Closing  
prices  
as  
of  
January  
29,  
2009

Assuming that NRG's  
stock price maintained  
its historic relationship  
to movement in the IPP  
index

(1)  
, NRG stock  
would have declined  
~16% since October 17,  
2008 in the absence of  
the Exelon offer

(2)  
; with  
those assumptions,  
NRG's implied stock  
price would have been  
~\$16 at January 29,  
2009, compared with its  
actual closing price of  
\$23.55.

During the same period,  
EXC's share price  
increased by ~3.4% to  
\$56.38.

Since the announcement of EXC offer, NRG and EXC have outperformed the IPP  
index

(1)

We believe NRG's stock price is being supported by EXC's offer and is not reflective  
of  
NRG's  
true  
stand  
alone  
value

we  
believe  
NRG's  
market  
discovery  
process

will  
prove  
difficult  
given  
current  
commodity  
and  
credit  
conditions

Per NRG December 1, 2008 investor presentation.

NRG's development model requires external solutions that as a standalone company it cannot implement on its own; and

The potential cost to finance its development projects and the availability of capital. We believe the market will likely discount NRG's standalone growth prospects given: The combined company, given its stronger financial position, will be better positioned to realize the value of growth opportunities than NRG stand alone

Strong Initial Exchange Offer Results

As of January 6  
th  
, 45.6% of NRG shares had

been tendered into the exchange offer

Many NRG shareholders have informed Exelon they want to see meaningful discussions sooner rather than later

NRG board and management continue to refuse to allow due diligence -

designed to verify assumed values and identify additional value -  
that could lead to a negotiated transaction

Exchange offer extended until February 25  
th

Seeking highest possible level of NRG shareholder support to facilitate a negotiated transaction between Exelon and NRG

th

is the best way for  
NRG shareholders to facilitate a transaction

We remain  
committed to and are  
moving forward with  
the transaction

Moving Forward with Proxy Solicitation

Pursuing, and soliciting proxies for, two  
shareholder actions at NRG annual meeting

Proposed an expansion of the NRG board from 12 to 19  
directors

Nominated nine well-qualified, independent candidates who we believe will act in the best interests of NRG and the NRG shareholders

Encouraging NRG shareholders to support the proposed slate

Materials will be sent to NRG shareholders, including a proxy and instructions on how to vote for the slate of new directors

Vote will take place at the NRG annual shareholder meeting, likely to occur in May or June

NRG shareholders deserve independent, well-qualified NRG directors to act in their best interest

1.  
As of February 6, 2009  
Regulatory hurdles are manageable  
15

### Financing Is Not an Obstacle

Believe we can obtain committed financing for the entire ~\$8 billion of NRG debt, if needed, at the appropriate time

Decision to defer commitments allows us to take advantage of

improving credit markets

Exelon's relationships with many of NRG's banks should facilitate arrangements for new credit facilities when current conflicts are eliminated

Believe a negotiated combination can be structured in a way to reduce refinancing requirements to \$4B or less

We believe that the contemplated structure would not trigger the change of control provision for NRG's \$4.7B of Senior Notes, and would substantially improve credit metrics for those bondholders

We have asked for approval of the contemplated structure in our regulatory filings

16

Reflecting our confidence that we can obtain committed financing at the appropriate time, our offer is not subject to a financing condition

Full and generous price  
upfront premium of 37%

Tax-free opportunity to participate in the future growth  
of the largest and most diversified US power  
company, with a substantially improved credit profile

and access to liquidity

Requisite scope, scale and financial strength

Stronger credit metrics and investment grade balance sheet

Best-in-class nuclear and fossil operations

Low-cost generator, operating in the most attractive markets

Exelon 2020 principles will be adapted to the combined fleet

Potential for substantial synergies

Manageable regulatory hurdles to close

Factoring in these two omitted pieces for 2008,  
NRG's free cash flow contribution of the pro-forma

NRG's Stated Imperatives

MUST

accumulate

generation

at

competitive

cost

This transaction accomplishes in one step what several transactions might have accomplished for NRG in these regards. Given the current difficulty in accessing capital markets, it is unclear whether NRG would have the ability to meet this objective without Exelon.

Exelon provides NRG stakeholders with broad trading expertise and sound power marketing and risk management practices. Exelon's significant experience in markets with locational prices is particularly relevant since ERCOT is moving to a PJM-type structure.

Exelon's breadth of operations and depth of service allows significant access to customers, retail providers, and other sales channels.

NRG stakeholders become part of the most diversified and competitive generation portfolio operating in 12 different states and 6 different regional transmission organizations.

Deal expected to provide NRG stakeholders with significant value and upside and a share of the largest unregulated generation fleet in the United States.
