## Edgar Filing: BANNER CORP - Form 10-Q

## Special Note Regarding Forward-Looking Statements

Certain matters in this report on Form 10-Q contain certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 concerning our future operations. These statements relate to our financial condition, liquidity, results of operations, plans, objectives, future performance or business. Forward-looking statements are not statements of historical fact, are based on certain assumptions and are generally identified by use of the words "believes," "expects," "anticipates," "estimates," "forecasts," "intends," "plans," "targ "potentially," "probably," "projects," "outlook" or similar expressions or future or conditional verbs such as "may," "will," "sh "would" and "could." Forward-looking statements include statements with respect to our beliefs, plans, objectives, goals, expectations, assumptions and statements about future economic performance and projections of financial items. These forward-looking statements are subject to known and unknown risks, uncertainties and other factors that could cause actual results to differ materially from the results anticipated or implied by our forward-looking statements, including, but not limited to: the credit risks of lending activities, including changes in the level and trend of loan delinquencies and write-offs and changes in our allowance for loan losses and provision for loan losses that may be impacted by deterioration in the housing and commercial real estate markets and may lead to increased losses and nonperforming assets, and may result in our allowance for loan losses not being adequate to cover actual losses and require us to materially increase our reserves; changes in general economic conditions, either nationally or in our market areas; changes in the levels of general interest rates and the relative differences between short and long-term interest rates, loan and deposit interest rates, our net interest margin and funding sources; fluctuations in the demand for loans, the number of unsold homes, land and other properties and fluctuations in real estate values in our market areas; secondary market conditions for loans and our ability to sell loans in the secondary market; results of examinations of us by the Board of Governors of the Federal Reserve System (the Federal Reserve Board) and of our bank subsidiaries by the Federal Deposit Insurance Corporation (the FDIC), the Washington State Department of Financial Institutions, Division of Banks (the Washington DFI) or other regulatory authorities, including the possibility that any such regulatory authority may, among other things, institute a formal or informal enforcement action against us or any of our bank subsidiaries which could require us to increase our reserve for loan losses, write-down assets, change our regulatory capital position or affect our ability to borrow funds, or maintain or increase deposits, or impose additional requirements and restrictions on us, any of which could adversely affect our liquidity and earnings; legislative or regulatory changes that adversely affect our business including changes in regulatory policies and principles, or the interpretation of regulatory capital or other rules including changes related to Basel III; the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act and the implementing regulations; our ability to attract and retain deposits; increases in premiums for deposit insurance; our ability to control operating costs and expenses; the use of estimates in determining fair value of certain of our assets and liabilities, which estimates may prove to be incorrect and result in significant changes in valuation; difficulties in reducing risk associated with the loans on our balance sheet; staffing fluctuations in response to product demand or the implementation of corporate strategies that affect our work force and potential associated charges; the failure or security breach of computer systems on which we depend; our ability to retain key members of our senior management team; costs and effects of litigation, including settlements and judgments; our ability to implement our business strategies; our ability to successfully integrate any assets, liabilities, customers, systems, and management personnel we may acquire into our operations and our ability to realize related revenue synergies and cost savings within expected time frames and any goodwill charges related thereto; our ability to manage loan delinquency rates; increased competitive pressures among financial services companies; changes in consumer spending, borrowing and savings habits; the availability of resources to address changes in laws, rules, or regulations or to respond to regulatory actions; our ability to pay dividends on our common stock and interest or principal payments on our junior subordinated debentures; adverse changes in the securities markets; inability of key third-party providers to perform their obligations to us; changes in accounting policies and practices, as may be adopted by the financial institution regulatory agencies or the Financial Accounting Standards Board including additional guidance and interpretation on accounting issues and details of the implementation of new accounting methods; the economic impact of war or any terrorist activities; other economic, competitive, governmental, regulatory, and technological factors affecting our operations, pricing, products and services; and other risks detailed from time to time in our filings with the Securities
and Exchange Commission. Any forward-looking statements are based upon management's beliefs and assumptions at the time they are made. We do not undertake and specifically disclaim any obligation to update any forward-looking statements included in this report or the reasons why actual results could differ from those contained in such statements whether as a result of new information, future events or otherwise. These risks could cause our actual results to differ materially from those expressed in any forward-looking statements by, or on behalf of, us. In light of these risks, uncertainties and assumptions, the forward-looking statements discussed in this report might not occur, and you should not put undue reliance on any forward-looking statements.

As used throughout this report, the terms "we," "our," "us," or the "Company" refer to Banner Corporation and its consolidate subsidiaries, unless the context otherwise requires.

## BANNER CORPORATION AND SUBSIDIARIES SELECTED NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

## Note 1: BASIS OF PRESENTATION AND CRITICAL ACCOUNTING POLICIES

The accompanying unaudited consolidated financial statements include the accounts of Banner Corporation (the Company or Banner), a bank holding company incorporated in the State of Washington and its wholly-owned subsidiaries, Banner Bank and Islanders Bank (the Banks).

These unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X as promulgated by the Securities and Exchange Commission (SEC). In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of the financial position and results of operations for the periods presented have been included. Certain information and disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to the rules and regulations of the SEC. Certain reclassifications have been made to the 2012 Consolidated Financial Statements and/or schedules to conform to the 2013 presentation. These reclassifications may have affected certain ratios for the prior periods. The effect of these reclassifications is considered immaterial. All significant intercompany transactions and balances have been eliminated.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect amounts reported in the financial statements. Various elements of the Company's accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. In particular, management has identified several accounting policies that, due to the judgments, estimates and assumptions inherent in those policies, are critical to an understanding of Banner's financial statements. These policies relate to (i) the methodology for the recognition of interest income, (ii) determination of the provision and allowance for loan and lease losses, (iii) the valuation of financial assets and liabilities recorded at fair value, including other-than-temporary impairment (OTTI) losses, (iv) the valuation of intangibles, such as core deposit intangibles and mortgage servicing rights, (v) the valuation of real estate held for sale and (vi) the valuation of or recognition of deferred tax assets and liabilities. These policies and judgments, estimates and assumptions are described in greater detail in subsequent notes to the Consolidated Financial Statements and Management's Discussion and Analysis of Financial Condition and Results of Operations (Critical Accounting Policies) in our Annual Report on Form 10-K for the year ended December 31, 2012 filed with the SEC. Management believes that the judgments, estimates and assumptions used in the preparation of the financial statements are appropriate based on the factual circumstances at the time. However, given the sensitivity of the financial statements to these critical accounting policies, the use of other judgments, estimates and assumptions could result in material differences in the Company's results of operations or financial condition. Further, subsequent changes in economic or market conditions could have a material impact on these estimates and the Company's financial condition and operating results in future periods.

The information included in this Form 10-Q should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2012 filed with the SEC (2012 Form 10-K). Interim results are not necessarily indicative of results for a full year.

## Note 2: RECENT DEVELOPMENTS AND SIGNIFICANT EVENTS

Proposed Acquisition of Home Federal Bancorp, Inc.
On September 24, 2013, Banner and Home Federal Bancorp, Inc. (NASDAQ: HOME), announced the signing of a definitive Agreement and Plan of Merger. The Agreement allowed a thirty-day period during which the board of
directors of Home Federal could evaluate purchase offers from other institutions. On October 16, 2013, Home Federal's board declared that it had received a superior proposal from Cascade Bancorp. Under the terms of the Agreement, Banner's board of directors had the right but elected not to match Cascade's offer. Consequently, on October 23, 2013, Banner announced that the Agreement between it and Home Federal had been terminated. In connection with the termination of the Agreement, Home Federal paid a termination fee of $\$ 2.95$ million to Banner.

Income Tax Reporting and Accounting:
Amended Federal Income Tax Returns: The Company has years 2010-2012 open for tax examination under the statute of limitation provisions of the Internal Revenue Code of 1986 (Code). Tax years 2006-2009 are not open for assessment of additional tax, but remain open for adjustment to the amount of Net Operating Losses (NOLs), credit, and other carryforwards utilized in open years or to be utilized in the future. The Company filed amended federal income tax returns for tax years 2008 and 2009 to claim additional bad debt deductions, which resulted in additional NOLs for tax years 2008 and 2009. The Company also filed amended federal income tax returns for tax years 2005-2006 and a tentative refund claim for tax year 2007 to carryback the NOLs and general business credits from 2008 and 2009 to those earlier years. Review of the amended returns for all years was completed by the Internal Revenue Service (IRS) in the three months ended September 30, 2013. The Company signed a closing agreement with the IRS related to refund claims of $\$ 9.8$ million, primarily all related to tax year 2006. Due to the uncertainty of the outcome, the Company had neither previously recorded a receivable nor adjusted deferred tax assets for the amendment. During the three months ended September 30, 2013, the Company recorded a tax receivable of $\$ 9.8$ million with an offsetting adjustment to its deferred tax assets. Additionally, the Company received interest on the tax receivable of $\$ 450,000$ in the quarter ending September 30, 2013, which is recorded in miscellaneous income. The Company will further analyze the impact of the closing agreement on subsequent tax years as well as the state income tax impact and record the necessary adjustments at year-end which are not expected to have a material effect on the Company's financial condition or results of operations.

Deferred Tax Asset Valuation Allowance: The Company and its wholly-owned subsidiaries file consolidated U.S. federal income tax returns, as well as state income tax returns in Oregon and Idaho. Income taxes are accounted for using the asset and liability method. Under this method a deferred tax asset or liability is determined based on the enacted tax rates which are expected to be in effect when the differences between the financial statement carrying amounts and tax basis of existing assets and liabilities are expected to be reported in the Company's income tax returns. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date. Under GAAP, a valuation allowance is required to be recognized if it is "more likely than not" that all or a portion of Banner's deferred tax assets will not be realized. During the quarter ended September 30, 2010, the Company evaluated its net deferred tax asset and determined it was prudent to establish a full valuation allowance against the net asset. At each subsequent quarter-end, the Company "re-analyzed that position and the Company continued to maintain a full valuation allowance through March 31, 2012. During the quarter ended June 30, 2012, management analyzed the Company's performance and trends over the previous five quarters, focusing on trends in asset quality, loan loss provisioning, capital position, net interest margin, core operating income and net income and the likelihood of continued profitability. Based on this analysis, management determined that a full valuation allowance was no longer appropriate and reversed nearly all of the valuation allowance at that time. The Company utilized the remaining valuation allowance to offset tax expense in the third and fourth quarters of 2012. The ultimate realization of deferred tax assets is dependent upon the existence, or generation, of taxable income in the periods when those temporary differences and net operating loss and credit carryforwards are deductible. See Note 12 of the Selected Notes to the Consolidated Financial Statements for more information.

## Preferred Stock Transactions:

On March 29, 2012, the Company's $\$ 124$ million of senior preferred stock with a liquidation value of $\$ 1,000$ per share, originally issued to the U.S. Treasury as part of its Capital Purchase Program, was sold by the Treasury as part of its efforts to manage and recover its investments under the Troubled Asset Relief Program (TARP). While the sale of these preferred shares to new owners did not result in any proceeds to the Company and did not change the Company's capital position or accounting for these securities, it did eliminate restrictions put in place by the Treasury on TARP recipients. During the year ended December 31, 2012, the Company repurchased or redeemed all of its Series A Preferred Stock. The related warrants to purchase up to $\$ 18.6$ million in Banner common stock ( 243,998 shares) were sold by the Treasury at public auction in June 2013. That sale did not change the Company's capital position and did not have any impact on the financial accounting and reporting for these securities.

## Note 3: ACCOUNTING STANDARDS RECENTLY ADOPTED

## Offsetting Assets and Liabilities

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update ("ASU") No. 2011-11, "Disclosures About Offsetting Assets and Liabilities." The new disclosure requirements mandate that entities disclose both gross and net information about instruments and transactions eligible for offset in the statement of financial condition as well as instruments and transactions subject to an agreement similar to a master netting arrangement. ASU No. 2011-11 also requires disclosure of collateral received and posted in connection with master netting agreements or similar arrangements.

In January 2013, FASB issued ASU No. 2013-01, "Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities." The provisions of ASU No. 2013-01 limit the scope of the new balance sheet offsetting disclosures to the following financial instruments, to the extent they are offset in the financial statements or subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset in the statement of financial position: (1) derivative financial instruments; (2) repurchase agreements and reverse repurchase agreements; and (3) securities borrowing and securities lending transactions.

The Company adopted the provisions of ASU No. 2011-11 and ASU No. 2013-01 effective January 1, 2013. As the provisions of ASU No. 2011-11 and ASU No. 2013-01 only impact disclosure requirements related to the offsetting of assets and liabilities and information instruments and transactions eligible for offset in the statement of financial condition, the adoption had no impact on the Company's consolidated statements of operations and financial condition.

## Reclassifications Out of Accumulated Other Comprehensive Income

In February 2013, FASB issued ASU No. 2013-02, Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. ASU No. 2013-02 does not amend any existing requirements for reporting net income or other comprehensive income in the financial statements. ASU No. 2013-02 requires an entity to disaggregate the total change of each component of other comprehensive income (e.g., unrealized gains or losses on available-for-sale investment securities) and separately present reclassification adjustments and current period other comprehensive income. The provisions of ASU No. 2013-02 also require that entities present, either in a single note or parenthetically on the face of the financial statements, the effect of significant amounts reclassified from each component of accumulated other comprehensive income based on its source (e.g., unrealized gains or losses on available-for-sale investment securities). The Company adopted the provisions of ASU No. 2013-02 effective January 1, 2013. The adoption of this guidance did not have a material effect on the Company's consolidated financial statements.

Unrecognized Tax Benefits
In July 2013, FASB issued ASU No. 2013-11, "Presentation of an Unrecognized Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists." This ASU requires an unrecognized tax benefit to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. An exception exists to
the extent that a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax of the applicable jurisdiction does not require the entity to use, and entity does not intend to use, the deferred tax asset for such a purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. ASU No. 2013-11 is effective for fiscal years and interim periods beginning after December 15, 2013 and is not expected to have a material impact on the Company's consolidated financial statements.

## Note 4: BUSINESS SEGMENTS

The Company is managed by legal entity and not by lines of business. Each of the Banks is a community oriented commercial bank chartered in the State of Washington. Each of the Banks' primary business is that of traditional banking institutions, gathering deposits and originating loans for portfolios in their respective markets. The Banks offer a wide variety of deposit products to their consumer and commercial customers. Lending activities include the origination of real estate, commercial/agriculture business and consumer loans. Banner Bank is also an active participant in the secondary market, originating residential loans for sale on both a servicing released and servicing retained basis. In addition to interest income on loans and investment securities, the Banks receive other income from deposit service charges, loan servicing fees and from the sale of loans and investments. The performance of the Banks is reviewed by the Company's executive management and Board of Directors on a monthly basis. All of the executive officers of the Company are members of Banner Bank's management team.

Generally accepted accounting principles establish standards to report information about operating segments in annual financial statements and require reporting of selected information about operating segments in interim reports to stockholders. The Company has determined that its current business and operations consist of a single business segment.

## Note 5: INTEREST-BEARING DEPOSITS AND SECURITIES

The following table sets forth additional detail regarding our interest-bearing deposits and securities at the dates indicated (includes securities-trading, available-for-sale and held-to-maturity, all at carrying value) (in thousands):

Proceeds from the sale of 35 securities-available-for-sale during the nine months ended September 30, 2013 were $\$ 103.3$ million with a resulting loss of $\$ 116,000$. There were three sales of securities-available-for-sale totaling $\$ 13.3$ million with a resulting gain of $\$ 38,000$ during the nine months ended September 30, 2012. At September 30, 2013, there were 124 securities-available for sale with unrealized losses, compared to 52 securities at December 31, 2012. Management does not believe that any individual unrealized loss as of September 30, 2013 represents

OTTI. The decline in fair market values of these securities was generally due to changes in interest rates and changes in market-desired spreads subsequent to their purchase.

The amortized cost and estimated fair value of securities-available-for-sale at September 30, 2013 and December 31, 2012, by contractual maturity, are shown below (in thousands). Expected maturities will differ from contractual maturities because some securities may be called or prepaid with or without call or prepayment penalties.

There were no sales of securities-held-to-maturity and the Company did not recognize any OTTI charges on securities-held-to-maturity during the nine months ended September 30, 2013 and 2012. As of September 30, 2013, there were no securities-held-to-maturity in a nonaccrual status. There were 32 securities-held-to-maturity with unrealized losses at September 30, 2013, compared to five securities at December 31, 2012. Management does not believe that any individual unrealized loss on a security as of September 30, 2013 represents OTTI. The decline in fair market value of these securities was generally due to changes in interest rates and changes in market-desired spreads subsequent to their purchase.

The amortized cost and estimated fair value of securities-held-to-maturity at September 30, 2013 and December 31, 2012, by contractual maturity, are shown below (in thousands). Expected maturities will differ from contractual maturities because some securities may be called or prepaid with or without call or prepayment penalties.

## Note 6: FHLB STOCK

The Banks' investments in Federal Home Loan Bank of Seattle stock are carried at par value (\$100 per share), which reasonably approximates its fair value. As members of the FHLB system, the Banks are required to maintain a minimum level of investment in FHLB stock based on specific percentages of their outstanding FHLB advances. For the three months and nine months ended September 30, 2013, the Banks received dividend income of $\$ 9,000$ on FHLB stock. For the three months and nine months ended September 30, 2012, the Banks did not receive any dividend income on FHLB stock. At September 30, 2013 and December 31, 2012, respectively, the Company had recorded $\$ 35.7$ million and $\$ 36.7$ million in FHLB stock. This stock is generally viewed as a long-term investment and is carried at par. It does not have a readily determinable fair value. Ownership of FHLB stock is restricted to the FHLB and member institutions and can only be purchased and redeemed at par.

Management periodically evaluates FHLB stock for impairment. Management's determination of whether these investments are impaired is based on its assessment of the ultimate recoverability of cost rather than by recognizing temporary declines in value. The determination of whether a decline affects the ultimate recoverability of cost is influenced by criteria such as (1) the significance of any decline in net assets of the FHLB as compared to the capital stock amount for the FHLB and the length of time this situation has persisted, (2) commitments by the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLB, (3) the impact of legislative and regulatory changes on institutions and, accordingly, the customer base of the FHLB, and (4) the liquidity position of the FHLB.

The FHLB of Seattle announced that it had a risk-based capital deficiency under the regulations of the Federal Housing Finance Agency (the FHFA), its primary regulator, as of December 31, 2008, and that it would suspend future dividends and the repurchase and redemption of outstanding common stock. The FHLB of Seattle announced on September 7, 2012 that the FHFA now considers the FHLB of Seattle to be adequately capitalized. Dividends on, or repurchases of, the FHLB of Seattle stock continue to require the consent of the FHFA. The FHFA subsequently approved the repurchase of portions of FHLB of Seattle stock, and as of September 30, 2013, the FHLB had repurchased $\$ 1.7$ million of the Banks' stock, including $\$ 333,000$ during the quarter ending September 30, 2013. The FHLB of Seattle announced on October 28, 2013 that, based on third quarter 2013 financial results, its Board of Directors had declared a $\$ 0.025$ per share cash dividend. It is the second dividend in a number of years and represents a significant milestone in FHLB of Seattle's return to normal operations. The Company will continue to monitor the financial condition of the FHLB as it relates to, among other things, the recoverability of Banner's investment. Based on the above, the Company has determined there is not any impairment on the FHLB stock investment as of September 30, 2013.

## Note 7: LOANS RECEIVABLE AND THE ALLOWANCE FOR LOAN LOSSES

We originate residential mortgage loans for both portfolio investment and sale in the secondary market. At the time of origination, mortgage loans are designated as held for sale or held for investment. Loans held for sale are stated at the lower of cost or estimated market value determined on an aggregate basis. Net unrealized losses on loans held for sale are recognized through a valuation allowance by charges to income. The Banks also originate construction, land and land development, commercial and multifamily real estate, commercial business, agricultural business and consumer loans for portfolio investment. Loans receivable not designated as held for sale are recorded at the principal amount outstanding, net of allowance for loan losses, deferred fees and origination costs, discounts and premiums. Premiums, discounts and deferred loan fees and origination costs are amortized to maturity using the level-yield methodology.

Interest is accrued as earned unless management doubts the collectability of the loan or the unpaid interest. Interest accruals are generally discontinued when loans become 90 days past due for scheduled interest payments. All previously accrued but uncollected interest is deducted from interest income upon transfer to nonaccrual status. Future collection of interest is included in interest income based upon an assessment of the likelihood that the loans will be repaid or recovered. A loan may be put on nonaccrual status sooner than this policy would dictate if, in management's judgment, the loan may be uncollectable. Such interest is then recognized as income only if it is ultimately collected.

Loans receivable, including loans held for sale, at September 30, 2013, December 31, 2012 and September 30, 2012 are summarized as follows (dollars in thousands):

|  | September 30, 2013 |  | December 31, 2012 |  |  | September 30, 2012 |  |  |  |

The Company originates both adjustable- and fixed-rate loans. The maturity and repricing composition of those loans, less undisbursed amounts and deferred fees and origination costs, at September 30, 2013, December 31, 2012 and September 30, 2012 were as follows (in thousands):

|  | September 30, <br> 2013 | December 31, <br> 2012 | September 30, <br> 2012 |
| :--- | :--- | :--- | :--- |
| Fixed-rate (term to maturity):   |  |  |  |
| Maturing in one year or less <br> Maturing after one year through three years | $\$ 134,632$ | $\$ 183,004$ | $\$ 185,379$ |
| Maturing after three years through five years | 139,878 | 171,724 | 168,307 |
| Maturing after five years through ten years | 205,830 | 173,251 | 168,348 |
| Maturing after ten years | 208,625 | 167,858 | 165,973 |
| Total fixed-rate loans | 406,715 | 473,927 | 456,758 |
| Adjustable-rate (term to rate adjustment): | $1,095,680$ | $1,169,764$ | $1,144,765$ |
| Maturing or repricing in one year or less |  |  |  |
| Maturing or repricing after one year through three years | $1,290,793$ | $1,260,472$ | $1,283,783$ |
| Maturing or repricing after three years through five years | 527,999 | 275,223 | 291,778 |
| Maturing or repricing after five years through ten years | 84,399 | 467,895 | 441,773 |
| Maturing or repricing after ten years | 1,776 | 60,316 | 45,951 |
| Total adjustable-rate loans | $2,179,756$ | 2,044 | 5,473 |
| Total loans | $\$ 3,275,436$ | $2,065,950$ | $2,068,758$ |
|  |  | $\$ 3,235,714$ | $\$ 3,213,523$ |

The adjustable-rate loans have interest rate adjustment limitations and are generally indexed to various prime (The Wall Street Journal) or London Inter-bank Offering Rate (LIBOR) rates, One to Five Year Constant Maturity Treasury Indices or FHLB advance rates. Future market factors may affect the correlation of the interest rate adjustment with the rates the Banks pay on the short-term deposits that were primarily utilized to fund these loans.

Impaired Loans and the Allowance for Loan Losses. A loan is considered impaired when, based on current information and circumstances, the Company determines it is probable that it will be unable to collect all amounts due according to the contractual terms of the loan agreement, including scheduled interest payments. Impaired loans are comprised of loans on nonaccrual, troubled debt restructurings (TDRs) that are performing under their restructured terms, and loans that are 90 days or more past due, but are still on accrual.

Troubled Debt Restructures. Some of the Company's loans are reported as TDRs. Loans are reported as TDRs when the bank grants one or more concessions to a borrower experiencing financial difficulties that it would not otherwise consider. Examples of such concessions include forgiveness of principal or accrued interest, extending the maturity date(s) or providing a lower interest rate than would be normally available for a transaction of similar risk. Our TDRs have generally not involved forgiveness of amounts due, but almost always include a modification of multiple factors; the most common combination includes interest rate, payment amount and maturity date. As a result of these concessions, restructured loans are impaired as the bank will not collect all amounts due, both principal and interest, in accordance with the terms of the original loan agreement. Loans identified as TDRs are accounted for in accordance with the Company's impaired loan accounting policies.

The amount of impaired loans and the related allocated reserve for loan losses as of September 30, 2013 and December 31, 2012 were as follows (in thousands):

|  | September 30, 2013 |  | December 31, 2012 |  |

(1) Loans without a specific allowance reserve have not been individually evaluated for impairment, but have been included in pools of homogeneous loans for evaluation of related allowance reserves.
Loans with a specific allowance reserve have been individually evaluated for impairment using either a discounted
(2) cash flow analysis or, for collateral dependent loans, current appraisals to establish realizable value. These analyses may identify a specific impairment amount needed or may conclude that no reserve is needed. Any specific impairment that is identified is included in the category's Related Allowance column.

(1) Since most loans were already considered classified and/or on nonaccrual status prior to restructuring, the modifications did not have a material effect on the Company's determination of the allowance for loan losses. The majority of these modifications do not fit into one separate type, such as rate, term, amount, interest-only or
${ }^{(2)}$ payment, but instead are a combination of multiple types of modifications; therefore, they are disclosed in aggregate.

The following table presents TDRs which incurred a payment default within twelve months of the restructure date during the three-month and nine-month periods ended September 30, 2013 and 2012 (in thousands). A default on a TDR results in either a transfer to nonaccrual status or a partial charge-off:

| Total | \$137 | \$- | \$137 | \$ 1,917 |

Credit Quality Indicators: To appropriately and effectively manage the ongoing credit quality of the Company's loan portfolio, management has implemented a risk-rating or loan grading system for its loans. The system is a tool to evaluate portfolio asset quality throughout each applicable loan's life as an asset of the Company. Generally, loans and leases are risk rated on an aggregate borrower/relationship basis with individual loans sharing similar ratings. There are some instances when specific situations relating to individual loans will provide the basis for different risk ratings within the aggregate relationship. Loans are graded on a scale of 1 to 9 . A description of the general characteristics of these categories is shown below:

Overall Risk Rating Definitions: Risk-ratings contain both qualitative and quantitative measurements and take into account the financial strength of a borrower and the structure of the loan or lease. Consequently, the definitions are to be applied in the context of each lending transaction and judgment must also be used to determine the appropriate risk rating, as it is not unusual for a loan or lease to exhibit characteristics of more than one risk-rating category. Consideration for the final rating is centered in the borrower's ability to repay, in a timely fashion, both principal and interest. There were no material changes in the risk-rating or loan grading system in the nine months ended September 30, 2013.

## Risk Rating 1: Exceptional

A credit supported by exceptional financial strength, stability, and liquidity. The risk rating of 1 is reserved for the Company's top quality loans, generally reserved for investment grade credits underwritten to the standards of institutional credit providers.

## Risk Rating 2: Excellent

A credit supported by excellent financial strength, stability and liquidity. The risk rating of 2 is reserved for very strong and highly stable customers with ready access to alternative financing sources.

## Risk Rating 3: Strong

A credit supported by good overall financial strength and stability. Collateral margins are strong; cash flow is stable although susceptible to cyclical market changes.

Risk Rating 4: Acceptable
A credit supported by the borrower's adequate financial strength and stability. Assets and cash flow are reasonably sound and provide for orderly debt reduction. Access to alternative financing sources will be more difficult to obtain.

## Risk Rating 5: Watch

A credit with the characteristics of an acceptable credit which requires, however, more than the normal level of supervision and warrants formal quarterly management reporting. Credits in this category are not yet criticized or classified, but due to adverse events or aspects of underwriting require closer than normal supervision. Generally, credits should be watch credits in most cases for six months or less as the impact of stress factors are analyzed.

## Risk Rating 6: Special Mention

A credit with potential weaknesses that deserves management's close attention is risk rated a 6 . If left uncorrected, these potential weaknesses will result in deterioration in the capacity to repay debt. A key distinction between Special Mention and Substandard is that in a Special Mention credit, there are identified weaknesses that pose potential risk(s) to the repayment sources, versus well defined weaknesses that pose risk(s) to the repayment sources. Assets in this category are expected to be in this category no more than 9-12 months as the potential weaknesses in the credit are resolved.

## Risk Rating 7: Substandard

A credit with well defined weaknesses that jeopardize the ability to repay in full is risk rated a 7. These credits are inadequately protected by either the sound net worth and payment capacity of the borrower or the value of pledged
collateral. These are credits with a distinct possibility of loss. Loans headed for foreclosure and/or legal action due to deterioration are rated 7 or worse.

Risk Rating 8: Doubtful
A credit with an extremely high probability of loss is risk rated 8 . These credits have all the same critical weaknesses that are found in a substandard loan; however, the weaknesses are elevated to the point that based upon current information, collection or liquidation in full is improbable. While some loss on doubtful credits is expected, pending events may strengthen a credit making the amount and timing of any loss indeterminable. In these situations taking the loss is inappropriate until it is clear that the pending event has failed to strengthen the credit and improve the capacity to repay debt.

Risk Rating 9: Loss
A credit that is considered to be currently uncollectible or of such little value that it is no longer a viable Bank asset is risk rated 9 . Losses should be taken in the accounting period in which the credit is determined to be uncollectible. Taking a loss does not mean that a credit has absolutely no recovery or salvage value but, rather, it is not practical or desirable to defer writing off the credit, even though partial recovery may occur in the future.

The following table shows the Company's portfolio of risk-rated loans and non-risk-rated loans by grade or other characteristics as of September 30, 2013 and December 31, 2012 (in thousands):

The Pass category includes some performing loans that are part of homogenous pools which are not individually risk-rated. This includes all consumer loans, all one- to four-family residential loans and, as of September 30,
${ }^{(1)} 2013$ and December 31, 2012, in the commercial business category, $\$ 81$ million and $\$ 77$ million, respectively, of credit-scored small business loans. As loans in these pools become non-performing, they are individually risk-rated.
${ }^{(2)}$ Non-performing loans include non-accrual loans and loans past due greater than 90 days and on accrual status.

The following tables provide additional detail on the age analysis of the Company's past due loans as of September 30, 2013 and December 31, 2012 (in thousands):

## Note 8: REAL ESTATE OWNED, NET

The following table presents the changes in REO, net of valuation adjustments, for the three and nine months ended September 30, 2013 and 2012 (in thousands):

|  | Three Months Ended September 30 |  |  | Nine Months Ended September 30 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2013 |  | 2012 |  | 2013 |  | 2012 |
| Balance, beginning of the period | \$6,714 |  | \$25,816 |  | \$15,778 |  | \$42,965 |
| Additions from loan foreclosures | 963 |  | 3,111 |  | 2,467 |  | 11,598 |
| Additions from capitalized costs | 297 |  | 97 |  | 344 |  | 231 |
| Dispositions of REO | (3,970 | ) | (10,368 | ) | (15,758 | ) | (33,608 |
| Gain on sale of REO | 1,005 |  | 2,955 |  | 2,477 |  | 3,621 |
| Valuation adjustments in the period | (191 | ) | (1,255 | ) | (490 | ) | (4,451 |
| Balance, end of the period | \$4,818 |  | \$20,356 |  | \$4,818 |  | \$20,356 |

The following table shows REO by type and geographic location by state as of September 30, 2013 (in thousands):

|  | Washington | Oregon | Idaho | Total |
| :--- | :--- | :--- | :--- | :--- |
| Commercial real estate | $\$-$ | $\$-$ | $\$ 199$ | $\$ 199$ |
| Land development-residential | 1,179 | 1,819 | 69 | 3,067 |
| One- to four-family real estate | 1,197 | 355 | - | 1,552 |
| Balance, end of period | $\$ 2,376$ | $\$ 2,174$ | $\$ 268$ | $\$ 4,818$ |

REO properties are recorded at the lower of the estimated fair value of the property, less expected selling costs, or the carrying value of the defaulted loan, establishing a new cost basis. Subsequently, REO properties are carried at the lower of the new cost basis or updated fair market values, based on updated appraisals of the underlying properties, as received. Valuation allowances on the carrying value of REO may be recognized based on updated appraisals or on management's authorization to reduce the selling price of a property.

## Note 9: INTANGIBLE ASSETS AND MORTGAGE SERVICING RIGHTS

Intangible Assets: At September 30, 2013, intangible assets consisted primarily of core deposit intangibles (CDI), which are amounts recorded in business combinations or deposit purchase transactions related to the value of transaction-related deposits and the value of the customer relationships associated with the deposits.

The Company amortizes CDI over their estimated useful life and reviews them at least annually for events or circumstances that could impact their recoverability. The CDI assets shown in the table below represent the value ascribed to the long-term deposit relationships acquired in three separate bank acquisitions during 2007 and a single branch acquisition in the quarter ended September 30, 2013. These intangible assets are being amortized using an accelerated method over estimated useful lives of three to eight years. The CDI assets are not estimated to have a significant residual value. Intangible assets are amortized over their useful lives and are also reviewed for impairment.

The following table summarizes the changes in the Company's core deposit intangibles and other intangibles for the nine months ended September 30, 2013 and the year ended December 31, 2012 (in thousands):

|  | Core Deposit <br> Intangibles |
| :--- | :--- |
| Balance, December 31, 2012 | $\$ 4,230$ |
| Additions through acquisitions | 160 |
| Amortization | $(1,453$ |
| Balance, September 30, 2013 | $\$ 2,937$ |
|  |  |
|  | Core Deposit |
| Balance, December 31, 2011 | Intangibles |
| Amortization | $\$ 6,322$ |
| Balance, December 31, 2012 | $(2,092$ |
|  | $\$ 4,230$ |
| The following table presents the future estimated annual amortization expense with respect to intangibles as of |  |
| December 31, 2012 (in thousands): |  |
| Year Ended | Core Deposit |
| December 31, 2013 | Intangibles |
| December 31, 2014 | $\$ 1,941$ |
| December 31, 2015 | 1,800 |
| December 31, 2016 | 640 |
|  | $\$ 9$ |

Mortgage Servicing Rights: Mortgage servicing rights are reported in other assets. Mortgage servicing rights are initially recorded at fair value and are amortized in proportion to, and over the period of, the estimated future net servicing income of the underlying financial assets. Mortgage servicing rights are subsequently evaluated for impairment based upon the fair value of the rights compared to the amortized cost (remaining unamortized initial fair value). If the fair value is less than the amortized cost, a valuation allowance is created through an impairment charge to servicing fee income. The valuation allowance is subsequently adjusted to reflect changes in the measurement of impairment after the initial measurement of impairment. However, if the fair value is greater than the amortized cost, the amount above the amortized cost is not recognized in the carrying value. During the nine months ended September 30, 2013 and 2012, the Company did not record an impairment charge. However, during the quarter and nine months ended September 30, 2013, the Company recorded a reduction in its valuation allowance for previously recognized impairment charges of $\$ 400,000$ and $\$ 1.0$ million, respectively. Loans serviced for others totaled $\$ 1.086$ billion, $\$ 918$ million and $\$ 850$ million at September 30, 2013, December 31, 2012 and September 30, 2012, respectively. Custodial accounts maintained in connection with this servicing totaled $\$ 3.6$ million, $\$ 4.7$ million and $\$ 7.3$ million at September 30, 2013, December 31, 2012, and September 30, 2012, respectively.

An analysis of our mortgage servicing rights for the three and nine months ended September 30, 2013 and 2012 is presented below (in thousands):

|  | Three Months Ended |  | Nine Months Ended |  |
| :--- | :--- | :--- | :--- | :--- |
|  | September 30 |  | September 30 |  |
|  | 2013 | 2012 | 2013 | 2012 |
| Balance, beginning of the period | $\$ 7,036$ | $\$ 6,202$ | $\$ 6,244$ | $\$ 5,584$ |
| Amounts capitalized | 769 | 931 | 2,352 | 2,784 |
| Amortization ${ }^{(1)}$ | $(520$ | $)(682$ | $)$ | $(1,911$ |
| Valuation adjustments in the period | 400 | - | 1,917 |  |
| Balance, end of the period ${ }^{(2)}$ | $\$ 7,685$ | $\$ 6,451$ | $\$ 7,685$ | $\$ 6,451$ |

(1) Amortization of mortgage servicing rights is recorded as a reduction of loan servicing income and any unamortized balance is fully written off if the loan repays in full.
(2) Balances as of September 30, 2013 and 2012 are net of valuation allowances of $\$ 300,000$ and $\$ 900,000$, respectively.

35

Included in total deposits are certificate of deposit accounts in excess of $\$ 100,000$ totaling $\$ 499$ million and $\$ 571$ million at September 30, 2013 and December 31, 2012, respectively.

The following table presents the geographic concentration of deposits at September 30, 2013 (in thousands):

|  | Washington | Oregon |  | Idaho | Total |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Total deposits | $\$ 2,679,104$ | $\$ 610,205$ |  | $\$ 245,976$ | $\$ 3,535,285$ |
| Percent of total deposits | 75.8 | $\%$ | 17.3 | $\%$ | 6.9 |

In addition to deposits, we also offer retail repurchase agreements which are customer funds that are primarily associated with sweep account arrangements tied to transaction deposit accounts. While we include these collateralized borrowings in other borrowings reported in our Consolidated Statements of Financial Condition, these accounts primarily represent customer utilization of our cash management services and related deposit accounts.

The following table presents retail repurchase agreement balances as of September 30, 2013, December 31, 2012 and September 30, 2012 (in thousands):

|  | September 30, | December 31, | September 30, |
| :--- | :--- | :--- | :--- |

| Ren | $\$ 82,909$ | $\$ 76,633$ | $\$ 82,275$ |

## Note 11: FAIR VALUE ACCOUNTING AND MEASUREMENT

The Company has elected to record certain assets and liabilities at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (that is, not a forced liquidation or distressed sale). The GAAP standard (ASC 820, Fair Value Measurements) establishes a consistent framework for measuring fair value and disclosure requirements about fair value measurements. Among other things, the standard requires us to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's estimates for market assumptions. These two types of inputs create the following fair value hierarchy:

Level 1 - Quoted prices in active markets for identical instruments. An active market is a market in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value and shall be used to measure fair value whenever available.

Level 2 - Observable inputs other than Level 1 including quoted prices in active markets for similar instruments, quoted prices in less active markets for identical or similar instruments, or other observable inputs that can be corroborated by observable market data.

Level 3 - Unobservable inputs supported by little or no market activity for financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation; also includes observable inputs from non-binding single dealer quotes not corroborated by observable market data.

The estimated fair value amounts of financial instruments have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts. In addition, reasonable comparability between financial institutions may not be likely due to the wide range of permitted valuation techniques and numerous estimates that must be made given the absence of active secondary markets for certain financial instruments. This lack of uniform valuation methodologies also introduces a greater degree of subjectivity to these estimated fair values. Transfers between levels of the fair value hierarchy are deemed to occur at the end of the reporting period.

Items Measured at Fair Value on a Recurring Basis:
Banner records trading account securities, securities available-for-sale, FHLB advances and junior subordinated debentures at fair value on a recurring basis.

The securities assets primarily consist of U.S. Government and agency obligations, municipal bonds, corporate bonds, single issue trust preferred securities (TPS), pooled trust preferred collateralized debt obligation securities (TRUP CDO), mortgage-backed securities, asset-backed securities, equity securities and certain other financial instruments. Level 1 measurements are based upon quoted prices in active markets. Level 2 measurements are generally based upon a matrix pricing model from an investment reporting and valuation service. Matrix pricing is a mathematical technique used principally to value debt securities without relying exclusively on quoted prices for the specific securities, but rather by relying on the securities' relationship to other benchmark quoted securities. Level 3 measurements are based primarily on unobservable inputs. In developing Level 3 measurements, management incorporates whatever market data might be available and uses discounted cash flow models where appropriate. These
calculations include projections of future cash flows, including appropriate default and loss assumptions, and market based discount rates.

From mid-2008 through the current quarter, the lack of active markets and market participants for certain securities resulted in an increase in Level 3 measurements. This has been particularly true for our TRUP CDO securities. As of September 30, 2013, we owned $\$ 31$ million in current par value of these securities. The market for TRUP CDO securities is inactive, which was evidenced first by a significant widening of the bid-ask spread in the brokered markets in which TRUP CDOs trade and then by a significant decrease in the volume of trades relative to historical levels. The new issue market is also inactive as almost no new TRUP CDOs have been issued since 2007. There are still very few market participants who are willing and/or able to transact for these securities. Thus, a low market price for a particular bond may only provide evidence of stress in the credit markets in general rather than being an indicator of credit problems with a particular issuer or of the fair value of the security.

Given these conditions in the debt markets and the absence of observable transactions in the secondary and new issue markets, management determined that for the TRUP CDOs at September 30, 2013 and December 31, 2012:

The few observable transactions and market quotations that were available were not reliable for purposes of determining fair value,

An income valuation approach technique (present value technique) that maximizes the use of relevant observable inputs and minimizes the use of unobservable inputs was equally or more representative of fair value than the market approach valuation technique, and

The Company's TRUP CDOs should be classified exclusively within Level 3 of the fair value hierarchy because of the significant assumptions required to determine fair value at the measurement date.

The TRUP CDO valuations were derived using input from independent third parties who used proprietary cash flow models for analyzing collateralized debt obligations. Their approaches to determining fair value involve considering the credit quality of the collateral, assuming a level of defaults based on the probability of default of each underlying trust preferred security, creating expected cash flows for each TRUP CDO security and discounting that cash flow at an appropriate risk-adjusted rate plus a liquidity premium.

Where appropriate, management reviewed the valuation methodologies and assumptions used by the independent third party providers and for certain securities determined that the fair value estimates were reasonable and utilized those estimates in the Company's reported financial statements, while for other securities management adjusted the third party providers' modeling to be more reflective of the characteristics of the Company's remaining TRUP CDOs. The result of this fair value analysis of these Level 3 measurements was a fair value loss of $\$ 9,000$ in the quarter ended September 30, 2013. This loss was primarily the result of the passage of time and no change in the spread between the benchmark credit equivalent index and a similar maturity point on the interest rate swap curve was incorporated into the discount rate used to establish the fair value.

At September 30, 2013, Banner also owned approximately $\$ 19$ million in amortized cost of TPS securities issued by three individual financial institutions for which no direct market data or independent valuation source is available. Similar to the TRUP CDOs above, there were too few, if any, issuances of new TPS securities or sales of existing TPS securities to provide Level 1 or even Level 2 fair value measurements for these securities. Management, therefore, utilized a discounted cash-flow model to calculate the present value of each security's expected future cash flows to determine their respective fair values. In the current quarter, the Company again sought input from independent third parties to help it establish an appropriate set of parameters to identify a reasonable range of discount rates for use in its fair value model. The various sources of input were somewhat conflicting, but as has been the case for some time indicated very little change from recent periods. Management concluded that any general market tightening of credit spreads should be offset by an increase in the liquidity premium when determining an appropriate discount rate to apply to the valuation of these TPS securities. These factors were then incorporated into the model at September 30, 2013, and discount rates equal to three-month LIBOR plus 525 basis points were used to calculate the respective fair values of these securities, the same spread to LIBOR used over the last five quarters. With the discount rate relatively unchanged since the prior quarter-end, the resulting fair value change was a gain of $\$ 9,000$ in the quarter ended September 30, 2013. The Company has and will continue to assess the appropriate fair value hierarchy for determination of these fair values on a quarterly basis.

Fair valuations for FHLB advances are estimated using fair market values provided by the lender, the FHLB of Seattle. The FHLB of Seattle prices advances by discounting the future contractual cash flows for individual advances using its current cost of funds curve to provide the discount rate. Management considers this to be a Level 2 input method.

The fair valuations of junior subordinated debentures (TPS-related debt that the Company has issued) were also estimated using discounted cash flows. As of September 30, 2013, all of these debentures carry interest rates that reset quarterly, using the three-month LIBOR index plus spreads of $1.38 \%$ to $3.35 \%$. While the quarterly reset of the index on this debt would seemingly keep its fair value reasonably close to book value, the disparity in the fixed spreads above the index and the inability to determine realistic current market spreads, due to lack of new issuances and trades, resulted in having to rely more heavily on assumptions about what spread would be appropriate if market transactions were to take place. As noted above in the discussions of TPS securities and TRUP CDOs, because of the unprecedented disruption of certain financial markets, management concluded that there were insufficient transactions or other indicators to reflect these measurements as Level 1 or Level 2 inputs. Due to the reliance on assumptions and not on directly observable transactions, management believes fair value for this instrument should follow a Level 3
input methodology. Since the discount rate used in the fair value modeling is the most sensitive unobservable estimate in the calculation, the Company again utilized input from the same independent third party noted above to help it establish an appropriate set of parameters to identify a reasonable range of discount rates for use in its fair value model. In valuing the debentures at September 30, 2013, management evaluated the general market conditions as noted above and for the discount rate used the period-ending three-month LIBOR plus 525 basis points, the same spread to LIBOR used over the last five quarters and for the TPS securities, resulting in a fair value loss on these instruments of $\$ 166,000$ in the current quarter ended September 30, 2013.

Derivative instruments include interest rate commitments related to one- to four-family loans and residential mortgage-backed securities and interest rate swaps. The fair value of interest rate lock commitments and forward sales commitments are estimated using quoted or published market prices for similar instruments, adjusted for factors such as pull-through rate assumptions based on historical trends, where appropriate. The fair value of interest rate swaps is determined by using current market quotes on similar instruments provided by active broker/dealers in the swap market. Management considers these to be Level 2 input methods. The changes in the fair value of all of these derivative instruments are primarily attributable to changes in the level of market interest rates. The Company has elected to record the fair value of these derivative instruments on a net basis.

The following tables present financial assets and liabilities measured at fair value on a recurring basis and the level within the fair value hierarchy of the fair value measurements for those assets as of September 30, 2013 and December 31, 2012 (in thousands):

The Company has elected to continue to recognize the interest income and dividends from the securities reclassified to fair value as a component of interest income as was done in prior years when they were classified as available-for-sale. Interest expense related to the FHLB advances and junior subordinated debentures continues to be measured based on contractual interest rates and reported in interest expense. The change in fair market value of these financial instruments has been recorded as a component of other operating income.

Items Measured at Fair Value on a Non-recurring Basis:
Banner records certain impaired loans, REO and mortgage servicing rights on a non-recurring basis.
Carrying values of certain impaired loans are periodically evaluated to determine if valuation adjustments, or partial write-downs, should be recorded. These non-recurring fair value adjustments are recorded when observable market prices or current appraised values of collateral indicate a shortfall in collateral value or discounted cash flows indicate a shortfall compared to current carrying values of the related loan. If the Company determines that the value of the impaired loan is less than the carrying value of the loan, the Company either establishes an impairment reserve as a specific component of the allowance for loan and lease losses (ALLL) or charges off the impaired amount. The remaining impaired loans are evaluated for reserve needs in homogenous pools within the Company's ALLL methodology. As of September 30, 2013, the Company reviewed all of its adversely classified loans totaling \$107 million and identified $\$ 75$ million which were considered impaired. Of those $\$ 75$ million in impaired loans, $\$ 60$ million were individually evaluated to determine if valuation adjustments, or partial write-downs, should be recorded, or if specific impairment reserves should be established. The $\$ 60$ million had original carrying values of $\$ 62$ million
which were reduced by partial write-downs totaling $\$ 2$ million. In addition to these write-downs, in order to bring the impaired loan balances to fair value, the Company also established $\$ 6$ million in specific reserves on these impaired loans. Impaired loans that were collectively evaluated for reserve purposes within homogenous pools totaled $\$ 16$ million and were found to require allowances totaling $\$ 896,000$. All TDRs which are currently performing according to their restructured payment terms were included in the specific reserve analysis. The valuation inputs for impaired loans are considered to be Level 3 inputs.

The Company records REO (acquired through a lending relationship) at fair value on a non-recurring basis. All REO properties are recorded at the lower of the estimated fair value of the properties, less expected selling costs, or the carrying value of the defaulted loans. From time to time, non-recurring fair value adjustments to REO are recorded to reflect partial write-downs based on an observable market price or current appraised value of property. Banner considers any valuation inputs related to REO to be Level 3 inputs. The individual carrying values of these assets are reviewed for impairment at least annually and any additional impairment charges are expensed to operations. For the three months
ended September 30, 2013, the Company recognized $\$ 191,000$ of additional impairment charges related to REO assets, compared to $\$ 1.3$ million for the same quarter one year earlier.

Mortgage servicing rights (MSRs) are reported in other assets. Mortgage servicing rights are initially recorded at fair value and are amortized in proportion to, and over the period of, the estimated future net servicing income of the underlying financial assets. Mortgage servicing rights are subsequently evaluated for impairment based upon the fair value of the rights compared to the amortized cost (remaining unamortized initial fair value). If the fair value is less than the amortized cost, a valuation allowance is created through an impairment charge to servicing fee income. The valuation allowance is subsequently adjusted to reflect changes in the measurement of impairment after the initial measurement of impairment. However, if the fair value is greater than the amortized cost, the amount above the amortized cost is not recognized in the carrying value. During the nine months ended September 30, 2013 and 2012, the Company did not record an impairment charge. However, during the quarter and nine months ended September 30, 2013, the Company recorded a reduction in its valuation allowance for previously recognized impairment charges of $\$ 400,000$ and $\$ 1.0$ million, respectively. Loans serviced for others totaled $\$ 1.086$ billion, $\$ 918$ million and $\$ 850$ million at September 30, 2013, December 31, 2012 and September 30, 2012, respectively. Custodial accounts maintained in connection with this servicing totaled $\$ 3.6$ million, $\$ 4.7$ million and $\$ 7.3$ million at September 30, 2013, December 31, 2012, and September 30, 2012, respectively.

The following tables present financial assets measured at fair value on a non-recurring basis and the level within the fair value hierarchy of the fair value measurements for those assets as of September 30, 2013 and December 31, 2012 (in thousands):

Fair Values of Financial Instruments:
The following table presents estimated fair values of the Company's financial instruments as of September 30, 2013 and December 31, 2012, whether or not recognized or recorded in the consolidated Statements of Financial Condition. The estimated fair value amounts have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is necessary to interpret market data in the development of the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts. The estimated fair value of financial instruments is as follows (in thousands):

| September <br> Carrying | 2013 <br> Estimated Fair <br> Value | December 31, 2012 <br> Calue <br> Value | Estimated Fair <br> Value |
| :--- | :--- | :--- | :--- |
|  |  |  |  |
| $\$ 175,965$ | $\$ 175,965$ | $\$ 181,298$ | $\$ 181,298$ |

| 82,909 | 82,909 | 76,633 | 76,633 |
| 5,089 | 5,089 | 8,548 | 8,548 |

Fair value estimates, methods, assumptions and the level within the fair value hierarchy of the fair value measurements are set forth below for the Company's financial and off-balance-sheet instruments:

Cash and Due from Banks: The carrying amount of these items is a reasonable estimate of their fair value and management considers this to be a Level 1 measurement.

Securities: The estimated fair values of investment securities and mortgaged-backed securities are priced using current active market quotes, if available, which are considered Level 1 measurements. For most of the portfolio, matrix pricing based on the securities' relationship to other benchmark quoted prices is used to establish the fair value. These measurements are considered Level 2. Due to the increasing credit concerns in the capital markets and inactivity in the trust preferred markets that have limited the observability of market spreads for the Company's TPS and TRUP CDO securities (see earlier discussion above in determining the securities' fair market value), management has classified these securities as a Level 3 fair value measure.

Loans Receivable: Fair values are estimated first by stratifying the portfolios of loans with similar financial characteristics. Loans are segregated by type such as multifamily real estate, residential mortgage, nonresidential
mortgage, commercial/agricultural, consumer and other. Each loan category is further segmented into fixed- and adjustable-rate interest terms and by performing and non-performing categories. A preliminary estimate of fair value is then calculated based on discounted cash flows using as a discount rate the current rate offered on similar products, plus an adjustment for liquidity to reflect the non-homogeneous nature of the loans. The preliminary estimate is then further reduced by the amount of the allowance for loan losses to arrive at a final estimate of fair value. Fair value for significant non-performing loans is also based on recent appraisals or estimated cash flows discounted using rates commensurate with risk associated with the estimated cash flows. Assumptions regarding credit risk, cash flows and discount rates are judgmentally determined using available market information and specific borrower information. Management considers this to be a Level 3 measurement.

The fair value of performing residential mortgages held for sale is estimated based upon secondary market sources by type of loan and terms such as fixed or variable interest rates. Management considers this to be a Level 2 measurement.

FHLB Stock: The fair value is based upon the redemption value of the stock which equates to its carrying value. Management considers this to be a Level 3 measurement.

43

Mortgage Servicing Rights: Fair values are estimated based on current pricing for sales of servicing for new loans adjusted up or down based on the serviced loan's interest rate versus current new loan rates. Management considers this to be a Level 3 measurement.

Deposit Liabilities: The fair value of deposits with no stated maturity, such as savings, checking and interest checking accounts, is estimated by applying decay rate assumptions to segregated portfolios of similar deposit types to generate cash flows which are then discounted using short-term market interest rates. The market value of certificates of deposit is based upon the discounted value of contractual cash flows. The discount rate is determined using the rates currently offered on comparable instruments. Management considers this to be a Level 3 measurement.

FHLB Advances and Other Borrowings: Fair valuations for Banner's FHLB advances are estimated using fair market values provided by the lender, the FHLB of Seattle. The FHLB of Seattle prices advances by discounting the future contractual cash flows for individual advances using its current cost of funds curve to provide the discount rate. This is considered to be a Level 2 input method. Other borrowings are priced using discounted cash flows to the date of maturity based on using current rates at which such borrowings can currently be obtained.

Junior Subordinated Debentures: Due to the increasing credit concerns in the capital markets and inactivity in the trust preferred markets that have limited the observability of market spreads (see earlier discussion above in determining the junior subordinated debentures' fair market value), junior subordinated debentures have been classified as a Level 3 fair value measure. Management believes that the credit risk adjusted spread and resulting discount rate utilized is indicative of those that would be used by market participants.

Derivatives: Derivatives include interest rate swap agreements, interest rate lock commitments to originate loans held for sale and forward sales contracts to sell loans and securities related to mortgage banking activities. Fair values for these instruments, which generally change as a result of changes in the level of market interest rates, are estimated based on dealer quotes and secondary market sources. Management considers these to be Level 2 inputs.

Off -Balance Sheet Items: Off-balance sheet financial instruments include unfunded commitments to extend credit, including standby letters of credit, and commitments to purchase investment securities. The fair value of these instruments is not considered practical to estimate without incurring excessive costs and management does not believe the fair value estimates would be material. Other commitments to fund loans totaled $\$ 1.119$ billion and $\$ 925$ million at September 30, 2013 and December 31, 2012, respectively, and have no carrying value at both dates. There were no commitments to purchase securities at September 30, 2013 and one commitment to purchase securities at December 31, 2012 for $\$ 12$ million.

Limitations: The fair value estimates presented herein are based on pertinent information available to management as of September 30, 2013 and December 31, 2012. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these financial statements since that date and, therefore, current estimates of fair value may differ significantly from the amounts presented herein.

Fair value estimates are based on existing on- and off-balance-sheet financial instruments without attempting to estimate the value of anticipated future business. The fair value has not been estimated for assets and liabilities that are not considered financial instruments. Significant assets and liabilities that are not financial instruments include the deferred tax assets/liabilities; land, buildings and equipment; and REO.

## Note 12: INCOME TAXES AND DEFERRED TAXES

The Company files a consolidated income tax return including all of its wholly-owned subsidiaries on a calendar year basis. Income taxes are accounted for using the asset and liability method. Under this method, a deferred tax asset or
liability is determined based on the enacted tax rates which will be in effect when the differences between the financial statement carrying amounts and tax bases of existing assets and liabilities are expected to be reported in the Company's income tax returns. The effect on deferred taxes of a change in tax rates is recognized in income in the period of change. A valuation allowance is recognized as a reduction to deferred tax assets when management determines it is more likely than not that deferred tax assets will not be available to offset future income tax liabilities.

Accounting standards for income taxes prescribe a recognition threshold and measurement process for financial statement recognition and measurement of uncertain tax positions taken or expected to be taken in a tax return, and also provide guidance on the de-recognition of previously recorded benefits and their classification, as well as the proper recording of interest and penalties, accounting in interim periods, disclosures and transition. The Company periodically reviews its income tax positions based on tax laws and regulations and financial reporting considerations, and records adjustments as appropriate. This review takes into consideration the status of current taxing authorities' examinations of the Company's tax returns, recent positions taken by the taxing authorities on similar transactions, if any, and the overall tax environment.

As of September 30, 2013, the Company had an insignificant amount of unrecognized tax benefits for uncertain tax positions, none of which would materially affect the effective tax rate if recognized. The Company does not anticipate that the amount of unrecognized tax benefits will significantly increase or decrease in the next twelve months. The Company's policy is to recognize interest and penalties on unrecognized tax benefits in the income tax expense. The Company files consolidated income tax returns in U.S. federal jurisdiction and in the Oregon and Idaho state jurisdictions. The tax years which remain subject to examination by the taxing authorities are the years ended December 31, 2012, 2011, and 2010. Tax years 2006-2009 are not open for assessment of additional tax, but remain open for adjustments to the amount of NOLs, credit, and other carryforwards utilized in open years or to be utilized in the future.

As of September 30, 2013, the Company's tax receivables included $\$ 9.8$ million related to a refund due from amended federal income tax returns filed for 2005, 2006, 2008 and 2009. In addition, $\$ 450,000$ of interest was recognized as miscellaneous income in the quarter ended September

30, 2013. The tax receivable represents the finalization of the Internal Revenue Service's review that began in 2011 and which ended with the signing, during the three months ended September 30, 2013, of a closing agreement between the IRS and the Company related to these amended federal income tax returns.

## Note 13: CALCULATION OF WEIGHTED AVERAGE SHARES OUTSTANDING FOR EARNINGS PER SHARE (EPS)

The following table reconciles basic to diluted weighted shares outstanding used to calculate earnings per share data dollars and shares (in thousands, except per share data):

|  | Three Months Ended |  | Nine Months Ended |  |
| :--- | :--- | :--- | :--- | :--- |
|  | September 30 |  |  |  |
|  | 2013 | 2012 | September 30 |  |
|  | $\$ 11,665$ | $\$ 15,620$ | 2013 | 2012 |
| Net income (loss) | - | 1,227 | - | $\$ 50,194$ |
| Preferred stock dividend accrual | - | 1,216 | - | 4,327 |
| Preferred stock discount accretion |  | $\$(2,070$ | $)$ | 2,124 |
| Gain on repurchase and retirement of preferred |  | $\$ 15,247$ | $\$ 35,001$ | $\$(2,070$ |
| stock |  |  |  | $\$ 45,813$ |
| Net income (loss) available to common shareholders $\$ 11,665$ | 19,172 | 19,348 | 18,428 |  |
|  |  | 113 | 55 | 61 |
| Basic weighted average shares outstanding | 19,338 | 19,285 | 19,403 | 18,489 |
| Plus unvested restricted stock | 59 |  |  |  |
| Diluted weighted shares outstanding <br> Earnings (loss) per common share | 19,397 | $\$ 0.80$ | $\$ 1.81$ | $\$ 2.49$ |
| Basic | $\$ 0.60$ | $\$ 0.60$ | $\$ 1.80$ | $\$ 2.48$ |
| Diluted | $\$ 0.60$ |  |  |  |

Options to purchase an additional 47,671 shares of common stock as of September 30, 2012 were not included in the computation of diluted earnings per share because their exercise price resulted in them being anti-dilutive. There were no options to purchase additional shares of common stock as of September 30, 2013. Also, as of September 30, 2013, the warrants originally issued to the U.S. Treasury in the fourth quarter of 2008 to purchase up to $\$ 18.6$ million ( 243,998 shares, post reverse-split) of common stock were not included in the computation of diluted EPS for 2013 and 2012 because the exercise price of the warrants were greater than the average market price of common shares. In June 2013, the Treasury sold the warrants in a public auction. That sale did not change the Company's capital position and did not have any impact on the financial accounting and reporting for these securities.

## Note 14: STOCK-BASED COMPENSATION PLANS AND STOCK OPTIONS

The Company operates the following stock-based compensation plans as approved by the shareholders: the 1996 Stock Option Plan, the 1998 Stock Option Plan and the 2001 Stock Option Plan (collectively, SOPs) and the Banner Corporation 2012 Restricted Stock and Incentive Bonus Plan. In addition, during 2006 the Board of Directors approved the Banner Corporation Long-Term Incentive Plan, an account-based benefit plan which for reporting purposes is considered a stock appreciation rights plan.

Restricted Stock Grants. Under the 2012 Restricted Stock Plan, which was approved on April 24, 2012, the Company is authorized to issue up to 300,000 shares of its common stock to provide a means for attracting and retaining highly skilled officers of Banner Corporation and its affiliates. Shares granted under the Plan have a minimum vesting period of three years. The Plan will continue in effect for a term of ten years, after which no further awards may be granted. Vesting requirements may include time-based conditions, performance-based conditions, or market-based conditions. The 2012 Restricted Stock Plan was amended on April 23, 2013 to provide for the ability to grant (1) cash-denominated incentive-based awards payable in cash or common stock, including those that are eligible to
qualify as qualified performance-based compensation for the purposes of Section 162(m) of the Code and (2) restricted stock awards that qualify as qualified performance-based compensation for the purposes of Section 162(m) of the Code. As of September 30, 2013, the Company had granted 189,426 shares of restricted stock from the 2012 Restricted Stock Plan, of which 31,178 shares had vested and 158,248 shares remain unvested.

Additionally, the Company granted shares of restricted common stock to Mark J. Grescovich, President and Chief Executive Officer of Banner Bank and Banner Corporation on August 22, 2010 and on August 23, 2011. The restricted shares were granted to Mr. Grescovich in accordance with his employment agreement, which, as an inducement material to his joining the Company and the Bank, provided for the granting of restricted shares on the six-month and the 18 -month anniversaries of the effective date of the agreement. The shares vest in one-third annual increments over the subsequent three-year periods following the grants. A total of 34,257 shares were granted. As of September 30, 2013, 28,359 shares had vested and 5,898 shares remain unvested.

The expense associated with all restricted stock grants was $\$ 482,000$ and $\$ 1,004,000$, respectively, for the three and nine-month periods ended September 30, 2013 and was $\$ 193,000$ and $\$ 293,000$, respectively, for the three and nine-month periods ended September 30, 2012. Unrecognized compensation expense for these awards as of September 30, 2013 was $\$ 3.7$ million and will be amortized over the next 31 months.

Stock Options. Under the SOPs, Banner reserved 2,284,186 shares for issuance pursuant to the exercise of stock options to be granted to directors and employees. Authority to grant additional options under the 1996 Stock Option Plan terminated on July 26, 2006. Authority to grant additional options under the 1998 Stock Option Plan terminated on July 24, 2008. Authority to grant additional options under the 2001 Stock Option Plan terminated on April 20, 2011. The exercise price of the stock options is set at $100 \%$ of the fair market value of the stock price on the date of grant. Options granted vest at a rate of $20 \%$ per year from the date of grant and any unexercised incentive stock options will expire ten years after date of grant or 90 days after employment or service ends.

During the nine months ended September 30, 2013 and 2012, the Company did not grant any stock options. Additionally, there were no significant modifications made to any stock option grants during the period. The fair values of stock options granted are amortized as compensation expense on a straight-line basis over the vesting period of the grant. There was no stock-based compensation costs related to the SOPs for the quarters ended September 30, 2013 or September 30, 2012. For the nine months ended September 30, 2013 there were no stock based compensation costs related to the SOPs and for the nine months ended September 30, 2012 there was $\$ 6,000$ in compensation costs related to the SOPs. The SOPs' stock option grant compensation costs are generally based on the fair value calculated from the Black-Scholes option pricing on the date of the grant award. The Black-Scholes model assumes an expected stock price volatility based on the historical volatility at the date of the grant and an expected term based on the remaining contractual life of the vesting period. The Company bases the estimate of risk-free interest rate on the U.S. Treasury Constant Maturities Indices in effect at the time of the grant. The dividend yield is based on the current quarterly dividend in effect at the time of the grant.

During the three and nine months ended September 30, 2013 and 2012, there were no exercises of stock options. Cash was not used to settle any equity instruments previously granted. The Company issues shares from authorized but unissued shares upon the exercise of stock options. The Company does not currently expect to repurchase shares from any source to satisfy such obligations under the SOPs.

Banner Corporation Long-Term Incentive Plan: The Plan is an account-based type of benefit, the value of which is directly related to changes in the value of Company stock, dividends declared on the Company stock and changes in Banner Bank's average earnings rate, and is considered a stock appreciation right (SAR). Each SAR entitles the holder to receive cash, upon vesting, equal to the excess of the fair market value of a share of the Company's common stock on the date of exercise over the fair market value of such share on the date granted plus for some grants the dividends declared on the stock from the date of grant to the date of vesting. The primary objective of the Plan is to create a retention incentive by allowing officers who remain with the Company or the Banks for a sufficient period of time to share in the increases in the value of Company stock. The Company re-measures the fair value of SARs each reporting period until the award is settled and compensation expense is recognized each reporting period for changes in fair value and vesting. To adjust for a change in its estimated liability pursuant to the Plan, the Company recognized a compensation expense of $\$ 286,000$ for the three months ended September 30, 2013 and a total compensation expense of $\$ 526,000$ for the nine months ended September 30, 2013. During 2012, the Company recognized compensation expense of $\$ 105,000$ and $\$ 181,000$ for the three months and nine months ended September 30, 2012. At September 30, 2013, the aggregate liability related to SARs was $\$ 1,079,000$ and was included in deferred compensation.

## Note 15: COMMITMENTS AND CONTINGENCIES

## Financial Instruments with Off-Balance-Sheet Risk

We have financial instruments with off-balance-sheet risk generated in the normal course of business to meet the financing needs of our customers. These financial instruments include commitments to extend credit, commitments related to standby letters of credit, commitments to originate loans, commitments to sell loans, commitments to buy and sell mortgage-backed and other securities. These instruments involve, to varying degrees, elements of credit and
interest rate risk similar to the risk involved in on-balance sheet items recognized in our Consolidated Statements of Financial Condition.

Our exposure to credit loss in the event of nonperformance by the other party to the financial instrument from commitments to extend credit and standby letters of credit is represented by the contractual notional amount of those instruments. We use the same credit policies in making commitments and conditional obligations as for on-balance-sheet instruments.

Outstanding commitments for which no asset or liability for the notional amount has been recorded consisted of the following at the dates indicated (in thousands):

Commitments to extend credit
Standby letters of credit and financial guarantees
Commitments to originate loans
Commitments to purchase investment securities
Derivatives also included in Note 16:
Commitments to originate loans held for sale
Commitments to sell loans secured by one- to four residential properties
Commitments to sell securities related to mortgage banking activities

Contract or Notional Amount

| September 30, | December 31, |
| :--- | :--- |
| 2013 | 2012 |
| $\$ 1,092,139$ | $\$ 907,892$ |
| 8,097 | 6,660 |
| 18,657 | 10,733 |
| - | 11,500 |

| 30,181 | 89,049 |
| :--- | :--- |
| 17,877 | 70,263 |
| 13,470 | 41,500 |

41,500

Commitments to extend credit are agreements to lend to a customer, as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Many of the commitments may expire without being drawn upon; therefore, the total commitment amounts do not necessarily represent future cash requirements. Each customer's creditworthiness is evaluated on a case-by-case basis. The amount of collateral obtained, if deemed necessary upon extension of credit, is based on management's credit evaluation of the customer. The type of collateral held varies, but may include accounts receivable, inventory, property, plant and equipment, and income producing commercial properties.

Standby letters of credit are conditional commitments issued to guarantee a customer's performance or payment to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

Interest rates on residential one- to four-family mortgage loan applications are typically rate locked (committed) to customers during the application stage for periods ranging from 30 to 60 days, the most typical period being 45 days. Traditionally these loan applications with rate lock commitments had the pricing for the sale of these loans locked with various qualified investors under a best-efforts delivery program at or near the time the interest rate is locked with the customer. The Bank then attempts to deliver these loans before their rate locks expired. This arrangement generally required delivery of the loans prior to the expiration of the rate lock. Delays in funding the loans required a lock extension. The cost of a lock extension at times was borne by the customer and at times by the Bank. These lock extension costs have not had a material impact to our operations. In 2012, the Company also began entering into forward commitments at specific prices and settlement dates to deliver either: (1) residential mortgage loans for purchase by secondary market investors (i.e., Freddie Mac or Fannie Mae), or (2) mortgage-backed securities to broker/dealers. The purpose of these forward commitments is to offset the movement in interest rates between the execution of its residential mortgage rate lock commitments with borrowers and the sale of those loans to the secondary market investor. There were no counterparty default losses on forward contracts in the nine months ended September 30, 2013 or September 30, 2012. Market risk with respect to forward contracts arises principally from changes in the value of contractual positions due to changes in interest rates. We limit our exposure to market risk by monitoring differences between commitments to customers and forward contracts with market investors and securities broker/dealers. In the event we have forward delivery contract commitments in excess of available mortgage loans, the transaction is completed by either paying or receiving a fee to or from the investor or broker/dealer equal to the increase or decrease in the market value of the forward contract.

## NOTE 16: DERIVATIVES AND HEDGING

The Company, through its Banner Bank subsidiary, is party to various derivative instruments that are used for asset and liability management and customer financing needs. Derivative instruments are contracts between two or more parties that have a notional amount and an underlying variable, require no net investment and allow for the net settlement of positions. The notional amount serves as the basis for the payment provision of the contract and takes the form of units, such as shares or dollars. The underlying variable represents a specified interest rate, index, or other component. The interaction between the notional amount and the underlying variable determines the number of units to be exchanged between the parties and influences the market value of the derivative contract. The Company obtains dealer quotations to value its derivative contracts.

The Company's predominant derivative and hedging activities involve interest rate swaps related to certain term loans and forward sales contracts associated with mortgage banking activities. Generally, these instruments help the Company manage exposure to market risk and meet customer financing needs. Market risk represents the possibility that economic value or net interest income will be adversely affected by fluctuations in external factors such as market-driven interest rates and prices or other economic factors.

## Derivatives Designated in Hedge Relationships

The Company's fixed rate loans result in exposure to losses in value or net interest income as interest rates change. The risk management objective for hedging fixed rate loans is to effectively convert the fixed rate received to a floating rate. The Company has hedged exposure to changes in the fair value of certain fixed rate loans through the use of interest rate swaps. For a qualifying fair value hedge, changes in the value
of the derivatives are recognized in current period earnings along with the corresponding changes in the fair value of the designated hedged item attributable to the risk being hedged.

In a program brought to Banner Bank through its merger with F\&M Bank in 2007, customers received fixed interest rate commercial loans and the Bank subsequently hedged that fixed rate loan by entering into an interest rate swap with a dealer counterparty. The Bank receives fixed rate payments from the customers on the loans and makes similar fixed rate payments to the dealer counterparty on the swaps in exchange for variable rate payments based on the one-month LIBOR index. These interest rate swaps are designated as fair value hedges. Through application of the "short cut method of accounting," there is an assumption that the hedges are effective. The Bank discontinued originating interest rate swaps under this program in 2008.

As of September 30, 2013 and December 31, 2012, the notional values or contractual amounts and fair values of the Company's derivatives designated in hedge relationships were as follows (in thousands):

|  | Asset Derivatives <br> September 30, 2013 |  | December 31, 2012 |  | Liability Derivatives |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | September 30, 2013 | December 31, 2012 |  |
|  | Notional/ <br> Contract <br> Amount | Fair <br> Value ${ }^{(1)}$ |  |  | Notional/ Contract Amount | Fair Value ${ }^{(1)}$ | Notional/ Contract Amount | Fair <br> Value ${ }^{(2)}$ | Notional/ <br> Contract <br> Amount | Fair Value ${ }^{(2)}$ |
| Interest rate swaps | \$7,500 | \$ 1,419 | \$10,507 | \$2,163 | \$7,500 | \$ 1,419 | \$ 10,507 | \$2,163 |

${ }^{(1)}$ Included in Loans Receivable on the Consolidated Statement of Financial Condition.
${ }^{(2)}$ Included in Other Liabilities on the Consolidated Statement of Financial Condition.
Derivatives Not Designated in Hedge Relationships
Interest Rate Swaps. The Company's subsidiary, Banner Bank, has been using an interest rate swap program for commercial loan customers, termed the Back-to-Back Program, since 2010. In the Back-to-Back Program, the Bank provides the client with a variable rate loan and enters into an interest rate swap in which the client receives a variable rate payment in exchange for a fixed rate payment. The Bank offsets its risk exposure by entering into an offsetting interest rate swap with a dealer counterparty for the same notional amount and length of term as the client interest rate swap providing the dealer counterparty with a fixed rate payment in exchange for a variable rate payment. There are also a few interest rate swaps from prior to 2009 that were not designated in hedge relationships that are included in these totals. These swaps do not qualify as designated hedges; therefore, each swap is accounted for as a free standing derivative.

Mortgage Banking. In the normal course of business, the Company sells originated mortgage loans into the secondary mortgage loan markets. During the period of loan origination and prior to the sale of the loans in the secondary market, the Company has exposure to movements in interest rates associated with written rate lock commitments with potential borrowers to originate loans that are intended to be sold and for closed loans that are awaiting sale and delivery into the secondary market.

Written loan commitments that relate to the origination of mortgage loans that will be held for resale are considered free-standing derivatives and do not qualify for hedge accounting. Written loan commitments generally have a term of up to 60 days before the closing of the loan. The loan commitment does not bind the potential borrower to enter into the loan, nor does it guarantee that the Company will approve the potential borrower for the loan. Therefore, when determining fair value, the Company makes estimates of expected "fallout" (loan commitments not expected to close), using models which consider cumulative historical fallout rates, current market interest rates and other factors.

Written loan commitments in which the borrower has locked in an interest rate results in market risk to the Company to the extent market interest rates change from the rate quoted to the borrower. The Company economically hedges the risk of changing interest rates associated with its interest rate lock commitments by entering into forward sales contracts.

Mortgage loans which are held for sale are subject to changes in fair value due to fluctuations in interest rates from the loan's closing date through the date of sale of the loans into the secondary market. Typically, the fair value of these loans declines when interest rates increase and rises when interest rates decrease. To mitigate this risk, the Company enters into forward sales contracts on a significant portion of these loans to provide an economic hedge against those changes in fair value. Mortgage loans held for sale and the forward sales contracts are recorded at fair value with ineffective changes in value recorded in current earnings as loan sales and servicing income.

As of September 30, 2013 and December 31, 2012, the notional values or contractual amounts and fair values of the Company's derivatives not designated in hedge relationships were as follows (in thousands):

|  | Asset Derivatives September 30, 2013 |  | December 31, 2012 |  | Liability Derivatives September 30, 2013 |  | December 31, 2012 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Notional/ <br> Contract <br> Amount | Fair <br> Value ${ }^{(1)}$ | Notional/ <br> Contract <br> Amount | Fair Value | Notional/ <br> Contract <br> Amount | Fair Value (2) | Notional/ <br> Contract <br> Amount | Fair Value ${ }^{(2)}$ |
| Interest rate swaps | \$ 102,673 | \$3,196 | \$ 100,447 | \$6,190 | \$ 102,673 | \$3,196 | \$ 100,447 | \$6,190 |
| Mortgage loan commitments | 15,277 | 271 | 45,363 | 436 | 14,904 | 223 | 43,686 | 74 |

|  | \$132,854 | \$3,690 | \$ 189,496 | \$6,700 | \$131,047 | \$3,670 | \$185,633 | \$6,385 |

${ }^{(1)}$ Included in Other Assets on the Consolidated Statements of Financial Condition.
${ }^{(2)}$ Included in Other Liabilities on the Consolidated Statements of Financial Condition.
Gains (losses) recognized in income on non-designated hedging instruments for the three months ended September 30, 2013 and 2012 were as follows (in thousands):

|  |  | Three Months Ended |  |
| :--- | :--- | :--- | :--- |
|  | September 30 |  |  |
| Mortgage loan commitments | Location on Income Statement | 2013 | 2012 |
| Forward sales contracts | Mortgage banking operations | $\$ 651$ | $\$ 891$ |
|  | Mortgage banking operations | $(952$ | $)(668$ |

The Company is exposed to credit-related losses in the event of nonperformance by the counterparty to these agreements. Credit risk of the financial contract is controlled through the credit approval, limits, and monitoring procedures and management does not expect the counterparties to fail their obligations.

In connection with the interest rate swaps between Banner Bank and the dealer counterparties, the agreements contain a provision where if Banner Bank fails to maintain its status as a well/adequately capitalized institution, then the counterparty could terminate the derivative positions and Banner Bank would be required to settle its obligations. Similarly, Banner Bank could be required to settle its obligations under certain of its agreements if specific regulatory events occur, such as a publicly issued prompt corrective action directive, cease and desist order, or a capital maintenance agreement that required Banner Bank to maintain a specific capital level. If Banner Bank had breached any of these provisions at September 30, 2013 or December 31, 2012, it could have been required to settle its obligations under the agreements at the termination value. As of September 30, 2013 and December 31, 2012, the termination value of derivatives in a net liability position related to these agreements was $\$ 3.4$ million and $\$ 8.4$ million, respectively. The Company generally posts collateral against derivative liabilities in the form of government agency-issued bonds, mortgage-backed securities, or commercial mortgage-backed securities. Collateral posted against derivative liabilities was $\$ 7.6$ million and $\$ 12.5$ million as of September 30, 2013 and December 31, 2012, respectively.

Derivative assets and liabilities are recorded at fair value on the balance sheet and do not take into account the effects of master netting agreements. Master netting agreements allow the Company to settle all derivative contracts held with a single counterparty on a net basis and to offset net derivative positions with related collateral where applicable.

The following table illustrates the potential effect of the Company's derivative master netting arrangements, by type of financial instrument, on the Company's Statement of Financial Condition as of September 30, 2013 and December 31, 2012 (in thousands):

September 30, 2013

ITEM 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations

## Executive Overview

We are a bank holding company incorporated in the State of Washington and own two subsidiary banks, Banner Bank and Islanders Bank. Banner Bank is a Washington-chartered commercial bank that conducts business from its main office in Walla Walla, Washington and, as of September 30, 2013, its 85 branch offices and eight loan production offices located in Washington, Oregon and Idaho. Islanders Bank is also a Washington-chartered commercial bank and conducts its business from three locations in San Juan County, Washington. Banner Corporation is subject to regulation by the Board of Governors of the Federal Reserve System (the Federal Reserve Board). Banner Bank and Islanders Bank (the Banks) are subject to regulation by the Washington State Department of Financial Institutions, Division of Banks and the Federal Deposit Insurance Corporation (the FDIC). As of September 30, 2013, we had total consolidated assets of $\$ 4.3$ billion, total loans of $\$ 3.3$ billion, total deposits of $\$ 3.5$ billion and total stockholders' equity of $\$ 530$ million.

Banner Bank is a regional bank which offers a wide variety of commercial banking services and financial products to individuals, businesses and public sector entities in its primary market areas. Islanders Bank is a community bank which offers similar banking services to individuals, businesses and public entities located in the San Juan Islands. The Banks' primary business is that of traditional banking institutions, accepting deposits and originating loans in locations surrounding their offices in portions of Washington, Oregon and Idaho. Banner Bank is also an active participant in the secondary market, engaging in mortgage banking operations largely through the origination and sale of one- to four-family residential loans. Lending activities include commercial business and commercial real estate loans, agriculture business loans, construction and land development loans, one- to four-family residential loans and consumer loans.

Banner Corporation's successful execution of its strategic plan and operating initiatives continued in the third quarter, as evidenced by our solid profitability for the quarter and nine months ended September 30, 2013. Highlights for the quarter included further improvement in our asset quality, strong deposit growth, solid revenues from core operations and additional client acquisition. Additionally, the quarterly cash dividend was increased $25 \%$ to $\$ 0.15$ per share, reflecting the strong performance and our expectation of continued success and sustained profitability.

Despite persistently weak economic conditions and exceptionally low interest rates which have created an unusually challenging banking environment for an extended period, the Company experienced marked improvement and consistent profitability in 2012 which continued in the first nine months of 2013. For the quarter ended September 30, 2013, we had net income available to common shareholders of $\$ 11.7$ million, or $\$ 0.60$ per diluted share, compared to a net income to common shareholders of $\$ 15.2$ million, or $\$ 0.79$ per diluted share, for the quarter ended September 30, 2012. For the nine months ended September 30, 2013, our net income to common shareholders was $\$ 35.0$ million, or $\$ 1.80$ per diluted share, compared to net income to common shareholders of $\$ 45.8$ million, or $\$ 2.48$ per diluted share for the same period a year earlier. Although there continue to be indications that economic conditions are improving from the recessionary downturn, the pace of recovery has been modest and uneven and ongoing stress in the economy will likely continue to be challenging going forward. As a result, our future operating results and financial performance will be significantly affected by the course of recovery. However, over the past two years we have significantly improved our risk profile by aggressively managing and reducing our problem assets, which has resulted in lower credit costs and stronger revenues, and which we believe has positioned the Company well to meet this challenging environment.

Our return to consistent profitability was punctuated in the second quarter of 2012 by management's decision to reverse the valuation allowance against our deferred tax assets. This decision resulted in a substantial tax benefit in the second quarter, as well as for the full year 2012, and resulted in a significant reduction in our tax expense for the quarter ended September 30, 2012. The decision to reverse the valuation allowance reflected our confidence in the
sustainability of our future profitability. Further, as a result of our return to profitability, including the substantial recovery of our deferred tax asset, our improved asset quality and operating trends, strong capital position and our expectation for sustainable profitability for the foreseeable future, we also significantly reduced the credit portion of the discount rate utilized to estimate the fair value of the junior subordinated debentures issued by the Company. Changes in these two significant accounting estimates, while substantial, represent non-cash valuation adjustments that had no effect on our liquidity or our ability to fund our operations.

As a result of substantial reserves already in place representing $2.34 \%$ of total loans outstanding at both September 30 and June 30, 2013, as well as declining net charge-offs, Banner did not record a provision for loan losses in either the quarter or nine months ended September 30, 2013. By contrast, we recorded a $\$ 3.0$ million provision in the third quarter a year ago, which contributed to a $\$ 12.0$ million provision for the nine months ended September 30, 2012. The decrease in loan loss provisioning from a year earlier reflects significant progress in reducing the levels of delinquencies, non-performing loans and net charge-offs, particularly for loans for the construction of one- to four-family homes and for acquisition and development of land for residential properties. The allowance for loan losses at September 30, 2013 was $\$ 76.7$ million, representing $308 \%$ of non-performing loans. Non-performing loans decreased by $5 \%$ to $\$ 24.9$ million at September 30, 2013, compared to $\$ 26.1$ million three months earlier, and decreased $36 \%$ when compared to $\$ 38.7$ million a year earlier. (See Note 7, Loans Receivable and the Allowance for Loan Losses, as well as "Asset Quality" below in this Form 10-Q.)

Aside from the level of loan loss provision, our operating results depend primarily on our net interest income, which is the difference between interest income on interest-earning assets, consisting of loans and investment securities, and interest expense on interest-bearing liabilities, composed primarily of customer deposits and borrowings. Net interest income is primarily a function of our interest rate spread, which is the difference between the yield earned on interest-earning assets and the rate paid on interest-bearing liabilities, as well as a function of the average balances of interest-earning assets and interest-bearing liabilities. Our net interest income before provision for loan losses decreased modestly to $\$ 41.9$ million for the quarter ended September 30, 2013, compared to $\$ 42.7$ million for the same quarter one year earlier. During the same period, our interest rate spread decreased to $4.07 \%$ from $4.18 \%$. These decreases in net interest income and interest rate spread reflect declining yields on performing loans and securities, partially offset by continuing reductions in deposit and other funding costs.

Our net income also is affected by the level of our other operating income, including deposit fees and service charges, loan origination and servicing fees, and gains and losses on the sale of loans and securities, as well as our non-interest operating expenses and income tax provisions. In addition, our net income is affected by the net change in the valuation of certain financial instruments carried at fair value and in certain periods by other-than-temporary impairment (OTTI) charges or recoveries. (See Note 11 of the Selected Notes to the Consolidated Financial Statements.) For the quarter ended September 30, 2013, we recorded a net fair value loss of $\$ 352,000$ in fair value adjustments, which was partially offset by $\$ 2,000$ in gains on sale of securities. In comparison, for the quarter ended September 30, 2012, we recorded a net fair value gain of $\$ 473,000$ and $\$ 19,000$ in gains on sale of securities, partially offset by $\$ 409,000$ in OTTI losses. For the nine months ended September 30, 2013, we recorded a net loss of $\$ 2.0$ million in fair value adjustments, which was partially offset by $\$ 1.0$ million in gains on sale of securities and by $\$ 409,000$ in OTTI recoveries. In comparison, we recorded a net fair value loss of $\$ 16.9$ million (primarily related to the estimated fair value or our junior subordinated debentures) and an OTTI loss of $\$ 409,000$ for the nine months ended September 30, 2012, which were partially offset by $\$ 48,000$ in gains on sale of securities.

Our total other operating income, which includes the gain on sale of securities, OTTI recovery and changes in the value of financial instruments carried at fair value was $\$ 10.1$ million for the quarter ended September 30, 2013, compared to $\$ 11.7$ million for the quarter ended September 30, 2012. Total other operating income was $\$ 30.8$ million for the nine months ended September 30, 2013, compared to $\$ 13.6$ million for the nine months ended September 30, 2012. However, other operating income excluding the gain on sale of securities, OTTI adjustments and changes in the value of financial instruments, which we believe is more indicative of our core operations, decreased $10 \%$ to $\$ 10.5$ million for the quarter ended September 30, 2013, compared to $\$ 11.6$ million for the same quarter a year earlier, as a result of substantially decreased revenues from our mortgage banking operations and despite significantly increased deposit fees and service charges fueled by growth in non-interest-bearing deposit accounts. For the nine months ended September 30, 2013, other operating income from core operations increased $1 \%$ to $\$ 31.3$ million, compared to $\$ 30.9$ million for the same period a year earlier, as increased deposit fees and service charges more than offset decreased mortgage banking revenues.

Our total revenues (net interest income before the provision for loan losses plus total other operating income) for the third quarter of 2013 decreased $\$ 2.3$ million, or $4 \%$, to $\$ 52.0$ million, compared to $\$ 54.4$ million for the same period a year earlier, as a result of decreased net interest income and mortgage banking revenues, as well as changes in fair value adjustments, which were only partially offset by increased deposit fees and service charges. However, our total revenues, excluding fair value and OTTI adjustments and gain on sale of securities, which we also believe are more indicative of our core operations, remained strong at $\$ 52.4$ million for the quarter ended September 30, 2013, a $\$ 1.9$ million, or $4 \%$ decrease, compared to $\$ 54.3$ million for the same period a year earlier. Our total revenues for the nine months ended September 30, 2013 increased $\$ 16.2$ million, or $12 \%$ to $\$ 155.9$ million, compared to $\$ 139.7$ million for the same period a year earlier, largely as a result of the changes in fair value adjustments. Our total revenues from core operations decreased slightly by $\$ 570,000$, or $0.4 \%$, to $\$ 156.4$ million for the nine months ended September 30, 2013, compared to $\$ 157.0$ million for the same period a year earlier, as the increased deposit fees and service charges were not quite sufficient to fully offset the decreases in net interest income and mortgage banking revenues.

Our other operating expenses increased in the third quarter of 2013 compared to a year earlier largely as a result of increased compensation expenses and reduced gains on the sale of real estate owned, which were partially offset by a net decrease in all other operating expenses. Other operating expenses were $\$ 34.5$ million for the quarter ended September 30, 2013, compared to $\$ 33.4$ million for the same quarter a year earlier. For the nine months ended September 30, 2013, other operating expenses were $\$ 104.0$ million, compared to $\$ 106.9$ million for the same period a year earlier, as increased compensation costs were generally offset by decreased costs related to real estate owned and a net decrease in all other operating expenses.

Other operating income, revenues and other earnings information excluding fair value adjustments, OTTI losses or recoveries, and gains or losses on sale of securities are non-GAAP financial measures. Management has presented these and other non-GAAP financial measures in this discussion and analysis because it believes that they provide useful and comparative information to assess trends in our core operations. However, these non-GAAP financial measures are supplemental and are not a substitute for any analysis based on GAAP. Where applicable, we have also presented comparable earnings information using GAAP financial measures. For a reconciliation of these non-GAAP financial measures, see the tables below. Because not all companies use the same calculations, our presentation may not be comparable to other similarly titled measures as calculated by other companies. See "Comparison of Results of Operations for the Three and Nine Months Ended September 30, 2013 and 2012" for more detailed information about our financial performance.

The following tables set forth reconciliations of non-GAAP financial measures discussed in this report (dollars in thousands):

Total other operating income (loss)
Exclude gain on sale of securities

Exclude gain on sale of securities
Exclude other-than-temporary impairment (recovery) loss
Exclude change in valuation of financial instruments carried at fair value
Exclude related tax expense
Total earnings, excluding fair value adjustments, OTTI and gain on sale of securities, net of related tax effects

The ratio of tangible common stockholders' equity to tangible assets is also a non-GAAP financial measure. We calculate tangible common equity by excluding other intangible assets and preferred equity from stockholders' equity. We calculate tangible assets by excluding the balance of other intangible assets from total assets. We believe that this is consistent with the treatment by our bank regulatory agencies, which exclude goodwill and other intangible assets from the calculation of risk-based capital ratios. In addition, excluding preferred equity, the level of which may vary from company to company, allows investors to more easily compare our capital adequacy to other companies in the industry that also use this measure. Management believes that this non-GAAP financial measure provides information to investors that is useful in understanding the basis of our capital position (dollars in thousands).

We offer a wide range of loan products to meet the demands of our customers. Our lending activities are primarily directed toward the origination of real estate and commercial loans. Prior to 2008, real estate lending activities were significantly focused on residential construction and first mortgages on owner-occupied, one- to four-family residential properties; however, over the subsequent four years our origination of construction and land development loans declined materially and the proportion of the portfolio invested in these types of loans declined substantially. More recently, we have experienced increased demand for one- to four-family construction loans and, while outstanding balances have increased only modestly, originations have increased significantly. Our residential mortgage loan originations also decreased during the earlier years of this cycle, although less significantly than the decline in construction and land development lending as exceptionally low interest rates supported demand for loans to refinance existing debt as well as loans to finance home purchases. Refinancing activity was particularly significant in 2012 and in the in the first six months of 2013, leading to meaningful increases in residential mortgage originations during these periods; however, the recent rise in mortgage interest rates slowed origination activity in the quarter ended September 30, 2013 and may result in lower refinancing activity in the future. Despite significant loan originations, in 2012 and 2013 our outstanding balances for residential mortgages have continued to decline, as most of the new originations have been sold in the secondary market while existing residential loans have been repaying at an accelerated pace. Our real estate lending activities also include the origination of multifamily and commercial real estate loans including construction and development loans for these types of properties. While our level of activity and investment in these types of loans has been relatively stable for many, many years, we have experienced an increase in new originations in recent periods. Our commercial business lending is directed toward meeting the credit and related deposit needs of various small- to medium-sized business and agribusiness borrowers operating in our primary market areas. Reflecting the weak economy, in recent periods demand for these types of commercial business loans has been modest. Nevertheless, while commercial and agricultural business loans decreased $\$ 15$ million to $\$ 859$ million at September 30, 2013, compared to $\$ 874$ million at June 30, 2013, they have increased $\$ 36$ million, or $4 \%$, compared to $\$ 823$ million at September 30, 2012. Our consumer loan activity is primarily directed at meeting demand from our existing deposit customers and, while we have increased our emphasis on consumer lending in recent years, demand for consumer loans also has been modest during this period of economic weakness as we believe many consumers have been focused on reducing their personal debt. At September 30, 2013, our net loan portfolio totaled $\$ 3.199$ billion compared to $\$ 3.213$ billion at June 30, 2013 and $\$ 3.135$ billion at September 30, 2012.

Deposits, customer retail repurchase agreements and loan repayments are the major sources of our funds for lending and other investment purposes. We compete with other financial institutions and financial intermediaries in attracting deposits and we generally attract deposits within our primary market areas. Much of the focus of our earlier branch expansion and current marketing efforts have been directed toward attracting additional deposit customer relationships and balances. The long-term success of our deposit gathering activities is reflected not only in the growth of deposit balances, but also in increases in the level of deposit fees, service charges and other payment processing revenues compared to periods prior to that expansion.

Total deposits were $\$ 3.535$ billion at September 30, 2013, compared to $\$ 3.460$ billion three months earlier and $\$ 3.486$ billion a year ago. Following a normal seasonal pattern, non-interest-bearing account balances increased $10 \%$ to $\$ 1.052$ billion at September 30, 2013, compared to $\$ 959$ million at June 30, 2013, and, largely as a result of successful client acquisition strategies, increased $14 \%$ compared to $\$ 919$ million a year ago. Interest-bearing transaction and savings accounts totaled $\$ 1.583$ billion at September 30, 2013, compared to $\$ 1.558$ billion at June 30, 2013 and $\$ 1.480$ billion a year ago, while certificates of deposit further decreased to $\$ 900$ million at September 30, 2013, compared to $\$ 944$ million at June 30, 2013 and $\$ 1.087$ billion a year earlier. Non-certificate core deposits represented $75 \%$ of total deposits at the end of the third quarter, compared to $69 \%$ of total deposits a year earlier.

Management's Discussion and Analysis of Results of Operations is intended to assist in understanding our financial condition and results of operations. The information contained in this section should be read in conjunction with the Consolidated Financial Statements and accompanying Selected Notes to the Consolidated Financial Statements contained in Item 1 of this Form 10-Q.

## Summary of Critical Accounting Policies

Our significant accounting policies are described in Note 1 of the Notes to the Consolidated Financial Statements for the year ended December 31, 2012 included in the 2012 Form 10-K. Various elements of our accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. In particular, management has identified several accounting policies that, due to the judgments, estimates and assumptions inherent in those policies, are critical to an understanding of our financial statements. These policies relate to (i) the methodology for the recognition of interest income, (ii) determination of the provision and allowance for loan and lease losses, (iii) the valuation of financial assets and liabilities recorded at fair value, including OTTI losses, (iv) the valuation of intangibles, such as core deposit intangibles and mortgage servicing rights, (v) the valuation of real estate held for sale and (vi) the valuation of or recognition of deferred tax assets and liabilities. These policies and judgments, estimates and assumptions are described in greater detail below. Management believes that the judgments, estimates and assumptions used in the preparation of the financial statements are appropriate based on the factual circumstances at the time. However, given the sensitivity of the financial statements to these critical accounting policies, the use of other judgments, estimates and assumptions could result in material differences in our results of operations or financial condition. Further, subsequent changes in economic or market conditions could have a material impact on these estimates and our financial condition and operating results in future periods. There have been no significant changes in our application of accounting policies during the first nine months of 2013.

Interest Income: (Note 1) Interest on loans and securities is accrued as earned unless management doubts the collectability of the asset or the unpaid interest. Interest accruals on loans are generally discontinued when loans become 90 days past due for payment of interest and the loans are then placed on nonaccrual status. All previously accrued but uncollected interest is deducted from interest income upon transfer to nonaccrual status. For any future payments collected, interest income is recognized only upon management's assessment that there is a strong likelihood that the full amount of a loan will be repaid or recovered. A loan may be put on nonaccrual status sooner than this policy would dictate if, in management's judgment, the interest may be uncollectable. While less common, similar interest reversal and nonaccrual treatment is applied to investment securities if their ultimate collectability becomes questionable.

Provision and Allowance for Loan Losses: (Note 7) The provision for loan losses reflects the amount required to maintain the allowance for losses at an appropriate level based upon management's evaluation of the adequacy of general and specific loss reserves. We maintain an allowance for loan losses consistent in all material respects with the GAAP guidelines outlined in ASC 450, Contingencies. We have established systematic methodologies for the determination of the adequacy of our allowance for loan losses. The methodologies are set forth in a formal policy and take into consideration the need for an overall general valuation allowance as well as specific allowances that are tied to individual problem loans. We increase our allowance for loan losses by charging provisions for probable loan losses against our income and value impaired loans consistent with the accounting guidelines outlined in ASC 310, Receivables.

The allowance for losses on loans is maintained at a level sufficient to provide for probable losses based on evaluating known and inherent risks in the loan portfolio and upon our continuing analysis of the factors underlying the quality of the loan portfolio. These factors include, among others, changes in the size and composition of the loan portfolio, delinquency rates, actual loan loss experience, current and anticipated economic conditions, detailed analysis of individual loans for which full collectability may not be assured, and determination of the existence and realizable value of the collateral and guarantees securing the loans. Realized losses related to specific assets are applied as a
reduction of the carrying value of the assets and charged immediately against the allowance for loan loss reserve. Recoveries on previously charged off loans are credited to the allowance. The reserve is based upon factors and trends identified by us at the time financial statements are prepared. Although we use the best information available, future adjustments to the allowance may be necessary due to economic, operating, regulatory and other conditions beyond our control. The adequacy of general and specific reserves is based on our continuing evaluation of the pertinent factors underlying the quality of the loan portfolio as well as individual review of certain large balance loans. Loans are considered impaired when, based on current information and events, we determine that it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement. Factors involved in determining impairment include, but are not limited to, the financial condition of the borrower, the value of the underlying collateral and the current status of the economy. Impaired loans are measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of collateral if the loan is collateral dependent. Subsequent changes in the value of impaired loans are included within the provision for loan losses in the same manner in which impairment initially was recognized or as a reduction in the provision that would otherwise be reported. Large groups of smaller-balance homogeneous loans are collectively evaluated for impairment. Loans that are collectively evaluated for impairment include residential real estate and consumer loans and, as appropriate, smaller balance non-homogeneous loans. Larger balance non-homogeneous residential construction and land, commercial real estate, commercial business loans and unsecured loans are individually evaluated for impairment.

Our methodology for assessing the appropriateness of the allowance consists of several key elements, which include specific allowances, an allocated formula allowance and an unallocated allowance. Losses on specific loans are provided for when the losses are probable and estimable. General loan loss reserves are established to provide for inherent loan portfolio risks not specifically provided for on an individual loan basis. The level of general loan loss reserves is based on analysis of potential exposures existing in our loan portfolio including evaluation of historical trends, current market conditions and other relevant factors identified by us at the time the financial statements are prepared. The formula allowance is calculated by applying loss factors to outstanding loans, excluding those loans that are subject to individual analysis for specific allowances. Loss factors are based on our historical loss experience adjusted for significant environmental considerations, including the experience of other banking organizations, which in our judgment affect the collectability of the portfolio as of the evaluation date. The unallocated allowance

55
is based upon our evaluation of various factors that are not directly measured in the determination of the formula and specific allowances. This methodology may result in losses or recoveries differing significantly from those provided in the Consolidated Financial Statements.

While we believe the estimates and assumptions used in our determination of the adequacy of the allowance are reasonable, there can be no assurance that such estimates and assumptions will not be proven incorrect in the future, or that the actual amount of future provisions will not exceed the amount of past provisions or that any increased provisions that may be required will not adversely impact our financial condition and results of operations. In addition, the determination of the amount of the Banks' allowance for loan losses is subject to review by bank regulators as part of the routine examination process, which may result in the adjustment of reserves based upon their judgment of information available to them at the time of their examination.

Fair Value Accounting and Measurement: (Note 11) We use fair value measurements to record fair value adjustments to certain financial assets and liabilities and to determine fair value disclosures. We include in the Notes to the Consolidated Financial Statements information about the extent to which fair value is used to measure financial assets and liabilities, the valuation methodologies used and the impact on our results of operations and financial condition. Additionally, for financial instruments not recorded at fair value we disclose, where appropriate, our estimate of their fair value. For more information regarding fair value accounting, please refer to Note 11 in the Selected Notes to the Consolidated Financial Statements in this report on Form 10-Q.

Other Intangible Assets: (Note 9) Other intangible assets consists primarily of core deposit intangibles (CDI), which are amounts recorded in business combinations or deposit purchase transactions related to the value of transaction-related deposits and the value of the customer relationships associated with the deposits. Core deposit intangibles are being amortized on an accelerated basis over a weighted average estimated useful life of eight years. These assets are reviewed at least annually for events or circumstances that could impact their recoverability. These events could include loss of the underlying core deposits, increased competition or adverse changes in the economy. To the extent other identifiable intangible assets are deemed unrecoverable, impairment losses are recorded in other non-interest expense to reduce the carrying amount of the assets.

Mortgage Servicing Rights: (Note 9) Servicing assets are recognized as separate assets when rights are acquired through purchase or through sale of loans. Generally, purchased servicing rights are capitalized at the cost to acquire the rights. For sales of mortgage loans, the value of the servicing right is estimated and capitalized. Fair value is based on market prices for comparable mortgage servicing contracts. Capitalized servicing rights are reported in other assets and are amortized into non-interest income in proportion to, and over the period of, the estimated future net servicing income of the underlying financial assets.

Real Estate Held for Sale: (Note 8) Property acquired by foreclosure or deed in lieu of foreclosure is recorded at the lower of the estimated fair value of the property, less expected selling costs, or the carrying value of the defaulted loan. Development and improvement costs relating to the property may be capitalized, while other holding costs are expensed. The carrying value of the property is periodically evaluated by management and, if necessary, allowances are established to reduce the carrying value to net realizable value. Gains or losses at the time the property is sold are charged or credited to operations in the period in which they are realized. The amounts the Banks will ultimately recover from real estate held for sale may differ substantially from the carrying value of the assets because of market factors beyond the Banks' control or because of changes in the Banks' strategies for recovering the investment.

Income Taxes and Deferred Taxes: (Note 12) The Company and its wholly-owned subsidiaries file consolidated U.S. federal income tax returns, as well as state income tax returns in Oregon and Idaho. Income taxes are accounted for using the asset and liability method. Under this method a deferred tax asset or liability is determined based on the enacted tax rates which are expected to be in effect when the differences between the financial statement carrying amounts and tax basis of existing assets and liabilities are expected to be reported in the Company's income tax
returns. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date. Under GAAP (ASC 740), a valuation allowance is required to be recognized if it is "more likely than not" that all or a portion of our deferred tax assets will not be realized.

Comparison of Financial Condition at September 30, 2013 and December 31, 2012
General. Total assets increased $\$ 17$ million, or $0.4 \%$, to $\$ 4.283$ billion at September 30, 2013, from $\$ 4.266$ billion at December 31, 2012. Net loans receivable (gross loans less deferred fees and discounts, and allowance for loan losses) increased $\$ 41$ million, or $1.3 \%$, to $\$ 3.199$ billion at September 30, 2013, from $\$ 3.158$ billion at December 31, 2012. The increase in net loans included increases of $\$ 49$ million in commercial real estate loans, $\$ 11$ million in multifamily construction loans, $\$ 33$ million in one- to four-family construction loans, and $\$ 18$ million in commercial business loans, partially offset by decreases of $\$ 38$ million in one- to four-family real estate loans, $\$ 7$ million in agricultural business loans, $\$ 11$ million in commercial construction loans, $\$ 7$ million in consumer loans, $\$ 4$ million in land and land development loans, and $\$ 4$ million in multifamily loans.

The decrease in one- to four-family real estate and consumer loans was largely the result of accelerated prepayments in the current low interest rate environment. The increase in commercial real estate loans included $\$ 30$ million for investment properties and $\$ 19$ million for owner-occupied properties. The increase in construction and development loans was particularly helpful to the net interest margin as interest rates, loan fees and the velocity of turnover in this lending activity are generally higher than for most other categories of loans. The increase in commercial business loans is an encouraging sign of economic activity; however, credit line utilizations remained at relatively low levels and, while average balances outstanding increased compared to the immediately preceding quarter, commercial business loans were modestly lower at September 30, 2013 than at the previous quarter end. Following a normal seasonal reduction in the first quarter, our agricultural loan balances
increased significantly in the second quarter resulting in modest growth on a year-to-date basis. However, also reflecting a seasonal pattern, agricultural loan balances were slightly lower at September 30, 2013 than at June 30, 2013.

The aggregate balance of interest-earning deposits and securities decreased $\$ 1$ million from December 31, 2012 to $\$ 744$ million at September 30, 2013; however, the aggregate balance increased by $\$ 48$ million compared to the prior quarter end as a result of strong deposit growth during the third quarter as well as a number of significant construction and development loan payoffs near the end of the quarter. Interest-earning deposits increased $\$ 40$ million during the quarter and total investment securities increased $\$ 10$ million during the same ninety day period. However, interest-bearing deposits decreased to $\$ 107$ million at September 30, 2013 compared to $\$ 115$ million at December 31, 2012 while total investment securities increased to $\$ 638$ million at September 30, 2013 compared to $\$ 630$ million at December 31, 2012. The securities purchased in recent periods were primarily short- to intermediate-term U.S. Government Agency notes and mortgage-backed securities and, to a lesser extent, intermediate-term taxable and tax-exempt municipal securities. Securities acquired during this period generally have expected maturities ranging from six months to six years. The average effective duration of Banner's securities portfolio was approximately 3.4 years at September 30, 2013. Net fair value adjustments to the portfolio of securities held for trading, which are included in net income, were $\$ 2.0$ million in the nine months ended September 30, 2013. In addition, fair value adjustments for securities designated as available for sale reflected a decrease of $\$ 8$ million for the nine months ended September 30, 2013, which was included net of the associated tax benefit of $\$ 2.7$ million as a component of other comprehensive income and largely occurred during the second quarter as a result of rising interest rates. (See Note 11 of the Selected Notes to the Consolidated Financial Statements, in this Form 10-Q.)

REO decreased $\$ 11$ million, to $\$ 5$ million at September 30, 2013, compared to $\$ 16$ million at December 31, 2012, continuing the improving trend with respect to these non-earning assets. The September 30, 2013 total included $\$ 3$ million in residential construction, land or land development projects and $\$ 2$ million in single-family homes. During the three months ended September 30, 2013, we transferred $\$ 1$ million of loans into REO, disposed of $\$ 4$ million of REO properties recognizing $\$ 1$ million in gains related to those sales, and charged-off $\$ 191,000$ in valuation adjustments. During the nine months ended September 30, 2013, we transferred $\$ 2$ million of loans into REO, disposed of $\$ 16$ million of REO properties recognizing $\$ 2$ million in gains related to those sales, and charged-off $\$ 490,000$ in valuation adjustments (see "Asset Quality" discussion below).
Following a normal seasonal pattern, deposit growth was strong in the third quarter; however, total deposits decreased $\$ 23$ million, or $1 \%$, to $\$ 3.535$ billion at September 30, 2013 from $\$ 3.558$ billion at December 31, 2012 as a result of continued decreases in certificates of deposit. By contrast, non-interest-bearing deposits increased by $\$ 71$ million, or $7 \%$, to $\$ 1.052$ billion at September 30, 2013, compared to $\$ 981$ million at December 31, 2012 and have increased by $14 \%$ compared to a year earlier. Interest-bearing transaction and savings accounts increased by $\$ 36$ million, or $2 \%$, to $\$ 1.583$ billion at September 30, 2013 from $\$ 1.547$ billion at December 31, 2012 and have increased by $7 \%$ compared to a year earlier. Certificates of deposit decreased $\$ 129$ million, or $13 \%$, to $\$ 900$ million at September 30, 2013 from $\$ 1.029$ billion at December 31, 2012. Non-certificate core deposits increased to $75 \%$ of total deposits at the end of the third quarter, compared to $69 \%$ of total deposits a year earlier.

FHLB advances increased $\$ 10$ million to $\$ 20$ million at September 30, 2013 from $\$ 10$ million at December 31, 2012. The new advances were all very short-term maturities with correspondingly low interest rates. Other borrowings, consisting of retail repurchase agreements primarily related to customer cash management accounts, increased \$6 million to $\$ 83$ million at September 30, 2013, compared to $\$ 77$ million at December 31, 2012. No additional junior subordinated debentures were issued or matured during the quarter and the estimated fair value of these instruments increased $\$ 1$ million to $\$ 74$ million at September 30, 2013 from $\$ 73$ million at December 31, 2012. For more information, see Notes 10, 11 and 12 of the Selected Notes to the Consolidated Financial Statements.

Total stockholders' equity increased $\$ 23$ million, or 5\%, to $\$ 530$ million at September 30, 2013 compared to $\$ 507$ million at December 31, 2012. The increase in equity primarily reflects the year-to-date net income reduced by
payment of dividends to common stockholders. Tangible common stockholders' equity, which excludes intangible assets, also increased $\$ 24$ million to $\$ 527$ million, or $12.32 \%$ of tangible assets at September 30, 2013, compared to $\$ 503$ million, or $11.80 \%$ at December 31, 2012. During the nine months ended September 30, 2013, we did not repurchase any shares of Banner Corporation common stock.

Comparison of Results of Operations for the Three and Nine Months Ended September 30, 2013 and 2012
Following three difficult years and despite a still challenging economy, Banner Corporation returned to profitability in 2011 and that progress and profitability continued throughout 2012 and into the first nine months of 2013. For the quarter ended September 30, 2013, we had net income available to common shareholders of $\$ 11.7$ million, or $\$ 0.60$ per diluted share. This compares to net income available to common shareholders of $\$ 15.2$ million, or $\$ 0.79$ per diluted share, for the quarter ended September 30, 2012. For the nine months ended September 30, 2013, our net income available to common shareholders was $\$ 35.0$ million, or $\$ 1.80$ per diluted share. This compares to net income available to common shareholders of $\$ 45.8$ million, or $\$ 2.48$ per diluted share, for the nine months ended September 30, 2012. While our return to profitability has largely resulted from a material decrease in credit costs, particularly our provision for loan losses, it also reflects strong revenue generation from our core operations. The decrease in credit costs reflects a significantly reduced level of non-performing assets while improvement in net revenues has been driven largely by increased deposit fees and other service charges fueled by growth in core deposits and a significant increase in revenues from our mortgage banking operations as well as solid net interest income. Despite these positive trends, the current quarter and nine month results reflect the difficult operating environment presented by continued very low market interest rates and slow economic growth, which resulted in a decline in our net interest margin, modest loan demand and reduced mortgage banking revenues. The current quarter and nine month results also include a normal provision for income taxes while the results for the third quarter a year ago reflect significantly reduced tax expense and the nine month period in 2012 included a benefit from income taxes as a result of partially reversing the valuation allowance for our deferred tax assets during those periods. In addition, for the three and nine months ended September 30, 2012, net income available to
common shareholders was net of a dividend accrual and discount accretion related to our Series A Preferred Stock, neither of which were required in the three and nine months ended September 30, 2013 due to the redemption of the Series A Preferred Stock in the second half of 2012.

Net Interest Income.
Net interest income before provision for loan losses decreased by $\$ 805,000$, or $2 \%$, to $\$ 41.9$ million for the quarter ended September 30, 2013, compared to $\$ 42.7$ million for the same quarter one year earlier, as a modest increase in the average balance of interest-earning assets was more than offset by a decrease in the net interest margin. The net interest margin of $4.09 \%$ for the quarter ended September 30, 2013 was 13 basis points lower than for the same quarter in the prior year. The decrease in the net interest margin compared to a year earlier reflects the impact of persistently low market interest rates on earning asset yields, which was only partially offset by reductions in deposit and other funding costs, as well as further reductions in the adverse effect of non-performing assets. Net collections on nonaccrual loans added one basis point to the margin in the third quarter of 2013, and added approximately four basis points in the third quarter of 2012. In addition, the further decrease in the average balance of real estate owned reduced the adverse effect of this non-interest-earning asset on the net interest margin.

The net interest spread decreased to $4.07 \%$ for the quarter ended September 30, 2013 compared to $4.18 \%$ for the same quarter a year earlier. Reflecting generally lower market interest rates as well as changes in asset mix, the yield on earning assets for the quarter ended September 30, 2013 was $4.40 \%$, a decrease of 26 basis points compared to the same quarter a year earlier. While declining less than asset yields, funding costs were also significantly lower, especially deposit costs which decreased 15 basis points to $0.26 \%$ from $0.41 \%$ a year earlier, leading to a decrease of 15 basis points for all interest-bearing liabilities to $0.33 \%$ for the quarter ended September 30, 2013. Partially offsetting this decline in liability funding costs was a decrease in non-interest-bearing funding from average stockholders' equity as a result of the repurchase and redemption of the Series A Preferred Stock in the second half of 2012.

Net interest income before provision for loan losses decreased by $\$ 1.0$ million, or $1 \%$, to $\$ 125.1$ million for the nine months ended September 30, 2013 compared to $\$ 126.1$ million for the same period one year earlier, as a result of a five basis point decrease in the net interest margin and despite a small increase in average interest-earning assets. The net interest margin decreased to $4.15 \%$ for the nine months ended September 30, 2013 compared to $4.20 \%$ for the same period in the prior year and, similar to the results for the current quarter, this decrease was a result of the effect of lower asset yields and occurred despite much lower funding costs and fewer non-performing assets. The adverse effect on interest income from nonaccruing loans during the nine months ended September 30, 2013 was diminished from previous periods due to continued reductions in nonaccrual loans and it was fully offset by the collection of interest on previously nonaccruing loans. The effect of nonaccruing loans, net of the recovery of interest previously not recognized on loans returning to accrual reduced the margin by six basis points for the same nine month period in the prior year.

Interest Income. Interest income for the quarter ended September 30, 2013 was $\$ 45.0$ million, compared to $\$ 47.2$ million for the same quarter in the prior year, a decrease of $\$ 2.1$ million, or $5 \%$. The decrease in interest income occurred as a result of a decline in the yield on interest-earning assets, which was partially offset by an increase in average balances. The average balance of interest-earning assets was $\$ 4.061$ billion for the quarter ended September 30, 2013, an increase of $\$ 34$ million, or $1 \%$, compared to $\$ 4.027$ billion one year earlier. The yield on average interest-earning assets decreased to $4.40 \%$ for the quarter ended September 30, 2013, compared to $4.66 \%$ for the same quarter one year earlier. The decrease in the yield on earning assets reflects changes in the mix of assets and the continuing erosion of yields as loans and investments mature or prepay and are replaced by lower yielding assets in the current low interest rate environment. Average loans receivable for the quarter ended September 30, 2013 increased $\$ 81$ million, or $3 \%$, to $\$ 3.292$ billion, compared to $\$ 3.211$ billion for the same quarter in the prior year. Interest income on loans decreased by $\$ 2.0$ million, or $5 \%$, to $\$ 42.0$ million for the current quarter from $\$ 44.0$ million
for the quarter ended September 30, 2012, reflecting the impact of a 39 basis point decrease in the average yield on loans, and offset by the $\$ 81$ million increase in average loan balances. The average yield on loans was $5.06 \%$ for the quarter ended September 30, 2013, compared to $5.45 \%$ for the same quarter one year earlier.

Interest income for the nine months ended September 30, 2013 was $\$ 135.1$ million, compared to $\$ 141.6$ million for the same period in the prior year, a decrease of $\$ 6.5$ million, or $5 \%$. As with quarterly results, the year-to-date results reflect a 23 basis point reduction in the yield on interest-earning assets, partially offset by an $\$ 18.3$ million increase in the average balance of interest-earning assets.

The combined average balance of mortgage-backed securities, investment securities, and daily interest-bearing deposits decreased to $\$ 769$ million for the quarter ended September 30, 2013 (excluding the effect of fair value adjustments), compared to $\$ 816$ million for the quarter ended September 30, 2012 however, the interest and dividend income from those investments decreased by just $\$ 137,000$ compared to the same quarter in the prior year. The average yield on the combined portfolio increased to $1.59 \%$ for the quarter ended September 30, 2013, from $1.57 \%$ for the same quarter one year earlier. The adverse impact of lower market rates on the combined yield on these investments was partially offset by changes in the mix to include lower balances of daily interest-bearing deposits and more securities.

Interest Expense. Interest expense for the quarter ended September 30, 2013 was $\$ 3.1$ million, compared to $\$ 4.5$ million for the same quarter in the prior year, a decrease of $\$ 1.3$ million, or $30 \%$. The decrease in interest expense occurred as a result of a 15 basis point decrease in the average cost of all interest-bearing liabilities to $0.33 \%$ for the quarter ended September 30, 2013, from $0.48 \%$ for the same quarter one year earlier, partially offset by a $\$ 65$ million increase in average interest-bearing liabilities. This increase in average interest-bearing liabilities reflects increases in transaction and savings accounts and advances from FHLB, offset by a continued decline in certificates of deposit. Interest expense for the nine months ended September 30, 2013 and 2012 was $\$ 10.0$ million and $\$ 15.5$ million, respectively, and similar to quarterly results, the reduction is reflective of a decrease in the average rate paid for most interest-bearing liabilities, partially offset by a modest increase in their average balance over that time period.

Deposit interest expense decreased $\$ 1.2$ million, or $34 \%$, to $\$ 2.3$ million for the quarter ended September 30, 2013, compared to $\$ 3.5$ million for the same quarter in the prior year, as a result of a 15 basis point decrease in the cost of deposits and a $\$ 44$ million increase in the average balance of deposits. Average deposit balances increased to $\$ 3.496$ billion for the quarter ended September 30, 2013, from $\$ 3.452$ billion for the quarter ended September 30, 2012, and the average rate paid on deposit balances decreased to $0.26 \%$ in the third quarter of 2013 from $0.41 \%$ for the quarter ended September 30, 2012. While we do not anticipate further reductions in market interest rates, we do expect additional modest declines in deposit costs over the near term as maturities of certificates of deposit will present further repricing opportunities and competitive pricing should remain restrained in response to modest loan demand in the current economic environment. Further, continuing changes in our deposit mix, especially growth in lower cost transaction and savings accounts, in particular non-interest-bearing deposits, have meaningfully contributed to the decrease in our funding costs compared to earlier periods, and should also result in lower deposit costs going forward. However, it is clear that the pace of decline in deposit costs compared to prior periods has slowed and that the opportunity for future reductions is limited. For the nine months ended September 30, 2013, deposit interest expense decreased $\$ 4.5$ million to $\$ 7.5$ million compared to $\$ 12.0$ million for the same period one year ago. Similar to the quarter, average deposit costs decreased by 18 basis points and the average balance of deposits increased $\$ 68$ million for the nine months ended September 30, 2013 compared to the same period one year ago.

Average FHLB advances (excluding the effect of fair value adjustments) were $\$ 31$ million for the quarter ended September 30, 2013, compared to $\$ 10$ million for the same quarter one year earlier, and the average rate paid on FHLB advances for the quarter ended September 30, 2013 decreased to $0.36 \%$ from $2.49 \%$ for the same quarter one year earlier. Average FHLB advances increased as a result of certain cash management activities at Banner Bank, while the cost of the advances declined as a result of the maturity of a higher rate fixed term advance in February 2013. Interest expense on FHLB advances decreased to $\$ 28,000$ for the quarter ended September 30, 2013 from $\$ 64,000$ for the quarter ended September 30, 2012. For the nine months ended September 30, 2013, interest expense on FHLB advances decreased by $\$ 99,000$ to $\$ 92,000$ compared to $\$ 191,000$ for the same period in the prior year. Average FHLB advances excluding the effect of fair value adjustments increased $\$ 13$ million to $\$ 23$ million over that same time period compared to $\$ 10$ million for the nine months ended September 30, 2012. The average rate paid on FHLB advances decreased $1.97 \%$ to $0.53 \%$ for the nine months ended September 30, 2013, compared to $2.50 \%$ for the same period a year ago.

Other borrowings consist of retail repurchase agreements with customers secured by certain investment securities and, prior to March 31, 2012, the senior bank notes issued under the Temporary Liquidity Guarantee Program (TLGP). The average balance for other borrowings decreased $\$ 548,000$ to $\$ 86.3$ million during the current quarter from $\$ 85.8$ million during the same quarter a year earlier, while the rate on other borrowings decreased to $0.20 \%$ from $0.33 \%$ a year earlier. As a result, interest expense for other borrowings decreased to $\$ 44,000$ for the quarter ended September 30, 2013, compared to $\$ 71,000$ for the quarter ended September 30, 2012. Primarily as a result of repaying the TLGP senior bank notes, the average balance for other borrowings decreased $\$ 23$ million to $\$ 87$ million during the nine months ended September 30, 2013 from $\$ 110$ million during the same period a year earlier, while the rate on these other borrowings decreased to $0.23 \%$ from $0.85 \%$ a year earlier. The $\$ 50$ million of TLGP senior bank notes had a fixed rate of $2.625 \%$, plus a $1.00 \%$ guarantee fee, and matured on March 31, 2012.

Junior subordinated debentures which were issued in connection with trust preferred securities had an average balance of $\$ 124$ million (excluding the effect of fair value adjustments) and an average cost of $2.38 \%$ and $2.40 \%$, respectively, for the quarter and nine months ended September 30, 2013. Junior subordinated debentures outstanding in the same periods in the prior year had the same average balance of $\$ 124$ million (excluding the effect of fair value adjustments) with higher average costs of $2.59 \%$ and $2.83 \%$, respectively, for the quarter and nine months ended September 30, 2012. Generally, the junior subordinated debentures are adjustable-rate instruments with repricing frequencies of three months based upon the three-month LIBOR index; however, one $\$ 25$ million issue of junior subordinated debentures had a fixed rate of $6.56 \%$ for an initial five-year period which expired on February 29, 2012. Subsequent to that date, the interest rate on that debenture resets every three months at a rate of three-month LIBOR plus $1.62 \%$. The change
in the rate on that debenture, coupled with a modestly lower level of LIBOR, resulted in the lower cost of the junior subordinated debentures for both the quarter and nine months ended September 30, 2013, compared to the same periods a year earlier.

Analysis of Net Interest Spread presents, in the following table and for the periods indicated, our condensed average balance sheet information, together with interest income and yields earned on average interest-earning assets and interest expense and rates paid on average interest-bearing liabilities. Average balances are computed using daily average balances.

The following table provides additional comparative data on our operating performance (dollars in thousands):

| Three Months Ended |  | Nine Months Ended |  |
| :--- | :--- | :--- | :--- |
| September 30 |  | September 30 |  |
| 2013 | 2012 | 2013 | 2012 |

${ }_{\text {(1) }}$ Other operating expense divided by the total of net interest income (before provision for loan losses) and other operating income (non-interest income)

Provision and Allowance for Loan Losses. As a result of substantial reserves already in place representing $2.34 \%$ of total loans outstanding, as well as declining delinquencies and net charge-offs, we did not record a provision for loan losses in either the quarter or the nine months ended September 30, 2013. This compares to a $\$ 3.0$ million provision in the third quarter a year ago and a $\$ 12.0$ million provision for the nine months ended September 30, 2012. As discussed in the Summary of Critical Accounting Policies section above and in Note 1 of the Selected Notes to the Consolidated Financial Statements in this Form 10-Q, the provision and allowance for loan losses is one of the most critical accounting estimates included in our Consolidated Financial Statements. The provision for loan losses reflects the amount required to maintain the allowance for losses at an appropriate level based upon management's evaluation of the adequacy of general and specific loss reserves, trends in delinquencies and net charge-offs and current economic conditions.

Reflecting lingering weakness in the economy, we continue to maintain a substantial allowance for loan losses at September 30, 2013 even though non-performing loans declined during the quarter. The allowance for loan losses also continues to reflect our concerns that the significant number of distressed sellers in the market and additional expected lender foreclosures may further disrupt certain housing markets and adversely affect home prices and the demand for building lots. These concerns have remained elevated during the past five years as price declines for housing and related lot and land markets occurred in most areas of the Puget Sound and Portland regions where a significant portion of our one- to four-family residential and construction and development loans are located. Diminished home values also continue to contribute to defaults in our residential mortgage and home equity loan portfolios which now represent the largest portion of impaired loans in our total loan portfolio. However, more recently we have been encouraged by evidence of stabilization or modest improvement in most markets in our service areas and significant improvement in certain areas. Aside from housing-related loans, non-performing loans often reflect unique operating difficulties for the individual borrower; however, the weak pace of general economic activity and diminished commercial real estate values have been significant contributing factors to delinquencies and defaults in other non-housing-related segments of the portfolio. Nonetheless, our credit quality indicators have continued to improve, eliminating the need for a provision for loan losses for the first nine months of 2013.

We recorded net charge-offs of $\$ 196,000$ for the quarter ended September 30, 2013, compared to $\$ 4.4$ million for the same quarter in the prior year. Non-performing loans decreased by $\$ 1$ million during the quarter ended September 30, 2013 to $\$ 25$ million, and decreased by $\$ 14$ million compared to the quarter ended September 30, 2012. A comparison of the allowance for loan losses at September 30, 2013 and 2012 reflects a decrease of $\$ 2$ million to $\$ 77$ million at September 30, 2013, from $\$ 79$ million at September 30, 2012. Included in our allowance at September 30, 2013 was an unallocated portion of $\$ 10.9$ million, which is based upon our evaluation of various factors that are not directly measured in the determination of the formula and specific allowances. The allowance for loan losses as a percentage of total loans (loans receivable excluding allowance for losses) decreased to $2.34 \%$ at September 30, 2013, from $2.45 \%$ at September 30, 2012. However, with the decrease in problem loans, the allowance as a percentage of non-performing loans increased to $308 \%$ at September 30, 2013, compared to $225 \%$ of non-performing loans at December 31, 2012 and 204\% a year earlier.

As of September 30, 2013, we had identified $\$ 75$ million of impaired loans. Impaired loans are comprised of loans on nonaccrual, TDRs and loans that are 90 days or more past due, but are still on accrual. Impaired loans may be evaluated for reserve purposes using either a specific impairment analysis or collectively evaluated as part of homogeneous pools. For more information on these impaired loans, refer to Note 11 of the Selected Notes to the Consolidated Financial Statements, Fair Value Accounting and Measurement, in this Form 10-Q.

We believe that the allowance for loan losses as of September 30, 2013 was adequate to absorb the known and inherent risks of loss in the loan portfolio at that date. While we believe the estimates and assumptions used in our determination of the adequacy of the allowance are reasonable, there can be no assurance that these estimates and assumptions will not be proven incorrect in the future, or that the actual amount of future provisions will not exceed the amount of past provisions or that any increased provisions that may be required will not adversely impact our
financial condition and results of operations. In addition, the determination of the amount of the allowance for loan losses is subject to review by bank regulators as part of the routine examination process, which may result in the establishment of additional reserves based upon their judgment of information available to them at the time of their examination.

Other Operating Income. Other operating income, which includes changes in the valuation of financial instruments carried at fair value, OTTI charges and recoveries, and gain on sale of securities, as well as non-interest revenues from core operations, was $\$ 10.1$ million for the quarter ended September 30, 2013, compared to $\$ 11.7$ million for the same quarter in the prior year. Our other operating income for the three months ended September 30, 2013 included a gain on the sale of securities of $\$ 2,000$ and a $\$ 352,000$ net loss for fair value adjustments as a result of changes in the valuation of our securities portfolios. During the quarter ended September 30, 2012, fair value adjustments resulted in a net gain of $\$ 473,000$ which was generally offset by a $\$ 409,000$ OTTI charge. For a more detailed discussion of our fair value adjustments, please refer to Note 11 in the Selected Notes to the Consolidated Financial Statements in this Form $10-\mathrm{Q}$.

Other operating income, including changes in the valuation of financial instruments carried at fair value, OTTI charges and recoveries, and gain on sale of securities, was $\$ 30.8$ million for the nine months ended September 30, 2013 , compared to $\$ 13.6$ million for the same period in the prior year. Our other operating income for the nine months ended September 30, 2013 included a gain on the sale of securities of $\$ 1.0$ million and an OTTI recovery of $\$ 409,000$, both of which resulted from the sale of securities that had been fully written off in previous periods. Primarily reflecting the impact of higher market interest rates on certain fixed rate securities in our held for trading portfolio, as well as changes in the fair value of our junior subordinated debentures, for the nine months ended September 30, 2013 we recorded a net loss of $\$ 2.0$ million in fair value adjustments compared to a net loss of $\$ 16.9$ million for the same period in the prior year, primarily due to the significant adjustment in the fair value of the junior subordinated debentures.

Excluding the fair value and OTTI adjustments and gain on sale of securities, other operating income from core operations decreased by $\$ 1.1$ million, or $10 \%$, to $\$ 10.5$ million for the quarter ended September 30, 2013, compared to $\$ 11.6$ million for the quarter ended September 30, 2012, largely as a result of decreased revenues from mortgage banking operations. Deposit fees and service charges increased by $\$ 301,000$
compared to the third quarter a year ago reflecting growth in the number of deposit accounts and increased transaction activity. Mortgage banking revenues decreased by $\$ 1.2$ million as increased mortgage rates slowed originations for refinancing as well as home purchases. Revenues from mortgage banking activities were augmented by $\$ 400,000$ in the current quarter as a result of a partial reversal of a valuation allowance for previously recorded impairment charges related to our mortgage servicing rights. Other operating income in the current quarter also included $\$ 450,000$ of income resulting from the amendment of the Company's tax returns for prior periods. Other operating income from core operations increased by $\$ 435,000$, or $1 \%$, to $\$ 31.3$ million for the nine months ended September 30, 2013. Similar to the quarterly discussion above, deposit fees and service charges increased by $\$ 1.1$ million compared to the first nine months of the prior year while mortgage banking operations decreased by $\$ 836,000$.

Other Operating Expenses. Other operating expenses increased by $\$ 1.1$ million, to $\$ 34.5$ million for the quarter ended September 30, 2013, compared to $\$ 33.4$ million for the quarter ended September 30, 2012, largely as a result of increased compensation expenses and payment and card processing expenses, as well as increased costs related to REO operations, which were generally offset by a net decrease in other operating expenses. As a result of reduced net gains on sales of REO properties, expenses related to REO increased by $\$ 703,000$ to a net gain of $\$ 601,000$ for the quarter ended September 30, 2013 from a net gain of $\$ 1.3$ million during the same period a year earlier. In addition to real estate taxes and maintenance costs, expenses related to REO for the quarter ended September 30, 2013 included only $\$ 191,000$ in valuation adjustments; however, those charges were more than offset by $\$ 1.0$ million in net gains on sales of REO properties. By comparison, for the quarter ended September 30, 2012, we recorded $\$ 1.3$ million in valuation adjustments and net gains on REO sales of $\$ 3.0$ million. Compensation expense increased $\$ 1.6$ million, or $8 \%$, to $\$ 21.2$ million for the quarter ended September 30, 2013, compared to $\$ 19.6$ million for the quarter ended September 30, 2012, primarily reflecting salary and wage adjustments and increased health insurance and other benefit costs. The increase in compensation expenses was partially offset by an increase of $\$ 260,000$ in capitalized loan origination costs which reflected an increase in loan originations. The cost of FDIC insurance decreased by $\$ 227,000$ primarily as a result of a reduction in the premium assessment rate attributed to improvements in the asset quality and earnings performance of Banner Bank. All other expenses, net, decreased $\$ 711,000$ largely as a result of decreased occupancy and marketing expenses. Other operating expenses as a percentage of average assets were $3.22 \%$ for the quarter ended September 30, 2013, compared to $3.13 \%$ for the same quarter one year earlier.

Other operating expenses for the nine months ended September 30, 2013 decreased $\$ 2.9$ million, or 3\%, to $\$ 104.0$ million compared to $\$ 106.9$ million for the nine months ended September 30, 2012. REO expenses decreased $\$ 4.3$ million, or $132 \%$, to a $\$ 1.0$ million net gain for the nine months ended September 30, 2013, compared to net losses of $\$ 3.3$ million for the prior year period, and included $\$ 490,000$ of valuation adjustments and $\$ 2.5$ million of net gains on the sale of properties. Compensation expense increased $\$ 4.7$ million, or $8 \%$, to $\$ 63.2$ million for the nine months ended September 30, 2013 compared to $\$ 58.5$ million for the nine months ended September 30, 2012, again reflecting salary and wage adjustments, increased mortgage banking activity in the first six months of the year and higher health insurance and benefit costs. Partially offsetting the increase in compensation, capitalized loan origination costs increased by $\$ 1.2$ million compared to the same nine-month period a year earlier. Also contributing to the reduction in operating expenses was a $\$ 1.2$ million, or $39 \%$, decrease in deposit insurance to $\$ 1.8$ million for the nine months ended September 30, 2013 compared to $\$ 3.0$ million for the same period in the prior year and a $\$ 760,000$ decrease in advertising and marketing expenses. Reflecting the significant growth in core deposits, expenses for payment and card processing increased by $\$ 1.0$ million, or $15 \%$, to $\$ 7.3$ million for the nine months ended September 30, 2013, compared to $\$ 6.3$ million for the same period in the prior year. Most other operating expenses were little changed from a year earlier.

Income Taxes. In the quarter ended September 30, 2013, we recognized $\$ 5.9$ million in income tax expense for an effective tax rate of approximately $33.5 \%$, which reflects our normal statutory tax rate reduced by the impact of tax-exempt income and certain tax credits. Our normal, expected statutory income tax rate is $36.5 \%$, representing a blend of the statutory federal income tax rate of $35.0 \%$ and apportioned effects of the $7.6 \%$ Oregon and Idaho income tax rates. For the nine months ended September 30, 2013, we recognized $\$ 16.8$ million in income tax expense for an
effective tax rate of $32.5 \%$. From September 30, 2010 through the quarter ended March 31, 2012, we maintained a valuation allowance for our deferred tax assets (DTA). While the full valuation allowance remained in effect, we did not recognize any tax expense or benefit in our Consolidated Statements of Operations. During the second quarter of 2012, we determined that maintaining the full valuation allowance was no longer appropriate and subsequently reversed the valuation allowance. As a result, we recognized a significantly reduced provision for income taxes of $\$ 2.4$ million for the quarter ended September 30, 2012 and a net benefit of $\$ 29.4$ million for the nine months ended September 30, 2012. Reversing the valuation allowance significantly affected our net income in both periods. For more discussion on our deferred tax asset and related valuation allowance, please refer to Note 12 in the Selected Notes to the Consolidated Financial Statements in this report on Form 10-Q.

## Asset Quality

Achieving and maintaining a moderate risk profile by aggressively managing troubled assets has been and will continue to be a primary focus for us. As a result, our non-performing assets declined substantially in 2012 and have decreased further in the first nine months of 2013. All of our key credit quality metrics have improved compared to a year ago, including improvement during the third quarter of this year, and as a result our credit costs have been significantly reduced. In addition, our reserve levels are substantial and, as a result of our impairment analysis and charge-off actions, reflect current appraisals and valuation estimates as well as recent regulatory examination results. While our non-performing assets and credit costs have been materially reduced, we continue to be actively engaged with our borrowers in resolving remaining problem assets and with the effective management of real estate owned as a result of foreclosures.

Non-Performing Assets: Non-performing assets decreased to $\$ 30$ million, or $0.70 \%$ of total assets, at September 30, 2013, from $\$ 50$ million, or $1.18 \%$ of total assets, at December 31, 2012, and $\$ 59$ million, or $1.38 \%$ of total assets, at September 30, 2012. Non-performing assets are comprised of non-performing loans which total $\$ 25$ million and REO and other repossessed assets which total $\$ 5$ million. The primary components of non-performing loans are $\$ 13$ million in one- to four-family residential loans, $\$ 7$ million in commercial and multifamily real estate loans, $\$ 1$
million in commercial business loans, $\$ 2$ million in construction, land and land development loans and $\$ 2$ million in consumer loans. The primary components of REO are $\$ 3$ million in residential construction, land or land development projects and $\$ 2$ million in single-family homes. Non-performing construction, land and land development loans and related REO totaled $\$ 5$ million at September 30, 2013 and included approximately $\$ 863,000$, or $18 \%$, in the Puget Sound region, $\$ 2.9$ million, or $62 \%$, in the greater Portland market area, $\$ 433,000$, or $9 \%$, in the greater Boise market area, and $\$ 514,000$, or $11 \%$, in other areas of Washington, Oregon and Idaho. We believe our level of non-performing loans and assets, which has declined substantially, is manageable and that we have sufficient capital and human resources to manage the collection of our non-performing assets in an orderly fashion.

Loans are reported as TDRs when we grant concessions to a borrower experiencing financial difficulties that we would not otherwise consider. As a result of these concessions, TDRs are impaired as the Banks will not collect all amounts due, both principal and interest, in accordance with the terms of the original loan agreement. If any TDR becomes delinquent or other matters call into question the borrower's ability to repay full interest and principal in accordance with the restructured terms, the TDR would be reclassified as nonaccrual. At September 30, 2013, we had $\$ 50$ million of TDRs currently performing under their restructured terms.

The following table sets forth information with respect to our non-performing assets and TDRs at the dates indicated (dollars in thousands):

Nonaccrual Loans: ${ }^{(1)}$
Secured by real estate:
Commercial \$4,762
Multifamily 333
Construction and land
One- to four-family
Commercial business
Agricultural business, including secured by farmland Consumer

Loans more than 90 days delinquent, still on accrual:
Secured by real estate:

| Commercial | - | - | - |
| :--- | :--- | :--- | :--- |
| Multifamily | 1,701 | - | - |
| Construction and land | 242 | - | - |
| One- to four-family | 2,774 | 2,877 | 2,037 |
| Commercial business | 24 | - | 15 |
| Agricultural business, including secured by farmland | - | - | - |
| Consumer | 52 | 152 | 26 |
| Total non-performing loans | 4,793 | 3,029 | 2,078 |
| Securities on nonaccrual at fair value | 24,862 | - | 38,711 |
| REO and other repossessed assets held for sale, net (2) | 4,937 | $-15,853$ | 20,356 |
| Total non-performing assets | $\$ 29,799$ | $\$ 50,243$ | $\$ 59,067$ |

| for loan losses | 0.58 | $\%$ | $\%$ |
| Total non-performing loans to total assets | 0.70 | $\%$ | 1.20 |
| Total non-performing assets to total assets | $\$ 50,430$ | $\$ .18$ | $\%$ |
| TDRs ${ }^{(3)}$ | $\$ 9,91$ | $\%$ |  |
| Loans 30-89 days past due and on accrual | $\$ 9,313$ | $\$ 11,685$ | $\%$ |

Includes $\$ 5.7$ million of non-accrual TDRs. For the three months ended September 30, 2013, we had net recoveries
${ }^{(1)}$ of interest income related to non-accrual loans of $\$ 142,000$ and for the nine months ended September 30, 2013, $\$ 758,000$ in interest income would have been recorded had nonaccrual loans been current.
Real estate acquired by us as a result of foreclosure or by deed-in-lieu of foreclosure is classified as real estate held for sale until it is sold. When property is acquired, it is recorded at the lower of the estimated fair value of the
(2) property, less expected selling costs, or the carrying value of the defaulted loan. Subsequent to foreclosure, the property is carried at the lower of the foreclosed amount or net realizable value. Upon receipt of a new appraisal and market analysis, the carrying value is written down to the anticipated sales price, less selling and holding costs.
(3)These loans are performing under their restructured terms.

The following table sets forth the Company's non-performing assets by geographic concentration at September 30, 2013 (dollars in thousands):

|  | Washington | Oregon | Idaho | Total |
| :---: | :---: | :---: | :---: | :---: |
| Secured by real estate: |  |  |  |  |
| Commercial | \$4,713 | \$- | \$49 | \$4,762 |

| Residential land acquisition \& development | - | 750 | - | 750 |
| Residential land improved lots | - | - | - | - |
| Residential land unimproved | 242 | - | - | 242 |
| Commercial land improved | - | - | - | - |
| Commercial land unimproved | - | - | - | - |
| Total construction and land | 440 | 1,099 | 363 | 1,902 |
| One- to four-family | 9,980 | 2,720 | 791 | 13,491 |
| Commercial business | 923 | 64 | - | 987 |
| Agricultural business, including secured by farmland | - | - | - | - |
| Consumer | 1,471 | 47 | 168 | 1,686 |
| Total non-performing loans | 19,228 | 3,930 | 1,704 | 24,862 |
| REO and other repossessed assets held for sale, net | 2,495 | 2,174 | 268 | 4,937 |
| Total non-performing assets | \$21,723 | \$6,104 | \$ 1,972 | \$29,799 |
| Percent of non-performing assets | 73 | \% 20 | \% 7 | \% 100 |

In addition to the non-performing loans as of September 30, 2013, we had other classified loans with an aggregate outstanding balance of $\$ 87$ million that are not on nonaccrual status, with respect to which known information concerning possible credit problems with the borrowers or the cash flows of the properties securing the respective loans has caused management to be concerned about the ability of the borrowers to comply with present loan repayment terms. This may result in the future inclusion of such loans in the nonaccrual loan category.

We record REO (acquired through a lending relationship) at fair value on a non-recurring basis. All REO properties are recorded at amounts which are equal to fair value of the properties based on independent appraisals (reduced by estimated selling costs) upon transfer of the loans to REO. From time to time, non-recurring fair value adjustments to REO are recorded to reflect partial write-downs based on an observable market price or current appraised value of property. The individual carrying values of these assets are reviewed for impairment at least annually and any additional impairment charges are expensed to operations. For the quarters ended September 30, 2013 and 2012, we recognized $\$ 191,000$ and $\$ 1.3$ million, respectively, of impairment charges related to these types of assets. For the nine months ended September 30, 2013 and 2012, we recognized $\$ 490,000$ and $\$ 4$ million, respectively, of these impairment charges.

Within our non-performing loans, we have only two nonaccrual lending relationships with aggregate loan exposures in excess of $\$ 1.0$ million that collectively comprise $\$ 3.1$ million, or $12.8 \%$ of our total non-performing loans, as of September 30, 2013. The largest relationship consisted of a multifamily real estate loan that totaled $\$ 1.7$ million at September 30, 2013 secured by an apartment building located in the Puget Sound region. The second lending relationship consisted of a $\$ 1.4$ million commercial real estate loan secured by a commercial building located in central Washington State. The remaining balance of our non-performing loans consists of 102 loans with borrowers located throughout our market areas.

At September 30, 2013, we had $\$ 4.8$ million of REO, the most significant component of which is a subdivision in the greater Portland, Oregon area consisting of 11 residential buildable lots and 33.2 acres of undeveloped land with a book value of $\$ 1.6$ million. All other REO holdings have individual book values of less than $\$ 500,000$.

The table below summarizes our REO by geographic location and property type (dollars in thousands):

| Amount | Percent of <br> Total REO |  | REO Description | Geographic Location |
| :---: | :---: | :---: | :---: | :---: |
| \$2,174 | 45.1 | \% | Three single family residences 11 residential buildable lots 33.2 acres of undeveloped land 4 acres undeveloped buildable land Three single family residences | Greater Portland, Oregon area |
| 1,101 | 22.8 | \% | One residential lot <br> Two parcels of undeveloped residential land Two acres of buildable residential land | Greater Seattle-Puget Sound area |
| 268 | 5.6 | \% | One residential lot One commercial office building One single family residence under construction Five residential lots | Greater Boise, Idaho area |
| 1,275 | 26.5 | \% | 13 acres of undeveloped land One parcel of bare land One single family residence | Other Washington locations |
| \$4,818 | 100.0 | \% |  |  |

## Liquidity and Capital Resources

Our primary sources of funds are deposits, borrowings, proceeds from loan principal and interest payments and sales of loans, and the maturity of and interest income on mortgage-backed and investment securities. While maturities and scheduled amortization of loans and mortgage-backed securities are a predictable source of funds, deposit flows and mortgage prepayments are greatly influenced by market interest rates, economic conditions, competition and our pricing strategies.

Our primary investing activity is the origination and purchase of loans and, in certain periods, the purchase of securities. During the nine months ended September 30, 2013, our loan originations exceeded our loan repayments by $\$ 47$ million and during the nine months ended September 30, 2012, our loan originations were less than loan repayments by $\$ 64$ million. During those periods we purchased loans of $\$ 166,000$ and $\$ 5$ million, respectively. During the nine months ended September 30, 2013 and 2012, we sold $\$ 370$ million and $\$ 371$ million, respectively, of loans. Securities purchased during the nine months ended September 30, 2013 and 2012 totaled $\$ 234$ million and $\$ 318$ million, respectively, and securities repayments, maturities and sales were $\$ 82$ million and $\$ 307$ million, respectively.

Our primary financing activity is gathering deposits. Deposits decreased by $\$ 23$ million during the first nine months of 2013, including a $\$ 129$ million decrease in certificates of deposits. The decrease in deposits was driven by our pricing decisions designed to shift our deposit portfolio into lower cost checking, savings and money market accounts, and allow higher rate certificates of deposit to run-off. Certificates of deposits are generally more price sensitive than other retail deposits and our pricing of those deposits varies significantly based upon our liquidity management strategies at any point in time. At September 30, 2013, certificates of deposit amounted to $\$ 900$ million, or $25 \%$ of our total deposits, including $\$ 667$ million which were scheduled to mature within one year. While no assurance can be given as to future periods, historically, we have been able to retain a significant amount of our deposits as they
mature.
We must maintain an adequate level of liquidity to ensure the availability of sufficient funds to accommodate deposit withdrawals, to support loan growth, to satisfy financial commitments and to take advantage of investment opportunities. During the nine months ended September 30, 2013 and 2012, we used our sources of funds primarily to fund loan commitments, purchase securities, and pay maturing savings certificates and deposit withdrawals. At September 30, 2013, we had outstanding loan commitments totaling $\$ 1.149$ billion, including undisbursed loans in process and unused credit lines totaling $\$ 1.119$ billion. While representing potential growth in the loan portfolio and lending activities, this level of commitments is proportionally consistent with our historical experience and does not represent a departure from normal operations.

We generally maintain sufficient cash and readily marketable securities to meet short-term liquidity needs; however, our primary liquidity management practice to supplement deposits is to increase or decrease short-term borrowings, including FHLB advances and Federal Reserve Bank of San Francisco (FRBSF) borrowings. We maintain credit facilities with the FHLB-Seattle, which at September 30, 2013 provide for advances that in the aggregate may equal the lesser of $35 \%$ of Banner Bank's assets or adjusted qualifying collateral (subject to a sufficient level of ownership of FHLB stock), up to a total possible credit line of $\$ 733$ million, and $25 \%$ of Islanders Bank's assets or adjusted qualifying collateral, up to a total possible credit line of $\$ 27$ million. Advances under these credit facilities (excluding fair value adjustments) totaled $\$ 20$ million, or $0.5 \%$ of our assets at September 30, 2013. In addition, Banner Bank has been approved for participation in the FRBSF's Borrower-In-Custody (BIC) program. Under this program Banner Bank had available lines of credit of approximately $\$ 559$ million as of September 30, 2013, subject to certain collateral requirements, namely the collateral type and risk rating of eligible pledged loans. We had no funds borrowed
from the FRBSF at September 30, 2013 or December 31, 2012. Management believes it has adequate resources and funding potential to meet our foreseeable liquidity requirements.

Banner Corporation is a separate legal entity from the Banks and, on a stand-alone level, must provide for its own liquidity and pay its own operating expenses and cash dividends. Banner's primary sources of funds consist of capital raised through dividends or capital distributions from the Banks, although there are regulatory restrictions on the ability of the Banks to pay dividends. At September 30, 2013, the Company (on an unconsolidated basis) had liquid assets of $\$ 40.4$ million.

As noted below, Banner Corporation and its subsidiary banks continued to maintain capital levels significantly in excess of the requirements to be categorized as "Well-Capitalized" under applicable regulatory standards. During the nine months ended September 30, 2013, total equity increased $\$ 23$ million, or $5 \%$, to $\$ 530$ million. Total equity at September 30, 2013 is entirely attributable to common stock. At September 30, 2013, tangible common stockholders' equity, which excludes other intangible assets, was $\$ 527$ million, or $12.32 \%$ of tangible assets. See the discussion and reconciliation of non-GAAP financial information in the Executive Overview section of Management's Discussion and Analysis of Financial Condition and Results of Operation in this Form 10-Q for more detailed information with respect to tangible common stockholders' equity. Also, see the capital requirements discussion and table below with respect to our regulatory capital positions.

## Capital Requirements

Banner Corporation is a bank holding company registered with the Federal Reserve. Bank holding companies are subject to capital adequacy requirements of the Federal Reserve under the Bank Holding Company Act of 1956, as amended and the regulations of the Federal Reserve. Banner Bank and Islanders Bank, as state-chartered, federally insured commercial banks, are subject to the capital requirements established by the FDIC.

The capital adequacy requirements are quantitative measures established by regulation that require Banner Corporation and the Banks to maintain minimum amounts and ratios of capital. The Federal Reserve requires Banner Corporation to maintain capital adequacy that generally parallels the FDIC requirements. The FDIC requires the Banks to maintain minimum ratios of Tier 1 total capital to risk-weighted assets as well as Tier 1 leverage capital to average assets. At September 30, 2013, Banner Corporation and the Banks each exceeded all current regulatory capital requirements. (See Item 1, "Business-Regulation," and Note 18 of the Notes to the Consolidated Financial Statements included in the 2012 Form 10-K for additional information regarding regulatory capital requirements for Banner and the Banks.)

The actual regulatory capital ratios calculated for Banner Corporation, Banner Bank and Islanders Bank as of September 30, 2013, along with the minimum capital amounts and ratios, were as follows (dollars in thousands):

Minimum to be
Categorized as
"Well-Capitalized" Under Prompt Corrective Action Provisions

|  | Amount | Ratio | Amount | Ratio | Amount | Ratio |
| :--- | :--- | :--- | :--- | :--- | :--- | :---: |

ITEM 3 - Quantitative and Qualitative Disclosures About Market Risk

## Market Risk and Asset/Liability Management

Our financial condition and operations are influenced significantly by general economic conditions, including the absolute level of interest rates as well as changes in interest rates and the slope of the yield curve. Our profitability is dependent to a large extent on our net interest income, which is the difference between the interest received from our interest-earning assets and the interest expense incurred on our interest-bearing liabilities.

Our activities, like all financial institutions, inherently involve the assumption of interest rate risk. Interest rate risk is the risk that changes in market interest rates will have an adverse impact on the institution's earnings and underlying economic value. Interest rate risk is determined by the maturity and repricing characteristics of an institution's assets, liabilities and off-balance-sheet contracts. Interest rate risk is measured by the variability of financial performance and economic value resulting from changes in interest rates. Interest rate risk is the primary market risk affecting our financial performance.

The greatest source of interest rate risk to us results from the mismatch of maturities or repricing intervals for rate sensitive assets, liabilities and off-balance-sheet contracts. This mismatch or gap is generally characterized by a substantially shorter maturity structure for interest-bearing liabilities than interest-earning assets, although our floating-rate assets tend to be more immediately responsive to changes in market rates than most funding deposit liabilities. Additional interest rate risk results from mismatched repricing indices and formula (basis risk and yield curve risk), and product caps and floors and early repayment or withdrawal provisions (option risk), which may be contractual or market driven, that are generally more favorable to customers than to us. An exception to this generalization is the beneficial effect of interest rate floors on a substantial portion of our performing floating-rate loans, which help us maintain higher loan yields in periods when market interest rates decline significantly. However, in a declining interest rate environment, as loans with floors are repaid they generally are replaced with new loans which have lower interest rate floors. As of September 30, 2013, our loans with interest rate floors totaled approximately $\$ 1.5$ billion and had a weighted average floor rate of $4.94 \%$. An additional source of interest rate risk, which is currently of concern, is a prolonged period of exceptionally low market interest rates. Because interest-bearing deposit costs have been reduced to nominal levels, there is very little possibility that they will be significantly further reduced. By contrast, if market rates remain very low, loan and securities yields will likely continue to decline as longer-term instruments mature or are repaid. Further, non-interest-bearing deposits provide a meaningful portion of our funding. As a result, a prolonged period of very low interest rates will likely result in compression of our net interest margin. While this pressure on the margin may be mitigated by further changes in the mix of assets and deposits, particularly increases in non-interest-bearing deposits, a prolonged period of low interest rates will present a very difficult operating environment for most banks, including us.

The principal objectives of asset/liability management are: to evaluate the interest rate risk exposure; to determine the level of risk appropriate given our operating environment, business plan strategies, performance objectives, capital and liquidity constraints, and asset and liability allocation alternatives; and to manage our interest rate risk consistent with regulatory guidelines and policies approved by the Board of Directors. Through such management, we seek to reduce the vulnerability of our earnings and capital position to changes in the level of interest rates. Our actions in this regard are taken under the guidance of the Asset/Liability Management Committee, which is comprised of members of our senior management. The Committee closely monitors our interest sensitivity exposure, asset and liability allocation decisions, liquidity and capital positions, and local and national economic conditions and attempts to structure the loan and investment portfolios and funding sources to maximize earnings within acceptable risk tolerances.

Our primary monitoring tool for assessing interest rate risk is asset/liability simulation modeling, which is designed to capture the dynamics of balance sheet, interest rate and spread movements and to quantify variations in net interest income resulting from those movements under different rate environments. The sensitivity of net interest income to changes in the modeled interest rate environments provides a measurement of interest rate risk. We also utilize economic value analysis, which addresses changes in estimated net economic value of equity arising from changes in the level of interest rates. The net economic value of equity is estimated by separately valuing our assets and liabilities under varying interest rate environments. The extent to which assets gain or lose value in relation to the gains or losses of liability values under the various interest rate assumptions determines the sensitivity of net economic value to changes in interest rates and provides an additional measure of interest rate risk.

The interest rate sensitivity analysis performed by us incorporates beginning-of-the-period rate, balance and maturity data, using various levels of aggregation of that data, as well as certain assumptions concerning the maturity, repricing, amortization and prepayment characteristics of loans and other interest-earning assets and the repricing and withdrawal of deposits and other interest-bearing liabilities into an asset/liability computer simulation model. We update and prepare simulation modeling at least quarterly for review by senior management and the directors. We believe the data and assumptions are realistic representations of our portfolio and possible outcomes under the various interest rate scenarios. Nonetheless, the interest rate sensitivity of our net interest income and net economic value of equity could vary substantially if different assumptions were used or if actual experience differs from the assumptions used.

The following table sets forth as of September 30, 2013, the estimated changes in our net interest income over a one-year time horizon and the estimated changes in economic value of equity based on the indicated interest rate environments (dollars in thousands):

| Change (in Basis Points) in Interest Rates ${ }^{(1)}$ | Estimated Change in Net Interest Income Next 12 Months |  |  | Net Economic Value |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| +400 | \$(1,664 | ) | (1.0 | )\% | \$(185,930 | ) | (27.7 | )\% |
| +300 | (1,573 |  | (1.0 | ) | (146,786 |  | (21.8 | ) |
| +200 | (1,263 |  | (0.8 | ) | (102,181 |  | (15.2 | ) |
| +100 | (1,407 | ) | (0.9 | ) | (51,870 |  | (7.7 | ) |
| 0 | - |  | - |  | - |  | - |  |
| -25 | 169 |  | 0.1 |  | 5,049 |  | 0.8 |  |
| -50 | (898 |  | (0.6 | ) | 1,730 |  | 0.3 |  |

(1) Assumes an instantaneous and sustained uniform change in market interest rates at all maturities; however, no rates are allowed to go below zero. The current federal funds rate is $0.25 \%$.

Another (although less reliable) monitoring tool for assessing interest rate risk is gap analysis. The matching of the repricing characteristics of assets and liabilities may be analyzed by examining the extent to which assets and liabilities are interest sensitive and by monitoring an institution's interest sensitivity gap. An asset or liability is said to be interest sensitive within a specific time period if it will mature or reprice within that time period. The interest rate sensitivity gap is defined as the difference between the amount of interest-earning assets anticipated, based upon certain assumptions, to mature or reprice within a specific time period and the amount of interest-bearing liabilities anticipated to mature or reprice, based upon certain assumptions, within that same time period. A gap is considered positive when the amount of interest-sensitive assets exceeds the amount of interest-sensitive liabilities. A gap is considered negative when the amount of interest-sensitive liabilities exceeds the amount of interest-sensitive assets. Generally, during a period of rising rates, a negative gap would tend to adversely affect net interest income while a positive gap would tend to result in an increase in net interest income. During a period of falling interest rates, a negative gap would tend to result in an increase in net interest income while a positive gap would tend to adversely affect net interest income.

Certain shortcomings are inherent in gap analysis. For example, although certain assets and liabilities may have similar maturities or periods of repricing, they may react in different degrees to changes in market rates. Also, the interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market rates, while interest rates on other types may lag behind changes in market rates. Additionally, certain assets, such as ARM loans, have features that restrict changes in interest rates on a short-term basis and over the life of the asset. Further, in the event of a change in interest rates, prepayment and early withdrawal levels would likely deviate significantly from those assumed in calculating the table. Finally, the ability of some borrowers to service their debt may decrease in the event of a severe change in market rates.

The following table presents our interest sensitivity gap between interest-earning assets and interest-bearing liabilities at September 30, 2013 (dollars in thousands). The table sets forth the amounts of interest-earning assets and interest-bearing liabilities which are anticipated by us, based upon certain assumptions, to reprice or mature in each of the future periods shown. At September 30, 2013, total interest-earning assets maturing or repricing within one year exceeded total interest-bearing liabilities maturing or repricing in the same time period by $\$ 490$ million, representing a one-year cumulative gap to total assets ratio of $11.45 \%$. Management is aware of the sources of interest rate risk and in its opinion actively monitors and manages it to the extent possible. The interest rate risk indicators and interest sensitivity gaps as of September 30, 2013 are within our internal policy guidelines and management considers that our current level of interest rate risk is reasonable.

Footnotes for Table of Interest Sensitivity Gap
Adjustable-rate assets are included in the period in which interest rates are next scheduled to adjust rather than in the period in which they are due to mature, and fixed-rate assets are included in the period in which they are
(1) scheduled to be repaid based upon scheduled amortization, in each case adjusted to take into account estimated prepayments. Mortgage loans and other loans are not reduced for allowances for loan losses and non-performing loans. Mortgage loans, mortgage-backed securities, other loans and investment securities are not adjusted for deferred fees, unamortized acquisition premiums and discounts.
Adjustable-rate liabilities are included in the period in which interest rates are next scheduled to adjust rather than in the period they are due to mature. Although regular savings, demand, interest checking, and money market deposit accounts are subject to immediate withdrawal, based on historical experience management considers a substantial amount of such accounts to be core deposits having significantly longer maturities. For the purpose of the gap analysis, these accounts have been assigned decay rates to reflect their longer effective maturities. If all of
${ }^{(2)}$ these accounts had been assumed to be short-term, the one-year cumulative gap of interest-sensitive assets would have been $\$(406)$ million, or $(9.48) \%$ of total assets at September 30, 2013. Interest-bearing liabilities for this table exclude certain non-interest-bearing deposits which are included in the average balance calculations in the table contained in Item 2, "Management's Discussion and Analysis of Financial Condition and Results of Operations-Comparison of Results of Operations for the Three and Nine Months Ended September 30, 2013 and 2012" of this report on Form 10-Q.

ITEM 4 - Controls and Procedures
The management of Banner Corporation is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) of the Securities Exchange Act of 1934 (Exchange Act). A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that its objectives are met. Also, because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. Additionally, in designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. As a result of these inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Further, projections of any evaluation of effectiveness to future periods are subject to risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Evaluation of Disclosure Controls and Procedures: An evaluation of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act) was carried out under the supervision and with the participation of our Chief Executive Officer, Chief Financial Officer and several other members of our senior management as of the end of the period covered by this report. Based on their evaluation, our Chief Executive Officer and Chief
(a)Financial Officer concluded that, as of September 30, 2013, our disclosure controls and procedures were effective in ensuring that the information required to be disclosed by us in the reports it files or submits under the Exchange Act is (i) accumulated and communicated to our management (including the Chief Executive Officer and Chief Financial Officer) in a timely manner, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

Changes in Internal Controls Over Financial Reporting: In the quarter ended September 30, 2013, there was no (b) change in our internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

## PART II - OTHER INFORMATION

## Item 1. Legal Proceedings

In the normal course of business, we have various legal proceedings and other contingent matters outstanding. These proceedings and the associated legal claims are often contested and the outcome of individual matters is not always predictable. These claims and counter claims typically arise during the course of collection efforts on problem loans or with respect to actions to enforce liens on properties in which we hold a security interest. We are not a party to any pending legal proceedings that management believes would have a material adverse effect on our financial condition or operations.

Item 1A. Risk Factors
There have been no material changes in the risk factors previously disclosed in Part 1, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2012 (File No. 0-26584) or otherwise previously disclosed in our Form 10-Q reports filed subsequently.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds
During the quarter ended September 30, 2013, we did not sell any securities that were not registered under the Securities Act of 1933.

We did not have any repurchases of our common stock from July 1, 2013 through September 30, 2013 except for 10,758 shares surrendered by employees to satisfy tax withholding obligations upon the vesting of restricted stock grants.

Item 3. Defaults upon Senior Securities
Not Applicable.
Item 4. Mine Safety Disclosures
Not Applicable
Item 5. Other Information

Not Applicable.

## Item 6. Exhibits

## Exhibit Index of Exhibits

Amended and Restated Articles of Incorporation of Registrant [incorporated by reference to the 3\{a\} Registrant's Current Report on Form 8-K filed on April 28, 2010 (File No. 000-26584)], as amended on No. 000-26584)].

Certificate of designation relating to the Company's Fixed Rate Cumulative Perpetual Preferred Stock
$3\{b\} \quad$ Series A [incorporated by reference to the Registrant's Current Report on Form 8-K filed on November 24, 2008 (File No. 000-26584)].
\{c\} Bylaws of Registrant [incorporated by reference to Exhibit 3.2 to the Current Report on Form 8-K filed on April 1, 2011 (File No. 0-26584)].

Warrant to purchase shares of Company's common stock dated November 21, 2008 [incorporated by $4\{\mathrm{a}\} \quad$ reference to the Registrant's Current Report on Form 8-K filed on November 24, 2008 (File No. 000-26584)].

Letter Agreement (including Securities Purchase Agreement Standard Terms attached as Exhibit A) dated November 21, 2008 between the Company and the United States Department of the Treasury [incorporated by reference to the Registrant's Current Report on Form 8-K filed on November 24, 2008 (File No. 000-26584)].

Executive Salary Continuation Agreement with Gary L. Sirmon [incorporated by reference to exhibits filed with the Annual Report on Form 10-K for the year ended March 31, 1996 (File No. 0-26584)].

Employment Agreement with Michael K. Larsen [incorporated by reference to exhibits filed with the Annual Report on Form 10-K for the year ended March 31, 1996 (File No. 0-26584)].

Amended and Restated Employment Agreement with Mark J. Grescovich [incorporated by reference to Exhibit 10.1 to the Current Report on Form 8-K filed on June 4, 2013 (File No. 000-26584)].

Executive Salary Continuation Agreement with Michael K. Larsen [incorporated by reference to exhibits filed with the Annual Report on Form 10-K for the year ended March 31, 1996 (File No. 0-26584)].

1996 Stock Option Plan [incorporated by reference to Exhibit 99.1 to the Registration Statement on Form S-8 dated August 26, 1996 (File No. 333-10819)].

1996 Management Recognition and Development Plan [incorporated by reference to Exhibit 99.2 to the Registration Statement on Form S-8 dated August 26, 1996 (File No. 333-10819)].

Consultant Agreement with Jesse G. Foster, dated as of December 19, 2003. [incorporated by reference to
$10\{\mathrm{~g}\} \quad$ exhibits filed with the Annual Report on Form 10-K for the year ended December 31, 2003 (File No. $0-23584)]$.
$10\{\mathrm{~h}\} \quad$ Supplemental Retirement Plan as Amended with Jesse G. Foster [incorporated by reference to exhibits filed with the Annual Report on Form 10-K for the year ended March 31, 1997 (File No. 0-26584)].

Employment Agreement with Lloyd W. Baker [incorporated by reference to exhibits filed with the Annual Report on Form 10-K for the year ended December 31, 2001 (File No. 0-26584)].

Employment Agreement with D. Michael Jones [incorporated by reference to exhibits filed with the Annual Report on Form 10-K for the year ended December 31, 2001 (File No. 0-26584)].

Supplemental Executive Retirement Program Agreement with D. Michael Jones [incorporated by $10\{\mathrm{k}\} \quad$ reference to exhibits filed with the Annual Report on Form 10-K for the year ended December 31, 2003 (File No. 0-26584)].

Form of Supplemental Executive Retirement Program Agreement with Gary Sirmon, Michael K. Larsen,

1998 Stock Option Plan [incorporated by reference to exhibits filed with the Registration Statement on Form S-8 dated February 2, 1999 (File No. 333-71625)].

2001 Stock Option Plan [incorporated by reference to Exhibit 99.1 to the Registration Statement on Form S-8 dated August 8, 2001 (File No. 333-67168)].

Form of Employment Contract entered into with Cynthia D. Purcell, Richard B. Barton, Paul E. Folz and
$10\{\mathrm{o}\}$ Douglas M. Bennett [incorporated by reference to exhibits filed with the Annual Report on Form 10-K for the year ended December 31, 2003 (File No. 0-26584)].

2004 Executive Officer and Director Stock Account Deferred Compensation Plan [incorporated by
$10\{\mathrm{p}\} \quad$ reference to exhibits filed with the Annual Report on Form 10-K for the year ended December 31, 2005 (File No. 0-26584)].

2004 Executive Officer and Director Investment Account Deferred Compensation Plan [incorporated by $10\{q\} \quad$ reference to exhibits filed with the Annual Report on Form 10-K for the year ended December 31, 2005 (File No. 0-26584)].

Long-Term Incentive Plan [incorporated by reference to the exhibits filed with the Form 8-K on May 6, 2008].

Form of Compensation Modification Agreement [incorporated by reference to the Registrant's Current Report on Form 8-K filed on November 24, 2008 (File No. 000-26584)].
$10\{\mathrm{t}\} 2005$ Executive Officer and Director Stock Account Deferred Compensation Plan.
Entry into an Indemnification Agreement with each of the Company's Directors [incorporated by reference to exhibits filed with the Form 8-K on January 29, 2010].
 registration statement or prospectus for purposes of Sections 11 or 12 of the Securities Act of 1933 or Section 18 of the Securities Exchange Act of 1934, as amended, and otherwise are not subject to liability under those sections.

## SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
