ENGELHARD THIRD-QUARTER RESULTS IN LINE WITH EXPECTATIONS

ISELIN, NJ, October 23, 2003 Engelhard Corporation (NYSE: EC) today reported net earnings for the third quarter ended September 30 of \$59.8 million, or 47 cents per share on a diluted basis, compared with \$2.9 million, or two cents per share for the same period a year ago. The year-ago quarter included a charge for an equity investment impairment amounting to \$57.7 million, or 44 cents per share. The current quarter's results were in line with the current range of estimates.

Third quarter sales were \$915 million compared with \$859 million a year ago.

We're pleased that the strength from new technology coupled with a passion for productivity once again enabled us to deliver results in line with estimates without the benefit of significant economic recovery, said Barry W. Perry, chairman and chief executive officer. In addition, we're using our strong cash flow to further support return to shareholders through an increase in the dividend, additional share buyback and acceleration of payment to our pension fund.

Our core industrial end markets are not yet reflecting an economic recovery, Mr. Perry said. However, we expect to sustain modest earnings growth and strong cash flow through next year without relying on a significant rebound across these markets.

Third-Quarter Operating Results

Operating earnings from Environmental Technologies increased 54% to \$31 million. Sales rose 28% to \$202 million. The significant earnings increase resulted from a combination of solid results from mobile environmental markets plus the absence of costs in the year-ago quarter related to rework for power-generation applications. Higher pass-through cost of substrates to mobile markets plus the favorable effects of foreign exchange accounted for slightly less than half the sales increase.

Operating earnings from Process Technologies rose 15% to \$25 million while sales increased 14% to \$144 million. Increased demand for certain petroleum refining, petrochemical and polyolefin catalysts contributed to the earnings increase, along with benefits from productivity programs and foreign exchange. Partly offsetting these results were higher energy costs.

Operating earnings from Appearance and Performance Technologies declined 33% to \$18 million, while sales were down 3% to \$166 million. Lower volumes of minerals-based products sold to paper and certain other industrial end markets and higher energy costs accounted for the declines.

Operating earnings from Materials Services declined to \$1 million, as expected, compared with \$8 million earned in the year-ago quarter. Sales increased 1% to \$385 million. Weak industrial demand for certain platinum group metals and lower recycling service results continue to impact this segment.

Engelhard Corporation is a surface and materials science company that develops technologies to improve customers products and processes. A *Fortune 500* company, Engelhard is a world-leading provider of technologies for environmental, process, appearance and performance applications. For more information, visit Engelhard on the Internet at www.engelhard.com.

Forward-looking statements: This document contains forward-looking statements in management's comments. There are a number of factors that could cause Engelhard's actual results to vary materially from those projected in the forward-looking statements. For a more thorough discussion of these factors, please refer to page 26 of Engelhard's 2002 Form 10-K, dated March 25, 2003.
