Table of Contents

Reference Materials Pertaining to Exercise of Voting Rights

1. Total Number of Voting Rights Held by All Shareholders:

48,594,059 voting rights

2. Items of Business and Matters for Reference:

First Item of Business: Approval of Proposed Appropriation of Retained Earnings for the 13th Fiscal Year

The proposal for appropriation of retained earnings of the Company for this fiscal year is as stated in the Report for the 13th Fiscal Year (page 39) attached hereto.

Taking into account results of operations and the management environment, the Company distributes dividends with the aim of providing continuous stable dividends while trying to enhance its financial condition and secure internal reserves.

It is proposed that the Company declare a year-end dividend of ¥1,000 per share, including an ordinary dividend of ¥500 a share as well as a commemorative dividend of ¥500 a share in recognition of i-mode subscriptions passing the 40 million mark. The Company paid an interim dividend of ¥500 a share in November 2003, and accordingly, the aggregate amount of annual dividends for this fiscal year will be ¥1,500 per share.

Second Item of Business: Repurchase of Shares

In order to improve capital efficiency, and to implement a capital strategy that can flexibly respond to changes in the management environment, it is proposed that the Company repurchase up to 2,500,000 shares of its common stock, up to an aggregate repurchase price of ¥600,000 million, during the term between the close of this Ordinary General Meeting of Shareholders and the close of the next following Ordinary General Meeting of Shareholders, pursuant to the provisions of Article 210 of the Commercial Code of Japan.

Table of Contents

Third Item of Business: Partial Amendment to the Articles of Incorporation

1. Reasons for Amending to the Articles of Incorporation of the Company

- (1) Because the Law Concerning Partial Amendments to the Commercial Code and Law for Special Exceptions to the Commercial Code Concerning Audit, etc., of *Kabushiki-Kaisha* (Law No.132 of 2003) became effective on September 25, 2003, under which companies may purchase their own shares pursuant to a resolution of their Board of Directors in accordance with the provisions of their Articles of Incorporation, it is proposed that the Company amend its Articles of Incorporation to add an provision as Article 6 for the repurchase of its shares, thereby further enabling the Company to act dynamically in response to operational, financial, and other conditions . In accordance with above, it is proposed that the following numbering changes be made to the Articles of Incorporations of the Company.

2. Contents of Amendments to the Articles of Incorporation of the Company

The contents of the proposed amendments to the Articles of Incorporation of the Company are as follows:

(Provisions proposed to be amended are underlined.)

Current Articles of Incorporation	Proposed amendments
--	----------------------------

(to be newly created)

(Repurchase of Own Shares)

Article 6. The Company may repurchase its own shares pursuant to a resolution of the Board of Directors in accordance with the provisions of Article 211-3, paragraph 1(2) of the Commercial Code of Japan.

Articles 6 to 28 (omitted)

Article 7 to 29 (Same as at present)

Table of Contents**Fourth Item of Business:** Election of 25 Directors

As the terms of office of 27 Directors will expire at the close of this Meeting, it is proposed that 25 Directors be elected.

The candidates for Director positions are as follows:

- .. To access the designated website from iMenu
- Please access the site from iMenu following the directions below:

iMenu → Menu list → DoCoMo Menu → DoCoMo Home Page (Kanto Koshin-estu)

→ IR information → Exercise of Voting Rights

→ UFJ Trust Bank (designated website for the exercise of voting rights) → Log-in

→ Input Voting Right Exercise Code and Registered Password (or temporary password)

[Compatible handset models] The website is accessible from all i-mode-compatible handsets except for some models (Please see Table of Compatible Handset Models on Page 21 herein).

- .. To access the designated website by directly inputting the URL (<http://www.evote.jp/>)
- Please open the internet screen in the i-mode menu, and directly input the address in the URL input screen to access the website for the exercise of voting rights. For details of operation, please refer to the instruction manual for your cellular phone.

[Compatible handset models] All i-mode-compatible handsets except for some models (Please see Table of Compatible Handset Models on Page 21 herein).

- (Note) Subscription to the i-mode service is required to exercise your voting rights via an i-mode-compatible handset. If voting is done through either of the above methods, the cellular handset with which the voting right is exercised will be identified because information such as model name and serial number of the handset will be transmitted to us. This feature, however, will not transmit the cellular phone number or any other personal information. When the message below appears on the screen, you are requested to agree to the transmission of such cellular phone information.

Table of Contents

2. When voting rights are exercised from an i-mode-compatible phone, please use the Voting Rights Exercise Code and temporary password shown on the enclosed proxy form. They are required to input your votes in accordance with screen directions. To prevent improper access by persons other than the shareholder and the alteration of votes, it is requested that each shareholder convert his or her temporary password to a new one by accessing the voting website.
 3. Each time the general shareholders meeting is convened, notification will be given of a new Voting Rights Exercise Code. Shareholders who have agreed to receive notifications of the general shareholders meeting by electronic mail on their personal computers are requested to be mindful that the password provided remains in effect until changed by the shareholders.
- (Note) In the event you have forgotten your password or repeatedly input an incorrect code such that it disables use of your password, please obtain Password Initialization Application Format from UFJ Trust Bank, the Company's registrar, fill out the necessary items, impress your seal thereupon, and return it to the address indicated on the format.
4. Votes cast from an i-mode-compatible handset will be accepted until midnight on the day prior to the general shareholders meeting, i.e., June 17, 2003 (Thursday). Because of the time required for tabulation of the results, we request that you vote as early as possible.
 5. In the event that duplicate votes are received from a proxy and through electronic votes from an i-mode-compatible handset, the latter shall be deemed effective.
 6. In the event multiple votes are cast from an i-mode-compatible handset, the last vote made shall be deemed effective. Also, in the event that duplicate votes are received from online votes via personal computer and an i-mode-compatible phone, the last vote made shall be deemed effective.
 7. Please be aware that the communications charges required for accessing the voting website shall be borne by the shareholders.

For inquiries pertaining to the use of i-mode-compatible handsets, please contact:

Online Voting from a Personal Computer

1. Exercise of voting rights from a personal computer can only be done through the Company's designated website, <http://www.koushi.ufjtrustbank.co.jp/>.
2. If you choose to exercise your voting rights from a personal computer, please use the Voting Rights Exercise Code and temporary password shown on the enclosed proxy form. They are required to input your votes in accordance with screen directions. To prevent improper access by persons other than the shareholder and the alteration of votes, it is requested that each shareholder convert his or her temporary password to a new one or obtain an electronic certificate by accessing the voting website.
3. Each time the general shareholders' meeting is convened, notification will be given of a new Voting Rights Exercise Code. Shareholders who have agreed to receive notifications of the general shareholders' meeting by electronic mail on their personal computers are requested to be mindful that the password provided remains in effect until changed by the shareholders.

(Note) In the event you have forgotten your password or repeatedly input an incorrect code such that it disables the use of your password, please access UFJ Trust Bank's website for the exercise of voting rights, <http://www.evotep.jp/> and download the Password Initialization Application Format from the Personal Authentication screen that appears after pressing the Exercise Voting Rights button or the Various Applications button, fill out the necessary items, impress your seal thereupon, and return it to the address indicated on the format.

4. Votes cast from a personal computer will be accepted until midnight on the day prior to the general shareholders' meeting, i.e., June 17, 2003 (Thursday). Because of the time required for tabulation of the results, we request that you vote as early as possible.
5. In the event that duplicate votes are received from a proxy and through electronic votes from a personal computer, the latter shall be deemed effective.
6. In the event multiple votes are cast from a personal computer, the last vote made shall be deemed effective. Also, in the event that duplicate votes are received from online votes via personal computer and an i-mode-compatible phone, the last vote made shall be deemed effective.
7. Please be aware that the charges for accessing the voting website, such as dial-up connection fees, telephone charges, etc., shall be borne by the shareholders.
8. The Company sends notifications of general stockholders' meetings by electronic mail to shareholders who have agreed to receive notices in such fashion. Applications for electronic delivery of notices are accepted on the voting site. Shareholders who desire such notification for the next meeting are urged to complete the application.

For inquiries pertaining to the use of personal computers, please contact:

MESSAGE FROM THE PRESIDENT

Dear Shareholders:

I am pleased to present this report of our business results for the 13th fiscal term (from April 1, 2003 to March 31, 2004).

During the term we endeavored to improve and strengthen core businesses based on the spread and expansion of FOMA services, and to enhance operating efficiency by revising our business processes, thereby reinforcing our corporate strengths and positioning for further growth. We also made strides in expanding our business areas through efforts to provide new value-added services, centering on our i-mode services. For FOMA services, we expanded the service area and also launched our FOMA 900i series, which incorporates new functions for third-generation mobile communications services. These moves helped to push the total number of FOMA subscribers over 3 million nationwide by the end of the term. Overseas, we achieved the steady globalization of our operations during the term. For example, in i-mode services provided through investments in and collaborations with overseas business partners attracted more than 2 million subscribers by January 2004, while through our FOMA services, we inaugurated international videophone call services between Japan and (i) the United Kingdom and (ii) Hong Kong.

Although the operating environment grew extremely difficult during the fiscal year, exacerbated by increasingly fierce competition between providers, efforts such as those I have described above enabled the NTT DoCoMo Group to increase the number of its cellular phone subscribers to above 45.9 million, of which i-mode subscribers accounted for 41 million. As a result, we achieved consolidated operating revenues of 5,048.1 billion yen, operating income of 1,102.9 billion yen, income before income taxes of 1,101.1 billion yen, and net income of 650.0 billion yen.

We aim to boost corporate value still further during fiscal 2004 by implementing a number of measures. The year has been designated the "Aim to achieve a huge leap in FOMA business" year, during which we will strive to expand FOMA services still further, and at the same time we will pursue our goal of providing "cellular services useful for daily life and business," through which we intend to create new value by providing mobile phone services that are an integral part of people's everyday lives.

I hope that you will continue to honor us with your understanding and support.

May 2004

/s/ KEIJI TACHIKAWA

Keiji Tachikawa
President and CEO

Table of Contents**BUSINESS REPORT**

Documents attached to the Notice of Convocation of the 1st Ordinary General Meeting of Shareholders

(For the year from April 1, 2003 to March 31, 2004)

(Note) The term "FY2003" hereinafter refers to the fiscal year ended March 31, 2004, and other fiscal years are referred to in a corresponding manner. All non-consolidated figures regarding results of operations in this report were prepared in accordance with accounting principles generally accepted in Japan ("Japanese GAAP"), unless otherwise stated herein. Consolidated results contained herein were prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP"), unless otherwise noted.

I. Business Overview

1. Developments and Results of Operations

(1) General Business Conditions in the Japanese Cellular Phone Market

During the fiscal year ended March 31, 2004, difficult conditions in the Japanese economy persisted, as was reflected in the harsh employment situation. Nevertheless, as the world economy recovered, exports particularly to Asian countries rose, corporate earnings showed improvement, capital investment trended upwards and a recovery had gradually come apparent by the end of the fiscal year.

In the mobile communications market, factors such as the increasing penetration of cellular phones and the increasing diversity of customer needs sparked fiercer competition between carriers, who provided new fee-paying services and offered handsets with complex functional capabilities, including camera phones and third-generation mobile communications services. The net increase in the aggregate number of cellular phone and PHS users was 5.54 million during the term, pushing the total above 86.65 million by the end, of the fiscal year, representing a penetration rate of 67.9% of the total population and demonstrating continued expansion of the market.

Trends in the Number of Cellular and PHS Subscribers over the Past Six Fiscal Years

	8th Fiscal Term	9th Fiscal Term	10th Fiscal Term	11th Fiscal Term	12th Fiscal Term	13th Fiscal Term
	(FY1998)	(FY1999)	(FY2000)	(FY2001)	(FY2002)	(FY2003)
						(Thousands of subscribers)
NTT DoCoMo Group subscribers	25,247	30,797	37,838	42,705	45,549	47,519
Total subscribers in Japan	47,310	56,849	66,785	74,819	81,118	86,655

Table of Contents

To respond to this market environment, NTT DoCoMo, Inc. (the Company) sought to strengthen its core business, through the spread and expansion of its FOMA service, while also reviewing business processes to enhance operating efficiency and reinforcing management capabilities in order to achieve sustained growth. Also, amid progressive globalization and IT orientation of economic and social activities, the Company expanded business areas built around its three growth vectors of multimedia, ubiquity and globalization, as part of its efforts to increase corporate value.

In particular, the year under review was designated a step year for spreading and expanding the FOMA service. In addition to enhancing basic capabilities by expanding the service area, making handsets more compact and lightweight, and improving standby battery hours, the Company promoted sales vigorously, backed by the appeal of relatively affordable packet communications charges. In addition, in February 2004 the Company launched the FOMA 900i series of handsets, incorporating new functions particular to third-generation mobile services. As a result, the number of FOMA subscribers reached more than 3 million at the end of the fiscal year.

The Company also sought to expand new business domains. Centered on the i-mode service, which topped 40 million subscribers nationwide in October 2003, and working together with other companies, the Company provided new value-added services that make use of external interface functions such as infrared communications and QR Code¹. In addition, we worked actively to bring new services to the market, and through a joint venture company established with Sony Corporation, began trial operation of a service using cell phones incorporating FeliCa² non-contact IC card technology.

As for global business development, we continued our efforts to spread the i-mode service worldwide, and in addition to the inauguration of i-mode services in June 2003 by Telefónica Móviles España S.A., a Spanish company, and in November 2003 by Wind Telecomunicazioni S.p.A., an Italian company, we concluded an i-mode licensing agreement with the COSMOTE Mobile Telecommunication S.A., a Greek company. The outcome of these efforts was that in January 2004, through a network of business partners built by equity participations and alliances, the number of overseas subscribers for the i-mode service topped 2 million. We also sought to ensure increasingly widespread use of third-generation mobile communications systems using W-CDMA technology by pursuing an international collaboration agreement with Hutchison Whampoa Limited of Hong Kong. Following the start of service in the United Kingdom in March 2003, Hutchison 3G HK Limited launched service in Hong Kong in January 2004. The steady globalization of the service was also marked by milestones such as the forging of international collaboration agreements with Singapore Telecom Mobile Pte Ltd. and Taiwan's Far EasTone Telecommunications Co., Ltd.

Recognizing environmental issues as one of the most important ongoing managerial concerns, the entire group has taken steps to acquire certification for ISO14001, the international standard for environmental management, and almost all group companies have obtained it. In addition, active steps were taken to implement various measures that placed emphasis on environmental conservation and the impact of group activities on the environment, such as green procurement and purchasing; collecting and recycling used cellular phones to encourage the development of a recycling society; saving paper resources by offering an e-billing service that permits us to inform customers of invoice amounts through Web sites and e-mail; introducing electricity-saving cellular phones and communications equipment so as to halt their impact on global warming; and installing solar-and wind-powered equipment for base stations and other facilities so as to cut emissions of greenhouse gases.

The Company promoted various activities aimed at making contributions to society. These include using the concept of universal design to launch *movia F672i (Raku Raku PHONE III)*, a handset that people of all ages find easy to use; establishing the *DoCoMo Hearty Plaza*, designed to be a store that everyone finds pleasant to use; and introducing the *Hearty Discount*, a discount service for disabled persons. Together, they form part of the Company's *DoCoMo Hearty Style* activities, which use Company products and services to encourage warmer personal exchanges between people.

The Company has also been taking steps to promote disaster countermeasures. For example, given that cellular phone systems have become a form of information infrastructure indispensable to people's lives, the Company has initiated its *i-mode Disaster Message Board Service*, to serve as a new method of inquiring after people's safety at times of earthquakes and other large-scale disasters.

In the area of legal compliance by corporate management, mechanisms have been put in place to pursue the constant improvement of business operations in a way that ensures compliance, including compliance training for management staff and each grade of employee, positioning a risk compliance leader in each unit of the Company, and creating an internal oversight system for ensuring adherence to the law and to corporate ethics.

Table of Contents

As a result of the developments outlined above, the Company's results showed increases in both revenues and profits. Key factors in that growth include the increased use of i-mode services, boosted by the spread of handsets with complex functional capabilities, and the diffusion and expansion of FOMA services, owing to the expansion of the FOMA service area and the enhancement of the handset lineup. For FY2003, the Company posted net income of 333.8 billion yen on a non-consolidated basis, and 650.0 billion yen on a consolidated basis.

The principal financial results are summarized in the table below.

	FY2002	FY2003	Change
	(Hundreds of millions of yen)	(Hundreds of millions of yen)	FY2002 -FY2003 (Percent)

(2) Segment Information

Mobile Phone Business

For its mobile phone services, the Company inaugurated the Melody Call service, which has both music and voice content in its ring tones, and enables users to forward the music and other content they have installed to people who phone them. The Company took steps to vary and lower charges, including reducing usage fees for calls from fixed lines to cell phones; starting the Nikagetsu Kurikoshi scheme, which automatically carries forward for two months the communications allowances that have not been used in one month; and by varying the payment method for family discounts, thereby making it possible to make individual payments in addition to lump-sum payments.

The product lineup was also improved with the aim of satisfying the diverse requirements of users. In its FOMA service, the Company made vigorous efforts to market the FOMA 900i series, which incorporates an attractive array of functions, including Large Capacity i-appli, which increases i-appli content size; Deco-mail, which enables mail to be embellished in various ways; Chara-den, which makes it possible for people to switch their own image to that of a cartoon character when using videophones; and Chaku-motion, which informs users of incoming calls with i-motion. Meanwhile, in its mova service, the Company launched the mova 505i series, incorporating Macromedia Flash i-appli DX, which provides services that use data recorded in the handsets, and the mova 505iS series, incorporating as standard features a megapixel camera and barcode recognition capability, thereby enabling handsets to read information such as QR Code.

The Company progressively expanded the FOMA service area. Coverage of some 99% of Japan's populated areas was attained by the end of the term. Within the existing service area, the Company worked to improve indoor coverage, such as within underground areas and inside buildings. In addition, the Company vigorously promoted sales of handsets by extending the coverage of MOBILER S CHECK to encompass the FOMA service and widening Yu Yu Call discounts to include videophone transmissions. At the same time, owing to the expansion of the service area and the increasing variety of fees, efforts were made to bring about a steady shift from the mova service to the FOMA service.

For the i-mode service, the Company endeavored to create new usage opportunities through links with other business platforms. These efforts included the start of trials for various services, such as those for managing admissions to public venues with electronic tickets using QR Code; settling credit-card bills using infrared data transmission capabilities in cell phones; and using cellular phones incorporating the new FeliCa capability. The Company also worked to improve the convenience for i-mode customers by inaugurating the i-mode My Box service, enabling them to receive personalized information. Steps were also taken to provide customers with an environment in which they can use their mobile services with peace of mind, and to facilitate the spread of a healthy mobile Internet. These included the start of restricted access functions that limit connection to the Internet from i-mode handsets to sites on the i-mode menu, and stiffer measures to counter unwanted bulk e-mail, such as imposing a daily limit on the number of mail transmissions and suspending usage and canceling the agreements of i-mode subscribers who send bulk e-mail. As a result of these efforts, in October 2003, the number of i-mode subscribers nationwide topped 40 million.

Table of Contents

In the area of mobile multimedia services, the Company launched an array of products designed to satisfy the diverse needs of users. These included the sigmarion III a mobile PDA with a full-keyboard; the FOMA F2402 PC card-type terminal, capable of not only receiving, but also sending packet transmissions at a rate of 384Kbps; the FOMA P2402 , the first FOMA compact flash card type terminal; the F661i , which provides safety and peace of mind through GPS functions enabling both navigation and access to emergency and other information; and the mova F505iGPS , which incorporates a megapixel camera in addition to having GPS capability. The year also saw the full-scale start of the M-Stage V-Live video streaming service on the FOMA network, and the broadening of the capabilities of M-stage Visual Net, a multipoint videoconferencing service, both aimed at boosting the spread of visual communications. Working to implement its multimedia and ubiquity business strategies, the Company inaugurated its DoCommerce i-mode virtual settlement service, introduced an invoicing agency service in addition to the Company's credit settlement service, and adapted and expanded its combien? service to permit payments of charges using QR Code.

The spread of the mobile Internet has made it important to assure a high level of security through personal identity authentication. With this in mind, the Company inaugurated its FirstPass client authentication service to reduce the risk of impersonation by third parties and give clients peace of mind when using the Company's services.

As for business activities aimed at corporate customers, the Company introduced the Business Plan to reduce call charges during daytime on weekdays, and began providing the Business mopera access pro service, which enables remote access through a single access line (whereas prior remote access service required setting up a dedicated line for each separate mobile communications service). Through such services, the Company is promoting the introduction of mobile corporate environments, and working to foster its solutions business through system proposals that take advantage of the features of the Company's services.

In the field of satellite communications services, the Company has endeavored to provide a stable means of communication in the event of emergencies, as well as communications in mountainous areas and from ships. Advances in this area included reducing the size and weight of handsets, extending continuous transmissions and battery life, and for satellite packet transmission services, launching the WIDESTAR DUO handset, which is capable of receiving communications at speeds of up to 64 Kbps.

Table of Contents

PHS Business

In the PHS business area, the market as a whole was characterized by harsh operating conditions, reflected in a net downtrend in the number of subscribers. As a consequence, the Company concentrated management resources on data communications services.

In April 2003, the Company inaugurated the @FreeD flat-rate data communications service and launched the P-in Free 1P and P-in Free 1S card-type terminal adapted for these services, as well as introducing the P-in Free 2PWL card-type terminal, adapted for both PHS and wireless LAN usage. Priority was given to promoting the use of flat-rate data communications services, including the commencement of the @FreeD Multi-line Discount scheme, which gives discounts on basic monthly charges to customers subscribing to multiple lines under the same name through the Flat-Rate Monthly Payment Plan .

As a result, the Company achieved a net increase in the number of subscribers using card-type PHS terminals, but due to a greater decrease in the number of handset-type PHS subscribers, the overall number of PHS subscribers fell.

The number of subscribers and the results of the PHS Business are summarized below.

[Subscribers]

	Non-consolidated	Consolidated

Table of Contents*Miscellaneous Business*

For international roaming services, the Company made efforts to cater to further globalization by starting the WORLD WING service for FOMA users, which makes it possible for users traveling overseas to use the same phone numbers they use in Japan, simply by inserting a FOMA card into any GSM* handset. For mova users, we launched the WORLD WALKER (PLUS) service, which allows use of one dedicated handset in multiple countries and regions.

As for the Company's WORLD CALL service, which enables international calls to be placed from cellular phones, we supplemented existing voice call services by providing international videophone calls and 64 Kbps data transmissions using FOMA-compatible handsets. This has made it possible to exchange international videophone calls with users in the United Kingdom and Hong Kong, where compatible W-CDMA services are provided.

The convenience of the Mzone public wireless LAN service was enhanced during the year. Developments included the provision of roaming with other carriers and the Fixed Daily Plan to permit unlimited usage at any time of the day or night, in addition to improvements in security.

Group companies have also expanded into new business areas through the development and proposal of new systems that take advantage of their own technologies and know-how.

The results of Miscellaneous Business are summarized below.

Table of Contents

The principal new services and products launched by the Company during FY2003 are summarized in the table below.

Principal new services launched during FY2003

<u>Name</u>	<u>Overview</u>
@FreeD	PHS service through which data communications to compatible access points can be used at a flat rate
DoCommerce	Service for making a variety of settlements for shopping on the mobile Internet
WORLD WING	International roaming service for FOMA users, which makes it possible for users traveling overseas to use the same phone numbers they use in Japan by simply inserting a FOMA card into any GSM handset
FirstPass	Client authentication service compatible with FOMA services
Melody Call	Service that has both music and voice content in its ring tones, enabling users to transfer music and other content they have installed to people who phone them
MOBACHEMAIL	Service enabling users of i-mode services to send gift checks, with attached messages, that can be applied to monthly phone bills
i-mode My Box	Service that enables i-mode service customers to access personalized member sites without inputting IDs or passwords
Business mopera access pro	Service enabling remote access from FOMA, mova, DoPa, PHS, and WIDESTAR services by linking corporate users' internal networks to the Company's network through a single access line

Principal new products launched in FY2003

<u>Name</u>	<u>Overview</u>
FOMA F900i	Handset that incorporates a sweep-type fingertip sensor, and connects to PCs via dedicated cable to share use of schedulers, phone books organizers, etc.
FOMA N900i	Stylish handset with a beautiful arc-shaped profile, incorporating a camera with a recording resolution of 2 megapixels
FOMA P900i	Handset incorporating an auto-focus camera and with 10 interchangeable decorative jackets
FOMA SH900i	Handset incorporating an auto-focus camera with an effective resolution of 2.02 megapixels
FOMA N270i	Dual-mode handset that can be used with both the FOMA and mova services
FOMA 2102V series	Handset series incorporating videophone capabilities as a standard feature
FOMA 2402 series	PC card and compact flash card-type FOMA handsets
mova 505iS series	Handset series with both barcode recognition capability and a mega-pixel camera as standard features
mova 252i series	Cameraphone handset series for i-mode services . capable of receiving transmissions at speeds up to 28.8 Kbps, and enabling use of Chat Mail for real-time digital conversations
mova 211iS series	Handset series for i-mode services
mova F661i	Handset compatible with i-mode services and GPS capabilities
mova F505iGPS	Handset with GPS capabilities and incorporating a mega-pixel camera
mova F672i	Handset for i-mode services with functions that people of all ages find easy to use, and incorporating a pedometer feature
(Raku Raku PHONE III)	
P-in Free 1 series	Series of compact flash card-type PHS terminals adapted for the @FreeD scheme
P-in Free 2PWL	Series of compact flash card-type PHS terminals adapted for both PHS and wireless LAN usage
WRISTOMO	Wristwatch-type wearable PHS handset
sigmarion III	Full-keyboard mobile PDA with a Windows* CE.NET operating system

Edgar Filing: NTT DOCOMO INC - Form 6-K

WIDESTAR DUO

Satellite handset useable with satellite packet services

* Windows is a registered trademark of Microsoft Corporation of the United States in the United States and other countries.

(3) Capital Expenditures

Total capital expenditures for FY2003 amounted to 389.3 billion yen on a non-consolidated basis and 805.5 billion yen on a consolidated basis. This was used primarily for the efficient construction and installation of equipment and facilities to accommodate increased demand for communications, improve network reliability, introduce new services and expand the FOMA service area.

The capital expenditures for mobile phone services were allocated to add new or expand existing base stations, switches, transmission lines and other facilities for the purpose of maintaining and improving communications quality and increasing coverage in underground areas and inside buildings. Also, in view of the shift of communications demand from voice calls to packet communications, the Company lowered the network costs of packet communications by building an IP Router Network, a core IP network based on optical transmission routing. Facility construction was also undertaken with the aim of further improving the convenience and reliability of i-mode service.

For PHS service, the Company constructed network equipment with the aim of improving the efficiency of facilities and meeting the increase in demand for the @FreeD service.

Principal facilities and equipment completed during FY2003 are presented below.

Principal facilities completed during FY2003

<u>Item</u>	<u>Non-consolidated</u>	<u>Consolidated</u>
Cellular services		
mova		
Newly installed base stations	209 stations	683 stations
Local switches	1 unit	9 units
FOMA		
Newly installed base stations	1,675 stations	6,824 stations

(4) Financing Activities

During FY2003, the Company raised no funds by such means as the issuance of corporate bonds or long-term debt.

(5) Research and Development Activities

Research and development activities carried out by the Company during FY2003 centered on expanding and reinforcing FOMA services, enhancing the functional capabilities of i-mode services, and providing advanced and diversified services by increasing the capacity and reducing the cost of existing communications networks. The Company also carried out basic research on technologies for the future advancement of mobile communications.

Research and development expenditures during the term totaled 122.3 billion yen. Principal research and development activities are described below.

For mobile phone services, the Company developed the i-appli DX , which provides services such as those that use data recorded in handsets, implemented development of handsets that incorporate GPS capabilities, and carried out the development of systems that update software through remote wireless downloads. The Company also implemented field trials of a new mobile service that uses cell phones incorporating FeliCa non-contact IC card technology.

For its FOMA service, the Company conducted research and development to improve the stability of its network system, in addition to developing compact base station equipment that makes it possible to build out areas in keeping with the conditions at installation sites. In order to give handsets advanced functional capabilities, the Company took steps to enhance basic performance, such as improving standby battery hours, incorporating videophone functions as standard features, expanding i-appli content size and developing dual-mode handsets capable of being used with both the FOMA and mova services. The Company also carried out development directed at the creation of international roaming services and international videophones. Other development included that of prototype dual-mode terminals compatible with both FOMA and wireless LANs, as well as the development of HSDPA*, which is aimed at the eventual realization of high-speed, efficient packet communications.

As for PHS services, the Company undertook the development of the world's first commercially viable wristwatch-type PHS handset, and developed dual-mode terminals compatible with both wireless LANs and PHS.

Table of Contents

With respect to future technologies, the Company's research and development were directed at the realization of flexible and economical networks. The Company conducted research and development on network transport technologies that can carry both voice and data using IP technology, research and outdoor trials for wireless access methods to enable high-speed packet transmission at speeds of up to 100 Mbps, and basic research to create new forms of communications suitable for a ubiquitous communications society.

Trends in Research and Development Expenses over the Past Four Fiscal Years

13th Fiscal Term (FY2003)	1,223

* HSDPA: High Speed Downlink Packet Access, a high-speed packet communications technology adopted in the W-CDMA communications standard.

Table of Contents

2. Issues Facing the Company

In Japan's mobile communications market, competition between carriers is projected to grow more intense as the penetration rate of mobile phones in the population rises, and the needs of customers diversify. In this environment, the Company will endeavor to provide products and services adapted to users' needs, diversify and lower charges, and further enhance its own competitiveness, while at the same time striving to secure new subscribers, reduce cancellations, and promote the use of its services. The Company is also committed to improving operating efficiency through the ongoing revision of its business processes, enhancing its management capabilities by conducting a review of unprofitable businesses, while at the same time vigorously expanding business areas built around its three long-standing growth vectors of multimedia, ubiquity, and globalization.

As for FOMA services, we have designated FY2004 as the "Aim to achieve a huge leap in FOMA business", during which efforts will be made to achieve further expansion. To that end, we will improve our lineup of products with more advanced handset capabilities, while also working to provide sophisticated and varied services for visual communications and the transmission of music, images, and text. To enable customers to use these diverse mobile phone services without worrying about usage charges, in June 2004 we will introduce the "pake-hodai" flat-rate packet communications service, and in May 2004 we will enhance customer convenience by lowering prices in our Packet Pack plans. We will also take steps to ensure the service area is expanded efficiently, working to increase FOMA coverage in underground and indoor areas and maintaining and improving network quality within the existing service area.

With the objective of providing cellular services useful for daily life and business, and building on current voice, mail, and Internet mobile communications services, we will work to evolve mobile phone services that are an integral part of everyday life. This will be achieved by linking to our services through external interface capabilities, such as infrared communications, QR Code, and non-contact IC chips.

Through these efforts to promote multimedia and ubiquitous services, we will work with other companies to promote a "Linkage with bricks & mortar service", which fuses mobile multimedia services with a variety of other commercial transactions, and create business opportunities through value-added services that do not exist within a framework of revenues derived from metered communications charges.

To make further progress in our globalization strategy, we will endeavor to ensure the spread of i-mode services, which through equity affiliates and alliance partners have already been launched in six European countries and Taiwan, as well as working to enable Japanese i-mode customers to use i-mode services not only within Japan, but also overseas. In addition, to ensure that FOMA international videophone services are usable in more countries, we will increase the number of regions where connections can be made. Through these efforts, we aim to bring about "Global Mobility Support" that allows customers to communicate anytime, anywhere, with anyone on a global scale, while also creating new earnings opportunities overseas and persisting in the steady development of our overseas operations.

Table of Contents

We will position ourselves to react flexibly to both stiffening competition and major changes in the surrounding business environment. We will do so by maintaining our vigorous efforts to expand our business domains, and by pursuing the evolution of mobile phone services that not only provide a communications and IT infrastructure, but also constitute an infrastructure providing people with peace of mind and safety in their daily lives. In this way, we will aim to create new value, and by doing so enhance our corporate value.

Table of Contents

3. Historical Data on Non-Consolidated Financial Results and Assets

	10th Fiscal Term	11th Fiscal Term	12th Fiscal Term	13th Fiscal Term
	(FY 2000)	(FY 2001)	(FY 2002)	(FY 2003)
Operating revenues (Millions of yen)	2,142,353	2,355,760	2,476,821	2,633,194
Recurring profit (Millions of yen)	292,938	406,471	633,278	533,544
Net income (loss) (Millions of yen)	173,005	(310,720)	84,850	333,851
Earnings (loss) per share (yen)	17,978	(30,960)	1,698	6,724
Total assets (Millions of yen)	4,460,718	4,252,097	4,483,130	4,513,294
Shareholders' equity (Millions of yen)	2,728,774	2,405,426	2,448,293	2,347,481

(Notes)

- Earnings per share is calculated using the average number of outstanding shares in each fiscal term. In calculating the earnings per share for the 12th term, it is assumed that the share splits carried out during the term were conducted at the beginning of the term. Starting from the 12th term, earnings per share is calculated applying the Accounting Standard for Earnings Per Share (Accounting Standards Board of Japan Statement No. 2) and the Implementation Guidance for Accounting Standard for Earnings Per Share (Accounting Standards Board of Japan Implementation Guidance No.4).
- In the 10th fiscal year (FY2000), the Company endeavored to reinforce its core businesses through network quality enhancements and charge reductions, among other things. At the same time, various new services and products, including i-appli, were launched as a step toward the full-scale deployment of mobile multimedia. As a consequence, operating revenues rose to 2,142,353 million yen, while recurring profit and net income amounted to 292,938 million yen and 173,005 million yen, respectively.
- In the 11th term, to further enrich its core businesses, the Company launched its FOMA service and promoted the use of other mobile multimedia services. On the other hand, extraordinary losses of 947,441 million yen were incurred from the write-down of shares in investee affiliates. Operating revenues, recurring profit and net loss for the term were 2,355,760 million yen, 406,471 million yen, and 310,720 million yen, respectively.
- In the 12th term, the Company took steps to enhance management capabilities by reducing operating costs and sustaining efficient group management. Also, in parallel with the improving and strengthening of core businesses, the Company expanded its business areas built around its three growth vectors of multimedia, ubiquity, and globalization. On the other hand, extraordinary losses of 602,000 million yen were incurred from the write-down of shares in investee affiliates. As a result, the Company posted operating income of 2,476,821 million yen, recurring profit of 633,278 million yen, and net income of 84,850 million yen.
- Developments in the 13th term (FY2003) are explained in Section 1 above, Developments and Results of Operations.

Table of Contents**II. Corporate Overview (as of March 31, 2004)**

1. Principal Businesses

The Company primarily engages in the operation of mobile phone, PHS, and Quickcast services. The main service lines in each business segment are summarized in the table below.

Main Service Lines

<u>Business</u>	<u>Service lines</u>
Mobile phone business	Cellular (mova) services, Cellular (FOMA) services, packet communications services, satellite mobile communications services, in-flight telephone services, and sales of handsets and equipment for each service
PHS business	PHS services and sales of PHS handsets and equipment
Quickcast business	Quickcast (radio paging) services and sales of Quickcast equipment
Miscellaneous business	International dialing services and other miscellaneous businesses

(Note) In-flight telephone services in the mobile phone business category were terminated on March 31, 2004.

2. Principal Offices

5. Condition of the Corporate Group

(1) Relationship with the Parent Company

Although the Company's parent company Nippon Telegraph and Telephone Corporation (NTT), currently owns 30,894,000 shares in the Company (with 63.58% of the voting rights), the Company operates its business, mainly in the field of wireless telecommunications under its own managerial responsibilities within the NTT Group.

The content of services, benefits, and appropriate compensation for basic research and development and group management and/or operation provided by NTT is covered by contract between NTT and the Company.

(2) Major Subsidiaries

The Company engages in mobile phone and other businesses in the Kanto-Koushinetsu region. The other regions are divided into eight areas, in each of which a wholly owned subsidiary of the Company provides mobile phone and other services. Business operations are conducted in an integrated manner by the group as a whole.

Consolidated operating income	1,056,719	1,102,918	4.4%
Consolidated net income	212,491	650,007	205.9%

(Note)

At the end of FY2003, the number of consolidated subsidiaries (including the important subsidiaries from the previous term, was 36, and the number of unconsolidated subsidiaries and affiliated companies accounted for by the equity method was 44.

Table of Contents

(4) Developments in the Corporate Group

Investments and other major activities during FY2003 are summarized below.

In accordance with the acquisition proposal made in October 2003 by Far EasTone Telecommunications Co., Ltd. (FET), a Taiwanese company, for KG Telecommunications Co., Ltd. (KGT), a Taiwanese company, FET and KGT companies concluded a share purchase agreement. Upon the closing of that agreement, KGT ceased to be an affiliate of the Company and became a wholly owned subsidiary of FET. In April 2004, the Company exchanged its holdings of KGT shares for FET shares (equivalent to an approximately 5% equity stake) and cash (approximately 2.5 billion NT dollars).

In November 2003, the Company established DoCoMo Communications Laboratories Beijing Co., Ltd. in the People's Republic of China, in order to conduct research in the field of advanced mobile communications technology, centering on fourth-generation mobile communications services and subsequent wireless technologies.

In December 2003, the Company sold its entire holding of shares in DoCoMo AOL, Inc., which subsequently ceased to be an affiliate of the Company.

In December 2003, the Company reached agreement with Brasilcel, N.V. (Brasilcel), a Brazilian company, on selling its entire holding of shares in Brazil's Sudestecel Participações S.A. to Brasilcel.

The Company underwrote the shares issued for a capital increase by FeliCa Networks, Inc., which was established by the Company and Sony Corporation for the purpose of joint-venture operations in the field of non-contact IC cards. As a result, the Company acquired 40% of that company's voting rights in January 2004, and FeliCa Networks, Inc. became its affiliate.

In February 2004, AT&T Wireless Services, Inc. (AWS) of the U.S. reached agreement with Cingular Wireless LLC, also of the U.S., on an acquisition proposal made by the latter. The completion of this transaction in the future would have an impact on the relationship between the Company and AWS, including an exchange of AWS shares held by the Company for cash.

(Note) Amounts are truncated to the nearest one million yen.

Table of Contents

Significant Accounting Policies

1. Depreciation of non-current assets

(1) Property, plant and equipment

Depreciation of property and equipment is computed by the declining balance method with the exception of buildings, which are depreciated on the straight-line method.

(2) Intangible assets

Intangible assets are amortized using the straight-line method.

Computer software for internal use is amortized on the straight-line method over its estimated useful life.

2. Valuation of securities

a. Investments in subsidiaries and affiliates are stated at cost, which is determined by the moving-average method.

b. Available-for-sale securities whose fair value is readily determinable are stated at fair value as of the end of the fiscal year with unrealized gains and losses, net of applicable deferred tax assets/liabilities, not reflected in earnings, but directly reported as a separate component of shareholders' equity. The cost of securities sold is determined by the moving-average method. Available-for-sale securities whose fair value is not readily determinable are stated primarily at moving-average cost.

3. Valuation of Inventories

Inventories are stated at cost. The cost of telecommunications equipment to be sold is determined by the first-in, first-out method. The cost of other inventories is determined by the specific identification method.

4. Foreign currency translation

Foreign currency monetary assets and liabilities are translated into Japanese yen at the current spot rate at the end of the fiscal year and the resulting translation gains or losses are included in current earnings.

Edgar Filing: NTT DOCOMO INC - Form 6-K

5. Allowance for doubtful accounts, liability for employees' severance payments and reserve for point loyalty programs

(1) Allowance for doubtful accounts

The Company provides for doubtful accounts principally at an amount computed based on the historical bad debt experience plus the estimated uncollectable amount based on the analysis of certain individual accounts, including claims in bankruptcy.

(2) Liability for employees' severance payments

In order to provide for the employees' retirement benefits, the Company accrues the liability as of the end of the fiscal year in an amount calculated based on the estimated projected benefit obligation and plan assets at the end of the fiscal year.

Actuarial losses are expensed as incurred.

Prior service cost is amortized on the straight-line method over the average remaining service periods of the employees at the time of recognition.

(3) Reserve for point loyalty programs

The costs of awards under the point loyalty programs called DoCoMo Point Service and DoCoMo Premium Club, that are reasonably estimated to be redeemed by its customers in the following fiscal years based on historical data are accounted for as a reserve for point loyalty programs.

6. Consumption tax

Consumption tax is separately accounted for by excluding it from each transaction amount.

Table of Contents

Notes to Non-Consolidated Balance Sheet

1. Non-current assets for telecommunications businesses include those used in the General Type II Telecommunications Carrier business, the Special Type II Telecommunications Carrier business, and supplementary businesses, because these amounts were not significant.

2. Accumulated depreciation of property, plant and equipment was 1,298,784 million yen.

3. Investments in subsidiaries included in the amount of investments in affiliated companies were as follows:

Investments in equity shares of subsidiaries	814,578 million yen
Investments in capital of subsidiaries	665 million yen

4. Monetary assets and liabilities due from or to subsidiaries and the controlling shareholder were as follows:

(1) Subsidiaries:

Long-term monetary assets	500 million yen
Short-term monetary assets	315,774 million yen
Short-term monetary liabilities	430,338 million yen

(2) Controlling shareholder:

Short-term monetary assets	15 million yen
----------------------------	----------------

5. Assets or liabilities due from or to subsidiaries and affiliates, the amount of which exceeded one percent of total assets or total liabilities and shareholders' equity of the Company, were as follows:

Accounts receivable, trade	92,782 million yen
Accounts receivable-other	157,518 million yen
Short-term loans	65,000 million yen
Deposits received	369,311 million yen

6. Unrealized gains on marketable securities as stipulated in Paragraph 3 of Article 124 of Regulations regarding the Commercial Code of Japan were 9,759 million yen.

7. The Company's guarantee (contingent liability) was 17 million yen (1,293 thousand Hong Kong dollars).

Notes to Non-Consolidated Statement of Income

1. Operating revenues and operating expenses from transactions with subsidiaries were 292,635 million yen and 189,016 million yen, respectively.

Non-operating transactions with subsidiaries totaled 72,227 million yen.

2. Operating revenues and operating expenses from transactions with the controlling shareholder were 0 million yen and 14,643 million yen, respectively.

Non-operating transactions with the controlling shareholder were 0 million yen.

3. Revenues and expenses related to the General Type II Telecommunications Carrier business and the Special Type II Telecommunications Carrier business were included in supplementary businesses, because these amounts were not significant.

4. Non-operating revenues of which revenue from subsidiaries and affiliates exceeded 10 percent of the total were as follows:

Dividend income:	13,625 million yen
------------------	--------------------

Table of Contents

5. Write-downs of investments in affiliated companies mainly relates to the impairment charges recognized on investments in the following subsidiaries;

DCM Capital LDN (UK) Limited 16,842 million yen

[Ultimate investee: Hutchison 3G UK Holdings Limited]

Mobimagic Co., Ltd. 1,840 million yen

6. Net income per share was 6,724.83 yen

7. For FOMA services, pake-hodai service will be introduced on June 1, 2004, providing a flat-rate packet communications service that gives subscribers unlimited use of i-mode services in exchange for a flat monthly fee.

Table of Contents**PROPOSAL FOR APPROPRIATION OF RETAINED EARNINGS**

	(yen)
Unappropriated retained earnings	360,266,992,789
The above shall be appropriated as follows:	
Cash dividends 1,000 yen per share	48,596,364,180
Ordinary: 500 yen per share	
Commemorative: 500 yen per share	
Officers' bonuses	147,828,000
including Auditors' bonuses	22,575,000
Special depreciation reserve	9,925,976,644
General reserve	201,000,000,000
Retained earnings carried forward	100,596,823,965

(Notes)

1. On November 20, 2003, an interim dividend was distributed in the amount of 24,728,011,510 yen (500 yen per share).
2. The special depreciation reserve is set aside pursuant to the Special Taxation Measures Law.

We have audited the statutory report, that is the non-consolidated balance sheet, the non-consolidated statement of income, the business report (limited to accounting matters) and the proposal for appropriation of retained earnings, and its supporting schedules (limited to accounting matters) of NTT DoCoMo, Inc. for the 13th business year from April 1, 2003 to March 31, 2004 in accordance with Article 2.1 of the Law for Special Exceptions to the Commercial Code Concerning Audit, etc., of Kabushiki Kaisha. With respect to the aforementioned business report and supporting schedules, our audit was limited to those matters derived from the accounting books and records of the Company. These statutory report and supporting schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on the statutory report and supporting schedules based on our audit as an independent auditor.

We conducted our audit in accordance with generally accepted auditing standards in Japan. Those auditing standards require us to obtain reasonable assurance about whether the statutory report and supporting schedules are free of material misstatement. An audit is performed on a test basis, and includes assessing the accounting policies used by management, the method of their application and estimates made by management, as well as evaluating the overall presentation of the statutory report and supporting schedules. We believe that our audit provides a reasonable basis for our opinion. Our audit also includes audit procedures for subsidiaries considered necessary.

As a result of the audit, our opinion is as follows:

Edgar Filing: NTT DOCOMO INC - Form 6-K

- (1) The non-consolidated balance sheet and the non-consolidated statement of income present fairly the financial position and the results of operations of the Company in conformity with related laws and regulations and the Articles of Incorporation of the Company.

- (2) The business report (limited to accounting matters) presents fairly the status of the Company in conformity with related laws and regulations and the Articles of Incorporation of the Company.

- (3) The proposal for appropriation of retained earnings has been prepared in conformity with related laws and regulations and the Articles of Incorporation of the Company.

- (4) With respect to the supporting schedules (limited to accounting matters) there are no items to be noted that are not in conformity with the provisions of the Commercial Code.

Report of Corporate Auditors

We, the Board of Corporate Auditors of NTT DoCoMo, Inc. (hereinafter the Company), following a review and discussion of the individual reports made by each Corporate Auditor concerning the method and the results of his/her audit of the execution by Directors of their duties in the 13th fiscal year ended March 31, 2004, prepared this Report of Corporate Auditors and hereby submit our report as follows:

1. Summary of Auditing Methods

In accordance with the auditing plan determined by the Board of Corporate Auditors, each Corporate Auditor attended the meetings of the Board of Directors and other significant meetings; obtained reports on business operations from the Directors and others; reviewed documents which approve material matters; conducted investigations regarding the status of the business operations and properties of the head office and other major offices; received reports and explanations from the independent accounting firm; and reviewed the auditing results.

When necessary, each Corporate Auditor requested business reports from subsidiaries and conducted investigations regarding the status of the business operations and properties of subsidiaries.

In addition to the above auditing methods, each Corporate Auditor, to the extent necessary, requested reports from Directors and others, to review the status of the following kinds of transactions: Director s transactions in competition with the Company; any transactions involving conflict of interests between Directors and the Company; any dealings in which the Company provided benefits without compensation; unusual dealings between the Company and subsidiaries or shareholders; and repurchase or disposal of the Company s own shares.

2. Results of the Audit

We are of the opinion that:

(1) Regarding the execution of their duties by Directors, including their duties relating to the subsidiaries, there were no instances of misconduct or material matters in violation of the laws and regulations or the Articles of Incorporation.

We did not find any violations of the duties of Directors regarding: transactions in competition with the Company, transactions involving conflict of interests between Directors and the Company, dealings in which the Company provided benefits without compensation, unusual dealings between subsidiaries or shareholders or repurchase or disposal of the Company s own shares;

Edgar Filing: NTT DOCOMO INC - Form 6-K

(2) The auditing methods and results of the independent accounting firm, KPMG AZSA & Co., are reasonable and satisfactory;

(3) The business report (*eigyō-hokokusho*) (limited to matters other than accounting matters) presents fairly the conditions of the Company in accordance with the laws and regulations and the Articles of Incorporation;

(4) There are no matters which we must point out, in light of the financial condition of the Company and other factors, regarding the agenda of appropriation of retained earnings; and

(5) The supporting schedules (*fuzoku-meisaisho*) (limited to matters other than accounting matters) states all matters which should be stated therein and there are no matters which we must point out.

Date: May 13, 2004

Edgar Filing: NTT DOCOMO INC - Form 6-K

Shareholders equity per share (*2) (yen)	66,134	65,601	69,274	76,234
--	--------	--------	--------	--------

(Note)

- *1. For reconciliation of these non-GAAP financial measures, see Reconciliations between the Disclosed Non-GAAP Financial Measures and the Most Directly comparable GAAP Financial Measures .
- *2. Each figure has been adjusted to reflect the Company's five-for-one stock split that took effect in May 2002.

Table of Contents

**Reconciliations between the Disclosed non-GAAP Financial Measures and
the Most Directly Comparable GAAP Financial Measures**

1. Capital Expenditures

	10th Fiscal Term (FY2000)	11th Fiscal Term (FY2001)	12th Fiscal Term (FY2002)	13th Fiscal Term (FY2003)
	(Hundreds of millions of yen)			
Capital expenditures	10,128	10,323	8,540	8,055
Effects of timing difference between acquisition dates and payment dates	(553)	304	108	(26)
Purchases of property, plant and equipment	(8,034)	(8,632)	(7,005)	(6,253)
Purchases of intangible and other assets	(1,541)	(1,995)	(1,642)	

(Note) Capital expenditures are calculated on an accrual basis for the purchases of property, plant and equipment, and intangible and other assets.

2. EBITDA and EBITDA Margin

	10th Fiscal Term (FY2000)	11th Fiscal Term (FY2001)	12th Fiscal Term (FY2002)	13th Fiscal Term (FY2003)
	(Hundreds of millions of yen and percent)			
a. EBITDA	14,253	16,806	18,363	18,589
Depreciation and amortization expenses + Losses on sale or disposal of property, plant and equipment	(6,467)	(6,797)	(7,795)	(7,560)
Operating income	7,786	10,009	10,567	11,029
Non-operating expenses (net)	(205)	(445)	(138)	(18)
Income taxes	(3,173)	(3,996)	(4,545)	(4,291)
Equity in net losses of affiliates	(178)	(6,440)	(3,242)	(220)
	(213)	(290)	(160)	(0)

Edgar Filing: NTT DOCOMO INC - Form 6-K

Minority interests in earnings of consolidated subsidiaries

Cumulative effect of accounting change			(357)	
b. Net income	4,018	(1,162)	2,125	6,500
c. Operating revenues	41,781	46,593	48,091	50,481
EBITDA margin (=a/c)	34.1%	36.1%	38.2%	36.8%
Net income margin (=b/c)	9.6%	(2.5%)	4.4%	12.9%

(Note) The Company's EBITDA and EBITDA margin differ from the definitions in Item 10 (e) of the U.S. Securities and Exchange Commission's Regulation S-K, and the figures may not be able to be accurately compared with those of other companies.

3. ROCE After Tax Effect

	10th Fiscal Term (FY2000)	11th Fiscal Term (FY2001)	12th Fiscal Term (FY2002)	13th Fiscal Term (FY2003)
			(Hundreds of millions of yen and percent)	
a. Operating income	7,786	10,009	10,567	11,029
b. Operating income after tax effect {=a*(1-effective tax rate)}	4,516	5,805	6,129	6,397
c. Capital employed	37,838	47,415	47,725	48,101
ROCE before tax effect (=a/c)	20.6%	21.1%	22.1%	22.9%
ROCE after tax effect (=b/c)	11.9%	12.2%	12.8%	13.3%

(Notes) Capital employed = Two fiscal year ends average of (Shareholders' equity + Interest bearing liabilities)
Interest bearing liabilities = Current portion of long-term debt + Short-term borrowings + Long-term debt Effective tax rate = 42%
