Table of Contents**The Boeing Company and Subsidiaries****Notes to the Condensed Consolidated Financial Statements**

(Dollars in millions, except per share data)

(Unaudited)

Note 1 Basis of Presentation

The condensed consolidated interim financial statements included in this report have been prepared by management of The Boeing Company (herein referred to as Boeing, the Company, we, us, or our). In the opinion of management, all adjustments (consisting of normal recurring accruals) necessary for a fair presentation are reflected in the interim financial statements. The results of operations for the period ended September 30, 2011 are not necessarily indicative of the operating results for the full year. The interim financial statements should be read in conjunction with the audited consolidated financial statements, including the notes thereto, included in our 2010 Annual Report on Form 10-K.

Note 2 Earnings Per Share

The weighted average number of shares outstanding used to compute earnings per share were as follows:

<i>(Shares in millions)</i>	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
Weighted average shares outstanding	742.9	733.8	745.5	736.3
Participating securities	2.6	3.2	2.5	2.8
Basic weighted average shares outstanding	745.5	737.0	748.0	739.1
Dilutive potential common shares	6.3	6.0	5.9	5.5
Diluted weighted average shares outstanding	751.8	743.0	753.9	744.6

Basic earnings per share is calculated by the sum of (1) net earnings less declared dividends and dividend equivalents related to share-based compensation divided by the basic weighted average shares outstanding and (2) declared dividends and dividend equivalents related to share-based compensation divided by the weighted average shares outstanding.

The weighted average number of shares outstanding included in the following table were excluded from the computation of diluted earnings per share because the average market price did not exceed the exercise/threshold price. However, these shares may be dilutive potential common shares in the future.

<i>(Shares in millions)</i>	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
Stock options	21.4	19.6	25.4	20.7
Performance Awards	5.2	3.2	5.2	3.2

Note 3 Income Taxes

The effective tax rates were 33.6% and 33.4% for the nine and three months ended September 30, 2011 and 38.8% and 32.7% for the same periods in the prior year. The decrease in the effective tax rate for the nine months as compared with the prior year was primarily due to an income tax charge of \$150 recorded during the first quarter of 2010 as a result of the Patient Protection and Affordable Care

Table of Contents

Act, as modified by the Health Care and Education Reconciliation Act of 2010. The decrease in the effective tax rate for the nine months as compared with the prior year was also due to U.S. research and development tax credit benefits that exist in 2011, but did not exist as of September 30, 2010. In December 2010, the research and development tax credit was retroactively renewed for 2010 and extended through December 31, 2011.

The 2007-2008 tax years are currently being examined by the Internal Revenue Service (IRS). The matters under consideration by IRS Appeals for the 2004-2006 tax years are in the final phase of review with the Joint Committee on Taxation. We are also subject to examination in major state and international jurisdictions for the 2001-2010 tax years. We believe appropriate provisions for all outstanding issues have been made for all jurisdictions and all open years.

Audit outcomes and the timing of audit settlements are subject to significant uncertainty. It is reasonably possible that within the next 12 months we will resolve the matters presently under consideration for the 2004-2006 tax years with the IRS. Based on current estimates, unrecognized tax benefits for the 2004-2006 tax years could increase earnings by up to \$330.

Note 4 Inventories

Inventories consisted of the following:

	September 30 2011	December 31 2010
Long-term contracts in progress	\$ 14,581	\$ 14,400
Commercial aircraft programs	33,376	26,550
Commercial spare parts, used aircraft, general stock materials and other	7,027	5,788
Inventory before advances and progress billings	54,984	46,738
Less advances and progress billings	(24,491)	(22,421)
Total	\$ 30,493	\$ 24,317

Long-Term Contracts in Progress

Long-term contracts in progress included Delta launch program inventory that will be sold at cost to United Launch Alliance (ULA) under an inventory supply agreement that terminates on March 31, 2021. At September 30, 2011 and December 31, 2010, the inventory balance was \$1,085 and \$1,385. At September 30, 2011, \$897 of this inventory related to yet unsold launches. ULA is continuing to assess the future of the Delta II program. In the event ULA is unable to sell additional Delta II inventory, our earnings could be reduced by up to \$62. See Note 9.

Inventory balances included \$236 subject to claims or other uncertainties relating to the A-12 program as of September 30, 2011 and December 31, 2010. See Note 15.

Capitalized precontract costs of \$1,279 and \$527 at September 30, 2011 and December 31, 2010, are included in inventories.

Commercial Aircraft Programs

As of September 30, 2011 and December 31, 2010, commercial aircraft programs inventory included the following amounts related to the 787 program: \$14,423 and \$9,461 of work in process (including deferred production costs), \$1,775 and \$1,956 of supplier advances, and \$1,770 and \$1,447 of unamortized tooling and other non-recurring costs. As of September 30, 2011, included in work in process were deferred production costs related to the 787 program totaling \$9,699.

Table of Contents

Higher production costs are experienced at the beginning of a new or derivative airplane program. Units produced early in a program require substantially more effort (labor and other resources) than units produced later in a program because of volume efficiencies and the effects of learning. Deferred production costs represent actual costs incurred for production of early units that exceed the estimated average cost of all units in the program accounting quantity. We expect that these deferred costs will be fully recovered when all units included in the accounting quantity are delivered as the expected unit cost for later deliveries is below the estimated average cost of all units in the program. At September 30, 2011, \$8,246 of 787 deferred production costs, unamortized tooling and other non-recurring costs are expected to be recovered from units included in the program accounting quantity that have firm orders and \$3,223 is expected to be recovered from units included in the program accounting quantity that represent expected future orders.

Commercial aircraft programs inventory included \$98 of deferred production costs at September 30, 2011 and \$903 and \$879 of unamortized tooling costs for the 747 program at September 30, 2011 and December 31, 2010. At September 30, 2011, we reclassified \$1,934 of previously recorded reach forward losses on the 747 program from Accrued liabilities to Inventories, net of advances and progress billings.

Commercial aircraft programs inventory included amounts credited in cash or other consideration (early issue sales consideration) to airline customers totaling \$2,585 and \$1,970 at September 30, 2011 and December 31, 2010.

Note 5 Customer Financing

Customer financing consisted of the following:

	September 30 2011	December 31 2010
Financing receivables:		
Investment in sales-type/finance leases	\$ 2,082	\$ 2,272
Notes	628	480
Operating lease equipment, at cost, less accumulated depreciation of \$747 and \$847	2,016	2,281
Gross customer financing	4,726	5,033
Less allowance for losses on receivables	(119)	(353)
Total	\$ 4,607	\$ 4,680

Three primary factors influencing the level of our allowance for losses on customer financing receivables are customer credit ratings, default rates and collateral values. A significant portion of our portfolio is also concentrated among a few individual customers and as such the credit rating of those customers can have a significant influence on the level of the allowance. We assign internal credit ratings for all customers and determine the creditworthiness of each customer based upon public information and information obtained directly from our customers. We utilize these credit ratings as one of the factors in assessing the adequacy of our allowance for losses on receivables. Our rating categories are comparable to those used by the major credit rating agencies.

Table of Contents

The following table details our receivable balances by the internal credit rating category which was used as a factor in determining our allowance for losses on receivables.

Rating categories	September 30 2011	December 31 2010
BBB	\$ 121	
BB	1,298	
B	107	\$ 207
CCC	1,088	2,432
Other	96	113
Total carrying value of financing receivables	\$ 2,710	\$ 2,752

At September 30, 2011, our allowance primarily related to receivables with ratings of BB and CCC in the table above, and we applied default rates that averaged 12.7% and 48.6%, respectively, to exposure associated with those receivables. On May 2, 2011, Southwest Airlines Co. (Southwest) completed its acquisition of AirTran Holdings, Inc. and AirTran Holdings, Inc. became a wholly owned subsidiary of Southwest. AirTran Holdings, LLC (AirTran) became the successor to AirTran Holdings, Inc. We concluded that AirTran's subsidiary relationship with Southwest warranted an increased weighting in determining the internal rating category. As of September 30, 2011, we assigned the internal rating category of BB to the receivables with AirTran for the purpose of assigning default rates discussed above. We had previously assigned an internal rating category of CCC as of December 31, 2010, and CCC+ as of June 30, 2011. As a result of the improved ratings, the allowance for losses on receivables was reduced by \$196 and \$154 for the nine and three months ended September 30, 2011.

Declines in collateral values are a significant driver of our allowance for losses. Generally, out-of-production aircraft have had greater percentages of collateral value declines than in-production aircraft. Our portfolio consists primarily of financing receivables for out-of-production aircraft. The value of the collateral is closely tied to commercial airline performance and may be subject to reduced valuation with market decline. Our customer financing portfolio has a concentration of various model aircraft. Customer financing carrying values related to major aircraft concentrations were as follows:

	September 30 2011	December 31 2010
717 Aircraft (\$487 and \$561 accounted for as operating leases) ⁽¹⁾	\$ 1,948	\$ 2,070
757 Aircraft (\$470 and \$629 accounted for as operating leases) ⁽¹⁾	659	720
737 Aircraft (\$261 and \$317 accounted for as operating leases)	313	366
767 Aircraft (\$105 and \$115 accounted for as operating leases)	320	372
MD-11 Aircraft (\$289 and \$327 accounted for as operating leases) ⁽¹⁾	289	327

⁽¹⁾ Out-of-production aircraft

Table of Contents**Note 6 Investments**

Our investments, which are recorded in Short-term and other investments or Investments, consisted of the following:

	September 30 2011	December 31 2010
Time deposits	\$ 3,184	\$ 5,100
Pledged money market funds ⁽¹⁾	56	57
Available-for-sale investments	8	15
Equity method investments	1,069	1,072
Restricted Cash ⁽²⁾	37	
Other investments	34	25
Total	\$ 4,388	\$ 6,269

⁽¹⁾ Reflects amounts pledged in lieu of letters of credit as collateral in support of our workers' compensation programs. These funds can become available within 30 days notice upon issuance of replacement letters of credit.

⁽²⁾ Restricted to pay group term life insurance premiums for certain employees on long-term disability.

Note 7 Other Assets**Sea Launch**

At September 30, 2011 and December 31, 2010, Other assets included \$356 of receivables related to our former investment in the Sea Launch venture which became payable by certain Sea Launch partners following Sea Launch's bankruptcy filing in June 2009. The \$356 includes \$147 related to a payment made by us under a bank guarantee on behalf of Sea Launch and \$209 related to loans we made to Sea Launch. The net amounts owed to Boeing by each of the partners are as follows: S.P. Korolev Rocket and Space Corporation Energia of Russia \$223, PO Yuzhnoye Mashinostroitelny Zavod of Ukraine \$89 and KB Yuzhnoye of Ukraine \$44.

Although each partner is contractually obligated to reimburse us for its share of the bank guarantee, the Russian and Ukrainian partners have raised defenses to enforcement and contested our claims. On October 19, 2009, we filed a Notice of Arbitration with the Stockholm Chamber of Commerce seeking reimbursement from the other Sea Launch partners of the \$147 bank guarantee payment. On October 7, 2010, the arbitrator ruled that the Stockholm Chamber of Commerce lacked jurisdiction to hear the matter but did not resolve the merits of our claim. We filed a notice appealing the arbitrator's ruling on January 11, 2011. We believe the partners have the financial wherewithal to pay and intend to pursue vigorously all of our rights and remedies. In the event we are unable to secure reimbursement of \$147 related to our payment under the bank guarantee and \$209 related to loans made to Sea Launch, we could incur pre-tax charges of up to \$356.

Table of Contents**Note 8 Commitments and Contingencies****Financing Commitments**

Financing commitments totaled \$15,624 and \$9,865 as of September 30, 2011 and December 31, 2010. The estimated earliest potential funding dates for these commitments as of September 30, 2011 are as follows:

	Total
October through December 2011	\$ 202
2012	1,483
2013	1,786
2014	2,872
2015	3,319
Thereafter	5,962
	\$ 15,624

Standby Letters of Credit and Surety Bonds

We have entered into standby letters of credit agreements and surety bonds with financial institutions primarily relating to the guarantee of our future performance on certain contracts. Contingent liabilities on outstanding letters of credit agreements and surety bonds aggregated approximately \$7,250 and \$7,599 as of September 30, 2011 and December 31, 2010.

Commercial Aircraft Commitments

In conjunction with signing definitive agreements for the sale of new aircraft (Sale Aircraft), we have entered into specified-price trade-in commitments with certain customers that give them the right to trade in used aircraft upon the purchase of Sale Aircraft. The total contractual trade-in value was \$287 and \$295 as of September 30, 2011 and December 31, 2010. We anticipate that a significant portion of these commitments will not be exercised by customers.

The probability that trade-in commitments will be exercised is determined by using both quantitative information from valuation sources and qualitative information from other sources. The probability of exercise is continually assessed, taking into consideration the current economic environment. Trade-in commitments, which can be terminated by mutual consent with the customer, may be exercised only during the period specified in the agreement, and require advance notice by the customer. The fair value of trade-in aircraft related to probable contractual trade-in commitments was \$27 and \$30 as of September 30, 2011 and December 31, 2010. Trade-in commitment agreements have expiration dates from 2012 through 2023.

Commitments to ULA

In connection with the formation of ULA, we and Lockheed Martin Corporation (Lockheed) each committed to provide up to \$200 to support ULA's working capital requirements through December 1, 2011. ULA did not request any funds under the commitment as of September 30, 2011. We and Lockheed have also each committed to provide ULA with up to \$327 of additional capital contributions in the event ULA does not have sufficient funds to make a required payment to us under an inventory supply agreement. See Note 4.

Table of Contents**Product Warranties**

The following table summarizes product warranty activity recorded during the nine months ended September 30, 2011 and 2010.

	2011	2010
Beginning balance January 1	\$ 1,076	\$ 999
Additions for current year deliveries	104	101
Reductions for payments made	(196)	(177)
Changes in estimates	7	128
Ending balance September 30	\$ 991	\$ 1,051

Environmental

The following table summarizes environmental remediation activity recorded during the nine months ended September 30, 2011 and 2010:

	2011	2010
Beginning balance January 1	\$ 721	\$ 706
Reductions for payments made	(54)	(51)
Changes in estimates	120	88
Ending balance September 30	\$ 787	\$ 743

The liabilities recorded represent our best estimate or the low end of a range of reasonably possible costs expected to be incurred to remediate sites, including operation and maintenance over periods of up to 30 years. It is reasonably possible that we may incur charges that exceed these recorded amounts because of regulatory agency orders and directives, changes in laws and/or regulations, higher than expected costs and the discovery of additional contamination. As part of our estimating process, we develop a range of reasonably possible alternate scenarios which include highest cost estimates for all remediation sites for which we have sufficient information based on our experience and existing laws and regulations. At September 30, 2011 and December 31, 2010, our reasonably possible highest cost estimate for all remediation sites exceeded our recorded liabilities by \$1,045 and \$957.

C-17

At September 30, 2011, our backlog included 5 C-17 aircraft currently under contract with the U.S. Air Force (USAF) as well as international orders for 2 C-17 aircraft. We believe that 18 additional orders beyond the 7 in backlog are probable. Probable orders include 13 aircraft for international orders and 5 aircraft for the USAF funded in the Fiscal Year 2010 Defense Appropriations Act which are not currently under contract. At September 30, 2011, we had approximately \$735 of inventory expenditures and potential termination liabilities to suppliers associated with probable orders. The Fiscal Year 2011 Appropriations Budget and the President's Fiscal Year 2012 budget request did not include any additional C-17 aircraft. We completed the planned production rate decrease from 15 aircraft per year to 10 per year during the third quarter of 2011. The associated reduction in headcount resulted in pension curtailment charges of \$34 in the first quarter of 2011. Should additional orders not materialize, it is reasonably possible that we will decide in 2012 to end production of the C-17 at a future date. We are still evaluating the full financial impact of a potential production shut-down, including additional pension curtailment charges, and any recovery that would be available from the U.S. government. Such recovery from the U.S. government would not include the costs incurred by us resulting from our direction to suppliers to begin working on aircraft beyond those currently under contract with the USAF.

Table of Contents**F-15**

At September 30, 2011, we had approximately \$1,735 of inventory expenditures and potential termination liabilities to suppliers related to a probable international order. Should this order not materialize, we could incur losses to write off inventory and settle termination liabilities.

BDS Fixed-Price Development Contracts

Fixed-price development work is inherently uncertain and subject to significant variability in estimates of the cost and time required to complete the work. Significant Boeing Defense, Space & Security (BDS) fixed-price development contracts include Airborne Early Warning and Control, P-8I, KC-46A Tanker, KC-767 International Tanker and commercial and military satellites. The operational and technical complexities of these contracts create financial risk, which could trigger termination provisions, order cancellations or other financially significant exposure. Changes to cost and revenue estimates could also result in lower margins or a material charge for reach-forward losses during the next 12 months.

Commercial Airplane Development Programs

The development and initial production phases of new commercial airplanes and new commercial airplane derivatives entail significant commitments to customers and suppliers, as well as substantial investments in working capital, infrastructure and research and development. Performance issues or cost overruns on these programs, which currently include the 787 and 747-8, could have a material impact on our consolidated results and financial position during the next 12 months.

Note 9 Arrangements with Off-Balance Sheet Risk

We enter into arrangements with off-balance sheet risk in the normal course of business, primarily in the form of guarantees. The following table provides quantitative data regarding our third-party guarantees. The maximum potential payments represent a worst-case scenario, and do not necessarily reflect amounts that we expect to pay. Estimated proceeds from collateral and recourse represent the anticipated values of assets we could liquidate or receive from other parties to offset our payments under guarantees. The carrying amount of liabilities represents the amount included in Accrued liabilities.

	Maximum Potential Payments		Estimated Proceeds from Collateral/Recourse		Carrying Amount of Liabilities	
	September 30 2011	December 31 2010	September 30 2011	December 31 2010	September 30 2011	December 31 2010
Contingent repurchase commitments	\$ 3,314	\$ 3,782	\$ 3,314	\$ 3,759	\$ 7	\$ 7
Indemnifications to ULA:						
Contributed Delta program launch inventory	215	187				
Contract pricing	261	261			7	7
Other Delta contracts	142	83			13	16
Other indemnifications	224	232			73	82
Credit guarantees	18	71	12	63	2	6
Residual value guarantees	29	29	22	21	6	6

Contingent Repurchase Commitments We have entered into contingent repurchase commitments with certain customers in conjunction with signing definitive agreements for the sale of new aircraft. Under these commitments, we agreed to repurchase the Sale Aircraft at a specified price, generally 10 to 15 years after delivery of the Sale Aircraft. Our repurchase of the Sale Aircraft is contingent upon a future, mutually acceptable agreement for the sale of additional new aircraft, and the subsequent exercise by the customer of its right to sell the Sale Aircraft to us. The repurchase price specified in

Table of Contents

contingent repurchase commitments is generally lower than the expected fair value at the specified repurchase date. Estimated Proceeds from Collateral/Recourse in the table above represent the lower of the contracted repurchase price or the expected fair value of each aircraft at the specified repurchase date.

Indemnifications to ULA We agreed to indemnify ULA through December 31, 2020 against potential non-recoverability and non-allowability of \$1,360 of Boeing Delta launch program inventory included in contributed assets plus \$1,860 of inventory subject to an inventory supply agreement which ends on March 31, 2021. Since inception, ULA has consumed \$1,211 of inventory that was contributed by us. ULA has made advance payments of \$720 to us and we have recorded revenues and cost of sales of \$462 under the inventory supply agreement through September 30, 2011.

In June 2011, the Defense Contract Management Agency (DCMA) notified ULA that it had determined that \$271 of costs that are partially indemnified by us are not recoverable under government contracts. ULA and Boeing believe these costs are recoverable and as such intend to challenge DCMA's determination. If, contrary to our belief, it is determined that some or all of these costs are not recoverable, we could be required to record pre-tax losses and make indemnification payments of up to \$226.

We agreed to indemnify ULA against potential losses that ULA may incur in the event ULA is unable to obtain certain additional contract pricing from the USAF for four satellite missions. We believe ULA is entitled to additional contract pricing. In December 2008, ULA submitted a claim to the USAF to re-price the contract value for two satellite missions. In March 2009, the USAF issued a denial of that claim. In June 2009, ULA filed a notice of appeal and in October 2009, ULA filed a complaint before the Armed Services Board of Contract Appeals (ASBCA) for a contract adjustment for the price of the two satellite missions. In September 2009, the USAF exercised its option for a third satellite mission. The USAF did not exercise an option for a fourth mission prior to the expiration. During the third quarter of 2010, ULA submitted a claim to the USAF to re-price the contract value of the third mission. In March 2011, ULA filed a notice of appeal before the ASBCA, seeking to re-price the third mission. If ULA is unsuccessful in obtaining additional pricing, we may be responsible for a portion of the shortfall and may record up to \$279 in pre-tax losses associated with the three missions, representing up to \$261 for the indemnification payment and up to \$18 for our portion of additional contract losses incurred by ULA.

Other Indemnifications As part of the 2004 sale agreement with General Electric Capital Corporation related to the sale of Boeing Capital Corporation's (BCC) Commercial Financial Services business, BCC is involved in a loss sharing arrangement for losses on transferred portfolio assets, such as asset sales, provisions for loss or asset impairment charges offset by gains from asset sales.

In conjunction with our sales of the Electron Dynamic Devices, Inc. and Rocketdyne Propulsion and Power businesses and the sale of our Commercial Airplanes facilities in Wichita, Kansas and Tulsa and McAlester, Oklahoma in 2005, we agreed to indemnify, for an indefinite period, the buyers for costs relating to pre-closing environmental contamination and certain other items. As it is impossible to assess whether there will be damages in the future or the amounts thereof (if any), we cannot estimate the maximum potential amount of future payments under these indemnities. Therefore, no liability has been recorded. There have been no claims submitted to date.

Credit Guarantees We have issued credit guarantees, principally to facilitate the sale and/or financing of commercial aircraft. Under these arrangements, we are obligated to make payments to a guaranteed party in the event that lease or loan payments are not made by the original lessee or debtor or certain specified services are not performed. A substantial portion of these guarantees has been extended on behalf of original lessees or debtors with less than investment-grade credit. Our

Table of Contents

commercial aircraft credit guarantees are collateralized by the underlying commercial aircraft and certain other assets. Current outstanding credit guarantees expire within the next nine years.

Residual Value Guarantees We have issued various residual value guarantees principally to facilitate the sale and financing of certain commercial aircraft. Under these guarantees, we are obligated to make payments to the guaranteed party if the related aircraft or equipment fair values fall below a specified amount at a future time. These obligations are collateralized principally by the underlying commercial aircraft and expire within the next seven years.

Note 10 Debt

On August 1, 2011, BCC issued notes totaling \$750, which included \$500 bearing an interest rate of 2.125% due August 15, 2016 and \$250 bearing an interest rate of 2.90% due August 15, 2018. The net proceeds after deducting the discount, underwriting fees and issuance costs were \$745. The notes are unsecured senior obligations and rank equally in right of payment with all of BCC's existing and future unsecured and unsubordinated indebtedness.

Note 11 Postretirement Plans

The components of net periodic benefit cost were as follows:

	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
Pension Plans				
Service cost	\$ 1,053	\$ 881	\$ 351	\$ 294
Interest cost	2,339	2,252	780	751
Expected return on plan assets	(2,805)	(2,887)	(935)	(963)
Amortization of prior service costs	182	186	61	62
Recognized net actuarial loss	942	582	314	194
Settlement and curtailment loss	64	11	9	
Net periodic benefit cost	\$ 1,775	\$ 1,025	\$ 580	\$ 338
Net periodic benefit cost included in Earnings from operations	\$ 1,304	\$ 847	\$ 389	\$ 280

	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
Other Postretirement Benefit Plans				
Service cost	\$ 182	\$ 90	\$ 110	\$ 30
Interest cost	377	303	171	101
Expected return on plan assets	(4)	(4)	(2)	(1)
Amortization of prior service costs	(72)	(58)	(24)	(19)
Recognized net actuarial loss	142	42	76	14
Settlement and curtailment loss		32		
Net periodic benefit cost	\$ 625	\$ 405	\$ 331	\$ 125
Net periodic benefit cost included in Earnings from operations	\$ 561	\$ 376	\$ 281	\$ 124

Table of Contents

During the three months ended September 30, 2011, we determined the accumulated benefit obligation for certain other postretirement benefit plans was understated. As a result, we recognized an additional \$294 of postretirement benefit obligations at September 30, 2011. This increased net periodic benefit cost during the nine and three months ended September 30, 2011 by \$184, which includes service cost of \$73, interest cost of \$68 and recognized net actuarial loss of \$43. Had the understatement been recorded at December 31, 2010, the postretirement benefit obligation would have increased by \$274 from \$8,546 to \$8,820. Management believes that these understatements were not material to the current period or prior periods.

Under our accounting policy, a portion of net periodic benefit cost is allocated to production as inventoried costs. Of the \$184 increase in net periodic benefit cost described above, the associated cost included in Earnings from operations was \$161 for the nine and three months ended September 30, 2011, with the remaining cost of \$23 classified as inventory.

During the nine months ended September 30, 2011 and 2010, we made discretionary pension contributions of \$500 and \$13. During the nine months ended September 30, 2011 and 2010, we made contributions to our other postretirement benefit plans of \$12 and \$11.

Note 12 Share-Based Compensation and Other Compensation Arrangements**Stock Options**

On February 22, 2011, we granted to our executives 5,426,910 options with an exercise price equal to the fair market value of our stock on the date of grant and which expire ten years after the date of grant. The stock options vest over a period of three years, with 34% vesting after the first year, 33% vesting after the second year and the remaining 33% vesting after the third year. The fair value of stock options granted was estimated using the Black-Scholes option-pricing model with the following assumptions:

					Weighted-Average Grant Date
Grant Date	Expected Life	Expected Volatility	Expected Dividend Yield	Risk Free Interest Rate	Fair Value Per Share
2/22/2011	6 years	29.8%	2.3%	2.5%	\$ 17.96

We determined the expected term of the stock option grants to be six years, calculated using the simplified method in accordance with the SEC Staff Accounting Bulletin 110. We use the simplified method since we have insufficient historical data to estimate expected term.

Restricted Stock Units

On February 22, 2011, we granted to our executives 1,364,440 restricted stock units (RSUs) as part of our long-term incentive program with a grant date fair value of \$71.44 per share. The RSUs will vest and settle in common stock (on a one-for-one basis) on the third anniversary of the grant date. In addition to RSUs awarded under our long-term incentive program, we have granted RSUs to certain executives and employees to encourage retention or to reward various achievements.

Performance Awards

In 2011, we granted to our executives Performance Awards with the payout based on the achievement of financial goals for the three-year period ending December 31, 2013. The minimum payout amount is \$0 and the maximum amount we could be required to pay out is \$265.

Table of Contents**Note 13 Derivative Financial Instruments****Cash Flow Hedges**

Our cash flow hedges include foreign currency forward contracts, foreign currency option contracts, commodity swaps, and commodity purchase contracts. We use foreign currency forward and option contracts to manage currency risk associated with certain transactions, specifically forecasted sales and purchases made in foreign currencies. Our foreign currency contracts hedge forecasted transactions principally occurring within five years in the future, with certain contracts hedging transactions up to 2021. We use commodity derivatives, such as swaps and fixed-price purchase commitments, to hedge against potentially unfavorable price changes for items used in production. These include commitments to purchase electricity at fixed prices through 2016.

Fair Value Hedges

Interest rate swaps under which we agree to pay variable rates of interest are designated as fair value hedges of fixed-rate debt. The net change in fair value of the derivatives and the hedged items is reported in BCC interest expense.

Derivative Instruments Not Receiving Hedge Accounting Treatment

We also hold certain derivative instruments, primarily foreign currency forward contracts, for risk management purposes but without electing any form of hedge accounting.

Notional Amounts and Fair Values

The notional amounts and fair values of derivative instruments in the Condensed Consolidated Statements of Financial Position were as follows:

	Notional amounts ⁽¹⁾		Other assets		Accrued liabilities	
	September 30 2011	December 31 2010	September 30 2011	December 31 2010	September 30 2011	December 31 2010
Derivatives designated as hedging instruments:						
Foreign exchange contracts	\$ 1,609	\$ 2,001	\$ 173	\$ 266	\$ (22)	\$ (15)
Interest rate contracts	388	875	31	24		
Commodity contracts	116	144			(123)	(113)
Derivatives not receiving hedge accounting treatment:						
Foreign exchange contracts	593	646	2	8	(44)	(58)
Total derivatives	2,706	3,666	206	298	(189)	(186)
Netting arrangements			(65)	(71)	65	71
Net recorded balance			\$ 141	\$ 227	\$ (124)	\$ (115)

⁽¹⁾ Notional amounts represent the gross contract/notional amount of the derivatives outstanding.

Table of Contents

Gains/(losses) associated with our cash flow and undesignated hedging transactions and their effect on other comprehensive loss and Net earnings were as follows:

	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
Effective portion recognized in other comprehensive loss, net of taxes:				
Foreign exchange contracts	\$ (20)	\$ 48	\$ (79)	\$ 84
Commodity contracts	(26)	(43)	(12)	(19)
Forward points recognized in earnings:				
Foreign exchange contracts	30	(14)	24	(22)
Undesignated derivatives recognized in Other income/(expense), net:				
Foreign exchange contracts	19	(23)	8	(1)

Based on our portfolio of cash flow hedges, we expect to reclassify gains of \$1 (pre-tax) during the next 12 months. Ineffectiveness related to our hedges was insignificant for the nine and three months ended September 30, 2011 and 2010.

We have derivative instruments with credit-risk-related contingent features. For foreign exchange contracts with original maturities of at least five years, our derivative counterparties could require settlement if we default on our five-year credit facility, expiring November 2012. For commodity contracts, our counterparties could require collateral posted in an amount determined by our credit ratings. The fair value of foreign exchange and commodity contracts that have credit-risk-related contingent features that are in a net liability position at September 30, 2011 was \$51. At September 30, 2011, there was no collateral posted related to our derivatives.

Note 14 Fair Value Measurements

The following table presents our assets and liabilities that are measured at fair value on a recurring basis and are categorized using the fair value hierarchy. The fair value hierarchy has three levels based on the reliability of the inputs used to determine fair value. Level 1 refers to fair values determined based on quoted prices in active markets for identical assets. Level 2 refers to fair values estimated using significant other observable inputs and Level 3 includes fair values estimated using significant non-observable inputs.

	September 30, 2011				December 31, 2010			
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
Assets								
Money market funds	\$ 1,110	\$ 1,110			\$ 3,337	\$ 3,337		
Available-for-sale investments	8	4		\$ 4	15	10		\$ 5
Derivatives	141		\$ 141		227		\$ 227

Table of Contents

Money market funds and available-for-sale equity securities are valued using a market approach based on the quoted market prices of identical instruments. Available-for-sale debt investments are primarily valued using a market approach based on benchmark yields, reported trades and broker/dealer quotes.

Derivatives include foreign currency, commodity and interest rate contracts. Our foreign currency forward contracts are valued using an income approach based on the present value of the forward rate less the contract rate multiplied by the notional amount. Commodity derivatives are valued using an income approach based on the present value of the commodity index prices less the contract rate multiplied by the notional amount. The fair value of our interest rate swaps is derived from a discounted cash flow analysis based on the terms of the contract and the interest rate curve.

Certain assets have been measured at fair value on a nonrecurring basis using significant unobservable inputs (Level 3). The following table presents the nonrecurring losses recognized for the nine months ended September 30, and the carrying value and asset classification of the related assets as of September 30:

	2011		2010	
	Carrying Value	Total Losses	Carrying Value	Total Losses
Operating lease equipment	\$ 70	\$ (49)	\$ 263	\$ (111)
Acquired intangible asset	8	(1)		
Property, plant and equipment				(4)
Total	\$ 78	\$ (50)	\$ 263	\$ (115)

The operating lease equipment was valued using a market approach based on the fair value for the related aircraft. The acquired intangible asset was valued using an income approach based on the discounted cash flows associated with the underlying tradename. The property, plant and equipment was valued using an income approach based on the discounted cash flows associated with the underlying equipment.

Fair Value Disclosures

The following table presents our financial assets and liabilities that are not measured at fair value on a recurring basis.

	September 30, 2011		December 31, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Assets				
Accounts receivable	\$ 6,296	\$ 6,167	\$ 5,422	\$ 5,283
Notes receivable	633	660	480	501
Liabilities				
Debt, excluding capital lease obligations	(12,141)	(14,157)	(12,234)	(13,525)
Accounts payable	(8,502)	(8,489)	(7,715)	(7,704)
Residual value and credit guarantees	(8)	(8)	(12)	(11)
Contingent repurchase commitments	(7)	(5)	(7)	(84)

The fair values of the accounts receivable and accounts payable are based on current market rates for loans of the same risk and maturities. The fair values of our variable rate notes receivable that reprice frequently approximate their carrying amounts. The fair values of fixed rate notes receivable are

Table of Contents

estimated using discounted cash flow analysis using interest rates currently offered on loans with similar terms to borrowers of similar credit quality. The fair value of our debt is based on current market yields for our debt traded in the secondary market. The fair values of the residual value guarantees and contingent repurchase commitments are determined using a Black Futures Options formula and include such assumptions as the expected value of the aircraft on the settlement date, volatility of aircraft prices, time until settlement and the risk free discount rate. The fair value of the credit guarantees is estimated based on the expected cash flows of those commitments, given the creditor's probability of default, and discounted using the risk free rate. With regard to other financial instruments with off-balance sheet risk, it is not practicable to estimate the fair value of our indemnifications because the amount and timing of those arrangements are uncertain.

Note 15 Legal Proceedings

Various legal proceedings, claims and investigations related to products, contracts and other matters are pending against us. Potentially material contingencies are discussed below.

We are subject to various U.S. government investigations, from which civil, criminal or administrative proceedings could result or have resulted. Such proceedings involve or could involve claims by the government for fines, penalties, compensatory and treble damages, restitution and/or forfeitures. Under government regulations, a company, or one or more of its operating divisions or subdivisions, can also be suspended or debarred from government contracts, or lose its export privileges, based on the results of investigations. We believe, based upon current information, that the outcome of any such government disputes and investigations will not have a material effect on our financial position, results of operations, or cash flows, except as set forth below. Unless otherwise indicated below, a range of loss associated with any individual legal proceeding set forth below cannot be estimated.

A-12 Litigation

In 1991, the Department of the Navy (the Navy) notified McDonnell Douglas Corporation (now merged into The Boeing Company) and General Dynamics Corporation (together, the Team) that it was terminating for default the Team's contract for development and initial production of the A-12 aircraft. The Team had full responsibility for performance of the contract and both contractors are jointly and severally liable for any potential liabilities resulting from the termination. The Team filed a legal action to contest the Navy's default termination, to assert its rights to convert the termination to one for the convenience of the government, and to obtain payment for work done and costs incurred on the A-12 contract but not paid to date. As of September 30, 2011, inventories included approximately \$586 of recorded costs on the A-12 contract, against which we have established a loss provision of \$350. The amount of the provision, which was established in 1990, was based on McDonnell Douglas Corporation's belief, supported by an opinion of outside counsel, that the termination for default would be converted to a termination for convenience, and that the best estimate of possible loss on termination for convenience was \$350.

On August 31, 2001, the U.S. Court of Federal Claims issued a decision after trial upholding the government's default termination of the A-12 contract. In 2003, the Court of Appeals for the Federal Circuit, finding that the trial court had applied the wrong legal standard, vacated the trial court's 2001 decision and ordered the case sent back to the trial court for further proceedings. On May 3, 2007, the U.S. Court of Federal Claims issued a decision upholding the government's default termination of the A-12 contract. We filed a Notice of Appeal on May 4, 2007 with the Court of Appeals for the Federal Circuit. On June 2, 2009, the Court of Appeals rendered an opinion affirming the trial court's 2007 decision sustaining the government's default termination. On December 29, 2009, the Navy sent letters to the Team requesting payment of \$1,352 in unliquidated progress payments, plus applicable interest. On February 19, 2010, the Navy sent a letter confirming that it would not pursue payment from the

Table of Contents

Team pending the U.S. Supreme Court's review of this matter. On May 23, 2011, the U.S. Supreme Court vacated the decision of the Court of Appeals upholding the default termination, and remanded the case to the Court of Appeals. On July 7, 2011, the Court of Appeals remanded the case to the trial court for additional factual determinations.

We believe that the termination for default is contrary to law and fact and that the loss provision established by McDonnell Douglas Corporation in 1990, continues to provide adequately for the reasonably possible reduction in value of A-12 net contracts in process as of September 30, 2011. Final resolution of the A-12 litigation will depend on the outcome of further proceedings or possible negotiations with the U.S. government. If, upon remand, the courts hold, contrary to our belief, that the government was not obligated to share its superior knowledge and determines that a termination for default was appropriate, we could incur an additional loss of up to \$275, consisting principally of \$236 of remaining inventory costs. If the courts further hold that a money judgment should be entered against the Team, we could be required to pay the U.S. government up to one-half of the unliquidated progress payments of \$1,350 plus statutory interest from February 1991 (which interest currently totals up to \$1,555). In that event, our loss would total approximately \$1,724 in pre-tax charges. Should, however, the March 31, 1998 judgment of the U.S. Court of Federal Claims in favor of the Team be reinstated, we could be entitled to receive payment of approximately \$1,173, including interest from June 26, 1991.

Employment, Labor and Benefits Litigation

We have been named as a defendant in two pending class action lawsuits filed in the U.S. District Court for the District of Kansas, each related to the 2005 sale of our former Wichita facility to Spirit AeroSystems, Inc. (Spirit). The first action involves allegations that Spirit's hiring decisions following the sale were tainted by age discrimination, violated the Employee Retirement Income Security Act (ERISA), violated our collective bargaining agreements, and constituted retaliation. The case was brought in 2006 as a class action on behalf of individuals not hired by Spirit. During the second quarter of 2010, the court granted summary judgment in favor of Boeing and Spirit on all class action claims. Following certain procedural motions, plaintiffs filed a notice of appeal to the Tenth Circuit Court of Appeals on August 10, 2011, and are seeking to stay all remaining individual claims in the district court pending resolution of the appeal.

The second action, initiated in 2007, alleges collective bargaining agreement breaches and ERISA violations in connection with alleged failures to provide benefits to certain former employees of the Wichita facility. Discovery in the case is ongoing. Spirit has agreed to indemnify Boeing for any and all losses in the first action, with the exception of claims arising from employment actions prior to January 1, 2005. While Spirit has acknowledged a limited indemnification obligation in the second action, we believe that Spirit is obligated to indemnify Boeing for any and all losses in the second action. Written discovery closed by joint stipulation of the parties on June 6, 2011. Depositions concluded on August 18, 2011. The filing dates for dispositive motions are scheduled for the fourth quarter of 2011 and first quarter of 2012.

On October 13, 2006, we were named as a defendant in a lawsuit filed in the U.S. District Court for the Southern District of Illinois. Plaintiffs, seeking to represent a class of similarly situated participants and beneficiaries in The Boeing Company Voluntary Investment Plan (the VIP), alleged that fees and expenses incurred by the VIP were and are unreasonable and excessive, not incurred solely for the benefit of the VIP and its participants, and were undisclosed to participants. The plaintiffs further alleged that defendants breached their fiduciary duties in violation of §502(a)(2) of ERISA, and sought injunctive and equitable relief pursuant to §502(a)(3) of ERISA. During the first quarter of 2010, the Seventh Circuit Court of Appeals granted a stay of trial proceedings in the district court pending resolution of an appeal made by Boeing in 2008 to the case's class certification order. On January 21, 2011, the Seventh Circuit reversed the district court's class certification order and decertified the class.

Table of Contents

The Seventh Circuit remanded the case to the district court for further proceedings. On March 2, 2011, plaintiffs filed an amended motion for class certification and a supplemental motion on August 7, 2011. Boeing's opposition to class certification was filed on September 6, 2011. Plaintiffs' reply brief in support of class certification was filed on September 27, 2011.

On April 20, 2011, the National Labor Relations Board (NLRB) issued a complaint claiming that our decision to build an airplane final assembly plant in Charleston, South Carolina was made in retaliation for strikes conducted by the International Association of Machinists in Washington State. The complaint seeks to force Boeing to place the second 787 line in the Puget Sound area instead of South Carolina. We believe that the allegations in the complaint are without merit and that the legal theory advanced is contrary to settled precedent. Boeing intends to vigorously contest the claim. A hearing before an Administrative Law Judge of the NLRB began on June 14, 2011 and is ongoing.

BSSI/ICO Litigation

On August 16, 2004, our wholly-owned subsidiary, Boeing Satellite Systems International, Inc. (BSSI) filed a complaint for declaratory relief against ICO Global Communications (Operations), Ltd. (ICO) in Los Angeles County Superior Court seeking a declaration that ICO's prior termination of two contracts for convenience extinguished all claims between the parties. On September 16, 2004, ICO filed a cross-complaint alleging breach of contract, economic duress, fraud, unfair competition, and other claims. ICO added The Boeing Company as a defendant in October 2005 to some of these claims and for interference with contract and misappropriation of trade secrets. On January 13, 2006, BSSI filed a cross-complaint against ICO, ICO Global Communications (Holdings) Limited (ICO Holdings), ICO's parent, and Eagle River Investments, LLC, parent of both ICO and ICO Holdings, alleging fraud and other claims. The trial commenced on June 19, 2008, with ICO seeking to recover approximately \$2,000 in damages, including all monies paid to BSSI and Boeing Launch Services, plus punitive damages and other unspecified damages and relief.

On October 21, 2008, the jury returned a verdict awarding ICO compensatory damages of \$371 plus interest, based upon findings of contract breach, fraud and interference with contract. On October 31, 2008, the jury awarded ICO punitive damages of \$236. On January 2, 2009, the court entered judgment for ICO in the amount of \$631 which included \$24 in prejudgment interest.

On February 26, 2009 the trial court granted in part and denied in part post-trial motions we filed seeking to set aside the verdict. As a result, on March 3, 2009, the court entered an amended judgment for ICO in the amount of \$604, which included \$371 in compensatory damages, \$207 in punitive damages and \$26 in prejudgment interest. Post-judgment interest will accrue on the judgment at the rate of 10% per year (simple interest) from January 2, 2009. As of September 30, 2011, the amount of post-judgment interest totaled \$166.

We filed a notice of appeal and ICO filed a notice of cross-appeal in March 2009. As of November 1, 2010, the appeals were fully briefed. Oral argument is scheduled for October 27, 2011. We believe that we have substantial arguments on appeal, which we intend to pursue vigorously.

BSSI/Telesat Canada

On November 9, 2006, Telesat Canada (Telesat) and a group of its insurers served BSSI with an arbitration demand alleging breach of contract, gross negligence and willful misconduct in connection with the constructive total loss of Anik F1, a model 702 satellite manufactured by BSSI. Telesat and its insurers initially sought over \$385 in damages and \$10 in lost profits, but revised their demand to \$263. BSSI has asserted a counterclaim against Telesat for \$13.1 in unpaid performance incentive payments plus late charges. BSSI also asserted a \$180 contingent counterclaim on the theory that any ultimate award to reimburse the insurers for their payments to Telesat could only result from Telesat's breach of

Table of Contents

its contractual obligation to obtain a full waiver of subrogation rights barring recourse against BSSI. We believe that the claims asserted by Telesat and its insurers lack merit, but we have notified our insurance carriers of the demand. The arbitration was stayed pending an application by Telesat to the Ontario Superior Court on a preliminary issue. On July 16, 2010, the court denied Telesat's request to exclude certain evidence, but granted its alternative request to remove the Chairperson from the arbitration panel. A new Chairperson was appointed on August 19, 2010, and the stay has been lifted. The arbitration hearing has been rescheduled for April 16, 2012.

On April 26, 2007, a group of our insurers filed a declaratory judgment action in the Circuit Court of Cook County, Illinois asserting certain defenses to coverage and requesting a declaration of their obligation under our insurance and reinsurance policies relating to the Telesat Anik F1 arbitration. On June 12, 2008, the court granted the insurers' motion for summary judgment, concluding that our insurance policy excluded the kinds of losses alleged by Telesat. On January 16, 2009, the court granted Boeing's motion for reconsideration, ruling in favor of Boeing to require the insurers to provide insurance coverage to defend the claim. The case has been stayed pending completion of the underlying arbitration.

Civil Securities Litigation

On November 13, 2009, plaintiff shareholders filed a putative securities fraud class action against The Boeing Company and two of our senior executives in federal district court in Chicago. This lawsuit arose from our June 2009 announcement that the first flight of the 787 Dreamliner would be postponed due to a need to reinforce an area within the side-of-body section of the aircraft. Plaintiffs contended that we were aware before June 2009 that the first flight could not take place as scheduled due to issues with the side-of-body section of the aircraft, and that our determination not to announce this delay earlier resulted in an artificial inflation of our stock price for a multi-week period in May and June 2009. On March 7, 2011, the Court dismissed the complaint with prejudice. On April 4, 2011, plaintiffs filed a motion for reconsideration.

In addition, plaintiff shareholders have filed three similar shareholder derivative lawsuits concerning the flight schedule for the 787 Dreamliner that closely track the allegations in the putative class action lawsuit. Two of the suits were filed in Illinois state court and have been consolidated. The remaining derivative suit was filed in federal district court in Chicago. No briefing or discovery has yet taken place in any of these lawsuits. We believe the allegations in all of these cases are without merit, and we intend to contest the cases vigorously.

Note 16 Business Segment Data

Effective January 1, 2011, certain programs and assets were realigned within BDS segments. Business segment data for all periods presented have been adjusted to reflect the realignment.

Our primary profitability measurements to review a segment's operating results are earnings from operations and operating margins. See page 5 for a Summary of Business Segment Data, which is an integral part of this note.

Intersegment revenues, eliminated in Unallocated items and eliminations, are shown in the following table.

	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
Commercial Airplanes	\$ 572	\$ 396	\$ 204	\$ 186
Boeing Capital Corporation	49	59	15	26
Total	\$ 621	\$ 455	\$ 219	\$ 212

Table of Contents

Unallocated items and eliminations includes costs not attributable to business segments as well as intercompany profit eliminations. This includes unallocated pension and other postretirement expense which represents the difference between costs recognized under Generally Accepted Accounting Principles in the United States of America in the consolidated financial statements and federal cost accounting standards required to be utilized by our business segments for U.S. government contracting purposes. The most significant items not allocated to segments are shown in the following table.

	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
Share-based plans	\$ (63)	\$ (112)	\$ (19)	\$ (22)
Deferred compensation	4	(84)	64	(47)
Pension	(216)	64	(58)	21
Postretirement	(208)	(36)	(175)	(12)
Capitalized interest	(39)	(41)	(8)	(13)
Eliminations and other	(182)	(253)	(110)	(154)
Total	\$ (704)	\$ (462)	\$ (306)	\$ (227)

Segment assets and liabilities are summarized in the following tables.

	September 30 2011	December 31 2010
Assets		
Commercial Airplanes	\$ 33,819	\$ 28,341
Boeing Defense, Space & Security:		
Boeing Military Aircraft	8,029	6,725

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

The Boeing Company

Chicago, Illinois

We have reviewed the accompanying condensed consolidated statement of financial position of The Boeing Company and subsidiaries (the Company) as of September 30, 2011, the related condensed consolidated statements of operations for the three-month and nine-month periods ended September 30, 2011 and 2010, and the related condensed consolidated statements of cash flows and equity for the nine-month periods ended September 30, 2011 and 2010. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statement of financial position of the Company as of December 31, 2010, and the related consolidated statements of operations, equity and cash flows for the year then ended (not presented herein); and in our report dated February 9, 2011, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated statement of financial position as of December 31, 2010 is fairly stated, in all material respects, in relation to the consolidated statements of financial position from which it has been derived.

/s/ DELOITTE & TOUCHE LLP

Chicago, Illinois

October 26, 2011

FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as may, should, expects, intends, projects, plans, believes, estimates, targets, anticipates and similar expressions are used to identify forward-looking statements. Examples of forward-looking statements include statements relating to our future financial condition and operating results, as well as any other statement that does not directly relate to any historical or current fact.

Forward-looking statements are based on our current expectations and assumptions, which may not prove to be accurate. These statements are not guarantees and are subject to risks, uncertainties and changes in circumstances that are difficult to predict. Many factors could cause actual results to differ materially and adversely from these forward-looking statements. Among these factors are risks related to:

- (1) general conditions in the economy and our industry, including those due to regulatory changes;
- (2) our reliance on our commercial customers, our suppliers and the worldwide market;
- (3) our commercial development programs, including the 787 and 747-8 commercial aircraft programs;
- (4) changing acquisition priorities of the U.S. government;
- (5) our dependence on U.S. government contracts;
- (6) our reliance on fixed-price contracts;
- (7) our reliance on cost-type contracts;
- (8) uncertainties concerning contracts that include in-orbit incentive payments;
- (9) changes in accounting estimates;
- (10) changes in the competitive landscape in our markets;
- (11) our non-U.S. operations, including sales to non-U.S. customers;
- (12) potential adverse developments in new or pending litigation and/or government investigations;

Edgar Filing: BOEING CO - Form 10-Q

- (13) customer and aircraft concentration in Boeing Capital Corporation's customer financing portfolio;
- (14) changes in our ability to obtain debt on commercially reasonable terms and at competitive rates in order to fund our operations and contractual commitments;
- (15) realizing the anticipated benefits of mergers, acquisitions, joint ventures, strategic alliances or divestitures;
- (16) the adequacy of our insurance coverage to cover significant risk exposures;
- (17) potential business disruptions related to physical security threats, information technology attacks or natural disasters;

26

Table of Contents

(18) work stoppages or other labor disruptions;

(19) significant changes in discount rates and actual investment on pension assets; and

(20) potential environmental liabilities.

Additional information concerning these and other factors can be found in our filings with the Securities and Exchange Commission, including the Risk Factors on pages 6 through 14 of our most recent Annual report on Form 10-K, Management's Discussion and Analysis of Financial Condition and Results of Operations and Notes, 8, 9, and 15 to our Condensed Consolidated Financial Statements included in this Quarterly Report on Form 10-Q and Current Reports on Form 8-K. Any forward-looking information speaks only as of the date on which it is made, and we assume no obligation to update or revise any forward-looking statement whether as a result of new information, future events or otherwise, except as required by law.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations****Consolidated Operating Results**

The following table summarizes key indicators of consolidated results of operations:

	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
<i>(Dollars in millions, except per share data)</i>				
Revenues	\$ 49,180	\$ 47,756	\$ 17,727	\$ 16,967
Earnings from operations	\$ 4,247	\$ 3,868	\$ 1,714	\$ 1,387
Operating margins	8.6%	8.1%	9.7%	8.2%
Effective income tax rate	33.6%	38.8%	33.4%	32.7%
Net earnings from continuing operations	\$ 2,624	\$ 2,145	\$ 1,094	\$ 837
Diluted earnings per share	\$ 3.49	\$ 2.89	\$ 1.46	\$ 1.12

	September 30 2011	December 31 2010
<i>(Dollars in millions)</i>		
Contractual backlog	\$ 316,859	\$ 303,955
Unobligated backlog	14,727	16,871

Revenues

The following table summarizes revenues:

	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
<i>(Dollars in millions)</i>				
Commercial Airplanes	\$ 25,476	\$ 23,650	\$ 9,515	\$ 8,749
Boeing Defense, Space & Security	23,505	23,778	8,200	8,182
Boeing Capital Corporation	416	494	126	170
Other segment	107	107	33	27
Unallocated items and eliminations	(324)	(273)	(147)	(161)
Total	\$ 49,180	\$ 47,756	\$ 17,727	\$ 16,967

Revenues for the nine and three months ended September 30, 2011 increased by \$1,424 million and \$760 million or 3% and 4% compared with the same periods in 2010. Commercial Airplanes revenues increased by \$1,826 million and \$766 million or 8% and 9% primarily due to higher new airplane and commercial aviation services sales. Boeing Defense, Space & Security (BDS) revenues decreased by \$273 million for the nine months and increased by \$18 million for the three months compared with the same periods in the prior year. The nine month decrease was primarily due to lower revenues in the Network & Space Systems (N&SS) and Global Services & Support (GS&S) segments, partially offset by higher revenues in the Boeing Military Aircraft (BMA) segment. The three month increase was due to higher BMA revenues partially offset by lower revenues in the N&SS and GS&S segments.

Table of Contents**Earnings From Operations**

The following table summarizes earnings from operations:

<i>(Dollars in millions)</i>	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
Commercial Airplanes	\$ 2,514	\$ 2,379	\$ 1,085	\$ 1,017
Boeing Defense, Space & Security	2,293	2,059	824	684
Boeing Capital Corporation	133	146	19	45
Other segment	11	(254)	92	(132)
Unallocated items and eliminations	(704)	(462)	(306)	(227)
Total	\$ 4,247	\$ 3,868	\$ 1,714	\$ 1,387

Earnings from operations for the nine and three months ended September 30, 2011 increased by \$379 million and \$327 million compared with the same periods in 2010. Commercial Airplanes earnings from operations for the nine months ended September 30, 2011 increased by \$135 million. This increase was primarily due to earnings from higher revenues on new airplane deliveries and commercial aviation services, partially offset by increases in research and development. Commercial Airplanes earnings from operations for the three months ended September 30, 2011 increased by \$68 million. The increase was primarily due to earnings from higher revenues on new airplane deliveries and a reduction in research and development costs related to certifications of the 747-8 Freighter and 787-8, partially offset by increases in period costs associated with business growth. BDS earnings increased by \$234 million and \$140 million compared with the same periods in 2010. The increase for the nine months was primarily due to higher earnings in the BMA and N&SS segments. The increase for the three months was due to higher earnings in all three BDS segments. Unallocated items and eliminations changed by \$242 million and \$79 million reflecting higher pension and postretirement costs partially offset by lower share-based plan expense and deferred compensation costs.

The most significant expense items not allocated to segments are shown in the following table:

<i>(Dollars in millions)</i>	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
Share-based plans	\$ (63)	\$ (112)	\$ (19)	\$ (22)
Deferred compensation	4	(84)	64	(47)
Pension	(216)	64	(58)	21
Postretirement	(208)	(36)	(175)	(12)
Eliminations and other	(221)	(294)	(118)	(167)
Total	\$ (704)	\$ (462)	\$ (306)	\$ (227)

Deferred compensation expense decreased by \$88 million and \$111 million for the nine and three months ended September 30, 2011 compared with the same periods in 2010. The year over year changes are primarily driven by changes in our stock price and broad stock market conditions.

Eliminations and other expense for the nine and three months ended September 30, 2011 decreased by \$73 million and \$49 million compared with the same periods in 2010, primarily due to the timing of intercompany allocations.

Unallocated pension costs for the nine and three months ended September 30, 2011 increased by \$280 million and \$79 million compared with the same periods in 2010. The increase for the nine months reflects higher amortization of prior actuarial losses, lower discount rates and C-17 related pension curtailment charges. The increase for the three months reflects higher amortization of prior

Table of Contents

actuarial losses and lower discount rates. The increase in unallocated postretirement expense for the nine and three months ended September 30, 2011 includes \$161 million of additional expense recorded during the quarter due to an adjustment primarily related to prior years' accumulated postretirement benefit obligations. See the discussion of the postretirement liability understatement in Note 11 to our Condensed Consolidated Financial Statements.

Unallocated pension and other postretirement expense represents the difference between costs recognized under Generally Accepted Accounting Principles in the United States of America in the condensed consolidated financial statements and federal cost accounting standards required to be utilized by our business segments for U.S. government contracting purposes. We recorded net periodic benefit cost related to pensions and other postretirement benefits of \$2,400 million and \$911 million for the nine and three months ended September 30, 2011 and \$1,430 million and \$463 million for the nine and three months ended September 30, 2010. Not all net periodic benefit cost is recognized in earnings in the period incurred. A portion of net periodic benefit cost is allocated to production as product cost and a portion remains in inventory at the end of the reporting period. Earnings from operations included the following net periodic benefit cost allocated to business segments and Unallocated items and eliminations:

<i>(Dollars in millions)</i>	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
Pension Plans				
Allocated to business segments	\$ (1,088)	\$ (911)	\$ (331)	\$ (301)
Other unallocated items and eliminations	(216)	64	(58)	21
Total	\$ (1,304)	\$ (847)	\$ (389)	\$ (280)

<i>(Dollars in millions)</i>	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
Other Postretirement Benefit Plans				
Allocated to business segments	\$ (353)	\$ (340)	\$ (106)	\$ (112)
Other unallocated items and eliminations	(208)	(36)	(175)	(12)
Total	\$ (561)	\$ (376)	\$ (281)	\$ (124)

Other Earnings Items

<i>(Dollars in millions)</i>	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
Earnings from operations	\$ 4,247	\$ 3,868	\$ 1,714	\$ 1,387
Other income/(expense), net	76	20	49	(13)
Interest and debt expense	(374)	(384)	(121)	(130)
Earnings before income taxes	3,949	3,504	1,642	1,244
Income tax expense	(1,325)	(1,359)	(548)	(407)
Net earnings from continuing operations	\$ 2,624	\$ 2,145	\$ 1,094	\$ 837

The increase in Other income is primarily due to gains on foreign exchange contracts.

The effective tax rates were 33.6% and 33.4% for the nine and three months ended September 30, 2011 and 38.8% and 32.7% for the same periods in the prior year. The decrease in the effective tax rate for the nine months as compared with the prior year was primarily due to an

income tax charge of \$150 million recorded during the first quarter of 2010 as a result of the Patient Protection and

Table of Contents

Affordable Care Act, as modified by the Health Care and Education Reconciliation Act of 2010. The decrease in the effective tax rate for the nine months as compared with the prior year was also due to U.S. research and development tax credit benefits that exist in 2011, but did not exist as of September 30, 2010. In December 2010, the research and development tax credit was retroactively renewed for 2010 and extended through December 31, 2011.

For additional discussion related to Income Taxes, see Note 3 to our Condensed Consolidated Financial Statements.

Backlog

Contractual backlog of unfilled orders excludes purchase options, announced orders for which definitive contracts have not been executed and unobligated U.S. and non-U.S. government contract funding. The increase in contractual backlog during the nine months ended September 30, 2011 compared with December 31, 2010 was primarily due to Commercial Airplanes.

Unobligated backlog includes U.S. and foreign government definitive contracts for which funding has not been authorized. The decrease in unobligated backlog during the nine months ended September 30, 2011 was due to funding of existing multi-year contracts and partial terminations for convenience by the U.S. Army of the Brigade Combat Team Modernization (BCTM) program, partially offset by the U.S. Air Force (USAF) contract for the KC-46A Tanker.

Additional Considerations

KC-46A Tanker On February 24, 2011, we were awarded a contract from the USAF to design, develop, manufacture and deliver 4 next generation aerial refueling tankers. The KC-46A Tanker will be a derivative of our 767 commercial aircraft. This contract is a fixed-price incentive firm contract, valued at \$4.9 billion and involves highly complex designs. Changes to our estimated cost to perform the work could result in a material charge. This contract contains production options. If all options under the contract are exercised, we expect to deliver 179 aircraft for a total expected contract value of approximately \$30 billion. For segment reporting purposes, backlog, revenues and costs are recorded in the Commercial Airplanes and BMA segments.

Segment Results of Operations

Commercial Airplanes

Business Environment and Trends

Airline Industry Environment Global economic uncertainty, as well as factors such as political turmoil in the Middle East, the March 2011 natural disasters in Japan, the European sovereign debt crisis, deficit reduction challenges in the U.S., and high fuel prices continue to impact airline traffic and costs. Due in large part to these factors, net profits for the global airline industry are expected to total \$7 billion in 2011, reduced from \$18 billion in 2010. In the face of these challenges, passenger traffic has been more resilient than air cargo traffic. While the European sovereign debt crisis may result in reduced levels of commercial bank financing for aircraft, we expect increases from other sources of financing, such as capital markets, lessors, and regional banks.

The long-term outlook for the industry remains positive due to the fundamental drivers of air travel growth: economic growth and the increasing propensity to travel due to increased trade, globalization and improved airline services driven by liberalization of air traffic rights between countries. Our 20-year forecast is for a long-term average growth rate of 5% 6% per year for passenger and cargo traffic based on a projected average annual worldwide real economic growth rate of 3%. Based on long-term global economic growth projections, and factoring in increased utilization of the worldwide airplane fleet and requirements to replace older airplanes, we project a \$4.0 trillion market for 33,500 new airplanes over the next 20 years.

Table of Contents**Operating Results**

	September 30 Nine months ended September 30		September 30 Three months ended September 30	
(Dollars in millions)	2011	2010	2011	2010
Revenues	\$ 25,476	\$ 23,650	\$ 9,515	\$ 8,749
Earnings from operations	\$ 2,514	\$ 2,379	\$ 1,085	\$ 1,017
Operating margins	9.9%	10.1%	11.4%	11.6%

	September 30 2011	December 31 2010
(Dollars in millions)		
Contractual backlog	\$ 270,289	\$ 255,591
Unobligated backlog	2,190	49

Revenues

Year over year changes in Revenue are shown in the following table:

	Nine months ended September 30, 2011 vs. September 30, 2010	Three months ended September 30, 2011 vs. September 30, 2010
(Dollars in millions)		
New airplane sales	\$ 1,363	\$ 750
Commercial aviation services	464	42
Other	(1)	(26)
Total	\$ 1,826	\$ 766

Revenues for the nine and three months ended September 30, 2011 increased by \$1,826 million and \$766 million or 8% and 9% compared with the same periods of 2010 primarily due to higher new airplane and commercial aviation services sales.

Commercial jet aircraft deliveries, including intercompany deliveries, were as follows:

Program	737	747	767	777	787	Total
Deliveries during the first nine months of 2011	281		14	53	1	349
Deliveries during the first nine months of 2010	281		9	56		346
Deliveries during the third quarter of 2011	100		5	21	1	127
Deliveries during the third quarter of 2010	100		3	21		124
Cumulative deliveries as of 9/30/2011	3,787	1,418	1,008	963	1	
Cumulative deliveries as of 12/31/2010	3,506	1,418	994	910		

Earnings From Operations

Earnings from operations for the nine months ended September 30, 2011 increased by \$135 million. This increase was primarily due to earnings from higher revenues on new airplane deliveries and commercial aviation services, partially offset by increases in period costs associated with

business growth and increases in research and development.

Earnings from operations for the three months ended September 30, 2011 increased by \$68 million. The increase was primarily due to earnings from higher revenues on new airplane deliveries and a reduction in research and development cost related to certifications of the 747-8 Freighter and 787-8, partially offset by increases in period costs associated with business growth.

Table of Contents**Backlog**

The increase in contractual backlog during the nine months ended September 30, 2011 was due to net orders in excess of revenues and changes in projected revenue escalation. A number of our customers may have contractual remedies that may be implicated by program delays. We continue to address customer claims and requests for other contractual relief as they arise. However, once orders are included in firm backlog, orders remain in backlog until canceled or fulfilled, although the value of orders is adjusted as changes to price and schedule are agreed to with customers. The increase in unobligated backlog represents Commercial Airplanes' share of the USAF contract for the KC-46A Tanker.

Accounting Quantity

The following table provides details of the accounting quantities and firm orders by program. Cumulative firm orders represent the cumulative number of commercial jet aircraft deliveries plus undelivered firm orders.

As of 9/30/2011	Program				
	737	747	767	777	787
Program accounting quantities	5,600	1,549	1,060	1,300	1,100
Undelivered units under firm orders	2,215	111	49	325	820
Cumulative firm orders	6,002	1,529	1,057	1,288	821

As of 12/31/2010	Program				
	737	747	767	777	787
Program accounting quantities	5,000	1,524	1,048	1,150	*
Undelivered units under firm orders	2,186	107	50	253	847
Cumulative firm orders	5,692	1,525	1,044	1,163	847

* The initial accounting quantity for the 787 program was established in the third quarter of 2011.

737 Program The accounting quantity for the 737 program was unchanged for the three months ended September 30, 2011, and increased by 600 units during the nine months ended September 30, 2011 to reflect the current backlog and continued demand. During 2010, we announced plans to increase monthly production from 31.5 to 35 airplanes per month beginning in 2012 and a further increase to 38 airplanes per month beginning in 2013. On June 15, 2011, to address continued demand for delivery positions, we announced plans to increase production of the 737 to 42 aircraft per month beginning in 2014. On August 30, 2011, we announced the launch of the 737 MAX, the new engine variant of the 737.

747 Program The accounting quantity for the 747 program was unchanged for the three months ended September 30, 2011 and increased by 25 units during the nine months ended September 30, 2011. The 747-8 Freighter was certified during the third quarter and first delivery occurred in October 2011. First flight of the 747-8 Intercontinental passenger derivative occurred on March 20, 2011. The 747-8 Intercontinental remains on track for certification in the fourth quarter. First delivery is now scheduled for first quarter 2012 due to a delay in flight testing and the time required to incorporate all flight test driven changes. In addition to continuing flight testing and certification efforts on the 747-8 Intercontinental, we remain focused on incorporating engineering and design changes identified during flight testing into aircraft completed prior to certification, achieving a planned increase in 747 production rate from 1.5 to 2 airplanes per month in mid-2012, reducing out-of-sequence work and improving supply chain efficiency. If risks associated with these activities cannot be mitigated it could result in customer claims and/or supplier assertions and/or result in an additional reach-forward loss. We continue to implement mitigation plans and cost-reduction efforts to improve program profitability and address program risks.

Table of Contents

767 Program The accounting quantity for the 767 program was unchanged for the three months ended September 30, 2011 and increased by 12 units during the nine months ended September 30, 2011 due to the program's normal progress of obtaining additional orders and delivering aircraft.

777 Program The accounting quantity for the 777 program increased by 50 and 150 units during the three and nine months ended September 30, 2011 due to the program's normal progress of obtaining additional orders and delivering aircraft. As planned, the 777 program's first delivery at 7 airplanes per month from 5 per month occurred in June 2011.

787 Program We completed initial type certification flight testing activities and received design and production certifications for the 787-8 during the third quarter of 2011. We delivered the first 787 airplane in September 2011.

We continue to monitor and address challenges associated with aircraft assembly, including management of our extended global supply chain, incorporation of design changes into aircraft in various stages of assembly, completion and integration of traveled work as well as weight and systems integration. For example, in 2011 we delayed production rate increases and some 787 component deliveries to reduce out-of-sequence work moving into final assembly at our Everett factory and improve supply chain efficiency. In addition, a number of engineering and other design changes identified during flight testing are being incorporated on aircraft completed prior to certification.

We remain focused on achieving planned increases in 787 production rates while continuing to satisfy customer mission and performance requirements. We currently expect to increase production of 787 aircraft to 10 aircraft per month by late 2013. Our efforts to achieve planned production rate targets include improving the production system, coordinating rate increases with suppliers, the start-up of the second assembly line in North Charleston, South Carolina and establishing transitional surge capacity at our Everett location. With successful completion of the 787-9 critical design review we have assessed the schedule and first delivery is now expected in early 2014, although we continue to look for opportunities to regain schedule. In addition, we continue to work with our customers and suppliers to assess the specific impacts of prior schedule changes, including requests for contractual relief related to delivery delays and supplier assertions.

During 2009, we concluded that the first three flight-test 787 aircraft could not be sold as previously anticipated due to the inordinate amount of rework and unique and extensive modifications made to those aircraft. As a result, costs associated with these airplanes were included in research and development expense. We believe that the other three 787 flight test aircraft are commercially saleable and we continue to include costs related to those airplanes in program inventory at September 30, 2011. If we determine that one or more of the other aircraft cannot be sold, we may incur additional charges.

This quarter we established an initial accounting quantity of 1,100 units, representing approximately 10 years of production at planned production rates. The cumulative impacts of production challenges, change incorporation, schedule delays and customer and supplier impacts have created significant pressure on program profitability and therefore we have recorded a low margin on our initial delivery. Future production challenges, including not meeting one or more planned production rate increases going forward, or introducing the 787-9 derivative as scheduled, could result in additional customer claims and/or supplier assertions as well as result in further pressures on program profitability and/or a reach-forward loss. We continue to implement mitigation plans and cost-reduction efforts to improve program profitability and address program risks.

Additional Considerations

The 787 and 747-8 programs highlight the risks inherent in new airplane programs and new derivative airplanes. Development continues on the 787-9. In the third quarter of 2011 we launched a variant of

Table of Contents

the 737 that will feature new more fuel efficient engines – the 737 MAX. Costs related to development of new programs and derivative airplanes are expensed as incurred. Costs to produce new aircraft are included in inventory and accounted for using program accounting. Airplane programs have risk for reach-forward losses if our estimated production costs exceed our estimated program revenues for the accounting quantity. Generally commercial airplanes are sold on a firm fixed-price basis with an indexed price escalation clause and are often sold several years before scheduled delivery. Each customer purchase agreement contains an escalation clause to account for the effects of economic fluctuations over the period of time from airplane sale to airplane delivery. A price escalation formula based on pre-defined factors is used to determine the final price of the airplane at the time of customer delivery. While firm fixed-price contracts allow us to benefit from cost savings, they also expose us to the risk of cost overruns. Many new airplanes and derivatives have highly complex designs, utilize exotic materials and require extensive coordination and integration with supplier partners. As technical or quality issues arise, such as issues experienced on the 787 and 747-8 programs, we may experience schedule delays and higher costs to complete new programs and derivative aircraft. Additionally, price escalation factors may also impact margins by reducing the estimated price of airplanes delivered in the future. There are other factors that could also result in lower margins or a material charge if a program has or is determined to have reach-forward losses. These include: changes to the program accounting quantity, customer and model mix, production costs and rates, capital expenditures and other costs associated with increasing or adding new production capacity, learning curve, anticipated cost reductions, flight test and certification schedules, costs, schedule and demand for derivative airplanes and status of customer claims, supplier assertions and other contractual negotiations. While we believe the cost and revenue estimates incorporated in the financial statements are appropriate, the technical complexity of these programs creates financial risk as additional completion costs may become necessary or scheduled delivery dates could be extended, which could trigger termination provisions, order cancellations or other financially significant exposure.

Boeing Defense, Space & Security**Operating Results**

	September 30 Nine months ended September 30		September 30 Three months ended September 30	
(Dollars in millions)	2011	2010	2011	2010
Revenues	\$ 23,505	\$ 23,778	\$ 8,200	\$ 8,182
Earnings from operations	\$ 2,293	\$ 2,059	\$ 824	\$ 684
Operating margins	9.8%	8.7%	10.0%	8.4%

	September 30 2011	December 31 2010
(Dollars in millions)		
Contractual backlog	\$ 46,570	\$ 48,364
Unobligated backlog	12,536	16,822

Revenues

BDS revenues for the nine and three months ended September 30, 2011 decreased by \$273 million and increased by \$18 million or 1% and materially unchanged compared with the same periods in 2010. In both periods revenues were lower in the N&SS and GS&S segments and higher in the BMA segment.

Earnings From Operations

BDS operating earnings for the nine and three months ended September 30, 2011 increased by \$234 million and \$140 million compared with the same periods in 2010. The increase for the nine months

Table of Contents

was primarily due to higher earnings in the BMA and N&SS segments. The increase for the three months was due to higher earnings in all three BDS segments.

Backlog

BDS total backlog decreased 9% in 2011, from \$65,186 million at December 31, 2010 to \$59,106 million at September 30, 2011, due to current year deliveries, sales on multi-year contracts awarded in prior years and partial terminations for convenience by the U.S. Army of the BCTM program, partially offset by new orders.

For further details on the changes between periods, refer to the discussions of the individual segments below.

Additional Considerations

Our business includes a variety of development programs which have complex design and technical challenges. Many of these programs have cost-type contracting arrangements. In these cases the associated financial risks are primarily in lower profit rates or program cancellation if milestones and technical progress are not accomplished. Examples of these programs include Family of Beyond Line-of-Sight Terminals, BCTM, Ground-based Midcourse Defense (GMD), P-8A Poseidon and Proprietary programs.

Some of our development programs are contracted on a fixed-price basis. Many of these programs have highly complex designs. As technical or quality issues arise, we may experience schedule delays and cost impacts, which could increase our estimated cost to perform the work or reduce our estimated price, either of which could result in a material charge. These programs are ongoing, and while we believe the cost and fee estimates incorporated in the financial statements are appropriate, the technical complexity of these programs creates financial risk as additional completion costs may become necessary or scheduled delivery dates could be extended, which could trigger termination provisions, the loss of satellite in-orbit incentive payments, or other financially significant exposure. These programs have risk for reach-forward losses if our estimated costs exceed our estimated contract revenues. Examples of our fixed-price development programs include Airborne Early Warning and Control (AEW&C), P-8I, KC-46A Tanker, KC-767 International Tanker and commercial and military satellites.

Boeing Military Aircraft**Operating Results**

	September 30 Nine months ended September 30		September 30 Three months ended September 30	
(Dollars in millions)	2011	2010	2011	2010
Revenues	\$ 10,998	\$ 10,611	\$ 3,964	\$ 3,790
Earnings from operations	\$ 1,152	\$ 935	\$ 397	\$ 312
Operating margins	10.5%	8.8%	10.0%	8.2%

	September 30 2011	December 31 2010
(Dollars in millions)		
Contractual backlog	\$ 24,191	\$ 25,094
Unobligated backlog	8,432	8,297

Revenues

BMA revenues for the nine and three months ended September 30, 2011 increased by \$387 million and \$174 million, increases of 4% and 5% compared with the same periods in 2010. The increases

Table of Contents

were primarily due to higher AEW&C and C-17 revenues partially offset by lower revenues on the F-22, F/A-18 and Apache programs. AEW&C revenues increased in 2011 primarily due to delivery of the first Peace Eye aircraft, while the C-17 increase reflects a change in delivery mix and lower 2010 C-17 deliveries due to a second quarter 2010 labor strike.

Deliveries of units for new-build production aircraft, excluding remanufactures and modifications, were as follows:

	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
F/A-18 Models	38	39	13	15
F-15E Eagle	11	10	3	3
C-17 Globemaster	11	10	4	4
AH-64 Apache		11		2
CH-47 Chinook	22	13	6	5
AEW&C	2	3	2	
KC-767 International Tanker	1			
Total new-build production aircraft	85	86	28	29

Earnings From Operations

BMA operating earnings for the nine and three months ended September 30, 2011 increased by \$217 million and \$85 million, increases of 23% and 27% compared with the same periods in 2010. The increase for the nine month period was partially due to higher C-17 revenues and lower research and development costs, partially offset by lower earnings on the F-22 and Apache programs. The increase for the three month period was primarily due to improved earnings on the C-17 program and earnings on the Peace Eye delivery, partially offset by lower earnings on F/A-18, F-22 and Apache programs. Operating earnings for the nine and three month periods in 2010 were negatively impacted by charges recorded on the KC-767 International Tanker program, while operating earnings in 2010 and 2011 were reduced by charges recorded on the AEW&C program.

Backlog

BMA total backlog was \$32,623 million at September 30, 2011 a decrease of 2% from December 31, 2010 primarily due to current year deliveries and sales on multi-year contracts awarded in prior years partially offset by BMA's share of the USAF contract awards for the KC-46A Tanker and P-8A.

Additional Considerations

AEW&C The AEW&C development program, also known as Wedgetail in Australia, Peace Eagle in Turkey and Peace Eye in the Republic of Korea, consists of 737-700 aircraft outfitted with a variety of command and control and advanced radar systems, some of which have never been installed on an airplane before. A total of five Wedgetail aircraft have been delivered to Australia with initial customer acceptance. Four were delivered in 2010 and one in September 2011. The final Wedgetail aircraft is scheduled for delivery with initial customer acceptance in the first quarter of 2012. Final customer acceptance for all six Wedgetail aircraft is also scheduled to be completed during the first quarter of 2012. In January 2011, the Peace Eagle program began the formal test phase. The first Peace Eye aircraft was delivered to the Republic of Korea in September 2011. These are advanced and complex fixed-price development programs involving technical challenges at the individual subsystem level and in the overall integration of these subsystems into a reliable and effective operational capability. We believe that the cost and revenue estimates incorporated in the financial statements are appropriate;

Table of Contents

however, the technical complexity of the programs creates financial risk as additional completion costs may be necessary or scheduled delivery dates could be delayed, either of which could result in lower margins or additional material charges.

KC-767 International Tanker We delivered the first of four aircraft to the Italian Air Force in December 2010 and the second in March 2011. We believe the revenue and cost estimates incorporated in the financial statements are appropriate; however, the technical complexity of the program creates financial risk as additional completion and development costs may be necessary or remaining scheduled delivery dates could be delayed, either of which could result in additional material changes.

C-17 and F-15 See the discussion of the C-17 and F-15 programs in Note 8 to our Condensed Consolidated Financial Statements.

Network & Space Systems**Operating Results**

	September 30 Nine months ended September 30		September 30 Three months ended September 30	
(Dollars in millions)	2011	2010	2011	2010
Revenues	\$ 6,706	\$ 7,021	\$ 2,276	\$ 2,344
Earnings from operations	\$ 520	\$ 493	\$ 179	\$ 152
Operating margins	7.8%	7.0%	7.9%	6.5%

	September 30 2011	December 31 2010
(Dollars in millions)		
Contractual backlog	\$ 9,451	\$ 9,586
Unobligated backlog	3,892	8,435

Revenues

N&SS revenues for the nine and three months ended September 30, 2011 decreased by \$315 million and \$68 million, decreases of 4% and 3% compared with the same periods in 2010. The decrease for the nine months was primarily due to lower BCTM, SBInet and GMD revenues, partially offset by higher sales of Delta inventory to United Launch Alliance (ULA), revenues of Argon ST, Inc. acquired in August 2010 and higher satellite revenues. The decrease for the three months was primarily due to lower BCTM, SBInet and GMD revenues, partially offset by higher sales of Delta inventory to ULA and higher satellite revenues.

Earnings From Operations

N&SS operating earnings for the nine and three months ended September 30, 2011 each increased by \$27 million, increases of 5% and 18% compared with the same periods in 2010. The increase for the nine months was due to higher earnings from our investment in ULA and a gain from a property sale partially offset by lower earnings on the BCTM and GMD programs. The increase for the three months was primarily due to higher earnings on several satellite programs, partially offset by lower earnings on the BCTM and GMD programs and lower income from our investments in joint ventures.

Backlog

N&SS total backlog was \$13,343 million at September 30, 2011, a decrease of 26% from December 31, 2010 primarily due to partial terminations for convenience by the U.S. Army of the BCTM program and revenues recognized on multi-year contracts awarded in prior years.

Sea Launch See the discussion of the Sea Launch receivables in Note 7 to our Condensed Consolidated Financial Statements.

Satellites See the discussions of Boeing Satellite Systems International, Inc. in Note 15 to our Condensed Consolidated Financial Statements.

Global Services & Support**Operating Results**

<i>(Dollars in millions)</i>	September 30 Nine months ended September 30		September 30 Three months ended September 30	
	2011	2010	2011	2010
	\$	\$	\$	\$
Revenues	5,801	6,146	1,960	2,048
Earnings from operations	621	631	248	220
Operating margins	10.7%	10.3%	12.7%	10.7%

<i>(Dollars in millions)</i>	September 30 2011	December 31 2010
Contractual backlog	\$ 12,928	\$ 13,684
Unobligated backlog	212	90

Revenues

GS&S revenues for the nine and three months ended September 30, 2011 decreased by \$345 million and \$88 million compared with the same periods in 2010. The 6% decrease for the nine months was primarily due to the conclusion of our KC-10 support program in 2010 and lower 2011 deliveries and volume in several Training Systems & Services (TS&S) and Integrated Logistics (IL) programs. The 4% decrease for the three months was primarily due to lower 2011 deliveries and volume in several TS&S and IL programs. These decreases were partially offset by higher international revenues.

Earnings From Operations

GS&S operating earnings for the nine and three months ended September 30, 2011 decreased by \$10 million and increased by \$28 million compared with the same periods in 2010. The decrease for the nine months was primarily due to lower revenues. The increase for the three months was primarily due to unfavorable performance adjustments on several IL programs in 2010.

Backlog

GS&S total backlog was \$13,140 million at September 30, 2011, a decrease of 5% from December 31, 2010, primarily due to revenues recognized on multi-year contracts awarded in prior years on several IL programs, partially offset by a TS&S contract award on the P-8A program.

Table of Contents**Boeing Capital Corporation**

<i>(Dollars in millions)</i>	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
Revenues	\$ 416	\$ 494	\$ 126	\$ 170
Earnings from operations	\$ 133	\$ 146	\$ 19	\$ 45
Operating margins	32%	30%	15%	26%

Revenues

Boeing Capital Corporation (BCC) segment revenues consist principally of lease income from equipment under operating lease and interest from financing receivables and notes. BCC's revenues for the nine and three months ended September 30, 2011 decreased \$78 million and \$44 million compared with the same periods in 2010 primarily due to lower interest income on notes receivable resulting from a lower weighted average notes receivable balance and lower operating lease income from a smaller portfolio of equipment under operating leases as a result of return of aircraft and lower lease rates on re-leased aircraft.

Earnings From Operations

BCC's operating earnings are presented net of interest expense, provision for losses, asset impairment expense, depreciation on leased equipment and other operating expenses. Operating earnings for the nine and three months ended September 30, 2011 decreased by \$13 million and \$26 million compared with the same periods in 2010 primarily due to lower revenues and higher asset impairment expense partially offset by lower interest expense, lower depreciation expense and a reduction in the allowance for losses.

Financial Position

The following table presents selected financial data for BCC:

<i>(Dollars in millions)</i>	September 30 2011	December 31 2010
BCC customer financing and investment portfolio	\$ 4,342	\$ 4,694
Valuation allowance as a % of total receivables	2.4%	3.8%
Debt	\$ 3,407	\$ 3,446
Debt-to-equity ratio	6.2-to-1	5.0-to-1

BCC's customer financing and investment portfolio at September 30, 2011 decreased from December 31, 2010 due to normal portfolio run-off and asset sales, partially offset by the origination of notes receivable. At September 30, 2011 and December 31, 2010, BCC had \$541 million and \$583 million of assets that were held for sale or re-lease, of which \$485 million and \$28 million had either executed term sheets with deposits or firm contracts to be sold or placed on lease. Additionally, aircraft subject to leases with a carrying value of approximately \$105 million are scheduled to be returned off lease in the next 12 months. These aircraft are being remarketed or we are seeking to have the leases extended.

BCC enters into certain transactions with the Other segment in the form of intercompany guarantees and other subsidies that mitigate the effects of certain credit quality or asset impairment issues on the BCC segment.

Table of Contents**Restructurings and Restructuring Requests**

From time to time, certain customers have requested a restructuring of their transactions with BCC. As of September 30, 2011, BCC has not reached agreement on any restructuring requests that would have a material effect on our earnings, cash flows and/or financial position.

On May 2, 2011, Southwest Airlines Co. (Southwest) completed its acquisition of AirTran Holdings, Inc. AirTran Holdings' successor entity (AirTran) and its subsidiaries represent approximately 27% of our gross customer financing portfolio carrying value, consisting principally of 717 aircraft. AirTran is the largest customer in terms of BCC's segment revenue and customer financing portfolio carrying value. We continue to evaluate the impact of the AirTran/Southwest merger, and Southwest's continuing efforts to integrate the two operations, on our business. At September 30, 2011 we assigned an upgraded internal credit rating category of BB to our receivables with AirTran.

Other Segment

<i>(Dollars in millions)</i>	Nine months ended September 30		Three months ended September 30	
	2011	2010	2011	2010
Revenues	\$ 107	\$ 107	\$ 33	\$ 27
Earnings/(loss) from operations	11	(254)	92	(132)

Other segment earnings for the nine and three months ended September 30, 2011 increased by \$265 million and \$224 million compared with the same periods in 2010, primarily due to a reduction in the allowance for losses on receivables.

Liquidity and Capital Resources**Cash Flow Summary**

<i>(Dollars in millions)</i>	Nine months ended September 30	
	2011	2010
Net earnings	\$ 2,625	\$ 2,143
Non-cash items	1,510	1,688
Changes in working capital	(3,043)	(1,995)
Net cash provided by operating activities	1,092	1,836
Net cash provided/(used) by investing activities	856	(6,480)
Net cash used by financing activities	(1,354)	(1,645)
Effect of exchange rate changes on cash and cash equivalents	1	(62)
Net increase/(decrease) in cash and cash equivalents	595	(6,351)
Cash and cash equivalents at beginning of year	5,359	9,215
Cash and cash equivalents at end of period	\$ 5,954	\$ 2,864

Operating Activities Net cash provided by operating activities of \$1,092 million during the nine months ended September 30, 2011 decreased by \$744 million compared with the same period in 2010 primarily due to continued growth in inventory as we prepare for deliveries and production ramp-up of the 787 and 747-8 airplanes partially offset by increases in advances and accounts payable.

Investing Activities Cash provided by investing activities of \$856 million during the nine months ended September 30, 2011 increased by \$7,336 million compared with the same period in 2010,

Table of Contents

largely due to changes in investments which primarily consist of time deposits. Net proceeds from investments were \$1,917 million in 2011 compared with net contributions to investments of \$5,088 million in 2010. Capital spending in 2011 is higher than 2010 due to the construction of a 787 final assembly line in North Charleston, South Carolina, investment to support commercial airplane production rate increases and ongoing capital improvements.

Financing Activities Cash used by financing activities totaled \$1,354 million during the nine months ended September 30, 2011 compared with \$1,645 million used during the nine months ended September 30, 2010.

During the three months ended September 30, 2011, proceeds from BCC borrowings amounted to \$745 million and during the nine months ended September 30, 2011, we repaid \$895 million of debt, including scheduled repayments of \$794 million of debt held at BCC. The recorded balance of debt as of September 30, 2011 was \$12,380 million, of which \$1,603 million was classified as short-term. This includes \$3,407 million of debt recorded at BCC, of which \$834 million was classified as short-term.

During the nine months ended September 30, 2011, we did not repurchase any shares through our open market share repurchase program and had 304,304 shares transferred to us from employees for tax withholding.

Capital Resources We have substantial borrowing capacity. Any future borrowings may affect our credit ratings and are subject to various debt covenants as described below. We and BCC have commercial paper programs that continue to serve as significant potential sources of short-term liquidity. As of September 30, 2011, neither we nor BCC had any commercial paper borrowings outstanding. Currently, we have \$4,376 million (\$1,500 million exclusively available for BCC) of unused borrowing on revolving credit line agreements. We anticipate that these credit lines will primarily serve as backup liquidity to support possible commercial paper borrowings.

Financing commitments totaled \$15,624 million and \$9,865 million as of September 30, 2011 and December 31, 2010. We anticipate that we will not be required to fund a significant portion of our financing commitments as we continue to work with third party financiers to provide alternative financing to customers. Historically, we have not been required to fund significant amounts of outstanding commitments. However, there can be no assurances that we will not be required to fund greater amounts than historically required.

In the event we require additional funding to support strategic business opportunities, our commercial aircraft financing commitments, unfavorable resolution of litigation or other loss contingencies, or other business requirements, we expect to meet increased funding requirements by issuing commercial paper or term debt. We believe our ability to access external capital resources should be sufficient to satisfy existing short-term and long-term commitments and plans, and also to provide adequate financial flexibility to take advantage of potential strategic business opportunities should they arise within the next year. However, there can be no assurance of the cost or availability of future borrowings, if any, under our commercial paper program, in the debt markets or our credit facilities.

As of September 30, 2011, we were in compliance with the covenants for our debt and credit facilities. The most restrictive covenants include a limitation on mortgage debt and sale and leaseback transactions as a percentage of consolidated net tangible assets (as defined in the credit agreements), and a limitation on consolidated debt as a percentage of total capital (as defined). When considering debt covenants, we continue to have substantial borrowing capacity.

Off-Balance Sheet Arrangements

We are a party to certain off-balance sheet arrangements including certain guarantees. For discussion of these arrangements, see Note 9 to our Condensed Consolidated Financial Statements.

Table of Contents

Contingent Obligations

We have significant contingent obligations that arise in the ordinary course of business, which include the following:

Legal Various legal proceedings, claims and investigations are pending against us. Legal contingencies are discussed in Note 15 to our Condensed Consolidated Financial Statements, including our contesting the default termination of the A-12 aircraft, certain employment, labor and benefits litigation, litigation/arbitration involving BSSI programs and civil securities litigation relating to disclosures concerning the 787 program.

Environmental Remediation We are involved with various environmental remediation activities and have recorded a liability of \$787 million at September 30, 2011. For additional information, see Note 8 to our Condensed Consolidated Financial Statements.

Income Taxes We have recorded a net liability of \$1,273 million at September 30, 2011 for uncertain tax positions. For further discussion of income taxes, see Note 3 to our Condensed Consolidated Financial Statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no significant changes to our market risk since December 31, 2010.

Item 4. Controls and Procedures

(a) Disclosure Controls and Procedures.

Our Chief Executive Officer and Chief Financial Officer have evaluated our disclosure controls and procedures as of September 30, 2011 and have concluded that these disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms and is accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes in Internal Control Over Financial Reporting.

There were no changes in our internal control over financial reporting that occurred during the third quarter of 2011 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Table of Contents**Part II. Other Information****Item 1. Legal Proceedings**

Currently, we are involved in a number of legal proceedings. For a discussion of contingencies related to legal proceedings, see Note 15 to our Condensed Consolidated Financial Statements, which is hereby incorporated by reference.

On June 29, 2011, the Washington State Department of Ecology imposed a fine of \$102,000 for failing to follow proper reporting procedures after discovering a jet fuel spill in May 2010. We paid the fine during the third quarter.

Item 1A. Risk Factors

There have been no material changes in our risk factors from those disclosed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2010.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**Issuer Purchases of Equity Securities**

The following table provides information about purchases we made during the quarter ended September 30, 2011 of equity securities that are registered by us pursuant to Section 12 of the Exchange Act:

(Dollars in millions, except per share data)

	(a)	(b)	(c)	(d)
	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May Yet be Purchased Under the Plans or Programs (2)
7/1/2011 thru 7/31/2011	36,263	\$ 73.99		\$ 3,610
8/1/2011 thru 8/31/2011	1,785	68.97		3,610
9/1/2011 thru 9/30/2011	5,237	63.01		3,610
Total	43,285	\$ 72.46		

(1) We purchased an aggregate of 43,088 shares transferred to us from employees in satisfaction of minimum tax withholding obligations associated with the vesting of restricted stock during the period. In addition, we purchased an aggregate of 197 shares in swap transactions.

(2) On October 29, 2007, the Board approved the repurchase of up to \$7 billion of common stock (the Program). Unless terminated earlier by a Board resolution, the Program will expire when we have used all authorized funds for repurchase.
