WisdomTree Total Dividend Fund (DTD)

Sector Breakdown as of 9/30/11

The Fund s sector breakdown is expressed as a percentage of total investments and may change over time.

A sector may be comprised of several industries.

Top Ten Holdings* as of 9/30/11

Description	% of Net Assets
AT&T, Inc.	4.2%

^{*}The ten largest holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular company.

The WisdomTree Total Dividend Fund (the Fund) seeks investment results that closely correspond to the price and yield performance, before fees and expenses, of the WisdomTree Dividend Index.

The Fund returned -8.86% at net asset value (NAV) for the six month period ended September 30, 2011. The Fund s performance benefited most from its investments in the Utilities sector. Investments in the Financials sector created the greatest drag on Fund performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of a Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. **The annual expense ratio of the Fund is 0.28%.**

WisdomTree Domestic Dividend Funds

Shareholder Expense Examples (unaudited)

As a shareholder of a WisdomTree Fund, you incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of your Fund shares and (2) ongoing costs, including management fees and other Fund expenses. The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in a Fund and to compare these costs with the ongoing costs of investing in other funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from April 1, 2011 to September 30, 2011.

Actual expenses

The first line under each Fund in the table on the next page provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for your Fund under the heading entitled Expenses Paid During the Period 4/01/11 to 9/30/11 to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes

The second line under each Fund in the table on the next page provides information about hypothetical account values and hypothetical expenses based on each Fund s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Fund shares. Therefore, the second line under each Fund in the table is useful in comparing ongoing Fund costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

- Based on average shares outstanding.
- ² Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. Total return calculated for a period of less than one year is not annualized. The total return would have been lower if certain expenses had not been reimbursed/waived by the investment adviser (Note 2).
- ³ Annualized.
- ⁴ The ratios to average net assets do not include net investment income (loss) or expenses of affiliated funds in which the Fund invests.
- ⁵ Portfolio turnover rate is not annualized and excludes the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund s capital shares.

50 WisdomTree Domestic Dividend Funds

Notes to Financial Statements (unaudited)

September 30, 2011

1. ORGANIZATION

WisdomTree Trust (the Trust) is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as an open-end management investment company. The Trust was established as a Delaware statutory trust pursuant to a Trust Instrument dated December 15, 2005. As of September 30, 2011, the Trust offered 47 investment funds (each, a Fund , and collectively, the Funds). These notes relate only to funds listed in the table below:

	Commencement
Fund Name	of Operations
WisdomTree Total Dividend Fund (Total Dividend Fund)	June 16, 2006
WisdomTree Equity Income Fund (Equity Income Fund)	June 16, 2006
WisdomTree LargeCap Dividend Fund (LargeCap Dividend Fund)	June 16, 2006
WisdomTree Dividend ex-Financials Fund (Dividend ex-Financials Fund)	June 16, 2006
WisdomTree MidCap Dividend Fund (MidCap Dividend Fund)	June 16, 2006
WisdomTree SmallCap Dividend Fund (SmallCap Dividend Fund)	June 16, 2006

Each Fund seeks investment returns that closely correspond to the price and yield performance, before fees and expenses, of a particular index (Index) developed by WisdomTree Investments, Inc. (Wisdom Tree Investments). WisdomTree Investments is the parent company of WisdomTree Asset Management, Inc. (WTAM), the investment adviser to each Fund and the Trust. WisdomTree is a registered mark of WisdomTree Investments and has been licensed for use by the Trust. Each Fund described herein is considered to be non-diversified.

2. SIGNIFICANT ACCOUNTING POLICIES

The Financial Accounting Standards Board (FASB) Accounting Standards Codification (Codification) has become the exclusive reference of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal laws are also sources of authoritative GAAP for SEC registrants.

The following is a summary of significant accounting policies followed by the Funds:

Guarantees In the normal course of business, the Funds may enter into contracts that contain a variety of representations or that provide indemnification for certain liabilities. The Funds maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote. Therefore no liabilities have been recorded in connection with these indemnifications.

Use of Estimates The preparation of financial statements in conformity with GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in the net assets from operations during the reporting period. Actual results could differ from those estimates.

Investment Valuation The net asset value (NAV) of each Funds shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange, generally 4:00 p.m. Eastern time. NAV per share is calculated by dividing a Funds net assets by the number of Fund shares outstanding. Transactions in Fundshares will be priced at NAV only if you purchase or redeem shares directly from a Fund in creation units, which are typically in blocks of 50,000 shares or more. Fundshares are purchased or sold on a national securities exchange at market prices, which may be higher or lower than NAV. Each Fund may invest in money market funds or affiliated funds, which are valued at NAV.

Securities traded on any recognized U.S. or non-U.S. exchange are valued at the last sale price or official closing price on the exchange or system on which they are principally traded. As indicated, unlisted equity securities are valued at the last quoted sale price or, if no sale price is

available, at the mean between the highest bid and lowest ask prices. Securities for which market quotations are not readily available are valued at fair value as determined by management and in accordance with procedures approved by the Trust s Board of Trustees. Short-term securities with 60 days or less remaining to maturity are valued using the amortized cost method, which approximates fair value.

Notes to Financial Statements (unaudited) (continued)

In certain instances, such as when reliable market valuations are not readily available or are not deemed to reflect current market values, a Fund s investments will be valued in accordance with the Fund s pricing policy and procedures approved by the Trust s Board of Trustees. For these purposes, a price based on amortized cost is considered a market valuation. Securities that may be valued using fair value pricing may include, but are not limited to, securities for which there are no current market quotations or whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by significant events. An example of a significant event is an event occurring after the close of the market in which a security trades but before a Fund s next NAV calculation time that may materially affect the value of a Fund s investment (e.g., government action, natural disaster, or significant market fluctuation). Price movements in U.S. market that are deemed to affect the value of the foreign securities, or reflect changes to the value of such securities, also may cause securities to be fair valued. When fair value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ form quoted or published prices for the same securities.

Fair Value Measurement In accordance with Codification Topic 820 (ASC 820), Fair Value Measurements and Disclosures, fair value is defined as the price that each Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 established a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity s own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

- Level 1 quoted prices in active markets for identical securities
- Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including each Fund s assumptions in determining the fair value of investments)

Investments that use Level 2 or Level 3 inputs may include, but are not limited to: (i) an unlisted security related to corporate actions; (ii) a restricted security (e.g., one that may not be publicly sold without registration under the Securities Act of 1933, as amended); (iii) a security whose trading has been suspended or which has been de-listed from its primary trading exchange; (iv) a security that is thinly traded; (v) a security in default or bankruptcy proceedings for which there is no current market quotation; (vi) a security affected by currency controls or restrictions; and (vii) a security affected by a significant event (e.g., an event that occurs after the close of the markets on which the security is traded but before the time as of which a Fund s NAV is computed and that may materially affect the value of the Fund s investments).

The inputs or methodology used for valuation are not necessarily an indication of the risk associated with investing in those investments.

The following is a summary of the inputs used as of September 30, 2011 in valuing the Fund s assets carried at fair value:

^{*} Please refer to Schedule of Investments for a breakdown of the valuation by industry.

In January 2010, FASB issued Accounting Standards Update No. 2010-06 Improving Disclosures about Fair Value Measurements (ASU 2010-06). ASU 2010-06 requires reporting entities to make new disclosures about amounts and reasons for significant transfers in and out of Level 1 and Level 2 fair value measurements, as well as inputs and valuation techniques used to measure fair value for both recurring and nonrecurring fair value measurements that fall in either Level 2 or Level 3. There were no Level 3 securities during or for the period ended September 30, 2011. ASU 2010-06 will also require information on purchases and sales, issuances and settlements on a gross basis in the reconciliation of activity in Level 3 fair value measurements. The new and revised disclosures are required to be implemented for fiscal years beginning after December 15, 2009, except for the disclosures surrounding purchases, sales, issuances and settlements on a gross basis in the reconciliation of Level 3 fair value measurements, which are effective for fiscal years beginning after December 15, 2010. Management has implemented the applicable portion of ASU 2010-06 for the fiscal year ended March 31, 2011 and the impact of such adoption is limited to additional disclosure in the financial statements. No transfers between Level 1 or Level 2 fair value measurements occurred during the period ended September 30, 2011.

Derivative and Hedging Disclosure Codification Topic 815 (ASC 815), Derivatives and Hedging, requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The Funds did not invest in derivative instruments during the six months ended September 30, 2011.

Investment Transactions and Investment Income Investment transactions are recorded as of the date that the securities are purchased or sold (trade date). Realized gains and losses on sales of portfolio securities are calculated using the identified-cost method. Dividend income is recognized on the ex-dividend date. Interest income is accrued daily. The value of additional securities received as dividend payments is recorded as income and as an increase to the cost basis of such securities.

Expenses/Reimbursements WTAM has agreed to pay all expenses of the Funds, except for: (i) brokerage expenses and other expenses (such as stamp taxes) connected with the execution of portfolio transactions or in connection with creation and redemption transactions; (ii) legal fees or expenses in connection with any arbitration, litigation or pending or threatened

arbitration or litigation, including any settlements in connection therewith; (iii) compensation and expenses of each Independent Trustee; (iv) compensation and expenses of counsel to the Independent Trustees; (v) compensation and expenses of the Trust s chief compliance officer; (vi) extraordinary expenses; (vii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; and (viii) the advisory fee payable to WTAM.

Pursuant to a separate contractual arrangement, WTAM has arranged for the provision of Chief Compliance Officer (CCO) services to the Funds and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees, in exchange for a service fee paid by each Fund of up to 0.0044% of each Fund s average daily net assets. Trustees fees, which are included in Service Fees on the Statements of Operations, of \$30,533 have been paid on behalf of the Funds of the Trust to the Independent Trustees for the six months ended September 30, 2011.

Securities Lending Each Fund may lend portfolio securities to certain creditworthy borrowers, including the Funds securities lending agent. It is the Fund s policy that, at origination, all loans are secured by collateral of at least 102% of the value of U.S. securities loaned and 105% of the value of foreign securities loaned. Collateral in the form of cash and/or high grade debt obligations, equivalent to at least 100% of the market value of securities, is maintained at all times. The collateral can be invested in certain money market mutual funds which also have exposure to the fluctuations of the market. Each Fund receives compensation for lending its securities from interest or dividends earned on the cash or U.S. government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income. The borrower pays to the Funds an amount equal to any dividends or interest received on loaned securities. The Funds retain all or a portion of the interest received on investment of cash collateral or receives a fee from the borrower. Lending portfolio securities could result in a loss or delay in recovering each Fund s securities if the borrower defaults.

The securities lending income earned by the Funds is disclosed on the Statements of Operations on page 45.

Short-Term Investments Each Fund may invest a portion of its assets in high-quality money market instruments on an ongoing basis to provide liquidity or for other reasons. The instruments in which a Fund may invest include short-term obligations issued by the U.S. Government, negotiable certificates of deposit (CDs), fixed time deposits and bankers acceptances of U.S. and foreign banks and similar institutions, commercial papers, repurchase agreements and money market funds. CDs are short-term negotiable obligations of commercial banks. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Banker s acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

Tax Information and Dividends and Distributions to Shareholders

It is each Fund is policy to comply with all requirements of the Internal Revenue Code of 1986, as amended (in the Code). Each Fund intends to qualify for and to elect treatment as a separate Regulated Investment Company (in RIC) under Subchapter M of the Code. It is the policy of each Fund to pay out dividends, if any, to investors at least annually. Taxable net realized gains from investment transactions, reduced by capital loss carryforwards, if any, are declared and distributed to shareholders at least annually. The capital loss carryforward amount, if any, is available to offset future net capital gains. The Funds may occasionally be required to make supplemental distributions at some other time during the year. The Trust reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of each Fund as a RIC or to avoid imposition of income or excise taxes on undistributed income. Dividends and distributions to shareholders are recorded on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with Federal income tax regulations which may differ from GAAP. These book/tax differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the components of net assets based on their Federal tax basis treatment; temporary differences do not require reclassification. Dividends and distributions, which exceed earnings and profit for tax purposes, are reported as a tax return of capital to the extent of a shareholder is tax basis and thereafter as a capital gain.

3. ADVISORY FEES AND TRANSACTIONS

WTAM has overall responsibility for the general management and administration of the Trust. WTAM provides an investment program for each Fund. WTAM also arranges for sub-advisory, transfer agency, custody, fund administration, and all other non-distribution related services necessary for the Funds to operate. Under the Investment Advisory Agreement for each Fund, also described in Note 2, WTAM agrees to pay all expenses of the Funds, except compensation and expenses of the Independent Trustees, counsel to the Independent Trustees and the Trust s CCO, interest expenses and taxes, brokerage expenses, and other expenses connected with the execution of portfolio transactions, any distribution fees

or expenses, legal fees or expenses and extraordinary expenses.

Notes to Financial Statements (unaudited) (continued)

Pursuant to a separate contractual arrangement, also described in Note 2, WTAM arranges for the provision of CCO services with respect to each Fund and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees in exchange for a fee of up to 0.0044%. WTAM expects to receive fees from each Fund, based on a percentage of the Fund s average daily net assets, as shown in the following table.

Advisory

Fund	Fee Rate
Total Dividend Fund	0.28%
Equity Income Fund	0.38%
LargeCap Dividend Fund	0.28%
Dividend ex-Financials Fund	0.38%
MidCap Dividend Fund	0.38%
SmallCap Dividend Fund	0.38%

Each Fund may purchase shares of an affiliated exchange traded fund(s) in secondary market transactions. For the six months ended September 30, 2011 WTAM waived a portion of its advisory fees based on each Fund s investments in affiliated Funds shown in the table below. Please see Note 7 on page 57, for additional information on Other Affiliated Parties and Transactions.

Fund	lvisory Waived
Total Dividend Fund	\$ 1,218
Equity Income Fund	2,467
LargeCap Dividend Fund	3,383
Dividend ex-Financials Fund	4,806
MidCap Dividend Fund	6,015
SmallCap Dividend Fund	5,166

4. CAPITAL SHARE TRANSACTIONS

As of September 30, 2011, there were an unlimited number of \$0.001 par value shares of beneficial interest authorized by the Trust. Shares are issued and redeemed by each Fund only in Creation Units or multiples thereof. Except when aggregated in Creation Units, shares of each Fund are not redeemable. Transactions in shares for each Fund are disclosed in detail in the Statements of Changes in Net Assets. The consideration for the purchase of Creation Units of a Fund generally consists of the in-kind contribution of a designated portfolio of equity securities constituting a portfolio sampling representation of the securities included in the relevant Fund sunderlying index and an amount of cash. Investors purchasing and redeeming Creation Units may be charged a purchase transaction fee and a redemption transaction fee to offset transfer and other transaction costs associated with the issuance and redemption of Creation Units.

5. INVESTMENT PORTFOLIO TRANSACTIONS

SmallCap Dividend Fund	280,786,767	11,950,318	(33,039,570)	(21,089,252)

GAAP provides guidance on tax provisions that prescribe a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. Foreign taxes are provided for based on each Fund s understanding of the tax rules and rates that exist in the foreign markets in which it invests. Taxes are accrued and applied to net investment income, net realized capital gains and net unrealized appreciation, as applicable, as the income is earned or capital gains are recorded. As of and during the six months ended September 30, 2011, the Funds did not have any liabilities for unrecognized tax benefits. If applicable, the Funds will recognize interest accrued related to unrecognized tax benefits in interest expense and penalties in Other expenses on the Statements of Operations. The Funds file tax returns with U.S. Internal Revenue Service, the state of New York, and various states. Generally, each of the tax years in the four-year period ended March 31, 2011 remains subject to examination by taxing authorities.

8. NEW ACCOUNTING PRONOUNCEMENTS

In April 2011, the FASB issued Accounting Standards Update (ASU) No. 2011-03 Reconsideration of Effective control for Repurchase Agreements. The objective of ASU 2011-03 is to improve the accounting for repurchase agreements and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. Under previous guidance, whether or not to account for a transaction as a sale was based on, in part, if the entity maintained effective control over the transferred financial assets. ASU 2011-03 removes the transferor s ability criterion from the effective control assessment. This guidance is effective prospectively for interim and annual reporting periods beginning on or after December 15, 2011. At this time, management is evaluating the implications of ASU No. 2011-03 and its impact on the financial statements has not been determined.

In May 2011, the FASB issued ASU No. 2011-04 Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS. ASU 2011-04 includes common requirements for measurement of and disclosure about fair value between U.S. GAAP and IFRS. ASU 2011-04 will require reporting entities to disclose the following information for the fair value measurements categorized within Level 3 of the fair value hierarchy: quantitative information about the unobservable inputs used in the fair value measurement, the valuation processes used by the reporting entity and a narrative description of the sensitivity of the fair value measurement to changes in observable inputs and the interrelationships between those unobservable inputs. In addition, ASU 2011-04 will require reporting entities to make disclosures about amounts and reasons for all transfers in and out of Level 1 and Level 2 fair value measurements. The new and revised disclosures are effective for interim and annual reporting periods beginning after December 15, 2011. At this time, management is evaluating the implications of ASU No. 2011-04 and its impact on the financial statements.

9. SUBSEQUENT EVENT

In accordance with GAAP provisions, management of the Funds has evaluated the possibilities of subsequent events existing in the Funds financial statements through the date the financial statements were issued. Management has determined that there are no material events that would require disclosure in the Funds financial statements.

WisdomTree Total Earnings Fund (EXT)

Sector Breakdown as of 9/30/11

The Fund s sector breakdown is expressed as a percentage of total investments and may change over time.

A sector may be comprised of several industries.

Top Ten Holdings* as of 9/30/11

Description	% of Net Assets
Exxon Mobil Corp.	3.9%
AT&T, Inc.	2.6%
Microsoft Corp.	2.5%
Chevron Corp.	2.4%
Apple, Inc.	2.3%
International Business Machines Corp.	2.0%
Wal-Mart Stores, Inc.	1.9%
Johnson & Johnson	1.7%
Intel Corp.	1.5%
JPMorgan Chase & Co.	1.4%

^{*} The ten largest holdings are subject to change, and there are no guarantees the Fund will remain invested in any particular company.

The WisdomTree Total Earnings Fund (the Fund) seeks investment results that correspond to the price and yield performance, before fees and expenses, of the WisdomTree Earnings Index.

The Fund returned -13.43% at net asset value (NAV) for the six month period ended September 30, 2011. The Fund benefited most from its investments in Utilities. Investments in the Financials sector created the greatest drag on Fund performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund sper share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of a Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. **The annual expense ratio of the Fund is 0.28%.**

Investments in the Industrials sector created the greatest drag on Fund performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of a Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Shareholder Expense Examples (unaudited)

As a shareholder of a WisdomTree Fund, you incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of your Fund shares and (2) ongoing costs, including management fees and other Fund expenses. The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in a Fund and to compare these costs with the ongoing costs of investing in other funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from April 1, 2011 to September 30, 2011.

Actual expenses

The first line under each Fund in the table on the next page provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for your Fund under the heading entitled Expenses Paid During the Period 4/01/11 to 9/30/11 to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes

The second line under each Fund in the table on the next page provides information about hypothetical account values and hypothetical expenses based on each Fund s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Fund shares. Therefore, the second line under each Fund in the table is useful in comparing ongoing Fund costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

1. ORGANIZATION

WisdomTree Trust (the Trust) is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as an open-end management investment company. The Trust was established as a Delaware statutory trust pursuant to a Trust Instrument dated December 15, 2005. As of September 30, 2011, the Trust offered 47 investment funds (each a Fund , collectively, the Funds). These notes relate only to the Funds listed in the table below:

	Commencement
	of
Fund Name	Operations
WisdomTree Total Earnings Fund (Total Earnings Fund)	February 23, 2007
WisdomTree Earnings 500 Fund (Earnings 500 Fund)	February 23, 2007
WisdomTree MidCap Earnings Fund (MidCap Earnings Fund)	February 23, 2007
WisdomTree SmallCap Earnings Fund (SmallCap Earnings Fund)	February 23, 2007
WisdomTree LargeCap Value Fund (LargeCap Value Fund)	February 23, 2007
WisdomTree LargeCap Growth Fund (LargeCap Growth Fund)	December 4, 2008
WisdomTree India Earnings Fund (India Earnings Fund) (consolidated)	February 22, 2008

The India Earnings Fund makes its investments through the WisdomTree India Investment Portfolio, Inc. (the Portfolio), a wholly owned subsidiary organized in the Republic of Mauritius. The Portfolio is advised by WisdomTree Asset Management, Inc. (WTAM) and is sub-advised by Mellon Capital Management Corporation, Inc. (MCM). For India Earnings Fund, the accompanying financial statements reflect the financial position of the Fund and the results of operations on a consolidated basis with the Portfolio. All inter-company accounts and transactions have been eliminated in consolidation. This structure should permit the India Earnings Fund to benefit from a tax treaty between India and Mauritius. The Supreme Court of India upheld the validity of this tax treaty in response to a lower court challenge contesting the treaty s applicability to entities such as India Earnings Fund. No assurance can be given that the terms of the treaty will not be subject to re-negotiation in the future or subject to a different interpretation. Any change in the provision of this treaty or in its applicability to India Earnings Fund could result in the imposition of withholding and other taxes on the India Earnings Fund by tax authorities in India. This would reduce the return to the India Earnings Fund on its investments and the return received by India Earnings Fund shareholders. References to investments by the India Earnings Fund herein should be understood to refer to investments by the Portfolio.

Each Fund seeks investment returns that closely correspond to the price and yield performance, before fees and expenses, of a particular index (Index) developed by WisdomTree Investments, Inc. (WisdomTree Investments). WisdomTree Investments is the parent company of WTAM, the investment adviser to each Fund and the Trust. WisdomTree is a registered mark of WisdomTree Investments and has been licensed for use by the Trust. Each Fund described herein is considered to be non-diversified. The securities in each Index are weighted based on earnings or earnings yield.

2. SIGNIFICANT ACCOUNTING POLICIES

The Financial Accounting Standards Board (FASB) Accounting Standards Codification (the Codification) has become the exclusive reference of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the U.S. Securities and Exchange Commission (SEC) under authority of federal laws are also sources of authoritative GAAP for SEC registrants.

The following is a summary of significant accounting policies followed by the Funds:

Guarantees In the normal course of business the Funds may enter into contracts that contain a variety of representations or that provide indemnification for certain liabilities. The Funds maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote. Therefore, no liabilities have been recorded in connection with these indemnifications.

Use of Estimates The preparation of financial statements in conformity with GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in the net assets from operations during the reporting period. Actual results could differ from those estimates.

Investment Valuation The net asset value (NAV) of each Funds shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange, generally 4:00 p.m. Eastern time. NAV per share is calculated by dividing a Funds net assets by the number of Fund shares outstanding. Transactions in Fund shares will be

72 WisdomTree Domestic and International Earnings Funds

Notes to Financial Statements (unaudited) (continued)

priced at NAV only if you purchase or redeem shares directly from a Fund in creation units, which are typically in blocks of 50,000 shares or more. Fund shares are purchased or sold on a national securities exchange at market prices, which may be higher or lower than NAV. Each Fund may invest in money market funds or affiliated funds which are valued at NAV.

Securities traded on any recognized U.S. or non-U.S. exchange are valued at the last sale price or official closing price on the exchange or system on which they are principally traded. Unlisted equity securities are valued at the last quoted sale price or, if no sale price is available, at the mean between the highest bid and lowest ask prices. Securities for which market quotations are not readily available are valued at fair value as determined by management and in accordance with procedures approved by the Trust s Board of Trustees. Short-term securities with 60 days or less remaining to maturity are valued using the amortized cost method, which approximates fair value.

In certain instances, such as when reliable market valuations are not readily available or are not deemed to reflect current market values, a Fund s investments will be valued in accordance with the Fund s pricing policy and procedures. Securities that may be valued using fair value pricing may include, but are not limited to, securities for which there are no current market quotations or whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by significant events. An example of a significant event is an event occurring after the close of the market in which a security trades but before a Fund s next NAV calculation time that may materially affect the value of a Fund s investment (e.g., government action, natural disaster, or significant market fluctuation). Price movements in U.S. markets that are deemed to affect the value of foreign securities, or reflect changes to the value of such securities, also may cause securities to be fair valued. When fair value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same securities.

Fair Value Measurement In accordance with Codification Topic 820 (ASC 820), Fair Value Measurements and Disclosures, fair value is defined as the price that each Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 established a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity s own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

- Level 1 quoted prices in active markets for identical securities
- Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including each Fund s assumption in determining the fair value of investments)

Investments that use Level 2 or Level 3 inputs may include, but are not limited to: (i) an unlisted security related to corporate actions; (ii) a restricted security (e.g., one that may not be publicly sold without registration under the Securities Act of 1933, as amended); (iii) a security whose trading has been suspended or which has been de-listed from its primary trading exchange; (iv) a security that is thinly traded; (v) a security in default or bankruptcy proceedings for which there is no current market quotation; (vi) a security affected by currency controls or restrictions; and (vii) a security affected by a significant event (e.g., an event that occurs after the close of the markets on which the security is traded but before the time as of which a Fund s NAV is computed and that may materially affect the value of the Fund s investments).

The inputs or methodology used for valuation are not necessarily an indication of the risk associated with investing in those investments.

The following is a summary of the inputs used as of September 30, 2011 in valuing each Fund s assets carried at fair value:

In January 2010, FASB issued Accounting Standards Update (ASU) No. 2010-06 Improving Disclosures about Fair Value Measurements (ASU 2010-06). ASU 2010-06 requires reporting entities to make new disclosures about amounts and reasons for significant transfers in and out of Level 1 and Level 2 fair value measurements, as well as inputs and valuation techniques used to measure fair value for both recurring and nonrecurring fair value measurements that fall in either Level 2 or Level 3. There were no Level 3 securities during the six months ended September 30, 2011. ASU 2010-06 also requires information on purchases and sales, issuances and settlements on a gross basis in the

reconciliation of activity in Level 3 fair value measurements. The new and revised disclosures are required to be implemented for fiscal years beginning after December 15, 2009, except for the disclosures

Notes to Financial Statements (unaudited) (continued)

surrounding purchases, sales, issuances and settlements on a gross basis in the reconciliation of Level 3 fair value measurements, which are effective for fiscal years beginning after December 15, 2010. Management has implemented the applicable portion of ASU 2010-06, for the six months ended September 30, 2011 and the impact of such adoption is limited to additional disclosures in the financial statements. No significant transfers between Level 1 or Level 2 fair value measurements occurred during the six months ended September 30, 2011.

Derivative and Hedging Disclosure Codification Topic 815 (ASC 815), Derivatives and Hedging , requires qualitative disclosure about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The India Earnings Fund has invested in derivatives, specifically forward foreign currency contracts, during the six months ended September 30, 2011, which are detailed in the table herein. The Fund s derivative agreements contain credit-risk-related contingent features which include, but are not limited to, a percentage decline in the Fund s NAV or net assets over a specified time period. If an event occurred that triggered a contingent feature, the counterparty to the agreement may require the Fund to post additional collateral or terminate the derivative positions and demand payment. Any collateral posted with respect to the derivative positions would be used to offset or reduce the payment. The maximum exposure to derivatives agreements with credit-risk-related contingent features would be the total of derivatives in net liability positions for the Fund. The volume of derivatives that is presented is consistent with the derivative activity during the six months ended September 30, 2011.

The effect of such derivative instruments on each Fund s financial position and financial performance as reflected in the Statement of Assets and Liabilities and Statements of Operations are presented in the summary below:

Investment Transactions and Investment Income Investment transactions are recorded as of the date that the securities are purchased or sold					

Investment Transactions and Investment Income Investment transactions are recorded as of the date that the securities are purchased or sold (trade date). Realized gains and losses on sales of portfolio securities are calculated using the identified-cost method. Dividend income is recognized on the ex-dividend date, net of any foreign taxes withheld. Interest income including amortization of premiums and discounts, is accrued daily. The value of additional securities received as dividend payments is recorded as income and as an increase to the cost basis of such securities.

Foreign Currency Translation The accounting records of the Funds are maintained in U.S. dollars. Foreign currencies, as well as investment securities and other assets and liabilities denominated in foreign currencies, are translated into U.S. dollars using exchange rates deemed appropriate by the investment adviser. Realized and unrealized foreign exchange gains or losses on investments are included as a component of net realized and unrealized gain or loss on foreign currency transactions in the Statements of Operations. Certain foreign exchange gains and losses included in realized and unrealized gains or losses are included in, or are a reduction of, ordinary income in accordance with U.S. Federal income tax regulations.

Expenses/Reimbursements WTAM has agreed to pay all expenses of the Funds (other than the India Earnings Fund), except for: (i) brokerage expenses and other expenses (such as stamp taxes) connected with the execution of portfolio transactions or in connection with creation and redemption transactions; (ii) legal fees or expenses in connection with any arbitration, litigation or pending or threatened arbitration or litigation, including any settlements in connection therewith; (iii) compensation and expenses of each Independent Trustee; (iv) compensation and

expenses of counsel to the Independent Trustees; (v) compensation and expenses of the Trust s chief compliance officer; (vi) extraordinary expenses; (vii) distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act; and (viii) the advisory fee payable to WTAM.

Pursuant to a separate contractual arrangement, WTAM has arranged for the provision of chief compliance officer (CCO) services to the Funds, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees, in exchange for a service fee paid by each Fund of up to 0.0044% of each Fund s average daily net assets. Trustees fees, which are included in Service Fees on the Statements of Operations, of \$35,622 have been paid on behalf of the Funds of the Trust to the Independent Trustees for the six months ended September 30, 2011. Expenses in excess of 0.0044% were paid by WTAM. WTAM has agreed to limit the total expenses of the India Earnings Fund to 0.88%.

Currency Transactions The India Earnings Fund may enter into foreign currency forward and foreign currency futures contracts to facilitate local securities settlements or to protect against currency exposure in connection with distributions to shareholders. India Earnings Fund does not expect to engage in currency transactions for the purpose of hedging against declines in the value of the Fund s assets that are denominated in one or more foreign currencies. India Earnings Fund may not enter into such contracts for speculative purposes.

Forward Foreign Currency Transactions A forward foreign currency contract (Forward Contract) involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are principally traded in the inter-bank market conducted directly between currency traders (usually large, commercial banks) and their customers. A Forward Contract generally has no margin deposit requirement, and no commissions are charged at any stage for trades.

Risks may arise upon entering into Forward Contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of foreign currencies relative to the U.S. dollar or each other.

Fluctuations in the value of open Forward Contracts are recorded for book purposes as unrealized gains or losses on Forward Contracts by the Funds. Realized gains and losses on Forward Contracts include net gains or losses recognized by the Funds on contracts which have matured.

The following forward foreign currency contracts were open at September 30, 2011:

Securities Lending Each Fund may lend portfolio securities to certain creditworthy borrowers, including the Funds securities lending agent. It is the Fund s policy that, at origination, all loans are secured by collateral of at least 102% of the value of U.S. securities loaned and 105% of the value of foreign securities loaned. Collateral in the form of cash and/or high grade debt obligations, equivalent to at least 100% of the market value of securities, is maintained at all times. The collateral can be invested in certain money market mutual funds which also have exposure to the fluctuations of the market. Each Fund receives compensation for lending its securities from interest or dividends earned on the cash or U.S. government securities held as collateral, net of fee rebates paid to the borrower plus reasonable administrative and custody fees. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income. The borrower pays to the Funds an amount equal to any dividends or interest received on loaned securities. The Funds retain all or a portion of the interest received on investment of cash collateral or receives a fee from the borrower. Lending portfolio securities could result in a loss or delay in recovering each Fund s securities if the borrower defaults.

The securities lending income earned by the Funds is disclosed on the Statements of Operations.

Short-Term Investments Each Fund may invest a portion of its assets in high-quality money market instruments on an ongoing basis to provide liquidity or for other reasons. The instruments in which a Fund may invest include short-term obligations issued by the U.S. Government, negotiable certificates of deposit (CDs), fixed time deposits and bankers acceptances of U.S. and foreign banks and similar

institutions, commercial papers, repurchase agreements and money market funds. CDs are short-term negotiable obligations of commercial banks. Time deposits are non-negotiable deposits maintained in banking institutions for specified periods of time at stated interest rates. Banker s acceptances are time drafts drawn on commercial banks by borrowers, usually in connection with international transactions.

Tax Information and Dividends and Distributions to Shareholders
It is each Fund s policy to comply with all requirements of the Internal Revenue Code of 1986, as amended (the Code). Each Fund intends to qualify for and to elect treatment as a separate Regulated Investment Company (RIC) under Subchapter M of the Code. It is the policy of each Fund to pay out dividends, if any, to investors at least annually. Taxable net realized gains from investment transactions, reduced by capital loss carryforwards, if any, are declared and distributed to shareholders at least annually. The capital loss carryforward amount, if any, is available to offset future net capital gains. The Funds may occasionally be required to make supplemental distributions at some other time during the year. The Trust

76 WisdomTree Domestic and International Earnings Funds

Notes to Financial Statements (unaudited) (continued)

reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of each Fund as a RIC or to avoid imposition of income or excise taxes on undistributed income. Dividends and distributions to shareholders are recorded on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with Federal income tax regulations which may differ from GAAP. These book/tax differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the components of net assets based on their Federal tax basis treatment; temporary differences do not require reclassification. Dividends and distributions which exceed earnings and profit for tax purposes are reported as a tax return of capital to the extent of a shareholder s tax basis and thereafter as a capital gain. The India Earnings Fund has filed an election to treat the Portfolio, as a pass-through entity for tax purposes.

3. ADVISORY FEES AND TRANSACTIONS

WTAM has overall responsibility for the general management and administration of the Trust. WTAM also provides an investment program for each Fund. WTAM also arranges for sub-advisory, transfer agency, custody, fund administration, and all other non-distribution related services necessary for the Funds to operate. Under the Investment Advisory Agreement for each Fund (other than the India Earnings Fund), as also described in Note 2, WTAM agrees to pay all expenses of the Funds, except compensation and expenses of the Independent Trustees, counsel to the Independent Trustees and the Trust s CCO, interest expenses and taxes, brokerage expenses, and other expenses connected with the execution of portfolio transactions, any distribution fees or expenses, legal fees or expenses and extraordinary expenses. The Investment Advisory Agreement for the India Earnings Fund does not require WTAM to pay any Fund expenses, except sub-advisory fees.

Pursuant to a separate contractual arrangement, as also described in Note 2, WTAM arranges for the provision of CCO services with respect to each Fund (other than the India Earnings Fund), and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees in exchange for a fee of up to 0.0044%. WTAM has agreed to limit net annual operating expenses for the India Earnings Fund to 0.88%. WTAM expects to receive fees from each Fund, based on a percentage of the Fund s average daily net assets, as shown in the following table:

Advisory

Fund	Fee Rate
Total Earnings Fund	0.28%
Earnings 500 Fund	0.28%
MidCap Earnings Fund	0.38%
SmallCap Earnings Fund	0.38%
LargeCap Value Fund	0.38%
LargeCap Growth Fund	0.38%
India Earnings Fund (consolidated)	0.68%

Each Fund may purchase shares of an affiliated exchange traded fund(s) in secondary market transactions. For the six months ended September 30, 2011, WTAM waived a portion of its advisory fees based on each Fund s investment in affiliated Funds. The table below indicates the waiver amounts. Please see Note 7 on page 79 for additional information on Other Affiliated Parties and Transactions.

4. CAPITAL SHARE TRANSACTIONS

As of September 30, 2011, there was an unlimited number of \$0.001 par value shares of beneficial interest authorized by the Trust. Shares are issued and redeemed by each Fund only in Creation Units or multiples thereof. Except when aggregated in Creation Units, shares of each Fund are not redeemable. Transactions in shares for each Fund are disclosed in detail in the Statements of Changes in Net Assets. The consideration for the purchase of Creation Units of a Fund generally consists of the in-kind contribution

77

Notes to Financial Statements (unaudited) (continued)

of a designated portfolio of equity securities constituting a portfolio sampling representation of the securities included in the relevant Fund s underlying index and an amount of cash. India Earnings Fund issues and redeems shares on a cash basis only. Investors purchasing and redeeming Creation Units may be charged a purchase transaction fee and a redemption transaction fee to offset transfer and other transaction costs associated with the issuance and redemption of Creation Units.

5. INVESTMENT PORTFOLIO TRANSACTIONS

Purchases and sales of investments (excluding in-kind purchases and redemptions and short-term investments) for the six months ended September 30, 2011 were as follows:

Fund	Purchases	Sales
Total Earnings Fund	\$ 591,004	\$ 613,003
Earnings 500 Fund	694,997	683,006
MidCap Earnings Fund	3,119,543	3,063,737

LargeCap Value Fund	5,605,014	
LargeCap Growth Fund	17,355,535	22,558,430
India Earnings Fund (consolidated)		

Gains and losses on in-kind redemptions are not recognized at the Fund level for tax purposes.

6. FEDERAL INCOME TAXES

At September 30, 2011, the cost of investments (including securities on loan) for Federal income tax purposes was as follows:

Fund	Tax Cost	Gross Unrealized Appreciation	Gross Unrealized Depreciation	Net Unrealized Appreciation
Total Earnings Fund	\$ 48,055,862	\$ 2,473,835	\$ (6,366,103)	\$ (3,892,268)
Earnings 500 Fund	63,851,930	3,465,921	(9,824,350)	(6,358,429)
MidCap Earnings Fund	129,288,260	3,733,400	(19,082,034)	(15,348,634)

LargeCap Growth Fund	18,630,525	928,380	(3,278,304)	(2,349,924)
India Earnings Fund (consolidated)	922,627,210	90,994,263	(112,712,367)	(21,718,104)

GAAP provides guidance on tax provisions that prescribe a minimum threshold for financial statement recognition of the benefit of a tax position taken or expected to be taken in a tax return. Foreign taxes are provided for based on each Fund s understanding of the tax rules and rates that exist in the foreign markets in which it invests. Taxes are accrued and applied to net investment income, net realized capital gains and

net unrealized appreciation, as applicable, as the income is earned or capital gains are recorded. As of and during the six months ended September 30, 2011, the Funds did not have any liabilities for unrecognized tax benefits. If applicable, the Funds will recognize interest accrued related to unrecognized tax benefits in interest expense and penalties in Other expenses on the Statements of Operations. The Funds file tax returns with U.S. Internal Revenue Service, the state of New York, and various other states. Generally, each of the tax years in the four-year period ended March 31, 2011 remains subject to examination by taxing authorities.

8. NEW ACCOUNTING PRONOUNCEMENTS

In April 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-03 Reconsideration of Effective control for Repurchase Agreements. The objective of ASU 2011-03 is to improve the accounting for repurchase agreements and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. Under previous guidance, whether or not to account for a transaction as a sale was based on, in part, if the entity maintained effective control over the transferred financial assets. ASU 2011-03 removes the transferor s ability criterion from the effective control assessment. This guidance is effective prospectively for interim and annual reporting periods beginning on or after December 15, 2011. At this time, management is evaluating the implications of ASU No. 2011-03 and its impact on the financial statements has not been determined.

In May 2011, the FASB issued ASU No. 2011-04 Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS. ASU 2011-04 includes common requirements for measurement of and disclosure about fair value between U.S. GAAP and IFRS. ASU 2011-04 will require reporting entities to disclose the following information for the fair value measurements categorized within Level 3 of the fair value hierarchy: quantitative information about the unobservable inputs used in the fair value measurement, the valuation processes used by the reporting entity and a narrative description of the sensitivity of the fair value measurement to changes in observable inputs and the interrelationships between those unobservable inputs. In addition, ASU 2011-04 will require reporting entities to make disclosures about amounts and reasons for all transfers in and out of Level 1 and Level 2 fair value measurements. The new and revised disclosures are effective for interim and annual reporting periods beginning after December 15, 2011. At this time, management is evaluating the implications of ASU No. 2011-04 and its impact on the financial statements.

9. SUBSEQUENT EVENT

In accordance with GAAP provisions, management of the Funds has evaluated the possibility of subsequent events existing in the Funds financial statements through the date the financial statements were issued. Management has determined that there are no material events that would require disclosure in the Funds financial statements.

The WisdomTree Funds are exchange traded funds (ETFs) registered with the United States Securities and Exchange Commission as series of WisdomTree Trust (Trust). WisdomTree Asset Management, Inc., a wholly owned subsidiary of WisdomTree Investments, Inc., serves as the investment adviser to the WisdomTree Trust. None of the WisdomTree entities are affiliated with ALPS Distributors, Inc., the Funds distributor. WisdomTree Investments, its affiliates and their independent providers are not liable for any informational errors, incompleteness, or delays, or for any actions taken in reliance on information contained herein.

Investors should consider the investment objectives, risks, charges and expenses of the Funds carefully before investing. A prospectus, containing this and other information, is available at www.wisdomtree.com, or by calling 1-866-909-WISE (9473). Investors should read the prospectus carefully before investing. There are risks associated with investing, including possible loss of principal. Past performance does not guarantee future results. Indexes are unmanaged and you can not invest directly in an index.

There are risks associated with investing, including possible loss of principal. Funds focusing their investments on certain sectors and/or smaller companies increase their vulnerability to any single economic or regulatory development. This may result in greater share price volatility. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. The WisdomTree India Earnings Fund focuses its investments in India, thereby increasing the impact of events and developments associated with the region which can adversely affect performance. Investments in emerging, offshore or frontier markets such as India are generally less liquid and less efficient than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and intervention or political developments. Please read each Fund s prospectus for specific details regarding the Fund s risk profile.

Transactions in Fund shares will result in brokerage commissions and will generate tax consequences. Shares may be sold through brokerage accounts, but may be redeemed from the Funds only in large amounts of 50,000 shares or more.

The WisdomTree Dividend Index of Europe, Far East Asia and Australasia (DEFA) Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Dividend Index of Europe, Far East Asia and Australasia (the WisdomTree DEFA Index).

The Fund returned -16.40% at net asset value (NAV) for the six month period ended September 30, 2011. The Fund benefited most from its investments in New Zealand. The Fund s position in France created the greatest drag on Fund performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of a Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. **The annual expense ratio of the Fund is 0.48%.**

The WisdomTree Japan SmallCap Dividend Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Japan SmallCap Dividend Index.

The Fund returned 4.05% at net asset value (NAV) for the six month period ended September 30, 2011. The Fund s performance benefited most from its investments in the Consumer Discretionary sector, which had positive performance. The Fund s investments in the Materials sector created the greatest drag on Fund performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of a Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. **The annual expense ratio of the Fund is 0.58%.**

The WisdomTree Emerging Markets Equity Income Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Emerging Markets Equity Income Index.

The Fund returned -17.49% at net asset value (NAV) for the six month period ended September 30, 2011. The Fund benefited most from its investments in Thailand, which contributed positively to Fund performance. The Funds investments in Brazil created the greatest drag on Fund performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of a Fund s portfolio securities.

On June 17, 2011, the Fund s name changed from the WisdomTree International Utilities Sector Fund to the WisdomTree Global ex-US Utilities Fund. The Fund benefited most from its investments in the United Kingdom. The Fund s investments in France created the greatest drag on performance.

The following performance chart is provided for comparative purposes and represents the period noted. The Fund s per share NAV is the value of one share of the Fund and is calculated by dividing the value of total assets less total liabilities by the number of shares outstanding. The NAV return is based on the NAV of the Fund and the market price return is based on the market price per share of the Fund. The price used to calculate market price returns is the mid-point of the highest bid and lowest offer for Fund shares as of the close of trading on the exchange where Fund shares are listed. NAV and market price returns assume that dividends and capital gain distributions have been reinvested in the Fund at NAV and market price, respectively. As with other ETFs, NAV returns and market price returns may differ because of factors such as the supply and demand for Fund shares and investors assessments of the underlying value of a Fund s portfolio securities.

An index is a statistical measure of a specified financial market or sector. An index does not actually hold a portfolio of securities, incur expenses or pay any transaction costs. Therefore, index returns do not reflect deductions for fees or expenses and the index is not available for direct investment. In comparison, the Fund s performance is negatively impacted by these deductions. Fund returns do not reflect brokerage commissions or taxes on transactions in Fund shares or that a shareholder would pay on Fund distributions. **The annual expense ratio of the Fund is 0.58%.**

Shareholder Expense Examples (unaudited)

As a shareholder of a WisdomTree Fund, you incur two types of costs: (1) transaction costs, including brokerage commissions on purchases and sales of your Fund shares and (2) ongoing costs, including management fees and other Fund expenses. The following example is intended to help you understand your ongoing costs (in dollars and cents) of investing in a Fund and to compare these costs with the ongoing costs of investing in other funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period from April 1, 2011 to September 30, 2011.

Actual expenses

The first line under each Fund in the table on the next page provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for your Fund under the heading entitled Expenses Paid During the Period 4/01/11 to 9/30/11 to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes

The second line under each Fund in the table on the next page provides information about hypothetical account values and hypothetical expenses based on each Fund s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales of Fund shares. Therefore, the second line under each Fund in the table is useful in comparing ongoing Fund costs only and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

^{*} Commencement of investment operations.

- ** Reflects the Fund s advisory fees, after waiver, and the fees and expenses of the underlying funds that were paid indirectly by the Fund during the period when the Fund operated as a fund of funds.
- Based on average shares outstanding.
- ² Amount is less than \$0.005.
- ³ Total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period and redemption on the last day of the period. Total return calculated for a period of less than one year is not annualized. The total return would have been lower if certain expenses had not been reimbursed/waived by the investment adviser (Note 2).
- ⁴ The ratios to average net assets do not include net investment income (loss) or expenses of the affiliated funds in which the Fund invests.
- ⁵ Annualized.
- 6 Portfolio turnover rate is not annualized and excludes the value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund s capital shares.

Each Fund seeks to track the price and yield performance, before fees and expenses, of a particular index (Index) developed by WisdomTree Investments, Inc. (WisdomTree Investments). WisdomTree Investments is the parent company WisdomTree Asset Management, Inc. (WTAM), the investment adviser to each Fund and the Trust. WisdomTree is a registered mark of WisdomTree Investments and has been licensed for use by the Trust. Each Fund described herein is considered to be non-diversified.

2. SIGNIFICANT ACCOUNTING POLICIES

The Financial Accounting Standards Board (FASB) Accounting Standards Codification (Codification) has become the exclusive reference of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal laws are also sources of authoritative GAAP for SEC registrants.

The following is a summary of significant accounting policies followed by the Funds:

Guarantees In the normal course of business, the Funds may enter into contracts that contain a variety of representations or that provide indemnification for certain liabilities. The Funds maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote. Therefore, no liabilities have been recorded in connection to the indemnifications.

Use of Estimates The preparation of financial statements in conformity with GAAP, requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities

at the date of the financial statements and the reported amounts of increases and decreases in the net assets from operations during the reporting period. Actual results could differ from those estimates.

Investment Valuation The Net Asset Value (NAV) of each Funds shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange, generally 4:00 p.m. Eastern time. NAV per share is calculated by dividing a Funds net assets by the number of Fund shares outstanding. Transactions in Fund shares will be priced at NAV only if you purchase or redeem shares directly from a Fund in creation units which are typically in blocks of 50,000 shares or more. Fund shares purchased or sold on a national securities exchange at market prices, which may be higher or lower than NAV. Each Fund may invest in money market funds or affiliated funds which are valued at NAV.

Securities traded on any recognized U.S. or non-U.S. exchange are valued at the last sale price or official closing price on the exchange or system on which they are principally traded. Events occurring after the close of trading on non-U.S. exchanges may result in adjustments to the valuation of foreign securities to more accurately reflect their fair value as of the close of regular trading on the New York Stock Exchange. The Fund may rely on an independent fair valuation service in adjusting the valuations of foreign securities. Unlisted equity securities are valued at the last quoted sale price or, if no sale price is available, at the mean between the highest bid and lowest ask prices. Securities for which market quotations are not readily available are valued at fair value as determined by management and in accordance with procedures approved by the Trust s Board of Trustees. Short-term securities with 60 days or less remaining to maturity are valued using the amortized cost method, which approximates fair value. Forward foreign currency contracts are valued daily using WM/Reuters closing spot and forward rates as of 4:00 p.m., London time for Europe and the Americas and Tullett Prebon closing spot and forward rates as of 2:00 p.m., Singapore time for Asia.

In certain instances, such as when reliable market valuations are not readily available or are not deemed to reflect current market values, a Fund s investments will be valued in accordance with the Fund s pricing policy and procedures. Securities that may be valued using fair value pricing may include, but are not limited to, securities for which there are no current market quotations, securities or whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by significant events. An example of a significant event is an event occurring after the close of the market in which a security trades but before a Fund s next NAV calculation time that may materially affect the value of a Fund s investment (e.g., government action, natural disaster, or significant market fluctuation). Price movements in U.S. markets that are deemed to affect the value of foreign securities, or reflect changes to the value of such securities, also may cause securities to be fair valued. When fair value pricing is employed, the prices of securities used by a Fund to calculate its NAV may differ from quoted or published prices for the same securities.

Fair Value Measurement In accordance with Codification Topic 820 (ASC 820), Fair Value Measurements and Disclosures, fair value is defined as the price that each Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 established a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classifications of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity s own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below:

- Level 1 quoted prices in active markets for identical securities
- Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including each Fund s assumption in determining the fair value of investments)

Investments that use Level 2 or Level 3 inputs may include, but are not limited to: (i) an unlisted security related to corporate actions; (ii) a restricted security (e.g., one that may not be publicly sold without registration under the Securities Act of 1933, as amended); (iii) a security whose trading has been suspended or which has been de-listed from its primary trading exchange; (iv) a security that is thinly traded; (v) a security in default or bankruptcy proceedings for which there is no current market quotation; (vi) a security affected by currency controls or

restrictions; and (vii) a security affected by a significant event (e.g., an event that occurs after the close of the markets on which the security is traded but before the time as of which a Fund s NAV is computed and that may materially affect the value of the Fund s investments).

The inputs or methodology used for valuation are not necessarily an indication of the risk associated with investing in those investments.

Notes to Financial Statements (unaudited) (continued)

Fixed income securities are normally valued by pricing service providers that use broker dealer quotations, reported trades or valuation estimates from their internal pricing models. The service providers internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar assets. Securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy. Short-term investments having a maturity of 60 days or less are generally valued at amortized cost which approximates fair value. These investments are categorized as Level 2 of the fair value hierarchy. Over-the-counter financial derivative instruments, such as foreign currency contracts derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These contracts are normally valued on the basis of broker dealer quotations or pricing service providers. Depending on the product and the terms of the transaction, the value of the financial derivative contracts can be estimated by a pricing service provider using a series of techniques, including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, spreads, interest rates, curves, dividends and exchange rates. Financial derivatives that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

The following is a summary of the inputs used as of September 30, 2011 in valuing each Fund s assets carried at fair value:
