

Edgar Filing: BP PLC - Form 6-K

Third Quarter 2006	Second Quarter 2007	Third Quarter 2007	\$ million		Nine Months 2007	Nine Months 2006
6,231	7,376	4,406	Profit for the period*		16,446	19,120
744	(1,289)	(539)	Inventory holding (gains) losses		(2,131)	(762)
6,975	6,087	3,867	Replacement cost profit		14,315	18,358
18.76	15.96	9.94	- per ordinary share (pence)		37.44	50.01
35.08	31.67	20.34	- per ordinary share (cents)		74.51	91.02
2.10	1.90	1.22	- per ADS (dollars)		4.47	5.46

- BP's third-quarter replacement cost profit was \$3,867 million, compared with \$6,975 million a year ago, a decrease of 45%. For the nine months, replacement cost profit was \$14,315 million compared with \$18,358 million, down 22%.

- The third-quarter result included a net non-operating loss of \$346 million compared with a net non-operating gain of \$1,225 million in the third quarter of 2006. For the nine months, the net non-operating gain was \$758 million compared with a net non-operating gain of \$1,214 million for the first nine months of 2006.

- Net cash provided by operating activities for the quarter and nine months was \$6.4 billion and \$20.4 billion respectively compared with \$5.1 billion and \$23.2 billion a year ago.

- The effective tax rate on replacement cost profit from continuing operations for the third quarter was 35% compared with 40% a year ago. For the nine months, the rate was 35% compared with 37% in the equivalent period of 2006.

- Net debt at the end of the quarter was \$22.8 billion. The ratio of net debt to net debt plus equity was 20% compared with 16% a year ago.

- Capital expenditure, excluding acquisitions and asset exchanges, was \$4.6 billion for the quarter and for the nine months was \$12.6 billion. Total capital expenditure and acquisitions was \$4.6 billion for the quarter and \$14 billion for the nine months. The nine months included \$1.1 billion in respect of the acquisition of Chevron's Netherlands manufacturing company. Disposal proceeds were \$0.2 billion for the quarter and were \$3.9 billion for the nine months.

Edgar Filing: BP PLC - Form 6-K

- The quarterly dividend, to be paid in December, is 10.825 cents per share (\$0.6495 per ADS) compared with 9.825 cents per share a year ago. For the nine months, the dividend showed an increase of 10%. In sterling terms, the quarterly dividend is 5.308 pence per share, compared with 5.241 pence per share a year ago; for the nine months the decrease was less than 1%. During the quarter, the company repurchased 128 million of its own shares for cancellation at a cost of \$1.5 billion. For the nine months, share repurchases were 542 million at a cost of \$6.0 billion.

- Information on fair value accounting effects in relation to Refining and Marketing and Gas, Power and Renewables is set out on page 10.

* Profit attributable to BP shareholders.

The commentaries above and following are based on replacement cost profit and should be read in conjunction with the cautionary statement on page 11.

(a) Replacement cost profit reflects the current cost of supplies. The replacement cost profit for the period is arrived at by excluding from profit inventory holding gains and losses. BP uses this measure to assist investors to assess BP's performance from period to period. Replacement cost profit is not a recognized GAAP measure.

(b) See further detail in Note 2.

Dividends

Dividends Payable

BP today announced a dividend of 10.825 cents per ordinary share to be paid in December. Holders of ordinary shares will receive 5.308 pence per share and holders of American Depositary Receipts (ADRs) \$0.6495 per ADS. The dividend is payable on 3 December to shareholders on the register on 9 November. Participants in the Dividend Reinvestment Plan (DRIP) or the DRIP facility in the US Direct Access Plan will receive the dividend in the form of shares, also on 3 December.

=====				=====

(a) Profit from continuing operations and includes profit after interest and tax of equity-accounted entities.

(b) Includes BP's share of production of equity-accounted entities.

(c) Crude oil and natural gas liquids.

(d) Natural gas is converted to oil equivalent at 5.8 billion cubic feet = 1 million barrels.

(e) Based on sales of consolidated subsidiaries only - this excludes equity-accounted entities.

(f) Because of rounding, some totals may not agree exactly with the sum of their component parts.

Exploration and Production

The replacement cost profit before interest and tax for the third quarter was \$6,343 million, a decrease of 36% from the third quarter of 2006. The result benefited from higher liquids realizations, but was impacted by lower gas realizations, lower reported volumes and higher costs. In addition, the result was lower due to the absence of significant gains from non-operating items in the third quarter of 2006 (see below) and the absence of disposal gains in equity-accounted entities, primarily the \$892 million gain on TNK-BP's disposal of the Urdmurtneft assets.

The net non-operating gain in the third quarter of 2007 was \$22 million which included gains on the sale of assets and fair value gains on embedded derivatives relating to North Sea gas contracts, partially offset by an impairment charge relating to a gas plant in the US. This compares with a net non-operating gain of \$2,466 million in the third quarter of 2006, which was primarily comprised of disposal gains.

The replacement cost profit before interest and tax of \$19,279 million for the first nine months represents a decrease of 22% over the same period of the previous year. This result was impacted by lower gas realizations as well as lower reported volumes and higher costs, reflecting sector-specific inflation, increased integrity spend and higher depreciation charges. The nine-months result included a net non-operating gain of \$1,169 million compared with a net non-operating gain of \$2,559 million in the equivalent period of 2006.

Edgar Filing: BP PLC - Form 6-K

Reported production for the third quarter and the first nine months was 3,651mboe/d and 3,788mboe/d respectively, 4% lower than in the equivalent periods of 2006. After adjusting for the effect of disposals, entitlement changes in our production-sharing agreements and the impact of the CATS pipeline incident in the North Sea, production in both the third quarter and the first nine months was broadly flat compared with 2006. Full year production in 2007 is expected to be in the range of 3.8 to 3.9mboe/d, in line with the guidance provided earlier in the year.

During the quarter, we were the highest bidder for 91 blocks in the Western Gulf of Mexico lease sale and we were awarded two new exploration licences in Colombia. Additionally, in early October we participated in the Central Gulf of Mexico lease sale, where we were highest bidder for 83 blocks.

Our major projects are progressing well. In October, we had first oil from Greater Plutonio in Angola, where BP holds a 50% working interest. In the Gulf of Mexico we have started commissioning the Atlantis field.

=====				

(a) Profit from continuing operations and includes profit after interest and tax of equity-accounted entities.

(b) Refining availability is defined as the ratio of units which are available for processing, regardless of whether they are actually being used, to total capacity. Where there is planned maintenance, such capacity is not regarded as being available. During 2006, there was planned maintenance of a substantial part of the Texas City refinery.

(c) The Global Indicator Refining Margin (GIM) is the average of regional indicator margins weighted for BP's crude refining capacity in each region. Each regional indicator margin is based on a single representative crude with product yields characteristic of the typical level of upgrading complexity. The regional indicator margins may not be representative of the margins achieved by BP in any period because of BP's particular refinery configurations and crude and product slate.

Edgar Filing: BP PLC - Form 6-K

Refining and Marketing

The replacement cost profit before interest and tax for the third quarter and nine months was \$376 million and \$3,954 million respectively. The results in the equivalent periods of 2006 were \$1,503 million and \$4,971 million respectively.

The third-quarter result included a net non-operating charge of \$344 million which was primarily comprised of charges in respect of new, and revisions to existing, provisions. The nine-months result included a net non-operating gain of \$194 million.

Compared with the third quarter of 2006, realized refining margins were lower due to the effects of narrowing light heavy crude differentials, particularly in the US. Marketing margins remained robust although they were lower than the exceptionally strong margins of a year ago. Relative to 2006, both refining and marketing margins were stronger in the first nine months of 2007. Compared with the equivalent periods of 2006, both the current quarter and nine-months results reflected the adverse impact of operational issues, particularly at the Whiting refinery, and scheduled turnarounds, along with reduced supply optimization benefits and higher integrity and repair costs.

Information on fair value accounting effects is set out on page 10.

Refining throughputs for the quarter and nine months were 2,148mb/d and 2,169mb/d respectively, compared with 2,287mb/d and 2,200mb/d for the same periods last year. The lower throughputs were mainly due to the disposal of Coryton refinery on 31 May 2007 and lower availability at the Whiting refinery, partially offset by the benefits of the ongoing recommissioning at the Texas City refinery and the acquisition of the remaining interests in the Rotterdam refinery.

Marketing sales were 3,855mb/d for the quarter and 3,811mb/d for the nine months, slightly lower than the comparative periods in the previous year, mainly due to lower European heating oil demand as a result of milder weather.

Refining availability, at 83.4%, improved for the third successive quarter. We continue to make progress in the recommissioning of both the Texas City and Whiting refineries. In line with our prior guidance, by the end of the fourth quarter of 2007 we expect available production capacity to reach 400mb/d and 300mb/d at Texas City and Whiting respectively, with sour crude processing having resumed at Whiting. We expect to restore both refineries to their full crude capacity and flexibility in the first half of 2008.

Edgar Filing: BP PLC - Form 6-K

Gas, Power and Renewables

Third Quarter 2006	Second Quarter 2007	Third Quarter 2007	\$ million	Nine Mo 2007

(70)	1	-	Rest of World	2
(85)	(36)	(8)		(35)

(a) Profit from continuing operations and includes profit after interest and tax of equity-accounted entities.

The replacement cost loss before interest and tax for the third quarter was \$57 million compared with a profit of \$152 million in the same period of 2006. The replacement cost profit before interest and tax for the nine months was \$339 million compared with \$906 million in the same period of 2006. Included in the result for the quarter was a net charge for non-operating items of \$8 million primarily arising from fair value losses on embedded derivatives related to long-term gas contracts. The corresponding quarter of 2006 included a net non-operating charge of \$85 million.

The third-quarter result decreased by more than \$200 million over the third quarter of 2006. This reflected a significant reduction in the contribution from the marketing and trading businesses, lower natural gas liquids volumes and higher Alternative Energy expenditure, partly offset by improved margins in the natural gas liquids business and a lower charge related to non-operating items. The nine-months result was lower than the same period in 2006, largely reflecting weaker contributions from the marketing and trading businesses and higher expenditure in the Alternative Energy business.

Edgar Filing: BP PLC - Form 6-K

Information on fair value accounting effects

BP uses derivative instruments to manage the economic exposure relating to inventories above normal operating requirements of crude oil, natural gas and petroleum products as well as certain contracts to supply physical volumes at future dates. Under IFRS, these inventories and contracts are recorded at historic cost and on an accruals basis respectively. The related derivative instruments, however, are required to be recorded at fair value with gains and losses recognized in income because hedge accounting is either not permitted or not followed, principally due to the impracticality of effectiveness testing requirements. Therefore, measurement differences in relation to recognition of gains and losses occur. Gains and losses on these inventories and contracts are not recognized until the commodity is sold in a subsequent accounting period. Gains and losses on the related derivative commodity contracts are recognized in the income statement from the time the derivative commodity contract is entered into on a fair value basis using forward prices consistent with the contract maturity.

IFRS requires that inventory held for trading be recorded at its fair value using period end spot prices whereas any related derivative commodity instruments are required to be recorded at values based on forward prices consistent with the contract maturity. Depending on market conditions, these forward prices can be either higher or lower than spot prices resulting in measurement differences.

The Gas, Power and Renewables business enters into contracts for pipelines and storage capacity which, under IFRS, are recorded on an accruals basis. These contracts are risk managed using a variety of derivative instruments which are fair valued under IFRS. This results in measurement differences in relation to recognition of gains and losses.

The way that BP manages the economic exposures described above, and measures performance internally, differs from the way these activities are measured under IFRS. BP calculates this difference by comparing the IFRS result with management's internal measure of performance, under which the inventory and the supply and capacity contracts in question are valued based on fair value using relevant forward prices prevailing at the end of the period. We believe that disclosing management's estimate of this difference provides useful information for investors because it enables investors to see the economic effect of these activities as a whole. The impacts of fair value accounting effects, relative to management's internal measure of performance, are shown in the table below. Information for all quarters of 2005 and 2006 can be found at www.bp.com/FVAE.

=====			

(a) Tax is calculated using the quarter's effective tax rate on replacement cost profit from continuing operations.

The amounts shown in the table above, in respect of comparative periods for the Refining and Marketing segment, have been revised from those disclosed previously. The revisions reflect changes in the basis for valuation of certain forward supply contracts to be consistent with the method used for other forward supply contracts when calculating management's internal measure of performance. The changes to comparative figures are not material in relation to management's internal measure of the Refining and Marketing segment's performance. The changes have no impact on the results reported under IFRS.

(a) Net cash provided by operating activities is calculated from the starting point of profit before taxation which includes inventory holding gains and losses. Net cash provided by operating activities also reflects working capital movements including inventories, trade and other receivables and trade and other payables. The carrying value of these working capital items will change for various reasons, including movements in oil, gas and product prices.

(b)Crude oil and natural gas liquids.

(c)Henry Hub First of the Month Index.

Notes

1. Basis of preparation

BP prepares its Annual Report and Accounts on the basis of International Financial Reporting Standards (IFRS) as adopted for use by the European Union (EU). The financial information presented herein has been prepared in accordance with the accounting policies expected to be used in preparing the Annual Report and Accounts 2007 which do not differ significantly from those used for the Annual Report and Accounts 2006.

2. Sale of Olefins and Derivatives business

The sale of Innovene, BP's olefins, derivatives and refining group, to INEOS, was completed on 16 December 2005. The period to 30 September 2006 includes a loss on remeasurement to fair value of \$184 million.
