Management Performance and Financial Conditions

(1) Outline of Operations and Business Results

Komatsu Ltd. (Company) and its consolidated subsidiaries (together Komatsu) have embarked on the Global Teamwork for Tomorrow mid-range management plan for three years, to be completed in the fiscal year ending March 31, 2013. Under this management plan, Komatsu is focusing its efforts on (1) promotion of ICT (Information and Communication Technology) applications to products and parts, (2) further advancement of environmental friendliness and safety in machine performance, (3) expansion of sales and service operations in Strategic Markets, and (4) promotion of continuous Kaizen (improvement) by strengthening workplace capability.

The second year of the ongoing mid-range management plan included the nine months from April 1 to December 31, 2011 of the fiscal year ending March 31, 2012. During those nine months, while demand for construction, mining and utility equipment declined sharply in China from the corresponding period a year ago, it increased in other Strategic markets and Traditional Markets. Demand was particularly strong for mining equipment. In addition, Komatsu quickly recovered normal production from the adverse effects of the Great East Japan Earthquake of March last year, captured growth in demand for equipment accurately and expanded sales. As a result, Komatsu advanced nine-month sales in the construction, mining and utility equipment business. In the industrial machinery and others business, while sales of wire saws declined from the corresponding period a year ago, Komatsu increased nine-month sales from the corresponding period a year ago by stepping up sales of presses, machine tools and temporary housing units in addition to consolidating Gigaphoton Inc. As a result, consolidated net sales advanced by 11.3% to JPY1,448.5 billion (USD18,812 million, at USD1=JPY77).

In the nine-month period under review, while the Japanese currency appreciated more against the U.S. dollar, Euro and Renminbi than the corresponding period a year ago, Komatsu expanded the volume of sales while continuing to improve selling prices and as well as production and other costs. As a result, Komatsu improved sales and profits in both construction, mining and utility equipment and industrial machinery and others businesses. Operating income for the nine-month period increased by 17.9% from the corresponding period a year ago, to JPY191.8 billion (USD2,491 million). Similarly, operating income ratio improved by 0.7 percentage points to 13.2%. Income before income taxes and equity in earnings of affiliated companies advanced by 16.9% to JPY185.6 billion (USD2,412 million). Net income attributable to Komatsu Ltd. totaled JPY129.3 billion (USD1,680 million), showing an improvement of 28.6% from the corresponding period a year ago.

In the third quarter (three months from October 1 to December 31, 2011) compared to the corresponding period a year ago, while the Japanese currency appreciated more against major currencies, Komatsu advanced both sales and profits of the construction, mining and utility equipment business by working to improve selling prices and cut down production and other costs, as demand increased steadily worldwide, except for China. In the industrial machinery and others business, meanwhile, both sales and profits declined, as adversely impacted by downturned sales of wire saws from the second quarter of the current fiscal year. As a result, for the third quarter under review, consolidated sales increased by 4.6% from the previous third quarter, to JPY462.6 billion (USD6,008 million), operating income, up by 0.1% to JPY58.8 billion (USD765 million), income before income taxes and equity in earnings of affiliated companies, down by 5.7% to JPY55.4 billion (USD720 million), and net income attributable to Komatsu Ltd., down by 5.9% to JPY34.7 billion (USD451 million).

Table of Contents

Note: Sales and profit figures stated in this news release show accumulated figures for the nine-month period from April 1 through December 31, 2011, unless otherwise footnoted.

Table of Contents**Construction, Mining and Utility Equipment**

While demand dropped sharply in China from the corresponding period a year ago as adversely affected by the credit squeeze measure, demand steadily increased in other Strategic markets as well as Traditional Markets, i.e., Japan, North America and Europe. Against the backdrop of thriving demand for commodities and energy, sales of mining equipment expanded, especially in Latin America and Indonesia. Moreover, reflecting increased machine population, both parts sales and service revenues improved steadily. As a result, consolidated net sales of construction, mining and utility equipment expanded by 10.3% from the corresponding period a year ago, to JPY1,265.1 billion (USD16,430 million). Komatsu continued to strengthen its operation to flexibly meet changes of retail demand by utilizing KOMTRAX (Komatsu Machine Tracking System) information concerning machine use in different regions of the world, centering on the Global HANSEI Operation Center, a global sales and production planning control center which opened in May last year. At the same time, Komatsu also worked to launch HB205 and 215LC hybrid hydraulic excavators outside of Japan and expand sales of new emission standards-compliant models in North America and Europe.

[Sales of Construction, Mining and Utility Equipment by Region]

	September 30, Nine months ended December 31, 2011 [A]	September 30, Nine months ended December 31, 2010 [B]	September 30, Changes [A-B]	September 30, Changes [(A-B)/B]

Total	1,265,104	1,146,921	118,183	10.3%

* Excluding Japan and China

Japan

While demand for construction equipment advanced mainly from rental companies for use in the recovery and reconstruction of the earthquake and tsunami-stricken regions, Komatsu quickly resumed production and supplied equipment smoothly. As a result, nine-month sales increased from the corresponding period a year ago. To get ready for a large number of equipment needed for full-scale reconstruction projects in the disaster-devastated regions, Komatsu opened the Tohoku Service Center of the Tohoku Operation Department and the Miyagi Center of Komatsu Safety Training Center Ltd., expanding service operations to support those projects in the Tohoku region. In an assistance effort for the disaster-devastated regions, Komatsu decided on free-of-charge lending of equipment owned by the Komatsu Group worth about JPY800 million in November last year in addition to the ongoing assistance of the same value since March last year, totaling JPY1.6 billion.

Table of Contents

Americas

In North America, while the recovery of demand for construction equipment in the housing sector was still lacking in momentum, demand in the rental, energy and mining industries expanded firmly. Komatsu continued efforts to expand sales of the new emission standards-compliant models and new hybrid hydraulic excavators, which were launched during the first quarter of the current fiscal year, while facilitating the Zero Inventory Campaign at distributors. In Latin America, demand in Brazil, the largest Latin American market for construction equipment, remained sluggish in the civil engineering sector as mainly affected by the economic slowdown and belated start of public works. Meanwhile, demand for mining equipment continued to expand, centering on Chile. As a result, nine-month sales in the Americas increased from the corresponding period a year ago.

Europe & CIS

In Europe, while concerns over economic slowdown remained against the backdrop of fiscal problems, demand for construction equipment increased steadily in major markets of Germany and France. Komatsu worked to expand sales of parts and launched new emission standards-compliant models and hybrid hydraulic excavators. In CIS, demand for equipment advanced firmly in the mining sector especially for coal and gold, as well as in the energy sector for oil and natural gas. As a result, nine-month sales in Europe & CIS increased from the corresponding period a year ago. At Komatsu Manufacturing Rus LLC, Komatsu began production of the HD785 large dump truck mainly for use in mining, following the initial production of hydraulic excavators. In October last year, Komatsu reached an agreement with the Pacific National University and the State Government of Khabarovsk to offer cooperation in human resource development for construction, mining and road construction equipment in far eastern Russia.

China

As the government's credit squeeze measure remained in place, the start of new construction projects was delayed by lack of funds, resulting in a sharp decline in demand for equipment, especially in the civil engineering sector. Nine-month sales in China decreased from the corresponding period a year ago. By anticipating mid to long-term market growth in China in spite of the current business conditions, Komatsu made capital investment in order to achieve production capable of responding to demand changes flexibly. Following Japan, North America and Europe, Komatsu organized the China Midori-kai for local suppliers. By teaming up with local suppliers, Komatsu is going to improve the QCD (quality, cost and delivery) of products, thereby further enhancing Komatsu's Monozukuri competitiveness in China.

Asia & Oceania

In Indonesia, the largest market of Southeast Asia, demand continued to expand for mining equipment, while that for construction equipment remained strong in the civil engineering, agriculture and forestry sectors as well. Demand for construction equipment also increased steadily in India, Malaysia and other countries in Asia. In Australia, demand was brisk, centering on mining equipment. Against this backdrop, nine-month sales in Asia &

Table of Contents

Oceania advanced from the corresponding period a year ago. In Thailand, while some suppliers were flooded last year, Komatsu did not suffer a big impact on sales and production and continued normal operations. In November last year, Komatsu and Rio Tinto signed a Memorandum of Understanding to operate over 150 driverless dump trucks in iron ore mines in Australia by the end of 2015.

Middle East & Africa

While unstable political and social conditions continued in some countries, demand advanced, centering on mining equipment in Africa. Under such an environment, nine-month sales in the Middle East & Africa improved from the corresponding period a year ago. Komatsu expects that demand for equipment will continue to expand for mining and infrastructure development. To meet this increase in demand, Komatsu continued efforts to reinforce its sales and product support operations by introducing KOMTRAX-installed standard construction equipment in South Africa. To improve parts supply operation jointly with distributors in Southern Africa, Komatsu also began preparation to open a new parts depot in March this year.

Industrial Machinery and Others

Sales of wire saws for the third quarter decreased from the second quarter of the current fiscal year, as adversely affected by the Chinese government's credit squeeze measure, by reduced subsidies related to solar energy in Europe and by the lowered price for silicon wafers, the basic material for solar cells. As a result, nine-month sales of wire saws declined from the corresponding period a year ago. Meanwhile, capital investment by the automobile manufacturing industry upturned for recovery, and sales of presses and machine tools advanced. Sales of temporary housing units also increased. With respect to damages caused by the flood in Thailand, Komatsu worked to rebuild service operation by dispatching engineers from Japan and making other efforts such as repairing customers' machines starting in December last year. Since the second quarter of the current fiscal year, Komatsu has included sales and profits of Gigaphoton in the consolidated financial statements. Gigaphoton became a wholly owned subsidiary in the first quarter. As a result, nine-month sales of the industrial machinery and others businesses increased by 18.3% from the corresponding period a year ago, to JPY183.4 billion (USD2,382 million).

(2) Financial Conditions

As of December 31, 2011, total assets amounted to JPY2,228.1 billion (USD28,937 million), registering an increase of JPY79.0 billion from the previous fiscal year-end, mainly reflecting increased inventories. Interest-bearing debt increased by JPY123.8 billion from the previous fiscal year-end, to JPY667.8 billion (USD8,674 million). Komatsu Ltd. shareholders' equity increased by JPY3.9 billion from the previous fiscal year-end, to JPY927.7 billion (USD12,049 million). As a result, Komatsu Ltd. shareholders' equity ratio decreased by 1.4 percentage points from the previous fiscal year-end, to 41.6%. Net debt-to-equity ratio* was 0.61 compared to 0.50 as of the previous fiscal year-end.

* $Net\ debt\text{-}to\text{-}equity\ ratio = (Interest\text{-}bearing\ debt - Cash\ and\ cash\ equivalents - Time\ deposits) / Komatsu\ Ltd.\ shareholders'\ equity$

Table of Contents

For the nine-month period under review, net cash provided by operating activities amounted to JPY60.8 billion (USD791 million), a decrease of JPY72.0 billion from JPY132.9 billion for the corresponding period a year ago, mainly due to increased inventories. Net cash used in investing activities totaled JPY98.2 billion (USD1,276 million), an increase of JPY33.3 billion from the corresponding period a year ago, mainly due to the purchase of fixed assets as well as shares of subsidiaries and equity investees. While cash was used in repurchasing its own shares for retirement and dividend payments, net cash provided by financing activities amounted to JPY62.0 billion (USD806 million) due to procurement of long-term debt and an increase in short-term debt, compared to net cash of JPY59.6 billion used for the corresponding period a year ago. Furthermore, after adding the effects of foreign exchange fluctuations, cash and cash equivalents, as of December 31, 2011, totaled 103.6 billion (USD1,346 million), an increase of JPY19.3 billion from the previous fiscal year-end.

(3) Projections for the Fiscal Year Ending March 31, 2012

(From April 1, 2011 to March 31, 2012)

On October 27, the Company revised its projections of business results for the fiscal year ending March 31, 2012, which are shown on page 2 of this release.

Cautionary Statement

The announcement set forth herein contains forward-looking statements which reflect management's current views with respect to certain future events, including expected financial position, operating results, and business strategies. These statements can be identified by the use of terms such as will, believes, should, projects and similar terms and expressions that identify future events or expectations. Actual results may differ materially from those projected, and the events and results of such forward-looking assumptions cannot be assured. Factors that may cause actual results to differ materially from those predicted by such forward-looking statements include, but are not limited to, unanticipated changes in demand for the Company's principal products, owing to changes in the economic conditions in the Company's principal markets; changes in exchange rates or the impact of increased competition; unanticipated cost or delays encountered in achieving the Company's objectives with respect to globalized product sourcing and new Information Technology tools; uncertainties as to the results of the Company's research and development efforts and its ability to access and protect certain intellectual property rights; and, the impact of regulatory changes and accounting principles and practices.
