Table of Contents**SCHLUMBERGER LIMITED AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****1. Basis of Presentation**

The accompanying unaudited consolidated financial statements of Schlumberger Limited and its subsidiaries (Schlumberger) have been prepared in accordance with generally accepted accounting principles in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of Schlumberger management, all adjustments considered necessary for a fair statement have been included in the accompanying unaudited financial statements. All intercompany transactions and balances have been eliminated in consolidation. Operating results for the six-month period ended June 30, 2013 are not necessarily indicative of the results that may be expected for the full year ending December 31, 2013. The December 31, 2012 balance sheet information has been derived from the Schlumberger 2012 financial statements. For further information, refer to the *Consolidated Financial Statements* and notes thereto included in the Schlumberger Annual Report on Form 10-K for the year ended December 31, 2012, filed with the Securities and Exchange Commission on January 31, 2013.

2. Charges and Credits

Schlumberger recorded the following charges and credits during the first six months of 2013 and 2012:

2013

Second quarter 2013:

Schlumberger recorded a pretax and after-tax gain of \$1.028 billion as a result of the deconsolidation of its subsea business in connection with the formation of the OneSubsea joint venture with Cameron International Corporation (Cameron). Refer to Note 4 *Acquisitions* for further details.

Schlumberger recorded a \$222 million pretax (\$203 million after-tax) impairment charge relating to an investment in a company involved in developing drilling-related technology and a \$142 million pretax and after-tax impairment charge relating to an investment in a contract drilling business.

The following is a summary of the charges and credits recorded during the second quarter of 2013:

	(Stated in millions)			Consolidated Statement of Income Classification
	Pretax	Tax	Net	
Gain on formation of OneSubsea joint venture	\$ (1,028)	\$	\$ (1,028)	Gain on formation of OneSubsea
Impairment of equity-method investments	364	19	345	Impairment & other
	\$ (664)	\$ 19	\$ (683)	

First quarter 2013:

Edgar Filing: SCHLUMBERGER LTD /NV/ - Form 10-Q

Although the functional currency of Schlumberger's operations in Venezuela is the US dollar, a portion of the transactions are denominated in local currency. In February 2013, Venezuela's currency was devalued from the prior exchange rate of 4.3 Bolivar Fuertes per US dollar to 6.3 Bolivar Fuertes per US dollar. As a result of this devaluation, Schlumberger recorded a pretax and after-tax foreign currency loss of \$92 million during the first quarter of 2013.

	(Stated in millions)	
	2013	2012
Second Quarter	13	28
Six Months	13	21

4. Acquisitions

On June 30, 2013, Schlumberger and Cameron completed the formation of OneSubsea, a joint venture to manufacture and develop products, systems and services for the subsea oil and gas market. Schlumberger and Cameron each contributed all of their respective subsea businesses to the joint venture and Schlumberger made a \$600 million cash payment to Cameron. Schlumberger owns 40% of OneSubsea and will account for this investment under the equity method. Schlumberger recognized a pretax and after-tax gain of \$1.028 billion, which is classified as *Gain on formation of OneSubsea* in the *Consolidated Statement of Income*, as a result of the deconsolidation of its subsea business. This gain is equal to the difference between the fair value of the Schlumberger subsea business, which was determined based on the present value of its estimated future cash flows, and its carrying value at the time of closing. Approximately \$0.4 billion of the gain resulted from the remeasurement, to fair value, of the 40% retained interest in Schlumberger's subsea business.

During the first six months of 2013, Schlumberger made certain other acquisitions and investments, none of which were significant on an individual basis, for cash payments, net of cash acquired, of \$117 million.

The weighted average amortization period for all intangible assets is approximately 20 years.

Edgar Filing: SCHLUMBERGER LTD /NV/ - Form 10-Q

Based on the net book value of intangible assets at June 30, 2013, amortization charged to income for the subsequent five years is estimated to be: remainder of 2013 \$165 million; 2014 \$325 million; 2015 \$315 million; 2016 \$302 million; 2017 \$289 million; and 2018 \$283 million.

The estimated fair value of Schlumberger's *Long-term Debt* at June 30, 2013 and December 31, 2012, based on quoted market prices, was \$9.2 billion and \$9.9 billion, respectively.

11. Derivative Instruments and Hedging Activities

Schlumberger is exposed to market risks related to fluctuations in foreign currency exchange rates, commodity prices and interest rates. To mitigate these risks, Schlumberger utilizes derivative instruments. Schlumberger does not enter into derivative transactions for speculative purposes.

Foreign Currency Exchange Rate Risk

As a multinational company, Schlumberger conducts business in more than 85 countries. Schlumberger's functional currency is primarily the US dollar, which is consistent with the oil and gas industry. However, outside the United States, a significant portion of Schlumberger's expenses is incurred in foreign currencies. Therefore, when the US dollar weakens (strengthens) in relation to the foreign currencies of the countries in which Schlumberger conducts business, the US dollar reported expenses will increase (decrease).

Schlumberger is exposed to risks on future cash flows to the extent that local currency expenses exceed revenues denominated in local currency that are other than the functional currency. In addition, Schlumberger is also exposed to risks on future cash flows relating to certain of its long-term debt which is denominated in currencies other than the functional currency. Schlumberger uses foreign currency forward contracts and foreign currency options to provide a hedge against a portion of these cash flow risks. These contracts are accounted for as cash flow hedges, with the effective portion of changes in the fair value of the hedge recorded on the *Consolidated Balance Sheet* and in *Accumulated Other Comprehensive Loss*. Amounts recorded in *Accumulated Other Comprehensive Loss* are reclassified into earnings in the same period or periods that the hedged item is recognized in earnings. The ineffective portion of changes in the fair value of hedging instruments, if any, is recorded directly to earnings.

At June 30, 2013, Schlumberger recognized a cumulative net \$29 million loss in *Equity* relating to revaluation of foreign currency forward contracts and foreign currency options designated as cash flow hedges, the majority of which is expected to be reclassified into earnings within the next 12 months.

Table of Contents

Schlumberger is also exposed to changes in the fair value of assets and liabilities which are denominated in currencies other than the functional currency. Schlumberger uses foreign currency forward contracts and foreign currency options to hedge this exposure as it relates to certain currencies. These contracts are accounted for as fair value hedges with the fair value of the contracts recorded on the *Consolidated Balance Sheet* and changes in the fair value recognized in the *Consolidated Statement of Income* along with the change in fair value of the hedged item.

At June 30, 2013, contracts were outstanding for the US dollar equivalent of \$6.9 billion in various foreign currencies, of which \$3.9 billion related to hedges of debt denominated in currencies other than the functional currency.

Commodity Price Risk

Schlumberger is exposed to the impact of market fluctuations in the price of certain commodities, such as fuel. Schlumberger utilizes option contracts to manage a small percentage of the price risk associated with forecasted commodity purchases. The objective of these contracts is to reduce the variability of cash flows associated with the forecasted purchase of those commodities. These contracts do not qualify for hedge accounting treatment and therefore, changes in the fair value of the option contracts are recorded directly to earnings.

The notional amount of outstanding option commodity contracts was \$2 million at June 30, 2013.

Interest Rate Risk

Schlumberger is subject to interest rate risk on its debt and its investment portfolio. Schlumberger maintains an interest rate risk management strategy that uses a mix of variable and fixed rate debt combined with its investment portfolio and occasionally interest rate swaps to mitigate the exposure to changes in interest rates.

At June 30, 2013, Schlumberger had fixed rate debt aggregating \$9.6 billion and variable rate debt aggregating \$2.4 billion.

Short-term investments and Fixed income investments, held to maturity, totaled \$3.8 billion at June 30, 2013, and were comprised primarily of money market funds, eurodollar time deposits, certificates of deposit, commercial paper, euro notes and Eurobonds, and were substantially all denominated in US dollars. The carrying value of these investments approximated fair value, which was estimated using quoted market prices for those or similar investments.

The fair values of outstanding derivative instruments are summarized as follows:

13. Contingencies

In 2009, Schlumberger learned that United States officials began a grand jury investigation and an associated regulatory inquiry, both related to certain Schlumberger operations in specified countries that are subject to United States trade and economic sanctions. Also in 2009, prior to being acquired by Schlumberger, Smith received an administrative subpoena with respect to its historical business practices in certain countries that are subject to United States trade and economic sanctions. Governmental agencies and authorities have a broad range of civil and criminal penalties that they may seek to impose for violations of trade and economic sanction laws including, but not limited to, disgorgement, fines, penalties and modifications to business practices. In recent years, these agencies and authorities have obtained a wide range of penalties in settlements with companies arising from trade and economic sanction investigations, including in some cases fines and other penalties in the tens and hundreds of millions of dollars. Schlumberger is cooperating with the governmental authorities and cannot currently predict the outcome or estimate the possible impact of the ultimate resolution of these matters.

On April 20, 2010, a fire and explosion occurred onboard the semisubmersible drilling rig *Deepwater Horizon*, owned by Transocean Ltd. and under contract to a subsidiary of BP plc. Pursuant to a contract between M-I SWACO and BP, M-I SWACO provided certain services under the direction of BP. A number of legal actions, certain of which named an M-I SWACO entity as a defendant, were filed in connection with the *Deepwater Horizon* incident. Many of these claims were consolidated into multidistrict litigation pending in federal court (the MDL). During the first quarter of 2013, the federal court entered its order dismissing all claims against M-I SWACO that were consolidated as part of the MDL.

Schlumberger and its subsidiaries are party to various other legal proceedings from time to time. A liability is accrued when a loss is both probable and can be reasonably estimated. Management believes that the probability of a material loss is remote. However, litigation is inherently uncertain and it is not possible to predict the ultimate disposition of these proceedings.

17. Discontinued Operations

During the second quarter of 2013, Schlumberger completed the wind down of its operations in Iran and, therefore, has classified the historical results of this business as a discontinued operation.

During the second quarter of 2012, Schlumberger sold its Wilson distribution business to National Oilwell Varco Inc. (NOV) for \$906 million in cash. During the third quarter of 2012, Schlumberger completed the sale of its 56% interest in CE Franklin Ltd. to NOV for \$122 million in cash. As Wilson and CE Franklin comprised Schlumberger's entire Distribution segment, the results of this segment were classified as discontinued operations in the *Consolidated Statement of Income*.

The following table summarizes the results of these discontinued operations (in millions):

OILFIELD SERVICES

Second-quarter revenue of \$11.18 billion was up 6% sequentially, with International Area revenue of \$7.70 billion growing \$543 million, or 8% sequentially, while North America Area revenue of \$3.36 billion increased \$67 million, or 2% sequentially.

By segment, Reservoir Characterization Group revenue of \$3.01 billion grew 10% sequentially while Drilling Group revenue of \$4.29 billion increased 4%. These increases were due to seasonal rebounds, market share gains and higher exploration activity in both offshore and key international land markets, particularly for Wireline technologies. Other Technologies that gained significantly during the quarter were WesternGeco, Schlumberger Information Solutions (SIS), Drilling & Measurements and M-I SWACO. Despite the seasonal decline in Western Canada as a result of the spring break-up, the Production Group posted a sequential increase of 4%. Improving industry utilization of pressure pumping capacity in US land, increasing Well Intervention coiled tubing activity worldwide, and strong international sales of Completions products contributed to growth.

Geographically, the Middle East & Asia Area led the sequential increase with revenue of \$2.7 billion increasing 11%, mainly from a seasonal rebound of exploration and drilling activity in China and Japan, higher WesternGeco UniQ* land seismic productivity across the region, and continued growth across a diversified portfolio of projects and activities in Saudi Arabia and Iraq. Improved WesternGeco marine vessel utilization and robust drilling activity in the Australasia GeoMarket also contributed to growth. Europe/CIS/Africa revenue of \$3.1 billion increased 10% from higher WesternGeco multiclient sales ahead of licensing awards in Norway, and the seasonal pick-up of drilling and exploration activity in Russia and the North Sea. Sub-Saharan Africa revenue also grew sequentially through increased exploration activity in the Gulf of Guinea while activity in Angola was subdued due to project delays. Latin America revenue of \$1.9 billion grew slightly as the effect of strong Integrated Project Management (IPM) activity in Argentina was largely offset by a decline in WesternGeco marine utilization following the planned transit of vessels out of Brazil. North America revenue of \$3.4 billion increased 2%, with North America offshore revenue up due to robust Wireline deepwater activity and WesternGeco. US land posted double-digit growth, but this was offset by the seasonal decline in Western Canada following the spring break-up. While US land rig count grew only marginally, well and stage counts increased through drilling efficiency resulting in improved industry utilization of pressure pumping capacity.

Second-quarter pretax operating income of \$2.28 billion was up 16% sequentially. International pretax operating income of \$1.69 billion increased 18% sequentially, while North America pretax operating income of \$662 million increased 6% sequentially.

Sequentially, pretax operating margin of 20.4% increased 178 basis points (bps), as International pretax operating margin expanded 202 bps to 22.0%. Middle East & Asia posted a 178 bps sequential margin improvement to reach 24.6%, Europe/CIS/Africa increased by 275 bps to 20.6%, and Latin America improved by 107 bps to 20.6%. The expansion in International margins was due to seasonal activity rebounds combined with strong results in Sub-Saharan Africa and the Middle East & Asia Area. Increased high-margin exploration, seismic and deepwater activities also helped boost international margins. Despite the effect of the seasonal spring break-up in Western Canada, North America pretax operating margin increased 65 bps sequentially to 19.7%. US land margin expanded on improving efficiency, better utilization and lower raw material costs in pressure pumping, while North America offshore margin increased due to robust Wireline deepwater activity and WesternGeco.

Sequentially by Product Group, Reservoir Characterization Group pretax operating margin expanded 380 bps to 30.1% due to the strong WesternGeco and Wireline results. The pretax operating margin of the Drilling Group increased 97 bps to 18.7% through improved Drilling & Measurements performance and increased profitability on IPM projects in the Middle East and Latin America. Production Group pretax operating margin increased 116 bps to 15.9% on improved profitability in Well Services as pressure pumping utilization and efficiency improved in US land.

Table of Contents

Reservoir Characterization Group

Second-quarter revenue of \$3.01 billion increased 10% over the prior quarter. Pretax operating income of \$908 million was 25% higher than the first quarter. Sequentially, the revenue increase was driven primarily by increased use of Wireline services as a result of strong exploration activity in the US Gulf of Mexico, Brazil, Sub-Saharan Africa and the Middle East. Revenue in Russia and China also grew sequentially following seasonal activity rebounds. WesternGeco revenue increased sequentially from higher multiclient sales ahead of licensing awards in Norway, the seasonal return of marine vessel activity in the North Sea, and higher UniQ* land seismic productivity in Saudi Arabia and Kuwait. SIS revenue increased also from higher product sales and software maintenance in Latin America and Europe/CIS/Africa.

Pretax operating margin of 30.1% increased 380 bps sequentially on strong, high-margin WesternGeco multiclient sales and robust Wireline deepwater activity.

Drilling Group

Second-quarter revenue of \$4.29 billion was up 4% sequentially. Pretax operating income of \$804 million was 10% higher sequentially.

Sequentially, revenue increased primarily on strong international and offshore activity for Drilling & Measurements and M-I SWACO Technologies, mainly in Russia and the Middle East & Asia Area. In addition, both Drilling & Measurements and M-I SWACO posted strong results in US land on higher activity, which was largely offset by the effect of the seasonal spring break-up in Western Canada.

Sequentially, pretax operating margin grew 97 bps to 18.7% from increased land activity for Drilling & Measurements in the US, Russia and the Middle East, and improved profitability on IPM projects in the Middle East and Latin America.

Production Group

Second-quarter revenue of \$3.93 billion increased 4% sequentially. Pretax operating income of \$625 million was 13% higher versus the prior quarter. Despite the seasonal decline in Western Canada as a result of the spring break-up, the Group posted overall sequential growth due to improving industry utilization of pressure pumping capacity in US land, increasing Well Intervention global coiled tubing activity, and strong international sales of Completions products. While US land rig count grew only marginally, well and stage counts increased through drilling efficiency, resulting in improved industry utilization of pressure pumping capacity. Although pricing remained competitive, the pace of decline has moderated sequentially.

Pretax operating margin of 15.9% increased 116 bps sequentially. Sequentially, margin expanded primarily on improved profitability for Well Services technologies as the result of improving efficiency, better utilization and lower raw material costs in pressure pumping in US land despite competitive pricing. In addition, Completions and Well Intervention Technologies posted improved international profitability.

OILFIELD SERVICES

Second-quarter 2013 revenue of \$11.2 billion was 8% higher than the same period last year with International Area revenue increasing 12% while North America Area was essentially flat.

Edgar Filing: SCHLUMBERGER LTD /NV/ - Form 10-Q

Internationally, higher exploration and development activities in a number of GeoMarkets both offshore and in key land markets contributed to the increase. The increase was led by the Middle East & Asia Area mainly due to

Table of Contents

robust results in Saudi Arabia and Iraq, and sustained land and offshore drilling activity in the Australasia and China GeoMarkets. Europe/CIS/Africa Area increased, on strong development, exploration and seismic activities in the Sub-Saharan Africa region, while the Russia and Central Asia region saw strong land activity in West Siberia and robust offshore projects in Sakhalin. Latin America was also higher due to solid progress on a Schlumberger Production Management (SPM) project in Ecuador and strong IPM results in Argentina.

North America revenue was essentially flat as a decline in land revenue was largely offset by the increase in offshore revenue. The decline in land revenue resulted from a reduction in rig count combined with pricing weakness in the areas of drilling, stimulation and wireline. The improvement in offshore revenue resulted from higher drilling and exploration activities.

On a Product Group basis, Reservoir Characterization and Drilling Group revenue increased 11% and 8%, respectively as a result of robust exploration and development activities in a number of international GeoMarkets and in North America offshore, particularly in the US Gulf of Mexico. Production Group revenue increased 6%, mostly from Well Intervention and Completions Technologies in the international GeoMarkets.

Second-quarter 2013 pretax operating margin of 20.4% grew 66 bps versus the same period last year, as International pretax operating margin expanded 173 bps to 22.0% while North America pretax operating margin declined 83 bps to 19.7%. The expansion in International margins was due to increased high-margin exploration, seismic and deepwater activities while North America margin contraction was due to pricing weakness.

Reservoir Characterization Group

Second-quarter 2013 revenue of \$3.01 billion was 11.1% higher than the same period last year led by WesternGeco, Testing Services and Wireline Technologies, as a result of market share gains and higher exploration activity in both offshore and key international land markets.

Year-on-year, pretax operating margin increased 256 bps to 30.1%, largely due to the higher-margin exploration activities that benefited WesternGeco, Testing Services, and Wireline Technologies.

Drilling Group

Second-quarter 2013 revenue of \$4.29 billion was 8% higher than the previous year primarily due to the robust demand for Drilling & Measurements services as offshore drilling activity strengthened in the US Gulf of Mexico, Sub-Sahara Africa, Russia and the Middle East & Asia Area and as rig count increased in key international land markets, namely in Saudi Arabia, China and Australia. M-I SWACO and Drilling Tools & Remedial Technologies expanded across all Areas and IPM grew on projects in Iraq, Australia and Argentina.

Year-on-year, pretax operating margin increased 44 bps to 18.7% primarily due to the increase in higher-margin activities of Drilling & Measurements that benefited from higher-margin exploration activities in North America offshore and in the international markets and improved profitability on IPM projects.

Production Group

Second-quarter 2013 revenue of \$3.93 billion increased 6% year-on-year on increasing Well Intervention global coiled tubing activity and strong international sales of Completion products and Well Services technologies. Well Services revenue in North America declined on pricing weakness.

Year-on-year, pretax operating margin decreased 23 bps to 15.9% mainly due to decline in margins for Well Services technologies, primarily in North America, as a result of pricing pressure and cost inflation.

OILFIELD SERVICES

Six-month 2013 revenue of \$21.8 billion increased 8% versus the same period last year with International Area revenue 13% higher while North America Area revenue declined 2%.

Table of Contents

Internationally, higher exploration and development activities in a number of GeoMarkets both offshore and in key land markets contributed to the increase. The increase was led by the Middle East & Asia Area mainly due to robust results in Saudi Arabia and Iraq, and sustained land and offshore drilling activity in the Australasia and China GeoMarkets. Europe/CIS/Africa Area increased on strong development, exploration and seismic activities in the Sub-Saharan Africa region while the Russia and Central Asia region saw strong land activity in West Siberia and robust offshore projects in Sakhalin. Latin America was also higher due to solid progress on a SPM project in Ecuador and strong IPM results in Argentina.

The decline in North America revenue was due to a reduction in rig count and pricing weakness in the areas of drilling, stimulation and wireline, although the pace of the downward pricing trend slowed during the second quarter. This decrease was offset, in part by an increase in offshore revenue as a result of higher drilling and exploration activities.

On a Product Group basis, Reservoir Characterization and Drilling Group revenue increased 10% and 9%, respectively, as a result of robust exploration and development activities in a number of international GeoMarkets and in North America offshore, particularly in the US Gulf of Mexico. Production Group revenue increased 6%, mostly from Well Intervention, Completions, Artificial Lift and Well Services Technologies in the international GeoMarkets.

Year-to-date 2013 pretax operating margin of 19.5% was flat versus the same period last year, as International pretax operating margin expanded 156 bps to 21.0% while North America pretax operating margin contracted 220 bps to 19.4%. The expansion in International margins was due to increased high-margin exploration, seismic and deepwater activities while the North America margin contraction was due to pricing weakness.

Reservoir Characterization Group

Six-month 2013 revenue of \$5.76 billion was 10.2% higher than the same period last year, led by Testing Services, WesternGeco, SIS and Wireline Technologies, as a result of market share gains and higher exploration activity in both offshore and key international land markets.

Year-on-year, pretax operating margin increased 186 bps to 28.3%, largely due to the higher-margin exploration activities that benefited Testing Services, WesternGeco and Wireline Technologies.

Drilling Group

Six-month 2013 revenue of \$8.40 billion was 9% higher than the previous year, primarily due to the robust demand for Drilling & Measurements services as offshore drilling activity strengthened in the US Gulf of Mexico, Sub-Sahara Africa, Russia and the Middle East & Asia Area and as rig count increased in key international land markets, namely in Saudi Arabia, China and Australia. Drilling Tools & Remedial and M-I SWACO Technologies expanded across all Areas and IPM grew on projects in Iraq, Australia and Argentina.

Year-on-year, pretax operating margin increased 49 basis points to 18.3% primarily due to the increase in higher-margin activities of Drilling & Measurements that benefited from exploration activities in North America offshore and in the international markets.

Production Group

Six-month 2013 revenue of \$7.68 billion increased 6% year-on-year on increasing Well Intervention global coiled tubing activity and strong international sales of Completions products and Well Services technologies. Subsea and SPM also contributed to the growth. Well Services revenue in North America declined on pricing weakness.

Table of Contents

Year-on-year, pretax operating margin decreased 133 bps to 15.4% mainly due to decline in margins for Well Services technologies, primarily in North America, as a result of pricing pressure and cost inflation.

INTEREST & OTHER INCOME

Interest & other income consisted of the following for the second quarter and six months ended June 30, 2013 and 2012:

	Second Quarter		(Stated in millions) Six Months	
	2013	2012	2013	2012
Equity in net earnings of affiliated companies	\$ 24	\$ 38	\$ 52	\$ 76

	\$ 30	\$ 45	\$ 63	\$ 92

OTHER

Research & engineering and *General & administrative* expenses, as a percentage of *Revenue*, for the second quarter and six months ended June 30, 2013 and 2012 were as follows:

	Second Quarter		Six Months	
	2013	2012	2013	2012
Research & engineering	2.6%	2.8%	2.7%	2.8%
General & administrative	0.9%	1.0%	0.9%	1.0%

The effective tax rate for the second quarter of 2013 was 16.8% compared to 24.7% for the same period of 2012. The effective tax rate for the second quarter of 2013 was significantly impacted by the charges and credits described in Note 2 to the *Consolidated Financial Statements*. Excluding the impact of the second quarter 2013 charges and credits, the effective tax rate was 23.3%.

The effective tax rate for the six months ended June 30, 2013 was 19.9% compared to 24.4% for the same period of the prior year. The effective tax rate for the six months ended June 30, 2013 was also significantly impacted by the charges and credits described in Note 2 to the *Consolidated Financial Statements*. Excluding the impact of the charges and credits, the effective tax rate was 23.5%.

The decrease in the effective tax rate excluding charges and credits for both the three- and six-month periods ended June 30, 2013 as compared to the same periods of the prior year, is primarily attributable to the fact that Schlumberger generated a smaller percentage of its pretax earnings in North America in 2013 as compared to 2012.

CHARGES AND CREDITS

Schlumberger recorded the following charges and credits during the second quarter and the first six months of 2013 and 2012. These charges and credits, which are summarized below, are more fully described in Note 2 to the *Consolidated Financial Statements*.

Key liquidity events during the first six months of 2013 and 2012 included:

During the second quarter of 2013, Schlumberger paid Cameron \$600 million in connection with the formation of the OneSubsea joint venture.

On April 17, 2008, the Schlumberger Board of Directors (the Board) approved an \$8 billion share repurchase program for shares of Schlumberger common stock, to be acquired before December 31, 2011. On July 21, 2011, the Board approved an extension of this

Edgar Filing: SCHLUMBERGER LTD /NV/ - Form 10-Q

repurchase program to December 31, 2013. Schlumberger had repurchased \$7.8 billion of shares under this program as of June 30, 2013.

Table of Contents

The following table summarizes the activity, during the six months ended June 30, under this share repurchase program:

	<i>(Stated in millions except per share amounts)</i>		
	Total cost of shares purchased	Total number of shares purchased	Average price paid per share
Six months ended June 30, 2013	\$ 692	9.3	\$ 74.28
Six months ended June 30, 2012	\$ 823	11.9	\$ 69.13

On July 18, 2013, the Board approved a new \$10 billion share repurchase program for shares of Schlumberger common stock, to be completed at the latest by June 30, 2018.

Cash flow provided by operations was \$3.4 billion in the first six months of 2013 compared to \$1.4 billion in the first six months of 2012 reflecting a lower increase in working capital requirements year-on-year.

Capital expenditures were \$1.8 billion in the first six months of 2013 compared to \$2.1 billion during the first six months of 2012.

Capital expenditures for full year 2013 are expected to be approximately \$3.9 billion as compared to \$4.7 billion in 2012.

At times in recent quarters, Schlumberger has experienced delays in payments from its national oil company customer in Venezuela. Schlumberger operates in more than 85 countries. At June 30, 2013, only five of those countries (including Venezuela) individually accounted for greater than 5% of Schlumberger's accounts receivable balance of which only two, the United States and Mexico, represented greater than 10%.

As of June 30, 2013, Schlumberger had \$5.9 billion of cash and short-term investments on hand. Schlumberger had separate committed debt facility agreements aggregating \$4.0 billion with commercial banks, of which \$3.1 billion was available and unused as of June 30, 2013. This included \$3.5 billion of committed facilities which support commercial paper programs in the United States and Europe. Schlumberger believes that these amounts are sufficient to meet future business requirements for at least the next 12 months.

Schlumberger had commercial paper of \$650 million outstanding as of June 30, 2013.

Other Matters

During the first six months of 2013, certain non-US subsidiaries of Schlumberger provided oilfield services to the National Iranian Oil Company and certain of its affiliates (NIOC). Schlumberger's revenue for the six months ended June 30, 2013 attributable to this activity was \$102 million, which resulted in a net loss of \$69 million. During the second quarter of 2013, Schlumberger completed the wind down of its service operations in Iran. As a result, Schlumberger has classified the results of this business as a discontinued operation. All prior periods have been restated accordingly.

Schlumberger's activity in Iran included obtaining services from and engaging in other dealings with the government of Iran that are incidental to operating in Iran, and the expenses of which are reflected in the results disclosed above. These services and other dealings consisted of paying taxes, duties, license fees and other typical governmental charges, along with payments for utilities, transportation, hotel accommodations, facility rentals, telecommunications services, newspaper advertisements, recreational and fitness memberships, and the purchase of routine office and similar supplies from entities associated with the government of Iran. Two non-U.S. subsidiaries of Schlumberger maintain depository accounts at Bank Saderat Iran (Saderat) and Bank Tejarat (Tejarat) for the deposit by NIOC of amounts owed to non-US subsidiaries of Schlumberger. One of the non-U.S. subsidiaries also maintains a depository account at Bank Sarmayeh (Sarmayeh) which, together with Tejarat, is used for payment of local expenses such as rent, taxes and utilities. Schlumberger anticipates that it will discontinue its dealings with Saderat, Sarmayeh and Tejarat following the receipt of all amounts owed to Schlumberger for prior services rendered in Iran.

FORWARD-LOOKING STATEMENTS

This Form 10-Q, and other statements we make contain forward-looking statements within the meaning of the federal securities laws, which include any statements that are not historical facts, such as our forecasts or expectations regarding business outlook; growth for Schlumberger as a whole and for each of its segments (and for specified products or geographic areas within each segment); oil and natural gas demand and production growth; oil and natural gas prices; improvements in operating procedures and technology; capital expenditures by Schlumberger and the oil and gas industry; the business strategies of Schlumberger's customers; Schlumberger's share repurchase program; future global economic conditions; and future results of operations. These statements are subject to risks and uncertainties, including, but not limited to, global economic conditions; changes in exploration and production spending by Schlumberger's customers and changes in the level of oil and natural gas exploration and development; general economic, political and business conditions in key regions of the world; pricing erosion; weather and seasonal factors; operational delays; production declines; changes in government regulations and regulatory requirements, including those related to offshore oil and gas exploration, radioactive sources, explosives, chemicals, hydraulic fracturing services and climate-related initiatives; the inability of technology to meet new challenges in exploration; and other risks and uncertainties detailed in our second-quarter 2013 earnings release, our most recent Form 10-K and other filings that we make with the Securities and Exchange Commission. If one or more of these or other risks or uncertainties materialize (or the consequences of such a development changes), or should our underlying assumptions prove incorrect, actual outcomes may vary materially from those reflected in our forward-looking statements. Schlumberger disclaims any intention or obligation to update publicly or revise such statements, whether as a result of new information, future events or otherwise.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

For quantitative and qualitative disclosures about market risk affecting Schlumberger, see Item 7A, Quantitative and Qualitative Disclosures about Market Risk, of the Schlumberger Annual Report on Form 10-K for the fiscal year ended December 31, 2012. Schlumberger's exposure to market risk has not changed materially since December 31, 2012.

Item 4. Controls and Procedures.

Schlumberger has carried out an evaluation under the supervision and with the participation of Schlumberger's management, including the Chief Executive Officer (CEO) and the Chief Financial Officer (CFO), of the effectiveness of Schlumberger's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)) as of the end of the period covered by this report. Based on this evaluation, the CEO and the CFO have concluded that, as of the end of the period covered by this report, Schlumberger's disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the reports that Schlumberger files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Schlumberger's disclosure controls and procedures include controls and procedures designed to ensure that information required to be disclosed in reports filed or submitted under the Exchange Act is accumulated and communicated to its management, including the CEO and the CFO, as appropriate, to allow timely decisions regarding required disclosure. There has been no change in Schlumberger's internal control over financial reporting that occurred during the quarter to which this report relates that has materially affected, or is reasonably likely to materially affect, Schlumberger's internal control over financial reporting.

Issuer Repurchases of Equity Securities

On April 17, 2008, the Schlumberger Board of Directors (the Board) approved an \$8 billion share repurchase program for Schlumberger common stock, which may be acquired in the open market or in negotiated transactions. On July 21, 2011, the Board approved an extension of this repurchase program to December 31, 2013. As of June 30, 2013, \$0.2 billion remained available for repurchase under the existing repurchase authorization. On July 18, 2013, the Board approved a new \$10 billion share repurchase program for shares of Schlumberger common stock, to be completed at the latest by June 30, 2018.

Schlumberger's common stock repurchase program activity for the three months ended June 30, 2013 was as follows:

(Stated in thousands, except per share amounts)

	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced program	Maximum value of shares that may yet be purchased under the program
April 1 through April 30, 2013	2,057.2	\$ 73.37	2,057.2	\$ 535,643
May 1 through May 31, 2013	654.1	\$ 73.75	654.1	\$ 487,405
