financial condition and results of operations.

We face significant competition, and if we do not compete successfully against new and existing competitors, we may lose our market share, and our profitability may be adversely affected.

Increased competition could reduce our profitability and result in a loss of market share. Some of our existing and potential competitors may have competitive advantages, such as significantly greater financial, marketing or other resources, and may successfully mimic and adopt our business models. Moreover, increased competition will provide advertisers with a wider range of media and advertising service alternatives, which could lead to lower prices and decreased revenues, gross margins and profits. We cannot assure you that we will be able to successfully compete against new or existing competitors.

Failure to manage our growth could strain our management, operational and other resources, which could materially and adversely affect our business and prospects.

We have been expanding our operations and plan to continue to expand in China. To meet the demand of advertisers for broader coverage, we must continue to expand our platforms by showing our TV productions and advertisements on more television stations, and expanding the capacity and enhancing the technology advantages of our internet advertising portals. The continued growth of our business has resulted in, and will continue to result in, substantial demand on our management, operational and other resources. In particular, the management of our growth will require, among other things:

- increased sales and sales support activities;

- improved administrative and operational systems;

- enhancements to our information technology system;
- stringent cost controls and sufficient working capital;
- strengthening of financial and management controls; and
- hiring and training of new personnel.

As we continue this effort, we may incur substantial costs and expend substantial resources. We may not be able to manage our current or future operations effectively and efficiently or compete effectively in new markets we enter. If we are not able to manage our growth successfully, our business and prospects would be materially and adversely affected.

Key employees are essential to growing our business.

Handong Cheng, our chief executive officer and president, Zhige Zhang, our chief financial officer and George K. Chu, our chief operating officer are essential to our ability to continue to grow our business. They have established relationships within the industries in which we operate. If they were to leave us, our growth strategy might be hindered, which could limit our ability to increase revenue.

In addition, we face competition for attracting skilled personnel with increasing labor cost. If we fail to attract and retain qualified personnel to meet current and future needs, this could slow our ability to grow our business, which could result in a decrease in market share.

We may need additional capital and we may not be able to obtain it at acceptable terms, or at all, which could adversely affect our liquidity and financial position.

We may need additional cash resources due to changed business conditions or other future developments. If these sources are insufficient to satisfy our cash requirements, we may seek to sell additional equity or debt securities or obtain a credit facility. The incurrence of indebtedness would result in increased debt service obligations and could result in operating and financing covenants that would restrict our operations and liquidity.

Our ability to obtain additional capital on acceptable terms is subject to a variety of uncertainties, including:

- investors' perception of, and demand for, securities of alternative advertising media companies;
- conditions of the U.S. and other capital markets in which we may seek to raise funds;
- our future results of operations, financial condition and cash flow;
- PRC governmental regulation of foreign investment in advertising service companies in China;
- economic, political and other conditions in China; and
- PRC governmental policies relating to foreign currency borrowings.

Our failure to protect our intellectual property rights could have a negative impact on our business.

We believe our brand, trade name, copyrights, domain name and other intellectual property are critical to our success. The success of our business depends in part upon our continued ability to use our brand, trade names and copyrights to further develop and increase brand awareness. The infringement of our trade names and copyrights could diminish the value of our brand and its market acceptance, competitive advantages or goodwill. In addition, our information and operational systems, which have not been patented or otherwise registered as our property, are a key component of our competitive advantage and our growth strategy.

Monitoring and preventing the unauthorized use of our intellectual property is difficult. The measures we take to protect our brand, trade names, copyrights, domain name and other intellectual property rights may not be adequate to prevent their unauthorized use by third parties. Furthermore, application of laws governing intellectual property rights in China and abroad is uncertain and evolving, and could involve substantial risks to us. If we are unable to adequately protect our brand, trade names, copyrights, domain name and other intellectual property rights, we may lose these rights and our business may suffer materially. Further, unauthorized use of our brand, domain name or trade names could cause brand confusion among advertisers and harm our reputation. If our brand recognition decreases, we may lose advertisers and fail in our expansion strategies, and our business, results of operations, financial condition and prospects could be materially and adversely affected.

We rely on computer software and hardware systems in managing our operations, the failure of which could adversely affect our business, financial condition and results of operations.

We are dependent upon our computer software and hardware systems in supporting our network and managing and monitoring programs on the network. In addition, we rely on our computer hardware for the storage, delivery and transmission of the data on our network. Any system failure that interrupts the input, retrieval and transmission of data or increases the service time could disrupt our normal operation. Any failure in our computer software or hardware systems could decrease our revenues and harm our relationships with advertisers and consumers, which in turn could have a material adverse effect on our business, financial condition and results of operations.

If we are unable to maintain appropriate internal financial reporting controls and procedures, it could cause us to fail to meet our reporting obligations, result in the restatement of our financial statements, harm our operating results, subject us to regulatory scrutiny and sanction, cause investors to lose confidence in our reported financial information and have a negative effect on the market price for shares of our Common Stock.

Effective internal controls are necessary for us to provide reliable financial reports and effectively prevent fraud. We maintain a system of internal control over financial reporting, which is defined as a process designed by, or under the supervision of, our principal executive officer and principal financial officer, or persons performing similar functions, and effected by our board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

As a public company, we have significant additional requirements for enhanced financial reporting and internal controls. We are required to document and test our internal control procedures in order to satisfy the requirements of Section 404 of the Sarbanes-Oxley Act of 2002, which requires annual management assessments of the effectiveness of our internal controls over financial reporting. The process of designing and implementing effective internal controls is a continuous effort that requires us to anticipate and react to changes in our business and the economic and regulatory environments and to expend significant resources to maintain a system of internal controls that is adequate to satisfy our reporting obligations as a public company.

Our management will continue to evaluate the effectiveness of our overall control environment and will continue to refine existing controls as they, in conjunction with the Audit Committee of our Board of Directors, chief executive officer and chief financial officer, consider necessary. We cannot assure you that we will not, in the future, identify areas requiring improvement in our internal control over financial reporting. We cannot assure you that the measures we will take to remediate any areas in need of improvement will be successful or that we will implement and maintain adequate controls over our financial processes and reporting in the future as we continue our growth. If we are unable to maintain appropriate internal financial reporting controls and procedures, it could cause us to fail to meet our reporting obligations, result in the restatement of our financial statements, harm our operating results, subject us to regulatory scrutiny and sanction, cause investors to lose confidence in our reported financial information and have a negative effect on the market price for shares of our Common Stock.

Risks Relating to Regulation of Our Business and to Our Structure

If the PRC government finds that the agreements that establish the structure for operating our China business do not comply with PRC governmental restrictions on foreign investment in the advertising industry, we could be subject to severe penalties.

All of our operations are conducted through our PRC subsidiaries and PRC Operating Entities, or VIEs, and through our contractual agreements with each of our PRC Operating Entities in China. PRC regulations require any foreign entities that invest in the advertising services industry to have at least two years of direct operations in the advertising industry outside of China. Since December 10, 2005, foreign investors have been allowed to own directly 100% of PRC companies operating an advertising business if the foreign entity has at least three years of direct operations in the advertising business outside of China or less than 100% if the foreign investor has at least two years of direct operations in the advertising industry outside of China. We do not currently directly operate an advertising business outside of China and cannot qualify under PRC regulations any earlier than two or three years after we commence any such operations outside of China or until we acquire a company that has directly operated an advertising business outside of China for the required period of time. Our PRC Operating Entities hold the requisite licenses to provide advertising services in China. Our PRC Operating Entities directly operate our advertising network. We have been and are expected to continue to be dependent on these PRC Operating Entities to operate our advertising business for the foreseeable future. We have entered into Contractual Agreements with the PRC Operating Entities, pursuant to which we, through Rise King WFOE, provide technical support and consulting services to the PRC Operating Entities. In addition, we have entered into agreements with our PRC Operating Entities and each of their shareholders which provide us with the substantial ability to control these affiliates.

The MOFCOM published a discussion draft of the proposed Foreign Investment Law (the "Draft") in January 2015 aiming to, upon its enactment, replace the trio of existing laws regulating foreign investment in China. The Draft embodies an expected PRC regulatory trend to rationalize its foreign investment regulatory regime in line with prevailing international practice and the legislative efforts to unify the corporate legal requirements for both foreign and domestic investments. The MOFCOM is currently soliciting comments on the Draft and substantial uncertainties exist with respect to its enactment timetable, interpretation and implementation. The Draft, if enacted as proposed, may materially impact the viability of our current corporate structure, corporate governance and business operations. The Draft expands the definition of foreign investment and introduces the principle of "actual control" in determining whether a company is considered a Foreign Investment Enterprise ("FIE"). Under the Draft, VIEs that are controlled via contractual arrangement would be deemed as FIEs, if they are ultimately "controlled" by foreign investors. Therefore, for any companies with a VIE structure in an industry category that falls under restricted to foreign investment or prohibited from foreign investment, the VIE structure may be deemed legitimate only if the ultimate controlling person(s) is/are of PRC nationality (either PRC companies or PRC citizens). Conversely, if the actual controlling person(s) is/are of foreign nationalities, then the VIEs will be treated as FIEs and any operation in the industry category falls under restricted to foreign investment or prohibited from foreign investment, without market entry clearance may be considered as illegal. Moreover, for the enterprises which are not incorporated under the laws of China (foreign investors) but are "controlled" by Chinese investors, they may submit documentary evidence to apply for identifying their investment as the investment by Chinese investors when they applying for the market entry clearance to engage in any investment as set out in industries restricted to foreign investment or prohibited from foreign investment in China. The competent authorities of foreign investment will grant the review opinion on

whether the said investment is identified as the investment by Chinese investors. In conclusion, if the Draft enacted as proposed, it is possible that the conduct of certain of our operations and businesses through the VIEs could be found by PRC authorities to be in violation of PRC laws and regulations prohibiting or restricting foreign ownership of companies that engage in such operations and businesses.

If we or our existing or future PRC Operating Entities are found to be in violation of any existing or future PRC laws or regulations or fail to obtain or maintain any of the required permits or approvals, the relevant PRC regulatory authorities, including the State Administration for Industry and Commerce, or SAIC, which regulates advertising companies, would have broad discretion in dealing with such violations, including:

- revoking the business and operating licenses of Rise King WFOE and/or the PRC Operating Entities;

- discontinuing or restricting the operations of Rise King WFOE and/or the PRC Operating Entities;

- imposing conditions or requirements with which we, Rise King WFOE and/or our PRC Operating Entities may not be able to comply;

- requiring us or Rise King WFOE and/or PRC Operating Entities to restructure the relevant ownership structure or operations; or

- restricting or prohibiting our use of the proceeds of this offering to finance our business and operations in China.

The imposition of any of these penalties would result in a material and adverse effect on our ability to conduct our business and would have a material adverse impact on our cash flows, financial position and operating performance.

We rely on contractual arrangements with the PRC Operating Entities and their shareholders for our China operations, which may not be as effective in providing operational control as direct ownership.

We rely on contractual arrangements with our PRC Operating Entities and their shareholders to operate our advertising business. These contractual arrangements may not be as effective in providing us with control over the PRC Operating Entities as direct ownership. If we had direct ownership of the PRC Operating Entities, we would be able to exercise our rights as a shareholder to effect changes in the board of directors of those companies, which in turn could affect changes, subject to any applicable fiduciary obligations, at the management level. However, under the current contractual arrangements, as a legal matter, if the PRC Operating Entities or any of their subsidiaries and shareholders fail to perform its or their respective obligations under these contractual arrangements, we may have to incur substantial costs and resources to enforce such arrangements, and rely on legal remedies under PRC laws, including seeking specific performance or injunctive relief, and claiming damages, which we cannot assure you to be effective. Accordingly, it may be difficult for us to change our corporate structure or to bring claims against the PRC Operating Entities if they do not perform their obligations under its contracts with us or if any of the PRC citizens who hold the equity interest in the PRC Operating Entities do not cooperate with any such actions.

Many of these contractual arrangements are governed by PRC laws and provide for the resolution of disputes through either arbitration or litigation in the PRC. Accordingly, these contracts would be interpreted in accordance with PRC laws and any disputes would be resolved in accordance with PRC legal procedures. The legal environment in the PRC is not as developed as in other jurisdictions, such as the United States. As a result, uncertainties in the PRC legal system could limit our ability to enforce these contractual arrangements. In the event we are unable to enforce these contractual arrangements, we may not be able to exert effective control over our operating entities, and our ability to conduct our business may be negatively affected. In addition, a PRC court or arbitration tribunal may refuse to enforce the contractual arrangements on the grounds that they are designed to circumvent PRC foreign investment restrictions and therefore are against PRC public policy.

Contractual arrangements we have entered into among the PRC Operating Entities may be subject to scrutiny by the PRC tax authorities and a finding that we owe additional taxes or are ineligible for our tax exemption, or both, could substantially increase our taxes owed, and reduce our net income and the value of your investment.

Under PRC law, arrangements and transactions among related parties may be subject to audit or challenge by the PRC tax authorities. If any of the transactions we have entered into among our subsidiaries and affiliated entities are found not to be on an arm's-length basis, or to result in an unreasonable reduction in tax under PRC law, the PRC tax authorities have the authority to disallow our tax savings, adjust the profits and losses of our respective PRC entities and assess late payment interest and penalties.

If any of our PRC Operating Entities incurs debt on its own behalf in the future, the instruments governing the debt may restrict their ability to pay dividends or make other distributions to us. In addition, the PRC tax authorities may require us to adjust our taxable income under the contractual arrangements with the PRC Operating Entities we currently have in place in a manner that would materially and adversely affect the PRC Operating Entities' ability to pay dividends and other distributions to us. Furthermore, relevant PRC laws and regulations permit payments of dividends by the PRC Operating Entities only out of their retained earnings, if any, determined in accordance with PRC accounting standards and regulations. Under PRC laws and regulations, each of the PRC Operating Entities is also required to set aside a portion of its net income each year to fund specific reserve funds. These reserves are not distributable as cash dividends. In addition, subject to certain cumulative limits, the statutory general reserve fund requires annual appropriations of 10% of after-tax income to be set aside prior to payment of dividends. As a result of these PRC laws and regulations, the PRC Operating Entities are restricted in their ability to transfer a portion of their net assets to us whether in the form of dividends, loans or advances. Any limitation on the ability of the PRC Operating Entities to pay dividends to us could materially and adversely limit our ability to grow, make investments or acquisitions that could be beneficial to our businesses, pay dividends, or otherwise fund and conduct our business.

Risks Associated With Doing Business In China

There are substantial risks associated with doing business in China, as set forth in the following risk factors.

Our operations and assets in China are subject to significant political and economic uncertainties.

Changes in PRC laws and regulations, or their interpretation, or the imposition of confiscatory taxation, restrictions on currency conversion, imports and sources of supply, devaluations of currency or the nationalization or other expropriation of private enterprises could have a material adverse effect on our business, results of operations and financial condition. Under its current leadership, the Chinese government has been pursuing economic reform policies that encourage private economic activity and greater economic decentralization. There is no assurance, however, that the Chinese government will continue to pursue these policies, or that it will not significantly alter these policies from time to time without notice.

We derive a substantial portion of our sales from China.

Substantially all of our sales are generated in China. We anticipate that sales of our services in China will continue to represent a substantial proportion of our total sales in the near future. Any significant decline in the condition of the PRC economy could adversely affect consumer demand of our services, among other things, which in turn would have a material adverse effect on our business and financial condition.

Currency fluctuations and restrictions on currency exchange may adversely affect our business, including limiting our ability to convert Chinese Renminbi into foreign currencies and, if Chinese Renminbi were to decline in value, reducing our revenue in U.S. dollar terms.

Our reporting currency is the U.S. dollar and our operations in China use the local currency as their functional currencies. Substantially all of our revenue and expenses are in Chinese Renminbi. We are subject to the effects of exchange rate fluctuations with respect to any of these currencies. For example, the value of the Renminbi depends to a large extent on Chinese government policies and China's domestic and international economic and political developments, as well as supply and demand in the local market. On July 21, 2005, the Chinese government changed its policy of pegging the value of Chinese Renminbi to the U.S. dollar. Under the new policy, Chinese Renminbi may fluctuate within a narrow and managed band against a basket of certain foreign currencies. It is possible that the Chinese government could adopt a more flexible currency policy, which could result in more significant fluctuation of Chinese Renminbi against the U.S. dollar. We can offer no assurance that Chinese Renminbi will be stable against the U.S. dollar or any other foreign currency.

The income statements of our operations are translated into U.S. dollars at the average exchange rates in each applicable period. To the extent the U.S. dollar strengthens against foreign currencies, the translation of these foreign currencies denominated transactions results in reduced revenue, operating expenses and net income for our international operations. Similarly, to the extent the U.S. dollar weakens against foreign currencies, the translation of these foreign currency denominated transactions results in increased revenue, operating expenses and net income for our international operations. We are also exposed to foreign exchange rate fluctuations as we convert the financial statements of our foreign operating subsidiaries and VIEs into U.S. dollars in consolidation. If there is a change in foreign currency exchange rates, the conversion of the foreign subsidiaries and VIEs' financial statements into U.S. dollars will lead to a translation gain or loss which is recorded as a component of other comprehensive income. In addition, we have certain assets and liabilities that are denominated in currencies other than the relevant entity's functional currency. Changes in the functional currency value of these assets and liabilities create fluctuations that will lead to a transaction gain or loss. We have not entered into agreements or purchased instruments to hedge our exchange rate risks, although we may do so in the future. The availability and effectiveness of any hedging transaction may be limited and we may not be able to successfully hedge our exchange rate risks.

Although Chinese governmental policies were introduced in 1996 to allow the convertibility of Chinese Renminbi into foreign currency for current account items, conversion of Chinese Renminbi into foreign exchange for capital items, such as foreign direct investment, loans or securities, requires the approval of the State Administration of Foreign Exchange, or SAFE, which is under the authority of the People's Bank of China. These approvals, however, do not guarantee the availability of foreign currency conversion. We cannot be sure that we will be able to obtain all required conversion approvals for our operations or those Chinese regulatory authorities will not impose greater restrictions on the convertibility of Chinese Renminbi in the future. Because a significant amount of our future revenue may be in the form of Chinese Renminbi, our inability to obtain the requisite approvals or any future restrictions on currency exchanges could limit our ability to utilize revenue generated in Chinese Renminbi to fund our business activities outside of China, or to repay foreign currency obligations, including our debt obligations, which would have a material adverse effect on our financial condition and results of operations.

We may have limited legal recourse under PRC laws if disputes arise under our contracts with third parties.

The Chinese government has enacted laws and regulations dealing with matters such as corporate organization and governance, foreign investment, commerce, taxation and trade. However, their experience in implementing, interpreting and enforcing these laws and regulations is limited, and our ability to enforce commercial claims or to resolve commercial disputes is unpredictable. If our new business ventures are unsuccessful, or other adverse circumstances arise from these transactions, we face the risk that the parties to these ventures may seek ways to terminate the transactions, or, may hinder or prevent us from accessing important information regarding the financial and business operations of these acquired companies. The resolution of these matters may be subject to the exercise of considerable discretion by agencies of the Chinese government, and forces unrelated to the legal merits of a particular matter or dispute may influence their determination. Any rights we may have to specific performance, or to seek an injunction under PRC law, in either of these cases, are severely limited, and without a means of recourse by virtue of the Chinese legal system, we may be unable to prevent these situations from occurring. The occurrence of any such events could have a material adverse effect on our business, financial condition and results of operations.

We must comply with the Foreign Corrupt Practices Act.

We are required to comply with the United States Foreign Corrupt Practices Act, which prohibits U.S. companies from engaging in bribery or other prohibited payments to foreign officials for the purpose of obtaining or retaining business. Foreign companies, including some of our competitors, are not subject to these prohibitions. Corruption, extortion, bribery, pay-offs, theft and other fraudulent practices occur from time-to-time in mainland China. If our competitors engage in these practices, they may receive preferential treatment from personnel of some companies, giving our competitors an advantage in securing business or from government officials who might give them priority in obtaining new licenses, which would put us at a disadvantage. Although we inform our personnel that such practices are illegal, we cannot assure you that our employees or other agents will not engage in such conduct for which we might be held responsible. If our employees or other agents are found to have engaged in such practices, we could suffer severe penalties.

Changes in foreign exchange regulations in the PRC may affect our ability to pay dividends in foreign currency or conduct other foreign exchange business.

The Renminbi is not a freely convertible currency, and the restrictions on currency exchanges may limit our ability to use revenues generated in Renminbi to fund our business activities outside the PRC or to make dividends or other payments in United States dollars. The PRC government strictly regulates conversion of Renminbi into foreign currencies. Over the years, foreign exchange regulations in the PRC have significantly reduced the government's control over routine foreign exchange transactions under current accounts. In the PRC, the State Administration for Foreign Exchange, or the SAFE, regulates the conversion of the Renminbi into foreign currencies. Pursuant to applicable PRC laws and regulations, foreign invested enterprises incorporated in the PRC are required to apply for "Foreign Exchange Registration Certificates." Currently, conversion within the scope of the "current account" (e.g. remittance of foreign currencies for payment of dividends, etc.) can be effected without requiring the approval of SAFE. However, conversion of currency in the "capital account" (e.g. for capital items such as direct investments, loans, securities, etc.) still requires the approval of SAFE.

Recent PRC regulations relating to mergers and acquisitions of domestic enterprises by foreign investors may increase the administrative burden we face and create regulatory uncertainties.

On August 8, 2006, the Ministry of Commerce (the “MOC”), joined by the China Securities Regulatory Commission (the “CSRC”), State-owned Assets Supervision and Administration Commission of the State Council (the “SASAC”), the State Administration of Taxation (the “SAT”), the State Administration of Industry and Commerce (the “SAIC”), and SAFE, jointly promulgated a rule entitled the Provisions Regarding Mergers and Acquisitions of Domestic Enterprises by Foreign Investors (the “M&A Rules”), which took effect as of September 8, 2006. This new regulation, among other things, has certain provisions that require special purpose vehicles, or SPVs, formed for the purpose of acquiring PRC domestic companies and controlled by PRC individuals, to obtain the approval of the CSRC prior to publicly listing their securities on an overseas stock market. However, the new regulation does not expressly provide that approval from the CSRC is required for the offshore listing of the SPV which acquires, directly or indirectly, equity interest or shares of domestic PRC entities held by domestic companies or individuals by cash payment, nor does it expressly provide that approval from CSRC is not required for the offshore listing of a SPV which has fully completed its acquisition of equity interest of domestic PRC equity prior to September 8, 2006. On September 21, 2006, the CSRC published on its official website a notice specifying the documents and materials that are required to be submitted for obtaining CSRC approval.

It is not clear whether the provisions in the new regulation regarding the offshore listing and trading of the securities of a SPV applies to an offshore company such as us which owns controlling contractual interest in the PRC Operating Entities. We believe that the M&A Rules and the CSRC approval are not required in the context of the share exchange under our transaction because (i) such share exchange is a purely foreign related transaction governed by foreign laws, not subject to the jurisdiction of PRC laws and regulations; (ii) we are not a SPV formed or controlled by PRC companies or PRC individuals; and (iii) we are owned or substantively controlled by foreigners. However, we cannot be certain that the relevant PRC government agencies, including the CSRC, would reach the same conclusion, and we still cannot rule out the possibility that CSRC may deem that the transactions effected by the share exchange circumvented the new M&A rules, the PRC Securities Law and other rules and notices.

If the CSRC or another PRC regulatory agency subsequently determines that the CSRC’s approval is required for the transaction, we may face sanctions by the CSRC or another PRC regulatory agency. If this happens, these regulatory agencies may impose fines and penalties on our operations in the PRC, limit our operating privileges in the PRC, delay or restrict the repatriation of the proceeds from this offering into the PRC, restrict or prohibit payment or remittance of dividends to us or take other actions that could have a material adverse effect on our business, financial condition, results of operations, reputation and prospects, as well as the trading price of our shares. The CSRC or other PRC regulatory agencies may also take actions requiring us, or making it advisable for us, to delay or cancel the transaction.

The M&A Rules, along with foreign exchange regulations discussed in the above subsection, will be interpreted or implemented by the relevant government authorities in connection with our future offshore financings or acquisitions, and we cannot predict how they will affect our acquisition strategy. For example, our operating companies’ ability to remit dividends to us, or to engage in foreign-currency-denominated borrowings, may be conditioned upon

compliance with the SAFE registration requirements by such Chinese domestic residents, over whom we may have no control. In addition, such Chinese domestic residents may be unable to complete the necessary approval and registration procedures required by the SAFE regulations. Such uncertainties may restrict our ability to implement our acquisition strategy and adversely affect our business and prospects.

Future inflation in China may inhibit our activity to conduct business in China.

In recent years, the Chinese economy has experienced periods of rapid expansion and high rates of inflation. These factors have led to the adoption by Chinese government, from time to time, of various corrective measures designed to restrict the availability of credit or regulate growth and contain inflation. High inflation may in the future cause Chinese government to impose controls on credit and/or prices, or to take other action, which could inhibit economic activity in China, and thereby harm the market for our services.

We may have difficulty establishing adequate management, legal and financial controls in the PRC.

We may have difficulty in hiring and retaining a sufficient number of qualified employees to work in the PRC. As a result of these factors, we may experience difficulty in establishing management, legal and financial controls, collecting financial data and preparing financial statements, books of account and corporate records and instituting business practices that meet Western standards. We may have difficulty establishing adequate management, legal and financial controls in the PRC.

You may experience difficulties in effecting service of legal process, enforcing foreign judgments or bringing original actions in China based on United States or other foreign laws against us and our management.

We conduct substantially all of our operations in China and substantially all of our assets are located in China. In addition, some of our directors and executive officers reside within China. As a result, it may not be possible to effect service of process within the United States or elsewhere outside China upon some of our directors and senior executive officers, including with respect to matters arising under U.S. federal securities laws or applicable state securities laws. It would also be difficult for investors to bring an original lawsuit against us or our directors or executive officers before a Chinese court based on U.S. federal securities laws or otherwise. Moreover, China does not have treaties with the United States or many other countries providing for the reciprocal recognition and enforcement of judgment of courts.

PRC enterprise income tax law could adversely affect our business and our net income.

On March 16, 2007, the National People's Congress of the PRC passed the revised Enterprise Income Tax Law (or EIT Law), which took effect on of January 1, 2008. The EIT Law imposes a unified income tax rate of 25% on all companies established in China. Under the EIT Law, an enterprise established outside of the PRC with "de facto management bodies" within the PRC is considered as a resident enterprise and will normally be subject to the enterprise income tax at the rate of 25% on its global income. The EIT Law, however, does not define the term "de

facto management bodies.” If the PRC tax authorities subsequently determine that we should be classified as a resident enterprise, then our global income will be subject to PRC income tax at a tax rate of 25%.

With the introduction of the EIT Law, China has resumed imposition of a withholding tax (10% in the absence of a bilateral tax treaty or new domestic regulation reducing such withholding tax rate to a lower rate). Per the Double Tax Avoidance Arrangement between Hong Kong and Mainland China, a Hong Kong company as the investor, which is considered a “non-resident enterprise” under the EIT Law, may enjoy the reduced withholding tax rate of 5% if it holds more than 25% equity interest in its PRC subsidiary. As China Net HK is the sole shareholder of Rise King WFOE, substantially all of our income will derive from dividends we receive from Rise King WFOE through China Net HK. When we declare dividends from the income in the PRC, we cannot assure whether such dividends may be taxed at a reduced withholding tax rate of 5% per the Double Tax Avoidance Arrangement between Hong Kong and Mainland China as the PRC tax authorities may regard our China Net HK as a shell company formed only for tax purposes and still deem Rise King WFOE in the PRC as the subsidiary directly owned by us. Based on the Notice on Certain Issues with respect to the Enforcement of Dividend Provisions in Tax Treaties, issued on February 20, 2009 by the State Administration of Taxation, if the relevant PRC tax authorities determine, in their discretion, that a company benefits from such reduced income tax rate due to a structure or arrangement that is primarily tax-driven, such PRC tax authorities may adjust the preferential tax treatment.

Investors should note that the EIT Law provides only a framework of the enterprise tax provisions, leaving many details on the definitions of numerous terms as well as the interpretation and specific applications of various provisions unclear and unspecified. Any increase in our tax rate in the future could have a material adverse effect on our financial conditions and results of operations.

Under the EIT Law, we may be classified as a “resident enterprise” of China. Such classification will likely result in unfavorable tax consequences to us and holders of our securities.

Under the EIT Law, an enterprise established outside of China with its “de facto management body” in China is considered a “resident enterprise,” meaning that it can be treated the same as a Chinese enterprise for enterprise income tax purposes. The implementing rules of the EIT Law defines “de facto management body” as an organization that exercises “substantial and overall management and control over the production and operations, personnel, accounting, and properties” of an enterprise. Currently no interpretation or application of the EIT Law and its implementing rules is available, therefore it is unclear how tax authorities will determine tax residency based on the facts of each case.

If the PRC tax authorities determine that China Net is a “resident enterprise” for PRC enterprise income tax purposes, a number of unfavorable PRC tax consequences could follow. First, we will be subject to enterprise income tax at a rate of 25% on our worldwide income as well as PRC enterprise income tax reporting obligations. This would mean that income such as interest on offering proceeds and other non-China source income would be subject to PRC enterprise income tax at a rate of 25%. Second, although under the EIT Law and its implementing rules dividends paid to us by our PRC subsidiaries would qualify as “tax-exempt income,” we cannot guarantee that such dividends will not be subject to a 10% withholding tax, as the PRC foreign exchange control authorities, which enforce the withholding tax, have not yet issued guidance with respect to the processing of outbound remittances to entities that are treated as resident enterprises for PRC enterprise income tax purposes. Finally, a 10% withholding tax will be imposed on dividends we pay to our non-PRC shareholders.

Our Chinese operating companies are obligated to withhold and pay PRC individual income tax in respect of the salaries and other income received by their employees who are subject to PRC individual income tax. If they fail to withhold or pay such individual income tax in accordance with applicable PRC regulations, they may be subject to certain sanctions and other penalties, which could have a material adverse impact on our business.

Under PRC laws, Rise King WFOE and the PRC Operating Entities will be obligated to withhold and pay individual income tax in respect of the salaries and other income received by their employees who are subject to PRC individual income tax. Such companies may be subject to certain sanctions and other liabilities under PRC laws in case of failure to withhold and pay individual income taxes for its employees in accordance with the applicable laws.

In addition, the SAT has issued several circulars concerning employee stock options. Under these circulars, employees working in the PRC (which could include both PRC employees and expatriate employees subject to PRC individual income tax) are required to pay PRC individual income tax in respect of their income derived from exercising or otherwise disposing of their stock options. Our PRC entities will be obligated to file documents related to employee stock options with relevant tax authorities and withhold and pay individual income taxes for those employees who exercise their stock options. While tax authorities may advise us that our policy is compliant, they may change their policy, and we could be subject to sanctions.

Because Chinese laws will govern almost all of our business' material agreements, we may not be able to enforce our rights within the PRC or elsewhere, which could result in a significant loss of business, business opportunities or capital.

The Chinese legal system is similar to a civil law system based on written statutes. Unlike common law systems, it is a system in which decided legal cases have little precedential value. Although legislation in the PRC over the past 35 years has significantly improved the protection afforded to various forms of foreign investment and contractual arrangements in the PRC, these laws, regulations and legal requirements are relatively new. Due to the limited volume of published judicial decisions, their non-binding nature, the short history since their enactments, the discrete understanding of the judges or government agencies of the same legal provision, inconsistent professional abilities of the judicators, and the inclination to protect local interest in the court rooms, interpretation and enforcement of PRC laws and regulations involve uncertainties, which could limit the legal protection available to us, and foreign investors, including you. The inability to enforce or obtain a remedy under any of our future agreements could result in a significant loss of business, business opportunities or capital and could have a material adverse impact on our business, prospects, financial condition, and results of operations. In addition, the PRC legal system is based in part on government policies and internal rules (some of which are not published on a timely basis or at all) that may have a retroactive effect. As a result, we may not be aware of our violation of these policies and rules until a period of time after the violation. In addition, any litigation in the PRC, regardless of outcome, may be protracted and result in substantial costs and diversion of resources and management attention.

Risks Related to our Securities

Insiders have substantial control over us, and they could delay or prevent a change in our corporate control even if our other stockholders wanted it to occur.

Our executive officers, directors, and principal stockholders hold approximately 40% of our outstanding Common Stock. Accordingly, these stockholders are able to exert substantial influence over all matters requiring stockholder approval, including the election of directors and approval of significant corporate transactions. This could delay or prevent an outside party from acquiring or merging with us even if our other stockholders wanted it to occur.

There may not be sufficient liquidity in the market for our securities in order for investors to sell their securities.

There is currently only a limited public market for our Common Stock and there can be no assurance that a trading market will develop further or be maintained in the future. As of April 12, 2016, the closing trade price of our Common Stock was \$0.67 per share. As of April 12, 2016, we had approximately 650 shareholders of record of our Common Stock, not including shares held in street name. In addition, during the past two fiscal years our Common Stock has had a trading range with a low price of \$0.64 per share and a high price of \$3.48 per share.

The market price of our Common Stock may be volatile.

The market price of our Common Stock has been and will likely continue to be highly volatile, as is the stock market in general. Some of the factors that may materially affect the market price of our Common Stock are beyond our control, such as changes in financial estimates by industry and securities analysts, conditions or trends in the industry in which we operate or sales of our common stock. These factors may materially adversely affect the market price of our Common Stock, regardless of our performance. In addition, the public stock markets have experienced extreme price and trading volume volatility particularly for companies whose primary operations are located in the PRC. This volatility has significantly affected the market prices of securities of many companies for reasons frequently unrelated to the operating performance of the specific companies. These broad market fluctuations may adversely affect the market price of our Common Stock.

The outstanding options may adversely affect us in the future and cause dilution to existing stockholders.

We currently have common stock options outstanding to purchase up to 2,088,040 shares of our Common Stock in the aggregate issued to our management, executive directors and employees, subject to forfeiture upon an employee's cessation of employment at the discretion of the Company. The exercise price of these options ranges from \$0.84 to \$1.23 per share, of which 200,000 shares of the common stock purchase options will expire on December 29, 2019, 694,940 shares of common stock purchase options will expire on November 29, 2021, and the remaining 1,193,100 shares of common stock purchase options will expire on September 14, 2020. Exercise of these options may cause dilution in the interests of other stockholders as a result of the additional Common Stock that would be issued upon exercise. In addition, sales of the shares of our Common Stock issuable upon exercise of these options could have a depressive effect on the price of our stock, particularly if there is not a coinciding increase in demand by purchasers of our Common Stock. Further, the terms on which we may obtain additional financing during the period any of these options remain outstanding may be adversely affected by the existence of these options as well.

We may need additional capital and may sell additional securities or other equity securities or incur indebtedness, which could result in additional dilution to our shareholders or increase our debt service obligations.

We may require additional cash resources due to changed business conditions or other future developments, including any investments or acquisitions we may decide to pursue. If our cash resources are insufficient to satisfy our cash requirements, we may seek to sell additional equity or debt securities or obtain a credit facility. The sale of additional equity securities or equity-linked debt securities could result in additional dilution to our shareholders. The incurrence of indebtedness would result in increased debt service obligations and could result in operating and financing covenants that would restrict our operations. We cannot assure you that financing will be available in amounts or on terms acceptable to us, if at all.

We have not paid dividends in the past and do not expect to pay dividends in the future, and any return on investment may be limited to the value of our stock.

We have never paid any cash dividends on our Common Stock and do not anticipate paying any cash dividends on our common stock in the foreseeable future and any return on investment may be limited to the value of our stock. We plan to retain any future earnings to finance growth.

Techniques employed by manipulative short sellers in Chinese small cap stocks may drive down the market price of our common stock.

Short selling is the practice of selling securities that the seller does not own but rather has, supposedly, borrowed from a third party with the intention of buying identical securities back at a later date to return to the lender. The short seller hopes to profit from a decline in the value of the securities between the sale of the borrowed securities and the purchase of the replacement shares, as the short seller expects to pay less in that purchase than it received in the sale. As it is therefore in the short seller's best interests for the price of the stock to decline, many short sellers (sometimes known as "disclosed shorts") publish, or arrange for the publication of, negative opinions regarding the relevant issuer and its business prospects in order to create negative market momentum and generate profits for themselves after selling a stock short. While traditionally these disclosed shorts were limited in their ability to access mainstream business media or to otherwise create negative market rumors, the rise of the Internet and technological advancements regarding document creation, videotaping and publication by weblog ("blogging") have allowed many disclosed shorts to publicly attack a company's credibility, strategy and veracity by means of so-called research reports that mimic the type of investment analysis performed by large Wall Street firm and independent research analysts. These short attacks have, in the past, led to selling of shares in the market, on occasion in large scale and broad base. Issuers with business operations based in China and who have limited trading volumes and are susceptible to higher volatility levels than U.S. domestic large-cap stocks, can be particularly vulnerable to such short attacks.

These short seller publications are not regulated by any governmental, self-regulatory organization or other official authority in the U.S., are not subject to the certification requirements imposed by the Securities and Exchange Commission in Regulation AC (Regulation Analyst Certification) and, accordingly, the opinions they express may be based on distortions of actual facts or, in some cases, fabrications of facts. In light of the limited risks involved in publishing such information, and the enormous profit that can be made from running just one successful short attack, unless the short sellers become subject to significant penalties, it is more likely than not that disclosed shorts will continue to issue such reports.

While we intend to strongly defend our public filings against any such short seller attacks, oftentimes we are constrained, either by principles of freedom of speech, applicable state law (often called "Anti-SLAPP statutes"), or issues of commercial confidentiality, in the manner in which we can proceed against the relevant short seller. You should be aware that in light of the relative freedom to operate that such persons enjoy – oftentimes blogging from outside the U.S. with little or no assets or identity requirements – should we be targeted for such an attack, our stock

will likely suffer from a temporary, or possibly long term, decline in market price should the rumors created not be dismissed by market participants.

The NASDAQ may delist our securities from quotation on its exchange which could limit investors' ability to make transactions in our securities and subject us to additional trading restrictions.

Our Common Stock is traded on the Nasdaq Stock Market LLC ("NASDAQ"), a national securities exchange. We cannot assure you that our securities will meet the continued listing requirements be listed on the NASDAQ in the future.

On September 8, 2015, we received a letter from The NASDAQ Stock Market LLC ("NASDAQ"). NASDAQ indicated in its letter that, based upon the closing bid price for the last 30 consecutive business days, we no longer meet the requirement set forth in Listing Rule 5550, which requires listed securities to maintain a minimum bid price of \$1.0 per share. According to the Listing Rule 5810, we had a period of 180 calendar days from the date of the letter, or until March 7, 2016, to regain compliance. On March 8, 2016, we received a letter from NASDAQ, which indicated that we had not regained compliance with the minimum \$1.0 bid price per share requirement. However, NASDAQ determined that we were eligible for an additional 180 calendar day period, or until September 6, 2016, to regain compliance. NASDAQ's determination was based on our ability to meet the continued listing requirement for the market value of publicly held shares and all other applicable requirements for initial listing on the NASDAQ Capital Market, with the exception of the bid price requirement, and our written notice of our intention to cure the deficiency during the second compliance period by effecting a reverse stock split, if necessary. If at any time during this additional time period the closing bid price of our security is at least \$1.0 per share for a minimum of ten (10) consecutive business days, NASDAQ will provide written confirmation of compliance and the matter will be closed.

We cannot assure you we will regain compliance with the minimum bid price requirement for continued listing during the second compliance period discussed above. We also cannot assure you our securities will meet all other applicable continued listing requirements to be listed on NASDAQ in the future. If NASDAQ delists our Common Stock from trading on its exchange, we could face significant material adverse consequences including:

- a limited availability of market quotations for our securities;

- a determination that our Common Stock is a "penny stock" which will require brokers trading in our Common Stock to adhere to more stringent rules and possibly resulting in a reduced level of trading activity in the secondary trading market for our Common Stock;

- a limited amount of news and analyst coverage for our company; and

- a decreased ability to issue additional securities or obtain additional financing in the future.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2 PROPERTIES

The following table summarizes the location of real property we lease. We do not own any real property.

Item	Address	Leased/Owned
1	No. 3 Min Zhuang Road, Building 6, Yu Quan Hui Gu Tuspark, Haidian District, Beijing, PRC, 1st Floor	Leased
2	No. 3 Min Zhuang Road, Building 6, Yu Quan Hui Gu Tuspark, Haidian District, Beijing, PRC, 2nd Floor	Leased
3	No. 3 Min Zhuang Road, Building 6, Yu Quan Hui Gu Tuspark, Haidian District, Beijing, PRC, Basement	Leased
4	No. 3 Min Zhuang Road, Building 19, Yu Quan Hui Gu Tuspark, Haidian District, Beijing, PRC, 1st Floor	Leased
5	Unit 601, Building B, Anhui Youth E-commerce Industrial Park, No. 88 Lanzhu Road, Baohe District, Heifei, Anhui Province, PRC	Leased
6	No. 15 First Changzheng Road, Xiaogan City, Hubei Province, PRC, 2 nd Floor	Leased

The properties listed in Items 1, 2 and 3 above are our principal executive offices and are used by all of our business segments. The property listed in Item 4 is used by one of our internet advertising operating VIEs in Beijing. The property listed in Item 5 is used by one of our operating VIEs in Hefei, Anhui Province, and is primarily used by our internet advertising business segment. The property listed in Items 6 is the office for our operating VIEs in Xiaogan, Hubei province, and is primarily used by our internet advertising and TV advertising business segments.

We believe that our existing facilities and equipment are well maintained and in good operating condition, and are sufficient to meet our needs for the foreseeable future.

ITEM 3 LEGAL PROCEEDINGS

On October 26, 2015, Business Opportunity Online, one of our indirect wholly owned VIEs, filed a civil action against Beijing 58 Information Technology Co., Ltd. (“Beijing 58”) in the Chaoyang District People’s Court of Beijing. Business Opportunity Online is seeking a court order to establish that it owns a 17.5% equity interest in Beijing 58, one of the VIEs owned by 58.com Inc. On January 20, 2016, the Chaoyang District People’s Court of Beijing rendered its ruling that Business Opportunity Online did not own 17.5% equity interest in Beijing 58. On February 15, 2016, Business Opportunity Online filed an appeal of the decision in the Beijing Third Intermediate People’s Court. We believe that it is too early and uncertain to assess the potential outcome of this lawsuit.

ITEM 4 MINE SAFETY DISCLOSURES

Not applicable.

PART II.

ITEM 5 MARKET FOR REGISTRANT’S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our Common Stock has been listed on the Nasdaq Capital Market under the symbol “CNET” since October 29, 2013. Prior to that time, from September 14, 2010 through October 28, 2013, our Common Stock was listed on Nasdaq Global Market under the symbol “CNET”. Prior to that time, from March 4, 2010 through September 13, 2010, our Common Stock was listed on the NYSE AMEX under the trading symbol “CNET.” Prior to that time, our Common Stock was quoted on the OTC Bulletin Board (“OTCBB”) under the trading symbol “EMZG”, until August 14, 2009,

when our ticker symbol was change to “CHNT”. The last reported price for our Common Stock on the Nasdaq Capital Market on April 12, 2016 was \$0.67 per share.

The following table shows the high and low closing sale prices for our Common Stock reported by the Nasdaq Capital Market for the two years ended December 31, 2015 and subsequent periods.

Year	Period	High	Low
2014	First Quarter	\$2.19	\$0.75
	Second Quarter	\$1.79	\$0.76
	Third Quarter	\$3.48	\$0.64
	Fourth Quarter	\$3.17	\$1.05
2015	First Quarter	\$2.26	\$1.20
	Second Quarter	\$1.73	\$1.23
	Third Quarter	\$1.31	\$0.77
	Fourth Quarter	\$1.00	\$0.80
2016	First Quarter	\$0.83	\$0.64
	Second Quarter (through April 12, 2016)	\$0.70	\$ 0.65

Holdings

As of April 12, 2016, there were approximately 650 record holders of our Common Stock.

Dividends

We have never paid any dividends on our Common Stock and we plan to retain earnings, if any, for use in the development and growth of our business. Payment of future dividends, if any, will be at the discretion of the board of directors after taking into account various factors, including current financial condition, operating results and current and anticipated cash needs. If we ever determine to pay a dividend, we may experience difficulties in completing the administrative procedures necessary to obtain and remit foreign currency from China for the payment of such dividends from the profits of our PRC subsidiaries and VIEs.

Securities Authorized for Issuance Under Equity Compensation Plans

Additional information required under this item is incorporated herein by reference to Item 12 of this Annual Report on Form 10-K under the heading "Equity Compensation Plan Information."

Equity Repurchases

During the fourth quarter of our fiscal year ended December 31, 2015, neither we nor any "affiliated purchaser" (as defined in Rule 10b-18(a)(3) under the Exchange Act) purchased any shares of our Common Stock, the only class of our equity securities registered pursuant to Section 12 of the Exchange Act.

Recent Sales of Unregistered Securities

Any previous sales of unregistered securities by the Company have been previously disclosed in our reports on Form 10-Q or Form 8-K, as applicable, filed with the SEC.

ITEM 6 SELECTED FINANCIAL DATA

As a smaller reporting company, we are not required to include disclosure under this Item.

ITEM 7 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

You should read the following discussion and analysis of our financial condition and results of operations in conjunction with our audited consolidated financial statements and the related notes to the consolidated financial statements included elsewhere in this Form 10-K. Our audited consolidated financial statements have been prepared in accordance with U.S. GAAP. The following discussion and analysis contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, including, without limitation, statements regarding our expectations, beliefs, intentions or future strategies that are signified by the words "expect," "anticipate," "intend," "believe," or similar language. All forward-looking statements included in this document are based on information available to us on the date hereof, and we assume no obligation to update any such forward-looking statements. Our business and financial performance are subject to substantial risks and uncertainties. Actual results could differ materially from those projected in the forward-looking statements. In evaluating our business, you should carefully consider the information set forth under the heading "Risk Factors" and elsewhere in this Form 10-K. Readers are cautioned not to place undue reliance on these forward-looking statements.

Overview

Our company was incorporated in the State of Texas in April 2006 and re-domiciled to become a Nevada corporation in October 2006. From the date of our company's incorporation until June 26, 2009, when our company consummated the Share Exchange (as defined below), our company's activities were primarily concentrated in web server access and company branding in hosting web based e-games.

On June 26, 2009, our company entered into a Share Exchange Agreement (the "Exchange Agreement"), with (i) China Net Online Media Group Limited, a company organized under the laws of British Virgin Islands ("China Net BVI"), (ii) China Net BVI's shareholders, who together owned shares constituting 100% of the issued and outstanding ordinary shares of China Net BVI (the "China Net BVI Shares") and (iii) G. Edward Hancock, our principal stockholder at such time. Pursuant to the terms of the Exchange Agreement, the China Net BVI Shareholders transferred to us all of the China Net BVI Shares in exchange for the issuance of 13,790,800 shares (the "Exchange Shares") in the aggregate of our common stock (the "Share Exchange"). As a result of the Share Exchange, China Net BVI became our wholly owned subsidiary and we are now a holding company which, through certain contractual arrangements with operating companies in the People's Republic of China (the "PRC"), is engaged in providing advertising, marketing, communication, O2O sales channel expansion and the related data services to SMEs in China.

Our wholly owned subsidiary, China Net BVI, was incorporated in the British Virgin Islands on August 13, 2007. On April 11, 2008, China Net BVI became the parent holding company of a group of companies comprised of CNET Online Technology Limited, a Hong Kong company ("China Net HK"), which established, and is the parent company of, Rise King Century Technology Development (Beijing) Co., Ltd., a wholly foreign-owned enterprise ("WFOE") established in the PRC ("Rise King WFOE"). We refer to the transactions that resulted in China Net BVI becoming an indirect parent company of Rise King WFOE as the "Offshore Restructuring."

PRC regulations prohibit direct foreign ownership of business entities providing internet content, or ICP services in the PRC, and restrict foreign ownership of business entities engaging in the advertising business. To satisfy PRC laws and regulations, we conduct certain business in the PRC through our Variable Interest Entities ("VIEs"). Through a series of contractual agreements (the "Contractual Agreements" or "VIE Agreements") between Rise King WFOE and Business Opportunity Online (Beijing) Network Technology Co., Ltd. ("Business Opportunity Online"), Beijing CNET Online Advertising Co., Ltd. ("Beijing CNET Online") (collectively the "PRC Operating Entities" or the "VIEs") and its common individual owners (the "PRC Shareholders" or the "Control Group"), we, through Rise King WFOE, secure significant rights to influence the PRC Operating Entities' business operations, policies and management, approve all matters requiring shareholder approval, and the right to receive 100% of the income earned by the PRC Operating Entities. In return, Rise King WFOE provides consulting services to the PRC Operating Entities. In addition, to ensure that the PRC Operating Entities and the PRC Shareholders perform their obligations under the Contractual Arrangements, the PRC Shareholders have pledged all of their equity interests in the PRC Operating Entities to Rise King WFOE. They also entered into an option agreement with Rise King WFOE which provides that at such time as when the current restrictions under PRC law on foreign ownership of Chinese companies engaging in the Internet content, information services or advertising business in China are lifted, Rise King WFOE may exercise its option to purchase the equity interests in the PRC Operating Entities, directly.

Pursuant to the Contractual Agreements, all of the equity owners' rights and obligations of the VIEs were assigned to Rise King WFOE, which resulted in the equity owners lacking the ability to make decisions that have a significant effect on the VIEs, Rise King WFOE's ability to extract the profits from the operation of the VIEs and assume the residual benefits of the VIEs. Due to the fact that Rise King WFOE and its indirect parent are the sole interest holders of the VIEs, we included the assets, liabilities, revenues and expenses of the VIEs in our consolidated financial statements, which is consistent with the provisions of FASB Accounting Standards Codification ("ASC") Topic 810, "Consolidation" subtopic 10.

Through our PRC operating subsidiaries, VIEs and VIEs' subsidiaries, we primarily operate a one-stop services for our clients through our integrated service platforms, including multi-channel advertising and promotion platform and social networking and services distribution platform. Our multi-channel advertising and promotion platform primarily consists of internet advertising and marketing portals and our TV production and advertising unit. We provide varieties of marketing campaigns through this platform by the combination of the Internet, mobile, and television, we also generate effective sales leads and provide search engine marketing services through this platform to maximize market exposure and effectiveness for our clients. Our social networking and services distribution platform is an information and service portal for entrepreneurs or any individual who plans to start their own business. It is built to serve the community of entrepreneurs to assist them with developing their business, as well as sharing their resources. We also use this platform to develop the distribution channels for our online to offline (O2O) sales channel expansion services in different cities in the PRC. During the past two years, we developed our SMEs intelligent operation and marketing data service applications, which consists of several online cloud technology based sales, client membership management and other administrative operational management tools specifically designed for small business in China to match their simplicity. We intend to use these applications to create community-based consumption ecosystem, deploy our Big Data collection technologies and analyze offline businesses' operational data and customers' consumption data to help the SMEs improve the conversion rate of the purchase from their clients and provide them with related data services..

Basis of presentation, critical accounting policies and management estimates

Our consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America ("U.S. GAAP") and include the accounts of our company, and all of our subsidiaries and VIEs. We prepare financial statements in conformity with U.S. GAAP, which requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities on the date of the financial statements and the reported amounts of revenues and expenses during the financial reporting period. We continually evaluate these estimates and assumptions based on the most recently available information, our own historical experience and various other assumptions that we believe to be reasonable under the circumstances. Since the use of estimates is an integral component of the financial reporting process, actual results could differ from those estimates. Some of our accounting policies require higher degrees of judgment than others in their application. We consider the policies discussed below to be critical to an understanding of our financial statements.

Comparability due to discontinued operation

We exited our brand management and sales channel building business segment, which qualified for presentation as a discontinued operation in accordance with ASC Topic 205 "Presentation of Financial Statements". As a result, the results of operations of this business was reported in discontinued operation as a separate component in our consolidated statements of operations and comprehensive loss for all periods presented. Certain accounts in the consolidated statements of operations and comprehensive loss for the year ended December 31, 2014 and related notes have been retrospectively adjusted to reflect the effect of reclassification of results of operations reported in discontinued operation as a separate component.

Cash flows from discontinued operation for the years ended December 31, 2015 and 2014 were combined with the cash flows from continuing operations within each of the three categories.

Foreign currency translation and transactions

Our functional currency is United States dollars (“US\$”), and the functional currency of China Net HK is Hong Kong dollars (“HK\$”). The functional currency of our PRC operating subsidiaries and VIEs is Renminbi (“RMB”), and PRC is the primary economic environment in which we operate.

For financial reporting purposes, the financial statements of our PRC operating subsidiaries and VIEs, which are prepared using the RMB, are translated into our reporting currency, the United States Dollar (“U.S. dollar”). Assets and liabilities are translated using the exchange rate at each balance sheet date. Revenue and expenses are translated using average rates prevailing during each reporting period, and stockholders’ equity is translated at historical exchange rates. Adjustments resulting from the translation are recorded as a separate component of accumulated other comprehensive income in stockholders’ equity.

Transactions denominated in currencies other than the functional currency are translated into the functional currency at the exchange rates prevailing at the dates of the transactions. The resulting exchange differences are included in the determination of net income/loss of the consolidated financial statements for the respective periods.

The exchange rates used to translate amounts in RMB into US\$ for the purposes of preparing the consolidated financial statements are as follows:

	As of December 31,	
	2015	2014
Balance sheet items, except for equity accounts	6.4936	6.1190
	Year ended December 31,	
	2015	2014
Items in the statements of income and comprehensive income, and statements of cash flows	6.2284	6.1428

No representation is made that the RMB amounts could have been, or could be converted into US\$ at the above rates.

Impairment of long-lived assets

Long-lived assets, which include tangible long-lived assets and intangible long-lived assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of long-lived assets to be held and used is measured by a comparison of the carrying amount of the asset to the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future undiscounted cash flows, an impairment loss is recognized for the difference between the carrying amount of the asset and its fair value.

Goodwill

Goodwill represents the excess of the purchase price over the fair value of the identifiable assets and liabilities acquired as a result of acquisitions of interests in our subsidiaries.

Goodwill is not depreciated or amortized but is tested for impairment at the reporting unit level at least on an annual basis, and between annual tests when an event occurs or circumstances change that could indicate that the asset might be impaired. The test consists of two steps. First, identify potential impairment by comparing the fair value of the reporting unit to its carrying amount, including goodwill. If the fair value of the reporting unit is greater than its carrying amount, goodwill is not considered impaired. Second, if there is impairment identified in the first step, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill over the implied fair value of goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit in a manner similar to a purchase price allocation, in accordance with ASC Topic 805, "Business Combinations."

Application of a goodwill impairment test requires significant management judgment, including the identification of reporting units, assigning assets and liabilities to reporting units, assigning goodwill to reporting units, and determining the fair value of each reporting unit. The judgment in estimating the fair value of reporting units includes estimating future cash flows, determining appropriate discount rates and making other assumptions. Changes in these estimates and assumptions could materially affect the determination of fair value for each reporting unit.

As discussed before, we have committed to a plan to sell liansuo.com, which is a portion of our internet advertising reporting unit that constitutes a business. In accordance with ASC Topic 350: "Intangibles-Goodwill and Others" Subtopic 20-40, goodwill associated with that business unit shall be included in the carrying amount of the business to determine the gain or loss on disposal. In accordance with ASC 350-20-40-3 through ASC 350-20-40-7, we first allocated goodwill associated with our internet advertising reporting unit to the carrying value of liansuo.com based on the relative fair value of liansuo.com and the portion of this reporting unit that will be retained, and then performed goodwill impairment test for goodwill remaining in the portion of the reporting unit to be retained using its adjusted carrying value.

Fair Value

ASC Topic 820 "Fair Value Measurement and Disclosures," defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. This topic also establishes a fair value hierarchy which requires classification based on observable and unobservable inputs when measuring fair value. There are three levels of inputs that may be used to measure fair value:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Determining which category an asset or liability falls within the hierarchy requires significant judgment. We evaluate our hierarchy disclosures each quarter.

We measure our intangible assets and goodwill at fair value on a nonrecurring basis and they are recorded at fair value using income approach only when impairment is recognized. The fair value of intangible assets and goodwill was determined using income approach by utilizing significant level 3 unobservable internally-developed inputs within the fair value hierarchy. The following table presents the quantitative information of the significant unobservable internally-developed inputs utilized in our level 3 fair value measurement:

	Valuation technique(s)	Unobservable inputs	Ranges
As of December 31, 2015			
Intangible assets	Multi-period Excess Earning	Remaining useful life	1-7 years
		Discount rate	23.0%

Edgar Filing: ChinaNet Online Holdings, Inc. - Form 10-K

		Decline in EBIT without non-compete agreement	10%
		Annual customer attrition rate	15%
Goodwill	Discounted Cash Flow	Projection year	5 years
		Discount rate	23.0%
		Terminal growth rate	3.5%
As of December 31, 2014			
Intangible assets	Multi-period Excess Earning	Remaining useful life	1.17-5.17 years
		Discount rate	24.4%-26.2%
		Decline in EBIT without non-compete agreement	10%
		Annual customer attrition rate	15%
Goodwill	Discounted Cash Flow	Projection year	6 years
		Discount rate	24.4%-26.2%
		Terminal growth rate	3.5%

Revenue recognition

Our revenue recognition policies are in compliance with ASC Topic 605. In accordance with ASC Topic 605, revenues are recognized when all four of the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the service has been rendered, (iii) the fees are fixed or determinable, and (iv) collectability is reasonably assured.

Sales include revenues from selling advertising time purchased from TV stations, internet advertising space on our website portals and effective sales lead information collected, providing online advertising, marketing and other related value added technical services. Advertising contracts establish the fixed price and advertising services to be provided. Pursuant to advertising contracts, we provide advertisement placements in different formats, including but not limited to banners, links, logos, buttons, rich media and content integration in specified locations on the sites and for agreed periods; and/or place the advertisements onto our purchased advertisement time during specific TV programs for agreed periods. Revenue is recognized ratably over the period the advertising is provided and, as such, we consider the services to have been delivered. We treat all elements of advertising contracts as a single unit of accounting for revenue recognition purposes. Value added technical services are provided based on two types of contracts: (i) fixed price and (ii) fixed price with minimum performance threshold. For contracts with fixed price term, revenue is recognized on a pro-rata basis over the engaged service period. For fixed price contracts with minimum performance threshold, revenue is recognized when the specified performance criteria is met. Revenue from search engine marketing services is recognized on a monthly basis based on the direct cost consumed through search engines for providing such services with a premium. We recognize the revenue on a gross basic, as we believe that we act as the primary obligor of this transaction, which is considered the most important factor for a gross revenue recognition in accordance with ASC Topic 605, subtopic 45. Revenues from selling effective sales lead information is recognized based on fixed price per sales lead when information is delivered and accepted by clients. Based upon our credit assessments of our clients prior to entering into contracts, we determine if collectability is reasonably assured. In situations where collectability is not deemed to be reasonably assured, we recognize revenue upon receipt of cash from clients, only after services have been provided and all other criteria for revenue recognition have been met.

Taxation

1.

Income tax

We adopt ASC Topic 740 “Income taxes” and use liability method to account for income taxes. Under this method, deferred tax assets and liabilities are determined based on the difference between the financial reporting and tax bases of assets and liabilities using enacted tax rates that will be in effect in the period in which the differences are expected to reverse. We record a valuation allowance to offset deferred tax assets, if based on the weight of available evidence, it is more-likely-than-not that some portion, or all, of the deferred tax assets will not be realized. The effect on deferred taxes of a change in tax rates is recognized in income statement in the period that includes the enactment date.

We adopt ASC Topic 740-10-25-5 through 740-10-25-7 and 740-10-25-13, which prescribes a more likely than not threshold for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on recognition of income tax assets and liabilities, classification of current and deferred income tax assets and liabilities, accounting for interest and penalties associated with tax positions, accounting for income taxes in interim periods, and income tax disclosures. We did not have any interest and penalties associated with tax positions for the years ended December 31, 2015 and 2014 and did not have any significant unrecognized uncertain tax positions as of December 31, 2015 and 2014.

i). We were incorporated in the State of Nevada. Under the current laws of Nevada, we are not subject to state corporate income tax. We became a holding company and do not conduct any substantial operations of our own after the Share Exchange. No provision for federal corporate income tax has been made in our financial statements as no assessable profits for the year ended December 31, 2015, or any prior periods. We do not provide for U.S. taxes or foreign withholding taxes on undistributed earnings from non-U.S. subsidiaries and VIEs because such earnings are intended to be reinvested indefinitely. If undistributed earnings were distributed, foreign tax credits could become available under current law to reduce the resulting U.S. income tax liability.

ii). China Net BVI was incorporated in the British Virgin Islands (“BVI”). Under the current laws of the BVI, we are not subject to tax on income or capital gains. Additionally, upon payments of dividends by China Net BVI to us, no BVI withholding tax will be imposed.

iii). China Net HK was incorporated in Hong Kong and does not conduct any substantial operations of its own. No provision for Hong Kong profits tax have been made in our financial statements as no assessable profits for the year ended December 31, 2015, or any prior periods. Additionally, upon payments of dividends by China Net HK to its sole shareholder, China Net BVI, no Hong Kong withholding tax will be imposed.

iv). Our PRC operating subsidiaries and VIEs, being incorporated in the PRC, are governed by the income tax law of the PRC and are subject to PRC enterprise income tax (“EIT”). The EIT rate of PRC is 25%, which applies to both domestic and foreign invested enterprises.

In July 2012, Business Opportunity Online was approved by the related PRC governmental authorities as a High and New Technology Enterprise under the current EIT law, and was approved by the local tax authorities of Beijing, the PRC, to be entitled to a favorable statutory tax rate of 15% until December 31, 2014. During 2015, Business Opportunity Online reapplied for the qualification as a High and New Technology Enterprise. In November 2015, Business Opportunity Online received the formal certificate as a High and New Technology Enterprise, which enabled the entity to continue to enjoy the favorable statutory tax rate of 15% until November 2018. Therefore, for the years ended December 31, 2015 and 2014, the applicable income tax rate of Business Opportunity Online was both 15%.

Business Opportunity Online Hubei was approved by the related PRC governmental authorities to be qualified as a software company and was approved by the local tax authorities of Xiaogan City, Hubei province, the PRC, to be entitled to a EIT exemption for fiscal 2012 and a 50% reduction of its applicable EIT rate which is 25% to 12.5% of its taxable income for the succeeding three years through fiscal 2015, as its first profitable year was determined as fiscal 2011 instead of fiscal 2012 in August 2013 by the local tax authorities of Xiaogan City, Hubei province. Therefore, the applicable income tax rate for Business Opportunity Online Hubei was both 12.5% for the years ended December 31, 2015 and 2014. After fiscal 2015, the applicable income tax rate for Business Opportunity Online Hubei will be 25% under the current EIT law of PRC.

The applicable income tax rate for the rest of our PRC operating entities was 25% for the years ended December 31, 2015 and 2014.

The current EIT law also imposed a 10% withholding income tax for dividends distributed by a foreign invested enterprise to its immediate holding company outside China. A lower withholding tax rate will be applied if there is a tax treaty arrangement between mainland China and the jurisdiction of the foreign holding company. Holding companies in Hong Kong, for example, will be subject to a 5% withholding tax rate.

For the years ended December 31, 2015 and 2014, all of the preferential income tax treatments enjoyed by our PRC subsidiaries and VIEs were based on the current applicable laws and regulations of the PRC and approved by the related government regulatory authorities and local tax authorities where our respective PRC subsidiaries and VIEs operate in. Business Opportunity Online and Business Opportunity Online Hubei were most affected by these preferential income tax treatments within the structure of us. The preferential income tax treatments are subject to change in accordance with the PRC government economic development policies and regulations. These preferential income tax treatments are primarily determined by the regulation and policies of the PRC government in the context of the overall economic policy and strategy. As a result, the uncertainty of these preferential income tax treatments are subject to, but not limited to, the PRC government policy on supporting any specific industry's development under the outlook and strategy of overall macroeconomic development.

2. Turnover taxes and the relevant surcharges

Service revenues provided by our PRC operating subsidiaries and VIEs were subject to Value Added Tax (“VAT”). VAT rate for provision of modern services (other than lease of corporeal movables) is 6% and for small scale taxpayer, 3%. Therefore, for the years ended December 31, 2015 and 2014, our service revenues are subject to VAT at a rate of 6%, after deducting the VAT paid for the services purchased from suppliers, or at a rate of 3% without any deduction of VAT paid for the services purchased from suppliers. The surcharges of the VAT is 12%-14% of the VAT, depending on which tax jurisdiction our PRC operating subsidiaries and VIE operate in.

Recent Accounting Pronouncements

In January 2015, the Financial Accounting Standard Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2015-01, “Income Statement -Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items”. This ASU eliminates from GAAP the concept of extraordinary items. The Board concluded that the amendments in this ASU will not result in a loss of information because although the amendments will eliminate the requirements in Subtopic 225-20 for reporting entities to consider whether an underlying event or transaction is extraordinary, the presentation and disclosure guidance for items that are unusual in nature or occur infrequently will be retained and will be expanded to include items that are both unusual in nature and infrequently occurring. The amendments in this ASU are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. A reporting entity may apply the amendments prospectively. A reporting entity also may apply the amendments retrospectively to all prior periods presented in the financial statements. Early adoption is permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The adoption of this standard is not expected to have a material impact on our consolidated financial position or results of operations.

In February 2015, the FASB issued ASU No. 2015-02, “Consolidation (Topic 810): Amendments to the Consolidation Analysis”. The amendment in this ASU changes the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. Overall, the amendments in this ASU are an improvement to current GAAP because they simplify the Codification and reduce the number of consolidation models through the elimination of the indefinite deferral of Statement 167 and because they place more emphasis on risk of loss when determining a controlling financial interest. The amendments in this ASU are effective for public business entities for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. The adoption of this standard is not expected to have a material impact on our consolidated financial position or results of operations.

In August 2015, the FASB issued ASU No. 2015-14, “Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date”. The amendments in this ASU defer the effective date of ASU No. 2014-09 for all entities by one year. ASU No. 2014-09, issued in May 2014, clarifies the principles for recognizing revenue and develops a common revenue standard for U.S. GAAP and IFRS. Simultaneously, this ASU supersedes the revenue recognition requirements in ASC Topic 605-Revenue Recognition and most industry-specific guidance throughout the Industry

Topics of the Codification. The core principle of this ASU requires an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the five steps: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract; (5) recognize revenue when (or as) the entity satisfies a performance obligation. Public business entities, certain not-for-profit entities, and certain employee benefit plans should apply the guidance in this ASU to annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period. Earlier application is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. We are currently evaluating the impact on our consolidated financial position and results of operations upon adopting these amendments.

In September 2015, the FASB issued ASU No. 2015-16, “Business Combination (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments”. The amendments in this ASU require that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The amendments in this ASU require that the acquirer record, in the same period’s financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date, i.e., to simplify the accounting for adjustments made to provisional amounts recognized in a business combination, the amendments in this ASU eliminate the requirement to retrospectively account for those adjustments. The amendments in this ASU require an entity to present separately on the face of the income statement or disclose in the notes the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. For public business entities, the amendments in this ASU are effective for fiscal years beginning after December 15, 2015, including interim periods within those fiscal years. The amendments in this ASU should be applied prospectively to adjustments to provisional amounts that occur after the effective date of ASU with earlier application permitted for financial statements that have not been issued. The adoption of this standard is not expected to have a material impact on our consolidated financial position and results of operations.

In November 2015, the FASB issued ASU No. 2015-17, “Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes”. Current GAAP requires an entity to separate deferred income tax liabilities and assets into current and noncurrent amounts in a classified statement of financial position. To simplify the presentation of deferred income taxes, the amendments in this ASU require that deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. The amendments in this ASU apply to all entities that present a classified statement of financial position. The current requirement that deferred tax liabilities and assets of a tax-paying component of an entity be offset and presented as a single amount is not affected by the amendments in this ASU. For public business entities, the amendments in this ASU are effective for financial statements issued for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Earlier application is permitted for all entities as of the beginning of an interim or annual reporting period. The amendments in this ASU may be applied either prospectively to all deferred tax liabilities and assets or retrospectively to all periods presented. We will adopt the amendments in this ASU from January 1, 2016. The adoption of this standard is not expected to have a material impact on our consolidated financial position and results of operations.

In March 2016, the FASB issued ASU No. 2016-07, “Investments—Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting”. The amendments in this ASU eliminate the requirement that when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by step basis as if the equity method had been in effect during all previous periods that the investment had been held. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor’s previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting. Therefore, upon qualifying for the equity method of accounting, no retroactive adjustment of the investment is required. The amendments in this ASU require that an entity that has an available-for sale equity security that becomes qualified for the equity method of accounting recognize through earnings the unrealized holding gain or loss in accumulated other comprehensive income at the date the investment becomes qualified for use of the equity method. The amendments in this ASU are effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016. The amendments should be applied prospectively upon their effective date to increases in the level of ownership interest or degree of influence that result in the adoption of the equity method. Earlier application is permitted. No additional disclosures are required at transition. The adoption of this standard is not expected to have a material impact on our consolidated financial position or results of operations.

In March 2016, the FASB issued ASU No. 2016-08, “Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)”. The amendments in this ASU do not change the core principle of the guidance. The amendments clarify the implementation guidance on principal versus agent considerations. When another party is involved in providing goods or services to a customer, an entity is required to determine whether the nature of its promise is to provide the specified good or service itself (that is, the entity is a principal) or to arrange for that good or service to be provided by the other party (that is, the entity is an agent). When (or as) an entity that is a principal satisfies a performance obligation, the entity recognizes revenue in the gross amount of consideration to which it expects to be entitled in exchange for the specified good or service transferred to the customer. When (or as) an entity that is an agent satisfies a performance obligation, the entity recognizes revenue in the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the specified good or service to be provided by the other party. An entity is a principal if it controls the specified good or service before that good or service is transferred to a customer. The guidance includes indicators to assist an entity in determining whether it controls a specified good or service before it is transferred to the customer. The amendments in this ASU affect the guidance in ASU No. 2014-09, which is not yet effective. The effective date and transition requirements for the amendments in this ASU are the same as the effective date and transition requirements of ASU No. 2014-09, which is deferred by ASU No. 2015-14 by one year. We are currently evaluating the impact on our consolidated financial position and results of operations upon adopting these amendments.

In March 2016, the FASB issued ASU No. 2016-09, “Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting”. The amendments in this ASU affected all entities that issue share-based payment awards to their employees. The areas for simplification in this ASU involve several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. Some of the areas for simplification apply only to nonpublic entities. For public business entities, the amendments in this ASU are effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Early adoption is permitted for any entity in any interim or annual period. We are currently evaluating the impact on our consolidated financial position and results of operations upon adopting these amendments.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on our consolidated financial statements upon adoption.

A. RESULTS OF OPERATIONS FOR THE YEARS ENDED DECEMBER 31, 2015 AND 2014

The following table sets forth a summary, for the periods indicated, of our consolidated results of operations. Our historical results presented below are not necessarily indicative of the results that may be expected for any future period. All amounts, except number of shares and per share data, are presented in thousands of U.S. dollars.

	Year ended December 31,	
	2015	2014
	US\$	US\$
Revenues		
From unrelated parties	\$31,522	\$37,613
From related parties	743	353
	32,265	37,966
Cost of revenues	24,655	31,671
Gross profit	7,610	6,295
Operating expenses		
Sales and marketing expenses	4,586	6,916
General and administrative expenses	7,498	5,780
Research and development expenses	2,164	2,660
(Gain) on disposal of VIEs	(20)	(266)
Impairment on equity method investments	874	-

REVENUES

The following tables set forth a breakdown of our total revenues, divided into five segments for the periods indicated, with inter-segment transactions eliminated:

Revenue type	Year ended December 31,					
	2015			2014		
	(Amounts expressed in thousands of US dollars, except percentages)					
-Internet advertisement	\$ 19,569	60.7	%	\$ 17,597	46.3	%
-Technical services	363	1.1	%	725	1.9	%
-Search engine marketing service	11,083	34.3	%	12,939	34.1	%
Internet advertisement and related services	31,015	96.1	%	31,261	82.3	%
TV and Bank kiosk advertisement*	1,250	3.9	%	6,705	17.7	%
Total	\$ 32,265	100	%	\$ 37,966	100	%

* Previously, we had four reportable operating segments, which included Internet advertizing, TV advertising, Bank kiosk advertising, and Brand management and sales channel building. As discussed, we exited the bank kiosk advertising and brand management and sale channel building segments, of which the brand management and sale channel building segment qualify for presentation as a discontinued operation, which results of operations was presented as loss from discontinued operations as a separate component in the statements of operations and comprehensive loss for the years ended December 31, 2015 and 2014, respectively. Since the revenue generated from our bank kiosk segment were immaterial, we combined the performance of our bank kiosk segment with our TV advertising segment for the years ended December 31, 2015 and 2014 as presented above.

Total Revenues: Excluding revenue generated from discontinued operation for the years ended December 31, 2015 and 2014, our total revenues decreased to US\$32.3 million for the year ended December 31, 2015 from US\$38.0 million for the year ended December 31, 2014, which represents a 15% decrease. The decrease in our total revenues for the year ended December 31, 2015 was primarily due to the decrease in our TV advertising revenue during the year.

We derive the majority of our advertising service revenues from the sale of advertising space on our internet portals, sales of effective sales lead information, providing search engine marketing (“SEM”) service and other related value added technical support and services and content management services to unrelated third parties and to certain related parties. We also derive revenue from the sale of advertising time purchased from different provincial satellite TV stations. Our advertising and marketing services to related parties were provided in the ordinary course of business on the same terms as those provided to our unrelated customers. For the years ended December 31, 2015 and 2014, our service revenue from related parties in the aggregate was less than 2.5% of the total revenue for each respective

reporting period.

Our advertising service revenues are recorded net of any sales discounts. Sales discounts include volume discounts and other customary incentives offered to our small and medium-sized franchise and merchant clients, including providing them with additional advertising time for their advertisements if we have unused space available on our websites and represents the difference between our official list price and the amount we actually charge our clients. For advertising services, we typically sign service contracts with our small and medium-sized franchisor and other clients that require us to place the advertisements on our portal websites in specified locations on the sites and for agreed periods; and/or place the advertisements onto our purchased advertisement time during specific TV programs for agreed periods. We recognize revenues as the advertisement airs over the contractual term based on the schedule agreed upon with our clients. Revenue from SEM services is recognized on a monthly basis based on the direct cost consumed through search engines for providing such services with a premium. We recognize this revenue on a gross basis, as we believe that we act as the primary obligor of this transaction, which is considered the most important factor for a gross revenue recognition in accordance with ASC Topic 605, subtopic 45. We also sell effective sales lead information to our clients, which is recognized based on fixed price per sales lead when information is delivered and accepted by clients.

The tables below summarize the revenues, cost of revenues, gross profit and net loss generated from each of our VIEs and subsidiaries for the years ended December 31, 2015 and 2014, respectively, with inter-company transactions eliminated:

For the year ended December 31, 2015:

Name of subsidiary or VIE	Revenue from unrelated parties (\$'000)	Revenue from related parties (\$'000)	Total (\$'000)
Rise King WFOE	363	-	363
Business Opportunity Online and subsidiaries	31,000	743	31,743
Beijing CNET Online and subsidiaries	159	-	159
Total revenue	31,522	743	32,265

For the year ended December 31, 2015:

Name of subsidiary or VIE	Cost of Revenues (\$'000)	Gross Profit (\$'000)
---------------------------	---------------------------------	-----------------------------

Rise King WFOE	-	363
Business Opportunity Online and subsidiaries	24,649	7,094
Beijing CNET Online and subsidiaries	6	153
Total	24,655	7,610

For the year ended December 31, 2015:

Name of subsidiary or VIE	Net Loss (\$'000)
Rise King WFOE	(425)
Business Opportunity Online and subsidiaries	(4,441)
Beijing CNET Online and subsidiaries	(110)
ChinaNet Online Holdings, Inc.	(2,742)
Total net loss from continued operations before allocation to the noncontrolling interest	(7,718)
Quanzhou Zhiliang (loss from discontinued operation)	(1,465)
Total net loss before allocation to the noncontrolling interest	(9,183)

For the year ended December 31, 2014:

Name of subsidiary or VIE	Revenue from unrelated parties (\$'000)	Revenue from related parties (\$'000)	Total (\$'000)
Rise King WFOE	725	-	725
Business Opportunity Online and subsidiaries	36,612	353	36,965
Beijing CNET Online and subsidiaries	276	-	276
Total revenue	37,613	353	37,966

For the year ended December 31, 2014:

Name of subsidiary or VIE	Cost of Revenues (\$'000)	Gross Profit (\$'000)
Rise King WFOE	3	722
Business Opportunity Online and subsidiaries	31,655	5,310
Beijing CNET Online and subsidiaries	13	263
Total	31,671	6,295

For the year ended December 31, 2014:

Name of subsidiary or VIE	Net Loss (\$'000)
Rise King WFOE	(53)
Business Opportunity Online and subsidiaries	(6,865)
Beijing CNET Online and subsidiaries	(182)
ChinaNet Online Holdings, Inc.	(5,321)
Total net loss from continued operations before allocation to the noncontrolling interest	(12,421)
Quanzhou Zhiliang (loss from discontinued operation)	(1,471)

Total net loss before allocation to the noncontrolling interest	(13,892)
---	----------

Management considers revenues generated from internet advertising, SEM services and other related technical services as one aggregate business operation and relies upon the consolidated results of all the operations in this business unit to make decisions about allocating resources and evaluating performance.

Internet advertising revenues for the year ended December 31, 2015 were approximately US\$19.60 million, compared to US\$17.6 million for the same period in 2014, represents a 11% increase. During 2015, we continued to place persistent effort in integrating and upgrading our internet advertising and marketing services to our SME clients. As a result, starting from the second fiscal quarter of 2015, the performance of our internet advertising segment improved. Along with eliminating smaller and non-profitable clients, the number of larger customers served by us continued to increase, and our client's average consumption amount for our internet advertising services also increased as compare with that in the same period of last year, which led the increase in our internet advertising revenue for 2015. We will continue to invest in developing new service modules for our clients. We believe that launch of new services in future periods will help to increase our market penetration in the SME segment, thereby continue to increasing our recurring revenues in the future.

Revenues generated from technical services offered by Rise King WFOE were US\$0.36 million and US\$0.73 million for the years ended December 31, 2015 and 2014, respectively, which was insignificant for both the years ended December 31, 2015 and 2014.

Revenue generated from search engine marketing services for the year ended December 31, 2015 and 2014 was approximately US\$11.1 million and US\$12.9 million, respectively. This enhanced third-party search engine marketing service is designed to help our clients select the most effective key words and to prioritize the ranking of the anticipated search engine results on selected key words in order to increase the sales lead conversion rate for our clients' business promotion on both mobile and PC searches. Management believes this service will be an effective supplement to the internet advertising services provided to our clients, and will help increase the overall satisfaction on our services, thereby increasing recurring revenues and number of clients from online advertising and marketing in the future.

For the years ended December 31, 2015 and 2014, total revenues generated from our TV and bank kiosk advertising business was US\$1.25 million and US\$6.71 million, respectively. Our TV advertising revenue decreased to US\$1.09 million for the year ended December 31, 2015 from US\$6.43 million for the same period in 2014. Due to the adoption of a restriction notice to TV shopping infomercials broadcasted in provincial satellite television station, issued by the SARFT in October 2013, which further restricts the content, air time and duration of these infomercials, the demand of TV advertising service from our clients decreased accordingly. We will continue to monitor our clients' needs of the TV advertising services and improve the profitability of this business segment in future periods. For the years ended December 31, 2015 and 2014, revenues from our bank kiosk advertising was approximately US\$0.16 million and US\$0.28 million, respectively. It was not a significant contributor to revenue for both the years ended December 31, 2015 or 2014. We exited the bank kiosk business. We did not report it in our discontinued operation for the years ended December 31, 2015 and 2014, because the performance of this business segment was insignificant.

Cost of Revenues

Our cost of revenues consisted of costs directly related to the offering of our advertising services, marketing services and technical services. The following table sets forth our cost of revenues, divided into five segments, by amount and gross profit ratio for the periods indicated, with inter-segment transactions eliminated:

	Year ended December 31, 2015			2014		
	Revenue	Cost	GP ratio	Revenue	Cost	GP ratio
(Amounts expressed in thousands of US dollars, except percentages)						
-Internet advertisement	\$19,569	12,855	34 %	\$17,597	13,080	26 %
-Technical services	363	-	100%	725	3	100 %
-Search engine marketing service	11,083	10,760	3 %	12,939	12,562	3 %
Internet advertisement and related services	31,015	23,615	24 %	31,261	25,645	18 %
TV and Bank kiosks advertisement*	1,250	1,040	17 %	6,705	6,026	10 %
Total	\$32,265	\$24,655	24 %	\$37,966	\$31,671	17 %

* Previously, we had four reportable operating segments, which included Internet advertng, TV advertising, Bank kiosk advertising, and Brand management and sales channel building. As discussed, we exited the bank kiosk advertising and brand management and sale channel building segments, of which the brand management and sale channel building segment qualify for presentation as a discontinued operation, which results of operations was presented as loss from discontinued operations as a separate component in the statements of operations and comprehensive loss for the years ended December 31, 2015 and 2014, respectively. Since revenue generated from and cost of revenue incurred by our bank kiosk segment were immaterial, we combined the performance of our bank kiosk segment with our TV advertising segment for the years ended December 31, 2015 and 2014 as presented above.

Cost of revenues: Excluding cost of revenues incurred by discontinued operation for the years ended December 31, 2015 and 2014, our total cost of revenues decreased to US\$24.66 million for the year ended December 31, 2015 from US\$31.67 million for the same period in 2014. Our cost of revenues related to our advertising and marketing services primarily consists of internet resources purchased from key search engines and technical services providers related to lead generation, sponsored search, TV advertisement time costs purchased from TV stations and other direct costs associated with providing services. The decrease in our total cost of revenues for the year ended December 31, 2015 was primarily due to the decrease in our TV advertising cost of revenues during the year, which was in line with the decrease in TV advertising revenues during the year as discussed above.

Cost associated with obtaining internet resources was the largest component of our cost of revenue for internet advertisement, accounting for over 80% of our total internet advertisement cost of sales. We purchased these internet resources from other well-known search engines and portal websites in China, such as: Baidu, Qihoo 360 and Sohu (Sogou). The purchase of these internet resources in large volumes allowed us to negotiate discounts with our suppliers. For the years ended December 31, 2015 and 2014, our total cost of sales for internet advertising was US\$12.86 million and US\$13.08 million, respectively. As discussed above, during 2015, we placed persistent effort in integrating and upgrading our internet advertising and marketing services to our clients, along with eliminating smaller and non-profitable clients, the number of larger customers served by us continued to increase, and the average consumption amount for our internet advertising services also increased as compare with that in the same period of last year. As a result, the gross margin rate for our internet advertising revenue increased to 34% for the year ended December 31, 2015, compared to 26% for the same periods of last year.

Costs for search engine marketing services were direct internet resource costs consumed for search engine marketing services provided to clients as described above. We normally charge our clients service fees for this service as a certain percentage of the related direct cost consumed. Gross margin of this service for the years ended December 31, 2015 and 2014 was approximately 3%.

For the years ended December 31, 2015 and 2014, total cost of revenues of our TV and bank kiosk advertising business was US\$1.04 million and US\$6.03 million, respectively. TV advertisement time cost is the largest component of our cost of revenue for TV advertisement revenue. We purchase TV advertisement time from provincial TV stations and resell it to our TV advertisement clients. Our TV advertisement time cost was approximately US\$1.03 million and US\$6.01 million for the years ended December 31, 2015 and 2014, respectively. The decrease in our total TV advertisement time cost was in line with the decrease in our TV advertising revenue for the year ended December 31, 2015 as compared to that in the same periods of 2014. Gross margin rate of our TV business for the years ended December 31, 2015 and 2014 was 5% and 6%, respectively. Cost of revenue of our bank kiosk advertising business was approximately US\$0.01 million for the years ended December 31, 2015 and 2014.

Gross Profit

As a result of the foregoing, our gross profit was US\$7.6 million for the year ended December 31, 2015, compared to US\$6.3 million for the same period in 2014. Our overall gross margin rate increased to 24% for the year ended December 31, 2015, from 17% for the same period in 2014. The increase was a direct result of the increase in the overall gross margin rate of our internet advertising segment to 24% for the year ended December 31, 2015, compared to 18% for the same period in last year.

Operating Expenses and Net Loss

Our operating expenses consist of sales and marketing expenses, general and administrative expenses, research and development expenses, gain on deconsolidation of VIEs and impairment losses on long-term assets and goodwill. The following tables set forth our operating expenses, divided into their major categories by amount and as a percentage of our total revenues for the periods indicated.

We exited our brand management and sales channel building business segment, which qualifies for presentation as a discontinued operation. The result of operations of this business was reported in discontinued operation as a separate component in the consolidated statements of operations and comprehensive loss for all periods presented. As a result, operating expenses amounts in the consolidated statements of operations and comprehensive loss for the year ended December 31, 2014 have been retrospectively adjusted to reflect the effect of reclassification of results of operations reported in discontinued operation as a separate component.

	Year ended December 31, 2015			2014		
	(Amounts expressed in thousands of US dollars, except percentages)					
	Amount		% of total revenue	Amount		% of total revenue
Total Revenues	\$	32,265	100 %	\$	37,966	100 %
Gross Profit		7,610	24 %		6,295	17 %
Sales and marketing expenses		4,586	14 %		6,916	18 %
General and administrative expenses		7,498	23 %		5,780	15 %
Research and development expenses		2,164	7 %		2,660	7 %
Gain on deconsolidation of VIEs		(20)	-		(266)	-
Impairment on equity method investments		874	3 %		-	-
Goodwill impairment and impairment on fixed assets and intangible assets		1,824	5 %		4,193	11 %
Total operating expenses		16,926	52 %		19,283	51 %

Operating Expenses: Our operating expenses was US\$16.9 million and US\$19.3 million for the years ended December 31, 2015 and 2014, respectively.

·Sales and marketing expenses: For the year ended December 31, 2015, our sales and marketing expenses decreased to US\$4.59 million from US\$6.92 million for the same period of 2014. Our sales and marketing expenses primarily consist of advertising expenses for brand development that we pay to different media outlets for the promotion and marketing of our advertising web portals, other advertising and promotional expenses, website server hosting and broadband leasing expenses, staff salaries, staff benefits, performance bonuses, travelling expenses, communication expenses and other general office expenses of our sales department. For the year ended December 31, 2015, the change in our selling expenses was primarily due to the following reasons: (1) the increase in staff salary, bonus, employee related benefit expenses and other general selling expenses, such as travelling expenses, business and entertainment expenses and communication expenses of approximately US\$0.26 million; (2) the decrease in share-based compensation expenses of approximately US\$0.99 million, which was primarily due to recognition of related compensation expense for the restricted common stock granted and vested in December 2014; and (3) the

decrease in our brand marketing expenses of approximately US\$1.60 million, which we spent through key search engines to promote our brand, websites and services. We will continue to actively participate in both domestic and international SME exhibitions and government supported employment promotion programs, which are considered cost-effective ways to build our brand in future years.

General and administrative expenses: General and administrative expenses increased to US\$7.5 million for the year ended December 31, 2015 from US\$5.8 million for the same period in 2014. Our general and administrative expenses primarily consist of salaries and benefits for management, accounting and administrative personnel, office rentals, depreciation of office equipment, professional service fees, maintenance, utilities and other office expenses. For the year ended December 31, 2015, the change in our general and administrative expenses was primarily due to the following reasons: (1) the increased in staff salary and benefit expenses of approximately US\$0.6 million; (2) the increase in general administrative expenses, such as: professional service expenses, depreciation and amortization expenses and general office expenses of approximately US\$1.2 million; (3) the net effect of increase in allowance for doubtful accounts of approximately US\$0.8 million; and (4) the decrease in share-based compensation expenses of approximately US\$0.9 million, which was primarily due to recognition of related compensation expense for the restricted common stock and common stock purchase options granted and vested in December 2014.

Research and development expenses: Research and development expenses were US\$2.2 million and US\$2.7 million for the years ended December 31, 2015 and 2014, respectively. Our research and development expenses primarily consist of salaries and benefits for the research and development staff, equipment depreciation expenses, and office utilities and supplies allocated to our research and development department. For the year ended December 31, 2015, the decrease in research and development expenses was primarily due to the decrease in share-based compensation expenses, which primarily related to the restricted common stock granted and vested in December 2014. We will continue our research and development efforts in expanding, optimizing and enhancing the technology of our portal website, upgrading our advertising and internet management software and further integrating and developing our new data service through operation and marketing data service applications in future years.

Gain on disposal of VIEs: For the years ended December 31, 2015 and 2014, we recognized a gain of approximately US\$0.02 million and US\$0.27 million in relation to deconsolidation of our former VIEs, respectively.

Impairment on equity method investments: We had two equity investment affiliates, Shenzhen Mingshan and Zhao Shang Ke Hubei, based on the facts of the significant decline in level of business activities during 2015, insufficient amount of working capital and the lack of commitment from majority shareholders, these two investment affiliates had become dormant. As a result, we reduced the carrying value of these investments to zero as of December 31, 2015 by recognizing approximately US\$0.87 million of impairment loss for the year ended December 31, 2015.

Goodwill impairment and impairment on fixed assets and intangible assets: For the year ended December 31, 2015, we recognized approximately US\$0.17 million impairment loss on bank kiosk equipment and US\$1.55 million impairment loss on a domain name, which had ceased to be used as of December 31, 2015. For the years ended December 31, 2015 and 2014, we performed annual impairment test on our intangible assets and goodwill. For the year ended December 31, 2015, we recorded approximately US\$0.1 million impairment loss associated with non-compete agreement of our internet advertising reporting unit and recorded no further impairment loss associated with goodwill of our internet advertising reporting unit. For the year ended December 31, 2014, we recorded approximately US\$0.44 million and US\$3.75 million impairment loss for non-compete agreement and goodwill of our internet advertising reporting unit, respectively.

Loss from operations: As a result of the foregoing, our loss from operations was approximately US\$9.32 million and US\$12.99 million for the years ended December 31, 2015 and 2014, respectively.

Interest income: For the years ended December 31, 2015 and 2014, interest income earned was primarily contributed from the approximately US\$3.5 million of term deposit we placed in a major financial institution in the PRC.

Interest expense: For the years ended December 31, 2015 and 2014, interests expenses we paid were primarily related to the approximately US\$0.8 million of short-term bank loan we borrowed from a major financial institution in the PRC to supplement our short-term working capital needs, which was matured in July 2015 with no further extension.

Loss before income tax benefit, equity method investments, noncontrolling interests and discontinued operation:

As a result of the foregoing, our loss before income tax benefit, equity method investment, noncontrolling interest and discontinued operation was approximately US\$9.21 million and US\$12.95 million for the years ended December 31, 2015 and 2014, respectively.

Income tax benefit: We recognized a net income tax benefit of approximately US\$1.50 million and US\$0.48 million for the years ended December 31, 2015 and 2014, respectively. For the years ended December 31, 2015, net income tax benefit included: (1) current income tax expense of approximately US\$0.004 million; and (2) deferred income tax benefit of approximately US\$1.50 million. For the year ended December 31, 2014, net income tax benefit included (1)

current income tax expense of approximately US\$0.19 million; and (2) deferred income tax benefit of approximately US\$0.66 million. For the years ended December 31, 2015 and 2014, (1) deferred income tax benefit recognized in relation to the amortization of the intangible assets identified in the acquisition transactions consummated in previous years was approximately US\$0.14 million and US\$0.17 million, respectively, (2) deferred income tax benefit recognized for provision of impairment losses on intangible assets and equity method investments was approximately US\$0.63 million and US\$0.11 million for the years ended December 31, 2015 and 2014, respectively. We also recognized an approximately US\$0.73 million and US\$0.38 million net deferred income tax benefit in relation to a portion of the net operating losses carry forward incurred by our PRC operating VIEs, which we consider likely to be able to be utilized with respect to future earnings of the entities to which the operating losses relate, after deduction of US\$0.05 million and US\$0.59 million net allowance for the years ended December 31, 2015 and 2014, respectively, which related to the portion of the net operating loss carry forward, that we consider likely not be able to utilized due to insufficient future earnings.

Loss before equity method investments, noncontrolling interests and discontinued operation: As a result of the foregoing, our loss before equity method investment, noncontrolling interest and discontinued operation was approximately US\$7.72 million and US\$12.47 million for the years ended December 31, 2015 and 2014, respectively.

Share of (losses) /income in equity investment affiliates: For the years ended December 31, 2015 and 2014, we beneficially own 23.18% and 25.5% equity interest in Shenzhen Mingshan and Zhao Shang Ke Hubei, respectively. Accordingly, we recognized our pro-rata share of losses in Shenzhen Mingshan of approximately US\$0.002 million US\$0.004 million for the years ended December 31, 2015 and 2014, respectively. For the year ended December 31, 2015, we did not recognize any of our pro-rata shares of loss in Zhao Shang Ke Hubei, as the amount was immaterial. For the year ended December 31, 2014, we recognized our pro-rata share of gain of approximately US\$0.05 million in Zhao Shang Ke Hubei. Given the foregoing, net amount recognized as share of losses in equity investment affiliates was approximately US\$0.002 million for the year ended December 31, 2015, net amount recognized as share of gain in equity investment affiliates was approximately US\$0.05 million for the year ended December 31, 2014.

Net loss from continued operations: As a result of the foregoing, we incurred a net loss of US\$7.72 million and US\$12.42 million for the years ended December 31, 2015 and 2014, respectively.

Loss from discontinued operation, net of income tax: Since we exited our brand management and sales channel building business segment which qualified for presentation as a discontinued operation, the results of operations of this segment was reported as loss from discontinued operations as a separate component in our statements of operations and comprehensive loss for the years ended December 31, 2015 and 2014, respectively. Major line items constituting pre-tax net loss and net loss of the discontinued operation are as follows:

	Year Ended December 31,	
	2015	2014
	US\$('000)US\$('000)	
Revenues	272	931
Cost of revenues	149	603
Total Operating expenses	359	527
Impairment on intangible assets	169	547
Impairment on goodwill	1,117	900
Not loss before income tax benefit	(1,522)	(1,646)
Income tax benefit	57	175
Net loss	(1,465)	(1,471)

Net loss: As a result of the foregoing, for the years ended December 31, 2015 and 2014, we incurred a total net loss from continued and discontinued operations of approximately US\$9.18 million and US\$13.89 million, respectively.

Loss attributable to noncontrolling interest: Beijing Chuang Fu Tian Xia was 51% owned by Business Opportunity Online upon incorporation. For the years ended December 31, 2015 and 2014, net loss allocated to the noncontrolling interest of Beijing Chuang Fu Tian Xia was approximately US\$0.09 million and US\$0.15 million, respectively.

Net loss attributable to ChinaNet Online Holdings, Inc.: Total net loss as adjusted by net loss attributable to the noncontrolling interest shareholders as discussed above yields the net loss attributable to ChinaNet Online Holdings, Inc. Net loss attributable to ChinaNet Online Holdings, Inc. was US\$9.09 million and US\$13.74 million for the years ended December 31, 2015 and 2014, respectively.

B. LIQUIDITY AND CAPITAL RESOURCES

Cash and cash equivalents represent cash on hand and deposits held at call with banks. We consider all highly liquid investments with original maturities of three months or less at the time of purchase to be cash equivalents. As of December 31, 2015, we had cash and cash equivalents of approximately US\$5.5 million and we also have approximately US\$3.3 million of term deposit placed in one of the major financial institutes in China which will expire in July 2016.

Our liquidity needs include (i) net cash used in operating activities that consists of (a) cash required to fund the initial build-out, continued expansion of our network and new services and (b) our working capital needs, which include deposits and advance payments to TV advertising slots and internet resource providers, payment of our operating expenses and financing of our accounts receivable; and (ii) net cash used in investing activities that consist of the payment for acquisitions to further expand our business and client base, investment in software technologies to enhance the functionality of the management tools for providing our advertising, marketing and data services and to secure the safety of our general network, and investment in other general office equipment. To date, we have financed our liquidity need primarily through proceeds from operating activities we generated. Our existing cash is adequate to fund operations for the next twelve months.

The following table provides detailed information about our net cash flow for the periods indicated:

	Year ended December 31, 2015 2014	
	Amounts in thousands of US dollars	
Net cash provided by operating activities	\$5,732	\$1,958
Net cash (used in)/provided by investing activities	(4,627)	891
Net cash used in financing activities	(131)	(1,257)
Cash and cash equivalents included in assets held for sale	(189)	-
Effect of foreign currency exchange rate changes on cash	(319)	3
Net increase in cash and cash equivalents	\$466	\$1,595

Net cash provided by operating activities:

For the year ended December 31, 2015, our net cash provided by operating activities of approximately US\$5.73 million were primarily attributable to:

net loss excluding approximately US\$1.77 million of non-cash expenses of depreciation, amortizations; approximately US\$2.26 million share-based compensation; approximately US\$0.09 million of provision for (1) doubtful accounts; approximately US\$1.56 million of net deferred income tax benefit and approximately US\$3.98 million impairment loss on goodwill, intangibles, fixed assets and equity investments, approximately US\$0.02 million gain on deconsolidation of VIE, of approximately US\$2.60 million;

(2) the receipt of cash from operations from changes in operating assets and liabilities, such as:

other receivables decreased by approximately US\$6.37 million, which was primarily due to subsequent collection of TV advertisement deposit and prepayment receivable related to a contract expired on December 31, 2014;

prepayment and deposit to suppliers decreased by approximately US\$1.48 million, primarily due to decrease in contractual deposit amount paid to internet resources providers in 2015 as compared to that in 2014;

- advance from customers increased by approximately US\$1.15 million;

other current assets decreased, other current liabilities increased by approximately US\$0.28 million in the aggregate;
and

we recognized an approximately US\$0.14 million contingent liabilities related to possible additional internet
-resources cost that might be incurred due to the fact that more likely than not we may not able to meet the minimum
consumption amount requirement set forth in a purchase contract.

(3) offset by the use from operations from changes in operating assets and liabilities such as:

accounts receivable and due from related parties for advertising services provided increased by approximately
US\$0.57 million; and

- accounts payable decreased by approximately US\$0.51 million.

For the year ended December 31, 2014, our net cash provided by operating activities of approximately US\$1.96
million were primarily attributable to:

net loss excluding approximately US\$1.44 million of non-cash expenses of depreciation, amortizations;
approximately US\$4.84 million share-based compensation; approximately US\$0.86 million of reversal of bad
debts provisions; approximately US\$0.05 million of share of income in equity investment affiliates; approximately
(1) US\$0.27 million gain in deconsolidation of VIE, approximately US\$0.85 million of net deferred income tax benefit
and approximately SU\$5.64 million impairment loss on goodwill and intangibles, of approximately US\$4.00
million;

(2) the receipt of cash from operations from changes in operating assets and liabilities such as:

other receivables decreased by approximately US\$1.37 million, which was primarily due to collection of the
marketing campaign related loan made for the production of the TV series “Xiao Zhan Feng Yun”;

accounts receivable and due from related parties for the advertising and marketing services provided decreased by
approximately US\$5.68 million due to subsequent collection;

- accounts payable increased by approximately US\$0.39 million; and

- other payables increased by approximately US\$0.32 million.

(3) offset by the use from operations from changes in operating assets and liabilities such as:

deposit and prepayment to suppliers increased by approximately US\$1.50 million, which was primarily for the purchasing of internet resources from key search engines in China;

- advance from customers decreased by approximately US\$0.12 million;

- taxes payable decreased by approximately US\$0.08 million; and

other current assets increased by approximately US\$0.04 million, accrued payroll and expenses decreased by approximately US\$0.06 million.

Net cash (used in)/provided by investing activities:

For the year ended December 31, 2015, our cash used in investing activities included the following transactions: (1) we spent approximately US\$0.36 million for the purchase of general office equipment and expenditures on leasehold improvements; (2) we paid approximately US\$2.78 million to settle the remaining balance related to the purchasing of software technology, which transaction consummated in December 2014 and US\$1.10 million for purchasing of software products related to cloud video management system and other general office software; (3) we received approximately US\$0.77 million prepayment refund related to a software development contract terminated in November 2015; and (3) we made investments of approximately US\$1.16 million in the aggregate to our cost/equity method investees during the year. In the aggregate, these transactions resulted in a net cash outflow from investing activities of approximately US\$4.63 million for the year ended December 31, 2015.

For the year ended December 31, 2014, our cash provided by investing activities included the following transactions: (1) we spent approximately US\$0.28 million for purchase of general office equipment and expenditures on leasehold improvements; (2) we prepaid approximately US\$0.85 million for the development of software systems related to internet environment monitoring, network security and system optimization to enhance the overall safety and efficiency of our network system; (3) we collected approximately US\$0.79 million of short-term loan that we lent to an unrelated entity in last year; (4) we made an investment of approximately US\$0.02 million in a cost method investee during the year; (5) we collected approximately US\$1.6 million of receivables related to disposal of two of our former VIEs in November 2013; and (6) the cash effect of deconsolidation of a VIE in 2014 of approximately US\$0.36 million, which was recorded as a cash outflow from investing activities. In the aggregate, these transactions resulted in a net cash inflow from investing activities of approximately US\$0.89 million for the year ended December 31, 2014.

Net cash used in financing activities:

For the year ended December 31, 2015, our net cash used in financing activities was approximately US\$0.13 million which primarily consisted of the following transactions: (1) we repaid our short-term bank loan of approximately US\$0.80 million that matured on September 29, 2015; (2) we repaid approximately US\$0.31 million of the remaining balance due to the noncontrolling interest of one of our VIEs in relation to the working capital loan we borrowed in previous years; and (3) we received approximately US\$0.98 million guarantee payment and prepayment from two of our new investors in relation to the security purchase agreements we entered into with them in May 2015. In the aggregate, these transactions resulted in a net cash outflow from financing activities of approximately US\$0.13 million for the year ended December 31, 2015.

For the year ended December 31, 2014, our net cash used in financing activities was approximately US\$1.26 million which primarily consisted of the following transactions: (1) we repaid our short-term bank loan of approximately US\$0.81 million that matured on July 31, 2014; (2) we renew the short-term bank loan of approximately US\$0.81 million on September 30, 2014, which expired on September 29, 2015; (3) we borrowed approximately US\$0.72 million from the noncontrolling interest of one of our VIEs to supplement the short-term working capital needs of this VIE; (4) we repaid approximately US\$0.08 million to this noncontrolling interest of our VIE during the year; and (5) we repaid approximately US\$1.89 million of the former inter-company loan to our former VIE. In the aggregate, these transactions resulted in a net cash outflow from financing activities of approximately US\$1.26 million for the year ended December 31, 2014.

Restricted Net Assets

As most of our operations are conducted through our PRC subsidiaries and VIEs, our ability to pay dividends is primarily dependent on receiving distributions of funds from our PRC subsidiaries and VIEs. Relevant PRC statutory laws and regulations permit payments of dividends by our PRC subsidiaries and VIEs only out of their retained earnings, if any, as determined in accordance with PRC accounting standards and regulations and after it has met the

PRC requirements for appropriation to statutory reserves. Paid in capital of the PRC subsidiaries and VIEs included in our consolidated net assets are also not distributable for dividend purposes.

In accordance with the PRC regulations on Enterprises with Foreign Investment, a WFOE established in the PRC is required to provide certain statutory reserves, namely general reserve fund, the enterprise expansion fund and staff welfare and bonus fund which are appropriated from net profit as reported in the enterprise's PRC statutory accounts. A WFOE is required to allocate at least 10% of its annual after-tax profit to the general reserve until such reserve has reached 50% of its registered capital based on the enterprise's PRC statutory accounts. Appropriations to the enterprise expansion fund and staff welfare and bonus fund are at the discretion of the board of directors. The aforementioned reserves can only be used for specific purposes and are not distributable as cash dividends. Rise King WFOE is subject to the above mandated restrictions on distributable profits. Additionally, in accordance with the Company Law of the PRC, a domestic enterprise is required to provide a statutory common reserve of at least 10% of its annual after-tax profit until such reserve has reached 50% of its registered capital based on the enterprise's PRC statutory accounts. A domestic enterprise is also required to provide for a discretionary surplus reserve, at the discretion of the board of directors. The aforementioned reserves can only be used for specific purposes and are not distributable as cash dividends. All of our PRC VIEs are subject to the above mandated restrictions on distributable profits.

As a result of these PRC laws and regulations, our PRC subsidiaries and VIEs are restricted in their ability to transfer a portion of their net assets to us. As of December 31, 2015 and 2014, net assets restricted in the aggregate, which includes paid-in capital and statutory reserve funds of our PRC subsidiaries and VIEs that are included in our consolidated net assets, was approximately US\$6.7 million and US\$7.3 million, respectively.

The New PRC Enterprise Income Tax (“EIT”) Law, which was effected on January 1, 2008, also imposed a 10% withholding income tax for dividends distributed by a foreign invested enterprise to its immediate holding company outside China, which were exempted under the previous EIT law. A lower withholding tax rate will be applied if there is a tax treaty arrangement between mainland China and the jurisdiction of the foreign holding company. Holding companies in Hong Kong, for example, will be subject to a 5% rate.

The ability of our PRC subsidiaries to make dividends and other payments to us may also be restricted by changes in applicable foreign exchange and other laws and regulations.

Foreign currency exchange regulation in China is primarily governed by the following rules:

- Foreign Exchange Administration Rules (1996), as amended in August 2008, or the Exchange Rules;
- Administration Rules of the Settlement, Sale and Payment of Foreign Exchange (1996), or the Administration Rules.

Currently, under the Administration Rules, Renminbi is freely convertible for current account items, including the distribution of dividends, interest payments, trade and service related foreign exchange transactions, but not for capital account items, such as direct investments, loans, repatriation of investments and investments in securities outside of China, unless the prior approval of the State Administration of Foreign Exchange (the “SAFE”) is obtained and prior registration with the SAFE is made. Foreign-invested enterprises like Rise King WFOE that need foreign exchange for the distribution of profits to its shareholders may effect payment from their foreign exchange accounts or purchase and pay foreign exchange rates at the designated foreign exchange banks to their foreign shareholders by producing board resolutions for such profit distribution. Based on their needs, foreign-invested enterprises are permitted to open foreign exchange settlement accounts for current account receipts and payments of foreign exchange along with specialized accounts for capital account receipts and payments of foreign exchange at certain designated foreign exchange banks.

Although the current Exchange Rules allow the convertibility of Chinese Renminbi into foreign currency for current account items, conversion of Chinese Renminbi into foreign exchange for capital items, such as foreign direct investment, loans or securities, requires the approval of SAFE, which is under the authority of the People’s Bank of China. These approvals, however, do not guarantee the availability of foreign currency conversion. We cannot be sure that it will be able to obtain all required conversion approvals for our operations or the Chinese regulatory authorities

will not impose greater restrictions on the convertibility of Chinese Renminbi in the future. Currently, most of our retained earnings are generated in Renminbi. Any future restrictions on currency exchanges may limit our ability to use retained earnings generated in Renminbi to make dividends or other payments in U.S. dollars or fund possible business activities outside China.

As of December 31, 2015 and 2014, there were approximately US\$22.9 million and US\$30.8 million retained earnings in the aggregate, respectively, which were generated by our PRC subsidiaries and VIEs in Renminbi included in our consolidated net assets, aside from US\$2.8 million statutory reserve funds as of December 31, 2015 and 2014, that may be affected by increased restrictions on currency exchanges in the future and accordingly may further limit our PRC subsidiaries' or VIEs' ability to make dividends or other payments in U.S. dollars to us, in addition to the approximately US\$6.7 million and US\$7.3 million restricted net assets as of December 31, 2015 and 2014, respectively, as discussed above.

C. Off-Balance Sheet Arrangements

None.

D. Disclosure of Contractual Obligations

The following table sets forth our company's operating lease commitment as of December 31, 2015:

	Office Rental US\$('000)
Year ending December 31,	
-2016	237
-2017	110
	347

In May 2015, we entered into a contract to purchase software products related to cloud video management system from an unrelated third party with a total contract amount of RMB9.5 million (approximately US\$1.5 million). As of December 31, 2015, we had paid in the aggregate of RMB6.65 million (approximately US\$1.02 million) in accordance with the payment schedule set forth in the contract. The transaction as contemplated under the contract is expected to be consummated in 2016 and the remaining unpaid contract amount is expected to be paid in 2016.

In November 2015, we entered into a contract to engage an unrelated third party to develop software systems related to Internet operation safety, information exchange security and data encryption and management. The total contract amount was RMB13 million (approximately US\$2 million). We have paid approximately RMB9.1 million (approximately US\$1.4 million) during the first fiscal quarter of 2016. The transaction as contemplated under the contract is expected to be consummated in 2016 and the remaining unpaid contract amount is expected to be paid in 2016.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As a smaller reporting company, we are not required to include disclosure under this Item.

ITEM 8 FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Consolidated Financial Statements

Our consolidated financial statements and the notes thereto begin on page F-1 of this Annual Report.

ITEM 9 CHANGES IN AND DISAGREEMENTS WITH ACCOUNTS ON ACCOUNTING AND FINANCIAL DISCLOSURES

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Disclosure Controls and Procedures

Our chief executive officer and chief financial officer, with the participation of other members of management, evaluated the effectiveness of our disclosure controls and procedures, as defined in Exchange Act Rules 13a-15(e) and 15d-15(e), as of the end of December 31, 2015. Based on this evaluation, our chief executive officer and chief financial officer concluded as of December 31, 2015 that our disclosure controls and procedures were effective such that the material information required to be included in our SEC reports is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms relating to our company, including our consolidating subsidiaries and VIEs, and was made known to them by others within those entities, particularly during the period when this report was being prepared.

Management's Report on Internal Control over Financial Reporting

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer, management conducted an evaluation of the effectiveness of its internal control over financial reporting as of December 31, 2015. The framework on which such evaluation was based is contained in the report entitled "Internal Control — Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework). Based on the criteria set forth in the COSO Report, management assessed the effectiveness of the Company's internal control over financial reporting, as of December 31, 2015, and determined it to be effective.

Changes in Internal Controls over Financial Reporting

There were no significant changes in our internal controls over financial reporting identified in connection with this evaluation that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

Attestation Report of the Registered Public Accounting Firm

This Annual Report does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. As a smaller reporting company, the management's report is not subject to attestation by our registered public accounting firm.

ITEM 9B. OTHER INFORMATION

None.

PART III.

Certain information required by Part III is omitted from this Annual Report on Form 10-K since we intend to file our definitive Proxy Statement for our next Annual Meeting of Stockholders, pursuant to Regulation 14A of the Securities Exchange Act of 1934, as amended (the “Proxy Statement”), within 120 days of the end of the fiscal year covered by this report, and certain information to be included in the Proxy Statement is incorporated herein by reference.

ITEM 10 DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information set forth in the Proxy Statement under the captions Election of Directors—Nominees of the Board of Directors; Election of Directors—Section 16(a) Beneficial Ownership Compliance; Election of Directors—Board Operations; and Election of Directors—Board Committees is incorporated herein by reference.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Audit Committee of the

Board of Directors and Shareholders

of ChinaNet Online Holdings, Inc.

We have audited the accompanying consolidated balance sheets of ChinaNet Online Holdings, Inc. (the “Company”) as of December 31, 2015 and 2014, and the related consolidated statements of operations and comprehensive loss, changes in equity and cash flows for the years then ended. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company, as of December 31, 2015 and 2014, and the consolidated results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

1. Organization and nature of operations

ChinaNet Online Holdings, Inc. (the “Company”) was incorporated in the State of Texas in April 2006 and re-domiciled to become a Nevada corporation in October 2006. From the date of the Company’s incorporation until June 26, 2009, when the Company consummated the Share Exchange (discussed below), the Company’s activities were primarily concentrated in web server access and company branding in hosting web based e-games.

On June 26, 2009, the Company entered into a Share Exchange Agreement (the “Exchange Agreement”), with (i) China Net Online Media Group Limited, a company organized under the laws of British Virgin Islands (“China Net BVI”), (ii) China Net BVI’s shareholders, who together owned shares constituting 100% of the issued and outstanding ordinary shares of China Net BVI (the “China Net BVI Shares”) and (iii) G. Edward Hancock, the principal stockholder of the Company at that time. Pursuant to the terms of the Exchange Agreement, the China Net BVI Shareholders transferred to the Company all of the China Net BVI Shares in exchange for the issuance of 13,790,800 shares (the “Exchange Shares”) in the aggregate of the Company’s common stock (the “Share Exchange”). As a result of the Share Exchange, China Net BVI became a wholly owned subsidiary of the Company and the Company is now a holding company, which, through certain contractual arrangements with operating companies in the People’s Republic of China (the “PRC”), is engaged in providing advertising, marketing, communication, online to offline (O2O) sales channel expansion and the related data services to small and medium enterprises (“SMEs”) in China.

The Company’s wholly owned subsidiary, China Net BVI was incorporated in the British Virgin Islands on August 13, 2007. On April 11, 2008, China Net BVI became the parent holding company of a group of companies comprised of CNET Online Technology Limited, a Hong Kong company (“China Net HK”), which established and is the parent company of Rise King Century Technology Development (Beijing) Co., Ltd., a wholly foreign-owned enterprise (“WFOE”) established in the PRC (“Rise King WFOE”). The Company refers to the transactions that resulted in China Net BVI becoming an indirect parent company of Rise King WFOE as the “Offshore Restructuring.”

PRC regulations prohibit direct foreign ownership of business entities providing internet content, or ICP services in the PRC, and restrict foreign ownership of business entities engaging in the advertising business. To satisfy PRC laws and regulations, the Company conducts certain business in the PRC through its Variable Interest Entities (“VIEs”). Through a series of contractual agreements (the “Contractual Agreements” or “VIE Agreements”) between Rise King WFOE and Business Opportunity Online (Beijing) Network Technology Co., Ltd. (“Business Opportunity Online”), Beijing CNET Online Advertising Co., Ltd. (“Beijing CNET Online”) (collectively the “PRC Operating Entities” or the “VIEs”) and its common individual owners (the “PRC Shareholders” or the “Control Group”), the Company, through Rise King WFOE, secures significant rights to influence the PRC Operating Entities’ business operations, policies and management, approve all matters requiring shareholder approval, and the right to receive 100% of the income earned by the PRC Operating Entities. In return, Rise King WFOE provides consulting services to the PRC Operating Entities. In addition, to ensure that the PRC Operating Entities and the PRC Shareholders perform their obligations under the Contractual Arrangements, the PRC Shareholders have pledged all of their equity interests in the PRC Operating Entities to Rise King WFOE. They also entered into an option agreement with Rise King WFOE which provides that at such time as when the current restrictions under PRC law on foreign ownership of Chinese companies engaging in the Internet content, information services or advertising business in China are lifted, Rise King WFOE

may exercise its option to purchase the equity interests in the PRC Operating Entities, directly.

Pursuant to the Contractual Agreements, all of the equity owners' rights and obligations of the VIEs were assigned to Rise King WFOE, which resulted in the equity owners lacking the ability to make decisions that have a significant effect on the VIEs, Rise King WFOE's ability to extract the profits from the operation of the VIEs and assume the residual benefits of the VIEs. Due to the fact that Rise King WFOE and its indirect parent are the sole interest holders of the VIEs, the Company included the assets, liabilities, revenues and expenses of the VIEs in its consolidated financial statements, which is consistent with the provisions of FASB Accounting Standards Codification ("ASC") Topic 810 "Consolidation", subtopic 10.

As of December 31, 2015, the Company's VIE, Beijing CNET Online is a 51% shareholder of Shanghai Borongdingsi Computer Technology Co., Ltd. ("Shanghai Borongdingsi"), a 19% shareholder of Guohua Shiji (Beijing) Communication Co., Ltd. ("Guohua Shiji"), a 10% stockholder of Chuangshi Meiwei (Beijing) International Investment Management Co., Ltd. ("Chuangshi Meiwei") and a 10% shareholder of Beijing Saturday Education Technology Co., Ltd. ("Beijing Saturday"). Business Opportunity Online is a 51% shareholder of Beijing Chuang Fu Tian Xia Network Technology Co., Ltd. ("Beijing Chuang Fu Tian Xia"), the sole shareholder of Business Opportunity Online (Hubei) Network Technology Co., Ltd. ("Business Opportunity Online Hubei"), the sole shareholder of Quanzhou City Zhilang Network Technology Co., Ltd. ("Quanzhou Zhi Lang"), the sole shareholder of Beijing Chuang Shi Xin Qi Advertising Media Co., Ltd. ("Beijing Chuang Shi Xin Qi"), the sole shareholder of Beijing Hong Da Shi Xing Network Technology Co., Ltd. ("Beijing Hong Da Shi Xing"), the sole shareholder of Beijing Shi Ji Cheng Yuan Advertising Media Co., Ltd. ("Beijing Shi Ji Cheng Yuan") and a 23.18% shareholder of Shenzhen City Mingshan Network Technology Co., Ltd. ("Shenzhen Mingshan"). Business Opportunity Online Hubei is the sole shareholder of Hubei CNET Advertising Media Co., Ltd. ("Hubei CNET"), the sole shareholder of Sheng Tian Network Technology (Hubei) Co., Ltd. ("Sheng Tian Hubei") and a 25.5% shareholder of Zhao Shang Ke Network Technology (Hubei) Co., Ltd. ("Zhao Shang Ke Hubei").

During 2015, the Company incorporated two new wholly-owned investment holding companies, ChinaNet Investment Holding Ltd, a British Virgin Islands company ("ChinaNet Investment BVI"), and ChinaNet Online Holdings Co., Ltd., a PRC company ("ChinaNet Online PRC"). ChinaNet Investment BVI co-incorporated ChinaNet Online Holdings Korea ("ChinaNet Korea") with three unaffiliated individuals and beneficially own 40% equity interest in ChinaNet Korea. ChinaNet Online PRC co-incorporated ChinaNet Chuang Tou (Shenzhen) Co., Ltd. ("ChinaNet Chuang Tou") with two unaffiliated individuals and beneficially own 19% equity interest in ChinaNet Chuang Tou. As of the date hereof, these companies are still in its setup period and have not started its operations, respectively.

The Company operated its business primarily in China through its PRC subsidiaries and PRC operating entities, or VIEs as discussed above.

2. Variable Interest Entities

To satisfy PRC laws and regulations, the Company conducts certain business in the PRC through its Variable Interest Entities ("VIEs").

Risks in Relation to the VIE Structure

The Ministry of Commerce of PRC ("MOFCOM") published a discussion draft of the proposed Foreign Investment Law (the "Draft") in January 2015 aiming to, upon its enactment, replace the trio of existing laws regulating foreign investment in China. The Draft embodies an expected PRC regulatory trend to rationalize its foreign investment regulatory regime in line with prevailing international practice and the legislative efforts to unify the corporate legal requirements for both foreign and domestic investments.

The MOFCOM is currently soliciting comments on the Draft and substantial uncertainties exist with respect to its enactment timetable, interpretation and implementation. The Draft, if enacted as proposed, may materially impact the viability of the Company's current corporate structure, corporate governance and business operations. The Draft expands the definition of foreign investment and introduces the principle of "actual control" in determining whether a company is considered a Foreign Investment Enterprise ("FIE").

Under the Draft, VIEs that are controlled via contractual arrangement would be deemed as FIEs, if they are ultimately "controlled" by foreign investors. Therefore, for any companies with a VIE structure in an industry category that falls under restricted to foreign investment or prohibited from foreign investment, the VIE structure may be deemed legitimate only if the ultimate controlling person(s) is/are of PRC nationality (either PRC companies or PRC citizens).

Conversely, if the actual controlling person(s) is/are of foreign nationalities, then the VIEs will be treated as FIEs and any operation in the industry category falls under restricted to foreign investment or prohibited from foreign investment, without market entry clearance may be considered as illegal. Moreover, for the enterprises which are not incorporated under the laws of China (foreign investors) but are "controlled" by Chinese investors, they may submit documentary evidence to apply for identifying their investment as the investment by Chinese investors when they applying for the market entry clearance to engage in any investment as set out in industries restricted to foreign investment or prohibited from foreign investment in China. The competent authorities of foreign investment will grant the review opinion on whether the said investment is identified as the investment by Chinese investors.

In conclusion, if the Draft enacted as proposed, it is possible that the Company's conduct of certain of its operations and businesses through the VIEs could be found by PRC authorities to be in violation of PRC laws and regulations prohibiting or restricting foreign ownership of companies that engage in such operations and businesses. If such a finding were made, regulatory authorities with jurisdiction over the licensing and operation of such businesses would have broad discretion in dealing with such a violation, including levying fines, confiscating the Company's income, revoking the business or operating licenses of the affected businesses, requiring the Company to restructure its ownership structure or operations, or requiring the Company to discontinue all or any portion of its operations. Any of these actions could cause significant disruption to the Company's business operations, and have a material adverse impact on the Company's cash flows, financial position and operating performance. The Company's management considers the possibility of such a finding by PRC regulatory authorities to be remote.

These contractual arrangements may not be as effective in providing the Company with control over the VIEs as direct ownership. Due to its VIE structure, the Company has to rely on contractual rights to effect control and management of the VIEs, which exposes it to the risk of potential breach of contract by the shareholders of the VIEs for a number of reasons. For example, their interests as shareholders of the VIEs and the interests of the Company may conflict and the Company may fail to resolve such conflicts; the shareholders may believe that breaching the contracts will lead to greater economic benefit for them; or the shareholders may otherwise act in bad faith. If any of the foregoing were to happen, the Company may have to rely on legal or arbitral proceedings to enforce its contractual rights, including specific performance or injunctive relief, and claiming damages. Such arbitral and legal proceedings may cost substantial financial and other resources, and result in a disruption of its business, and the Company cannot assure that the outcome will be in its favor. In addition, as all of these contractual arrangements are governed by PRC law and provide for the resolution of disputes through either arbitration or litigation in the PRC, they would be interpreted in accordance with PRC law and any disputes would be resolved in accordance with PRC legal procedures. The legal environment in the PRC is not as developed as in other jurisdictions, such as the United States. As a result, uncertainties in the PRC legal system could further limit the Company's ability to enforce these contractual arrangements. Furthermore, these contracts may not be enforceable in China if PRC government authorities or courts take a view that such contracts contravene PRC laws and regulations or are otherwise not enforceable for public policy reasons. In the event that the Company is unable to enforce any of these agreements, the Company would not be able to exert effective control over the affected VIEs and consequently, the results of operations, assets and liabilities of the affected VIEs and their subsidiaries would not be included in the Company's consolidated financial statements. If such were the case, the Company's cash flows, financial position and operating performance would be materially adversely affected.

The Company's agreements with respect to its consolidated VIEs are approved and in place. The Company's management believes that such agreements are enforceable, and considers it a remote possibility that PRC regulatory authorities with jurisdiction over the Company's operations and contractual relationships would find the agreements to be unenforceable under existing laws.

The significant terms of the VIE Agreements are summarized below:

Exclusive Business Cooperation Agreements: Pursuant to the Exclusive Business Cooperation Agreements entered into by and between Rise King WFOE and each of the PRC Operating Entities, Rise King WFOE has the exclusive right to provide to the PRC Operating Entities complete technical support, business support and related consulting services during the term of these agreements, which includes but is not limited to technical services, business consultations, equipment or property leasing, marketing consultancy system integration, product research and development, and system maintenance. In exchange for such services, each PRC Operating Entity has agreed to pay a service fee to Rise King WFOE equal to 100% of the net income of each PRC Operating Entity. Adjustments may be made upon approval by Rise King WFOE based on services rendered by Rise King WFOE and operational needs of the PRC Operating Entities. The payment shall be made on a monthly basis, if at year end, after an audit of the financial statements of any PRC Operating Entities, there is determined to be any shortfall in the payment of 100% of the annual net income, such PRC Operating Entity shall pay such shortfall to Rise King WFOE. Each agreement has a ten-year term. The term of these agreements may be extended if confirmed in writing by Rise King WFOE, prior to the expiration of the term. The extended term shall be determined by Rise King WFOE, and the PRC Operating

Entities shall accept such extended term unconditionally.

Exclusive Option Agreements: Under the Exclusive Option Agreements entered into by and among Rise King WFOE, each of the PRC Shareholders irrevocably granted to Rise King WFOE or its designated person an exclusive option to purchase, to the extent permitted by PRC law, a portion or all of their respective equity interest in any PRC Operating Entities for a purchase price of RMB 10, or a purchase price to be adjusted to be in compliance with applicable PRC laws and regulations. Rise King WFOE, or its designated person, has the sole discretion to decide when to exercise the option, whether in part or in full. Each of these agreements has a ten-year term, subject to renewal at the election of Rise King WFOE.

Equity Pledge Agreements: Under the Equity Pledge Agreements entered into by and among Rise King WFOE, the PRC Operating Entities and each of the PRC Shareholders, the PRC Shareholders pledged all of their equity interests in the PRC Operating Entities to guarantee the PRC Operating Entities' performance of its obligations under the Exclusive Business Cooperation Agreements. If the PRC Operating Entities or any of the PRC Shareholders breaches its/his/her respective contractual obligations under these agreements, or upon the occurrence of one of the events regarded as an event of default under each such agreement, Rise King WFOE, as pledgee, will be entitled to certain rights, including the right to dispose of the pledged equity interests. The PRC Shareholders of the PRC Operating Entities agreed not to dispose of the pledged equity interests or take any actions that would prejudice Rise King WFOE's interest, and to notify Rise King WFOE of any events or upon receipt of any notices which may affect Rise King WFOE's interest in the pledge. Each of the equity pledge agreements will be valid until all the payments related to the services provided by Rise King WFOE to the PRC Operating Entities due under the Exclusive Business Cooperation Agreements have been fulfilled. Therefore, the equity pledge agreements shall only be terminated when the payments related to the ten-year Exclusive Business Cooperation Agreement are paid in full and the WFOE does not intend to extend the term of the Exclusive Business Cooperation Agreement.

Irrevocable Powers of Attorney: The PRC Shareholders have each executed an irrevocable power of attorney to appoint Rise King WFOE as their exclusive attorneys-in-fact to vote on their behalf on all PRC Operating Entities matters requiring shareholder approval. The term of each power of attorney is valid so long as such shareholder is a shareholder of the respective PRC Operating Entity.

As a result of these VIE Agreements, the Company through its wholly-owned subsidiary, Rise King WFOE, was granted with unconstrained decision making rights and power over key strategic and operational functions that would significantly impact the PRC Operating Entities or the VIEs' economic performance, which includes, but is not limited to, the development and execution of the overall business strategy; important and material decision making; decision making for merger and acquisition targets and execution of merger and acquisition plans; business partnership strategy development and execution; government liaison; operation management and review; and human resources recruitment and compensation and incentive strategy development and execution. Rise King WFOE also provides comprehensive services to the VIEs for their daily operations, such as operational technical support, office automation technical support, accounting support, general administration support and technical support for products and services. As a result of the Exclusive Business Cooperation Agreements, the Equity Pledge Agreements and the Exclusive Option Agreements, the Company will bear all of the VIEs' operating costs in exchange for 100% of the net income of the VIEs. Under these agreements, the Company has the absolute and exclusive right to enjoy economic benefits similar to equity ownership through the VIE Agreements with our PRC Operating Entities and their shareholders.

Summarized below is the information related to the consolidated VIEs' assets and liabilities as of December 31, 2015 and 2014, respectively:

	As of December 31,

F-13

All of the VIEs' assets can be used to settle obligations of their primary beneficiary. Liabilities recognized as a result of consolidating these VIEs do not represent additional claims on the Company's general assets.

Summarized below is the information related to the financial performance of the VIEs reported in the Company's consolidated statements of operations and comprehensive loss for the years ended December 31, 2015 and 2014, respectively:

	Year Ended December 31, 2015 2014 US\$('000)US\$('000)	
Revenues	\$31,902	\$37,241
Cost of revenues	24,655	31,669
Total operating expenses (including impairment and other losses of long-lived assets and goodwill, impairment loss on equity investments and gain on deconsolidation of VIEs)	13,387	13,184
Loss from discontinued operations ⁽²⁾	1,465	1,471
Net loss before allocation to noncontrolling interests	6,016	8,518

- (1) In the fourth quarter of 2015, in order to focus all the Company's resources on its core business, which is Internet advertising, marketing and the related technical and data services, and to obtain sufficient working capital to continue the expansion of the services distribution channels and to support the development of the data services, the Company decided to sell its 51% equity interest in Beijing Chuang Fu Tia Xia, one of the Company's operating VIEs, which is primarily engaged in providing Internet advertising and marketing services through one of the Company's advertising portal, www.liansuo.com ("liansuo.com"). The Company does not consider the sale of liansuo.com is a strategic shift that has (or will have) a major effect on the Company's operations and financial results, as it is not a significant portion of the Company's Internet advertising business segment, therefore, not qualifying for presentation as a discontinued operation. As a result, in accordance with ASC Topic 360: "Property, Plant and Equipment", the Company classified the assets and liabilities related to the disposal group as held for sale in the consolidated balance sheets as of December 31, 2015 but did not included its results of operations in discontinued operations for all period presented.

- (2) For the same reason as discussed above, in addition to committed a plan to sell liansuo.com, the Company also decided to exit its bank kiosk advertising and offline brand management and sales channel building business segments, which businesses were operated by the Company through its operating VIEs. The Company does not consider the exit from its bank kiosk advertising business qualifying for presentation as a discontinued operation as its effect on the Company's operations and financial results was and will be insignificant. Therefore, in accordance with ASC Topic 205: "Presentation of Financial Statements", the results of operations of brand management and sales channel building were reported in discontinued operations as a separate component in the consolidated statements of operations and comprehensive loss for all periods presented.

F-14

3. Summary of significant accounting policies

a) Basis of presentation

The consolidated financial statements are prepared and presented in accordance with generally accepted accounting principles in the United States of America (“U.S. GAAP”).

As discussed in Note 2, the Company exited its brand management and sales channel building business segment, which qualified for presentation as a discontinued operation in accordance with ASC Topic 205. As a result, the results of operations of this business was reported in discontinued operation as a separate component in the Company’s consolidated statements of operations and comprehensive loss for all periods presented.

b) Principles of consolidation

The consolidated financial statements include the financial statements of all the subsidiaries and VIEs of the Company. All transactions and balances between the Company and its subsidiaries and VIEs have been eliminated upon consolidation. According to the agreements between Beijing CNET Online and Shanghai Borongdingsi, although Beijing CNET Online legally owns 51% of Shanghai Borongdingsi’s interests, Beijing CNET Online only controls the assets and liabilities related to the bank kiosks business, which has been included in the financial statements of Beijing CNET Online, but does not control other assets of Shanghai Borongdingsi, thus, Shanghai Borongdingsi’s financial statements were not consolidated by the Company.

c) Comparability due to discontinued operation

Certain accounts in the consolidated statements of operations and comprehensive loss for the year ended December 31, 2014 and related notes have been retrospectively adjusted to reflect the effect of reclassification of results of operations reported in discontinued operation as a separate component. See Note 26 for the related detail disclosures.

Cash flows from discontinued operation for the years ended December 31, 2015 and 2014 were combined with the cash flows from continuing operations within each of the three categories.

d) Use of estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the related disclosure of contingent assets and liabilities at the date of these consolidated financial statements, and the reported amounts of revenue and expenses during the reporting period. The Company continually evaluates these estimates and assumptions based on the most recently available information, historical experience and various other assumptions that the Company believes to be reasonable under the circumstances. Since the use of estimates is an integral component of the financial reporting process, actual results could differ from those estimates.

e) Foreign currency translation and transactions

The functional currency of the Company is United States dollars (“US\$”), and the functional currency of China Net HK is Hong Kong dollars (“HK\$”). The functional currency of the Company’s PRC operating subsidiaries and VIEs is Renminbi (“RMB”), and PRC is the primary economic environment in which the Company operates.

For financial reporting purposes, the financial statements of the Company’s PRC operating subsidiaries and VIEs, which are prepared using the RMB, are translated into the Company’s reporting currency, the United States Dollar (“U.S. dollar”). Assets and liabilities are translated using the exchange rate at each balance sheet date. Revenue and expenses are translated using average rates prevailing during each reporting period, and stockholders’ equity is translated at historical exchange rates. Adjustments resulting from the translation are recorded as a separate component of accumulated other comprehensive income in stockholders’ equity.

Transactions denominated in currencies other than the functional currency are translated into the functional currency at the exchange rates prevailing at the dates of the transactions. The resulting exchange differences are included in the determination of net loss of the consolidated statements of operations and comprehensive loss for the respective periods.

The exchange rates used to translate amounts in RMB into US\$ for the purposes of preparing the consolidated financial statements are as follows:

	As of December 31,	
	2015	2014
Balance sheet items, except for equity accounts	6.4936	6.1190

	Year ended December 31,	
	2015	2014
Items in the statements of income and comprehensive income, and statements of cash flows	6.2284	6.1428

No representation is made that the RMB amounts could have been, or could be converted into US\$ at the above rates.

f) Cash and cash equivalents

Cash and cash equivalents consist of cash on hand and bank deposits, which are unrestricted as to withdrawal and use. The Company considers all highly liquid investments with original maturities of three months or less at the time of purchase to be cash equivalents.

g) Term deposits

Term deposits consist of bank deposits with an original maturity of between three to twelve months.

h) Accounts and other receivable, net

Accounts receivable and other receivables are recorded at net realizable value consisting of the carrying amount less an allowance for uncollectible accounts as needed. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in the Company's existing accounts receivable and other receivables. The Company determines the allowance based on aging data, historical collection experience, customer specific facts and economic conditions. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. The Company did not have any off-balance-sheet credit exposure relating to its customers, suppliers or others.

i)

Long-term Investments

Equity method investments

Investee companies that are not consolidated, but over which the Company exercises significant influence, are accounted for under the equity method of accounting in accordance to ASC Topic 323 "Equity Method and Joint Ventures". Whether or not the Company exercises significant influence with respect to an investee depends on an evaluation of several factors including, among others, representation on the investee companies' board of directors and ownership level, which is generally a 20% to 50% interest in the voting securities of the investee companies. Under the equity method of accounting, an investee company's accounts are not reflected within the Company's consolidated balance sheets and statements of operations and comprehensive loss; however, the Company's share of the income or losses of the investee company is reflected in the caption "Share of income (losses) in equity investment affiliates" in the consolidated statements of operations and comprehensive loss. The Company's carrying value (including advance to the investee) in equity method investee companies is recorded in the caption "Long-term investments" in the Company's consolidated balance sheets.

When the Company's carrying value in an equity method investee company is reduced to zero, no further losses are recorded in the Company's consolidated financial statements unless the Company guaranteed obligations of the investee company or has committed additional funding. When the investee company subsequently reports income, the Company will not record its share of such income until it equals the amount of its share of losses not previously recognized.

Cost method investments

Investee companies that are not consolidated, and over which the Company does not exercise significant influence, are accounted for under the cost method of accounting in accordance to ASC Topic 325 subtopic 20: "Investments-Other: Cost Method Investments". The Company generally owns less than 20% interest in the voting securities of the cost method investee companies. Under the cost method of accounting, the Company records the cost method investments at cost in the caption "Long-term investments" in the Company's consolidated balance sheets, and only adjusts for other-than-temporary declines in fair value of investee companies and distributions of earnings from investee companies.

Impairment for long-term investments

The Company assesses its long-term investments for other-than-temporary impairment by considering factors including, but not limited to, current economic and market conditions, operating performance and financial position of the investee companies, including current earnings trends and undiscounted cash flows, and other company-specific information. The fair value determination, particularly for investments in privately-held companies, requires significant judgment to determine appropriate estimates and assumptions. Changes in these estimates and assumptions could affect the calculation of the fair value of the investments and determination of whether any identified impairment is other-than-temporary. The impairment to be recognized is measured by the amount by which the carrying values of the long-term investments exceed the fair value of the long-term investments.

For the year ended December 31, 2015, the Company recorded approximately US\$0.87 million of impairment loss associated with its equity method investments. For the year ended December 31, 2014, the Company did not recognize any of such loss.

j)

Property and equipment, net

Property and equipment are recorded at cost less accumulated depreciation and amortization. Depreciation is calculated on the straight-line method after taking into account their respective estimated residual values over the

following estimated useful lives:

Leasehold improvements (in years)	3
Vehicles (in years)	5
Office equipment (in years)	3- 5
Electronic devices (in years)	5

Depreciation expenses are included in selling expenses, general and administrative expenses and research and development expenses. Leasehold improvements are amortized over the lesser of the lease term or estimated useful life.

When property and equipment are retired or otherwise disposed of, resulting gain or loss is included in net income or loss in the period of disposition. When property and equipment are retired or otherwise disposed of, the cost and accumulated depreciation are removed from the accounts. Maintenance and repairs which do not improve or extend the expected useful lives of the assets are charged to expenses as incurred, whereas the cost of renewals and betterments that extend the useful life of the assets are capitalized as additions to the related assets.

k)

Intangible assets, net

Purchased software and software platform is initially recorded at cost and amortized on a straight-line basis over the estimated useful economic life.

Intangible assets other than goodwill acquired through various acquisitions are amortized on a straight-line basis over their expected useful economic lives.

Contract Backlog (in years)	0.6- 0.7
Customer Relationship (in years)	5 - 9
Non-Compete Agreement (in years)	5 - 6
Software Technologies (in years)	5

The Company accounted for website development costs in accordance with ASC Topic 350-50, which requires that certain costs related to the development or purchase of internal-use software and systems as well as the costs incurred in the application development stage related to its website be capitalized and amortized over the estimated useful life of the software or system. ASC Topic 350-50 also require that costs related to the preliminary project stage, data conversion and post implementation/operation stage of an internal-use software development project be expensed as incurred. For the years ended December 31, 2015 and 2014, the Company did not capitalize any such cost, as the amount was considered immaterial.

l) Impairment of long-lived assets

Long-lived assets, which include tangible long-lived assets and intangible long-lived assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of long-lived assets to be held and used is measured by a comparison of the carrying amount of the asset to the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future undiscounted cash flows, an impairment loss is recognized for the difference between the carrying amount of the asset and its fair value.

For the years ended December 31, 2015 and 2014, excluding loss recognized for intangible assets that ceased to be used as discussed in Note 3(n), the Company recorded approximately US\$101,000 and US\$442,000 impairment loss associated with intangible assets of its internet advertising reporting unit. The Company also recorded approximately US\$169,000 and US\$547,000 impairment loss in the results of operations of discontinued operation for the years ended 2015 and 2014, respectively, which related to intangible assets of its brand management and sales channel building reporting unit. See Note 3 (q) and Note 11 for detailed disclosures about the impaired intangible assets and the related valuation technique(s) and inputs used in the fair value measurement for these intangible assets.

m) Goodwill

Goodwill represents the excess of the purchase price over the fair value of the identifiable assets and liabilities acquired as a result of the Company's acquisitions of interests in its consolidated VIEs.

Goodwill is not depreciated or amortized but is tested for impairment at the reporting unit level at least on an annual basis, and between annual tests when an event occurs or circumstances change that could indicate that the asset might

be impaired. The test consists of two steps. First, identify potential impairment by comparing the fair value of the reporting unit to its carrying amount, including goodwill. If the fair value of the reporting unit is greater than its carrying amount, goodwill is not considered impaired. Second, if there is impairment identified in the first step, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill over the implied fair value of goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit in a manner similar to a purchase price allocation, in accordance with ASC Topic 805 "Business Combinations."

Application of a goodwill impairment test requires significant management judgment, including the identification of reporting units, assigning assets and liabilities to reporting units, assigning goodwill to reporting units, and determining the fair value of each reporting unit. The judgment in estimating the fair value of reporting units includes estimating future cash flows, determining appropriate discount rates and making other assumptions. Changes in these estimates and assumptions could materially affect the determination of fair value for each reporting unit.

The Company's respective goodwill is directly attributable to its internet advertising reporting unit and brand management and sales channel building reporting unit. For the years ended December 31, 2015 and 2014, the Company performed its annual test on goodwill impairment for these two reporting units on December 31, 2015 and 2014, respectively.

As discussed in Note 2, the Company exited its brand management and sales channel building business, for the years ended December 31, 2015 and 2014, the Company recorded approximately US\$1,117,000 and US\$900,000 impairment loss in the results of operations of discontinued operation, respectively, which associated with goodwill of its brand management and sales channel building reporting unit. Full goodwill impairment provision had been provided for goodwill associated with this reporting unit as of December 31, 2015.

As also discussed in Note 2, the Company has committed to a plan to sell liansuo.com, which is a portion of the Company's internet advertising reporting unit that constitutes a business. In accordance with ASC Topic 350: "Intangibles-Goodwill and Others" Subtopic 20-40, goodwill associated with that business unit shall be included in the carrying amount of the business to determine the gain or loss on disposal. In accordance with ASC 350-20-40-3 through ASC 350-20-40-7, the Company first allocated approximately US\$914,000 goodwill associated with its internet advertising reporting unit to the carrying value of liansuo.com based on the relative fair value of liansuo.com and the portion of this reporting unit that will be retained, and then performed goodwill impairment test for goodwill remaining in the portion of the reporting unit to be retained using its adjusted carrying value.

For the year ended December 31, 2015, the Company did not record any further impairment loss for goodwill associated with internet advertising reporting unit. For the year ended December 31, 2014, the Company recorded approximately US\$3,751,000 impairment loss for goodwill associated with internet advertising reporting unit. See Note 3 (q) and Note 13 for detailed disclosures about the impairment of goodwill and the related valuation technique(s) and inputs used in the fair value measurement for the Company's goodwill.

n) Long-term assets to be disposed of

In accordance with ASC Topic 360, for a long-lived asset to be disposed of other than by sale, the Company continues to be classified as held and used until it is disposed of. When a long-lived asset ceases to be used, the carrying amount of the asset is written down to its salvage value, if any.

For the years ended December 31, 2015, the Company recorded approximately US\$172,000 and US\$1,551,000 loss associated with fixed assets and intangible assets, respectively, that ceased to be used during the year. For the year ended December 31, 2014, the Company did not recognize any of such loss.

In accordance with ASC Topic 360, the Company classifies for a long-lived asset or disposal group to be sold as held for sale in the period in which all six criteria are met: (1) a plan to sell the asset (disposal group) has been committed to by management, who have the authority to approve the action; (2) the asset (disposal group) can be sold in its current condition; (3) an active plan has been initiated to find a buyer; (4) it is probable that the asset (disposal group) will be sold and the sale will be completed within one year and will qualify as a complete sale; (5) the sales price is reasonable relative to the asset's current fair value and the entity is actively marketing the asset (disposal group); and (6) it is unlikely that the plan to sell the asset will be withdraw or changed significantly.

The Company presented assets and liabilities of a disposal group classified as held for sale (but not qualifying for presentation as a discontinued operation) separately in the asset and liability section, respectively, of the balance sheets of the current period and disclosed the major classes of assets and liabilities classified as held for sale and other required detailed disclosures in Note 9.

The Company measures a long-lived asset or disposal group classified as held for sale at the lower of its carrying amount or fair value less cost to sell. Long-lived assets classified as held for sale are not depreciated or amortized. The Company did not recognize any expected loss associated with the disposal group classified as held for sale, as the fair value of the disposal group less cost to sell exceeded the carrying amount of the disposal group including goodwill allocated to the disposal group.

o)

Deconsolidation

The Company accounts for deconsolidation of subsidiaries in accordance with ASC Topic 810 “Consolidation”.

F-19

In accordance with ASC Topic 810-10-40-5, the parent shall account for the deconsolidation of a subsidiary by recognizing a gain or loss in net income attributable to the parent, measured as the difference between:

a. The aggregate of all of the following:

1. The fair value of any consideration received;

2. The fair value of any retained noncontrolling investment in the former subsidiary at the date the subsidiary is deconsolidated;

3. The carrying amount of any noncontrolling interest in the former subsidiary (including any accumulated other comprehensive income attributable to the noncontrolling interest) at the date the subsidiary is deconsolidated.

b. The carrying amount of the former subsidiary's assets and liabilities.

For the years ended December 31, 2015 and 2014, the Company recorded approximately US\$0.02 million and US\$0.27 million gain on disposal of its former VIEs, respectively.

p)

Noncontrolling interest

The Company accounts for noncontrolling interest in accordance with ASC Topic 810-10-45, which requires the Company to present noncontrolling interests as a separate component of total shareholders' equity on the consolidated balance sheet and the consolidated net income/(loss) attributable to the parent and the noncontrolling interest be clearly identified and presented on the face of the consolidated statement of operations and comprehensive income/(loss) statement. ASC Topic 810-10-45 also requires that losses attributable to the parent and the noncontrolling interest in a subsidiary be attributed to those interests even if it results in a deficit noncontrolling interest balance.

q)

Fair value

The Company's financial instruments primarily consist of cash and cash equivalents, accounts receivable, other receivables, prepayment and deposits, accounts payable, advances from customers, accruals and other payables. The carrying values of these financial instruments approximate fair values due to their short maturities.

ASC Topic 820 "Fair Value Measurement and Disclosures," defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. This topic also establishes a fair value hierarchy which requires classification based on observable and unobservable inputs when measuring fair value. There are three levels of inputs that may be used to measure fair value:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Determining which category an asset or liability falls within the hierarchy requires significant judgment. The Company evaluates its hierarchy disclosures each quarter.

The Company's intangible assets and goodwill are measured at fair value on a nonrecurring basis and they are recorded at fair value using income approach only when impairment is recognized.

The fair value of intangible assets and goodwill was determined using income approach. The following table summarizes the quantitative information about the Company's Level 3 fair value measurements, which utilize significant unobservable internally-developed inputs:

	Valuation technique(s)	Unobservable inputs	Ranges
As of December 31, 2015			
Intangible assets	Multi-period Excess Earning	Remaining useful life (in years)	1 - 7
		Discount rate	23.0%
		Decline in EBIT without non-compete agreement	10%
		Annual customer attrition rate	15%
Goodwill	Discounted Cash Flow	Projection year (in years)	5
		Discount rate	23.0%
		Terminal growth rate	3.5%
As of December 31, 2014			
Intangible assets	Multi-period Excess Earning	Remaining useful life (in years)	1.17 - 5.17
		Discount rate	24.4% - 26.2%
		Decline in EBIT without non-compete agreement	10%
		Annual customer attrition rate	15%
Goodwill	Discounted Cash Flow	Projection year (in years)	6
		Discount rate	24.4% - 26.2%
		Terminal growth rate	3.5%

r)

Revenue recognition

The Company's revenue recognition policies are in compliance with ASC Topic 605 "Revenue Recognition". In accordance with ASC Topic 605, revenues are recognized when the four of the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the service has been rendered, (iii) the fees are fixed or determinable, and (iv) collectability is reasonably assured.

Sales include revenues from selling advertising time purchased from TV stations, internet advertising space on the Company's website portals and effective sales lead information collected, providing online advertising, marketing and other related value added technical services. Advertising contracts establish the fixed price and advertising services to be provided. Pursuant to advertising contracts, the Company provides advertisement placements in different formats, including but not limited to banners, links, logos, buttons, rich media and content integration in specified locations on the sites and for agreed periods; and/or places the advertisements onto purchased advertisement time during specific TV programs for agreed periods. Revenue is recognized ratably over the period the advertising is provided and, as such, the Company considers the services to have been delivered. The Company treats all elements of advertising contracts as a single unit of accounting for revenue recognition purposes. Value added technical services are provided based on two types of contracts: (i) fixed price and (ii) fixed price with minimum performance threshold. For contracts with fixed price term, revenue is recognized on a pro-rata basis over the engaged service period. For fixed price contracts with minimum performance threshold, revenue is recognized when the specified performance criteria is met. Revenue from search engine marketing services is recognized on a monthly basis based on the direct cost consumed through search engines for providing such services with a premium. The Company recognizes the revenue on a gross basis, as the Company believes that it acts as the primary obligor of this transaction, which is considered the most important factor for a gross revenue recognition in accordance with ASC Topic 605, subtopic 45. Revenue from selling effective sales lead information is recognized based on fixed price per sales lead when information is delivered and accepted by clients. Based upon the Company's credit assessments of its clients prior to entering into contracts, the Company determines if collectability is reasonably assured. In situations where collectability is not deemed to be reasonably assured, the Company recognizes revenue upon receipt of cash from clients, only after services have been provided and all other criteria for revenue recognition have been met.

s) Cost of revenues

Cost of revenues primarily includes the cost of media advertising time, internet advertisement related resources and other technical services purchased from third parties and other direct cost associated with providing services.

t) Advertising costs

Advertising costs for the Company's own brand building are not includable in cost of revenues, they are expensed when incurred or amortized over the estimated beneficial period and are included in "sales and marketing expenses" in the statement of operations and comprehensive loss. For the years ended December 31, 2015 and 2014, advertising expenses for the Company's own brand building were approximately US\$2,353,000 and US\$3,938,000, respectively.

u) Research and development expenses

The Company accounts for the cost of developing and upgrading technologies and platforms and intellectual property that are used in its daily operations in research and development cost. Research and development costs are charged to expense when incurred. Expenses for research and development for the years ended December 31, 2015 and 2014

were approximately US\$2,164,000 and US\$2,660,000, respectively.

v)

Income taxes

The Company follows the guidance of ASC Topic 740 “Income taxes” and uses liability method to account for income taxes. Under this method, deferred tax assets and liabilities are determined based on the difference between the financial reporting and tax bases of assets and liabilities using enacted tax rates that will be in effect in the period in which the differences are expected to reverse. The Company records a valuation allowance to offset deferred tax assets, if based on the weight of available evidence, it is more-likely-than-not that some portion, or all, of the deferred tax assets will not be realized. The effect on deferred taxes of a change in tax rates is recognized in statement of income and comprehensive income in the period that includes the enactment date.

w)

Uncertain tax positions

The Company follows the guidance of ASC Topic 740 “Income taxes”, which prescribes a more likely than not threshold for financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This Interpretation also provides guidance on recognition of income tax assets and liabilities, classification of current and deferred income tax assets and liabilities, accounting for interest and penalties associated with tax positions, accounting for income taxes in interim periods, and income tax disclosures.

The Company recognizes interest on non-payment of income taxes under requirement by tax law and penalties associated with tax positions when a tax position does not meet the minimum statutory threshold to avoid payment of penalties. The tax returns of the Company's PRC subsidiaries and VIEs are subject to examination by the relevant tax authorities. According to the PRC Tax Administration and Collection Law, the statute of limitations is three years if the underpayment of taxes is due to computational errors made by the taxpayer or the withholding agent. The statute of limitations is extended to five years under special circumstances, where the underpayment of taxes is more than RMB100,000. In the case of transfer pricing issues, the statute of limitation is ten years. There is no statute of limitation in the case of tax evasion. The Company did not have any material interest or penalties associated with tax positions for the years ended December 31, 2015 and 2014 and did not have any significant unrecognized uncertain tax positions as of December 31, 2015 and 2014, respectively.

x) Share-based Compensation

The Company accounted for share-based compensation to employees in accordance with ASC Topic 718 "Compensation-Stock Compensation" which requires that share-based payment transactions be measured based on the grant-date fair value of the equity instrument issued, net of an estimated forfeiture rate, if applicable, and therefore only recognizes compensation expenses for those equity instruments expected to vest over the requisite service period, or vesting period. Forfeitures are estimated at the time of grant and revised in the subsequent periods if actual forfeitures differ from those estimates. Cost of services received from non-employees is measured at fair value at the earlier of the performance commitment date or the date service is completed and recognized over the period the service is provided.

y) Comprehensive income

The Company accounts for comprehensive income in accordance with ASC Topic 220 "Comprehensive Income", which establishes standards for reporting and displaying comprehensive income and its components in the consolidated financial statements. Comprehensive income is defined as the change in equity of a company during a period from transactions and other events and circumstances excluding transactions resulting from investments from owners and distributions to owners. Accumulated other comprehensive income, as presented in the Company's consolidated balance sheets are the cumulative foreign currency translation adjustments.

z) Earnings (loss) per share

Earnings (loss) per share are calculated in accordance with ASC Topic 260, "Earnings Per Share". Basic earnings (loss) per share is computed by dividing income (loss) attributable to common stockholders by the weighted average number of shares of common stock outstanding during the period. Diluted earnings per share reflect the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. Common shares issuable upon the conversion of the convertible preferred shares are included in the computation of diluted earnings per share on an "if-converted" basis when the impact is dilutive. The dilutive effect of outstanding

common stock warrants and options are reflected in the diluted earnings per share by application of the treasury stock method when the impact is dilutive.

aa)

Discontinued operations

The Company has adopted ASC Topic 205 “Presentation of Financial Statements” Subtopic 20-45, in determining whether any of its business component(s) classified as held for sale, disposed of by sale or other than by sale is required to be reported in discontinued operations. In accordance with ASC Topic 205-20-45-1, A discontinued operation may include a component of an entity or a group of components of an entity, or a business or nonprofit activity. A disposal of a component of an entity or a group of components of an entity is required to be reported in discontinued operations if the disposal represents a strategic shift that has (or will have) a major effect on an entity’s operations and financial results when any of the following occurs: (1) the component of an entity or group of components of an entity meets the criteria to be classified as held for sale; (2) the component of an entity or group of components of an entity is disposed of by sale; (3) the component of an entity or group of components of an entity is disposed of other than by sale (for example, by abandonment or in a distribution to owners in a spinoff).

For any component classified as held for sale or disposed by sale or other than by sale that qualifying for presentation as a discontinued operation in the period, the Company adopts ASC Topic 205-20-45-3 and reports the results of operations of the discontinued operations (including any gain or loss recognized on the disposal or loss recognized on classification as held for sale of a discontinued operation), less applicable income taxes (benefit), as a separate component in the statement where net income (loss) is reported for current and all prior periods presented.

bb)

Commitments and contingencies

The Company has adopted ASC Topic 450 “Contingencies” subtopic 20, in determining its accruals and disclosures with respect to loss contingencies. Accordingly, estimated losses from loss contingencies are accrued by a charge to income when information available prior to issuance of the financial statements indicates that it is probable that a liability have been incurred and the amount of the loss can be reasonably estimated. Legal expenses associated with the contingency are expensed as incurred. If a loss contingency is not probable or reasonably estimable, disclosure of the loss contingency is made in the financial statements when it is at least reasonably possible that a material loss could be incurred.

cc)

Recent accounting standards

In January 2015, the Financial Accounting Standard Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2015-01, “Income Statement - Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items”. This ASU eliminates from GAAP the concept of extraordinary items. The Board concluded that the amendments in this ASU will not result in a loss of information because although the amendments will eliminate the requirements in Subtopic 225-20 for reporting entities to consider whether an underlying event or transaction is extraordinary, the presentation and disclosure guidance for items that are unusual in nature or occur infrequently will be retained and will be expanded to include items that are both unusual in nature and infrequently occurring. The amendments in this ASU are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. A reporting entity may apply the amendments prospectively. A reporting entity also may apply the amendments retrospectively to all prior periods presented in the financial statements. Early adoption is permitted provided that the guidance is applied from the beginning of the fiscal year of adoption. The adoption of this standard is not expected to have a material impact on the Company’s consolidated financial position or results of operations.

In February 2015, the FASB issued ASU No. 2015-02, “Consolidation (Topic 810): Amendments to the Consolidation Analysis”. The amendment in this ASU changes the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. Overall, the amendments in this ASU are an improvement to current GAAP because they simplify the Codification and reduce the number of consolidation models through the elimination of the indefinite deferral of Statement 167 and because they place more emphasis on risk of loss when determining a controlling financial interest. The amendments in this ASU are effective for public business entities for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. The adoption of this standard is not expected to have a material

impact on the Company's consolidated financial position or results of operations.

In August 2015, the FASB issued ASU No. 2015-14, "Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date". The amendments in this ASU defer the effective date of ASU No. 2014-09 for all entities by one year. ASU No. 2014-09, issued in May 2014, clarifies the principles for recognizing revenue and develops a common revenue standard for U.S. GAAP and IFRS. Simultaneously, this ASU supersedes the revenue recognition requirements in ASC Topic 605-Revenue Recognition and most industry-specific guidance throughout the Industry Topics of the Codification. The core principle of this ASU requires an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the five steps: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract; (5) recognize revenue when (or as) the entity satisfies a performance obligation. Public business entities, certain not-for-profit entities, and certain employee benefit plans should apply the guidance in this ASU to annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period. Earlier application is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. The Company is currently evaluating the impact of on its consolidated financial position and results of operations upon adopting these amendments.

In September 2015, the FASB issued ASU No. 2015-16, “Business Combination (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments”. The amendments in this ASU require that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The amendments in this ASU require that the acquirer record, in the same period’s financial statements, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date, i.e., to simplify the accounting for adjustments made to provisional amounts recognized in a business combination, the amendments in this ASU eliminate the requirement to retrospectively account for those adjustments. The amendments in this ASU require an entity to present separately on the face of the income statement or disclose in the notes the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. For public business entities, the amendments in this ASU are effective for fiscal years beginning after December 15, 2015, including interim periods within those fiscal years. The amendments in this ASU should be applied prospectively to adjustments to provisional amounts that occur after the effective date of ASU with earlier application permitted for financial statements that have not been issued. The adoption of this standard is not expected to have a material impact on the Company’s consolidated financial position and results of operations.

In November 2015, the FASB issued ASU No. 2015-17, “Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes”. Current GAAP requires an entity to separate deferred income tax liabilities and assets into current and noncurrent amounts in a classified statement of financial position. To simplify the presentation of deferred income taxes, the amendments in this ASU require that deferred tax liabilities and assets be classified as noncurrent in a classified statement of financial position. The amendments in this ASU apply to all entities that present a classified statement of financial position. The current requirement that deferred tax liabilities and assets of a tax-paying component of an entity be offset and presented as a single amount is not affected by the amendments in this ASU. For public business entities, the amendments in this ASU are effective for financial statements issued for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Earlier application is permitted for all entities as of the beginning of an interim or annual reporting period. The amendments in this ASU may be applied either prospectively to all deferred tax liabilities and assets or retrospectively to all periods presented. The Company will adopt the amendments in this ASU from January 1, 2016. The adoption of this standard is not expected to have a material impact on the Company’s consolidated financial position and results of operations.

In March 2016, the FASB issued ASU No. 2016-07, “Investments—Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting”. The amendments in this ASU eliminate the requirement that when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by step basis as if the equity method had been in effect during all previous periods that the investment had been held. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor’s previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting. Therefore, upon qualifying for the equity method of accounting, no retroactive adjustment of the investment is required. The amendments in this ASU require that an entity that has an available-for sale equity security that becomes qualified for the equity method of accounting recognize through earnings the unrealized holding gain or loss in accumulated other comprehensive income at the date the investment becomes qualified for use of the equity method. The amendments in this ASU are effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016. The amendments should be applied prospectively upon their effective date to increases in the level of ownership interest or degree of influence that result in the adoption of the equity method. Earlier application is permitted. No additional disclosures are required at transition. The adoption of this standard is not expected to have a material impact on the Company’s consolidated financial position or results of operations.

In March 2016, the FASB issued ASU No. 2016-08, “Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)”. The amendments in this ASU do not change the core principle of the guidance. The amendments clarify the implementation guidance on principal versus agent considerations. When another party is involved in providing goods or services to a customer, an entity is required to determine whether the nature of its promise is to provide the specified good or service itself (that is, the entity is a principal) or to arrange for that good or service to be provided by the other party (that is, the entity is an agent). When (or as) an entity that is a principal satisfies a performance obligation, the entity recognizes revenue in the gross amount of consideration to which it expects to be entitled in exchange for the specified good or service transferred to the customer. When (or as) an entity that is an agent satisfies a performance obligation, the entity recognizes revenue in the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the specified good or service to be provided by the other party. An entity is a principal if it controls the specified good or service before that good or service is transferred to a customer. The guidance includes indicators to assist an entity in determining whether it controls a specified good or service before it is transferred to the customer. The amendments in this ASU affect the guidance in ASU No. 2014-09, which is not yet effective. The effective date and transition requirements for the amendments in this ASU are the same as the effective date and transition requirements of ASU No. 2014-09, which is deferred by ASU No. 2015-14 by one year. The Company is currently evaluating the impact of on its consolidated financial position and results of operations upon adopting these amendments.

In March 2016, the FASB issued ASU No. 2016-09, “Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting”. The amendments in this ASU affected all entities that issue share-based payment awards to their employees. The areas for simplification in this ASU involve several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. Some of the areas for simplification apply only to nonpublic entities. For public business entities, the amendments in this ASU are effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Early adoption is permitted for any entity in any interim or annual period. The Company is currently evaluating the impact on its consolidated financial position and results of operations upon adopting these amendments.

F-26

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies that do not require adoption until a future date are not expected to have a material impact on the Company's consolidated financial statements upon adoption.

4. Term deposit

Term deposit as of December 31, 2015 and December 31, 2014 represented the amount of cash placed as a term deposit by one of the Company's operating VIEs in a major financial institution in China, which management believes is of high credit quality. The term deposit matured on July 7, 2015 and was extended to July 7, 2016 with an interest rate of 2.925% per annual.

5. Accounts receivable, net

	As of December	
	31,	
	2015	2014
	US\$('000)US\$('000)	
Accounts receivable	5,619	5,429
Allowance for doubtful debts	(3,070)	(3,022)
Accounts receivable, net	2,549	2,407

All of the accounts receivable are non-interest bearing. Based on the assessment of the collectability of the accounts receivable as of December 31, 2015 and 2014, the Company provided approximately US\$3,070,000 and US\$3,022,000 allowance for doubtful accounts, respectively, which were primarily related to the accounts receivable of the Company's internet advertising and TV advertising business segment with an aging over six months. For the year ended December 31, 2015, approximately US\$233,000 allowance for doubtful accounts was provided. For the year ended December 31, 2014, approximately US\$1,023,000 allowance for doubtful accounts was reversed.

6. Other receivables, net

	As of December	
	31,	
	2015	2014
	US\$('000)US\$('000)	
Short-term loan made for marketing campaign	-	65

Edgar Filing: ChinaNet Online Holdings, Inc. - Form 10-K

Term deposit interest receivable	48	56
Staff advances for normal business purpose	243	73
TV advertisement deposit and prepayment receivable	1,157	8,034
Overdue deposits	1,130	1,020
Allowance for doubtful debts	(668)	(856)
Other receivables, net	1,910	8,392

TV advertisement deposit and prepayment receivable represented deposit and prepayment made to an agent of one of the provincial satellite TV stations partnered with the Company. The Company had decided to terminate its cooperation with this TV station and its agent upon expiration of the 2014 contract on December 31, 2014. The decrease in this balance was due to collection of the deposit and prepayment for the year ended December 31, 2015. The remaining balance of this deposit and prepayment as of December 31, 2015 has been fully collected in January 2016.

F-27

For advertising resources purchase contracts signed by the Company with its resources providers, the Company was required to make deposits, which were either applied to the contract amounts that were needed to be paid with the consent of the counterparty or to be refunded to the Company of the remaining balance upon expiration of the cooperation. Overdue deposits represented the portion of the contractual deposits, which related advertising resources purchase contracts had been completed as of each of the reporting dates with no further cooperation. Based on the assessment of the collectability of these overdue deposits as of December 31, 2015 and 2014, the Company provided approximately US\$668,000 and US\$856,000 allowance for doubtful accounts, respectively, which was related to the deposits of its internet advertising and TV advertising business segment. For the year ended December 31, 2015, approximately US\$145,000 allowance for doubtful accounts was reversed due to subsequent collection of a portion of the overdue deposit. For the year ended December 31, 2014, approximately US\$163,000 allowance for doubtful accounts was provided.

7. Prepayments and deposit to suppliers

	As of December 31, 2015 2014 US\$('000)US\$('000)	
Deposits to internet resources and TV advertisement providers	622	3,575
Prepayments to internet resources and TV advertisement providers	3,623	4,451
Deposits to other service providers	1,540	-
Other deposits and prepayments	58	66
	5,843	8,092

In order to provide advertising and marketing services, the Company partners with TV stations or its agents to obtain time slots for resale through broadcast advertisements to advertise brands, business information, products and services of its clients. The Company also purchases internet resources from large internet search engines to attract more internet traffic to its advertising portals and provide value-added services to its clients.

Deposits to internet resources and TV advertisement providers are paid as contractual deposits to the Company's resources and services suppliers. As of December 31, 2015, deposit to internet resources and TV advertisement providers primarily consisted of the contractual deposits of approximately US\$0.62 million to two of the Company's largest internet resources suppliers. The decrease in deposits to internet resources and TV advertisement providers was primarily due to the significant reduction of contractual deposit amount required by the Company's largest internet resources provider in 2015, as compared to that in 2014.

According to the contracts signed between the Company and its suppliers, the Company is normally required to pay the contract amounts in advance. These prepayments will be transferred to cost of revenues when the related services are provided.

As of December 31, 2015, prepayment to internet resources and TV advertisement providers was primarily all paid to the Company's internet resources suppliers. Advanced payment carried forward from prior years related to purchase time slots had been fully utilized as of December 31 2015.

Deposits to other service providers consisted of an approximately US\$0.70 million deposit to an intermediary service provider, which the Company engaged to facilitate the Company to find, select and negotiate with its internet, TV or other media resource suppliers, and another approximately US\$0.70 million deposit for an advisory contract related to finding buyers for liansuo.com and new investors for the Company.

8. Long-term investments

	As of December 31,	
	2015	2014
	US\$('000)	US\$('000)
Equity method investments:		
Investment in equity method investees	778	806
Advance to equity method investees	80	85
Impairment on equity method investments	(838)	-
Total equity method investments	20	891
Cost method investments:		
Investment in cost method investees	1,113	18
Total long-term investments	1,133	909

Equity method investments

As of December 31, 2015, the Company beneficially owned 40%, 23.18% and 25.5% equity interest in ChinaNet Korea, Shenzhen Mingshan and Zhao Shang Ke Hubei, respectively. The Company accounts for its investments in these companies under equity method of accounting. The following table summarizes the movement of the investments in equity method investees for the two years then ended December 31, 2015:

	ChinaNet Korea	Shenzhen Mingshan	Zhao Shang Ke Hubei	Total
	US\$('000)	US\$('000)	US\$('000)	US\$('000)
Balance as of December 31, 2013	-	466	379	845
Share of (loss)/income in equity method investees	-	(4)	51	47
Exchange translation adjustment	-	(1)	-	(1)
Balance as of December 31, 2014	-	461	430	891
Share of losses in equity investment affiliates	-	(2)	-	(2)
Investment in equity investment affiliates	20	-	-	20
Exchange translation adjustment	-	(26)	(25)	(51)
Impairment on equity method investments	-	(433)	(405)	(838)
Balance as of December 31, 2015	20	-	-	20

For the years ended December 31, 2015 and 2014, the Company recognized its pro-rata shares of loss in Shenzhen Mingshan of approximately US\$2,000 and US\$4,000, respectively. For the year ended December 31, 2015, the Company did not recognize any of its pro-rata shares of loss in Zhao Shang Ke Hubei, as the amount was immaterial. For the year ended December 31, 2014, the Company recognized its pro-rata share of income in Zhao Shang Ke Hubei of approximately US\$51,000.

As of December 31, 2015, based on the facts of the significant decline in level of business activities during 2015, insufficient amount of working capital and the lack of commitment from majority shareholders, these two investment affiliates had become dormant and the possibility of the business recovery is remote. As a result, the Company reduced the carrying value of these investments to zero as of December 31, 2015 by recognizing approximately US\$874,000 impairment loss for the year ended December 31, 2015.

Cost method investments

Edgar Filing: ChinaNet Online Holdings, Inc. - Form 10-K

As of December 31, 2015, the Company beneficially owned a 19% equity interest in ChinaNet Chuang Tou and Guohua Shiji, respectively, and a 10% equity interest in Chuangshi Meiwei and Beijing Saturday, respectively. The Company accounts for its investments in these companies under cost method of accounting. The following table summarizes the movement of the investments in cost method investees for the two years then ended December 31, 2015:

	Beijing Saturday	Chuangshi Meiwei	Guohua Shiji	ChinaNet Chuang Tou	Total
	US\$('000)	US\$('000)	US\$('000)	US\$('000)	US\$('000)
Balance as of December 31, 2013	-	-	-	-	-
Investment during the year	18	-	-	-	-
Balance as of December 31, 2014	18	-	-	-	18
Investment during the year	-	154	3	939	1,096
Exchange translation adjustment	(1)	-	-	-	(1)
Balance as of December 31, 2015	17	154	3	939	1,113

F-29

ChinaNet Chuang Tou was incorporated in November 2015, which is currently in its setup period.

The Company assessed the fair value of its cost method investments and determined no other-than temporary impairment exist as of December 31 2015, or 2014.

9. Assets and liabilities classified as held for sale

As discussed in Note 2, the Company had committed to a plan to sell one of its internet advertising operating VIEs, Beijing Chuang Fu Tian Xia, also known as liansuo.com., in exchange for cash to continue the expansion of its services distribution channels and to support the development of its data services, which did not qualify for presentation as a discontinued operation in accordance with ASC Topic 205, as it is not considered a significant portion of the Company's internet advertising business segment. The Company expects to consummate the transaction before the end of fiscal 2016 and does not expect to have any continued involvement with the entity after the disposal date.

The Company classified the assets and liabilities of the disposal group as held for sale as of December 31, 2015 and presented separately in the asset and liability section, respectively, in accordance with ASC Topic 360. The assets and liabilities held by the disposal group after allocation of an approximately US\$914,000 of goodwill from the internet advertising reporting unit based on the relative fair value of the disposal group and the remaining portion of the reporting unit that will be retained are as follows:

	As of December 31, 2015
	US\$('000)
Assets classified as held for sale	
Cash and cash equivalents	181
Accounts receivable, net	53
Other receivables, net	95
Advance to suppliers	366
Property and equipment, net	43
Deferred tax assets	298
Goodwill allocated to the disposal group	914
Inter-co balances elimination ⁽¹⁾	(68)
Total assets classified as held for sale	1,882
Liabilities classified as held for sale	
Accounts payable	154
Advance from customers	588
Accrued payroll and other accruals	50
Taxes payable	9
Other payables	364
Inter-co balances elimination ⁽¹⁾	(252)

Total liabilities classified as held for sale 913

(1) Inter-company balances are part of the disposal group's assets or liabilities, but were eliminated in deriving the consolidated financial statements.

F-30

10. Property and equipment, net

	As of December 31,	
	2015	2014
	US\$('000)	US\$('000)
Leasehold improvement	382	180
Vehicles	839	890
Office equipment	1,376	1,415
Electronic devices	1,171	1,244
Property and equipment, cost	3,768	3,729
Less: accumulated depreciation	(2,922)	(2,786)
Less: impairment loss on abandoned fixed assets	(165)	-
Property and equipment, net	681	943

Depreciation expenses in the aggregate for the years ended December 31, 2015 and 2014 were approximately US\$355,000 and US\$385,000, respectively.

As discussed in Note 2, the Company exited its bank kiosk advertising business segment, which did not qualify for presentation as a discontinued operation. As a result, the Company reduced the carrying value of its bank kiosk equipment to zero, with a loss of approximately US\$172,000 recorded and included in loss from continued operations for the year ended December 31, 2015, as the equipment was ceased to be used and its salvage value was immaterial.

11. Intangible assets, net

	As of December 31,	
	2015	2014
	US\$('000)	US\$('000)
Intangible assets not subject to amortization:		
Domain name	1,488	1,579
Intangible assets subject to amortization:		
Contract backlog	191	202
Customer relationship	3,340	3,545
Non-compete agreements	1,321	1,402
Software technologies	316	335
Cloud compute software technology	1,429	1,517
SMEs intelligent operation and marketing data service applications	4,973	5,277
Other computer software	108	78
Intangible assets, cost	13,166	13,935

Edgar Filing: ChinaNet Online Holdings, Inc. - Form 10-K

Less: accumulated amortization	(4,845)	(3,704)
Less: accumulated impairment losses	(2,683)	(993)
Intangible assets, net	5,638	9,238

Amortization expenses in aggregate for the years ended December 31, 2015 and 2014 were approximately US\$1,413,000 and US\$1,052,000, respectively.

As discussed in Note 2, the Company exited its brand management and sales channel building business segment, as a result, the Company reduced the remaining carrying value of customer relationship of this business segment to zero, with a loss of approximately US\$169,000 recorded in loss from discontinued operation for the year ended December 31, 2015. For the year ended December 31, 2014, the Company recorded approximately US\$547,000 of impairment loss for customer relationship and non-compete agreement of this business segment, which was reclassified and included in loss from discontinued operation for the year ended December 31, 2014, accordingly.

F-31

As part of the internet advertising and marketing services restructuring, the Company ceased to use its domain name, www.sooe.cn acquired in 2011, which was primarily designed to serve smaller and home office clients. The Company would concentrate its resources and focus on providing comprehensive, integrated and in-depth services to more matured and well-established SME clients. As a result, the Company reduced the remaining carrying value of the domain name to zero, with a loss of approximately US\$1,551,000 recorded and included in loss from continued operations for the year ended December 31, 2015.

As discussed in Note 3 (q), the Company performed an impairment analysis on its intangible assets as of December 31, 2015 and 2014. The fair value of intangible assets was determined using Multi-period Excess Earning Method (the “MEEM method”). As an application of income approach, the MEEM method is a widely used valuation method. It determines the fair value of the asset as the present value of the cash flows attributable to it. As the asset will generally earn cash flows through interaction with other tangible and intangible assets, the contributions to cash flows of those other assets must be removed. Those assets are referred to as contributory assets which are defined as all assets that are utilized in the realization of expected future cash flows for the target asset (See Note 3 (q) for significant unobservable internally-developed inputs used in the fair value measurement).

For the years ended December 31, 2015 and 2014, the Company provided approximately US\$101,000 and US\$442,000 impairment losses, which were associated with customer relationship and non-compete agreements of its internet advertising business segment.

Based on the net carrying value of the finite-lived intangible assets recorded, which weighted average remaining useful life was 6.28 years as of December 31, 2015, and assuming no further subsequent impairment of the underlying intangible assets, the estimated future amortization expenses is approximately US\$1,238,000 for the year ended December 31, 2016 and approximately US\$765,000 each year for the year ended December 31, 2017 through 2020.

12. Deposit and prepayment for purchasing of software technology

The Company entered into a contract to purchase software products related to cloud video management system from an unrelated third party with a total contract amount of RMB9.5 million (approximately US\$1.5 million). As of December 31, 2015, the Company has paid in the aggregate of RMB6.65 million (approximately US\$1.02 million) in accordance with the payment schedule set forth in the contract. The Company is currently in test trials for this system. The transaction as contemplated under the contract is expected to be consummated in 2016.

The amount of US\$0.85 million prepayment as of December 31, 2014 was related to a software development contract which has been terminated in November 2015. In accordance with the agreement between the Company and the counter party, the Company agreed to compensate the counter party RMB0.39 million (approximately US\$0.06 million), and the remaining balance of the prepayment had been fully refunded to the Company as of December 31, 2015.

In November 2015, the Company entered into a contract to engage an unrelated third party to develop software systems related to Internet operation safety, information exchange security and data encryption and management. The total contract amount was RMB13 million (approximately US\$2 million). The Company has paid approximately RMB9.1 million (approximately US\$1.4 million) during the first fiscal quarter of 2016. The transaction as contemplated under the contract is expected to be consummated in 2016.

13. Goodwill

	Amount US\$('000)
Balance as of December 31, 2013	11,450
Goodwill impairment losses	(4,668)
Exchange translation adjustment	(10)
Balance as of December 31, 2014	6,772
Goodwill impairment losses	(1,071)
Goodwill allocated to disposal group classified as held for sale	(914)
Exchange translation adjustment	(391)
Balance as of December 31, 2015	4,396

The Company's goodwill arose as a result of various business combinations consummated in 2011. The Company's respective goodwill is directly attributable to its internet advertising reporting unit and brand management and sales channel building reporting unit.

As discussed in Note 2, the Company exited its brand management and sales channel building business segment, as a result, the Company provided full impairment provision against the remaining carrying value of goodwill attributable to this reporting unit, with a loss of approximately US\$1,117,000 recorded in loss from discontinued operation for the year ended December 31, 2015. For the year ended December 31, 2014, the Company recorded approximately US\$900,000 of impairment loss associated with goodwill of this reporting unit, which was reclassified and included in loss from discontinued operation for the year ended December 31, 2014, accordingly.

As of December 31, 2015, as discussed in Note 3(m), based on the relative fair value of liansuo.com, the disposal group classified as held for sale during the period and the portion of the internet advertising reporting unit that will be retained, the Company first allocated approximately US\$941,000 carrying value of goodwill attributable to its internet advertising reporting unit to the disposal group. The Company then performed annual impairment test on goodwill remaining in the portion of the reporting unit to be retained using its adjusted carrying amount in accordance with ASC Topic 350 “Intangibles-Goodwill and Others”. The fair value of reporting units was determined using the income approach by a discounted cash flow analysis. The discounted cash flow method is premised on the concept that the value is based on the present value of all future cash flows by applying an appropriate discount rate. The future benefits generating cash flows consist of current income distributions, appreciation in the asset, or a combination of both. In essence, this valuation method requires a forecast to be made of cash flow, going out far enough into the future until an assumed stabilization occurs for the assets being appraised. This methodology assumes that the forecasted income/cash flow will not necessarily be stable in the near term but will stabilize in the future (See Note 3 (q) for significant unobservable internally-developed inputs used in the fair value measurement).

For the year ended December 31, 2015, the Company did not recognize any further goodwill impairment loss attributable to internet advertising reporting unit. For the years ended December 31, 2014, the Company recorded US\$3,751,000 impairment losses associated with goodwill attributable to this reporting unit.

14. Short-term bank loan

Short-term bank loan as of December 31, 2014 represented a short-term bank loan of RMB5.0 million (approximately US\$0.8 million) borrowed by one of the Company’s VIEs from a major financial institution in China to supplement its short-term working capital needs, which matured on September 29, 2015. The Company repaid this loan in full at maturity with no future extension.

15. Accrued payroll and other accruals

As of December
31,
2015 2014

US\$('000)

Accrued payroll and staff welfare	345	388
Accrued operating expenses	340	197
	685	585

16. Due to noncontrolling interest of VIE

As of December 31, 2014, due to noncontrolling interest of VIE represented the outstanding balance of the short-term loan borrowed by one of the Company's VIEs, Beijing Chuang Fu Tian Xia, from its noncontrolling interest to supplement the short-term working capital needs of Beijing Chuang Fu Tian Xia. The short-term loan is unsecured, interest free and is payable on demand.

In July 2015, as approved by the shareholders of Beijing Chuang Fu Tian Xia, the majority interest shareholder and noncontrolling interest shareholder, on a pro-rata basis, converted RMB2.04 million (approximately US\$0.31 million) and RMB1.96 million (approximately US\$0.30 million) of its amount due from Beijing Chuang Fu Tian Xia into the registered and paid-in capital of Beijing Chuang Fu Tian Xia, respectively. Accordingly, the registered and paid-in capital of Beijing Chuang Fu Tian Xia increased from RMB1 million (approximately US\$0.15 million) to RMB5 million (approximately US\$0.77 million). As of December 31, 2015, Beijing Chuang Fu Tian Xia had fully repaid the remaining outstanding amount due to its noncontrolling interest.

17. Payable for purchasing of software technology

Payable for purchasing of software technology as of December 31, 2014 represented the outstanding payment balance for purchasing of the SMEs operation and marketing data service applications, which transaction consummated in December 2014. As of December 31, 2015, the Company has fully settled the balance with the counter party.

18. Guarantee payment and prepayment from new investors

On May 5, 2015, the Company entered into a Securities Purchase Agreement with Beijing Jinrun Fangzhou Science & Technology Co, Ltd. (“Jinrun Fangzhou”), a public company listed on the National Equities Exchange and Quotations of the PRC (the “NEEQ”), pursuant to which Jinrun Fangzhou agreed to purchase 2,800,000 shares of common stock of the Company for an aggregate purchase price of US\$3,500,000. On May 26, 2015, the Company entered into another Securities Purchase Agreement with Dongsys Innovation (Beijing) Technology Development Co., Ltd. (“Dongsys Innovation”), a public company listed on the NEEQ, pursuant to which Dongsys Innovation agreed to purchase 1,000,000 shares of common stock of the Company for an aggregate purchase price of US\$1,250,000.

In accordance with the Securities Purchase Agreements described above, Jinrun Fangzhou and Dongsys Innovation were required to pay 10% of its respective total purchase price as guarantee payments within five days of the date the agreements were signed, and pay an additional 15% of its respective total purchase price within thirty days of the date of the agreements were signed, and pay the remaining 75% of its respective purchase price at the closing which shall take place on the date mutually agreed to by the parties.

As of December 31, 2015, the Company has received the 10% guarantee payment and 15% prepayment in an aggregate amount equal to US\$824,000 from Jinrun Fangzhou, and the 10% guarantee payment in an amount equal to US\$120,000 from Dongsys Innovation, respectively.

As of December 31, 2015, the Company is still in the process of determining the transaction details with the investors.

19. Taxation

1) *Income tax*

The entities within the Company file separate tax returns in the respective tax jurisdictions in which they operate.

i). The Company is incorporated in the state of Nevada. Under the current law of Nevada, the Company is not subject to state corporate income tax. Following the Share Exchange, the Company became a holding company and does not conduct any substantial operations of its own. No provision for federal corporate income tax has been made in the financial statements as the Company has no assessable profits for the year ended December 31, 2015, or any prior periods. The Company does not provide for U.S. taxes or foreign withholding taxes on undistributed earnings from its non-U.S. subsidiaries because such earnings are intended to be reinvested indefinitely. If undistributed earnings were distributed, foreign tax credits could become available under current law to reduce the resulting U.S. income tax liability.

ii). China Net BVI was incorporated in the British Virgin Islands (“BVI”). Under the current law of the BVI, China Net BVI is not subject to tax on income or capital gains. Additionally, upon payments of dividends by China Net BVI to its shareholders, no BVI withholding tax will be imposed.

iii). China Net HK was incorporated in Hong Kong and does not conduct any substantial operations of its own. No provision for Hong Kong profits tax has been made in the financial statements as China Net HK has no assessable profits for the year ended December 31, 2015 or any prior periods. Additionally, upon payments of dividends by China Net HK to its shareholders, no Hong Kong withholding tax will be imposed.

iv). The Company’s PRC operating subsidiaries and VIEs, being incorporated in the PRC, are governed by the income tax law of the PRC and is subject to PRC enterprise income tax (“EIT”). The EIT rate of PRC is 25%, which applies to both domestic and foreign invested enterprises.

In July 2012, Business Opportunity Online was approved by the related PRC governmental authorities as a High and New Technology Enterprise under the current EIT law, and was approved by the local tax authorities of Beijing, the PRC, to be entitled to a favorable statutory tax rate of 15% until December 31, 2014. During 2015, Business Opportunity Online reapplied for the qualification as a High and New Technology Enterprise. In November 2015, Business Opportunity Online received the formal certificate as a High and New Technology Enterprise, which enabled the entity to continue to enjoy the favorable statutory tax rate of 15% until November 2018. Therefore, for the years ended December 31, 2015 and 2014, the applicable income tax rate of Business Opportunity Online was both 15%.

Business Opportunity Online Hubei was approved by the related PRC governmental authorities to be qualified as a software company and was approved by the local tax authorities of Xiaogan City, Hubei province, the PRC, to be entitled to a EIT exemption for fiscal 2012 and a 50% reduction of its applicable EIT rate which is 25% to 12.5% of its taxable income for the succeeding three years through fiscal 2015, as its first profitable year was determined as fiscal 2011 instead of fiscal 2012 in August 2013 by the local tax authorities of Xiaogan City, Hubei province. Therefore, the applicable income tax rate for Business Opportunity Online Hubei was both 12.5% for the years ended December 31, 2015 and 2014. After fiscal 2015, the applicable income tax rate for Business Opportunity Online Hubei will be 25% under the current EIT law of PRC.

The applicable income tax rate for other PRC operating entities of the Company is 25% for the years ended December 31, 2015 and 2014.

The current EIT law also imposed a 10% withholding income tax for dividends distributed by a foreign invested enterprise to its immediate holding company outside China. A lower withholding tax rate will be applied if there is a tax treaty arrangement between mainland China and the jurisdiction of the foreign holding company. Holding companies in Hong Kong, for example, will be subject to a 5% withholding tax rate.

For the years ended December 31, 2015 and 2014, all of the preferential income tax treatments enjoyed by the Company's PRC subsidiaries and VIEs were based on the current applicable laws and regulations of the PRC and approved by the related government regulatory authorities and local tax authorities where the Company's respective PRC subsidiaries and VIEs operate in. Business Opportunity Online and Business Opportunity Online Hubei were most affected by these preferential income tax treatments within the structure of the Company. The preferential income tax treatments are subject to change in accordance with the PRC government economic development policies and regulations. These preferential income tax treatments are primarily determined by the regulation and policies of the PRC government in the context of the overall economic policy and strategy. As a result, the uncertainty of these preferential income tax treatments are subject to, but not limited to, the PRC government policy on supporting any specific industry's development under the outlook and strategy of overall macroeconomic development.

2)

Turnover taxes and the relevant surcharges

Service revenues provided by the Company's PRC operating subsidiaries and VIEs were subject to Value Added Tax ("VAT"). VAT rate for provision of modern services (other than lease of corporeal movables) is 6% and for small scale

taxpayer, 3%. Therefore, for the years ended December 31, 2015 and 2014, the Company's service revenues are subject to VAT at a rate of 6%, after deducting the VAT paid for the services purchased from suppliers, or at a rate of 3% without any deduction of VAT paid for the services purchased from suppliers. The surcharges of the VAT is 12%-14% of the VAT, depending on which tax jurisdiction the Company's PRC operating subsidiaries and VIE operate in.

As of December 31, 2015 and 2014, taxes payable consists of:

	As of December	
	31,	
	2015	2014
	US\$('000)	US\$('000)
Turnover tax and surcharge payable	1,272	1,173
Enterprise income tax payable	1,914	2,159
	3,186	3,332

F-35

A reconciliation of the income tax benefit determined at the U.S. federal corporate income tax rate to the Company's effective income tax benefit is as follows:

	Year Ended December 31,	
	2015	2014
	US\$('000)	US\$('000)
Pre-tax loss	(9,212)	(12,946)
U.S. federal rate	35 %	35 %
Income tax benefit computed at U.S. federal rate	3,224	4,531
Reconciling items:		
Rate differential for domestic earnings	(647)	(762)
Preferential tax treatments and tax holiday effects	(16)	(176)
Valuation allowance on deferred tax assets	(1,057)	(2,269)
Goodwill impairment loss	-	(938)
Others	(8)	92
Effective income tax benefit	1,496	478

For the years ended December 31, 2015 and 2014, the Company's income tax benefit consisted of:

	Year Ended December 31,	
	2015	2014
	US\$('000)	US\$('000)
Current-PRC	(4)	(185)
Deferred-PRC	1,500	663
Income tax benefit	1,496	478

The Company's deferred tax liabilities at December 31, 2015 and changes for the two years then ended were as follows:

	Amount US\$('000)
Balance as of December 31, 2013	1,439
Reversal during the year	(474)
Exchange translation adjustment	(1)
Balance as of December 31, 2014	964

Reversal during the year	(790)
Exchange translation adjustment	(56)
Balance as of December 31, 2015	118

Deferred tax liabilities arose on the recognition of the identifiable intangible assets acquired from acquisition transactions and deconsolidation of subsidiaries consummated in previous years. Reversal for the years ended December 31, 2015 and 2014 of approximately US\$152,000 and approximately US\$225,000, respectively, were due to amortization of the acquired intangible assets. Reversal of approximately US\$672,000 and US\$247,000 for the years ended December 31, 2015 and 2014, respectively, was related to losses recognized for impairment on intangible assets and equity method investments.

F-36

The Company's deferred tax assets at December 31, 2015 and December 31, 2014 were as follows:

	As of December 31, 2015 2014 US\$('000) US\$('000)	
Tax effect of net operating losses carried forward	7,921	6,655
Bad debts provision	932	943
Valuation allowance	(7,303)	(6,385)
Total deferred tax assets	1,550	1,213

	As of December 31, 2015 2014 US\$('000) US\$('000)	
Deferred tax assets reclassified as current asset	-	176
Deferred tax assets reclassified as non-current asset	1,550	1,037
Total deferred tax assets	1,550	1,213

The net operating losses carried forward incurred by the Company (excluding its PRC operating subsidiaries and VIEs) were approximately US\$14,903,000 and US\$12,161,000 at December 31, 2015 and 2014, respectively, which loss carry forwards gradually expire over time, the last of which expires in 2035. A full valuation allowance has been recorded because it is considered more likely than not that the deferred tax assets will not be realized through sufficient future earnings of the entity to which the operating losses relate.

The net operating losses carried forward (excluding bad debts provision and non-deductible expenses) incurred by the Company's PRC subsidiaries and VIEs were approximately US\$15,657,000 and US\$12,401,000 at December 31, 2015 and 2014, respectively, which loss carry forwards gradually expire over time, the last of which expires in 2020. The related deferred tax assets were calculated based on the respective net operating losses incurred by each of the PRC subsidiaries and VIEs and the respective corresponding enacted tax rate that will be in effect in the period in which the losses are expected to be utilized. The Company recorded approximately US\$52,000 and US\$590,000 net valuation allowance for the years ended December 31, 2015 and 2014, respectively, because it is considered more likely than not that this portion of the deferred tax assets will not be realized through sufficient future earnings of the entities to which the operating losses relate.

Full valuation allowance to bad debts provision related deferred tax assets were recorded because it is considered more likely than not that this portion of deferred tax assets will not be realized through bad debts verification by the local tax authorities where the PRC subsidiaries and VIEs operate in.

The Company's non-current portion of deferred tax assets and deferred tax liabilities were attributable to different tax-paying components of the entity, which were under different tax jurisdictions. Therefore, in accordance with ASC Topic 740 "Income taxes", the non-current portion of deferred tax assets and deferred tax liabilities were presented separately in the Company's balance sheets.

The tax authority of the PRC government conducts periodic and ad hoc tax filing reviews on business enterprises operating in the PRC after those enterprises had completed their relevant tax filings, hence the Company's tax filings may not be finalized. It is therefore uncertain as to whether the PRC tax authority may take different views about the Company's tax filings which may lead to additional tax liabilities (See Note 3 (w) for the related provisions in accordance with the PRC Tax Administration and Collection Law).

20. Long-term borrowing from a director

Long-term borrowing from a director is a non-interest bearing loan from a director of the Company relating to the original paid-in capital contribution in the Company's wholly-owned subsidiary Rise King WFOE, which is not expected to be repaid within one year.

21.

Restricted Net Assets

As most of the Company's operations are conducted through its PRC subsidiaries and VIEs, the Company's ability to pay dividends is primarily dependent on receiving distributions of funds from its PRC subsidiaries and VIEs. Relevant PRC statutory laws and regulations permit payments of dividends by its PRC subsidiaries and VIEs only out of their retained earnings, if any, as determined in accordance with PRC accounting standards and regulations and after it has met the PRC requirements for appropriation to statutory reserves. Paid in capital of the PRC subsidiaries and VIEs included in the Company's consolidated net assets are also non-distributable for dividend purposes.

In accordance with the PRC regulations on Enterprises with Foreign Investment, a WFOE established in the PRC is required to provide certain statutory reserves, namely general reserve fund, the enterprise expansion fund and staff welfare and bonus fund which are appropriated from net profit as reported in the enterprise's PRC statutory accounts. A WFOE is required to allocate at least 10% of its annual after-tax profit to the general reserve until such reserve has reached 50% of its registered capital based on the enterprise's PRC statutory accounts. Appropriations to the enterprise expansion fund and staff welfare and bonus fund are at the discretion of the board of directors. The aforementioned reserves can only be used for specific purposes and are not distributable as cash dividends. Rise King WFOE is subject to the above mandated restrictions on distributable profits. Additionally, in accordance with the Company Law of the PRC, a domestic enterprise is required to provide a statutory common reserve of at least 10% of its annual after-tax profit until such reserve has reached 50% of its registered capital based on the enterprise's PRC statutory accounts. A domestic enterprise is also required to provide for a discretionary surplus reserve, at the discretion of the board of directors. The aforementioned reserves can only be used for specific purposes and are not distributable as cash dividends. All of the Company's PRC VIEs are subject to the above mandated restrictions on distributable profits.

As a result of these PRC laws and regulations, the Company's PRC subsidiaries and VIEs are restricted in their ability to transfer a portion of their net assets to the Company. As of December 31, 2015 and 2014, net assets restricted in the aggregate, which include paid-in capital and statutory reserve funds of the Company's PRC subsidiaries and VIEs that are included in the Company's consolidated net assets, was approximately US\$6.7 million and US\$7.3 million, respectively.

The current PRC Enterprise Income Tax ("EIT") Law also imposed a 10% withholding income tax for dividends distributed by a foreign invested enterprise to its immediate holding company outside China. A lower withholding tax rate will be applied if there is a tax treaty arrangement between mainland China and the jurisdiction of the foreign holding company. Holding companies in Hong Kong, for example, will be subject to a 5% withholding tax rate.

The ability of the Company's PRC subsidiaries and VIEs to make dividends and other payments to the Company may also be restricted by changes in applicable foreign exchange and other laws and regulations.

Foreign currency exchange regulation in China is primarily governed by the following rules:

- 1 Foreign Exchange Administration Rules (1996), as amended in August 2008, or the Exchange Rules;

Administration Rules of the Settlement, Sale and Payment of Foreign Exchange (1996), or the Administration Rules.

Currently, under the Administration Rules, Renminbi is freely convertible for current account items, including the distribution of dividends, interest payments, trade and service related foreign exchange transactions, but not for capital account items, such as direct investments, loans, repatriation of investments and investments in securities outside of China, unless the prior approval of the State Administration of Foreign Exchange (the “SAFE”) is obtained and prior registration with the SAFE is made. Foreign-invested enterprises like Rise King WFOE that need foreign exchange for the distribution of profits to its shareholders may effect payment from their foreign exchange accounts or purchase and pay foreign exchange rates at the designated foreign exchange banks to their foreign shareholders by producing board resolutions for such profit distribution. Based on their needs, foreign-invested enterprises are permitted to open foreign exchange settlement accounts for current account receipts and payments of foreign exchange along with specialized accounts for capital account receipts and payments of foreign exchange at certain designated foreign exchange banks.

Although the current Exchange Rules allow the convertibility of Chinese Renminbi into foreign currency for current account items, conversion of Chinese Renminbi into foreign exchange for capital items, such as foreign direct investment, loans or securities, requires the approval of SAFE, which is under the authority of the People’s Bank of China. These approvals, however, do not guarantee the availability of foreign currency conversion. The Company cannot be sure that it will be able to obtain all required conversion approvals for its operations or the Chinese regulatory authorities will not impose greater restrictions on the convertibility of Chinese Renminbi in the future. Currently, most of the Company’s retained earnings are generated in Renminbi. Any future restrictions on currency exchanges may limit the Company’s ability to use its retained earnings generated in Renminbi to make dividends or other payments in U.S. dollars or fund possible business activities outside China.

As of December 31, 2015 and 2014, there was approximately US\$22.9 million and US\$30.8 million retained earnings in the aggregate, respectively, which was generated by the Company's PRC subsidiaries and VIEs in Renminbi included in the Company's consolidated net assets, aside from US\$2.8 million statutory reserve funds as of December 31, 2015 and 2014, that may be affected by increased restrictions on currency exchanges in the future and accordingly may further limit the Company's PRC subsidiaries' and VIEs' ability to make dividends or other payments in U.S. dollars to the Company, in addition to the approximately US\$6.7 million and US\$7.3 million restricted net assets as of December 31, 2015 and December 31, 2014, respectively, as discussed above.

22. Related party transactions

Revenue from related parties:

	Year Ended December 31, 2015 2014 US\$('000) US\$('000)	
-Beijing Saturday Education Technology Co., Ltd.	298	91
-Chuangshi Meiwei (Beijing) International Investment Management Co., Ltd.	346	-
-Beijing Saimeiwei Food Equipment Technology Co., Ltd.	99	260
-Beijing Fengshangyinli Technology Co., Ltd.	-	2
	743	353

Related parties of the Company represented direct or indirect unconsolidated investees of the Company or entities that are directly or indirectly owned by Mr. Handong Cheng or Mr. Xuanfu Liu, the owners of the Company's PRC VIEs, Business Opportunities Online and Beijing CNET Online before the Offshore Restructuring. The Company provides advertising and marketing services to these related parties in its normal course of business on the same terms as those provided to its unrelated clients.

23. Employee defined contribution plan

Full time employees of the Company in the PRC participate in a government mandated defined contribution plan, pursuant to which certain pension benefits, medical care, employee housing fund and other welfare benefits are provided to employees. Chinese labor regulations require that the PRC subsidiaries of the Company make contributions to the government for these benefits based on certain percentages of the employees' salaries. The employee benefits were expensed as incurred. The Company has no legal obligation for the benefits beyond the contributions made. The total amounts for such employee benefits were approximately US\$650,000 and US\$574,000 for the years ended December 31, 2015 and 2014, respectively.

24.

Concentration of risk

Credit risk

Financial instruments that potentially subject the Company to significant concentrations of credit risk consist primarily of cash and cash equivalents, accounts receivable, other receivables and prepayments and deposits to suppliers. As of December 31, 2015 and 2014, substantially all of the Company's cash and cash equivalents were held by major financial institutions located in Mainland China, which management believes are of high credit quality.

Risk arising from operations in foreign countries

All of the Company's operations are conducted within the PRC. The Company's operations in the PRC are subject to various political, economic, and other risks and uncertainties inherent in the PRC. Among other risks, the Company's operations in the PRC are subject to the risks of restrictions on transfer of funds, changing taxation policies, foreign exchange restrictions; and political conditions and governmental regulations.

F-39

Currency convertibility risk

Significant part of the Company's businesses is transacted in RMB, which is not freely convertible into foreign currencies. All foreign exchange transactions take place either through the People's Bank of China or other banks authorized to buy and sell foreign currencies at the exchange rates quoted by the People's Bank of China. Approval of foreign currency payments by the People's Bank of China or other regulatory institutions requires submitting a payment application form together with suppliers' invoices and signed contracts. These exchange control measures imposed by the PRC government authorities may restrict the ability of the Company's PRC subsidiaries and VIEs to transfer its net assets, which to the Company through loans, advances or cash dividends.

Concentration of customers

Excluding revenues generated from discontinued operation, for the year ended December 31, 2015, two customers individually accounted for both 12% of the Company's revenues, respectively. For the year ended December 31, 2014, two customers individually accounted for 28% and 17% of the Company's revenues, respectively. Except for the aforementioned customers, there was no other single customer who accounted for more than 10% of the Company's revenues for the years ended December 31, 2015 or 2014.

As of December 31, 2015, two customers individually accounted for 24% and 17% of the Company's accounts receivable, respectively. As of December 31, 2014, two customers individually accounted for 19% and 18% of the Company's accounts receivable, respectively. Except for the aforementioned, there was no other single customer who accounted for more than 10% of the Company's accounts receivable as of December 31, 2015 or 2014.

Concentration of suppliers

Excluding cost incurred by discontinued operation, for the year ended December 31, 2015, two suppliers accounted for 43% and 37% of the Company's cost of revenues, respectively. For the year ended December 31, 2014, two suppliers accounted for 72% and 19% of the Company's cost of revenues, respectively. Except for the afore-mentioned, there was no other single supplier who accounted for more than 10% of the Company's cost of revenues for the years ended December 31, 2015 or 2014.

The following table sets forth the Company's operating lease commitment as of December 31, 2015:

	Office Rental US\$('000)
Year ending December 31,	
-2016	237
-2017	110
Total	347

Excluding rental expenses included in discontinued operation, for the years ended December 31, 2015 and 2014, rental expenses under operating leases were approximately US\$377,000 and US\$478,000, respectively.

In May 2015, the Company entered into a contract to purchase software products related to cloud video management system from an unrelated third party with a total contract amount of RMB9.5 million (approximately US\$1.5 million). As of December 31, 2015, the Company had paid in the aggregate of RMB6.65 million (approximately US\$1.02 million) in accordance with the payment schedule set forth in the contract. The transaction as contemplated under the contract is expected to be consummated in 2016 and the remaining unpaid contract amount is expected to be paid in 2016.

In November 2015, the Company entered into a contract to engage an unrelated third party to develop software systems related to Internet operation safety, information exchange security and data encryption and management. The total contract amount was RMB13 million (approximately US\$2 million). The Company has paid approximately RMB9.1 million (approximately US\$1.4 million) during the first fiscal quarter of 2016. The transaction as contemplated under the contract is expected to be consummated in 2016 and the remaining unpaid contract amount is expected to be paid in 2016.

In accordance with the contract entered into between the Company and its largest internet resources supplier, the Company agreed to purchase in the aggregate of RMB100 million ("the minimum consumption amount") (approximately US\$15.4 million) from this supplier for a one-year period commencing on June 13, 2015. In accordance with this contract, if the Company fails to meet the minimum consumption amount, the supplier is allowed to require the Company to retroactively compensate the supplier in cash the difference between the granted discount rate set forth based on the minimum consumption amount and any revised discount rate set forth based on further negotiation between the two parties, if the Company is able to achieve 50% of the minimum consumption amount. If the Company fails to achieve 50% of the minimum consumption amount, the Company is not eligible to enjoy any discount. The Company believed that it could not achieve the minimum consumption amount. After several rounds of negotiation between the Company and this supplier, the supplier has agreed to significantly reduce the minimum consumption amount, and the Company is currently negotiating with this supplier for a more favorable discount rate. Based on the above discussed positive progress achieved, the Company concluded that more likely than not the Company would only be charged for approximately US\$0.13 million as compensation for not achieving the original minimum consumption amount, which equaled to the deposit currently withheld by this supplier upon entering into the original contract in June 2015.

F-40

Legal Proceedings

On October 26, 2015, Business Opportunity Online, one of the Company's indirect wholly owned VIEs, filed a civil action against Beijing 58 Information Technology Co., Ltd. ("Beijing 58") in the Chaoyang District People's Court of Beijing. Business Opportunity Online is seeking a court order to establish that it owns a 17.5% equity interest in Beijing 58, one of the VIEs owned by 58.com Inc. On January 20, 2016, the Chaoyang District People's Court of Beijing rendered its ruling that Business Opportunity Online did not own 17.5% equity interest in Beijing 58. On February 15, 2016, Business Opportunity Online filed an appeal of the decision in the Beijing Third Intermediate People's Court. The Company believes that it is too early and uncertain to assess the potential outcome of this lawsuit.

26.

Discontinued operation

As discussed in Note 2, in order to concentrate all the Company's resources on its core business, which is Internet advertising, marketing and the related technical and data services, the Company exited its brand management and sales channel building business segment, which qualified for presentation as a discontinued operation.

Major classes of line items constituting pre-tax net loss and net loss of the discontinued operation for the years ended December 31, 2015 and 2014, respectively, are as follows:

	Year Ended December 31, 2015 2014 US\$('000)US\$('000)	
Revenues	272	931
Cost of revenues	149	603
Total operating expenses	359	527
Impairment on intangible assets	169	547
Impairment on goodwill	1,117	900
Not loss before income tax benefit	(1,522)	(1,646)
Income tax benefit	57	175
Net loss	(1,465)	(1,471)

For the years ended December 31, 2015 and 2014, depreciation and amortization expenses included in operating expenses of the discontinued operation was approximately US\$63,000 and US\$201,000, respectively. There were no significant capital expenditures, operating or investing noncash items incurred in the discontinued operation for the year ended December 31, 2015 or 2014.

F-41

27.

Segment reporting

The Company follows ASC Topic 280 “Segment Reporting”, which requires that companies disclose segment data based on how management makes decisions about allocating resources to segments and evaluating their performance. Reportable operating segments include components of an entity about which separate financial information is available and which operating results are regularly reviewed by the chief operating decision maker (“CODM”), the Company’s Chief Executive Officer, to make decisions about resources to be allocated to the segment and assess each operating segment’s performance.

Previously, the Company had four reportable operating segments, which was Internet advertizing, TV advertising, Bank kiosk advertising and Brand management and sales channel building. As discussed in Note 2, the Company exited its bank kiosk advertising and brand management and sale channel building segments, of which brand management and sale channel building segment qualified for presentation as a discontinued operation. See Note 26 for detail disclosures of this discontinued operation for the years ended December 31, 2015 and 2014. Since the revenue, cost, operating expenses, net loss and total assets amounts of the Company’s bank kiosk segment were immaterial, the Company combined the results of operations of bank kiosk segment and other disclosure information with its TV advertising segment for the years ended December 31, 2015 and 2014, respectively, as presented below:

For the year ended December 31, 2015

	Internet Ad.	TV & Bank kiosks Ad.	Others	Inter- segment and reconciling item	Total
	US\$ (‘000)	US\$ (‘000)	US\$ (‘000)	US\$ (‘000)	US\$ (‘000)
Revenues	31,015	1,250	-	-	32,265
Cost of revenues	23,615	1,040	-	-	24,655
Total operating expenses	11,545	1,057	4,324 ⁽¹⁾	-	16,926
Gain on disposal of VIE included in total operating expenses	-	-	(20)	-	(20)
Goodwill impairment and impairment on fixed assets and intangible assets included in total operating expenses	1,652	172	-	-	1,824
Impairment on equity method investments included in total operating expenses	-	-	874	-	874
Depreciation and amortization expense included in total operating expenses	1,539	121	45	-	1,705
Operating loss	(4,145)	(847)	(4,324)	-	(9,316)
Expenditure for long-term assets	3,308	-	156	-	3,464

Net loss from continued operations	(2,769)	(849)	(4,100)	-	(7,718)
Total assets – December 31, 2015	33,727	3,148	17,362 ⁽²⁾	(18,777)	35,460

(1) Including approximately US\$2,256,000 share-based compensation expenses.

(2) Including approximately US\$182,000 total assets held by brand management and sale channel building segment and US\$1,882,000 assets classified as held for sale.

F-42

For the year ended December 31, 2014

	Internet Ad.	TV & Bank kiosks Ad.	Others	Inter- segment and reconciling item	Total
	US\$ (‘000)	US\$ (‘000)	US\$ (‘000)	US\$ (‘000)	US\$ (‘000)
Revenues	31,261	6,705	-	-	37,966
Cost of revenues	25,645	6,026	-	-	31,671
Total operating expenses	12,575	575	6,133 (1)	-	19,283
Gain on disposal of VIE included in total operating expenses	(266)	-	-	-	(266)
Goodwill impairment and impairment on fixed assets and intangible assets included in total operating expenses	4,193	-	-	-	4,193
Depreciation and amortization expense included in total operating expenses	1,005	154	77	-	1,236
Operating (loss)/income	(6,959)	104	(6,133)	-	12,988
Expenditure for long-term assets	1,113		12	-	1,125
Net (loss)/income from continued operations	(6,380)	47	(6,088)	-	(12,421)
Total assets – December 31, 2014	43,851	13,524	9,547 (2)	(19,492)	47,430

(1) Including approximately US\$4,840,000 share-based compensation expenses.

(2) Including approximately US\$2,989,000 total assets held by brand management and sale channel building segment.

28.

Loss per share

Basic and diluted loss per share for each of the periods presented is calculated as follows (All amounts, except number of shares and per share data, are presented in thousands of U.S. dollars):

Year Ended December 31,
2015 2014
US\$(‘000) US\$(‘000)

\$ (7,627) \$ (12,267)

Edgar Filing: ChinaNet Online Holdings, Inc. - Form 10-K

Net loss attributable to ChinaNet Online Holdings, Inc. from continued operations (numerator for basic and diluted loss per share from continued operations)

Net loss attributable to ChinaNet Online Holdings, Inc. from discontinued operation (numerator for basic and diluted loss per share from discontinued operation)	(1,465)	(1,471)
Weighted average number of common shares outstanding – Basic	26,765,673	22,414,523
Effect of diluted securities:		
Unvested restricted common stocks	-	-
Common stock purchase options	-	-
Weighted average number of common shares outstanding – Diluted	26,765,673	22,414,523
Loss per share-Basic and diluted from continued operations	\$(0.29)	\$(0.55)
Loss per share-Basic and diluted from discontinued operation	\$(0.05)	\$(0.07)

For the year ended December 31, 2015, the diluted loss per share calculation for continued and discontinued operations did not include a weighted average number of 2,659,361 shares of unvested restricted common stock and a weighted average number of exercisable in-the-money options to purchase up to 562,557 shares of the Company's common stock, respectively, because their effect was anti-dilutive, as the Company incurred a loss for the year for both continued and discontinued operations.

For the year ended December 31, 2014, the diluted loss per share calculation for continued and discontinued operations did not include a weighted average number of 14,612 shares of unvested restricted common stock and a weighted average number of exercisable in-the-money options to purchase up to 441,559 shares of the Company's common stock, respectively, because their effect was anti-dilutive, as the Company incurred a loss for the year for both continued and discontinued operations.

29. Share-based compensation expenses

The Company granted 50,000 shares and 40,000 shares of the Company's restricted common stock to its investor relations services provider, in exchange for its services to the Company for the years ended December 31, 2015 and 2014, respectively. These shares were valued at US\$1.20 per share and US\$0.84 per share, the closing bid price of the Company's common stock on the date of grant, respectively. Total compensation expense recognized for the services was US\$60,000 and US\$33,600 for the years ended December 31, 2015 and 2014, respectively.

The Company granted 300,000 shares of the Company's restricted common stock to a technical service provider in exchange for its services to the Company for a 12-month period commencing on August 1, 2014. These shares were valued at US\$0.67 per share, the closing bid price of the Company's common stock on the date of grant. Total compensation expense amortized for the years ended December 31, 2015 and 2014 was approximately US\$117,000 and US\$84,000, respectively.

The Company granted 350,000 shares of the Company's restricted common stock to a management consulting service provider in exchange for its services to the Company for a 24-month period commencing on May 1, 2015. These shares were valued at US\$1.57 per share, the closing bid price of the Company's common stock on the date of grant. Total compensation expense recognized for the year ended December 31, 2015 was approximately US\$183,000.

The Company granted 60,000 shares of the Company's restricted common stock to another management consulting service provider in exchange for its services to the Company. These shares were valued at US\$0.90 per share, the closing bid price of the Company's common stock on the date of grant. Total compensation expense recognized for the year ended December 31, 2015 was approximately US\$54,000.

On September 14, 2015, under its 2015 Omnibus Securities and Incentive Plan, the Company granted its employees and directors in the aggregate of 665,592 shares of the Company's restricted common stock, which will be vested on the third anniversary of the date of the grant. These shares were valued at \$0.84 per share, the closing bid price of the Company's common stock on the date of grant. The Company adopted a 5% forfeiture rate for recognition of the related compensation expenses of these unvested shares, total compensation cost recognized for the year ended December 31, 2015 was approximately US\$53,000.

On December 30, 2014, the Company issued 4,200,000 shares of the Company's restricted common stock to its executive officers, of which 1,533,333 restricted shares were vested upon issuance, 1,333,333 restricted shares were vested on December 30, 2015 and the remaining 1,333,334 restricted shares will be vested on December 30, 2016. The restricted stock was valued at \$1.17 per share, the closing bid price of the Company's common stock on the date of grant. Total compensation cost recognized for the years ended December 31, 2015 and 2014 was US\$1,560,000 and US\$1,794,000, respectively.

On December 30, 2014, the Company issued its management, employees and directors in the aggregate of 2,418,780 shares of the Company's restricted common stock for the services they provided to the Company. The restricted stock is subject to a strict lock-up for an initial six-month period. Following the initial six-month period, the restricted stock will continue to be locked up until the earlier of (i) the date upon which the closing price of the Company's common stock equals or exceeds \$2.50 for five consecutive trading days, and (ii) December 30, 2016. In addition, the restricted stock is subject to forfeiture upon an employee's cessation of employment at the discretion of the Company. The restricted stock was fully vested upon issuance and was valued at \$1.17 per share, the closing bid price of the Company's common stock on the date of grant. Total compensation cost recognized for the year ended December 31, 2014 was US\$2,830,000.

On September 14, 2015, under its 2015 Omnibus Securities and Incentive Plan, the Company also granted 5-year common stock purchase options to its employees and directors, in the aggregate, to purchase up to 1,193,100 shares of the Company's restricted common stock at an exercise price of US\$0.84 per share, of which 397,700 options was vested upon the date of grant, 397,700 options will be vested on September 14, 2016 and the remaining 397,700 options will be vested on September 14, 2017. The Company adopted a 5% forfeiture rate for recognition of the related compensation expenses of the unvested part of options, total compensation expenses recognized for these options for the year ended December 31, 2015 was approximately US\$229,000.

The Company estimated the fair value of these options using the Binomial option-pricing model based on the following assumptions:

Applicable stock price	\$0.84	
Exercise multiple	2-2.5	
Tenor (years)	5.00	
Risk-free interest rate	1.563	%
Dividend yield	-	
Expected volatility	98.63	%
Exercise price of the option	\$0.84	
Value per option	\$0.41-\$0.56	

On December 30, 2014, the Company granted 5-year options to each of its three independent directors, Mr. Douglas MacLellan, Mr. Mototaka Watanabe and Mr. Zhiqing Chen, to purchase in the aggregate 200,000 shares of the Company's common stock at an exercise price of US\$1.23 per share, in consideration of their services to the Company. These options were fully vested and exercisable upon issuance and subject to forfeiture upon the termination of the Optionee's status as a director for any reason. Total compensation expenses recognized for these options for the year ended December 31, 2014 was US\$99,000.

The Company estimated the fair value of these options granted on December 30, 2014 using the Binomial option-pricing model based on the following assumptions:

Applicable stock price	\$0.908	
Exercise multiple	2.5	
Tenor (years)	5.00	
Risk-free interest rate	1.67	%
Dividend yield	-	
Expected volatility	98.68	%
Exercise price of the option	\$1.23	
Value per option	\$0.495	

Applicable stock price is based on the closing bid price of the Company's common stock on the respective grant date, after adjustment for the restricted shares granted/cancelled on the respective grant date. Exercise multiple is used as the estimated ratio of fair value of stock over the exercise price as at the time the option is exercised. Tenor is the contract life of the option. Yield-to-maturities in continuous compounding of the United States Government Bonds with the time-to-maturities same as the expected tenor of the options are adopted as the risk-free rate. Annualized historical stock price volatility of the Company from an appropriate index as at the respective grant date is deemed to be appropriate to serve as the expected volatility of the stock price of the Company and is assumed to be constant and prevailing. The dividend yield is calculated based on management's estimate of dividends to be paid on the underlying stock. Exercise price of the option is the contractual exercise price of the option.

On December 30, 2014, the Company cancelled 155,190 shares of the Company's restricted common stock and options to purchase up to 190,500 of the Company's common stock, respectively, which were issued under the Company's 2011 Omnibus Securities and Incentive Plan due to cessation of employment.

Options issued and outstanding at December 31, 2015 and their movements for the two years then ended are as follows:

	Option Outstanding			Option Exercisable		
	Number of underlying shares	Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price	Number of underlying shares	Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price
Balance, December 31, 2013	939,440	7.51	\$ 1.42	939,440	7.51	\$ 1.42
