Consumer outage indices

Cemig (*Companhia Energética de Minas Gerais*), a listed company with securities traded on the stock exchanges of São Paulo, New York and Madrid, in compliance with CVM Instruction 358 of January 3, 2002 as amended, **hereby reports** to the Brazilian Securities Commission (CVM), the São Paulo Stock Exchange (Brasil, Bolsa, Balcão B3) and the market **as follows**:

There is no inexact or irregular aspect to the calculation of the DEC and FEC indicators of outage frequency and duration of Cemig's Distribution company, Cemig Distribuição S.A. (Cemig D).

These indicators, along with all the other regulatory indicators and parameters measured for Cemig, are the result of oversight and inspection carried out in accordance with habitual procedures of the Brazilian Electricity Industry regulator, Aneel. The limits specified by Aneel in the concession contracts of all distributors relate to the Internal DEC and FEC indicators i.e. those that are the responsibility of the local electricity distribution utility, and not the result of factors in the wider national grid system.

The Internal DEC and FEC indicators for 2016 and 2017, which quantify outages arising within Cemig D's distribution network in those years, complied with the limits set by the regulator, Aneel.

Aneel's responsibilities also include inspection and monitoring of compliance with regulatory requirements in all the technical, commercial and financial processes of all holders of electricity concessions, permissions and authorizations, throughout Brazil.

Cemig has been improving the quality of its services to clients continuously, each year; it was third-placed by the public among all concession holders in Brazil's Southeast with over 400,000 consumers, in Aneel's IASC Consumer Satisfaction Index for 2017.

PROPOSAL
BY THE BOARD OF DIRECTORS
TO THE
EXTRAORDINARY GENERAL MEETING OF STOCKHOLDERS
TO BE HELD ON APRIL 23, 2018 AT 3 P.M.

Dear Stockholders:

The Board of Directors of Companhia Energética de Minas Gerais - Cemig, in light of the following information and analysis:

Information:

- a) On October 26, 2017 an Extraordinary General Meeting of stockholders decided to increase the Company's share capital by up to one billion Reais, through issue of up to two hundred million new shares.
- b) The Company's share capital is R\$ 6,294,208,270.00 (six billion two hundred ninety four million, two hundred eight thousand two hundred seventy Reais), represented by 420,764,708 (four hundred twenty million seven hundred sixty four thousand seven hundred eight) nominal, common shares each with par value of R\$ 5.00 and 838,076,946 (eight hundred thirty eight million seventy six thousand nine hundred forty six) nominal preferred shares, each with par value of R\$ 5.00.
- c) The right to vote in a decision related to the Company's share capital is reserved exclusively to the common shares, and each share has the right to one vote in decisions of the general meeting of stockholders.
- d) The preferred shares have right of preference in the event of reimbursement of shares and shall have the right to a minimum annual dividend of the greater of:
10% (ten percent) of their nominal value, or
3% (three percent) of the value of the stockholders' equity corresponding to the shares.

- e) The common shares and the preferred shares have equal rights to distribution of bonuses.
- f) Stockholders have right of preference in subscription of capital increases and issues of the Company's securities, in accordance with the legislation.
- g) Decision on any change in the company's share capital, and consequent change to the by-laws, is a function of the General Meeting of Stockholders.
- h) The capital increase now proposed has the merit of providing the Company with a more robust capital structure, making it possible to reduce financial expenses associated with new financing transactions, and to reduce its financial leverage.
- i) The issue price has been set in accordance with the criteria established in Sub-item III of § 1 of Article 170 of Law 6404 of December 15, 1976 as amended, which is based on the weighted average market price of the preferred shares on the São Paulo securities exchange (B3 S.A.) in the period May 4, 2017 to August 31, 2017 (120 days), applying a discount of 20% on R\$ 8.22 (eight Reais and twenty two centavos), which is the weighted average quoted price for the preferred shares on the B3 in that period, which results in a price of price per share of R\$ 6.57 (six Reais and fifty seven centavos) per share.
- j) The discount is justified by the volatility of the Brazilian stock market, and aims to stimulate minority shareholders to take up their rights to the subscription avoiding any possibility that the capital increase might become impracticable in a situation of price depression or high volatility of the stock market during the subscription preference period.

Av. Barbacena 1200	Santo			Tel.: +55 31	Fax +55 31
	Agostinho	30190-131	Belo Horizonte, MG	Brazil	3506-5024 3506-5025

This text is a translation, provided for information only. The original text in Portuguese is the legally valid version.

- k) From the economic point of view the discount was practically neutral, since the stockholders were able to subscribe the issue or sell their first refusal right. The practical effect is of dividing the same group of assets between a larger number of shares, causing no adverse effect for the Company, nor for its stockholders, nor for the market, which adjusts automatically.
- l) Existing stockholders were given first refusal right to subscribe the new shares in proportion to those they held at that time.
- m) The shares subscribed had full rights to all the benefits, including dividends and/or Interest on Equity, to be declared by the Company.
- n) With the new share subscription of R\$ 999,554,735.00 (nine hundred ninety nine million five hundred fifty four thousand seven hundred thirty five Reais), the share capital of the company will increase from R\$ 6,294,208,270.00 (six billion two hundred ninety four million, two hundred eight thousand two hundred seventy Reais), to R\$ 7,293,763,005.00 (seven billion two hundred ninety three million seven hundred sixty three thousand and five Reais).
- o) This capital increase will provide for subscription of 199,910,947 (one hundred ninety nine million nine hundred ten thousand, nine hundred forty seven) new shares, each with par value of R\$ 5.00 (five Reais), of these, 66,849,505 (sixty six million eight hundred forty nine thousand five hundred five) common shares and 133,061,442 (one hundred thirty three million sixty one thousand four hundred forty two) preferred shares, at the price of R\$ 6.57 (six Reais and fifty seven centavos) per share.
- p) The capital increase will enable the Company to obtain proceeds of a minimum of R\$1,313,414,921.79 (one billion three hundred thirteen million four hundred fourteen thousand nine hundred twenty one Reais and seventy nine centavos). Any amount that exceeds R\$ 999,554,735.00 (nine hundred ninety nine million five hundred fifty four thousand seven hundred thirty five Reais) will be allocated to the Capital reserve account.
- q) The potential dilution resulting from the issue, for those stockholders who did not subscribe to the issue, was 13.704239283% for the common shares and for the preferred shares.
- r) The Company's stockholders were able to exercise their preference right to subscription in the period from October 30, 2017 to November 29, 2017, in the proportion of 15.887624200% in relation to the shares of the same type that they hold at the close of October 26, 2017, the date of the Extraordinary General Meeting of

Stockholders that decided on that subject.

- s) Stockholders not wishing to exercise their rights of first refusal for the subscription had the opportunity to assign those rights or trade them on a securities exchange.
- t) Stockholders who opted to subscribe shares that were not subscribed in these initial stages (the Leftover Shares) were able to subscribe them, at the same price and on the same conditions, exclusively on the following dates:
 - 1st apportionment: December 5 - 7, 2017, in proportion to shares subscribed in the preference period; and
 - 2nd apportionment: December 14 - 28, 2017, in proportion to shares subscribed in the preference period.
- u) The shares subscribed were paid up simultaneously with their subscription, in cash, and represent an entry of capital into the Company's cash position, totaling R\$1,215,453.26 (one billion two hundred fifteen million two hundred twenty three thousand four hundred fifty-three Reais and twenty six centavos).
- v) The Leftover Shares were equivalent by volume to 7.48% of the issue.

Analysis:

- a) The shares not subscribed, after the two periods of apportionment initially provided for, are to be sold on a stock exchange to the benefit of the Company, which is optional under Sub-clause b of § 7 of Article 171 of Law 6404/1976, transcribed below:
- § 7 In a listed company, the body that decides on an issue by private subscription shall decide on leftover shares not subscribed, and may:
- a) order them to be sold on a stock exchange, to the Company's benefit; or
- b) share them out, in the proportion of the amounts subscribed, among the stockholders that have requested a reservation of leftover shares, in the subscription bulletin or list; in this event, the condition shall be stated in the subscription bulletins or lists and the balance thus not shared out shall be sold on the stock exchange, in accordance with the prior sub-clause.
- b) Sale of Leftovers in a volume higher than 5% of the issue and less than 1/3 of the shares in circulation on stock exchanges is characterized as a primary public offering of shares and must be preceded by a simplified application for registry to the CVM, under § 1 of Article 6 of CVM Instruction 400.
- c) The CVM has up to 20 (twenty) business days from the filing of the request for registry to make statement on the request, and registry shall be obtained automatically if the CVM does not make statement in that period, as per Article 8 of CVM Instruction 400.
- d) However, Sub-item II of Article 5 of that instruction states that registry will automatically be dispensed with, without the need for formulation of the Request specified in Article 4, in the event of a public offering for distribution of a single, indivisible, lot of securities.
- e) In this context, and considering the interest of the Company in confirming and ratifying the capital increase as soon as possible, it becomes important to sell all the common and preferred shares not prescribed, in a single and indivisible lot by a Special Auction on the Stock Exchange (B3) (the Auction).
- f) The CVM, by Formal Letter 48/2018/CVM/SEP/GEA-3, of March 12, 2018, has verified that there is no obstacle to the format of the auction in a single indivisible lot, under the terms of Sub-item II of Article 5 of

CVM Instruction 400.

- g) The shares not subscribed, that is to say 13,129,679 (thirteen million one hundred twenty nine thousand six hundred seventy nine) common shares and 1,815,750 (one million eight hundred fifteen thousand seven hundred fifty) preferred shares, to be sold on the B3, to the benefit of the Company, are likely to provide an additional inflow of cash to the Company of at least R\$ 98,191,468.53 (ninety eight million one hundred ninety one thousand four hundred sixty eight Reais and fifty three centavos).
- h) The sale of the Leftover Shares, by the Auction, must follow the rules specified in the Operational Procedures Manual and Regulations of the B3. The minimum price per share must necessarily be R\$6.57 (six Reais and fifty seven centavos), that is to say the same price set at the time of the approval of the Company's capital increase.
- i) A securities broker authorized to operate on the B3 must represent the Company in the Auction. Investors who wish to take part in the Auction must find a broker to represent them.
- j) The small volume of shares that it is intended to sell by Auction (equal to 7.48% of the issue, 2.77% of the voting stock, 0.19% of the non-voting stock and 1.04% of the total capital) should not influence the market price of Cemig's shares, since the amount is little above the average daily trading volume of the Company's shares (R\$ 83 million) on the B3 in the last 60 (sixty) days.
- k) The shares offered in the Auction will be represented by subscription receipts up to the time of verification and ratification of the capital increase by the General Meeting of Stockholders.

- l) During the Auction, third party vendors will not be allowed to enter the trading; only purchasers bidding for the entire single lot offered will be allowed to operate.
- m) The Company intends to sell the shares not yet subscribed in a single indivisible lot, by Auction, by March 19, 2018.
- n) After financial settlement of the Auction, which will take place on the third business day after it is held, the brokerage company shall transfer the proceeds of the sale, net of charges, to a current account in the name of Cemig; and
- o) Within up to 4 (four) business days after the date of the Extraordinary General Meeting of Stockholders to be called for the purpose of confirming and approving the said capital increase, the Company will announce the date for credit of the shares subscribed.

do now propose to you as follows:

I Verification and approval of increase in the Company's share capital, from R\$ 6,294,208,270.00 (six billion two hundred ninety four million, two hundred eight thousand two hundred seventy Reais), to R\$ 7,293,763,005.00 (seven billion two hundred ninety three million seven hundred sixty three thousand and five Reais), through issue and subscription of 199,910,947 (one hundred ninety nine million nine hundred ten thousand nine hundred forty seven) new shares, each with par value of R\$ 5.00 (five Reais), comprising 66,849,505 (sixty six million eight hundred forty nine thousand five hundred five) common shares and 133,061,442 (one hundred thirty three million sixty one thousand four hundred forty two) preferred shares.

II Approval of the consequent alteration of the head paragraph of Clause 4 of the by-laws, which shall now have the following drafting:

Clause 4 The Company's share capital is R\$ 7,293,763,005.00 (seven billion two hundred ninety three million seven hundred sixty three thousand and five Reais), represented by:

- a) 487,614,213 (four hundred eighty seven million six hundred fourteen thousand two hundred thirteen) nominal common shares, each with par value of R\$ 5.00;

- b) 971,138,388 (nine hundred seventy one million one hundred thirty eight thousand three hundred eighty eight) nominal preferred shares, each with par value of R\$ 5.00.

As can be seen, the objective of this proposal is to meet the legitimate interests of the stockholders and of the Company, and for this reason it is the hope of the Board of Directors that it will be approved.

In view of the above, Cemig GT hereby declares itself impeded from making statements or voting in the governance bodies of Renova on any decision in relation to the said binding proposal.

Comments on the various consumer categories:

Residential

Consumption by captive *residential* users of Cemig D in 2017, at 10,008,423 MWh, was 0.93% more than in 2016. Average monthly consumption per consumer in 2017 was 123.8kWh/month, or 124.6% lower than the average for 2016 (124.6 KWh/month).

Industrial

Electricity used by captive *industrial* clients of Cemig D totaled 2,610,534 MWh in 2017 or 18.29% less than in 2016. Cemig D transported a total of 16,417,047 MWh for Free Clients in 2017.

Commercial

Total consumption by the captive clients of Cemig D in the *commercial* category totaled 5,252,799 MWh, or 8.03% less than in 2016, mainly because of the adverse conditions of the economy, with lower disposable family incomes and lower economic activity in the other private and public sectors of the economy. The increased consumption in the Free Market relates to the addition of 191 new consumers.

The electricity market of Cemig GT

Cemig GT billed a total of 29,553,715 MWh in 2017, 2.2% higher than in 2016.

The number of clients billed by Cemig GT 1,243 clients was 19.5% higher than in December 2016. Of these: 1,176 were in the *industrial*, *commercial* and *rural* categories, 47 were distribution companies, and 20 were traders, generators and independent power producers.

Free Clients *industrial*, *commercial* and *rural* consumed 15,807,993 MWh in 2017, or 55.2% of the total electricity provided by Cemig GT, and 3.2% less than in 2016.

This lower figure reflects consumption by *industrial* clients 12.4% lower year-on-year, due to: (i) some industrial clients terminating contracts with Cemig GT and signing new contracts with Cemig subsidiary companies; and (ii) low consumption by industrial clients, due to the economic context in Brazil, and also worldwide.

Between the end of 2016 and the end of 2017 Cemig GT added 50 new industrial clients, 1 rural client and 166 clients in the *commercial* and *services* category in the latter, the year-on-year increase in consumption was 167.5%.

Sales and trading transactions in electricity with other agents of the electricity sector in the Free Market result from development of trading opportunities that often originate from spot market contracts. In 2017 total sales of electricity were 10,350,371 MWh, or 3.0% more than in 2016.

Sales in the Regulated Market in 2017, including sales to Cemig D, totaled 2,490,635 MWh, or 2.6% less than in 2016, due to a lower volume of contracts with distributors.

Total revenue from supply of electricity in 2017 was R\$ 23.701 billion, 1.16% higher than in 2016 (R\$ 23.430 billion).

Final consumers

Total revenue from electricity sold to final consumers, excluding Cemig's own consumption, in 2017 was R\$ 20.438 billion, or 0.10% less than the figure for 2016, of R\$ 20.458 million.

The main factors in this revenue were:

Higher revenues from the Flag Tariff components of customer bills: R\$ 454 million in 2017, compared to R\$ 360 million in 2016. This reflects the low level of reservoirs, activating the Yellow Flag and Red Flag additional tariff rates, leading to higher revenue, in 2017.

The volume of electricity sold in 2017 was 1.36% lower than in 2016.

The annual tariff adjustment for Cemig D effective May 28, 2016 (full effect in 2017), with average (upward) effect on consumer tariffs of 3.78%.

The Annual Tariff Adjustment for Cemig D effective May 28, 2017, with average *negative* effect on consumer tariffs of 10.66%.

Revenue from use of distribution systems (the TUSD charge)

This is revenue from charging Free Consumers the Tariff for Use of the Distribution System (*Tarifa de Uso do Sistema de Distribuição*, or TUSD). This was R\$ 1.611 billion in 2017, or 5.56% more than in 2016 (R\$ 1.705 billion).

The main factors affecting revenue from use of the network in 2017, and its comparison with 2016, were:

Reduction of 0.52% in the tariff for Free Consumers, given in the annual tariff adjustment of May 28, 2016.

Reduction, in the 2017 Annual Tariff Adjustment, of approximately 40% in the TUSD, effective May 28, 2017.

CVA and Other financial components in tariff adjustment

The Company recognizes the difference between actual non-controllable costs (in which the *CDE*, and *electricity bought for resale*, are significant components) and the costs that were used as the basis of decision on the rates charged to consumers. The amount of this difference is passed through to clients in Cemig D's next tariff adjustment in 2017 this represented a gain in revenue of R\$ 988 million, compared to a reduction in 2016 of R\$ 1.455 billion. The difference mainly reflects higher costs of power supply acquired in auctions in 2017 (in 2016 there was a reduction in these costs), in relation to the figures for costs used as the basis for tariffs this generated a financial asset for the Company, which also represents the amount to be restituted to consumers in the next tariff adjustment.

Transmission Indemnity Revenue

The transition indemnity revenue, in Cemig GT, was R\$ 373 million in 2017, compared to R\$ 751 million in 2016. In the previous year, as a result of the Mining and Energy Ministry setting the criteria for updating of the transmission indemnity, a posting was made, backdated to 2013, of the amount of the updating of the indemnity receivable based on the regulatory cost of own capital, which had a significant impact on the revenue reported.

We highlight the amount of R\$ 149 million recorded in 2017 for the backdated difference of transmission concession assets the values of which were not included in the calculation basis for revenues in the previous tariff reviews.

Aneel Normative Resolution 589, of December 10, 2013, set the criteria for calculation of the New Replacement Value (*Valor Novo de Reposição*, or VNR) of the transmission facilities, for the purposes of indemnity.

On August 16, 2016 Aneel, by its Dispatch 2181, ratified the amount of R\$ 892 million, in currency of November 2012, for the portion of the reversible assets not yet amortized, for the purposes of indemnity to Cemig GT. On April 22, 2016 the Mining and Energy Ministry published its Ministerial Order 120, setting the deadline and method of payment for the remaining amount of the indemnity. This Order determined that the amounts ratified by Aneel should become part of the Regulatory Remuneration Asset Base (*Base de Remuneração Regulatória*, or BRR), and that the cost of capital should be added to the related Permitted Annual Revenues (RAP).

The portions of remuneration and depreciation not paid in the period from the extensions of the concessions up to the tariff-setting process of 2017, in the amount of R\$1,095 million, are to be updated by the IPCA inflation index and remunerated at the real cost of capital of the transmission segment of the industry, as decided by Aneel in the methodologies for Periodic Tariff Reviews of revenues for existing concession holders – this is currently 10.44% per year, to be paid over eight years by reimbursement through the RAP.

Adjustment to Remuneration Base of the transmission assets – Aneel Technical Note 183/2017.

In the tariff review processes of Cemig GT, ratified on June 23, 2009 (backdated to July 1, 2005) and June 8, 2010 (backdated to July 1, 2009), certain conducting cables, which have been the subject of an application by the Company, were not included in the tariff calculation. Cemig GT applied for inclusion of these assets in the Remuneration Assets Base (BRR) and, consequently, for backdated calculation of the amounts not considered in the prior tariff reviews.

Aneel ruled in favor of this application, and calculated the differences between the amounts of revenue ratified in the above-mentioned tariff reviews and the new values calculated for inclusion of those conducting cables for the period from July 2005 through December 2012. Updated, these amounts were calculated to total R\$ 149 million, at July 2017 prices, to be received by Cemig GT over the next 12 months. At December 31, 2017, the amount receivable was R\$ 75 million.

Indemnity of transmission assets: injunction awarded to industrial consumers

On April 10, 2017, an interim court remedy was granted to the Brazilian Large-scale Free Consumers Association (*Associação Brasileira de Grandes Consumidores Livres*), the Brazilian Auto Glass Industry Technical Association (*Associação Técnica Brasileira das Indústrias Automáticas de Vidro*) and the Brazilian Ferro-alloys and Silicon Metal Producers Association (*Associação Brasileira dos Produtores de Ferroligas e de Silício Metálico*) in their legal action against Aneel and the federal government requesting suspension of the effects on their tariffs of payment of the indemnity for transmission assets payable to agents of the electricity sector who accepted the terms of Law 12783/2013.

The preventive remedy was partial, with effects related to suspension of inclusion in the consumer tariffs paid by members of these associations – members of the portion of the indemnity corresponding to the remuneration at cost of capital included since the date of extension of the concessions – at December 31, 2017 this amounts to R\$ 299 million.

Complying with the court decision, Aneel, in its Technical Note 183/201-SGT/ANEEL of June 22, 2017, presented the new calculation, excluding the amounts that refer to the cost of own capital. Cemig GT believes that this is a provisional decision, and that its right to receive the amount referring to the assets of Basic National Grid (RBSE) is guaranteed by law, so that no adjustment to the amount posted at December 31, 2017 is necessary.

Cemig GT expects to receive in full the credits receivable in relation to the transmission indemnity, and has calculated the following amounts as indemnity:

Generation Indemnity Revenue

In 2017 the Company recognized revenue of R\$ 272 million for the adjustment to the balance not yet amortized of the concessions for the *São Simão* and *Miranda* hydroelectric plants, as per Ministerial Order 291/17.

Concessions of *Jaguara*, *São Simão*, *Miranda* and *Volta Grande* hydroelectric plants

Under Concession Contract 007/1997 the concessions of the *Jaguara*, *São Simão*, *Miranda* and *Volta Grande* hydroelectric plants, operated by the subsidiary Cemig GT, had expiration dates in August 2013, January 2015, December 2016 and February 2017, respectively.

In spite of the fact that there were court proceedings still pending, involving the São Simão, Jaguará and Miranda plants, on September 27, 2017 the federal government auctioned the concessions for the São Simão, Jaguará, Miranda and Volta Grande plants which had all previously belonged to Cemig GT. (The concession contract of the Volta Grande plant had an expiry date in February 2017). The new concession contracts were signed on November 10, 2017, and on this date extension of the periods of Assisted Operation was formalized, maintaining Cemig GT as the party responsible for provision of electricity generation service from the plants up to the following dates:

Volta Grande plant: Until November 30, 2017.

Jaguará and Miranda plants: Until December 28, 2017.

São Simão plant: Until May 9, 2018.

The Annual Generation Revenue (*Receita Anual de Geração*, or RAG) of these plants was recognized, in the amount of R\$ 462 million, in 2017 (R\$ 319 million in 2016).

On August 3, 2017 Mining and Energy Ministry Order 291/17 established the values of indemnity, payable to Cemig GT, for the investments made in the São Simão and Miranda plants that have not been amortized up to the end of the contract. The total amount of the indemnity is R\$ 1.028 billion, of which R\$ 244 million relates to indemnity for the São Simão Plant, and R\$ 784 million is for indemnity for the Miranda Plant these figures being expressed in December 2015 and February 2016 currency, respectively. The amounts will be updated, *pro rata die*, by the Selic Reference Rate for Federal securities.

The balances not yet amortized of the concessions of the São Simão and Miranda Plants, in relation to their Basic Plans, were adjusted to reflect the matters decided by Ministerial Order 291/17. As a result revenue of R\$ 272 million was recognized in the year.

Cemig GT is discussing, with the Mining and Energy Ministry, the criteria used for deciding the amount published in Ministerial Order 291/17, and also the date of payment, since that Order establishes that the payment of the indemnity must be made, by the federal government, on or before December 31, 2018, provided that there is budget and financial availability.

Revenue from transactions in the Wholesale Trading Market (CCEE)

Revenue from electricity sales on the CCEE (*Câmara de Comercialização de Energia Elétrica*) in 2017 was R\$ 860 million, compared to R\$ 161 million in 2016 an increase of 435.02%. The change mainly reflects:

the spot price (*Preço de Liquidação de Diferenças*, or PLD) 244.28% higher year-on-year, at R\$ 324.17/MWh in 2017, vs. R\$ 91.16/MWh in 2016;

the higher quantity of electricity available for settlement in the wholesale market in 2017.

Revenue from supply of gas

Cemig reported revenue from supply of gas totaling R\$ 1.759 billion in 2017, compared to R\$ 1.444 billion in 2016 an increase of 21.81%. This basically reflects volume of gas sold 23.72% higher YoY (1,319,242m³ in 2017, vs. 1,066,351m³ in 2016).

Total	4,076.33	4,196.74	3,875.24	2,913.53	3,614.36

There was a recovery of activity in the *industrial* user category, the largest in Gasmig's market, with higher consumption by companies in the metallurgy sector.

Supply of gas to the residential market, which began in 2013, totaled 30,605 households invoiced in December 2017 compared to 14,935 on December 31, 2016.

Sector / regulatory charges reported as Deductions from revenue

Taxes and charges applied to operational revenue in 2017 were R\$ 11.151 billion, or an increase of 6.23% from 2016 (R\$ 10.497 billion).

ICMS tax

This expense in 2017 was R\$ 5.847 billion in 2017, vs. R\$ 5.211 billion in 2016. The increase primarily represents Cemig adhering, in October 2017, to the *Minas Gerais State Tax Credits Regularization Plan* (PRCT), and by doing so settling a specific tranche of ICMS tax. The effects of this agreement were recognized in the profit and loss account in 2017 as R\$ 562 million in Deductions from revenue; R\$ 31 million as Financial expenses; and R\$ 1 million as Operational expenses.

Consumer charges the Flag Tariff system

Charges to the consumer arising from the Tariff Flag system were higher, at R\$ 454 million, in 2017, compared to R\$ 360 million in 2016, due to the low levels in the reservoirs' water storage levels which activated the Yellow Flag and Red Flag tariffs, leading to higher charges to the consumer.

Operational costs and expenses

Operational costs and expenses totaled R\$ 18.817 billion in 2017, or 18.32% more than in 2016 (R\$ 15.903 billion).

The following paragraphs comment on the main variations:

Electricity purchased for resale

The expense on electricity bought for resale in 2017 was R\$ 10.920 billion, or 32.00% more than in 2016 (R\$ 8.273 billion). The main factors in the higher figure are:

Cemig D:

The expense on electricity bought for resale in 2017 was R\$ 6.783 billion, or 28.95% more than in 2016 (R\$ 5.260 billion). The main factors are:

Expense on power supply acquired in auctions 38.86% higher in 2017, at R\$ 3.591 billion, compared to R\$ 2.586 billion in 2016. This is mainly due to activation of the thermoelectric generation plants in 2017, due to the low level of water in the reservoirs of the hydroelectric plants of the system, with consequent increase in expense on fuel for the thermal plants.

The expense on electricity from Itaipu Binacional was 8.65% higher, at R\$ 1.243 billion in 2017, compared to R\$ 1.144 billion in 2016. The change basically reflects the increased tariff which was US\$ 25.78/kW-month in 2016, and US\$ 28.73/kW-month as from January 2017.

Expense on power supply acquired in spot market 88.53% higher, at R\$ 1.282 billion in 2017, compared to R\$ 680 million in 2016, basically reflecting the strong increase in average spot price: R\$ 324.17/MWh in 2017, vs. R\$ 94.16/MWh in 2016.

Cemig GT:

The expense on electricity purchased for resale in 2017 was R\$ 4.170 billion, 36.63% more than the figure of R\$ 3.052 billion in 2016. This mainly reflects electricity purchased for resale 19.41% higher in 2017 (at 22,690,422 MWh) than in 2016 (19,002,578 MWh), and by the increase of 14.43% on the average price per MWh (R\$ 183.78 in 2017, compared to R\$ 160.62 in 2016).

Operating provisions

Operational provisions in 2017 totaled R\$ 854 million, compared to R\$ 704 million in 2016.

Notes on contingencies:

Provisions for doubtful receivables were lower, at R\$ 248 million in 2017, compared to R\$ 382 million in 2016.

The provision for employment-related legal actions was higher, at R\$ 206 million in 2017, vs. R\$ 120 million in 2016. The increase in the amount provisioned reflects re-evaluations of potential losses in certain actions as a result of the change in the procedural phase to provisional execution, in relation to actions disputing: the basis for calculation of hazardous work remuneration; claims for equal payment for allegedly unlawful outsourcing; and subsidiary/joint liability.

Default

With the Brazilian macro context of lower economic activity, which created unemployment and inflation, the adverse hydrological situation, and the increase in tariffs, which had been held down, Cemig has experienced higher than average growth in the total debt owed by clients. The good news is that Cemig's confronting of default in 2017 has already reduced the index of default in recent months.

To combat a record level of default, in 2017 Cemig redoubled efforts to receive payment from customers in arrears with their electricity bills. An additional budget has been approved for efforts to recover the losses of revenue. Some results have already been achieved. Since December 2016 there has been no significant increase in the default percentages, showing that this situation is being brought under control. We expect to see a more consistent decline in the percentages from now on.

The average indicator of default was reduced by 12.65% from December 2016 to December 2017. From the end of September to the end of December 2017 the reduction was 8.28%.

The Company uses various tools of communication and collection to prevent increase in default. Measures used include contact by telephone, email, collection requests by text and by letter, negative posting on credit registers, collection through the courts and, principally, disconnection of supply. Aneel Resolution 414 allows supply to be cut off after 15 days from receipt of a notice to the defaulting consumer.

As well as these various collection tools, in 2017 Cemig launched a campaign offering special conditions for negotiation and re-negotiation for low-voltage consumers, hospitals and public authorities.

The Company is confident that with more intense collection and disconnection the levels of default will be reduced in 2017.

Personnel

The expense on personnel was R\$ 1.627 billion in 2017, 0.99% less than in 2016 (R\$ 1.643 billion).

Gas bought for resale

In 2017 the Company recorded an expense of R\$ 1.071 billion on acquisition of gas. This was 22.06% higher than the comparable expense of R\$ 877 million in 2016. This mainly reflects a volume of gas bought for resale 23.11% higher (at 1,309,459m³ in 2017, vs. 1,063,677m³ in 2016), partially offset by lower charges under the new agreement between Gasmig and Petrobras, which reduced the daily gas offtake obligation.

Equity method gains in non-consolidated investees

In 2017 Cemig posted a net equity method loss of R\$ 252 million, which compares with a net loss of R\$ 302 million in 2016. This variation is mainly due to the better results with equity pickup from Light in 2017, which represented a gain of R \$ 35 million compared to a loss of R \$ 121 million in 2016. Despite the lower equity loss, Renova and the Santo Antônio plant reported losses of R \$ 390 million and R \$ 204 million in 2017, respectively.

Financial revenue and expenses

Cemig posted net financial expenses in 2017 of R\$ 997 billion, compared to net financial expenses of R\$ 1.437 billion in 2016. The main factors are:

Costs and charges on loans and financings 20.91% lower, at R\$ 1.467 billion in 2017, compared to R\$ 1.860 billion in 2016. This was due mainly to the increase of debt indexed to the CDI Rate, and the lower

value of the CDI rate the indexor for the debt: the CDI rate was 9.93% in 2017, compared to 14.06% in 2016.

The result of FX variations in the year was lower: a net expense of R\$ 53 million in 2017, compared to a new gain of R\$ 26 million in 2016. This basically arises from an expense of R\$ 57 million in Cemig GT in 2017 resulting from raising of funds indexed to the US dollar (Eurobonds);

Expense on monetary updating of loans and financing 55.62% lower, at R\$ 109 million in 2017, compared to R\$ 245 million in 2016 due to the much lower IPCA inflation index in the year (2.95% in 2017, vs. 6.29% in 2016).

Higher revenue from monetary variation on the CVA balances and *Other financial components* of tariffs: R\$ 42 million in 2017, vs. R\$ 204 million in 2016 the 2016 figure contained an effect from ratification of the CVA amount by Aneel, in May 2016.

Lower revenue from short-term financial investments: R\$ 205 million in 2017, 35.34% less than in 2016 (R\$ 317 million). This basically reflects the lower CDI rate in the year (9.93% in 2017, vs. 14.06% in 2016).

Higher monetary updating of tied funds: R\$ 191 million in 2017, compared to R\$ 46 million in 2016. In 2017 the Company recognized a revenue item of R\$ 82 million, for reversal of the provision for the lawsuit challenging the constitutionality of the inclusion of ICMS tax (payable or paid) *within* the calculation of the Pasep and Cofins taxes on revenue.

There was an expense of R\$ 46 million in 2017, for monetary adjustment on the pre-sale of power supply under a contract to bring forward power supply sales during the year.

Electricity losses 2017

Control of electricity losses is one of Cemig D's strategic objectives, and the Company has a structure dedicated to this: its Distribution Losses Measurement and Control Management Unit. Compliance with the target is monitored monthly, and measured by the Distribution Total Losses Index (Índice de Perdas Totais da Distribuição, IPTD). In the decision on the regulatory target, taken during the 3rd Tariff Review Cycle, the regulator, Aneel, made significant changes in the method of calculation of technical losses, imposing extremely challenging limits for Cemig D. The parameter Total losses comprises two components: (i) Technical losses, and (ii) Non-technical losses. The indicators for measurement of the two components: are the PPTD (Distribution Technical Losses Percentage); and the PPNT (Distribution Non-technical Losses Percentage).
