This Report and our other communications and statements may contain forward-looking statements, including statements about our beliefs, plans, objectives, goals, expectations, estimates, projections and intentions. These statements are subject to significant risks and uncertainties and are subject to change based on various factors, many of which are beyond our control. The words may, could, should, would, believe, anticipate, estimate, expect, intend, plan, target, goal, and similar expressions are intended to identify forward-looking statements. All forward-looking statements, by their nature, are subject to risks and uncertainties. Our actual future results may differ materially from those set forth in our forward-looking statements. For information concerning these factors and related matters, see Item 2, Management's Discussion and Analysis of Financial Position and Results of Operations, in this Report, and the following sections of our Annual Report on Form 10-K for the year ended September 30, 2006: (a) Risk Factors in Part I, Item 1A and (b) Management's Discussion and Analysis of Financial Position and Results of Operations in Part II, Item 7. However, other factors besides those referenced could adversely affect our results, and you should not consider any such list of factors to be a complete set of all potential risks or uncertainties. Any forward-looking statements made by us herein speak as of the date of this Report. We do not undertake to update any forward-looking statement, except as required by law.

Table of Contents**GENCOR INDUSTRIES, INC.****Notes to Condensed Consolidated Financial Statements***All amounts in thousands, except per share amounts***Note 1 Basis of Presentation**

The accompanying condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all material adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the three months ended December 31, 2006 are not necessarily indicative of the results that may be expected for the year ended September 30, 2007.

The balance sheet at September 30, 2006 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

For further information, refer to the consolidated financial statements and footnotes thereto included in the Gencor Industries, Inc. Annual Report on Form 10-K for the year ended September 30, 2006.

Note 2 Marketable Securities

Marketable securities are categorized as trading securities and stated at market value. Market value is determined using the quoted closing or latest bid prices. Realized gains and losses on investment transactions are determined by specific identification and are recognized as incurred in the statement of income. Net unrealized gains and losses are reported in the statement of operations and represent the change in the market value of investment holdings during the period. At December 31, 2006, marketable securities consisted of \$6,274 in municipal bonds and \$34,814 in equity stocks.

Note 3 Inventories

The components of inventory consist of the following:

	December 31, 2006	September 30, 2006
Raw materials	\$ 17,259	\$ 11,731
Work in process	4,568	4,258
Finished goods	6,417	5,918
Used equipment	1,056	1,053
	\$ 29,300	\$ 22,960

Table of Contents**Note 4 Earnings Per Share Data**

The following table sets forth the computation of basic and diluted earnings per share for the periods indicated.

	2006	2005
Net income	\$ 1,483	\$ 182
Denominator (shares in thousands):		
Weighted average shares outstanding	9,945	9,895
Effect of dilutive stock options	4	44
Denominator for diluted EPS computation	9,949	9,939
Per common share:		
Net income	\$ 0.15	\$ 0.02
Diluted:		
Net income	\$ 0.15	\$ 0.02

Note 5 Comprehensive Income (Loss)

The total comprehensive income (loss) for the three-months ended December 31, 2006 and 2005 was \$1,480 and \$166, respectively. Total comprehensive income (loss) differs from net income (loss) due to gains and losses resulting from foreign currency translation, which are reflected separately in the shareholders' equity section of the balance sheet under the caption Accumulated other comprehensive income (loss). Gains and losses resulting from foreign currency transactions are included in income.

During the quarter ended December 31, 2006, the Company sold land and buildings for \$5,481 resulting in a loss of \$1,633 after an adjustment of \$1,905 for the cumulative translation adjustment related to the assets sold.

Note 6 Income From Investees

The Company owns a 45% interest in Carbontronics LLC and a 25% interest in Carbontronics Fuels LLC and Carbontronics II, LLC. These interests were earned as part of value of risk on contracts to build four synthetic fuel production plants during 1998. The Company has no basis in these equity investments or requirement to provide future funding. The operations of Carbontronics LLC consist of the receipt of contingent payments from the sales of the plants and the distribution thereof to its members. Carbontronics LLC has no other significant operations or assets. The operations of Carbontronics II, LLC consist of the receipt of royalty payments from the plants and the distribution thereof to its members. Carbontronics II, LLC has no other significant operations or assets. Any income arising from these investments is dependent upon tax credits (adjusted for operating losses at the fuel plants) being generated as a result of synthetic fuel production, which will be recorded as received. The Company received \$3,285 in distributions in the quarter ended December 31, 2006, none in the quarter ended December 31, 2005. These distributions are subject to state and Federal income taxes.

Future distributions from these entities depend upon the production of these operations continuing to qualify for tax credits under Section 29 of the Internal Revenue Code and the ability to economically produce and market synthetic fuel produced by the plants. One of the contingencies related to future benefits from these entities is based on the average price of crude oil. Per a provision of Section 29, if the average price of crude oil reaches a certain level, the tax credits will terminate. The existing tax credit legislation is scheduled to expire at the end of calendar year 2007. Any one of the above eventualities may interrupt, reduce, or terminate further distributions.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Results of Operations

Net sales for the quarters ended December 31, 2006 and 2005 were \$12.4 million and \$11.7 million, respectively. Domestic sales during the first quarter of fiscal 2006 were \$12.0 million reflecting an increase of \$1.2 million from the first quarter of fiscal 2005. Domestic sales were higher than the prior year's quarter primarily due to the general improvement in the construction industry, and partially due to the passage of the Federal highway bill in the summer of 2005. Foreign sales decreased \$.4 million from the prior year. Our revenues are concentrated in the asphalt-related business and subject to a seasonal slow-down during the third and fourth quarters of the calendar year.

Gross margins as a percent of net sales remained at 25% for both years.

Selling and administrative expense decreased \$212 due mainly to lower legal costs for the quarter ended December 31, 2006.

We own a 45% interest in Carbontronics LLC and a 25% interest in Carbontronics Fuels LLC and Carbontronics II, LLC. These interests were earned as part of value of risk on contracts to build four synthetic fuel production plants during 1998. We have no basis in these equity investments or requirement to provide future funding. Any income arising from these investments is dependent upon tax credits (adjusted for operating losses at the fuel plants) being generated as a result of synthetic fuel production, which will be recorded as received. We received \$3,285 in distributions in the quarter ended December 31, 2006, and none in the quarter ended December 31, 2005. These distributions are subject to state and Federal income taxes.

Future distributions from these entities depend upon the production of these operations continuing to qualify for tax credits under Section 29 of the Internal Revenue Code and the ability to economically produce and market synthetic fuel produced by the plants. One of the contingencies related to future benefits from these entities is based on the average price of crude oil. Per a provision of Section 29, if the average price of crude oil reaches a certain level, the tax credits will terminate. The existing tax credit legislation is scheduled to expire at the end of calendar year 2007. Any one of the above eventualities may interrupt, reduce, or terminate further distributions.

During the quarter ended December 31, 2006, the Company sold land and buildings for \$5,481 resulting in a loss of \$1,633 after an adjustment of \$1,905 for the cumulative translation adjustment related to the assets sold. The increase in value of marketable securities is primarily due to investing a portion of the proceeds received on the sale of assets (\$5,481) and net realized and unrealized gains on the marketable securities of \$2,139 during the quarter ended December 31, 2006.

Income tax expense increased by \$1,991 from year ago levels, reflecting the increase in pre-tax income.

Table of Contents

Liquidity and Capital Resources

On August 1, 2006 we entered into a Revolving Credit and Security Agreement with PNC Bank, N.A. The Agreement established a three year revolving \$20 million credit facility and was renewed through July 31, 2009. The facility provides for advances based on accounts receivable, inventory and real estate. The facility includes a \$2 million limit on letters of credit. At December 31, 2006, we had \$.5 million of letters of credit outstanding. The interest rate at December 31, 2006, is at LIBOR plus 2.00% and subject to change based upon the Fixed Charge Coverage Ratio. We are required to maintain a Fixed Charge Coverage Ratio of 1.1:1. There are no required repayments as long as there are no defaults and there is adequate eligible collateral. Substantially all of our assets are pledged as security under the Agreement. We had no long term debt outstanding at December 31, 2006 or 2005.

As of December 31, 2006, we had \$2.2 million in cash and cash equivalents, and \$41.1 million in marketable securities. The marketable securities are invested in stocks and bonds through a professional investment advisor. Investment securities are exposed to various risks such as interest rate, market and credit. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of securities, it is possible that changes in these risk factors could have an adverse material impact on our results of operations. The securities may be liquidated at any time into cash and cash equivalents

Inventory and customer deposits increased due to increases in our orders as our backlog increased to \$28.5 million from \$20.5 million the prior year. Income taxes payable increased due to the increase in taxable income and the movement from deferred taxes related to the timing of taxes due on income from investees.

Seasonality

We are concentrated in the asphalt-related business and subject to a seasonal slow-down during the third and fourth quarters of the calendar year. Traditionally, our customers do not purchase new equipment for shipment during the summer and fall months to avoid disrupting their peak season for highway construction and repair work. This slow-down often results in lower reported sales and earnings and/or losses during the first and fourth quarters of our fiscal year ended September 30.

Forward-Looking Information

This Report on Form 10-Q contains certain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act), which represent our expectations and beliefs, including, but not limited to, statements concerning gross margins, sales of our products and future financing plans. These statements by their nature involve substantial risks and uncertainties, certain of which are beyond our control. Actual results may differ materially depending on a variety of important factors, including the financial condition of our customers, changes in the economic and competitive environments and demand for our products.

For information concerning these factors and related matters, see the following sections of our Annual Report on Form 10-K for the year ended September 30, 2006: (a) Risk Factors in Part I, Item 1A and (b) Management's Discussion and Analysis of Financial Position and Results of Operations in Part II, Item 7. However, other factors besides those referenced could adversely affect our results, and you should not consider any such list of factors to be a complete set of all potential risks or uncertainties. Any forward-looking statements made by us herein speak as of the date of this Report. We do not undertake to update any forward-looking statement, except as required by law.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company operates manufacturing facilities and sales offices principally located in the United States and the United Kingdom. The Company is subject to business risks inherent in non-U.S. activities, including political and economic uncertainty, import and export limitations, and market risk related to changes in interest rates and foreign currency exchange rates. The Company's principal currency exposure against the U.S. dollar is the British pound. Periodically, the Company will use derivative financial instruments consisting primarily of interest rate hedge agreements to manage exposures to interest rate changes. The Company's objective in managing our exposure to changes in interest rates on its variable rate debt is to limit their impact on earnings and cash flow and reduce its overall borrowing costs.

At December 31, 2006, the Company had no debt outstanding. Under the Revolving Credit and Security Agreement, substantially all of the Company's borrowings will bear interest at variable rates based upon the prime rate or LIBOR.

The Company's marketable securities are invested in stocks and bonds through a professional investment advisor. Investment securities are exposed to various risks such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of securities, it is possible that changes in these risk factors could have an adverse material impact on the Company's results of operations or equity.

The Company's sensitivity analysis for interest rate risk excludes accounts receivable, accounts payable and accrued liabilities because of the short-term maturity of such instruments. The analysis does not consider the effect on other variables such as changes in sales volumes or management's actions with respect to levels of capital expenditures, future acquisitions or planned divestures, all of which could be significantly influenced by changes in interest rates.

Table of Contents

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's principal executive officer and principal financial officer have conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rule 13a-14(c) promulgated under the Exchange Act as of the end of the period covered by this report. Based on their evaluation, the Company's principal executive officer and principal accounting officer concluded that the Company's disclosure controls and procedures are effective in ensuring that material information required to be disclosed is included in the reports that it files with the Securities and Exchange Commission.

Changes in Internal Control over Financial Reporting

There were no significant changes in the Company's internal controls or, to the knowledge of the management of the Company, in other factors that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting during the period covered by the report.
