FOR IMMEDIATE RELEASE

SILICOM SECURES 2 NEW DESIGN WINS FOR
SETAC-DERIVATIVE MODULES

- Sales of Innovative Product Line to Major Long-Term Customer &
Recently-Added High-Potential Customer Expected to Total ~\$3M Per Year -

KFAR SAVA, Israel—May 11, 2011--Silicom Ltd. (NASDAQ and TASE: SILC) today announced that it has achieved two important Design Wins for Networking Modules, a product line that Silicom developed as a part of its SETAC Server-to-Appliance Converter strategy. Silicom expects that its sales of such products to the two customers will total approximately \$3 million per year.

Silicom achieved these wins with:

- A dominant player in the global security market, one of Silicom's major customers. This firm will use Silicom's Modules in several appliances to enable the reconfiguration of their ports without opening the appliance chassis.
- A leading company in the Traffic Management and Policy Enforcement industry who has decided to standardize on Silicom connectivity modules within its custom-built appliances.

Commenting on the news, Mr. Shaiké Orbach, Silicom's President and CEO, said, "These Design Wins are exciting achievements that confirm many aspects of our business model: especially the nearly unlimited potential of our existing customer base, the power of our reputation for innovation and service to attract new customers, and the value of our differentiating ability to create 'out-of-the-box' solutions for customers' unmet needs."

Mr. Orbach continued: "These Networking Module wins are the latest example of our creative approach, an advantage that derives from the brainstorming that we carry out continuously, both internally and in collaboration with our customers. Our development of the SETAC concept was in direct response to a customer's 'wish list,' and now, we see how that demand has morphed and evolved, creating a need for a derivative module-only product.

"Our success in all of these areas provides further confirmation of our strategy for both the SETAC and for our standard networking products. It demonstrates the contribution of all our growth engines, including increased sales from major existing customers, the addition of new customers, the creation of new products targeting both current and new customers, and the SETAC."

About Silicom

Silicom Ltd. is an industry-leading provider of high-performance networking solutions designed to increase the throughput and availability of networking appliances and server-based systems.

Silicom's large and growing base of OEM customers includes most of the market-leading players in the areas of WAN Optimization, Security and other mission-critical gateway applications. Silicom's products include a variety of multi-port 1/10 Gigabit Ethernet server adapters, innovative internal and external BYPASS solutions and advanced Smart adapters, including SSL encryption solutions and Redirector adapters.

In addition, Silicom's patent-pending new SETAC (Server To Appliance Converter) product family is a unique solution that enables standard servers to be configured as network appliances with high-density front networking ports and no-hassle port modularity.
