Settlement:	T+3; August 15, 2008
CUSIP:	45687AAC6
ISIN:	US45687AAC62
Ratings:	Baa1/BBB+ (Stable/Stable)
Description of the Senior Floating Rate Notes due 2010	

The Senior Floating Rate Notes due 2010 will bear interest from and including August 13, 2008 at a rate per annum equal to the Initial Interest Rate (as defined below) and thereafter at an interest rate that will be reset as described below to a rate per annum equal to LIBOR (as defined below) plus 150bps per annum. Interest will be payable quarterly in arrears on November 13, February 13, May 13 and August 13 of each year, beginning November 13, 2008, to the holders of record on the preceding November 1, February 1, May 1 and August 1, whether or not such day is a business day.

The initial interest rate will be equal to L+150bps per annum to and excluding the first Interest Payment Date (the "Initial Interest Rate"). Interest shall be computed on the basis of the actual number of days in the relevant interest period and a 360-day year. The rate of interest on the Senior Floating Rate Notes due 2010 will be reset quarterly on each interest payment date (each an "Interest Reset Date"), beginning on November 13, 2008. The second London banking day preceding an Interest Reset Date will be the "Interest Determination Date" for that Interest Reset Date. The interest rate in effect on each day that is not an Interest Reset Date will

be the interest rate determined as of the Interest Determination Date pertaining to the immediately preceding Interest Reset Date or the Initial Interest Rate, as the case may be. The interest rate in effect on any day that is an Interest Reset Date will be the interest rate determined as of the Interest Determination Date pertaining to that Interest Reset Date.

Wells Fargo Bank, N.A. shall act as calculation agent (together with its successors in that capacity, the Calculation Agent) in connection with the Senior Floating Rate Notes due 2010. The Calculation Agent shall serve as the calculation agent hereunder unless and until a successor calculation agent is appointed by the Company. The Calculation Agent will determine the interest rate (other than the Initial Interest Rate) on each Interest Determination Date by reference to LIBOR on such date. The following definitions shall be used by the Calculation Agent in its determination of the interest rate:

London banking day means any day on which dealings in U.S. dollars are transacted in the London interbank market.

LIBOR will be determined by the calculation agent in accordance with the following provisions:

(1) With respect to any interest determination date, LIBOR will be the rate (expressed as a percentage per annum) for deposits in U.S. dollars having a maturity of three months commencing on the related interest reset date that appears on Reuters Page LIBOR01 as of 11:00 a.m., London time, on that interest determination date. If no such rate appears, then LIBOR, in respect of that interest determination date, will be determined in accordance with the provisions described in (2) below.

(2) With respect to an interest determination date on which no rate appears on Reuters Page LIBOR01, the calculation agent will request the principal London offices of each of four major reference banks in the London interbank market (which may include affiliates of the underwriters), as selected by the calculation agent, to provide its offered quotation (expressed as a percentage per annum) for deposits in U.S. dollars for the period of three months, commencing on the related interest reset date, to prime banks in the London interbank market at approximately 11:00 a.m., London time, on that interest determination date and in a principal amount that is representative for a single transaction in U.S. dollars in that market at that time. If at least two quotations are provided, then LIBOR on that interest determination date will be the arithmetic mean of those quotations. If fewer than two quotations are provided, then LIBOR on the interest determination date will be the arithmetic mean of the rates quoted at approximately 11:00 a.m., in the City of New York, on the interest determination date by three major banks in The City of New York (which may include affiliates of the underwriters) selected by the calculation agent for loans in U.S. dollars to leading European banks, for a period of three months, commencing on the related interest

reset date, and in a principal amount that is representative for a single transaction in U.S. dollars in that market at that time. If at least two such rates are so provided, LIBOR on the interest determination date will be the arithmetic mean of such rates. If fewer than two such rates are so provided, LIBOR on the interest determination date will be LIBOR in effect with respect to the immediately preceding interest determination date.

Reuters Page LIBOR01 means the display that appears on Reuters (or any successor service) on page LIBOR01 (or any page as may replace such page on such service) for the purpose of displaying London interbank offered rates of major banks for U.S. dollars.

All percentages resulting from any calculation of any interest rate for the Senior Floating Rate Notes due 2010 will be rounded, if necessary, to the nearest one hundred thousandth of a percentage point, with five one-millionths of a percentage point rounded upward (e.g., 9.876545% (or .09876545) would be rounded to 9.87655% (or .0987655)), and all dollar amounts would be rounded to the nearest cent, with one-half cent being rounded upward.

The Calculation Agent will, upon the request of any holder of the Senior Floating Rate Notes due 2010, provide the interest rate then in effect with respect to the Senior Floating Rate Notes due 2010. All calculations made by the Calculation Agent for the purposes of calculating interest on the Senior Floating Rate Notes due 2010 shall be conclusive and binding on the holders and us, absent manifest error.
