**Interim Report as of June 30, 2005**  
Bayer Stockholders Newsletter 2005

**Dynamic sales and earnings growth continues**

Sales advance by 20 percent to more than 7 billion in the second quarter

Underlying EBIT up 39 percent

HealthCare and MaterialScience post substantially higher earnings

Group net income almost tripled to 406 million

Full-year 2005 guidance raised significantly

**Overview of Sales, Earnings and Financial Position**

Bayer turned in a strong performance in the second quarter. We further improved all major business indicators for the Group, bringing us another step closer to meeting our profitability targets.

Group sales rose 19.7 percent year on year, to 7,053 million. Adjusted for currency and portfolio effects, sales increased by 11.2 percent. The growth in business resulted mainly from continuing high demand for the products of our MaterialScience subgroup, which succeeded in raising selling prices considerably compared with the second quarter of 2004. The HealthCare business also grew strongly. CropScience has not yet met our high expectations.

**Table of Contents**

**Interim Report as of June 30, 2005**

Bayer Stockholders Newsletter 2005

The pleasing overall business trend led to a considerable improvement in the second-quarter operating result. EBIT before special items increased 38.5 percent to 852 million, driven by higher margins at MaterialScience and HealthCare along with additional cost savings and efficiency improvements. The continued drought in Brazil and southern Europe hampered business development in the CropScience subgroup, where underlying EBIT declined. Bayer Group EBITDA before special items advanced 15.0 percent to 1,285 million.

Second-quarter earnings were impacted by net special charges of 106 million (2004: 105 million), including 74 million in litigation-related charges, 25 million in restructuring expenses at CropScience, and 17 million in integration costs for the consumer health business acquired from Roche.

Second-quarter EBIT after special items climbed by 46.3 percent to 746 million (2004: 510 million). EBITDA also increased considerably in the same period, rising 16.0 percent to 1,179 million (2004: 1,016 million). After deducting the non-operating result of minus 129 million (2004: minus 214 million), pre-tax income came to 617 million (2004: 296 million). Group net income after income taxes and minority interests including after-tax income from discontinued operations increased significantly to 406 million (2004: 146 million).

**Table of Contents**

**Interim Report as of June 30, 2005**

Bayer Stockholders Newsletter 2005

The improvement in second-quarter EBIT lifted gross cash flow by 27.5 percent to 908 million (2004: 712 million). Although the volume of business remained high, we reduced working capital slightly compared with the first quarter. Net cash flow came to 1,015 million (2004: 1,075 million).

We also recorded a gratifying operating performance for the first six months as a whole. Sales advanced by a substantial 17.8 percent to 13,757 million. EBIT before special items rose to 1,994 million (+44.9 percent), with reported EBIT also showing a substantial year-on-year improvement to 1,750 million (+38.4 percent). EBITDA increased 16.5 percent in the first half to 2,616 million. Thanks to the improvement in the operating result, first-half net income increased by 87.3 percent to 1,058 million (2004: 565 million).

We reduced net debt by 240 million compared with March 31, 2005, to 6,875 million on June 30.

**Outlook**

Bayer remains on course for growth. We are confident that the Group will again improve its operating performance in the second half of the year and are therefore raising our sales and earnings targets for the full year.

We now expect Group sales to exceed 26 billion against previous guidance of over 25 billion. EBIT before special items is forecast to rise by about 40 percent, compared with our previous guidance of 20 percent. The 2004 figure was 2,117 million.

MaterialScience is still expected to make the largest contribution to earnings growth, depending of course on the development of the economy and the trend in raw material prices.

**Table of Contents**

**Interim Report as of June 30, 2005**

Bayer Stockholders Newsletter 2005

We continue to predict that CropScience, too, will report a clear rise in underlying EBIT, helped by anticipated cost reductions in the second half of the year.

We are increasingly optimistic about the outlook for HealthCare, and are therefore raising our full-year guidance for this subgroup once again: We now expect underlying EBIT from this business to be at least 10 percent higher than in 2004.

We anticipate that changes to our pension plans in the United States and Germany will result in non-cash one-time income of around 200 million in the third quarter. Including this effect, we expect to take net special charges (excluding any additional litigation-related expenses) of between 100 million and 150 million for the full year.

**Performance by Subgroup**

Our realigned business activities are grouped in the Bayer HealthCare, Bayer CropScience and Bayer MaterialScience subgroups. In view of the changes in the Bayer Group's portfolio, especially the spin-off of LANXESS and the acquisition of the Roche OTC (over-the-counter) medicines business, we have altered our segmentation in 2005 as shown below. Full details of the new reporting segments are given in the notes on page 35.

**Subgroups**

\* for definition  
see Bayer  
Group Key Data  
on page 2

**Table of Contents**

**Interim Report as of June 30, 2005**

Bayer Stockholders Newsletter 2005

The **Bayer HealthCare** subgroup lifted **sales** 18.1 percent year on year to 2,370 million, mainly because of the acquisition of the Roche consumer health business. Currency- and portfolio-adjusted sales were 5.4 percent higher than in the previous year. The upward trend was driven primarily by above-market growth in the Diabetes Care, Diagnostics and Biological Products divisions.

Second-quarter **EBIT** improved by 18.9 percent to 258 million. Before special items totaling 81 million, EBIT increased by 122 million to 339 million (+ 56.2 percent).

**Pharmaceuticals, Biological Products**

**Sales of the Pharmaceuticals, Biological Products** segment increased by 49 million, or 5.2 percent, year on year to 988 million.

Sales of the Pharmaceuticals Division in the second quarter came to 746 million (+0.3 percent). Good business with products such as Trasyolol®, Avelox® and Levitra® more than offset the sales declines in the United States resulting from the expiration of market exclusivity for Cipro® and Schering-Plough's marketing of our primary care products. Second-quarter sales of Avelox® rose by 41.8 percent year on year due to a heavy flu season in Europe and the United States. The exceptional jump in sales of Trasyolol®, which were 86.7 percent higher than in the prior-year quarter, was the result of increased demand from U.S. wholesalers. Trasyolol® sales grew in the first six months of 2005 by 38.4 percent overall.

The Biological Products Division lifted sales by 47 million to 242 million in the second quarter, with 39 million of this growth coming from Kogenate® (+28.9 percent). The increase in Kogenate® sales was mainly attributable to strong business in Europe, where we continued to gain market share.

As a result of the positive business trend, earnings from the alliance with Schering-Plough and cost savings, **EBIT** rose by 44 million to 109 million in the second quarter. That includes expenses of 20 million in connection with the Lipobay/Baycol litigation. Before these special charges, EBIT almost doubled (+98.5 percent).

Group Key Data  
on page 2

**Table of Contents**

**Interim Report as of June 30, 2005**

Bayer Stockholders Newsletter 2005

**Consumer Care**

**Sales** of the **Consumer Care** segment advanced by 77.8 percent in the second quarter to 592 million, with the OTC business acquired from Roche contributing sales of 277 million.

Integration of the Roche OTC business is proceeding on schedule. Sales of products acquired through this transaction such as Bepanthen®/Bepanthol®, Rennie® and Supradyn® showed further pleasing increases from first-quarter levels.

Although demand for Aleve® picked up following the FDA Advisory Committee's positive findings in connection with the debate about non-steroidal anti-inflammatory drugs (NSAIDS) in the United States, currency-adjusted sales were down 28.4 percent year on year.

**EBIT** of the Consumer Care segment was 34 million, down 13 million from the same period of 2004. Before 44 million in special charges related to the PPA litigation and 17 million in integration costs for the OTC acquisition, EBIT increased to 95 million (+102.1 percent), mainly on account of the OTC products acquired from Roche.

**Diabetes Care, Diagnostics**

**Sales** of the **Diabetes Care, Diagnostics** segment rose by 51 million, or 10.0 percent, to 561 million.

In the Diabetes Care Division, sales increased 15.5 percent to 194 million thanks to strong growth in the United States and Europe. Sales of the Diagnostics Division advanced 7.3 percent to 367 million.

This segment's **EBIT** improved to 72 million (+20.0 percent) due to the positive business trend.

**Animal Health**

Second-quarter **sales** of the **Animal Health** segment were 1.8 percent higher at 229 million.

In Europe business was slightly down from the previous year, partly because sales in the prior-year quarter had been boosted by initial orders for the newly launched flea and tick control product Advantix®. However, the decline in Europe was more than offset by strong growth in other regions and the market launch of Advocate®, a combination antiparasitic for dogs and cats.

**EBIT** was almost unchanged year on year at 43 million.

**Table of Contents**

**Interim Report as of June 30, 2005**

Bayer Stockholders Newsletter 2005

**Sales** of the **Bayer CropScience** subgroup slipped 2.3 percent in the second quarter to 1,604 million. Currency- and portfolio-adjusted sales were down 3.1 percent. **EBIT**, at 162 million, was virtually unchanged from the same period of 2004. Underlying EBIT declined by 6.5 percent to 187 million.

**Crop Protection**

**Sales** of the **Crop Protection** segment came in at 1,318 million, down 2.5 percent from the previous year. Higher sales in the Seed Treatment and Fungicides business units only partially offset the declines in Insecticides and Herbicides. The drop in business was largely attributable to the prolonged drought in Brazil and some southern European countries. In the Fungicides unit, our new Proline® family of cereal fungicides and our strobilurin-based product Fandango® made good headway, more than compensating for the drought-related declines in sales of Folicur® and Flint®.

**EBIT** of the **Crop Protection** segment shrank by 7.6 percent year on year to 110 million. Before special charges, EBIT came to 131 million, down 18.1 percent from the prior-year quarter. The drop in earnings was mainly caused by a weather-related decline in volumes and write-downs of receivables.

**Environmental Science, BioScience**

**Sales** of the **Environmental Science, BioScience** segment remained virtually unchanged from the second quarter of 2004. This segment's **EBIT** improved by 12 million to 52 million (+30.0 percent), partly because of reduced amortization.

**Interim Report as of June 30, 2005**

Bayer Stockholders Newsletter 2005

Business at **Bayer MaterialScience** grew substantially in the second quarter in a strong economic environment. Sales advanced by 30.8 percent to 2,734 million. Adjusted for currency and portfolio effects, the increase came to 27.5 percent. The prime contributors to this upward trend were the Polycarbonates and Polyurethanes business units. The subgroup posted a 112 million year-on-year improvement in **EBIT** to 327 million (+52.1 percent). Underlying **EBIT** rose by 56.7 percent. Favorable market conditions helped us to implement what were in some cases substantial price increases. In this way we offset the significant rise in raw material costs compared with the previous year and achieved the necessary margin improvements in key areas of the business.

**Materials**

**Sales** of the **Materials** segment came to 1,045 million in the second quarter, up 30.6 percent from the same period of 2004. The increase was mainly the result of an excellent performance by the Polycarbonates and H.C. Starck business units.

Second-quarter **EBIT** improved by a substantial 84 million, or 107.7 percent, to 162 million, with higher selling prices more than offsetting the increases in raw material costs.

**Systems**

**Sales** of the **Systems** segment also rose strongly in the second quarter, advancing 30.8 percent to 1,689 million, with the Polyurethanes and Inorganic Basic Chemicals business units posting the strongest gains.

**EBIT** of this segment improved by 28 million year on year to 165 million (+20.4 percent). Underlying **EBIT** rose 27.7 percent. In this segment, too, higher raw material costs were offset by price increases.

## Performance by Region

Bayer raised sales by 1,163 million to 7,053 million (+19.7 percent) in the second quarter. About two-thirds of this growth was generated in **Europe**, where sales increased by 756 million (+31.1 percent) to 3,188 million. Business growth in Germany was above the average, with sales up 350 million to 1,082 million (+ 47.8 percent). After adjusting for portfolio effects, the improvement in Germany was around 15 percent, partly because of a strong

performance by HealthCare.

Sales in **North America** climbed 5.2 percent to 1,904 million; in local currencies the increase was 8.7 percent. While MaterialScience reported good growth in this region,

CropScience sales declined. Pharmaceuticals sales, too, were lower due to the effect of the Schering-Plough alliance. Sales moved ahead by 17.2 percent in **Asia/Pacific** and by 21.7 percent in **Latin America/Africa/Middle East**, with MaterialScience the main growth driver in both regions. In Latin America/Africa/Middle East there was also a pleasing rise in sales of both the Pharmaceuticals, Biological Products and the Consumer Care segments, growth in the latter case being portfolio-related. In Greater China, second-quarter sales grew by more than 30 percent.

Thanks to the improvement in earnings, gross cash flow increased 27.5 percent year on year to 908 million. The net cash flow from continuing operations was 5.6 percent below the prior-year quarter at 1,015 million (2004:

1,075 million) due to a smaller cash inflow from improvements in working capital. Changes in inventories, trade receivables and trade payables showed a year-on-year improvement despite business expansion. This was counteracted by an increase in other working capital.

There was a net cash inflow of 247 million from investing activities (2004: 55 million). The increase in this item was chiefly due to the proceeds from the sale of the LANXESS convertible bond, which had a nominal value of 200 million.

The net cash outflow of 1,347 million (2004: 977 million) for financing activities comprised 429 million in dividends, 479 million in net loan repayments and 439 million in interest payments.

## Interim Report as of June 30, 2005 Bayer Stockholders Newsletter 2005

	June 30, 2004	June 30, 2005	Dec. 31, 2004
<b>Net Debt From Continuing Operations</b>			
<b>million</b>			
Noncurrent financial liabilities as per balance sheets (including derivatives)	6,143	6,996	7,025
Current financial liabilities as per balance sheets (including derivatives)	2,187	2,019	2,166
Derivative receivables	(430)	(323)	(701)
<b>Debt</b>	<b>7,900</b>	<b>8,692</b>	<b>8,490</b>
Liquid assets as per balance sheets	(2,881)	(1,817)	(3,599)
<b>Net debt</b>	<b>5,019</b>	<b>6,875</b>	<b>4,891</b>

Net debt stood at 6,875 million on June 30, 2005. This was 240 million less than on March 31, 2005. Including marketable securities and other instruments, the Bayer Group had liquid assets of 1,817 million.

### Employees

On June 30, 2005, the Bayer Group had 93,200 employees in continuing operations, which was 1,200 more than on June 30, 2004. Headcount was also 1,500 higher than at year-end 2004. This increase was primarily due to the transfer of employees from Roche following the acquisition of the consumer health business. At the same time, there was a reduction in the workforce in the United States as a consequence of the Schering-Plough alliance.

Since the start of this year, headcount rose by 900 in Europe, 1,000 in Latin America/Africa/ Middle East and about 1,100 in Asia/Pacific. The number of employees in North America declined by 1,500.

Personnel expenses increased by 9.9 percent to 1,534 million in the second quarter of 2005. After adjusting for the income from pension plan curtailments recognized in the second quarter of 2004, personnel expenses rose by 1.5 percent.

**Table of Contents**

**Interim Report as of June 30, 2005**

Bayer Stockholders Newsletter 2005

**Legal Risks**

Increased risks currently result from litigation commenced in the United States following Bayer's voluntary market withdrawals of Lipobay/Baycol (cerivastatin) and of products containing phenylpropanolamine (PPA), as well as from actions related to Bayer's ciprofloxacin anti-infective product and actions and/or investigations relating to certain rubber related and polyester polyols/urethane related lines of business.

**Lipobay/Baycol:** Over the course of the Lipobay/Baycol litigation Bayer has been named as a defendant in approximately 14,700 cases worldwide (more than 14,580 of them in the U.S.). As of June 30, 2005, the number of Lipobay/Baycol cases pending against Bayer worldwide was 5,986 (5,910 of them in the U.S., including several class actions). The decrease in the number of U.S. cases is attributable to various reasons, including voluntary dismissals by plaintiffs, dismissals based on settlements and court-ordered dismissals, such as for failure to satisfy procedural requirements.

As of June 30, 2005, Bayer had settled 3,017 Lipobay/Baycol cases worldwide without acknowledging any liability and resulting in settlement payments of approximately US\$1,138 million. On a voluntary basis and without acknowledging any legal liability, Bayer will continue its policy of trying to agree on fair compensation for people who experienced serious side effects from Lipobay/Baycol. After nearly four years of litigation we are currently aware of fewer than 50 cases in the United States that in our opinion hold a potential for settlement, although we cannot rule out the possibility that additional cases involving serious side effects from Lipobay/Baycol may come to our attention. In addition, there could be further settlements of cases outside of the United States. In the 2003 and 2004 fiscal years, Bayer took charges to the operating result totaling 347 million in connection with the Lipobay/Baycol litigation risk, over and beyond the assumed insurance coverage of approximately US\$1.2 billion. An additional 24 million charge to the operating result was taken in the second quarter of 2005 in light of settlements already concluded or expected to be concluded and anticipated defense costs.

**PPA:** Bayer is a defendant in numerous product liability lawsuits relating to phenylpropanolamine (PPA), which was previously contained in a cough/cold product of the company supplied in effervescent-tablet form. The first PPA lawsuits were filed after the U.S. Food and Drug Administration recommended in the fall of 2000 that manufacturers voluntarily cease marketing products containing this active ingredient. Since that time, Bayer and other manufacturers of PPA-containing products, along with several retailers and distributors, have been named in numerous lawsuits in the United States brought by plaintiffs alleging injuries related to the claimed ingestion of PPA.

Of the approximately 3,000 PPA cases filed against Bayer, fewer than 600 cases remained pending against the company as of the end of June 2005. Bayer is the sole manufacturer named as a defendant in approximately 400 cases and co-defendant together with other former manufacturers of PPA-containing products in approximately 200 cases. In addition there are currently approximately 290 cases pending appeal, filed by plaintiffs whose suits were dismissed in the first instance on the grounds of procedural deficiency. There are approximately 80 further cases which have been dismissed based upon forum non conveniens grounds which plaintiffs may refile in the proper jurisdictions. All other cases filed against Bayer have been dismissed, withdrawn or settled. Further dismissals are possible, particularly should plaintiffs fail to comply with court orders

**Table of Contents**

**Interim Report as of June 30, 2005**

Bayer Stockholders Newsletter 2005

requiring the submission of causative evidence. As of June 30, 2005, we have settled 139 cases without acknowledging liability resulting in payments of US\$28 million.

Three PPA cases against Bayer have gone to trial so far with two resulting in defense verdicts for Bayer and one in which the plaintiff was awarded damages amounting to US\$400,000 being settled while on appeal in July 2005. Taking into account insurance coverage, a 16 million charge for settlements and further defense costs was recorded in 2004. An additional 44 million charge was recorded in the second quarter of 2005 for settlements already concluded or expected to be concluded. This charge also covers the results of the review by the company of approximately 500 of the 600 pending lawsuits as to whether settlement may be appropriate. Further charges may need to be recorded should the company become aware of additional cases with a potential for settlement. Also, due to the uncertainty associated with the remaining balance of pending PPA cases, it remains impossible to further estimate potential liability for those cases and thus no additional provisions for potential liabilities have been recorded.

Bayer intends to continue to vigorously defend all those Lipobay/Baycol and PPA lawsuits in which a settlement is in our view not warranted or cannot be reasonably achieved.

Since the existing insurance coverage is exhausted, it is possible depending on the future progress of the litigation that Bayer could face further payments that are not covered by the accounting measures already taken. We will regularly review the possibility of further accounting measures depending on the progress of the litigation.

**Cipro®:** 39 putative class action lawsuits, one individual lawsuit and one consumer protection group lawsuit against Bayer involving the drug Cipro® have been filed since July 2000 in the United States. The plaintiffs are suing Bayer and other companies also named as defendants, alleging that a settlement to end patent litigation reached in 1997 between Bayer and Barr Laboratories, Inc. violated certain antitrust laws. The plaintiffs claim the alleged violation prevented the marketing of generic ciprofloxacin as of 1997. In particular, they are seeking treble damages under U.S. law. Bayer believes the plaintiffs will not be able to establish that the settlement with Barr was outside of the scope of Bayer's valid Cipro® patent, which patent has been the subject of a successful re-examination by the U.S. Patent and Trademark Office and of successful defenses in U.S. Federal Courts.

All of the actions pending in federal court were consolidated in federal court in New York in a Multidistrict pre-trial proceeding. On March 31, 2005, this court granted Bayer's motion for summary judgment and dismissed all of plaintiffs' claims. The plaintiffs are appealing this decision. In addition Bayer is involved in several proceedings pending before various state courts. Bayer believes that it has meritorious defenses to the claims raised in these proceedings and will continue to vigorously defend the litigation.

**Rubber, polyester polyols, urethane:** Investigations by the E.U. Commission and the U.S. and Canadian antitrust authorities are ongoing in connection with alleged anticompetitive conduct involving certain products in the rubber field. In two cases Bayer AG has already reached agreements with the U.S. Department of Justice to pay fines, amounting to US\$66 million for antitrust violations relating to rubber chemicals and US\$4.7 million for those relating to acrylonitrile-butadiene rubber. Both these agreements have received

**Table of Contents**

**Interim Report as of June 30, 2005**

Bayer Stockholders Newsletter 2005

court approval and the respective amounts have been paid. Provisions of 50 million were established in 2003 for risks arising out of the E.U. Commission's investigations, although a reliable estimate cannot yet be made as to the expected amount of any fines.

Bayer Corporation has reached agreement with the U.S. Department of Justice to pay a fine of US\$33 million for antitrust violations in the United States relating to adipic-based polyester polyols. The court has approved the agreement and the respective amount has been paid. A similar investigation is pending in Canada, but it is not currently possible to estimate the amount of any fine that may result.

A number of civil lawsuits for damages have been filed in the United States, and in Canada, against Bayer AG and some of its subsidiaries, among other unaffiliated defendants. These lawsuits, involving allegations of unlawful collusion on prices for certain rubber and polyester polyol product lines, are generally at an early stage.

The financial risk associated with all of the above litigation (with the exception of those criminal proceedings in which fines have already been imposed), including the financial risk of civil lawsuits for damages, is currently not quantifiable, so no accounting measures have been taken in this regard. The company expects that, in the course of the abovementioned governmental proceedings and civil damages suits, significant expenses will become necessary that may be of material importance to the company.

In the United States, civil actions are also pending involving allegations of unlawful collusion on prices for polyether polyols and other precursors for urethane products. These lawsuits are also generally at an early stage.

**Subsequent Events**

In July 2005 Bayer AG successfully placed 1.3 billion of subordinated hybrid bonds on the capital market. This issue has a maturity of 100 years, pays interest at 180 basis points above the ten-year swap rate and bears a 5 percent coupon. After the first ten years Bayer has a quarterly option to redeem the bonds at face value. If we do not exercise this option, Bayer will pay variable interest at 280 basis points above the three-month EURIBOR rate for the remainder of the term. The 100-year issue strengthens our credit rating since the rating agencies classify such bonds mainly as equity.

In addition, as part of our refinancing measures, we repurchased part of the 5.375 percent Bayer bond issue due on April 10, 2007. The nominal value of the bonds repurchased was approximately 860 million.

**Interim Report for the Second Quarter/Notes**

Bayer Stockholders Newsletter 2005

Notes to the Interim Report

as of June 30, 2005

**Accounting policies**

Like the financial statements for 2004, the unaudited, consolidated financial statements for the second quarter of 2005 have been prepared according to the rules issued by the IASB, London. Reference should be made as appropriate to the notes to the 2004 statements, except as detailed below. IAS 34 (Interim Financial Reporting) has been applied in addition.

**Changes in presentation in connection with the classification of assets and liabilities according to maturity as per IAS 1 and of assets held for sale and discontinued operations as per IFRS 5**

The previous version of IAS 1 allowed the option of classifying assets and liabilities either according to maturity or in order of liquidity. The revised version of IAS 1, developed as part of the IASB's improvements project, prescribes classification according to maturity starting with the 2005 fiscal year.

IFRS 5, approved by the IASB on March 31, 2004, contains specific recognition principles for certain assets and liabilities held for sale and for discontinued operations. Reporting is to be based primarily on continuing operations, while assets held for sale and discontinued operations are to be stated separately in a single line item in the balance sheet, income statement and cash flow statement. The distinction between continuing and discontinued operations or assets held for sale is thus drawn differently starting on January 1, 2005 than in the financial statements as of December 31, 2004. The previous year's figures are restated accordingly.

**Change in pension accounting – application of the IAS 19 amendment**

In December 2004, the IASB published an amendment to IAS 19 (Employee Benefits). The amendment introduces an additional recognition option for actuarial gains and losses arising from defined benefit plans. This option is similar to the approach provided in the U.K. standard FRS 17 (Retirement Benefits), which requires recognition of all actuarial gains and losses in a statement of total recognized gains and losses that is separate from the income statement. Previously, in the Bayer Group statements, the net cumulative amounts of actuarial gains and losses outside of the corridor that were reflected in the balance sheet at the end of the previous reporting period were recognized in the income statement as income or expense, respectively, over the average remaining working lives of existing employees. This corridor was 10 percent of the present value of the defined benefit obligation or 10 percent of the fair value of plan assets, whichever was greater at the end of the previous year. Under the new method of pension accounting, unrealized actuarial gains and losses, instead of being gradually amortized according to the corridor method and recognized in income, are offset in their entirety against stockholders' equity. Thus, no amortization of actuarial gains and losses is recognized in income.

Recognizing actuarial gains and losses in stockholders' equity affects the amounts of receivables and of provisions for pensions and other post-employment benefits stated in the balance sheet and also requires the recognition of deferred taxes on the resulting differences. These taxes, too, are offset against the corresponding equity items.

The Group Management Board has decided to follow the recommendation of the IASB and implement the above change as of January 1, 2005 in order to enhance the transparency of

**Table of Contents****Interim Report for the Second Quarter/Notes**

Bayer Stockholders Newsletter 2005

our reporting. The previous year's figures have been restated accordingly. This reporting change improves the 2004 operating result from continuing operations by 48 million and the non-operating result by 78 million. Application of IAS 19 (revised) leads to a deferred tax expense of 50 million. In view of its immateriality to 2004 EBIT of our segments, the 48 million gain has been reflected solely in the reconciliation column of the segment table. These non-cash reporting changes do not affect either gross or net cash flow. A quantitative analysis of the actuarial parameters led to an approximately 1 billion increase in pension obligations as of June 30, 2005 that was directly recognized in equity. The increase was due especially to a considerable drop in long-term interest rates in the principal countries.

**Cessation of goodwill amortization**

In March 2004, in connection with the issuance of IFRS 3, the IASB revised IAS 36 (Impairment of Assets) and IAS 38 (Intangible Assets). Among the major changes is that goodwill and other intangible assets with an indefinite useful life may no longer be amortized, but must be tested annually for possible impairment. If events or changes in circumstances indicate a possible decline in value, impairment testing must be performed more frequently. Reversals of impairment losses for goodwill are prohibited. An intangible asset must be treated as having an indefinite life if it is expected to generate cash flows for the enterprise for an indefinite period of time. The revised standards apply to goodwill and other intangible assets acquired in business combinations agreed upon on or after March 31, 2004, as well as to previously acquired goodwill and other intangible assets for annual periods beginning on or after March 31, 2004.

**Scope of consolidation**

On June 30, 2005, the Bayer Group had a total of 289 fully or proportionately consolidated companies, compared with 349 companies on December 31, 2004. The reduction is due mainly to the deconsolidation of 61 LANXESS companies.

The acquisition of the global OTC business of Roche is largely complete, resulting in the following changes in Group assets and liabilities:

<b>OTC Acquisition*</b> <b>million</b>	<b>Book Value</b>	<b>Step-Up</b>	<b>Fair Value</b>
Intangible assets	0	1,142	1,142
Goodwill	0	589	589
Property, plant and equipment	142	9	151
Inventories	96	57	153
Other acquired assets and assumed liabilities	67	(22)	45

\* We also purchased from Roche at the end of 2004 the remaining 50 percent interest in the OTC joint venture in the U.S.

Since we have combined the sales forces, distribution function, and support functions such as controlling in our legal entities, it is not practicable to separately identify EBIT of the former Roche business.

**Table of Contents****Interim Report for the Second Quarter/Notes**

Bayer Stockholders Newsletter 2005

**Discontinued Operations**

The Board of Management and Supervisory Board of Bayer AG decided in November 2003 to separate major parts of the chemicals and polymers business from the Bayer Group. The separation took place by way of a spin-off pursuant to the German Transformation Act (Umwandlungsgesetz). On January 28, 2005, the spin-off of LANXESS from Bayer AG was entered in the commercial register and thus took legal effect. It was also decided in October 2003 to divest the plasma business of the Biological Products Division of the Bayer HealthCare subgroup. This business was sold effective March 31, 2005.

Both the LANXESS business and the divested plasma business are reported as discontinued operations. This information, which is provided from the standpoint of the Bayer Group, is to be regarded as part of the reporting for the entire Group by analogy with our segment reporting and is not intended to portray either the discontinued operations or the remaining business of Bayer as separate entities. This presentation is thus in line with the principles for the reporting of discontinued operations according to IFRS 5.

**Segment reporting**

The spin-off of LANXESS and the acquisition of the Roche OTC business have led to a shift in the relative sizes of our businesses in terms of sales, EBIT and assets. In compliance with IAS 14 (Segment Reporting), we have therefore adjusted our segmentation effective January 1, 2005 to reflect the new Group structure.

In line with the increased importance of our Consumer Care Division, the previous Consumer Care, Diagnostics segment has been split into two reporting segments. The new Consumer Care segment comprises both our existing Consumer Care business and the OTC business acquired from Roche. Our diagnostics activities, comprising the Diabetes Care and Diagnostics divisions, are now reported as a separate segment called Diabetes Care, Diagnostics. The Bayer CropScience subgroup was presented in the 2004 financial statements as a single segment. We are now reporting Crop Protection as a separate segment, consisting of the strategic business units Insecticides, Fungicides, Herbicides and Seed Treatment. The new Environmental Science, BioScience segment comprises the Environmental Science and BioScience business groups.

The Bayer MaterialScience subgroup is divided for reporting purposes into the Materials and Systems segments as before.

**Forward-Looking Statements**

This Stockholders Newsletter contains forward-looking statements. These statements use words like believes, assumes, expects or similar formulations. Various known and unknown risks, uncertainties and other factors could lead to material differences between the actual future results, financial situation, development or performance of our company and those either expressed or implied by these statements. These factors include, among other things:

Downturns in the business cycle of the industries in which we compete;

new regulations, or changes to existing regulations, that increase our operating costs or otherwise reduce our profitability;

increases in the price of our raw materials, especially if we are unable to pass these costs along to customers;  
loss or reduction of patent protection for our products;  
liabilities, especially those incurred as a result of environmental laws or product liability litigation;  
fluctuation in international currency exchange rates as well as changes in the general economic climate; and  
other factors identified in this Stockholders' Newsletter.

These factors include those discussed in our public reports filed with the Frankfurt Stock Exchange and with the U.S. Securities and Exchange Commission (including our Form 20-F). In view of these uncertainties, we caution readers not to place undue reliance on these forward-looking statements. We assume no liability whatsoever to update these forward-looking statements or to conform them to future events or developments.
