PHOENIX TECHNOLOGIES LTD.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

Note 1. Summary of Significant Accounting Policies

Basis of Presentation. The consolidated financial statements as of June 30, 2005 and for the three and nine months ended June 30, 2005 and 2004 have been prepared by the Company, without an audit, pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC) and in accordance with the Company's accounting policies as described in its latest Annual Report on Form 10-K filed with the SEC. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been omitted pursuant to such rules and regulations. The consolidated balance sheet as of September 30, 2004 was derived from audited financial statements, but does not include all disclosures required by generally accepted accounting principles. These consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended September 30, 2004.

In the opinion of management, the unaudited consolidated financial statements reflect all adjustments (which include normal recurring adjustments and restructuring adjustments in each of the periods presented) necessary for a fair presentation of the Company's results of operations and cash flows for the interim periods presented, and financial condition of the Company as of June 30, 2005. The results of operations for interim periods are not necessarily indicative of results to be expected for the full fiscal year.

Reclassifications. Certain operating expenses and cost of revenue amounts in prior period financial statements have been reclassified to conform to current period presentation. During the fourth quarter of fiscal 2004, the Company re-evaluated its cost allocation methodology and reclassified these costs to other functional areas of the business. This reclassification has no impact on Phoenix's income from operations or net income.

Use of Estimates. The preparation of the consolidated financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses for the reporting period. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances.

On an on-going basis, the Company evaluates its accounting estimates, including but not limited to, its estimates relating to a) allowance for uncollectible accounts receivable and sales reserves; b) accruals for royalty revenues; c) accruals for employee benefits and restructuring and related costs; d) income taxes and realizability of deferred tax assets and the associated valuation allowances and; e) useful lives and/or realizability of carrying values for property and equipment, computer software costs, goodwill and intangibles, and prepaid royalties. Actual results could differ from those estimates.

Revenue Recognition. The Company licenses software under non-cancelable license agreements and provides services including non-recurring engineering, maintenance (consisting of product support services and rights to unspecified upgrades on a when-and-if available basis), and training.

Revenues from software license agreements are recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collection is probable. The Company uses the residual method to recognize revenue when an agreement includes one or more elements to be delivered at a future date and vendor specific objective evidence (VSOE) of fair value exists for each undelivered element. VSOE of fair value is generally the price charged when that element is sold separately or, for items not yet being sold, it is the price established by management that will not change before the introduction of the item into the marketplace. Under the residual method, the fair value of the undelivered

Table of Contents

PHOENIX TECHNOLOGIES LTD.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

element(s) is deferred and the remaining portion of the arrangement fee is recognized as revenues. If VSOE of fair value of one or more undelivered elements does not exist, revenues are deferred and recognized when delivery of those elements occurs or when fair value can be established. Revenue from arrangements including rights to unspecified future products is recognized ratably over the term of the respective agreement.

The Company recognizes revenue related to the delivered products or services only if the above revenue recognition criteria are met, any undelivered products or services are not essential to the functionality of the delivered products and services, and payment for the delivered products or services is not contingent upon delivery of the remaining products or services.

Royalty revenues from original equipment manufacturers (OEMs) and original design manufacturers (ODMs) are generally recognized in each period based on estimated consumption by the OEMs/ODMs of products containing the Company's software, provided that all other revenue recognition criteria have been met. The Company normally recognizes revenue for all consumption prior to the end of the accounting period. However, for volume purchase agreements (VPAs) the Company also recognizes revenues for units estimated to be consumed by the end of the following accounting quarter, to the extent that the customer has been invoiced for such consumption prior to the end of the quarter and provided all other revenue recognition criteria have been met. Amounts that have been invoiced under VPAs and relate to consumption beyond the following accounting quarter, which we have determined to be not fixed or determinable are recorded as deferred revenues. Since the Company generally receives quarterly royalty reports from our OEMs/ODMs approximately 30 to 60 days following the end of a quarter, it has put processes in place to reasonably estimate the royalty revenues, including obtaining estimates of production from our OEM/ODM customers, utilizing historical experience, and other relevant current information. To date the variances between estimated and actual revenues have been immaterial.

From time to time, the Company enters into arrangements with its customers in which they pay a fixed upfront fee for an unlimited number of units. The Company's revenues from such paid-up license arrangements decreased from \$11.2 million in the second quarter of 2005, or 41% of second quarter fiscal 2005 revenues, to \$9.5 million in the third quarter of fiscal 2005, or 40% of third quarter fiscal 2005 revenues. The Company generally enters into such paid-up license arrangements with respect to PC/Server Core System Software that is approaching the end of its lifecycle or with respect to sales to its Non-PC Device customers where the Company expects that the number of units will be relatively small.

Non-recurring engineering service revenues are recognized on a time and materials basis, on a completed contract basis, or when contractual milestones are met. Contractual milestones involve the use of estimates and approximate the percentage-of-completion method. Software maintenance revenues are recognized ratably over the maintenance period, which is typically one year. Training and other service revenues are recognized as the services are performed. Amounts billed in advance for licenses and services that are in excess of revenues recognized are recorded as deferred revenues.

Income taxes. Income taxes are accounted for in accordance with Statement of Financial Accounting Standards No. 109 *Accounting for Income Taxes* (SFAS 109). Under the asset and liability method of SFAS 109, deferred tax assets and liabilities are recognized for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities, and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period of enactment.

After examining the available evidence at June 30, 2005, the Company believes a full valuation allowance was necessary for the U.S. Federal and state net deferred tax assets. The valuation allowance was

Table of Contents

PHOENIX TECHNOLOGIES LTD.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

calculated in accordance with the provisions of SFAS 109, which requires an assessment of both negative and positive evidence when measuring the need for a valuation allowance. In accordance with SFAS 109, evidence such as operating results during recent periods is given more weight than the Company's expectations of future profitability, which are inherently uncertain. Despite recent profitable results the Company's past financial performance represented sufficient negative evidence to require a full valuation allowance against its U.S. Federal and state deferred tax assets under SFAS 109. The Company intends to maintain a full valuation allowance against its deferred tax assets until sufficient positive evidence exists to support realization of the U.S. Federal and state deferred tax assets.

Stock-Based Compensation. The Company accounts for its stock option plans and employee stock purchase plan in accordance with provisions of the Accounting Principles Board's Opinion No. 25, Accounting for Stock Issued to Employees (APB 25). The Statement of Financial Accounting Standards No. 148, Accounting for Stock-Based Compensation Transition and Disclosure an amendment of FAS 123 (SFAS 148) which amends the disclosure requirements of Statement of Financial Accounting Standards No. 123, Accounting for Stock-Based Compensation (SFAS 123), requires the Company to provide more prominent disclosures in both annual and interim financial statements regarding the method of accounting for stock-based employee compensation and the effect of the method used in the reported results. SFAS 148 also requires the Company to disclose pro forma information regarding option grants made to its employees based on specified valuation techniques that produce estimated compensation charges. The pro forma is as follows (in thousands, except per-share amounts):

	Three Months Ended		Nine Months Ended	
	June 30,		June 30,	
	2005	2004	2005	2004
Net income (loss) as reported	\$ 738	\$ 912	\$ 5,970	\$ (2,133)
Add: Stock-based employee compensation expense included in reported net income (loss), net of related tax effects	58	45	187	85
Deduct: Total stock-based employee compensation expense determined under the fair value based method for all awards, net of related tax effects	(1,678)	(1,064)	(4,488)	(2,809)

Table of Contents

PHOENIX TECHNOLOGIES LTD.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

The fair value of options granted in the three and nine months ended June 30, 2005 and 2004 reported above has been estimated as of the date of the grant using a Black-Scholes multiple option pricing model with the following assumptions:

	Employee Stock Options		Employee Stock Options	
	Three Months Ended June 30,		Nine Months Ended June 30,	
	2005	2004	2005	2004
Expected life from grant date (in years)	4.02	3.13	4.02	3.13
Risk-free interest rate	3.6%	3.0%	3.2%	2.5%
Volatility	0.77	0.85	0.77	0.85
Dividend yield	None	None	None	None

	Employee Stock Purchase Plan		Employee Stock Purchase Plan	
	Three Months Ended June 30,		Nine Months Ended June 30,	
	2005	2004	2005	2004
Expected life from grant date (in years)	0.50	0.50	0.50	0.50
Risk-free interest rate	3.3%	1.8%	3.0%	1.4%
Volatility	0.49	0.55	0.49	0.55
Dividend yield	None	None	None	None

Computation of Earnings (loss) per Share. Basic earnings (loss) per share is computed using the weighted-average number of common shares outstanding during the period. Diluted net income per share is computed using the weighted-average number of common and dilutive potential common shares outstanding during the period. Diluted common-equivalent shares primarily consist of employee stock options and warrants, computed using the treasury stock method. In computing diluted earnings per share, the average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options. For the three and nine months ended June 30, 2004, the Company reported net losses and did not include the outstanding options in the calculation of diluted loss per share, as their inclusion would be anti-dilutive.

New Accounting Pronouncements. On December 16, 2004, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 123 (revised 2004), Share-Based Payment, which is a revision of FASB Statement No. 123, Accounting for Stock-Based Compensation. Statement 123(R) supersedes APB Opinion No. 25, Accounting for Stock Issued to Employees, and amends FASB Statement No. 95, Statement of Cash Flows. Generally, the approach in Statement 123(R) is similar to the approach described in Statement 123. However, Statement 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. Pro forma disclosure is no longer an alternative. The new standard will be effective for public entities in the first fiscal year beginning after June 15, 2005. The Company has not yet assessed the impact of adopting this new standard.

Note 2. Comprehensive Income (loss)

The following are the components of comprehensive income (loss) (*in thousands*):

	Three months ended June 30,		Nine months ended June 30,	
	2005	2004	2005	2004

	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Balance of accrual at June 30, 2005	\$	\$ 1,773	\$	\$ 1,773
	<u> </u>	<u> </u>	<u> </u>	<u> </u>

Overview

As of June 30, 2005, the remaining accrual balance of \$1.8 million is related to a facility exit plan implemented in the first quarter of fiscal 2003 and is expected to be paid through the third quarter of fiscal 2009. The unpaid portion of facilities exit costs is included in the consolidated balance sheets under the captions Accrued restructuring charges current and Accrued restructuring charges non current .

In the first quarter of fiscal 2003, the Company announced a restructuring program that impacted approximately 100 positions across all business functions and closed its facilities in Irvine, California and Louisville, Colorado. This restructuring resulted in employee termination benefits of \$2.9 million, estimated facilities exit expenses of \$2.5 million, and asset write-offs in the amount of \$0.1 million. All charges were recorded in the three months ended December 31, 2002 in accordance with Emerging Issues Task Force 94-3 *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity* (EITF 94-3). As of September 30, 2003, payments relating to the employee termination benefits were completed. Actual payments for employee termination benefits were lower than the original provision as of September 30, 2003. As a result, \$0.1 million of excess accrual was reversed in the fourth quarter of fiscal 2003. In addition, the Company increased the restructuring liability related to the Irvine, California facility by \$1.7 million and \$0.1 million in fiscal 2003 and 2004, respectively, to reflect changes in the assumptions made previously for both the length of time the space would remain vacant and the sublease rate the Company would receive from subtenants. As of June 30, 2005, approximately \$2.7 million of the facilities exit expenses had been paid and sublease agreements have been signed for all vacant space.

Other liabilities	377	390
	<u> </u>	<u> </u>
Total other non-current accrued liabilities	<u>\$ 2,083</u>	<u>\$ 1,942</u>

Note 5. Segment Reporting and Significant Customers

The Chief Operating Decision Maker assesses the Company's performance by regularly reviewing the operating results as a single segment: Phoenix. The reportable segment is established based on the criteria set forth in the Statement of Financial Accounting Standards No. 131,

Disclosures about Segments of an Enterprise and Related Information (SFAS 131), including evaluating the Company's internal reporting structure by the chief operating decision maker and disclosure of revenues and operating expenses. The Chief Operating Decision Maker reviews

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

financial information presented on a consolidated basis, accompanied by disaggregated information about revenues by geographic region for purposes of making operating decisions and assessing financial performance. The Company does not assess the performance of its geographic regions on other measures of income or expense, such as depreciation and amortization, gross margin or net income. In addition Phoenix does not produce reports for, or measure the performance of its geographic regions based on any asset-based metrics. Therefore, geographic information is presented only for revenues.

Table of Contents**PHOENIX TECHNOLOGIES LTD.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****(UNAUDITED)**

The Company reports revenues by geographic area, which is categorized into five major countries/regions: North America, Japan, Taiwan, other Asian countries, and Europe (*in thousands*):

	Three months ended June 30,		Nine months ended June 30,	
	2005	2004	2005	2004
Revenues				
North America	\$ 7,631	\$ 3,957	\$ 16,078	\$ 12,203
Japan	4,504	7,000	18,544	18,819
Taiwan	7,999	9,798	29,394	23,745
Other Asian countries	1,218	1,551	5,414	3,582
Europe	2,381	794	7,523	3,923
Total revenues	\$ 23,733	\$ 23,100	\$ 76,953	\$ 62,272

For the three months ended June 30, 2005, one customer accounted for 27% of total revenues. For the same period one year ago, two customers accounted for 18% and 10% of total revenues, respectively. For the nine months ended June 30, 2005, one customer accounted for 14% of revenues and for the nine months ended June 30, 2004, two customers accounted for 11% and 10% of total revenues respectively. No other customers accounted for more than 10% of total revenues during these periods.

Note 6. Earnings (Loss) per Share

The following table presents the calculation of basic and diluted earnings (loss) per share required under Statement of Financial Accounting Standards No. 128, *Earnings per Share* (SFAS 128) (*in thousands, except per share amounts*):

	Three months ended June 30,		Nine months ended June 30,	
	2005	2004	2005	2004
Net income (loss)	\$ 738	\$ 912	\$ 5,970	\$ (2,133)
Weighted average common shares outstanding	24,893	24,471	24,759	24,413
Effect of dilutive securities (using the treasury stock method):				
Stock options	888	343	864	

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

Weighted average diluted common and equivalent shares outstanding

	2005	2004	2003	2002
	25,781	24,814	25,623	24,413
Earnings (loss) per share:				
Basic	\$ 0.03	\$ 0.04	\$ 0.24	\$ (0.09)
Diluted	\$ 0.03	\$ 0.04	\$ 0.23	\$ (0.09)

Basic earnings (loss) per share is computed using the weighted-average number of common shares outstanding during the period. Diluted net income per share is computed using the weighted-average number of common and dilutive potential common shares outstanding during the period. Diluted common-equivalent shares primarily consist of employee stock options and warrants, computed using the treasury stock method.

In computing diluted earnings per share, the average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options. During the three months ended June 30, 2005 and 2004, there were approximately 2.9 million and 3.8 million outstanding employee stock options, respectively, that are out-of-the-money and therefore excluded from the calculation of the dilutive securities. During the nine months ended June 30, 2005 and 2004, there were approximately 3.6 million and 3.4 million employee stock options, respectively, that are out-of-the-money and therefore excluded from the calculation of the dilutive securities. Stock options are considered to be out-of-the-money when the option exercise price exceeds the average share price during the respective periods. The average exercise price for the three months ended June 30, 2005 and 2004 was \$8.24 and \$6.13, respectively, and for the nine months ended June 30, 2005 and 2004 was \$7.99 and \$6.69, respectively. For the nine months ended June 30, 2004, the Company reported net losses and did not include the outstanding options in the calculation of diluted loss per share, as their inclusion would be anti-dilutive. The dilutive potential common shares that were anti-dilutive for that period amounted to 375,227 shares.

PHOENIX TECHNOLOGIES LTD.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

Note 7. Goodwill and Purchased Intangible Assets

Changes in the carrying value of goodwill and purchased intangible assets during the nine months ended June 30, 2005 were as follows (*in thousands*).

(In thousands)	Goodwill	Acquired Intangible Assets	Purchased Intangible Assets
	<u> </u>	<u> </u>	<u> </u>
Balance, September 30, 2004	\$ 13,433	\$ 630	\$ 18,500
Additions	500		
Deletions			
Foreign exchange adjustments			
	<u> </u>	<u> </u>	<u> </u>
Balance, June 30, 2005	<u>\$ 13,933</u>	<u>\$ 630</u>	<u>\$ 18,500</u>

In accordance with the terms of the purchase agreement for the acquisition of Integrity Science, Inc. (ISI) in February 2001, contingent consideration of \$1.5 million is to be paid out in equal annual increments beginning in fiscal 2004 providing that the developed technology purchased as part of the original business combination is still utilized within products at the annual milestone dates. In June 2004, the Company made the first payment of \$0.5 million in accordance with the earn-out terms noted above, and reported the payment as additional purchase price resulting in incremental goodwill. In May 2005, the Company completed the second payment of \$0.5 million, which was accrued for in March 2005 in accordance with the earn-out terms.

The following table summarizes amortization of goodwill and acquired intangible assets (*in thousands*):

	Three months ended June 30,		Nine months ended June 30,	
	2005	2004	2005	2004
	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Amortization of acquired intangible assets	\$ 17	\$ 17	\$ 53	\$ 51
Amortization of purchased technology	838	838	2,514	2,514
	<u> </u>	<u> </u>	<u> </u>	<u> </u>
Total acquisition-related charges	<u>\$ 855</u>	<u>\$ 855</u>	<u>\$ 2,567</u>	<u>\$ 2,565</u>

Note 8. Commitments and Contingencies

Litigation

The Company is subject to certain routine legal proceedings that arise in the normal course of its business. The Company believes that the ultimate amount of liability, if any, for any pending claims of any type (either alone or combined), including the legal proceedings described below, will not materially affect the Company's results of operations, liquidity, or financial position taken as a whole. However, the ultimate outcome of any litigation is uncertain, and unfavorable outcomes could have a material adverse impact. Regardless of outcome, litigation can have an adverse impact on the Company due to defense costs, diversion of management resources, and other factors.

Korean Electronic Certification Authority, Inc. v. Phoenix Technologies Ltd. and Phoenix Technologies (Hungary) Software Licensing, LLC. On April 21, 2003, the Korean Electronic Certification Authority, Inc., doing business as CrossCert, Inc. (CrossCert), filed a motion (the Preliminary Attachment Motion) in the

Table of Contents

PHOENIX TECHNOLOGIES LTD.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

Suwon District Court in Seoul, Korea, without notice to Phoenix, for a preliminary attachment under Korean law on Phoenix's expected payments from another Phoenix customer, Samsung Electronics Co., Ltd. (Samsung). CrossCert obtained the preliminary attachment on April 21, 2003 in the amount of KRW 496,608,750, or approximately USD \$412,000, which effectively enjoined a payment owing to the Company by Samsung. CrossCert's claim relates to a March 30, 2001 license agreement (the CrossCert Agreement) between CrossCert and Phoenix, under which Phoenix licensed certain software to CrossCert. Phoenix subsequently assigned its rights in the CrossCert Agreement to an affiliate, Phoenix Technologies (Hungary) Software Licensing, LLC (Phoenix-Hungary).

On June 14, 2003, CrossCert filed a complaint in the Suwon District Court in Seoul, Korea against both Phoenix and Phoenix-Hungary for breach of contract, seeking a return of the payments made under the CrossCert Agreement in the amount of approximately USD \$825,000, plus interest under Korean law. Phoenix subsequently filed an objection to the Korean's court's jurisdiction over the dispute based on a choice of forum clause in the CrossCert Agreement in which the parties agreed to the exclusive jurisdiction of the courts in Santa Clara County, California for any disputes arising out of the CrossCert Agreement. In October 2003, the Korean court dismissed CrossCert's suit against Phoenix for lack of jurisdiction. Phoenix then filed a motion for cancellation of the preliminary attachment. On November 24, 2004, the Korean court denied Phoenix's motion to cancel the preliminary attachment, and ruled that the preliminary attachment can remain in place because of the pendency of the U.S.-based lawsuit involving the parties (described below). On January 21, 2005, Phoenix deposited KRW 496,608,750, or approximately USD\$412,000, into escrow with the court pending the outcome of the U.S.-based lawsuit, and requested that the court cancel and release the preliminary attachment. The court cancelled the preliminary attachment on January 28, 2005.

Phoenix Technologies Ltd. and Phoenix Technologies (Hungary) Software Licensing, LLC v. Korean Electronic Certification Authority, Inc. On May 7, 2003, Phoenix and Phoenix-Hungary filed suit against CrossCert in Santa Clara County Superior Court in the United States of America for breach of contract, interference with contract, interference with prospective economic advantage and unfair competition under California Business and Professions Code Sections 17200 et seq. The claims in this case relate to the CrossCert Agreement and CrossCert's wrongful filing of the Preliminary Attachment Motion in Korea and its interference with Phoenix's contractual relationship with Samsung. Phoenix seeks damages in the amount of \$150,000 for CrossCert's failure to pay software maintenance fees, as well as all damages caused by CrossCert's wrongful conduct with respect to its filing of the Preliminary Attachment Motion in Korea and interference with prospective economic advantage, including lost goodwill, the extent of which is presently unknown. CrossCert filed a cross-complaint against Phoenix on October 24, 2003 for breach of contract, fraud and unfair competition under California Business and Professions Code Sections 17200 et seq. The parties attempted to mediate the dispute, and conducted a mediation of the case on August 6, 2004. The parties did not reach a settlement in that mediation conference.

On November 11, 2004, Phoenix filed an amended complaint which made additional claims. On March 14, 2005, Phoenix filed a second amended complaint to eliminate certain claims in exchange for CrossCert's elimination of its claims for unfair competition under California Business and Professions Code Section 17200 et seq. and breach of the covenant of good faith and fair dealing. Trial is currently set for September 26, 2005.

USA & Regal Groups, Inc. d.b.a. Sterling Pacific v. Phoenix Technologies Ltd. d.b.a. Phoenix Technologies Asia Pacific, Ltd., Phoenix Technologies Asia Pacific, Ltd., Al Sisto, David Gibbs, George Man and Does 1 through 100, inclusive. On June 10, 2004, Sterling Pacific filed a complaint against Phoenix in Orange County Superior Court for fraud, negligent misrepresentation, breach of contract, rescission, violation of California Business and Professions Code Sections 17200 et seq., economic duress and common count. The claim arises from a March 31, 2004 Manufacturing License and Distribution Agreement between a subsidiary of Phoenix and Sterling Pacific, under which the Phoenix subsidiary

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

licensed certain technology to Sterling Pacific for the purpose of manufacturing and distributing a Sterling Pacific hardware product. Sterling Pacific seeks return of the amounts paid (USD \$350,000) as well as exemplary damages for the alleged fraud.

Table of Contents

PHOENIX TECHNOLOGIES LTD.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

The parties agreed to dismiss the suit in Orange County and re-file in Santa Clara County. The complaint was filed in Santa Clara County on September 21, 2004. Phoenix filed a demurrer to the complaint on December 1, 2004, claiming that Sterling Pacific lacked the standing and capacity to sue. In response to the demurrer, Sterling Pacific filed a first amended complaint curing the defects on January 14, 2005, and the demurrer was taken off the calendar. The parties settled the case pursuant to mediation on May 18, 2005. In settling the case, Phoenix agreed to pay Sterling Pacific the sum of \$275,000 in full settlement and compromise of all claims and causes of action. The case has been dismissed.

In late July 2005, the Company received an assessment from the Taiwanese tax authorities disallowing certain intercompany general and administrative expenses reported on the Company's tax return for the 2000 tax year. The Company is currently consulting with its Taiwanese tax advisors but is unable to assess the probability or magnitude of the financial impact of the tax assessment at this time.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report on Form 10-Q, including without limitation the Management's Discussion and Analysis of Financial Condition and Results of Operations, contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements may include, but are not limited to, statements concerning future liquidity and financing requirements, potential price erosion, plans to make acquisitions, dispositions or strategic investments, expectations of sales volume to customers, results of the SEC's informal inquiry into revenue allocation among products and future revenue growth, and plans to improve and enhance existing products and develop new products. Words such as could, expects, may, anticipates, believes, estimates, and other similar expressions are intended to indicate forward-looking statements. All forward looking statements included in this document are based upon information available to the Company as of the date hereof, and the Company assumes no obligation to update any such forward looking statement to reflect events or circumstances occurring after the date hereof. Actual results could differ materially from the Company's current expectations. Some of the factors that could cause future results to materially differ from the recent results or those projected in the forward-looking statements include, but are not limited to, significant increases or decreases in demand for our products, increased competition, lower prices and margins, changes in customer buying patterns, failure to successfully develop and market new products and technologies, competitor introductions of superior products, continued industry consolidation, instability and currency fluctuations in international markets, product defects, failure to secure intellectual property rights, results of litigation and regulatory inquiries, failure to retain and recruit key employees, acts of war or global terrorism, power shortages and unexpected natural disasters. For a more detailed discussion of these and other risks associated with our business, see the Risk Factors section below and the Management's Discussion and Analysis of Financial Condition and Results of Operations Risk Factors section of our Annual Report on Form 10-K for the year ended September 30, 2004.

The following discussion should be read in conjunction with our consolidated financial statements and the related notes and other financial information appearing in our Form 10K for the fiscal year ended September 30, 2004 filed December 27, 2004.

Available Information

Our Web site is www.phoenix.com. Through a link on the Investor Relations section of our Web site, the Company makes available the following filings as soon as reasonably practical after they are electronically filed with or furnished to the SEC: the Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and any amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934. All such filings are available free of charge. Information contained on the Company's Web site is not part of this report.

Company Overview

We are a global leader in the development, design, and support of software products that define, identify, and restore connected digital devices based on the x.86 microprocessor architecture. These devices are targeted at both the industrial and consumer marketplaces, and include, but are not limited to, personal computers (PCs), servers, industrial computers (IPCs), point-of-sale computers (POS), printers, copiers, medical devices, automotive controls, gaming systems, and home entertainment systems. In addition to key products, we also provide support services to our customers as required, such as training, maintenance, and engineering services.

We provide Core System Software (CSS), the evolution of BIOS (Basic Input-Output System), for PCs and servers, where we are the global leader, as well as for other devices. Our CSS customers are usually the devices' original equipment manufacturers (OEMs) and original design manufacturers (ODMs), who manufacture the devices with CSS firmware built-in.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

We also provide additional software applications products for backup and restore for a device's contents, device identification, instant-on access to certain frequently-used applications, as well as other device-enabling capabilities. Our customers for these applications products include OEMs as well as others with greater ability to market our products in solutions for devices that have already been delivered to the installed base; these customers include independent software vendors (ISVs), system builders, system integrators, IT departments, and in some cases end-users.

We believe that our products and services enable our customers to differentiate their products and packaged solutions through connected digital devices that are safer to use, more reliable, and significantly easier to use. They also enable our customers to bring these products and solutions to market faster, while reducing their manufacturing and support costs.

Fiscal 2005 Third Quarter Overview

Phoenix analyzes revenue along two dimensions: (a) platform, with PCs and servers representing one category and non-PC devices, including consumer and industrial devices, representing a second category; and (b) products, with Core System Software representing one category and applications representing the second category. We disclose revenue breakdowns in three resulting sectors (1) PC/Server Core System Software, (2) PC/Server Applications, and (3) total Non-PC Devices (including both CSS and applications) which will be discussed in more detail under Results of Operations and Revenues.

The PC/Server Core System Software sector is currently our largest, representing 64% of our total revenue of \$23.7 million during the third quarter of fiscal 2005. Revenue in this sector decreased by \$2.9 million, or 16%, to \$15.1 million in the third quarter from \$18.0 million in the second quarter. Revenue in the PC/Server Applications sector increased by \$0.8 million, or 18% to \$5.2 million in the third quarter from \$4.4 million in the second quarter. Revenues in the Non-PC Device sector decreased by \$1.2 million, or 26%, from \$4.6 million in the second quarter of 2005 to \$3.4 million in the third quarter of 2005.

During the third quarter of fiscal 2005, we continued to enter into volume purchase agreements (or VPAs) with our larger ODM and OEM customers. Under VPAs, customers commit to a fixed payment schedule for an agreed-upon number of units, typically for anticipated consumption over the next several quarters. Amounts that have been invoiced under VPAs and relate to amounts not recognized as of the end of the quarter are recorded as deferred revenues. Our total deferred revenue increased to \$9.0 million during the third quarter from \$6.0 million at the end of the second quarter of fiscal 2005. The increase was primarily due to several volume purchase agreements closed in our Asia Pacific and Japan regions that were added to deferred revenues.

From time to time we enter into arrangements with our customers in which they pay a fixed upfront fee for an unlimited number of units. In all cases these paid-up arrangements are restricted either to specific Phoenix products, or to specific devices sold by our customers or both. These arrangements are negotiated in instances where the financial and strategic considerations for doing so are appropriate. During the third quarter of fiscal 2005, our revenues from paid-up licenses decreased from \$11.2 million in the second quarter of 2005, or 41% of revenues, to \$9.5 million in the third quarter of 2005, or 40% of revenues.

From time to time we enter into OEM contracts under which we receive undifferentiated license fees that cover both PC/Server Core System Software and PC/Server Applications. In order to allocate the undifferentiated license fees between Core System Software and Applications, we

estimate the percentage of the undifferentiated license fee that would have applied to each product had the contract differentiated between the license fee for Core System Software and the license fee for Applications for purposes of discussing our revenue categories. This allocation has no impact on the timing or amount of our revenue recognition in any period. Our estimation methodology involves examination of various factors, such as the average sale prices for Core System Software and for Applications in a broad range of large transactions; the time period over which the average selling prices are calculated; the specific products involved; and competitive factors. This estimation methodology requires significant management judgment. As new transactions occur, we anticipate that our estimation methodology will continue to reflect a current assessment of factors that management deems relevant to making an appropriate estimate.

In closing the current quarter, we discovered that we had previously allocated undifferentiated license fees under certain contracts with an OEM customer for products installed on notebook computers but not for products installed on desktop computers. Desktop-related revenues under these contracts had all been reported as Core System Software revenue. As a result, we reallocated certain PC-related revenues, for the four quarters from the third quarter of fiscal 2004 through the second quarter of fiscal 2005, from Core System Software to Applications. The impact was a shift of approximately \$0.4 million, \$0.5 million, \$0.6 million and \$0.7 million, respectively, in these quarters from Core System Software revenue to Applications revenue. Total revenues, net income and cash flows from operations were not affected by this reallocation.

In August 2005, we received an informal inquiry from the Securities and Exchange Commission with a request for documents that appears to relate to how we allocate revenue between Core System Software and Applications. We are fully cooperating with the SEC. We have reassessed our historical allocation methodology and its application and, after considering the reallocation described above, believe that it continues to be appropriate. There can be no assurance that the SEC or management will not further examine how we allocate revenue under undifferentiated license fees or propose reallocation of certain revenues between Core System Software and Applications. We would not expect any such reallocation to affect total revenues, net income or cash flows from operations.

We plan to continue to enter into long-term VPA transaction agreements and paid-up license arrangements with our key customers; we believe that these deals stabilize our product pricing, block out our competitors and enable the relationship to focus on newer products and technology. Paid-up licenses also offer our customers the pricing flexibility that they require for their business needs. We also continue to develop and strengthen our partnerships with key system builders and channel distributors, allowing us to establish greater brand awareness of Phoenix and create a strong end-user demand for our core system and applications software products. Finally, the Company continues to invest in operational improvements, such as deploying and re-aligning engineering and sales resources to geographically better serve our customers, and improving internal processes and controls to enhance our ability to execute our strategies. There can be no assurance that our efforts will be successful.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Operating expenses remained consistent at \$18.0 million for the third and second quarter of fiscal 2005.

Critical Accounting Policies and Estimates

We believe the following critical accounting policies, among others, are affected by our more significant judgments and estimates used in the preparation of our consolidated financial statements. The Company has discussed the critical accounting policies and estimates with the Audit Committee of the Board of Directors.

Revenue Recognition. We license software under non-cancelable license agreements and provide services including non-recurring engineering efforts, maintenance (consisting of product support services and rights to unspecified upgrades on a when-and-if available basis), and training. In many cases our products are incorporated into the products of our OEM/ODM customers.

Revenues from software license agreements are recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collection is probable. Royalty revenues from OEMs/ODMs are generally recognized in each period based on estimated consumption by the OEMs/ODMs of products containing our software, provided that all other revenue recognition criteria have been met. We normally recognize revenue for all consumption prior to the end of the accounting period. However, for volume purchase agreements (VPAs) we also recognize revenues for units estimated to be consumed by the end of the following accounting quarter, to the extent that the customer has been billed for such consumption prior to the end of the quarter and provided all other revenue recognition criteria have been met. Since we generally receive quarterly royalty reports from our OEMs/ODMs approximately 30 to 60 days following the end of the quarter, we have put processes in place to reasonably estimate the royalty revenues, including obtaining estimates of production from our OEM/ODM customers, utilizing historical experience, and other relevant current information. We accrued \$3.5 million and \$5.2 million of royalty revenues from our OEM/ODM customers as of June 30, 2005 and March 31, 2005, respectively. To date, the variances between estimated and actual revenues have been immaterial. Although management believes that it has a reliable basis for making reasonable estimates, the actual results could differ depending on customer or market factors.

Amounts that have been invoiced under VPAs and relate to anticipated consumption beyond the following accounting quarter that we have determined to be not fixed or determinable are recorded as deferred revenues. During an accounting period, deferred revenues increase (or decrease) primarily to the extent that the dollar amount of new VPAs entered into during the period is greater (or less) than the revenue that is recognized during the period from those agreements and the outstanding deferred revenue balance at the beginning of the period. We believe virtually all deferred revenue will be recognized as revenue within the next 12 months.

In addition, we may execute multiple contracts/amendments with the same customer several times throughout a year. These contracts are reviewed to determine if they are linked and should be evaluated as one deal. The review includes consideration of Statement of Position 97-2, *Software Revenue Recognition* (SOP 97-2) and Technical Practice Aid, *Software Revenue recognition for multiple-element arrangements* (TPA 5100.39) guidelines and the standard historical business practice of our company.

Allowance for Sales and Doubtful Accounts. We record provisions for estimated sales allowances against revenues in the same period as the related revenues are recorded. Provisions for doubtful accounts are recorded in general and administrative expenses. At June 30, 2005 and

March 31, 2005, the allowance for

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

sales and doubtful accounts was \$0.9 million and \$1.0 million respectively. These estimates are based on our assessment of the probable collection from specific customer accounts, the aging of the accounts receivable, historical royalty revenue variances, analysis of credit memo data, bad debt write-offs, and other known factors. If economic or specific industry trends worsen beyond our estimates, or if there is a deterioration of our major customers' credit worthiness, or actual defaults are higher than our estimates based on historical experience, we would increase the allowances for sales and doubtful accounts which would impact revenue and expense, respectively, as appropriate.

Intangible Assets. Intangible assets include prepaid royalties, purchased technologies, goodwill and other intangibles. At June 30, 2005 and March 31, 2005, these assets, net of accumulated amortization, totaled \$22.5 million and \$23.9 million, respectively.

Prepaid royalties represent payments to several third party technology partners for their software that is incorporated into certain of our products. All other intangible assets were derived from our acquisitions. The cost of the acquisitions is allocated to the assets and liabilities acquired, including intangible assets based on their respective estimated fair value at the date of acquisition, with the remaining amount being classified as goodwill. The useful life of the intangible assets was estimated based on the period over which the assets were expected to contribute directly and indirectly to the future cash flows. If assumptions regarding the estimated future cash flows and other factors to determine the fair value of the respective assets change in the future, we may be required to record impairment charges.

Accordingly, the allocation of the acquisition cost to intangible assets and goodwill has a significant impact on our future operating results. The original recorded values of intangible assets and goodwill are based on third-party appraisals. The allocation process requires the extensive use of estimates and assumptions, including estimates of future cash flows expected to be generated by the acquired assets. In accordance with the terms of the purchase agreement for the acquisition of Integrity Science, Inc. (ISI) in February 2001, contingent consideration of \$1.5 million is to be paid out in equal annual increments beginning in fiscal 2004 providing that the developed technology purchased as part of the original business combination is still utilized within products at the annual milestone dates. In June 2004, the Company made the first payment of \$0.5 million in accordance with the earn-out terms noted above, and recorded the payment as additional purchase price resulting in incremental goodwill. In May 2005, the Company completed the second payment of \$0.5 million, which was accrued for in March 2005 in accordance with the earn-out terms.

Income Taxes - Estimates of Effective Tax Rates, Deferred Taxes Assets and Valuation Allowance: When preparing our financial statements, we estimate our income taxes based on the various jurisdictions where we conduct business. This requires us to (1) estimate our current tax exposure and (2) assess temporary differences due to different treatment of certain items for tax and accounting purposes thereby resulting in deferred tax assets and liabilities. In addition, on a quarterly basis, we perform an assessment of the recoverability of the deferred income tax assets, which is principally dependent upon our ability to achieve taxable income in specific geographies.

After examining the available evidence at June 30, 2005, we believe a full valuation allowance was necessary for the U.S. Federal and state net deferred tax assets. The valuation allowance was calculated in accordance with the provisions of SFAS 109, which requires an assessment of both negative and positive evidence when measuring the need for a valuation allowance. In accordance with SFAS 109, evidence such as operating results during recent periods is given more weight than our expectations of future profitability, which are inherently uncertain. Despite recent profitable results our past financial performance represented sufficient negative evidence to require a full valuation allowance against our U.S. Federal and state deferred tax assets under SFAS 109. We intend to maintain a full valuation allowance against our deferred tax assets until sufficient positive evidence exists to support realization of the U.S. Federal and state deferred tax assets.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****Results of Operations**

The following table sets forth, for the periods indicated, certain amounts included in the Company's Consolidated Statements of Income, the relative percentages that those amounts represent to consolidated revenue (unless otherwise indicated), and the percentage change in those amount from period to period.

				<u>Percent of Revenue</u>	
	<u>2005</u>	<u>2004</u>	<u>% Change</u>	<u>2005</u>	<u>2004</u>
Three months ended June 30:					
Revenues	\$ 23,733	\$ 23,100	3%	100%	100%
Cost and Expenses					
Cost of revenues	\$ 4,371	\$ 3,723	17%	18%	16%

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****Revenues**

Revenues by geographic region for the three and nine months ended June 30, 2005 and 2004 were as follows (*in thousands, except percentages*):

	Amount			% of Consolidated Revenue	
	2005	2004	% Change	2005	2004
Three months ended June 30:					
North America	\$ 7,631	\$ 3,957	93%	32%	17%
Japan	4,504	7,000	(36)%	19%	30%
Taiwan	7,999	9,798	(18)%	34%	43%
Other Asian countries	1,218	1,551	(21)%	5%	7%
Europe	2,381	794	200%	10%	3%
Total revenues	\$ 23,733	\$ 23,100	3%	100%	100%

	Amount			% of Consolidated Revenue	
	2005	2004	% Change	2005	2004
Nine months ended June 30:					
North America	\$ 16,078	\$ 12,203	32%	21%	20%
Japan	18,544	18,819	(1)%	24%	30%
Taiwan	29,394	23,745	24%	38%	38%
Other Asian countries	5,414	3,582	51%	7%	6%
Europe	7,523	3,923	92%	10%	6%
Total revenues	\$ 76,953	\$ 62,272	24%	100%	100%

Three Months Ended June 30, 2005 Compared to Three Months Ended June 30, 2004

Total revenues for the three months ended June 30, 2005 increased by 3% compared to the same period in fiscal 2004. Increases in revenue for the three months ended June 30, 2005 from North America and Europe were primarily attributable to strength in our Applications and Non-PC device revenue in those regions compared to the same period a year ago while declines in Japan and Taiwan were primarily attributable to lower run rates in our core system software business.

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

PC/Server Core System Software revenues were \$15.1 million for the three months ended June 30, 2005 compared to \$17.2 million for the same period in fiscal 2004. This decrease was primarily due to the

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

impact of closing a large fully paid-up license transaction with a strategic customer in our Asia Pacific region in the third quarter of fiscal 2004. However, we experienced continued success in securing design wins and shipments of our Trusted Core product line across the desktop, notebook, and server businesses and we expect this to continue in future quarters, although we do not expect significant revenue growth overall in this sector.

PC/Server Applications revenues were \$5.2 million for the three months ended June 30, 2005 as compared to \$1.8 million for the same period in fiscal 2004. The increase was related to growth in our recovery and security applications business across an increasingly wider base of core customers in the PC-OEM and ODM spaces, as well as to a fully paid-up license transaction with one OEM for which a portion of the revenues was allocated to Applications. In particular, our security related applications revenues increased significantly during the third quarter of fiscal 2005, as we generated revenues from our TrustConnector product from several large system integrators in Japan. We expect this growth trend to continue across all regions as we make progress in reaching not only the market of new PC's shipped, but the larger and wider installed base of PC's as well.

The last revenue category is Non-PC devices, which includes both the Core System Software and applications. The Non-PC device sector recorded a decrease in revenue to \$3.4 million in the third quarter of fiscal 2005 from \$4.0 million in the third quarter of fiscal 2004. This decrease we associated with general volatility in revenues in this sector due to seasonality and the timing of customer products for which we secure design wins being brought to market. However, we signed contracts in the third quarter of fiscal 2005 with key customers in the gaming, set-top box, and storage device markets. We expect continued long-term growth in this category, as our efforts to penetrate customer product design cycles in prior quarters drives increased unit shipments and product revenues.

Cost of Revenues and Gross Margin

Cost of revenues consists of third-party license fees, post-sales engineering support costs and amortization of purchased technology. Gross margin as a percentage of revenues was 82% and 84% for the three months ended June 30, 2005 and 2004, respectively. Gross margin was \$19.4 million for each of the three months ended June 30, 2005 and June 30, 2004.

Research and Development Expenses

Research and development expenses were \$5.1 million and \$5.8 million for the three months ended June 30, 2005 and 2004, respectively. As a percentage of revenues, these expenses represented 22% and 25%, respectively. The decrease in expenses was due to lower payroll and benefit-related spending as a result of overall lower headcount in place, as well as accelerating the hiring of new headcount in lower cost regional offices in China and India as part of our long-term strategy for developing new core system software and applications products.

Sales and Marketing Expenses

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

Sales and marketing expenses were \$9.0 million and \$8.4 million for the three months ended June 30, 2005 and 2004, respectively. As a percentage of revenues, these expenses represented 38% and 36%, respectively. The increase in sales and marketing expense for the period was due to increased marketing programs spending, as we invested heavily in programs and initiatives to grow our emerging distribution channel and installed base revenues.

General and Administrative Expenses

General and administrative expenses were \$3.9 million and \$3.4 million for the three months ended June 30, 2005 and 2004, respectively. As a percentage of revenues, these expenses represented 16% and 15%, respectively. The increase in general and administrative expenses was due to increased consulting and

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

professional services expenses pertaining to our ongoing Sarbanes-Oxley compliance efforts and other audit related activities, as well as increased payroll and related compensation expenses as a result of increased headcount supporting our general and administrative related activities.

Provision for Income Taxes

The Company recorded an income tax provision of \$0.4 million for the three months ended June 30, 2005, as compared to provision of \$0.9 million for the same period ended June 30, 2004. At the close of our most recent fiscal year end, management determined that based upon its assessment of both positive and negative evidence available it was appropriate to continue to provide a full valuation allowance against any U.S. Federal and state net deferred tax assets. As of June 30, 2005 it continues to be the assessment of management that a full valuation against the U.S. Federal and state net deferred tax assets is appropriate.

Nine Months Ended June 30, 2005 Compared to Nine Months Ended June 30, 2004

Total revenues for the nine months ended June 30, 2005 increased by 24% compared to the same period in fiscal 2004. The increase in revenue for the nine months ended June 30, 2005 from North America, Taiwan, other Asian countries and Europe were primarily attributable to increased unit shipments in our PC/Server Core System Software and Applications business compared to the same period a year ago.

PC/Server Core System Software revenues were \$51.4 million for the nine months ended June 30, 2005 compared to \$43.9 million for the same period in fiscal 2004. This increase was primarily due to increased unit shipments in this sector, partially offset by slightly declining overall average selling prices. The growth in unit shipments was the result of both organic growth from closing several key volume purchase agreement deals for our First BIOS and TrustedCore products, as well as the impact of entering into several significant fully paid-up license transactions with strategic customers in the Asia Pacific and Japan regions.

PC/Server Applications revenues were \$13.2 million for the nine months ended June 30, 2005 as compared to \$5.6 million for the same period in fiscal 2004. The increase was related to strong growth in our applications business across an increasingly wider base of core customers in the PC-OEM and ODM spaces, including closing a key application deal with a major OEM in the North America region. In particular, our security related applications revenues increased significantly, as we generated revenues from our TrustConnector product from several large system integrators in Japan.

The non-PC device sector remained relatively consistent at \$12.3 million for the nine months ended June 30, 2005 as compared to \$12.7 million for the same period in fiscal 2004. The minor decrease was associated with variability due to the timing of customer products for which we have secured design wins being brought to market.

Cost of Revenues and Gross Margin

Gross margin for the nine months ended June 30, 2005, was \$64.0 million, as compared to \$50.9 million for the same period in fiscal 2004. Gross margin as a percentage of revenues was 83% and 82% for the nine months ended June 30, 2005 and 2004, respectively. The increase in gross margin during the nine month period were mostly attributable to higher growth in overall revenue in relation to growth in post-sales customer support and third-party license fees. Amortization of purchased technologies from business combinations was \$2.5 million for the nine months ended June 30, 2005 and for the same period in 2004

Research and Development Expenses

Research and development for the nine months ended June 30, 2005 and 2004, were \$15.1 million and \$16.8 million, respectively. As a percentage of revenues, these expenses represented 20% and 27%,

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

respectively. The decrease from prior year was due to lower payroll and benefit-related spending as a result of overall lower headcount in place, as well as accelerating the hiring of new employees in lower cost regional offices in China and India.

Sales and Marketing Expenses

Sales and marketing expenses were \$27.0 million and \$24.1 million for the nine months ended June 30, 2005 and 2004, respectively. As a percentage of revenues, these expenses represented 35% and 39%, respectively. The increase in expenses for this period was due to increased headcount related expenses in our sales and business development groups from the addition of employees to support our channel and non-PC sales businesses, as well as from increased marketing programs expenses as we continued to invest in strategies to build our customer base.

General and Administrative Expenses

General and administrative expenses were \$11.5 million and \$9.6 million for the nine months ended June 30, 2005 and 2004, respectively. As a percentage of revenues, these expenses represented 15% for both years respectively. The increase in general and administrative expenses was mostly due to increased consulting and professional services related expenses pertaining to our ongoing Sarbanes-Oxley compliance efforts and other audit-related activities, as well as increased payroll and related compensation expenses as a result of increased overall headcount across all G&A related functions.

Provision for Income Taxes

The income tax provision for the nine months ended June 30, 2005 of \$3.4 million is comprised primarily of taxes on foreign income and foreign withholding taxes, but also includes a provision for state income taxes and Federal alternative minimum taxes. The effective tax rate for the nine months ended June 30, 2005 was 36% compared with (1,893)% for the comparable period ended June 30, 2004. This change in the effective tax rate was primarily due to the effect of overall pretax profitability during the nine months ended June 30, 2005 in certain geographic jurisdictions that the Company operates in as contrasted with a pretax loss during the comparable period ended June 30, 2004.

Financial Condition

At June 30, 2005, our principal source of liquidity consisted of cash and cash equivalents totaling \$47.5 million. The primary source of cash during the nine months ended June 30, 2005 was cash provided by operating activities of \$11.6 million, and proceeds from stock purchases under stock option and stock purchase plans of \$2.7 million. The primary use of cash during the same period was \$4.0 million from the net purchases of investments and \$2.5 million for capital additions. At June 30, 2004, our principal source of liquidity consisted of cash and cash equivalents totaling \$38.9 million. The primary source of cash during the nine months ended June 30, 2004 was \$15.8 million from operating activities and proceeds from stock purchases under stock option and stock purchase plans of \$1.2 million. The primary use of cash during the same period was \$1.0 million for capital additions and \$0.5 million of additional payment related to the ISI acquisition for the use of certain

technology. There were no outstanding borrowings with banks in either period.

Commitments

We have commitments under non-cancelable operating leases ranging from one to ten years for \$20.3 million. The operating lease obligations include a net lease commitment for the Irvine location of \$1.8 million, after sublease income of \$1.1 million. The Irvine net lease commitment was included in the Company's fiscal 2003 first quarter restructuring plan. See Note 3 to the consolidated financial statements for further information on the Company's restructuring plans.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In addition, we may have commitments pursuant to the original purchase agreement with ISI to make anniversary payments of \$0.5 million per year for 3 years, from fiscal 2004, for the use of certain technology in our future products. In June 2004, we made the first payment in accordance with the earn-out terms in the agreement noted above. In May 2005, the Company completed the second payment of \$0.5 million, which was accrued for in March 2005 in accordance with the earn-out terms.

We did not enter into any additional material commitments for capital expenditures or non-cancelable purchase commitments during the quarter ended June 30, 2005.

Overview

Based on past performance and current expectations, we believe that current cash equivalent, short-term investments, other available for sale securities and cash-on hand generated from operations will satisfy our working capital needs, capital expenditures, commitments and other liquidity requirements associated with our existing operations through at least the next twelve months. There are no transactions and arrangements that are reasonably likely to materially affect liquidity or the availability of our requirements for capital.

Risk Factors

The additional following factors should be considered carefully when evaluating our business.

Fluctuations in Operating Results

Our future operating results may vary substantially from period to period. The timing and amount of our license fees are subject to a number of factors that make estimating revenues and operating results prior to the end of a quarter uncertain. While we receive recurring revenues from royalty-based license agreements and some agreements contain minimum quarterly royalty commitments, a significant amount of license fees in any quarter is dependent on signing agreements and delivering the licensed software in that quarter. Generally, we experience a pattern of recording 50% or more of our quarterly revenues in the third month of the quarter. We have historically monitored our revenue bookings through regular, periodic worldwide forecast reviews within the quarter. There can be no assurances that this process will result in our meeting revenue expectations. Operating expenses for any year are normally based on the attainment of planned revenue levels for that year and are generally incurred ratably throughout the year. As a result, if revenues were less than planned in any period while expense levels remain relatively fixed our operating results would be adversely affected for that period. In addition, unplanned expenses could adversely affect operating results for the period in which such expenses were incurred.

Product Development

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

Our long-term success will depend on our ability to enhance existing products and to introduce new products timely and cost-effectively that meet the needs of customers in existing and emerging markets. There can be no assurance that we will be successful in developing new products or in enhancing existing products or that those new and/or enhanced products will be introduced before our competitors make their introductions, or that those products will meet market requirements. Delays in introducing new products can adversely impact acceptance and revenues generated from the sale of such products. We have, from time to time, experienced such delays. Our software products and their enhancements contain complex code that may contain undetected errors and/or bugs when first introduced. There can be no assurance that new products or enhancements will not contain errors or bugs that will adversely affect commercial acceptance of such new products or enhancements. The introduction of new products in the short term will also depend on adoption of our Phoenix cME and applications as well as the overall market demand for PCs and other digital devices.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Uncertain Geopolitical Environment and Unfavorable Economic and Market Conditions

Adverse economic conditions in certain geographic regions have contributed to recent slowdowns in the PC and information appliance industries and could continue to impact our business, resulting in:

Reduced demand for our products as a result of a decrease in capital spending by our customers;

Changes in customer production strategies;

Increased price competition for our products, partially as a consequence of a high growth of the PC market in underdeveloped nations, where the price target is below \$500 for a desktop; and

Higher operating expenses as a percentage of revenues.

Recent political turmoil in many parts of the world, including terrorist and military actions, may continue to put pressure on global economic conditions. If the global economic and market conditions do not improve, or if they deteriorate further, we may continue to experience material adverse impacts on our business, operating results and financial condition as a consequence of the above factors or otherwise.

Changes in Industry and Market Conditions

In response to changes in industry and market conditions, we may be required to strategically realign our resources and consider restructuring, disposing of, or otherwise exiting businesses. Any decision to limit investment in, or dispose of or otherwise exit businesses may result in the recording of special charges, such as technology related write-offs, workforce reduction costs, or changes relating to consolidation of excess facilities. Our estimates with respect to the useful life or ultimate recoverability of our carrying basis of assets, including purchased intangible assets, could change as a result of such assessments and decisions. Further, our estimates relating to the liabilities for excess facilities are affected by changes in real estate market conditions. Additionally, we are required to perform goodwill impairment tests on an annual basis and between annual tests in certain circumstances. There can be no assurance that future goodwill impairment tests will not result in a charge to earnings.

Dependence on New Product Releases by Our Customers

Successful introduction of new products is key to our success in both our CSS and new applications businesses. Frequently our new products are used in our customers' new products, making each of us dependent on the other for product introduction schedules. It can happen that a customer may not be able to introduce one of its new products for reasons unrelated to our new product. In these cases, we would not be able to ship our new product until the customer had resolved its other problems.

Due to continued economic downturn and market uncertainties in certain geographic regions, customers may delay their product introductions. If our customers do delay their product introductions, our ability to generate revenue from our new application products would be adversely affected.

Risks in Acquisitions

Our growth is dependent upon market growth, our ability to enhance our existing products and introduction of new products on a timely basis. We have and will continue to address the need to introduce new products through acquisitions of other companies and technologies. Acquisitions involve numerous risks, including the following:

Difficulties in integrating the operations, technologies, products and personnel of the acquired companies;

Diversion of management's attention from normal daily operations of the business;

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Potential difficulties in completing projects associated with in-process research and development;

Difficulties in entering markets in which we have no or limited direct prior experience and where competitors in such markets have stronger market positions;

Insufficient revenues to offset increased expenses associated with acquisitions; and

Potential loss of key employees of the acquired companies.

Acquisitions may also cause us to:

Issue common stock that would dilute our current shareholders' percentage ownership;

Assume liabilities;

Record goodwill and non-amortizable intangible assets that will be subject to impairment testing and potential periodic impairment charges;

Incur amortization expenses related to certain intangible assets;

Incur large and immediate write-offs of in-process research and development costs; or

Become subject to litigation.

Mergers and acquisitions of high-technology companies are inherently risky, and no assurance can be given that our previous or future acquisitions will be successful or will not adversely affect our business, operating results, or financial condition. Failure to manage and successfully integrate acquisitions we make could harm our business and operating results in a material way. Even when an acquired company has already developed and marketed products, there can be no assurance that product enhancements will be made in a timely fashion or that all pre-acquisition due diligence will have identified all possible issues that might arise with respect to such products.

We have not made acquisitions that result in in-process research and development expenses being charged in an individual quarter. These charges may occur in future acquisitions in any particular quarter resulting in variability in our quarterly earnings.

Litigation and SEC Inquiry Risks

From time to time, we become involved in litigation claims and disputes in the ordinary course of business. We are currently involved in several lawsuits. Litigation can be expensive, lengthy and disruptive to normal business operations. Moreover, the results of complex legal proceedings are difficult to predict. An unfavorable resolution of a particular lawsuit could have a material adverse effect on our business, operating results, or financial condition.

In August 2005, we received an informal inquiry from the Securities and Exchange Commission with a request for documents that appear to relate to how we allocate revenue between Core System Software and Applications. We are fully cooperating with the SEC and intend to continue to do so. We cannot predict the duration or outcome of the SEC's inquiry. If the SEC expands its informal inquiry or decides to pursue enforcement action against us, or any other governmental agency or regulatory body takes similar action, our management could be distracted, we could incur substantial costs and there could be a material adverse effect on our business.

Protection of Intellectual Property

We rely on a combination of patent, trade secret, copyright, trademark, and contractual provisions to protect our proprietary rights in our software products. There can be no assurance that these protections will be adequate or that competitors will not independently develop technologies that are substantially equivalent or superior to our technology. In addition, copyright and trade secret protection for our products may be unavailable or unreliable in certain foreign countries. As of June 30, 2005, we have been issued 73 patents in the U.S. and had 39 patent applications in process in the United States Patent and Trademark Office. On a worldwide basis, we have been issued 137 patents with respect to our product offerings and have 140 patent applications pending with respect to certain of the products we market. We maintain an active internal program designed to identify employee inventions worthy of being patented. There can be no assurance that any of the pending applications will be approved and patents issued or that our engineers will be able to develop technologies capable of being patented. Also, as the number of software patents increases, we believe that companies that develop software products may become increasingly subject to infringement claims.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

There can be no assurance that a third party will not assert that their patents or other proprietary rights are violated by products offered by us. Any such claims, whether or not meritorious, may be time consuming and expensive to defend, can trigger indemnity obligations owed by us to third parties and may have an adverse effect on our business, results of operations and financial condition. Infringement of valid patents or copyrights or misappropriation of valid trade secrets, whether alleged against us, or our customers, and regardless of whether such claims have merit, could also have an adverse effect on our business, results of operations and financial condition.

Effective Tax Rates

Our future effective tax rates could be adversely affected by earnings being lower than anticipated in jurisdictions where we have varying statutory rates or by changes in tax laws or interpretations thereof.

Entrance into New or Developing Markets

As we focus on new market opportunities, we will increasingly compete with large, established suppliers as well as start-up companies. Some of our current and potential competitors may have greater resources, including technical and engineering resources, than we do. Additionally, as customers in these markets mature and expand, they may require greater levels of service and support than we have provided in the past. We expect that demand for these types of service and support may increase in the future. There can be no assurance that we can provide products, service, and support to effectively compete for these market opportunities. Further, provision of greater levels of services may result in a delay in the timing of revenue recognition.

Changes in Financial Accounting Standards

We prepare our financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP). GAAP are subject to interpretation by the Financial Accounting Standard Board, the American Institute of Certified Public Accountants (AICPA), the SEC and various bodies appointed by these organizations to interpret existing rules and create new accounting policies. Accounting policies affecting software revenue recognition, in particular, have been the subject of frequent interpretations, which have had a profound effect on the way we license our products. As a result of the enactment of the Sarbanes-Oxley Act in 2002 and the related scrutiny of accounting policies by the SEC and the various national and international accounting industry bodies, we expect the frequency of accounting policy changes to accelerate. Future changes in financial accounting standards, including pronouncements relating to revenue recognition, may have a significant effect on our reported results.

In December 2004, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 123 (Revised 2004), Share-Based Payment, or SFAS 123R. SFAS 123R requires us to measure all employee stock-based compensation awards using a fair value method and record such expense in our consolidated financial statements. In addition, the adoption of SFAS 123R will require additional accounting related to the income tax effects and additional disclosure regarding the cash flow effects resulting from share-based payment arrangements. SFAS 123R is effective for us as of October 1, 2005 and will apply to all awards granted, modified, cancelled or repurchased after that date as well as the unvested portion of prior awards. The implementation by us will have a material impact on our consolidated financial position, results of operations and cash flows.

Importance of Microsoft and Intel

For a number of years, we have worked closely with leading software and semiconductor companies, including Microsoft and Intel, in developing standards for the PC industry. Although we remain optimistic regarding relationships with these industry leaders, there can be no assurance that leading software and semiconductor companies will

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

not develop alternative product strategies that could conflict with our product plans and marketing strategies. Action by such companies may adversely impact our business and results of operations. Presently, there is little overlap or conflict in our product offerings, although these companies may incorporate some functionality that has traditionally resided in CSS. We must continuously create new features and functions to sustain, as well as increase, our software's added value to our Customers. There can be no assurances that we will be successful in these efforts.

Attraction and Retention of Key Personnel

Our ability to achieve our revenue and operating performance objectives will depend in part on our ability to attract and retain top-tier engineering, sales, marketing, and administrative personnel. As we expand into new products and new markets we need to hire people with backgrounds different from our traditional CSS business. Accordingly, failure to attract and retain employees with the necessary skills could adversely affect our business and operating results. All of our employees, including executive officers and key personnel, are employees-at-will.

Dependence on Key Customers; Concentration of Credit

The loss of any key customer and our inability to replace revenues provided by a key customer may have a material adverse effect on our business and financial condition. Our customer base includes large OEMs in the PC, semiconductor and Internet markets, system integrator value-added resellers, and motherboard manufacturers. As a result, we maintain individually significant receivable balances due from some of them. If these customers fail to meet guaranteed minimum royalty payments and other payment obligations, our operating results and financial condition could be adversely affected. As of June 30, 2005, two customers accounted for 16% and 15% of our total accounts receivable. There are no other customers with more than 10% of our total accounts receivable.

Competition

The markets for our products are intensely competitive and we expect both product and pricing competition to increase. Increased competition could result in pricing pressures, reduced margins, or the failure of one or more of our products to achieve or maintain market acceptance, any of which could adversely affect our business.

The Company competes for CSS sales primarily with in-house research and development (R&D) departments of PC manufacturers that may have significantly greater financial and technical resources, as well as closer engineering ties and experience with specific hardware platforms, than those of the Company. Major OEM companies which may use their own internal BIOS R&D personnel include Dell Computer Corporation, Hewlett Packard Company, IBM Corporation (workstation and server only), Toshiba Corporation, and Intel Corporation. In addition, some of these competitors are also our customers. Any inability to effectively manage these complicated relationships with customers and suppliers could have a material adverse effect on our business, operating results, and financial condition and accordingly affect our chances of success.

Edgar Filing: PHOENIX TECHNOLOGIES LTD - Form 10-Q

The Company also competes for system software business with other independent suppliers, including American Megatrends Inc., a privately held company, and other small BIOS companies.

In the applications software area, as with CSS, the Company competes with in-house and third party company solutions. The Company's applications that reside in the protected area of hard drives compete with individual component software and diagnostic and repair software from other companies, as well as with PC manufacturer-developed solutions. Large enterprise solution competitors such as Altiris Incorporated and Symantec Corporation, as well as smaller third party companies are the primary players.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The principal competitive factors in the markets in which we presently compete and may compete in the future include:

The ability to provide products and services which meets the needs of our target customers;

The functionality and performance of these products;

Price;

The ability to introduce new products timely; and

Overall company size and perceived stability.

International Sales and Activities

Revenues derived from the international sales of our CSS product families comprise a majority of total revenues. There can be no assurances that we will not experience significant fluctuations in international revenues. While the major portion of our license fee or royalty contracts are U.S. dollar denominated, we are entering into a number of contracts denominated in local currencies. We have international sales and engineering offices in Germany, the Netherlands, Japan, Korea, Taiwan, Hong Kong, China and India. Our operations and financial results may be adversely affected by factors associated with international operations, such as changes in foreign currency exchange rates, uncertainties related to regional economic circumstances, political instability in emerging markets, difficulties in attracting qualified employees, and language, cultural and other difficulties managing foreign operations.

Prior to filing this quarterly report on Form 10-Q, the Company discovered that revenue relating to one software license transaction that was reported in the Company's Tokyo, Japan office in the third quarter of fiscal 2005 could not be recognized due to irregularities associated with the execution of the contract. Upon discovery of the irregularities associated with this transaction, the Company's Audit Committee immediately launched an investigation conducted by its general and outside counsel. Based upon the results of the investigation conducted, the Company has concluded that the transaction in question was an isolated event. The Company is conducting a review of its policies and processes to mitigate the chance of a recurrence. However there can be no assurances that the Company will not discover irregularities in the future.

Volatile Market for Phoenix Stock

The market for our stock is highly volatile. The trading price of our common stock has been, and will continue to be, subject to fluctuations in response to operating and financial results, changes in demand for our products and services, announcements of technological innovations, the introduction and market acceptance of new technologies by us or our competitors, changes in our product mix or product direction or the product mix or direction of our competitors, pricing pressure from our customers and competitors, changes in our revenue mix and revenue growth rates, changes in expectations of growth for the PC industry, the overall trend toward industry consolidation both among our competitors and

customers, the timing and size of orders from customers, our ability to achieve targeted cost reductions, as well as other events or factors which we may not be able to influence or control. Statements or changes in opinions, ratings or earnings estimates made by brokerage firms and industry analysts relating to the markets in which we do business, companies with which we compete or relating to us specifically could have an immediate and adverse effect on the market price of our stock. In addition, the stock market has from time to time experienced extreme price and volume fluctuations that have particularly affected the market price for many small capitalization, high-technology companies and have often included factors other than the operating performance of these companies. If our market value decreases below our net book value, we may have to record a charge for impairment of goodwill.

Certain Anti-Takeover Effects

Our Certificate of Incorporation, Bylaws and Stockholder Rights Plan and the Delaware General Corporation Law include provisions that may be deemed to have anti-takeover effects and may delay, defer or prevent a takeover attempt that stockholders might consider in their best interests. These include provisions under which members of the Board of Directors are divided into three classes and are elected to serve staggered three-year terms.

Business Disruptions

While we have not been the target of software viruses specifically designed to impede the performance of our products, such viruses could be created and deployed against our products in the future. Similarly, experienced computer programmers or hackers may attempt to penetrate our network security or

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

the security of our Web sites from time to time. A hacker who penetrates our network or Web sites could misappropriate proprietary information or cause interruptions of our services. We might be required to expend significant capital and resources to protect against, or to alleviate, problems caused by virus creators and/or hackers. In addition, acts of war, power shortage, natural disasters, acts of terror, and regional and global health risks could impact our ability to conduct business in certain regions. Any of these events could have an adverse effect on our business, results of operations, and financial condition.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes to the Company's financial market risks related to changes in interest rates and foreign currency exchange rates from September 30, 2004. Refer to the Company's Annual Report on Form 10-K for the year ended September 30, 2004 for more details.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures.

Our Chief Executive Officer and Chief Financial Officer have reviewed, as of the end of the period covered by this report, the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)), which are designed to ensure that information relating to the Company that is required to be disclosed by us in the reports that we file or submit under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the Exchange Act and related regulations. Based on this review, our chief executive officer and our chief financial officer have concluded that for the reasons discussed below our disclosure controls and procedures were not effective as of the end of the period covered by this report to ensure that information relating to the Company that is required to be disclosed by us in the reports that we file or submit under the Exchange Act is communicated to the Company's management, including our chief executive officer and our chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

In connection with the audit of our consolidated financial statements for the fiscal year ended September 30, 2004, Ernst & Young LLP, our independent registered public accounting firm, identified and reported to management and our audit committee on December 27, 2004 certain matters relating to internal control design and operation that it considered to be reportable conditions under standards established by the American Institute of Certified Public Accountants.

Specifically, Ernst & Young reported that (i) documentation supporting management's tax conclusions was inadequate and (ii) management's proposed accounting for certain tax related issues was not in accordance with U.S. generally accepted accounting principals. As a result, based on the completion of Ernst & Young's audit procedures, the Company recorded audit adjustments to the tax accounts totaling approximately \$600,000. The internal control design and operation deficiencies described above constituted material weaknesses that began to affect the Company's financial reporting process during the preparation of our consolidated financial statements for the fiscal year ended September 30, 2004.

In addition, Ernst & Young reported that the lack of formalized and detailed management level reviews during the financial statement close process and the lack of sufficient technical accounting resources to adequately perform certain significant non-routine financial reporting processes were deficiencies in the Company's internal control design and operation. In particular, Ernst & Young recommended that the design and operation of the Company's financial statement close process should be re-evaluated to ensure (i) that all significant account balances, including judgmental areas, affected by the Company's non-routine and estimation processes are reviewed for appropriate accounting support by management as part of the Company's financial statement close process, and (ii) that reviews of significant account balance analyses and SEC or other regulatory filings are conducted by technically proficient Company personnel in a timely manner. These deficiencies resulted in audit adjustments under U.S. generally accepted accounting principals, impacting several U.S. and international accounts, but did not constitute material weaknesses.

In order to correct the specifically identified internal control deficiencies, we are taking the following steps, among others:

evaluating the skills and depth of our technical accounting staff to determine if our accounting resources are sufficient to perform our financial reporting processes adequately and to identify the additional resources, if any, that may be required to perform our financial reporting processes. We will subsequently initiate a search for any position that we identify as an appropriate addition to our accounting staff;

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

strengthening the controls around those financial reporting processes that we determined are material weaknesses or internal control deficiencies;

reviewing the documentation and review procedures relating to our tax accounts; and

revising our financial statement close process to include more robust reviews of all account balance and non-recurring or infrequent items and to require a more thorough evaluation of compliance with U.S. generally accepted accounting principles prior to finalizing our financial statements. Such reviews or evaluations will be performed by the controller or higher-level member of our finance organization.

In addition to undertaking the steps described above, the Company has engaged outside consultants to assist with the Company's quarterly financial statement close process and will conduct more robust reviews of all account balances and non-recurring or infrequent items prior to finalizing its financial statements.

We believe that the steps we are taking to strengthen our system of internal controls and our disclosure controls and procedures will be adequate to provide reasonable assurance that the objectives of these control systems will be met. However, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake.

(b) Changes in Internal Controls.

Except as described above, there were no changes in our internal control over financial reporting that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

We are subject to certain routine legal proceedings that arise in the normal course of our business. The Company believes that the ultimate amount of liability, if any, for any pending claims of any type (either alone or combined), including the legal proceedings described below, will not materially affect the Company's results of operations, liquidity, or financial position taken as a whole. However, the ultimate outcome of any litigation is uncertain, and unfavorable outcomes could have a material adverse impact. Regardless of outcome, litigation can have an adverse impact on the Company due to defense costs, diversion of management resources, and other factors.

Korean Electronic Certification Authority, Inc. v. Phoenix Technologies Ltd. and Phoenix Technologies (Hungary) Software Licensing, LLC. On April 21, 2003, the Korean Electronic Certification Authority, Inc., doing business as CrossCert, Inc. (CrossCert), filed a motion (the Preliminary Attachment Motion) in the Suwon District Court in Seoul, Korea, without notice to Phoenix, for a preliminary attachment under Korean law on Phoenix's expected payments from another Phoenix customer, Samsung Electronics Co., Ltd. (Samsung). CrossCert obtained the preliminary attachment on April 21, 2003 in the amount of KRW 496,608,750, or approximately USD \$412,000, which effectively enjoined a payment owing to the Company by Samsung. CrossCert's claim relates to a March 30, 2001 license agreement (the CrossCert Agreement) between CrossCert and Phoenix, under which Phoenix licensed certain software to CrossCert. Phoenix subsequently assigned its rights in the CrossCert Agreement to an affiliate, Phoenix Technologies (Hungary) Software Licensing, LLC (Phoenix-Hungary).

On June 14, 2003, CrossCert filed a complaint in the Suwon District Court in Seoul, Korea against both Phoenix and Phoenix-Hungary for breach of contract, seeking a return of the payments made under the CrossCert Agreement in the amount of approximately USD \$825,000, plus interest under Korean law. Phoenix subsequently filed an objection to the Korean's court's jurisdiction over the dispute based on a choice of forum clause in the CrossCert Agreement in which the parties agreed to the exclusive jurisdiction of the courts in Santa Clara County, California for any disputes arising out of the CrossCert Agreement. In October 2003, the Korean court dismissed CrossCert's suit against Phoenix for lack of jurisdiction. Phoenix then filed a motion for cancellation of the preliminary attachment. On November 24, 2004, the Korean court denied Phoenix's motion to cancel the preliminary attachment, and ruled that the preliminary attachment can remain in place because of the pendency of the U.S.-based lawsuit involving the parties (described below). On January 21, 2005, Phoenix deposited KRW 496,608,750, or approximately USD\$412,000, into escrow with the court pending the outcome of the U.S.-based lawsuit, and requested that the court cancel and release the preliminary attachment. The court cancelled the preliminary attachment on January 28, 2005.

Phoenix Technologies Ltd. and Phoenix Technologies (Hungary) Software Licensing, LLC v. Korean Electronic Certification Authority, Inc. On May 7, 2003, Phoenix and Phoenix-Hungary filed suit against CrossCert in Santa Clara County Superior Court in the United States of America for breach of contract, interference with contract, interference with prospective economic advantage and unfair competition under California Business and Professions Code Sections 17200 et seq. The claims in this case relate to the CrossCert Agreement and CrossCert's wrongful filing of the Preliminary Attachment Motion in Korea and its interference with Phoenix's contractual relationship with Samsung. Phoenix seeks damages in the amount of \$150,000 for CrossCert's failure to pay software maintenance fees, as well as all damages caused by CrossCert's wrongful conduct with respect to its filing of the Preliminary Attachment Motion in Korea and interference with prospective economic advantage, including lost goodwill, the extent of which is presently unknown. CrossCert filed a cross-complaint against Phoenix on October 24, 2003 for breach of contract, fraud and unfair competition under California Business and Professions Code Sections 17200 et seq. The parties attempted to mediate the dispute, and conducted a mediation of the case on August 6, 2004. The parties did not reach a settlement in that mediation conference.

Table of Contents

On November 11, 2004, Phoenix filed an amended complaint which made additional claims. On March 14, 2005, Phoenix filed a second amended complaint to eliminate certain claims in exchange for CrossCert's elimination of its claims for unfair competition under California Business and Professions Code Section 17200 et seq. and breach of the covenant of good faith and fair dealing. Trial is currently set for September 26, 2005.

USA & Regal Groups, Inc. d.b.a. Sterling Pacific v. Phoenix Technologies Ltd. d.b.a. Phoenix Technologies Asia Pacific, Ltd., Phoenix Technologies Asia Pacific, Ltd., Al Sisto, David Gibbs, George Man and Does 1 through 100, inclusive. On June 10, 2004, Sterling Pacific filed a complaint against Phoenix in Orange County Superior Court for fraud, negligent misrepresentation, breach of contract, rescission, violation of California Business and Professions Code Sections 17200 et seq., economic duress and common count. The claim arises from a March 31, 2004 Manufacturing License and Distribution Agreement between a subsidiary of Phoenix and Sterling Pacific, under which the Phoenix subsidiary licensed certain technology to Sterling Pacific for the purpose of manufacturing and distributing a Sterling Pacific hardware product. Sterling Pacific seeks return of the amounts paid (USD \$350,000) as well as exemplary damages for the alleged fraud.

The parties agreed to dismiss the suit in Orange County and re-file in Santa Clara County. The complaint was filed in Santa Clara County on September 21, 2004. Phoenix filed a demurrer to the complaint on December 1, 2004, claiming that Sterling Pacific lacked the standing and capacity to sue. In response to the demurrer, Sterling Pacific filed a first amended complaint curing the defects on January 14, 2005, and the demurrer was taken off the calendar. The parties settled the case pursuant to mediation on May 18, 2005. In settling the case, Phoenix agreed to pay Sterling Pacific the sum of \$275,000 in full settlement and compromise of all claims and causes of action. The case has been dismissed.

SEC Informal Inquiry. In August 2005, we received an informal inquiry from the Securities and Exchange Commission with a request for documents that appear to relate to how we allocate revenue between Core System Software and Applications. We are fully cooperating with the SEC and intend to continue to do so. We cannot predict the duration or outcome of the SEC's inquiry. If the SEC expands its informal inquiry or decides to pursue enforcement action against us, or any other governmental agency or regulatory body takes similar action, our management could be distracted, we could incur substantial costs and there could be a material adverse effect on our business.
