Letter from Chairman of the Board &

President

Hans W. Kertess

*Chairman*

Julian Sluyters

*President & CEO*

Dear Shareholder:

The US economy continued to expand during the fiscal six-month reporting period ended August 31, 2014, and both stocks and bonds posted strong returns.

**Six Months in Review through August 31, 2014**

n AllianzGI Convertible & Income Fund returned 3.72% on net asset value ( NAV ) and 4.23% on market price.

n AllianzGI Convertible & Income Fund II returned 4.02% on NAV and 4.24% on market price.

In comparison, the Standard & Poor's ( S&P ) 500 Index, an unmanaged index generally representative of the US stock market, rose 8.84% and the BofA Merrill Lynch High Yield Master II Index, an unmanaged index generally representative of the high yield bond market, gained 2.97% during the six-month reporting period. Convertible securities, which share characteristics of both stocks and bonds, rose. The BofA Merrill Lynch All Convertibles Index, an unmanaged index generally representative of the convertible securities market, advanced 4.78% for the period.

After several years of positive growth, severe winter weather in parts of the country appeared to be a headwind for the US economy in early 2014. Looking back, gross domestic product ( GDP ), the value of goods and services produced in the country, the broadest measure of economic activity and the principal indicator of economic performance, contracted at an annual pace of 2.1% during the first quarter of 2014 but then expanded at a 4.6% annual pace during the second quarter of 2014.

The US Federal Reserve (the Fed ) maintained an accommodative monetary policy during the reporting period. The reduction of the Fed's monthly asset purchase program continued through the reporting period and markets continued to scrutinize Fed Statements related to when interest rates would begin to rise. In July, the Fed repeated it would not

raise rates in the near future, saying that it likely will be appropriate to maintain the current target range for the federal funds rate for a considerable time after the asset purchase program ends, especially if projected inflation continues to run below the Committee's 2 percent longer-run goal, and provided that longer-term inflation expectations remain well anchored.

2 Semi-Annual Report | August 31, 2014

**Table of Contents**

**Outlook**

The US economy has been resilient and appears to have overcome the headwinds associated with severe winter weather. We continue to expect US economic growth will be above-trend in 2014 due, in part, to the fact that fiscal policy will be less of a drag than it was last year. While we wouldn't be surprised if rate hikes begin a bit sooner than expected, we think the Fed's tightening cycle will progress at a thoughtful pace. That

pace will be dictated by macro conditions and, in our view, ultimately settle at a lower rate than the accustomed target set by the Fed in recent years.

For specific information on the Funds and their performance, please refer to the following pages. If you have any questions regarding the information provided, we encourage you to contact your financial advisor or call the Funds shareholder servicing agent at (800) 254-5197. In addition, a wide range of information and resources is available on our website, [us.allianzgi.com/closedendfunds](http://us.allianzgi.com/closedendfunds).

Together with Allianz Global Investors Fund Management LLC, the Funds' investment manager, and Allianz Global Investors U.S. LLC, the Funds' sub-adviser, we thank you for investing with us.

We remain dedicated to serving your investment needs.

Sincerely,

Hans W. Kertess

## **Table of Contents**

### **Fund Insights**

#### AllianzGI Convertible & Income Funds

August 31, 2014 (unaudited)

For the period of March 1, 2014, through August 31, 2014, as provided by Doug Forsyth, CFA, Portfolio Manager.

For the fiscal six-month period ended August 31, 2014, AllianzGI Convertible & Income Fund and AllianzGI Convertible & Income Fund II (the Funds) returned 3.72% and 4.02% on net asset value (NAV) and 4.23% and 4.24% on market price, respectively.

### **Market Environment**

Convertible and high-yield bond markets moved higher over the reporting period. Both asset classes benefited from higher equity prices, credit spread tightening and overall credit market strength.

With credit risk continuing to be minimal, the external factors that had the greatest identifiable influence on the market's psychology and direction during the period included economic data points and corporate profits, Treasury rates, geopolitical uncertainty and the Fed outlook.

The first external factor that influenced the markets was economic statistics and corporate profits. Most looked past the final GDP number for the first quarter and viewed the data as an anomaly. This was due to the upward trajectory of second quarter economic statistics. The improving data points were welcome, but also led to increased investor concern that the Fed may tighten up sooner than expected. With respect to corporate profits, the majority of companies continued to meet or exceed expectations.

The convertible and high-yield markets were influenced by a decline in Treasury yields. Historically, convertible bonds and high yield bonds have had a low or even negative

correlation with Treasury bonds. However, some parts of the convertible market (the bond-like or busted convertibles) are correlated with Treasuries. In addition, within the high-yield universe, BB rated issuers are far more correlated with Treasuries today compared with previous cycles. This combination of higher correlation and the unexpected decline in Treasury yields had a positive influence on these markets.

In terms of geopolitical uncertainty the focus shifted from Russia and Ukraine, to Iraq. The added day-to-day volatility did not help the markets, but the concerns added to a flight-to-quality bid for the Treasury market.

Finally, global central banks remained generally accommodative and Janet Yellen maintained a dovish stance. This position has aided not only the renewed interest in buying Treasury bonds, but also reduced market volatility. Credit markets responded positively to these observations.

Against this backdrop, share buyback and dividend announcements were prevalent, M&A activity was elevated and the IPO market was robust. These trends confirmed a healthy corporate earnings environment.

### **Portfolio Specifics**

Table of Contents

## Edgar Filing: AllianzGI Convertible & Income Fund - Form N-CSRS

The Funds rallied with the market in the reporting period. The attribution for the period included several positive single-name performers from a variety of sectors. The majority of the Funds' issuers exceeded earnings expectations, which helped contribute to performance.

In the convertibles sleeve, sector allocations which benefitted performance in the period relative to the convertibles universe were

**4** Semi-Annual Report | August 31, 2014

**Table of Contents**

Utilities, Energy and Financials. The Funds benefited from an overweight and stronger issue-specific performance in the Utilities and Energy sectors. In Financials, an overweight was a detractor, but relative outperformance more than offset the impact. Conversely, sector allocations that hindered relative performance in the reporting period were Technology, Materials and Telecom. An underweight and negative security selection in Technology and Telecom hampered returns. The Funds' holdings in the Materials sector lagged their peers and adversely impacted performance.

In the high yield bond sleeve, industry allocations which benefitted performance in

the period relative to the high yield universe were Publishing/Printing, Metals/Mining and Steel. The Funds benefited from an overweight and stronger issue-specific performance in the Publishing/Printing and Steel industries. In Metals/Mining, an underweight and positive security selection was a source of strength. In contrast, industry allocations that hindered relative performance during the period were Gaming, Utilities and Energy. Negative security selection and a lower-than-benchmark weight in Energy held back the Funds. In Gaming, both an overweight to the lagging industry, and weaker issuer-specific returns negatively impacted relative performance. Having no exposure to Utilities was a detractor.

**Performance & Statistics**

AllianzGI Convertible & Income Funds

August 31, 2014 (unaudited)

\* Bond ratings apply to the underlying holdings of the Funds and not the Funds themselves and are divided into categories ranging from highest to lowest credit quality, determined for purposes of this presentation by using ratings provided by Moody's Investors Service, Inc. (Moody's). The Funds use ratings provided by Moody's for this purpose, among other reasons, because of the access to background information and other materials provided by Moody's, as well as the Funds' consideration of industry practice. When a bond is not rated by Moody's, it is designated in the chart above as "NR" for not rated. Credit quality ratings assigned by a rating agency are subjective opinions, not statements of fact, and are subject to change periodically, even as frequently as daily. Ratings assigned by Moody's or another rating agency are not absolute standards of credit quality and do not evaluate market risk. Rating agencies may fail to make timely changes in credit ratings, and an issuer's current financial condition may be better or worse than a rating indicates. In formulating investment decisions for the Funds, Allianz Global Investors U.S. LLC, the sub-adviser to the Funds, develops its own analysis of the credit quality and risks associated with individual debt instruments, rather than relying exclusively on rating agencies or third-party research.

(1) **Past performance is no guarantee of future results.** Total return is calculated by determining the percentage change in NAV or market price (as applicable) in the specified period. The calculation assumes that all dividends and distributions, if any, have been reinvested. Total return does not reflect broker commissions or sales charges in connection with the purchase or sale of Fund shares. Total return for a period of more than one year represents the average annual total return. Total return for a period of less than one year is not annualized.

Performance at market price will differ from results at NAV. Although market price returns typically reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about each Fund, market conditions, supply and demand for each Fund's shares, or changes in each Fund's dividends.

An investment in each Fund involves risk, including the loss of principal. Total return, market price, market price yield and NAV will fluctuate with changes in market conditions. This data is provided for information purposes only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is a one time public offering and once issued, shares of closed-end funds are traded in the open market through a stock exchange. NAV is equal to total assets attributable to common shareholders less total liabilities divided by the number of common shares outstanding. Holdings are subject to change daily.

(2) Market Price Yield is determined by dividing the annualized current monthly dividend per common share (comprised of net investment income) by the market price per common share at August 31, 2014.

(3) Represents Preferred Shares (Leverage) outstanding, as a percentage of total managed assets. Total managed assets refer to total assets (including assets attributable to Leverage) minus liabilities (other than liabilities representing Leverage).

**Notes to Financial Statements**

AllianzGI Convertible & Income Funds

August 31, 2014 (unaudited)

**1. Organization and Significant Accounting Policies**

AllianzGI Convertible & Income Fund ( Convertible & Income ) and AllianzGI Convertible & Income Fund II ( Convertible & Income II ) (each a Fund and collectively the Funds ), were organized as Massachusetts business trusts on January 17, 2003 and April 22, 2003, respectively. Prior to commencing operations on March 31, 2003, and July 31, 2003, respectively, the Funds had no operations other than matters relating to their organization and registration as diversified, closed-end management investment companies under the Investment Company Act of 1940, as amended, and the rules and regulations thereunder. Allianz Global Investors Fund Management LLC (the Investment Manager ) and Allianz Global Investors U.S. LLC (the Sub-Adviser ), serve as the Funds investment manager and sub-adviser, respectively, and are indirect, wholly-owned subsidiaries of Allianz Asset Management of America L.P. ( AAM ). AAM is an indirect, wholly-owned subsidiary of Allianz SE, a publicly traded European insurance and financial services company. Each Fund has authorized an unlimited amount of common shares with \$0.00001 par value.

Each Fund s investment objective is to provide total return through a combination of capital appreciation and high current income. The Funds attempt to achieve this objective by investing in a portfolio of convertible securities and non-convertible income-producing securities. There can be no assurance that the Funds will meet their stated objectives.

The preparation of the Funds financial statements in accordance with accounting principles generally accepted in the United States of America ( U.S. GAAP ) requires the Funds management to make estimates and

assumptions that affect the reported amounts and disclosures in each Fund s financial statements. Actual results could differ from those estimates.

In the normal course of business, the Funds enter into contracts that contain a variety of representations that provide general indemnifications. The Funds maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred.

The following is a summary of significant accounting policies consistently followed by the Funds:

**(a) Valuation of Investments**

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, on the basis of quotes obtained from a quotation reporting system, established market makers, or independent pricing services. The Funds investments are valued daily using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such

securities, or the mean between the last quoted bid and ask price. Independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics.

The Board of Trustees (the Board ) has adopted procedures for valuing portfolio securities and other financial instruments in circumstances where market quotes are not readily available, and has delegated the responsibility for applying the valuation

---

**Table of Contents**

**Notes to Financial Statements**

AllianzGI Convertible & Income Funds

August 31, 2014 (unaudited)

**1. Organization and Significant Accounting Policies (continued)**

methods to the Investment Manager and Sub-Adviser. The Funds' Valuation Committee was established by the Board to oversee the implementation of the Funds' valuation methods and to make fair value determinations on behalf of the Board, as instructed by the Board. The Sub-Adviser monitors the continued appropriateness of methods applied and determines if adjustments should be made in light of market changes, events affecting the issuer or other factors. If the Sub-Adviser determines that a valuation method may no longer be appropriate, another valuation method may be selected, or the Valuation Committee will be convened to consider the matter and take any appropriate action in accordance with procedures set forth by the Board. The Board shall review the appropriateness of the valuation methods and these methods may be amended or supplemented from time to time by the Valuation Committee.

Synthetic convertible securities are valued based on quotations obtained from unaffiliated brokers who are the principal market-makers in such securities. Such valuations are derived by the brokers from proprietary models which are generally based on readily available market information including valuations of the common stock underlying the synthetic security.

Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days.

The prices used by the Funds to value investments may differ from the value that would be realized if the investments were sold,

and these differences could be material to the Funds' financial statements. Each Fund's net asset value ( NAV ) is normally determined as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the New York Stock Exchange ( NYSE ) on each day the NYSE is open for business.

**(b) Fair Value Measurements**

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e. the exit price ) in an orderly transaction between market participants. The three levels of the fair value hierarchy are described below:

- n Level 1 quoted prices in active markets for identical investments that the Funds have the ability to access
- n Level 2 valuations based on other significant observable inputs, which may include, but are not limited to, quoted prices for similar assets or liabilities, interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates or other market corroborated inputs

n Level 3 valuations based on significant unobservable inputs (including the Sub-Adviser's or Valuation Committee's own assumptions and securities whose price was determined by using a single broker's quote)  
The valuation techniques used by the Funds to measure fair value during the six months ended August 31, 2014 were intended to maximize the use of observable inputs and to minimize the use of unobservable inputs.

The Funds' policy is to recognize transfers between levels at the end of the reporting period. An investment asset's or liability's level within the fair value hierarchy is based on the lowest level input, individually or in aggregate, that is significant to fair value measurement. The objective of fair value measurement

**Notes to Financial Statements**

AllianzGI Convertible & Income Funds

August 31, 2014 (unaudited)

**1. Organization and Significant Accounting Policies (continued)**

remains the same even when there is a significant decrease in the volume and level of activity for an asset or liability and regardless of the valuation techniques used. Assets categorized as Level 1 or 2 as of period end may have been transferred between Levels 1 and 2 since the prior period due to changes in the valuation method utilized in valuing the investments.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following are certain inputs and techniques that the Funds generally use to evaluate how to classify each major category of assets and liabilities for Level 2 and Level 3, in accordance with U.S. GAAP.

**Equity Securities (Common and Preferred Stock)** Equity securities traded in inactive markets are valued using inputs which include broker-dealer quotes, recently executed transactions adjusted for changes in the benchmark index, or evaluated price quotes received from independent pricing services that take into account the integrity of the market sector and issuer, the individual characteristics of the security, and information received from broker-dealers and other market sources pertaining to the issuer or security. To the extent that these inputs are observable, the values of equity securities are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

**Convertible Bonds & Notes** Convertible bonds & notes are valued by independent pricing services using various inputs and techniques, which include broker-dealer quotations from relevant market makers and

recently executed transactions in securities of the issuer or comparable issuers. The broker-dealer quotations received are supported by credit analysis of the issuer that takes into consideration credit quality assessments, daily trading activity, and the activity of the underlying equities, listed bonds and sector-specific trends. To the extent that these inputs are observable, the values of convertible bonds & notes are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

**Corporate Bonds & Notes** Corporate bonds & notes are generally comprised of two main categories: investment grade bonds and high yield bonds. Investment grade bonds are valued by independent pricing services using various inputs and techniques, which include broker-dealer quotations, live trading levels, recently executed transactions in securities of the issuer or comparable issuers, and option adjusted spread models that include base curve and spread curve inputs. Adjustments to individual bonds can be applied to recognize trading differences compared to other bonds issued by the same issuer. High yield bonds are valued by independent pricing services based primarily on broker-dealer quotations from relevant market makers and recently executed transactions in securities of the issuer or comparable issuers. The broker-dealer quotations received are supported by credit analysis of the issuer that takes into consideration credit quality assessments, daily trading activity, and the activity of the underlying equities, listed bonds and sector-specific trends. To the extent that these inputs are observable, the values of corporate bonds & notes are

categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

**Notes to Financial Statements**

AllianzGI Convertible & Income Funds

August 31, 2014 (unaudited)

**1. Organization and Significant Accounting Policies (continued)**

**(c) Investment Transactions and Investment Income**

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on the identified cost basis. Interest income adjusted for the accretion of discount and amortization of premiums is recorded on an accrual basis. Discounts or premiums on debt securities purchased are accreted or amortized, respectively, to interest income. Conversion premium is not amortized. Dividend income is recorded on the ex-dividend date. Payments received on synthetic convertible securities are generally included in dividends. Consent fees relating to corporate actions are recorded as miscellaneous income upon receipt. Payments received from certain investments may be comprised of dividends, realized gains and return of capital. These payments may initially be recorded as dividend income and may subsequently be reclassified as realized gains and/or return of capital upon receipt of information from the issuer.

**(d) Federal Income Taxes**

The Funds intend to distribute all of their taxable income and to comply with the other requirements of Subchapter M of the U.S. Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required.

Accounting for uncertainty in income taxes establishes for all entities, including pass-through entities such as the Funds, a minimum threshold for financial statement recognition of the benefit of positions taken in filing tax returns (including whether an entity is taxable in a particular jurisdiction), and requires certain expanded tax disclosures. In accordance with

provisions set forth under U.S. GAAP, the Investment Manager has reviewed the Funds' tax positions for all open tax years. As of August 31, 2014, the Funds have recorded no liability for net unrecognized tax benefits relating to uncertain income tax positions they have taken. The Funds' federal tax returns for the prior three years remain subject to examination by the Internal Revenue Service.

**(e) Dividends and Distributions – Common Shares**

The Funds declare dividends from net investment income to common shareholders monthly. Distributions of net realized capital gains, if any, are paid at least annually. The Funds record dividends and distributions on the ex-dividend date. The amount of dividends from net investment income and distributions from net realized capital gains or return of capital is determined in accordance with federal income tax regulations, which may differ from U.S. GAAP. These book-tax differences are considered either temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal

income tax treatment. Temporary differences do not require reclassification. To the extent dividends and/or distributions exceed current and accumulated earnings and profits for federal income tax purposes, they are reported as distributions to shareholders from return of capital.

**(f) Convertible Securities**

It is the Funds' policy to invest a portion of their assets in convertible securities. Although convertible securities do derive part of their value from that of the securities into which they are convertible, they are not considered derivative financial instruments. However, certain of the Funds' investments in convertible securities include features which render them

**Table of Contents**

**Notes to Financial Statements**

AllianzGI Convertible & Income Funds

August 31, 2014 (unaudited)

**1. Organization and Significant Accounting Policies (continued)**

more sensitive to price changes in their underlying securities. The value of structured/synthetic convertible securities can be affected by interest rate changes and credit risks of the issuer. Such securities may be structured in ways that limit their potential for capital appreciation and the entire value of the security may be at risk of loss depending on the performance of the underlying equity security. Consequently, the Funds are exposed to greater downside risk than traditional convertible securities, but still less than that of the underlying stock.

**2. Principal Risks**

In the normal course of business, the Funds trade financial instruments and enter into financial transactions where risk of potential loss exists due to, among other things, changes in the market (market risk) or failure of the other party to a transaction to perform (counterparty risk). The Funds also are exposed to other risks such as, but not limited to, interest rate, credit and leverage risks.

Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. As nominal interest rates rise, the value of certain fixed income securities held by the Funds are likely to decrease. A nominal interest rate can be described as the sum of a real interest rate and an expected inflation rate. Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. Duration is used primarily as a measure of the sensitivity of a fixed income security's market price to interest rate (*i.e.* yield) movements. Interest rate changes can be sudden and unpredictable, and a Fund may lose money as a result of

movements in interest rates. A Fund may not be able to hedge against changes in interest rates or may choose not to do so for cost or other reasons. In addition, any hedges may not work as intended.

The Funds are exposed to credit risk, which is the risk of losing money if the issuer or guarantor of a fixed income security is unable or unwilling, or is perceived (whether by market participants, rating agencies, pricing services or otherwise) as unable or unwilling, to make timely principal and/or interest payments, or to otherwise honor its obligations. Securities are subject to varying degrees of credit risk, which are often reflected in credit ratings.

The market values of securities may decline due to general market conditions (market risk) which are not specifically related to a particular company, such as real or perceived adverse economic conditions, adverse changes in the general outlook for corporate earnings, changes in interest or currency rates, adverse changes to credit markets or adverse investor sentiment. They may also decline due to factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. Equity securities and equity-related investments generally have greater market price volatility than fixed income securities, although under certain market conditions fixed income securities may have comparable or greater price volatility. Credit ratings

downgrades may also negatively affect securities held by a Fund. Even when markets perform well, there is no assurance that the investments held by a Fund will increase in value along with the broader market. In addition, market risk includes the risk that geopolitical events will disrupt the economy on a national or global level.

**Table of Contents**

**Notes to Financial Statements**

AllianzGI Convertible & Income Funds

August 31, 2014 (unaudited)

**2. Principal Risks (continued)**

The Funds are exposed to counterparty risk, or the risk that an institution or other entity with which the Funds have unsettled or open transactions will default. The potential loss to the Funds could exceed the value of the financial assets recorded in the Funds' financial statements. Financial assets, which potentially expose the Funds to counterparty risk, consist principally of cash due from counterparties and investments. The Sub-Adviser seeks to minimize the Funds' counterparty risks by performing reviews of each counterparty and by minimizing concentration of counterparty risk by undertaking transactions with multiple customers and counterparties on recognized and reputable exchanges. Delivery of securities sold is only made once the Funds have received payment. Payment is made on a purchase once the securities have been delivered by the counterparty. The trade will fail if either party fails to meet its obligation.

The Funds are exposed to risks associated with leverage. Leverage may cause the value of the Funds' shares to be more volatile than if the Funds did not use leverage. This is because leverage tends to exaggerate the effect of any increase or decrease in the value of the Funds' portfolio securities. The Funds may engage in transactions or purchase instruments that give rise to forms of leverage. In addition, to the extent the Funds employ leverage, dividends and interest costs may not be recovered by any

appreciation of the securities purchased with the leverage proceeds and could exceed the Funds' investment returns, resulting in greater losses.

**3. Investment Manager/Sub-Adviser**

Each Fund has an Investment Management Agreement (each an "Agreement") with the Investment Manager. Subject to the supervision of each Fund's Board, the Investment Manager is responsible for managing, either directly or through others selected by it, the Funds' investment activities, business affairs and administrative matters. Pursuant to each Agreement, the Investment Manager receives an annual fee, payable monthly, at an annual rate of 0.70% of each Fund's average daily total managed assets. Total managed assets refer to the total assets of each Fund (including assets attributable to any Preferred Shares or other forms of leverage that may be outstanding) minus accrued liabilities (other than liabilities representing leverage).

The Investment Manager has retained the Sub-Adviser to manage the Funds' investments. Subject to the supervision of the Investment Manager, the Sub-Adviser is responsible for making all of the Funds' investment decisions. The Investment Manager, not the Funds, pays a portion of the fees it receives as Investment Manager to the Sub-Adviser in return for its services.

**4. Investment in Securities**

For the six months ended August 31, 2014, purchases and sales of investments, other than short-term securities were:

|                         | Purchases      | Sales          |
|-------------------------|----------------|----------------|
| Convertible & Income    | \$ 395,357,272 | \$ 378,700,093 |
| Convertible & Income II | 286,178,415    | 287,521,419    |

**34** Semi-Annual Report | August 31, 2014

**Table of Contents****Notes to Financial Statements**

AllianzGI Convertible &amp; Income Funds

August 31, 2014 (unaudited)

**5. Income Tax Information**

At August 31, 2014, the aggregate cost basis and net unrealized appreciation of investments for federal income tax purposes were:

|                         | Federal Tax      | Unrealized    | Unrealized      | Net           |
|-------------------------|------------------|---------------|-----------------|---------------|
|                         | Cost Basis       | Appreciation  | Depreciation    | Unrealized    |
|                         |                  |               |                 | Appreciation  |
| Convertible & Income    | \$ 1,097,188,580 | \$ 91,634,791 | \$ (38,226,766) | \$ 53,408,025 |
| Convertible & Income II | 839,863,440      | 71,453,414    | (29,317,151)    | 42,136,263    |

Differences between book and tax cost basis were attributable to wash sale loss deferrals and the differing treatment of bond premium amortization.

**6. Auction-Rate Preferred Shares**

Convertible & Income has 2,856 shares of Preferred Shares Series A, 2,856 shares of Preferred Shares Series B, 2,856 shares of Preferred Shares Series C, 2,856 shares of Preferred Shares Series D and 2,856 shares of Preferred Shares Series E outstanding, each with a liquidation preference of \$25,000 per share plus any accumulated, unpaid dividends.

Convertible & Income II has 2,192 shares of Preferred Shares Series A, 2,192 shares of

Preferred Shares Series B, 2,192 shares of Preferred Shares Series C, 2,192 shares of Preferred Shares Series D and 2,192 shares of Preferred Shares Series E outstanding, each with a liquidation preference of \$25,000 per share plus any accumulated, unpaid dividends.

Dividends are accumulated daily at an annual rate that is typically re-set every seven days. Distributions of net realized capital gains, if any, are paid annually.

For the six months ended August 31, 2014, the annualized dividend rates for the Funds ranged from:

|          | High  | Low    | At August 31, 2014 |
|----------|-------|--------|--------------------|
| Series A | 0.15% | 0.06%  | 0.135%             |
| Series B | 0.22% | 0.075% | 0.105%             |
| Series C | 0.14% | 0.06%  | 0.105%             |
| Series D | 0.14% | 0.06%  | 0.105%             |
| Series E | 0.18% | 0.08%  | 0.135%             |

The Funds are subject to certain limitations and restrictions while Preferred Shares are outstanding. Failure to comply with these limitations and restrictions could preclude the Funds from declaring or paying any dividends or distributions to common shareholders or repurchasing common shares and/or could trigger the mandatory redemption of Preferred Shares at their liquidation preference plus any accumulated, unpaid dividends.

Preferred shareholders, who are entitled to one vote per share, generally vote together with the common shareholders but vote separately as a class to elect two Trustees and on certain matters adversely affecting the rights of the Preferred Shares.

Since mid-February 2008, holders of auction-rate preferred shares ( ARPS ) issued by the Funds have been directly impacted by a lack of

---

**Table of Contents****Notes to Financial Statements**

AllianzGI Convertible &amp; Income Funds

August 31, 2014 (unaudited)

**6. Auction-Rate Preferred Shares (continued)**

liquidity, which has similarly affected ARPS holders in many of the nation's closed-end funds. Since then, regularly scheduled auctions for ARPS issued by the Funds have consistently failed because of insufficient demand (bids to buy shares) to meet the supply (shares offered for sale) at each auction. In a failed auction, ARPS holders cannot sell all, and may not be able to sell any, of their shares tendered for sale. While repeated auction failures have affected the liquidity for ARPS, they do not constitute a default or automatically alter the credit quality of the ARPS, and ARPS holders have continued to receive dividends at the defined maximum rate, equal to the 7-day AA Composite Commercial Paper Rate multiplied by a minimum of 150%, depending on the credit rating of the ARPS. The maximum rate is a function of short-term interest rates and typically higher than the rate that would have otherwise been set through a successful auction. On May 29, 2014, Moody's Investors Service upgraded each Fund's ARPS ratings to Aa3 from A1. As a result, the applicable multiplier for calculating the maximum rate decreased from 200% to 150% beginning on that date. If the Funds' ARPS auctions continue to fail and the maximum rate payable on the ARPS rises as a result of changes in short-term interest rates, returns for the Funds' common shareholders could be adversely affected.

**7. Common Shares Offering**

On December 4, 2012, the Securities and Exchange Commission declared effective a registration statement filed using the shelf registration process for each Fund. Pursuant to their shelf registrations, Convertible & Income and Convertible & Income II offered, from time to time, in one or more offerings, up to 10,700,000 and 9,600,000 common shares, respectively. The aggregate sale proceeds for the sales of the Convertible & Income's and Convertible & Income II's common shares were

subject to aggregate caps of \$135,000,000 and \$100,000,000, respectively. The Funds could not sell any of their common shares at a price below the net asset values of such common shares at the time of each sale, exclusive of any distribution commission or discount. However, each Fund was able to instruct its sales agent not to sell its common shares if the sales could not be effected at or above a price designated by the Fund, which may be inclusive of any distribution commission or discount. Any proceeds from the Funds' offerings of their common shares were invested in accordance with the Funds' investment objectives and policies as set forth in their effective registration statements. The Funds are no longer offering shares under their shelf registrations.

During the six months ended August 31, 2014, Convertible & Income sold 1,678,728 common shares. Proceeds from the offerings by Convertible & Income during the six months ended August 31, 2014 (net of commissions and fees) totaled \$16,959,259 and offering costs in connection with the sales of shares were \$16,983. Convertible & Income II did not sell any common shares during the six months ended August 31, 2014. During the year ended February 28, 2014, Convertible & Income and Convertible & Income II sold 7,635,105 and 7,869,665 common shares, respectively. Proceeds from the offering during the year ended February 28, 2014 (net of commissions and fees) and

offering costs in connection with the sales of shares aggregated \$72,694,937 and \$67,744,043, and \$214,454 and \$202,305, for Convertible & Income and Convertible & Income II, respectively.

#### **8. Payment from Affiliates**

During the six months ended August 31, 2014, the Sub-Adviser reimbursed AllianzGI Convertible & Income and AllianzGI Convertible & Income II \$166,674 and \$120,146, respectively, for realized losses resulting from trading errors.

**9. Subsequent Events**

In preparing these financial statements, the Funds' management has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued.

On September 2, 2014 the following monthly dividends were declared to common shareholders, payable October 1, 2014 to shareholders of record on September 12, 2014:

|                         |                          |
|-------------------------|--------------------------|
| Convertible & Income    | \$0.09 per common share  |
| Convertible & Income II | \$0.085 per common share |

On October 1, 2014 the following monthly dividends were declared to common shareholders, payable November 3, 2014 to shareholders of record on October 14, 2014:

|                         |                          |
|-------------------------|--------------------------|
| Convertible & Income    | \$0.09 per common share  |
| Convertible & Income II | \$0.085 per common share |

There were no other subsequent events identified that require recognition or disclosure.

| Portfolio turnover rate   | 33%                   | 79%                      | 39%      | 33%      | 52%      |

(1) Calculated on average shares outstanding.

(2) Less than \$(0.005) per common share.

(3) Less than \$0.005 per common share.

(4) Payment from affiliates increased the net asset value by less than \$0.01.

(5) Total investment return is calculated assuming a purchase of a common share at the market price on the first day and a sale of a common share at the market price on the last day of each period reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Total investment return does not reflect brokerage commissions or sales charges in connection with the purchase or sale of Fund shares. Total investment return for a period of less than one year is not annualized.

(6) Calculated on the basis of income and expenses applicable to both common and preferred shares relative to the average net assets of common shareholders.

(7) Inclusive of Reimbursement from Investment Manager of 0.01%.

(8) Inclusive of excise tax expense of 0.04%.

(9) Annualized.

- (1) Calculated on average shares outstanding.
- (2) Less than \$(0.005) per common share.
- (3) Payment from affiliates increased the net asset value by less than \$0.01.
- (4) Total investment return is calculated assuming a purchase of a common share at the market price on the first day and a sale of a common share at the market price on the last day of each period reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Total investment return does not reflect brokerage commissions or sales charges in connection with the purchase or sale of Fund shares. Total investment return for a period less than one year is not annualized.
- (5) Calculated on the basis of income and expenses applicable to both common and preferred shares relative to the average net assets of common shareholders.
- (6) Inclusive of Reimbursement from Investment Manager of 0.02%.
- (7) Annualized.

**Proxy Voting Policies & Procedures:**

A description of the policies and procedures that the Funds have adopted to determine how to vote proxies relating to portfolio securities and information about how the Funds voted proxies relating to portfolio securities held during the most recent twelve month period ended June 30 is available (i) without charge, upon request, by calling the Funds shareholder servicing agent at (800) 254-5197; (ii) on the Funds website at [us.allianzgi.com/closedendfunds](http://us.allianzgi.com/closedendfunds); and (iii) on the Securities and Exchange Commission's website at [www.sec.gov](http://www.sec.gov).

**Changes in Investment Policy:**

Effective March 11, 2014, the Funds rescinded their non-fundamental investment policy to maintain a weighted average maturity typically ranging from five to ten years with respect to the portion of their portfolio allocated to income-producing convertible securities.

**Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements (unaudited)**

AllianzGI Convertible & Income Funds

The Investment Company Act of 1940, as amended, requires that both the full Board of Trustees (the Trustees ) and a majority of the non-interested Trustees (the Independent Trustees ), voting separately, approve each Fund's Investment Management Agreement with the Investment Manager (the Advisory Agreements ) and Portfolio Management Agreement between the Investment Manager and the Sub-Adviser (the Sub-Advisory Agreements, and together with the Advisory Agreements, the Agreements ). The Trustees met in person on June 23-24, 2014 (the contract review meeting ) for the specific purpose of considering whether to approve the continuation of the Advisory Agreements and the Sub-Advisory Agreements. The Independent Trustees were assisted in their evaluation of the Agreements by independent legal counsel, from whom they received separate legal advice and with whom they met separately from Fund management during the contract review meeting.

In connection with their deliberations regarding the continuation of the Agreements, the Trustees, including the Independent Trustees, considered such information and factors as they believed, in light of the legal advice furnished to them and their own business judgment, to be relevant. As described below, the Trustees considered the nature, quality, and extent of the various investment management, administrative and other services performed by the Investment Manager or the Sub-Adviser under the applicable Agreement.

In connection with their contract review meeting, the Trustees received and relied upon materials provided by the Investment Manager which included, among other items: (i) information provided by Lipper Inc. ( Lipper ), an independent third party, on the total return investment performance (based on net assets) of the Funds for various time periods and the investment performance of a group of

funds with investment classifications/objectives comparable to those of the Funds identified by Lipper (the Lipper performance universe ), (ii) information provided by Lipper on the Funds' management fees and other expenses and the management fees and other expenses of comparable funds identified by Lipper, (iii) information regarding the investment performance and management fees for other funds and accounts managed by the Investment Manager and/or the Sub-Adviser with strategies that have similarities (but none of which are substantially similar) to those of the Funds, (iv) the estimated profitability to the Investment Manager from its relationship with the Funds for the one year period ended December 31, 2013, (v) descriptions of various functions performed by the Investment Manager and the Sub-Adviser for the Funds, such as portfolio management, compliance monitoring and portfolio trading practices, and (vi) information regarding the overall organization of the Investment Manager and the Sub-Adviser, including information regarding senior management, portfolio managers and other personnel providing investment management, administrative and other services to the Funds.

The Trustees' conclusions as to the continuation of the Agreements were based on a comprehensive consideration of all information provided to the Trustees and were not the result of any single factor. Some of the factors that figured particularly in the Trustees' deliberations are described below, although individual Trustees may have evaluated the information presented differently from one another, attributing different weights to various factors. The Trustees recognized that the fee arrangements for the Funds are in many cases the result of review and discussion in prior years between the Independent Trustees and the Investment Manager, that certain aspects of such arrangements may receive greater scrutiny in some years than in others, and that

**Table of Contents**

**Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements (unaudited) (continued)**

AllianzGI Convertible & Income Funds

the Trustees' conclusions may be based, in part, on their consideration of these same arrangements during the course of the year and in prior years.

Fund-specific performance results for the Funds reviewed by the Trustees are discussed below. The comparative performance information was prepared and provided by Lipper and was not independently verified by the Trustees. The Trustees reviewed, among other information, comparative information showing performance of each Fund against its respective Lipper performance universe for the one-year, three-year, five-year and ten-year periods ended March 31, 2014.

In addition, it was noted that the Trustees considered matters bearing on the Funds and their advisory arrangements at their meetings throughout the year, including a review of performance data at each regular meeting.

As part of their review, the Trustees examined the Investment Manager's and the Sub-Adviser's abilities to provide high-quality investment management and other services to the Funds. Among other information, the Trustees considered the investment philosophy and research and decision-making processes of the Sub-Adviser; the experience of key advisory personnel of the Sub-Adviser responsible for portfolio management of the Funds; the ability of the Investment Manager and the Sub-Adviser to attract and retain capable personnel; and the capability of the senior management and staff of the Investment Manager and the Sub-Adviser. In addition, the Trustees reviewed the quality of the Investment Manager's and the Sub-Adviser's services with respect to regulatory compliance and compliance with the investment policies of the Funds; the nature and quality of certain administrative services the Investment Manager is responsible for providing to the Funds; and conditions that might affect the Investment Manager's or the Sub-Adviser's ability to provide high quality

services to the Funds in the future under the Agreements, including each organization's respective financial condition and operational stability. Based on the foregoing, the Trustees concluded that the Sub-Adviser's investment process, research capabilities and philosophy were well suited to each of the Funds given their respective investment objectives and policies, and that the Investment Manager and the Sub-Adviser would be able to continue to meet any reasonably foreseeable obligations under the Agreements.

In assessing the reasonableness of each Fund's fees under the Agreements, the Trustees considered, among other information, each Fund's management fee and its total expense ratio as a percentage of average net assets attributable to common shares and as a percentage of total managed assets (including assets attributable to common shares and preferred shares outstanding combined), and the management fee and total expense ratios of peer expense groups of funds based on information provided by Lipper. The Fund-specific fee and expense results discussed below were prepared and provided by Lipper and were not independently verified by the Trustees.

The Trustees specifically took note of how each Fund compared to its Lipper peers as to performance and management fee and total net expenses. The Trustees noted that while the Funds are not charged a separate administration fee (recognizing that their management fee includes a component for administrative services), it was not clear in all cases whether the peer funds in the Lipper categories were separately charged such a fee by their investment managers, so that the total expense ratio (rather than any individual expense component) represented the

most relevant comparison. It was noted that the total expense ratio comparisons reflect the effect of expense waivers/reimbursements (although none exist for the Funds).

**42** Semi-Annual Report | August 31, 2014

**Table of Contents**

**Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements** (unaudited) (continued)

AllianzGI Convertible & Income Funds

**Convertible & Income**

The Trustees noted that the expense group for the Fund provided by Lipper consisted of a total of five closed-end funds, including the Fund. The Trustees also noted that average net assets of the common shares of the five funds in the expense group ranged from \$84.7 million to \$860.3 million, and that one of the funds in the group was larger in asset size than the Fund. The Trustees noted that the Fund was ranked second out of five funds in the expense group both for total expense ratio based on common share assets and for total expense ratio based on common share and leveraged assets combined, third out of five funds in the expense group for actual management fees based on common share assets, and tied for second out of five funds in the expense group for actual management fees based on common and leveraged assets combined in each case, (with funds ranked first having the lowest fees/expenses and ranked fifth having the highest fees/expenses in the expense group).

With respect to the Fund's total return performance relative to its Lipper performance universe (based on net asset value), the Trustees noted that the Fund had first quintile performance for the one-year, three-year and five-year periods ended March 31, 2014 and second quintile performance for the ten-year period ended March 31, 2014.

**Convertible & Income II**

The Trustees noted that the expense group for the Fund provided by Lipper consisted of a total of five closed-end funds, including the Fund. The Trustees also noted that average net assets of the common shares of the five funds in the expense group ranged from \$84.7 million to \$860.3 million, and that two of the funds in the group were larger in asset size than the Fund. The Trustees noted that the Fund was ranked first out of five funds in the expense group both for total expense ratio based on common share assets and for total expense ratio based on common share and leveraged assets combined, second out of five funds in the expense group

for actual management fees based on common share assets, and tied for second out of five funds in the expense group for actual management fees based on common and leveraged assets combined (with funds ranked first having the lowest fees/expenses and ranked fifth having the highest fees/expenses in the expense group).

With respect to the Fund's total return performance relative to its Lipper performance universe (based on net asset value), the Trustees noted that the Fund had first quintile performance for the one-year, three-year and five-year periods ended March 31, 2014 and third quintile performance for the ten-year period ended March 31, 2014.

In addition to their review of Fund performance based on net asset value, the Trustees also considered the market value performance of each Fund's common shares and related share price premium and/or discount information based on the materials provided by Lipper and management.

The Trustees were advised that the Investment Manager and the Sub-Adviser do not manage any funds or accounts, including institutional or separate accounts, with investment strategies and return profiles similar to those of the Funds. However, the Trustees considered the management fees charged by the Investment Manager and/or Sub-Adviser to other funds and accounts with strategies that have similarities (but none of which are substantially

## Edgar Filing: AllianzGI Convertible & Income Fund - Form N-CSRS

similar) to those of the Funds, including open-end funds and, in some cases, separate accounts, advised by the Sub-Adviser. The Trustees noted that the management fees paid by the Funds are generally higher than the fees paid by the Sub-Adviser's separate account clients. However, the Trustees were advised by the Sub-Adviser that it generally provides broader and more extensive services to the Funds in comparison to separate accounts, and incurs additional expenses in connection with the more extensive regulatory regime to which the Funds are subject in

August 31, 2014 | Semi-Annual Report **43**

**Table of Contents**

**Matters Relating to the Trustees' Consideration of the Investment Management & Portfolio Management Agreements** (unaudited) (continued)

AllianzGI Convertible & Income Funds

comparison to separate accounts generally. The Trustees noted that the management fees paid by the Funds are generally higher than the fees paid by the open-end funds offered for comparison but were advised by the Investment Manager that there are additional portfolio management challenges in managing the Funds, such as those associated with the use of leverage and attempting to meet a regular dividend.

The Trustees also took into account that the Funds have preferred shares outstanding, which increases the amount of management fees payable by the Funds under the Agreements (because each Fund's fees are calculated based on total managed assets, including assets attributable to preferred shares and other forms of leverage outstanding). In this regard, the Trustees took into account that the Investment Manager and the Sub-Adviser have a financial incentive for the Funds to continue to have preferred shares outstanding, which may create a conflict of interest between the Investment Manager and the Sub-Adviser, on one hand, and the Funds' common shareholders, on the other. In this regard, the Trustees considered information provided by the Investment Manager and the Sub-Adviser and related presentations as to why the Funds' use of leverage continues to be appropriate and in the best interests of the Funds under current market conditions. The Trustees also considered the Sub-Adviser's representation that it will use leverage for the Funds solely as it determines to be in the best interests of the Funds from an investment perspective and without regard to the level of compensation the Investment Manager or the Sub-Adviser receive.

Based on a profitability analysis provided by the Investment Manager, the Trustees also considered the estimated profitability to the Investment Manager from its relationship with each Fund and determined that such profitability did not appear to be excessive.

The Trustees also took into account that, as a general matter, as closed-end investment companies, the assets of the Funds will grow (if at all) principally through the investment performance of each Fund. However, the Trustees noted that each Fund had recently concluded an offering of its common shares through an at-the-market offering program, thereby growing its assets. The Trustees considered that, as the assets of the Funds grow, certain economies of scale and other efficiencies may be realized through spreading certain fixed costs across a larger asset base, but also took into account that the at-the-market offerings had not substantially increased the overall assets of the Funds.

Additionally, the Trustees considered so-called "fall-out benefits" to the Investment Manager and the Sub-Adviser, such as reputational value derived from serving as Investment Manager and Sub-Adviser to the Funds.

After reviewing these and other factors described herein, the Trustees concluded with respect to each Fund, within the context of their overall conclusions regarding the Agreements and based on the information provided and related representations made by management, that they were satisfied with the Investment Manager's and the Sub-Adviser's responses and efforts relating to the investment performance of the Funds. The Trustees also concluded that the fees payable under each Agreement represent reasonable compensation in light of the nature, extent and quality of services provided by the Investment Manager or Sub-Adviser, as the case may be. Based on their evaluation of factors that they deemed to be material, including those factors described above, the Trustees, including the Independent Trustees, unanimously concluded that the continuation of the Agreements with respect to each Fund was in the interests of the Fund and its shareholders, and should be approved.
