BAR HARBOR BANKSHARES

(Exact name of registrant as specified in its charter)

Maine

*(State or other jurisdiction of
incorporation or organization)*

P.O. Box 400, 82 Main Street

Bar Harbor, Maine

(Address of principal executive offices)

04609-0400

(Zip Code)

01-0393663

*(I.R.S. Employer
Identification No.)*

(207) 288-3314

(Registrant's telephone number,

including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of class

Name of exchange on which registered

Common Stock, \$2.00 par value per share

NYSE MKT, LLC

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act: YES NO

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act: YES NO

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days: YES NO

Indicate by checkmark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act: Large accelerated filer Accelerated filer Non-accelerated filer (do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act): YES NO

The aggregate market value of the common stock held by non-affiliates of Bar Harbor Bankshares was \$139,069,826 based on the closing sale price of the common stock on the NYSE MKT on June 28, 2013, the last trading day of the registrant's most recently completed second quarter.

Number of shares of Common Stock par value \$2.00 outstanding as of March 3, 2014: **3,940,790**

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the definitive Proxy Statement for the Annual Meeting of Stockholders to be held on May 20, 2014 are incorporated by reference into Part III, Items 10-14 of this Annual Report on Form 10-K.

FORWARD-LOOKING STATEMENTS DISCLAIMER

Certain statements, as well as certain other discussions contained in this Annual Report on Form 10-K, or incorporated herein by reference, contain statements which may be considered to be forward-looking within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended. You can identify these forward-looking statements by the use of words like "strategy," "expects," "plans," "believes," "will," "estimates," "intends," "projects," "goals," "targets," and other words of similar meaning. You can also identify them by the fact that they do not relate strictly to historical or current facts.

Investors are cautioned that forward-looking statements are inherently uncertain. Forward-looking statements include, but are not limited to, those made in connection with estimates with respect to the future results of operations, financial condition, and the business of Bar Harbor Bankshares (the Company) which are subject to change based on the impact of various factors that could cause actual results to differ materially from those projected or suggested due to certain risks and uncertainties. Those factors include but are not limited to:

- (i) The Company's success is dependent to a significant extent upon general economic conditions in Maine, and Maine's ability to attract new business, as well as factors that affect tourism, a major source of economic activity in the Company's immediate market areas;
- (ii) The Company's earnings depend to a great extent on the level of net interest income (the difference between interest income earned on loans and investments and the interest expense paid on deposits and borrowings) generated by the Company's wholly-owned banking subsidiary, Bar Harbor Bank & Trust (the Bank), and thus the Company's results of operations may be adversely affected by increases or decreases in interest rates;
- (iii) The banking business is highly competitive and the profitability of the Company depends on the Bank's ability to attract loans and deposits in Maine, where the Bank competes with a variety of traditional banking and non-traditional institutions, such as credit unions and finance companies;
- (iv) A significant portion of the Bank's loan portfolio is comprised of commercial loans and loans secured by real estate, exposing the Company to the risks inherent in financings based upon analysis of credit risk, the value of underlying collateral, and other intangible factors which are considered in making commercial loans and, accordingly, the Company's profitability may be negatively impacted by judgment errors in risk analysis, by loan defaults, and the ability of certain borrowers to repay such loans during a downturn in general economic conditions;
- (v) Adverse changes in repayment performance and fair value of underlying residential mortgage loan collateral, that differ from the Company's current estimates, could change the Company's expectations that it will recover the amortized cost of its private label mortgage backed securities portfolio and/or its conclusion that such securities were not other-than temporarily impaired as of the date of this report;
- (vi) The Company's allowance for loan losses may be adversely impacted by a variety of factors, including, but not limited to, the performance of the Company's loan portfolio, the economy,

changes in interest rates, and the view of regulatory authorities toward loan classifications;

- (vii) Significant changes in the Company's internal controls, or internal control failures;
- (viii) Acts or threats of terrorism and actions taken by the United States or other governments as a result of such threats, including military action, could further adversely affect business and economic conditions in the United States generally and in the Company's markets, which could have an adverse effect on the Company's financial performance and that of borrowers and on the financial markets and the price of the Company's common stock;
- (ix) Significant changes in the extensive laws, regulations, and policies governing bank holding companies and their subsidiaries could alter the Company's business environment or affect its operations;
- (x) Changes in general, national, international, regional or local economic conditions and credit markets which are less favorable than those anticipated by Company management that could impact the Company's securities portfolio, quality of credits, or the overall demand for the Company's products or services; and
- (xi) The Company's success in managing the risks involved in all of the foregoing matters.

You should carefully review all of these factors as well as the risk factors set forth in Item 1A. Risk Factors contained in this Annual Report of Form 10-K. There may be other risk factors that could cause differences from those anticipated by management.

When we say we, us, our, or the Company, we mean the Company on a consolidated basis with the Bank.

The forward-looking statements contained herein represent the Company's judgment as of the date of this Annual Report on Form 10-K, and the Company cautions readers not to place undue reliance on such statements. The Company disclaims any obligation to publicly update or revise any forward-looking statement contained in the succeeding discussion, or elsewhere in this Annual Report on Form 10-K, except to the extent required by federal securities laws.

PART I

ITEM 1. BUSINESS

Organization

Bar Harbor Bankshares (the Company) (BHB) was incorporated under the laws of the state of Maine on January 19, 1984. At December 31, 2013, the Company had total consolidated assets of \$1.37 billion and total shareholders' equity of \$121.4 million.

The Company has one, wholly-owned first tier operating subsidiary, Bar Harbor Bank & Trust (the Bank), a community bank, which offers a wide range of deposit, loan, and related banking products, as well as brokerage services provided through a third-party brokerage arrangement. In addition, the Company offers trust and investment management services through its second tier subsidiary, Bar Harbor Trust Services (Trust Services), a Maine chartered non-depository trust company. These products and services are offered to individuals, businesses, not-for-profit organizations and municipalities.

The Company is a bank holding company (BHC) registered under the Bank Holding Company Act of 1956, as amended (the BHC Act), and is subject to supervision, regulation and examination by the Board of Governors of the Federal Reserve System (the FRB). The Company is also a Maine Financial Institution Holding Company for the purposes of the laws of the state of Maine, and as such is subject to the jurisdiction of the Superintendent (the Superintendent) of the Maine Bureau of Financial Institutions (BFI).

Bar Harbor Bank & Trust

The Bank, originally founded in 1887, is a Maine financial institution, and its deposits are insured by the Federal Deposit Insurance Corporation (the FDIC) up to the maximum extent permitted by law. The Bank is subject to the supervision, regulation, and examination of the FDIC and the BFI. It is not a member of the Federal Reserve Bank.

The Bank has fifteen (15) branch offices located throughout downeast, midcoast and central Maine, including its principal office located at 82 Main Street, Bar Harbor. The Bank's branch offices are located in Hancock, Washington, Knox, Kennebec and Sagadahoc Counties, representing the Bank's principal market areas. The Hancock County offices, in addition to Bar Harbor, are located in Blue Hill, Deer Isle, Ellsworth, Northeast Harbor, Somesville, Southwest Harbor, and Winter Harbor. The Washington County offices are located in Milbridge, Machias, and Lubec. The Knox, Kennebec and Sagadahoc County offices are located in Rockland, Augusta, South China, and Topsham.

The Bank delivers its operations and technology support services from its operations center located in Ellsworth, Maine.

The Bank is a retail bank serving individual and business customers, retail establishments and restaurants, seasonal lodging, biological research laboratories, and a large contingent of retirees. As a predominately coastal bank, it serves the tourism, hospitality, lobstering, fishing, boat building and marine services industries. It also serves Maine's wild blueberry industry through its Hancock and Washington County offices. The Bank operates in a competitive market that includes other community banks, savings institutions, credit unions, and branch offices of statewide and interstate bank holding companies located in the Bank's market area.

The Bank has a broad deposit base and loss of any one depositor or closely aligned group of depositors would not have a material adverse effect on its business. Historically, the banking business in the Bank's market area has been seasonal, with lower deposits in the winter and spring, and higher deposits in the summer and autumn. These seasonal swings have been fairly predictable and have historically not had a material adverse impact on the Bank or its liquidity position. Approximately 91.4% of the Bank's deposits are in interest bearing accounts. The Bank has paid, and anticipates that it will continue to pay, competitive interest rates on all of the deposit account products it offers and does not anticipate any material loss of these deposits.

The Bank emphasizes personal service to the community, with a concentration on retail banking. Customers are primarily individuals and small businesses to which the Bank offers a wide variety of products and services.

Retail Products and Services: The Bank offers a variety of consumer financial products and services designed to satisfy the deposit and borrowing needs of its retail customers. The Bank's retail deposit products and services include checking accounts, interest bearing NOW accounts, money market accounts, savings accounts, club accounts, short-term and long-term certificates of deposit, Health Savings Accounts, and Individual Retirement Accounts. Credit products and services include home mortgages, residential construction loans, home equity loans and lines of credit, credit cards, installment loans, and overdraft protection services. The Bank provides secured and unsecured installment loans for new or used automobiles, boats, recreational vehicles, mobile homes and other personal needs. The Bank also offers other customary products and services such as safe deposit box rentals, wire transfers, check collection services, foreign currency exchange, money orders, and U.S. Savings Bonds redemptions.

The Bank staffs a customer service center, providing customers with telephone and e-mail responses to their questions and needs. The Bank also offers free banking-by-mail services.

Retail Brokerage Services: The Bank retains Infinex Investments, Inc., (Infinex) as a full service third-party broker-dealer, conducting business under the assumed business name Bar Harbor Financial Services. Bar Harbor Financial Services is a branch office of Infinex, an independent registered broker-dealer offering securities and insurance products that is not affiliated with the Company or its subsidiaries. These products are not deposits, are not insured by the FDIC or any other government agency, are not guaranteed by the Bank or any affiliate, and may be

subject to investment risk, including possible loss of value.

Bar Harbor Financial Services principally serves the brokerage needs of individuals, from first-time purchasers, to sophisticated investors. It also offers a line of life insurance, annuity, and retirement products, as well as financial planning services. Infinex was formed by a group of member banks, and is reportedly one of the largest providers of third party investment and insurance services to banks and their customers in New England. Through Infinex, the Bank is able to take advantage of the expertise, capabilities, and experience of a well-established third-party broker-dealer in a cost effective manner.

Electronic Banking Services: The Bank continues to offer free Internet banking services, including free check images and electronic bill payment, through its dedicated website at www.bhbt.com. Additionally, the Bank offers telephone banking, an interactive voice response system through which customers can check account balances and activity, as well as initiate money transfers between their accounts. Customers can also monitor their accounts with free mobile banking access via text messaging, browser or Apps, and they can receive alerts, view accounts, transfer funds and pay bills. The Bank also offers Popmoney®, an innovative personal payment service that eliminates the need for checks and cash by allowing customers to send and receive money as easily as they send and receive e-mail and text messages.

Automated Teller Machines (ATMs) are located at each of the Bank's fifteen (15) branch locations. The Bank is also a member of Maine Cash Access, providing customers with surcharge-free access to approximately 175 ATMs throughout the state of Maine. Visa debit cards are also offered, providing customers with free access to their deposit account balances at point of sale locations throughout most of the world.

Commercial Products and Services: The Bank serves the small business market throughout downeast, midcoast and central Maine. It offers business loans to individuals, partnerships, corporations, and other business entities for capital construction, real estate and equipment financing, working capital, real estate development, and a broad range of other business purposes. Business loans are provided primarily to organizations and sole proprietors in the tourism, hospitality, healthcare, blueberry, boatbuilding, biological research, and fishing industries, as well as to other small and mid-size businesses associated with coastal communities. Certain larger loans, which may exceed the Bank's lending limits, are written with a participated portion sold to another financial institution, so that the Bank retains only such portions of those loans that are within its lending limits and credit risk tolerances.

The Bank offers a variety of commercial deposit accounts, most notably business checking and tiered money market accounts. These accounts are typically used as operating accounts or short-term savings vehicles. The Bank's cash management services provide business customers with short-term investment opportunities through a cash management sweep program, whereby excess operating funds over established thresholds are swept into overnight securities sold under agreements to repurchase. The Bank also offers *Business On-Line Direct* (**BOLD**) an Internet banking service for businesses. This service allows business clients to view their account histories, print statements, view check images, order stop payments, transfer funds between accounts, and transmit Automated Clearing House (ACH) files. The Bank also offers remote deposit capture, enabling its business customers to deposit checks remotely. Other commercial banking services include merchant credit card processing provided through a third party vendor, night depository, and coin and currency handling.

Bar Harbor Trust Services

Trust Services is a Maine chartered non-depository trust company and a wholly-owned subsidiary of the Bank. Trust Services provides a comprehensive array of trust and investment management services to individuals, businesses, not-for-profit organizations, and municipalities.

Trust Services serves as trustee of both living trusts and trusts under wills, including revocable and irrevocable, charitable remainder and testamentary trusts, and in this capacity holds, accounts for and manages financial assets, real estate and special assets. Trust Services offers custody, estate settlement, and fiduciary tax services. Additionally, Trust Services offers employee benefit trust services for which it acts as trustee, custodian, administrator and/or investment advisor, for employee benefit plans and for corporate, self-employed, municipal and not-for-profit employers located throughout the Company's market areas.

The staff includes credentialed investment and trust professionals with extensive experience. At December 31, 2013, Trust Services served 751 client accounts, with assets under management and assets held in custody amounting to \$387.6 million and \$33.9 million, respectively.

Competition

The Company competes principally in downeast, midcoast and central Maine, which can generally be characterized as rural areas. The Company considers its primary market areas to be Hancock, Knox, Washington, Kennebec and Sagadahoc counties, each in the state of Maine. According to the 2012 Census Bureau Report estimate, the population of these five counties was 54,558, 39,668, 32,462, 121,853 and 35,191, respectively, representing a combined population of approximately 283,732. The economies in these counties are based primarily on tourism, healthcare, fishing and lobstering, agriculture, state government, and small local businesses, but are also supported by a large contingent of retirees. Major competitors in these market areas include local independent banks, local branches of large regional bank affiliates, thrift institutions, savings and loan institutions, mortgage companies, and credit

unions. Other competitors in the Company's primary market area include financing affiliates of consumer durable goods manufacturers, insurance companies, brokerage firms, investment advisors, and other non-bank financial service providers.

Like most financial institutions in the United States, the Company competes with an ever-increasing array of financial service providers. As the national economy moves further towards a concentration of service companies, competitive pressures will mount.

The Company has generally been able to compete effectively with other financial institutions by emphasizing quality customer service, making decisions at the local level, maintaining long-term customer relationships, building customer loyalty, and providing products and services designed to address the specific needs of customers; however, no assurance can be given that the Company will continue to be able to compete effectively with other financial institutions in the future.

No material part of the Company's business is dependent upon one, or a few customers, or upon a particular industry segment, the loss of which would have a material adverse impact on the operations of the Company.

Management and Employees

The Company has two principal executive officers: Curtis C. Simard, President and Chief Executive Officer, and Gerald Shencavitz, Executive Vice President, Chief Financial Officer and Treasurer.

As of December 31, 2013, the Bank employed 170 full-time equivalent employees, Trust Services employed 12 full-time equivalent employees, and the Company employed 3 full-time employees, representing a full-time equivalent complement of 185 employees of the Company. None of the employees are represented by collective bargaining agreements.

The Company's management believes employee relations to be good.

Supervision and Regulation

Banking is a complex, highly regulated industry. Consequently, our performance can be affected, not only by management decisions and general and local economic conditions, but also by the statutes administered by, and the extensive regulations and policies of, various governmental regulatory authorities. These authorities include, but are not limited to, the Board of Governors of the Federal Reserve System, the FDIC, the Maine Bureau of Financial Institutions, the Consumer Financial Protection Bureau, the Internal Revenue Service, and state taxing authorities. The effect of these statutes, regulations, and policies and any changes to any of them can be significant and cannot be predicted. Any change in applicable laws, regulations, or regulatory policies may have material effect on our business, operations, and prospects. We are unable to predict the nature or extent of the effects that fiscal or monetary policies, economic controls, or new federal or state legislation may have on our business and earnings in the future.

The primary goals of the bank regulatory scheme are to maintain a safe and sound banking system and to facilitate the conduct of sound monetary policy. In furtherance of these goals, the U.S. Congress and the State of Maine have

created several largely autonomous regulatory agencies and enacted numerous laws that govern banks, bank holding companies, and the banking industry. The system of supervision and regulation applicable to the Company and the Bank establishes a comprehensive framework for their respective operations and is intended primarily for the protection of the Bank's depositors and the public, rather than the stockholders and creditors.

The following is an overview of some of the materially relevant laws, rules, and regulations governing banks and bank holding companies and significant developments since the beginning of our 2013 fiscal year, but does not purport to be a complete summary of all applicable laws, rules, and regulations governing banks and bank holding companies or developments within them. The descriptions are qualified in their entirety by reference to the specific statutes, regulations, and policies discussed.

Overview

Banking organizations are generally restricted to engaging only in deposit-taking and lending and other activities considered closely related to banking. As a registered bank holding company, the Company is subject to the regulation and supervision of the FRB under the BHC Act. Bank holding companies are required to file periodic reports with and are subject to periodic examination by the FRB. Under the Dodd-Frank Act, a bank holding company is expected to serve as a source of financial and managerial strength to its subsidiary banks. Pursuant to this requirement, a bank holding company should stand ready to use its resources to provide adequate capital funds to its subsidiary bank during periods of financial stress or adversity.

The Bank is supervised and regularly examined by state and/or federal bank regulatory agencies. As a Maine chartered financial institution, the Bank is subject to federal regulation and supervision by the FDIC and to state regulation and supervision by the Maine Bureau of Financial Institutions (BFI). The Bank's deposit accounts are insured by the Deposit Insurance Fund (DIF), which is administered by the FDIC. The Bank is not a member of the Federal Reserve System.

Many banks remain subject to formal or informal enforcement orders primarily resulting from the nonperformance of loans made before the recent recession. Neither the Company nor Bank was subject to any such orders during 2013.

Banks, including our Bank, pay FDIC insurance assessments which are intended to cover the costs of the failure of other insured banks.

Banks, including our Bank, are subject to many risks, including credit, liquidity, interest rate, and reputation risk. See Item 1A in this Report below for further information regarding Risk Factors applicable to the financial services

industry and us.

.

Bank expansion and acquisitions generally require regulatory approval or nonobjection.

.

Banks, including our Bank, are subject to consumer compliance, customer privacy protection, and anti-money laundering legislation and regulations.

.

Banks are subject to capital and allowance for loan loss requirements, loan limits, restrictions on dividends and affiliate transactions, operations and deposit regulations, and reserve requirements.

.

As a public company whose common stock is listed on the NYSE MKT, we are subject to corporate governance requirements SEC and NYSE MKT, as well as federal and state law. Under the Sarbanes-Oxley Act, we are required to meet certain requirements regarding business dealings with members of our Board of Directors, the structure of our Audit Committee and ethical standards for our senior financial officers. Under SEC and NYSE MKT rules, we are required to comply with other standards of corporate governance, including having a majority of independent directors serve on our Board of Directors, and the establishment of independent audit, compensation and corporate governance committees.

The Dodd-Frank Act included a number of provisions imposing governance standards, including those regarding Say-on-Pay votes for shareholders, incentive compensation clawbacks, compensation committee independence and disclosure concerning executive compensation, employee and director hedging and chairman and CEO positions.

Under Section 404 of the Sarbanes-Oxley Act, we are required to assess the effectiveness of our internal controls over financial reporting and to obtain an opinion from our independent auditors regarding the effectiveness of our internal controls over financial reporting.

Recent Capital Adequacy Developments

The Company and the Bank are subject to various regulatory capital requirements established by bank regulators. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material impact on our financial results. Under applicable capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The Company and the Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components of capital, risk weightings of assets, off-balance sheet transactions, and other factors. Quantitative measures established by regulation to ensure capital adequacy require the Company, as a bank holding company, and the Bank, to maintain minimum amounts and ratios of Total and Tier I capital to risk-weighted assets and Tier I capital to adjusted assets (as defined in the regulations). See Note 11 of the Notes to Consolidated Financial Statements in this Form 10-K for further information.

In July, 2013 the Federal Reserve Board, the FDIC and OCC, adopted a final rule that implements the Basel III changes to the international regulatory capital framework, referred to as the "Basel III Rules." The Basel III Rules apply to both depository institutions and (subject to certain exceptions not applicable to the Company) their holding companies. Although parts of the Basel III Rules apply only to large, complex financial institutions, substantial portions of the Basel III Rules apply to the Company and the Bank. The Basel III Rules include requirements contemplated by the Dodd-Frank Act as well as certain standards initially adopted by the Basel Committee on Banking Supervision in December 2010.

The Basel III Rules include new risk-based and leverage capital ratio requirements and refine the definition of what constitutes "capital" for purposes of calculating those ratios. The Basel III Rules also create a new Common Equity Tier 1 ("CET1") risk-based capital ratio. CET1 capital will consist of retained earnings and common stock instruments, subject to certain adjustments.

The Basel III Rules will also establish a "capital conservation buffer" of 2.5% above the new regulatory minimum risk-based capital requirements. The new capital conservation buffer requirement is to be phased in beginning in January 2016 at 0.625% of risk-weighted assets and will increase by that amount each year until fully implemented in January 2019. An institution would be subject to limitations on certain activities including payment of dividends,

share repurchases and discretionary bonuses to executive officers if its capital level is below the buffer amount.

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

The above BASEL III capital ratio requirements as applicable to the Bank after the full phase-in period are summarized in the table below.⁽¹⁾

	BASEL III Minimum for Capital Adequacy Purposes	BASEL III Additional Capital Conservation Buffer	BASEL III Adequate Ratio with Capital Conservation Buffer
Total Risked Based Capital (total capital to risk weighted assets)	8.0%	2.5%	10.5%
Tier 1 Risked Based Capital (tier 1 to risk weighted assets)	6.0%	2.5%	8.5%
Tier 1 Leverage Ratio (tier 1 to average assets)	4.0%	---%	4.0%
Common Equity Tier 1 Risked Based (CET1 to risk weighted assets)	4.5%	2.5%	7.0%

(1)

Because the BASEL III final rules modify the methodology for calculating risk-weighted assets and the deduction and adjustment to capital, the ratios above may not be comparable to the current applicable regulatory requirements, or the Company's actual capital ratios as of December 31, 2013.

The Basel III Rules would also revise the *prompt corrective action framework*, which is designed to place restrictions on insured depository institutions, including our Bank, if capital levels do not meet certain thresholds. These revisions are effective January 1, 2015. The prompt correction action rules will be modified to include a CETI capital component and to increase certain other capital requirements for the various thresholds. For example, under the revised prompt corrective action rules, insured depository institutions will be required to meet the following capital levels in order to qualify as "well capitalized"; (i) a Total risk-based capital ratio of 10% (unchanged from current rules); (ii) a Tier 1 risk-based capital ratio of 8% (increased from 6%); (iii) a Tier 1 leverage ratio of 5% (unchanged from current rules); and (iv) a new common equity Tier 1 risk-based capital ratio of 6.5%.

The Basel III Rules set forth certain changes in the methods of calculating certain risk-weighted assets, which in turn will affect the calculation of risk based ratios. Under the Basel III Rules, higher or more sensitive risk weights would be assigned to various categories of assets, including, certain credit facilities that finance the acquisition, development or construction of real property, certain exposures or credits that are 90 days past due or on non-accrual, foreign exposures and certain corporate exposures. In addition, the Basel III Rules include (i) alternative standards of credit worthiness consistent with the Dodd-Frank Act; (ii) greater recognition of collateral and guarantees; and (iii) revised capital treatment for derivatives and repo-style transactions.

In addition, the final Basel III Rules include certain exemptions to address concerns about the regulatory burden on community banks. For example, banking organizations, such as our Company, with less than \$15 billion in consolidated assets as of December 31, 2009 are permitted to include in Tier 1 capital trust preferred securities and cumulative perpetual preferred stock issued and included in Tier 1 capital prior to May 19, 2010 on a permanent basis, without any phase out. Community banks may also elect on a one time basis in their March 31, 2015 quarterly filings to opt-out of the requirement to include most accumulated other comprehensive income ("AOCI") components in the calculation of CETI capital and, in effect, retain the AOCI treatment under the current capital rules. Under the Basel III Rules, the Company may make a one-time, permanent election to continue to exclude AOCI from capital. If the Company does not make this election, unrealized gains and losses would be included in the calculation of its regulatory capital. Overall, we believe the rule provides some significant concessions for smaller, less complex financial institutions, such as our Company,

The Basel III Rules generally become effective January 1, 2015. The conservation buffer will be phased- in beginning in 2016 and will take full effect on January 1, 2019. Although the Company must generally begin complying with the final rules on January 1, 2015, management believes the Company would satisfy the higher capital ratios imposed by Basel III, in addition to the new "well capitalized" requirements under the revised prompt corrective action rules discussed above, as of December 31, 2013.

Recent Mortgage Lending Rules

In January, 2014, The Consumer Financial Protection Bureau's (CFPB) Ability-to-Repay rules became effective. The Ability-to-Repay rules require most mortgage lenders, including the Bank, to make a good-faith effort to determine that their borrowers are likely to be able to pay back a mortgage loan. The CFPB is responsible for enforcing this law and new regulations. In practice this means lenders must generally find out, consider, and document a borrower's income, assets, employment, credit history and monthly expenses. According to the CFPB, certain types of mortgages are more likely to become a debt "trap" for the borrower. The new rule attempts to eliminate or control such loans. It also lays out basic guidelines that lenders can follow to originate what are called Qualified Mortgages. These are intended to provide lenders greater certainty that they are meeting the Ability-to-Repay requirement. If lenders choose not to follow these guidelines, they can still make a loan based on their reasonable, good-faith determination that the borrower has the ability to repay it. To be a Qualified Mortgage, the loan:

- Cannot have excessive upfront points and fees;
- Cannot be longer than 30 years;
- Cannot have certain risky features, such as paying only interest and not principal, or paying less than the full amount of interest so that the total debt grows each month; and
-

Must be in one of three categories: (1) the monthly loan payment, plus the borrower's other debt payments, does not exceed 43% of the borrower's monthly income; or (2) the loan qualifies for purchase or guarantee by a government sponsored enterprise (Fannie Mae or Freddie Mac), or is insured or guaranteed by a federal housing agency; or (3) the loan is made by a small lender that keeps the loan in its portfolio.

Although we have adopted processes and procedures to comply, we continue to evaluate the ongoing impact of the Ability-to-Repay Rules on our business. We anticipate additional complexity, cost, and expense associated with our retail mortgage lending line of business in the future resulting from training, compliance and documentation requirements under the new rules.

Monetary Policy and Economic Environment

The earnings of the Company are significantly affected by the monetary and fiscal policies of governmental authorities, including the FRB. Among the instruments of monetary policy used by the FRB to implement these objectives are open-market operations in U.S. Government securities and federal funds, changes in the discount rate on member bank borrowings, and changes in reserve requirements against member bank deposits. These instruments of monetary policy are used in varying combinations to influence the overall level of bank loans, investments, and deposits, and the interest rates charged on loans and paid for deposits. The FRB frequently used these instruments of monetary policy, especially its open-market operations and the discount rate, to influence the level of interest rates and to affect the strength of the economy, the level of inflation, or the price of the dollar in foreign exchange markets. The monetary policies of the FRB have had a significant effect on the operating results of banking institutions in the past and are expected to continue to do so in the future. It is not possible to predict the nature of future changes in monetary and fiscal policies, or the effect which they may have on the Company's business and earnings.

Financial Information about Industry Segments

The information required under this item is included in the Company's financial statements, which appear in Part II, Item 8, Note 1, of this Annual Report on Form 10-K, and is incorporated herein by cross reference thereto.

Availability of Information – Company Website

The Company maintains an Internet website at www.bhbt.com. At this website, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and proxy statement on Schedule 14A and amendments to such reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act are available, free of charge, as soon as reasonably practicable after such forms are electronically filed with, or furnished to, the SEC. The public may read and copy any materials we file with the SEC at the SEC's Public Reference Room, located at 100 F Street, NE, Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC also maintains an Internet website at www.sec.gov that contains reports, proxy, and information statements, and other information regarding issuers that file electronically with the

SEC. In addition, the Company makes available, free of charge, its press releases and Code of Ethics through the Company's Investor Relations page. Information on our website is not incorporated by reference into this document and should not be considered part of this Report.

ITEM 1A. RISK FACTORS

An investment in our common stock is subject to risks inherent to our business. The material risks and uncertainties that management believes affect us are described below. Before making an investment decision, you should carefully consider the risks and uncertainties described below together with all of the other information included or incorporated by reference in this report. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties that management is not aware of or focused on or that management currently deems immaterial may also impair our business operations. This report is qualified in its entirety by these risk factors.

If any of the following risks actually occurs, our financial condition, results of operations, or cash flow could be materially and adversely affected. If this were to happen, the value of our common stock could decline significantly, and you could lose all or part of your investment.

Our business may be adversely affected by conditions in the financial markets and economic conditions generally.

Negative developments in the financial services industry since 2008 resulted in uncertainty in the financial markets in general and a related general economic recession. In addition, as a consequence of the recent U.S. recession, businesses across a wide range of industries faced serious difficulties due to the decrease in consumer spending, reduced consumer confidence brought on by deflated home prices, among other things, and reduced liquidity in the credit markets. Unemployment also increased significantly during this period. Many of these circumstances continued into 2013 and continue to be an issue today.

As a result of these financial and economic crises, many lending institutions, including the Bank, experienced in recent years declines in the performance of their loans, including construction, commercial real estate loans, and other commercial and consumer loans. Moreover, competition among depository institutions for core deposits and quality loans increased significantly. In addition, the values of real estate collateral supporting many commercial loans and home mortgages declined. Bank and bank holding company stock prices were negatively affected, and the ability of banks and bank holding companies to raise capital or borrow in the debt markets has been more difficult compared to previous periods. As a result, bank regulatory agencies have been and are expected to continue to be very aggressive in responding to concerns and trends identified in examinations, including the issuance of formal or informal enforcement actions or orders. The impact of new legislation in response to these developments may negatively impact our operations by restricting our business operations, including our ability to originate or sell loans, and adversely impact our financial performance or our stock price.

In addition, further negative market developments, including another recession, may affect consumer confidence levels and may cause adverse changes in payment patterns, causing increases in delinquencies and default rates, which may impact our charge-offs and provision for credit losses. A worsening of these conditions would likely exacerbate the adverse effects of these difficult market conditions on us and others in the financial services industry.

Risks Related to Our Regulatory Environment.

We are subject to extensive regulation and supervision under federal and state laws and regulations. Some of the significant federal and state banking regulations that affect us are described in this report at Part I, Item 1, Supervision and Regulation. These regulations, along with the existing tax, accounting, securities, insurance, and monetary laws, regulations, rules, standards, policies and interpretations control the methods by which financial institutions conduct business, implement strategic initiatives and tax compliance, and govern financial reporting and disclosures. These laws, regulations, rules, standards, policies and interpretations are constantly evolving and may change significantly over time.

Changes in regulations resulting from the Dodd-Frank Act or any new regulations may affect our businesses. The market and economic conditions over the past several years have led to legislation and numerous and continuing proposals for changes in the regulation of the banking and financial services industry, including significant additional legislation and regulation in the U.S. and abroad. The Dodd-Frank Act enacted sweeping changes in the supervision and regulation of the financial industry designed to provide for greater oversight of financial industry participants, reduce risk in banking practices and in securities and derivatives trading, enhance public company corporate governance practices and executive compensation disclosures, and provide for greater protections to individual consumers and investors.

Certain elements of the Dodd-Frank Act became effective immediately, while the details of some provisions remain subject to implementing regulations that are yet to be adopted by various applicable regulatory agencies. The ultimate impact that the Dodd-Frank Act will have on us, the financial services industry and the economy cannot be known until all such implementing regulations called for under the Dodd-Frank Act have been finalized and implemented.

The Dodd-Frank Act may impact the manner in which we market our products and services, manage our business and operations and interact with regulators, all of which, while not currently anticipated to, could materially impact our results of operations, financial condition and liquidity. Certain provisions of the Dodd-Frank Act that have or may impact our business include, but are not limited to: regulatory oversight of incentive compensation, the imposition of capital requirements on holding companies and, to a lesser extent, greater oversight over derivatives trading and restrictions on proprietary trading. There is also increased regulatory scrutiny (and related compliance costs). These include but are not limited to the Bank's oversight by the CFPB.

Additionally, we are closely monitoring regulatory developments related to the Volcker Rule and their impact on community banks. In January 2014, the FRB, the OCC, the FDIC, the SEC and the Commodity Futures Trading

Commission approved an interim final rule that exempts trust-preferred securities (TruPS) that back collateralized debt obligations (CDOs) held by qualifying community banks from the application of some portions of the Volcker Rule. The final Volcker Rule, approved by regulators in December 2013, generally prohibited banking entities from engaging in the short-term proprietary trading of securities and derivatives for their own account and barred them from having certain relationships with hedge funds or private equity funds. Included within the range of funds covered by the regulations were TruPS CDOs. Application of the Volcker Rule to TruPS CDOs would have forced many banks, including many community banks, to treat the TruPS CDO holdings as impaired and write down the value or sell the holdings entirely. The American Bankers Association filed a lawsuit in 2013 to block the provision from going into effect. In addition, some lawmakers also called on the regulators to revise the rule to minimize the effect on community banks. On January 14, 2014, the regulators announced the first revision to the Volcker Rule in the form of an interim final rule. The revision will allow some smaller banks to retain their interests in TruPS CDOs, though there are conditions to the exemption. The interim final rule exemption only applies when all of the following requirements are met:

?

The TruPS CDOs have been issued by banks with less than \$15 billion in assets;

?

The TruPS CDOs have been established before May 19, 2010; and

?

The bank must have acquired the TruPS CDOs prior to December 10, 2013.

The Company did not own any TruPS CDOs as of December 31, 2013.

To the extent the Dodd-Frank Act and the related extensive rules and regulations impacts the operations, financial condition, liquidity and capital requirements of unaffiliated financial institutions with whom we transact business, those institutions may seek to pass on increased costs, reduce their capacity to transact, or otherwise present inefficiencies in their interactions with us.

We are subject to credit risk.

There are inherent risks associated with our lending activities. These risks include, among other things, the impact of changes in interest rates and changes in the economic conditions in the markets where we operate as well as those across the United States and abroad. Increases in interest rates and/or weakening economic conditions could adversely impact the ability of borrowers to repay outstanding loans or the value of the collateral securing these loans.

We are also subject to various laws and regulations that affect our lending activities. Failure to comply with applicable laws and regulations could subject us to regulatory enforcement action that could result in the assessment of significant civil money penalties against us. The CPF's new Ability-to-Repay under Regulation Z may expose

lenders, such as the Bank, to heightened litigation risk unless their loans meet the definition of Qualified Mortgage or QM. Under the new rule a creditor must properly determine whether borrowers have the ability to repay their loans. Where a creditor does not act properly, the CFPB retains the ability to issue cease and desist orders, or impose civil monetary penalties. The rule also provides a private right of action to borrowers. They may seek actual damages, statutory damages, costs, and attorneys' fees, and special damages equal to the finance charges and fees incurred. In short, where the creditor does not properly assess borrowers' ability to repay loans, the Bank could be subject to legal damages from affected borrowers. Borrowers may also seek damages in class action litigation and individual cases. While current law provides for a one-year statute of limitation on damage actions, borrowers have three years to bring their Ability-to-Repay damage claims. Borrowers may also assert the Ability-to-Repay defense in response to a foreclosure action and seek recoupment or set-off. The three-year statute of limitation does not apply to use of defense. Use of this defense; however, borrowers are limited to three years of finance charges and fees as special damages. Assignees are liable for the errors of the original creditor.

We have adopted underwriting and credit monitoring policies and procedures, including the establishment and ongoing review of the allowance for loan losses and review of borrower financial statements and collateral appraisals, which management believes are appropriate to mitigate the risk of loss by assessing the likelihood of borrower non-performance and the value of available collateral. We also manage credit risk by diversifying our loan portfolio. An ongoing independent review, subsequent to management's review, of individual credits is performed by an independent loan review function, which reports to the Audit Committee of the Board of Directors.

The Bank's loans are principally concentrated in certain areas of Maine and adverse economic conditions in those markets could adversely affect our operations.

Our success is dependent to a significant extent upon general economic conditions in the United States and, in particular, the local economies of downeast, midcoast and central Maine, the primary markets served by us. We are particularly exposed to real estate and economic factors in the downeast, midcoast and central areas of Maine, as most of our loan portfolio is concentrated among borrowers in these markets. Furthermore, because a substantial portion of our loan portfolio is secured by real estate in these areas, the value of the associated collateral is also subject to regional real estate market conditions.

A number of our hospitality and other customers rely upon a high number of visits from tourists and vacationers to Acadia National Park as significant part of their businesses. In 2013, Acadia National Park experienced partial shutdowns in its operations due to the federal budget impasse. Future shut downs or changes in visitor rates to Acadia National Park for whatever reason(s) may have a significant impact on the businesses of many of our customers which may in turn have a negative impact on our business and results of operations.

Interest rate volatility could significantly reduce our profitability.

Our earnings and cash flows are largely dependent upon our net interest income. Net interest income is the difference between interest income earned on interest-bearing assets such as loans and securities and interest expense paid on interest-bearing liabilities such as deposits and borrowed funds. Interest rates are highly sensitive to many factors that are beyond our control, including general economic conditions, demand for loans, securities and deposits, and policies of various governmental and regulatory agencies and, in particular, the Board of Governors of the Federal Reserve System. Changes in monetary policy, including changes in interest rates, could influence not only the interest we receive on loans and securities and the amount of interest we pay on deposits and borrowings, but such changes could also affect (i) our ability to originate loans and obtain deposits, (ii) the fair value of our financial assets and liabilities, and (iii) the average duration of our loans and securities that are collateralized by mortgages. If the interest rates paid on deposits and other borrowings increase at a faster rate than the interest rates received on loans and other investments, our net interest income, and therefore earnings, could be adversely affected. Earnings could also be adversely affected if the interest rates received on loans and other investments fall more quickly than the interest rates paid on deposits and other borrowings. If interest rates decline, our higher-rate loans and investments may be subject to prepayment risk, which could negatively impact our net interest margin. Conversely, if interest rates increase, our loans and investment may be subject to extension risk, which could negatively impact our net interest margin as well.

Declines in value may adversely impact our investment securities portfolio.

We may be required to record other-than-temporary impairment charges on our investment securities if they suffer a decline in value that is considered other-than-temporary. Numerous factors, including collateral deterioration underlying certain private-label mortgage-backed securities, municipal bond defaults, lack of liquidity for re-sales of certain investment securities, or adverse actions by regulators, could have a negative effect on our securities portfolio in future periods.

We may elect or be compelled to seek additional capital in the future, but capital may not be available when it is needed.

We are required by federal and state regulatory authorities to maintain adequate levels of capital to support our operations. In addition, we may elect to raise additional capital to support our business or to finance acquisitions, if any, or we may otherwise elect to raise additional capital.

Our ability to raise additional capital, if needed, will depend on conditions in the capital markets, economic conditions, and a number of other factors, many of which are outside our control, and on our financial performance. Accordingly, we cannot be assured of our ability to raise additional capital if needed or on terms acceptable to us. If we cannot raise additional capital when needed, or on reasonable terms, it may have a material adverse effect on our financial condition and results of operations.

We may not be able to meet our cash flow needs on a timely basis at a reasonable cost, and our cost of funds for banking operations may significantly increase as a result of general economic conditions, interest rates, and competitive pressures.

Liquidity is the ability to meet cash flow needs on a timely basis and at a reasonable cost. The liquidity of the Bank is used to make loans and to repay deposit and borrowing liabilities as they become due, or are demanded by customers and creditors. Many factors affect the Bank's ability to meet liquidity needs, including variations in the markets served by its network of offices, its mix of assets and liabilities, reputation and standing in the marketplace, and general economic conditions.

The Bank's primary source of funding is retail deposits, gathered throughout its network of fifteen banking offices. Wholesale funding sources principally consist of secured borrowing lines from the FHLB of Boston of which it is a member, secured borrowing lines from the FRB of Boston, and certificates of deposit obtained from the national market. The Bank's securities and loan portfolios provide a source of contingent liquidity that could be accessed in a reasonable time period through sales.

Significant changes in general economic conditions, market interest rates, competitive pressures or otherwise, could cause the Bank's deposits to decrease relative to overall banking operations, and it would have to rely more heavily on brokered funds and borrowings in the future, which are typically more expensive than deposits.

Changes in economic conditions, including consumer savings habits and availability or access to the brokered deposit market could potentially have a significant impact on our liquidity position, which in turn could materially impact its financial condition, results of operations and cash flows.

We are subject to a variety of operational risks, including reputational risk, legal risk, and compliance risk, and the risk of fraud or theft by employees or outsiders, which may adversely affect our business and results of operations.

We are exposed to many types of operational risks, including reputational risk, legal and compliance risk, the risk of fraud or theft by employees or outsiders, and unauthorized transactions by employees or operational errors, including clerical or record-keeping errors or those resulting from faulty or disabled computer or telecommunications systems.

If personal, non-public, confidential, or proprietary information of customers in our possession were to be mishandled or misused, we could suffer significant regulatory consequences, reputational damage, and financial loss.

Because the nature of the financial services business involves a high volume of transactions, certain errors may be repeated or compounded before they are discovered and successfully rectified. Our necessary dependence upon automated systems to record and process transactions and our large transaction volume may further increase the risk that technical flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. We also may be subject to disruptions of our operating systems arising from events that are wholly or partially

beyond our control (i.e., computer viruses or electrical or telecommunications outages, natural disaster, disease pandemics, or other damage to property or physical assets), which may give rise to disruption of service to customers and to financial loss or liability. We are further exposed to the risk that our external vendors may be unable to fulfill their contractual obligations (or will be subject to the same risk of fraud or operational errors by their respective employees as we are) and to the risk that our (or our vendors') business continuity and data security systems prove to be inadequate. The occurrence of any of these risks could result in a diminished ability to operate our business (i.e., by requiring us to expend significant resources to correct the defect), as well as potential liability to clients, reputational damage, and regulatory intervention.

We continually encounter technological change.

The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Our future success depends, in part, upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers.

We are subject to possible claims and litigation pertaining to fiduciary responsibilities.

From time to time, customers make claims and take legal action pertaining to our performance of our fiduciary responsibilities. Whether customer claims and legal action related to our performance of our fiduciary responsibilities are founded or unfounded, if such claims and legal actions are not resolved in a manner favorable to us, they may result in significant financial liability and/or adversely affect the market perception of us and our products and services as well as impact customer demand for our products and services.

Strong competition within our markets may significantly impact our profitability.

We compete with an ever-increasing array of financial service providers. See the section entitled "Competition" of Item 1 of this Form 10-K for additional information about our competitors. Competition from nationwide banks, as well as local institutions, continues to mount in our markets.

Regional, national and international competitors have far greater assets and capitalization than we do and have greater access to capital markets and can offer a broader array of financial services than we can. For example, consumers can maintain funds that would have historically been held as bank deposits in brokerage accounts or mutual funds.

Consumers can also complete transactions such as paying bills and/or transferring funds directly without the assistance of banks. The process of eliminating banks as intermediaries, known as disintermediation, could result in the loss of fee income, as well as the loss of customer deposits and the related income generated from those deposits. Further, many of our competitors have fewer regulatory constraints and may have lower cost structures. Additionally, due to their size, many competitors may be able to achieve economies of scale and, as a result, may offer a broader range of products and services as well as better pricing for those products and services than we can.

To compete, we focus on quality customer service, making decisions at the local level, maintaining long-term customer relationships, building customer loyalty, and providing products and services designed to address the specific needs of customers. Failure to perform in any of these areas could significantly weaken our competitive position, which could adversely affect our growth and profitability.

Tax law changes may adversely affect our net income, effective tax rate, and our overall results of operations and financial condition.

Our financial performance is impacted by federal and state tax laws. Given the current economic and political environment, and ongoing state budgetary pressures, the enactment of new federal or state tax legislation may occur. The enactment of such legislation, or changes in the interpretation of existing law, including provisions impacting tax rates, apportionment, consolidation or combination, income, expenses, and credits, may have a material adverse effect on our financial condition and results of operations.

Our controls and procedures may fail or be circumvented.

We regularly review and update our internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurance that the objectives of the system are met.

The preparation of our financial statements requires the use of estimates that could significantly vary from actual results.

The preparation of our consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make significant estimates that affect the financial statements. The most critical estimate is the allowance for loan losses. Due to the inherent nature of estimates, we cannot provide absolute assurance that we will not significantly increase the allowance for loan losses and/or sustain credit losses that are significantly higher than provided for in the allowance.

Our access to funds from subsidiaries may be restricted.

Bar Harbor Bankshares is a separate and distinct legal entity from our Bank and nonbanking subsidiaries. Bar Harbor Bankshares depends on dividends, distributions and other payments from its banking and nonbanking subsidiaries to fund dividend payments on its common stock and to fund all payments on its other obligations. Our subsidiaries are subject to laws that authorize regulatory bodies to block or reduce the flow of funds from those subsidiaries to Bar Harbor Bankshares, which could impede access to funds it needs to make payments on its obligations or dividend payments.

We may be unable to attract and retain key personnel.

Our success depends, in large part, on our ability to attract and retain key personnel. Competition for qualified personnel in the financial services industry can be intense and the Company and its subsidiaries may not be able to hire or retain the key personnel that it depends upon for success. In addition, the Bank's rural geographic marketplace, combined with relatively expensive real estate purchase prices within the area of the Bank's principal office location in Bar Harbor, Maine, create additional risks for the Company and the Bank's ability to attract and retain key personnel. The unexpected loss of services of one or more of our key personnel could have a material adverse impact on our business because of their skills, knowledge of the markets in which we operate, years of industry experience and the difficulty of promptly finding qualified replacement personnel.

To the extent that we acquire other companies, our business may be negatively impacted by certain risks inherent with such acquisitions.

To the extent that we may acquire other financial services companies or assets in the future, our business may be negatively impacted by certain risks inherent with such acquisitions. These risks include, but are not limited to, the following:

.

the risk that the acquired business or assets will not perform in accordance with our expectations;

.

the risk that difficulties will arise in connection with the integration of the operations of the acquired business with the operations of our businesses;

.

the risk that we will divert our attention from other aspects of our existing business;

.

the risk that we may lose key employees of the combined business; and

the risks associated with entering into geographic and product markets in which we have limited or no direct prior experience.

We are exposed to risk of environmental liabilities with respect to properties to which we take title.

In the course of our business, we may own or foreclose and take title to real estate, and could be subject to environmental liabilities with respect to these properties. We may be held liable to a governmental entity or to third parties for property damage, personal injury, investigation and clean-up costs incurred by these parties in connection with environmental contamination, or may be required to investigate or clean up hazardous or toxic substances, or chemical releases at a property. The cost associated with investigation or remediation activities could be substantial. In addition, as the owner or former owner of a contaminated site, we may be subject to common law claims by third parties based on damages and costs resulting from environmental contamination emanating from the property.

Severe weather, natural disasters, acts of war or terrorism, and other external events could significantly impact our business and the business of our customers.

Severe weather, natural disasters, acts of war or terrorism, and other adverse external events could have a significant impact on our ability to conduct business. Such events could affect the stability of our borrowers to repay outstanding loans, impair the value of collateral securing loans, cause significant property damage, result in loss of revenue and/or cause us to incur additional expenses. In particular, such events may have a particularly negative impact upon the business of our customers who are engaged in the hospitality and natural resource dependent industries in our market area, which could have a direct negative impact on our business and results of operations.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None

ITEM 2. PROPERTIES

The Company's headquarters are located at 82 Main Street, Bar Harbor, Maine, which also serves as the main office for the Bank.

As of December 31, 2013, the Bank operated fifteen (15) full-service banking offices throughout downeast, midcoast and central Maine, namely: Bar Harbor, Northeast Harbor, Southwest Harbor, Somesville, Deer Isle, Blue Hill, Ellsworth, Rockland, Topsham, South China, Augusta, Winter Harbor, Milbridge, Machias, and Lubec. The Bank owns twelve of these banking offices and leases three at prevailing market rates.

The Bank's Ellsworth office consists of a new building constructed in 2012 and two additional parcels contiguous to this branch. The Bank also owns an office building at this location, which is occupied by the Bank and Trust Services. The City of Ellsworth is considered the hub of downeast Maine and the Bank's Ellsworth office is by far its busiest location. During the third quarter of 2012, the Bank replaced its existing Ellsworth branch office and completed a substantial reconfiguration of its surrounding campus to better meet the Company's business needs at that location.

During 2013, the Bank completed a substantial renovation and expansion of its Rockland office to better meet its business needs at that location.

An Operations Center is located in Ellsworth, Maine, that houses the Company's operations and data processing centers. During 2012 the Company completed a major renovation of its Operations Center to better meet its business needs at that location. The Bank also leases space at One Cumberland Place in Bangor, Maine, which houses regional business lending and Trust Services staff.

In the opinion of management, the physical properties of the Company and the Bank are considered adequate to meet the needs of customers in the communities served. Additional information relating to the Company's properties is provided in Item 8, Note 5 of the Consolidated Financial Statements contained in this Annual Report on Form 10-K and incorporated herein by reference.

ITEM 3. LEGAL PROCEEDINGS

The Company and its subsidiaries are parties to certain ordinary routine litigation incidental to the normal conduct of their respective businesses, which in the opinion of management based upon currently available information will have no material effect on the Company's consolidated financial statements.

ITEM 4. MINE SAFETY DISCLOSURES Not applicable

PART II**ITEM 5. MARKET FOR REGISTRANT'S COMMON STOCK, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Market Information**

The common stock of the Company is traded on the NYSE MKT, LLC (NYSE MKT), under the trading symbol BHB.

The following table sets forth the high and low market prices per share of BHB Common Stock as reported by NYSE MKT by calendar quarter for each of the last two years:

	1st Quarter		2nd Quarter		3rd Quarter		4th Quarter	
	High	Low	High	Low	High	Low	High	Low
2013	\$37.30	\$33.89	\$36.99	\$34.06	\$41.47	\$34.11	\$40.50	\$35.11
2012	\$33.25	\$29.36	\$38.00	\$32.59	\$36.98	\$33.33	\$36.50	\$31.78

As of March 3, 2014, there were 3,940,790 shares of Company common stock, par value \$2.00 per share, outstanding and approximately 893 Registered Shareholders of record, as obtained through the Company's transfer agent.

Performance Graph

The following graph illustrates the estimated yearly change in value of the Company's cumulative total stockholder return on its common stock for each of the last five years. Total stockholder return is computed by taking the difference between the ending price of the common stock at the end of the previous year and the current year, plus any dividends paid divided by the ending price of the common stock at the end of the previous year. For purposes of comparison, the graph also matches Bar Harbor Bankshares' cumulative 5-Year total shareholder return on common stock with the cumulative total returns of the NYSE MKT Composite index, the S&P 500 index, and the ABA Nasdaq Community Bank index. The graph tracks the performance of a \$100 investment in our common stock and in each index (with the reinvestment of all dividends) from December 31, 2008 to December 31, 2013.

	12/08	12/09	12/10	12/11	12/12	12/13
Bar Harbor Bankshares	100.00	110.59	121.48	130.26	151.39	186.19
NYSE MKT Composite	100.00	135.53	175.07	179.96	190.69	200.56
S&P 500	100.00	126.46	145.51	148.59	172.37	228.19
ABA Nasdaq Community Bank Index	100.00	81.72	92.81	87.87	102.89	146.37

Dividends

Common stock dividends paid by the Company in 2013 and 2012 are summarized below:

	1st	2nd	3rd	4th	
	Quarter	Quarter	Quarter	Quarter	Total
2013	\$0.305	\$0.310	\$0.315	\$0.320	\$1.250
2012	\$0.285	\$0.290	\$0.295	\$0.300	\$1.170

During 2013, the Company declared and distributed regular cash dividends on its common stock in the aggregate amount of \$4,915 compared with \$4,565 in 2012. The Company's 2013 dividend payout ratio amounted to 37.3% compared with 36.6% in 2012. The total regular cash dividends paid in 2013 amounted to \$1.25 per share of common stock, compared with \$1.17 in 2012, representing an increase of \$0.08 per share, or 6.8%.

In the first quarter of 2014, the Company's Board of Directors declared a regular cash dividend of \$0.325 per share of common stock, representing an increase of \$0.02 or 6.6% compared with the first quarter of 2013.

The Company has a history of paying quarterly dividends on its common stock. However, the Company's ability to pay such dividends depends on a number of factors, including the Company's financial condition, earnings, its need for funds and restrictions on the Company's ability to pay dividends under federal laws and regulations. Therefore, there can be no assurance that dividends on the Company's common stock will be paid in the future.

For further information, refer to Item 6, Selected Consolidated Financial Data for dividend related ratios and Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, (specifically the Capital Resources section).

Sale of Unregistered Securities; Use of Proceeds from Registered Securities

No unregistered securities were sold by the Company during the years ended December 31, 2013 and 2012.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

There were no purchases of shares of the Company's common stock made by or on behalf of the Company or any affiliated purchaser for the quarter ended December 31, 2013.

Information relating to the Company's stock repurchase program is provided in Part II, Item 7, *Stock Repurchase Plan*, contained in this Annual Report on Form 10-K and incorporated herein by reference.

Stock Based Compensation Plans

Information regarding stock-based compensation awards both outstanding and available for future grants as of December 31, 2013, represents stock-based compensation plans approved by shareholders and is presented in the table below. There are no compensation plans under which equity securities of the Company may be issued that have not been approved by shareholders. Additional information is presented in Note 12, *Stock-Based Compensation Plans*, in the Notes to the Consolidated Financial Statements included in Item 8, *Financial Statements and Supplementary Data*, within this Annual Report on Form 10-K.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights, net of forfeits and exercised shares	Weighted average exercise price of outstanding options, warrants and rights	Number of securities remaining available for issuance under equity compensation (excluding securities referenced in column (a))

Transfer Agent Services

American Stock Transfer & Trust Company provides transfer agent services for the Company. Inquiries may be directed to: American Stock Transfer & Trust Company, 6201 15th Avenue, 3rd Floor, Brooklyn, NY, 11219, telephone: 1-800-937-5449, Internet address: www.amstock.com.

ITEM 6. SELECTED CONSOLIDATED FINANCIAL DATA

The supplementary financial data presented in the following table contains information highlighting certain significant trends in the Company's financial condition and results of operations over an extended period of time.

The following information should be analyzed in conjunction with Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations, and with the audited consolidated financial statements included in this Annual Report on Form 10-K. Unless otherwise noted, all dollars are expressed in thousands except share and per share data.

FIVE-YEAR SUMMARY OF FINANCIAL DATA

As of and For the Years Ended December 31,

	2013	2012	2011	2010	2009
Balance Sheet Data					
Total assets	\$ 1,373,893	\$1,302,935	\$1,167,466	\$1,117,933	\$1,072,381

Non-performing loans to total loans	1.04%	1.21%	1.77%	1.95%	1.37%

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management's discussion and analysis, which follows, focuses on the factors affecting the Company's consolidated results of operations for the years ended December 31, 2013, 2012, and 2011, and financial condition at December 31, 2013, and 2012, and where appropriate, factors that may affect future financial performance. The following discussion and analysis of financial condition and results of operations of the Company and its subsidiaries should be read in conjunction with the consolidated financial statements and notes thereto, and selected financial and statistical information appearing elsewhere in this Annual Report on Form 10-K.

Amounts in the prior period financial statements are reclassified whenever necessary to conform to current period presentation.

Unless otherwise noted, all dollars are expressed in thousands except share data.

Use of Non-GAAP Financial Measures: Certain information discussed below is presented on a fully tax-equivalent basis. Specifically, included in 2013, 2012 and 2011 interest income was \$3,589, \$3,336 and \$3,051, respectively, of tax-exempt interest income from certain investment securities and loans. An amount equal to the tax benefit derived from this tax exempt income has been added back to the interest income totals discussed in certain sections of this Management's Discussion and Analysis, representing tax-equivalent adjustments of \$1,762, \$1,628 and \$1,471 in 2013, 2012 and 2011, respectively, which increased net interest income accordingly. The analysis of net interest income tables included in this Annual Report on Form 10-K provide a reconciliation of tax-equivalent financial information to the Company's consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles.

Management believes the disclosure of tax-equivalent net interest income information improves the clarity of financial analysis, and is particularly useful to investors in understanding and evaluating the changes and trends in the Company's results of operations. Other financial institutions commonly present net interest income on a tax-equivalent basis. This adjustment is considered helpful in the comparison of one financial institution's net interest income to that of another institution, as each will have a different proportion of tax-exempt interest from their earning asset portfolios. Moreover, net interest income is a component of a second financial measure commonly used by financial institutions, net interest margin, which is the ratio of net interest income to average earning assets. For purposes of this measure as well, other financial institutions generally use tax-equivalent net interest income to provide a better basis of comparison from institution to institution. The Company follows these practices.

EXECUTIVE OVERVIEW

General Information

Bar Harbor Bankshares is a Maine corporation and a registered bank holding company under the Bank Holding Company Act of 1956, as amended. At December 31, 2013, the Company had consolidated assets of \$1.37 billion and was one of the larger independent community banking institutions in the state of Maine.

The Company's principal asset is all of the capital stock of Bar Harbor Bank & Trust (the Bank), a community bank incorporated in March 1887. With fifteen (15) branch office locations, the Company is a diversified financial services provider, offering a full range of banking services and products to individuals, businesses, governments, and not-for-profit organizations throughout downeast, midcoast and central Maine.

The Bank attracts deposits from the general public in the markets it serves and uses such deposits and other sources of funds to originate commercial business loans, commercial real estate loans, residential mortgage and home equity loans, and a variety of consumer loans. The Bank also invests in mortgage-backed securities issued by U.S. Government agencies and Government-sponsored enterprises, obligations of state and political subdivisions, as well as other debt securities. In addition to community banking, the Bank provides a comprehensive array of trust and investment management services through its second tier subsidiary, Bar Harbor Trust Services (Trust Services), a Maine chartered non-depository trust company. The Bank retains Infinex Investments, Inc., (Infinex) as a full service third-party broker-dealer, conducting business under the assumed business name Bar Harbor Financial Services. Bar Harbor Financial Services is a branch office of Infinex, an independent registered broker-dealer offering securities and insurance products that is not affiliated with the Bank or its subsidiaries.

Major Sources of Revenue

The principal source of the Company's revenue is net interest income, representing the difference or spread between interest income from its loan and securities portfolios, and the interest expense paid on deposits and borrowed funds. In addition to net interest income, non-interest income is a significant source of revenue for the Company and an important factor in its results of operations. The Company's non-interest income is derived from financial services including trust, investment management and third-party brokerage services, as well as service charges on deposit accounts, merchant credit card processing referral and transaction fees, realized gains or losses on the sale of securities, and a variety of other miscellaneous product and service fees.

Business Strategy

The Company, as a diversified financial services provider, pursues a strategy of achieving long-term sustainable profitability, growth, and shareholder value, without sacrificing its soundness. The Company works toward achieving this goal by focusing on increasing its loan and deposit market share in downeast, midcoast and central Maine, either organically or by way of strategic acquisitions. The Company believes one of its more unique strengths is an understanding of the financial needs of coastal communities and the businesses vital to Maine's coastal economy,

namely: tourism, hospitality, retail establishments and restaurants, seasonal lodging and campgrounds, biological research laboratories, lobster and other fishing, boat building, and marine services.

Operating under a community banking philosophy, the Company's key strategic focus is vigorous financial stewardship, by deploying investor capital safely yet efficiently for the best possible returns. The Company strives to provide unmatched service to its customers, while maintaining strong asset quality and a focus toward improving operating efficiencies. In managing its earning asset portfolios, the Company seeks to utilize funding and capital resources within well-defined credit, investment, interest-rate and liquidity guidelines. In managing its balance sheet, the Company seeks to preserve the sensitivity of net interest income to changes in interest rates, and to enhance profitability through strategies that promise sufficient reward for understood and controlled risk. The Company is deliberate in its efforts to maintain adequate liquidity under prevailing and expected conditions, and strives to maintain a balanced and appropriate mix of loans, securities, core deposits, brokered deposits and borrowed funds.

Material Risks and Challenges

In its normal course of business, the Company faces many risks inherent with providing banking and financial services. Among the more significant risks managed by the Company are losses arising from loans not being repaid, commonly referred to as credit risk, and losses of income arising from movements in interest rates, commonly referred to as interest rate and market risk. The Company is also exposed to national and local economic conditions, downturns in the economy, or adverse changes in real estate markets, which could negatively impact its business, financial condition, results of operations or liquidity.

Management has numerous policies and control processes in place that provide for the monitoring and mitigation of risks based upon and driven by a variety of assumptions and actions which, if changed or altered, could impact the Company's business, financial condition, results of operations or liquidity. The foregoing matters are more fully discussed in Part I, Item 1A, Risk Factors, and throughout this Annual Report on Form 10-K.

Summary Financial Results

For the year ended December 31, 2013, the Company reported net income of \$13,183, compared with \$12,466 for the year ended December 31, 2012, representing an increase of \$717, or 5.8%. The Company's 2013 diluted earnings per share amounted to \$3.34, compared with \$3.18 in 2012, representing an increase of \$0.16, or 5.0%.

The Company's 2013 return on average shareholders' equity amounted to 10.52%, up from 9.93% in 2012. The Company's 2013 return on average assets amounted to 0.98%, compared with 1.00% in 2012.

As more fully enumerated in the following management discussion and analysis, the Company's 2013 operating results were highlighted by a \$2,249 or 5.8% increase in tax-equivalent net interest income, relatively stable credit quality and improved loan loss experience, continued commercial and consumer loan growth, and higher levels of fee income. The Company continued to focus on the management of its operating expenses, posting a 2013 efficiency ratio of 55.8%.

In the third quarter of 2012, the Bank acquired substantially all assets and assumed certain liabilities including all deposits of Border Trust Company (Border Trust), a subsidiary of Border Bancshares, Inc., headquartered in Augusta, Maine. The Bank acquired \$38,520 of deposits and \$33,606 in loans, as well as three branch offices (two of which were leased) located in Kennebec and Sagadahoc Counties. The Bank paid a deposit premium of 3.85%, or \$1,115, and purchased the loan portfolio, excluding selected non-performing loans, at a discount of 2.16%, or \$749. In connection with this transaction, the Bank recorded goodwill of \$1,777 and a core deposit intangible of \$783, or 2.7% of core deposits.

APPLICATION OF CRITICAL ACCOUNTING POLICIES

Management's discussion and analysis of the Company's financial condition and results of operations are based on the Consolidated Financial Statements, which are prepared in accordance with U.S. generally accepted accounting principles. The preparation of such financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. Management evaluates its estimates, including those related to the allowance for loan losses, on an ongoing basis. Management bases its estimates on historical experience and various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis in making judgments about the carrying values of assets that are not readily apparent from other sources. Actual results could differ from the amount derived from management's estimates and assumptions under different assumptions or conditions.

The Company's significant accounting policies are more fully enumerated in Note 1 to the Consolidated Financial Statements included in Item 8 of this Annual Report on Form 10-K. The reader of the financial statements should review these policies to gain a greater understanding of how the Company's financial performance is reported. Management believes the following critical accounting policies represent the more significant estimates and

assumptions used in the preparation of the Consolidated Financial Statements:

Allowance for Loan Losses: The allowance for loan losses (allowance) is a significant accounting estimate used in the preparation of the Company's consolidated financial statements. The allowance, which is established through a provision for loan loss expense, is based on management's evaluation of the level of allowance required in relation to the estimated inherent risk of probable loss in the loan portfolio. Management regularly evaluates the allowance for adequacy by taking into consideration factors such as previous loss experience, the size and composition of the portfolio, current economic and real estate market conditions and the performance of individual loans in relation to contract terms and estimated fair values of collateral. The use of different estimates or assumptions could produce different provisions for loan losses. A smaller provision for loan losses results in higher net income, and when a greater amount of provision for loan losses is necessary, the result is lower net income. Refer to Part II, Item 7, *Allowance for Loan Losses and Provision*, and Part II, Item 8, Note 4, *Loans and allowance for loan losses*, of the Consolidated Financial Statements, in this Annual Report on Form 10-K, for further discussion and analysis concerning the allowance.

Other-Than-Temporary Impairments on Securities: One of the significant estimates related to investment securities is the evaluation of other-than-temporary impairments. The evaluation of securities for other-than-temporary impairments is a quantitative and qualitative process, which is subject to risks and uncertainties and is intended to determine whether declines in the fair value of investments should be recognized in current period earnings. The risks and uncertainties include changes in general economic conditions, the issuer's financial condition and/or future prospects, the effects of changes in interest rates or credit spreads and the expected recovery period of unrealized losses.

Securities that are in an unrealized loss position, are reviewed at least quarterly to determine if an other-than-temporary impairment is present based on certain quantitative and qualitative factors and measures. The primary factors considered in evaluating whether a decline in value of securities is other-than-temporary include: (a) the cause of the impairment; (b) the financial condition, credit rating and future prospects of the issuer; (c) whether the debtor is current on contractually-obligated interest and principal payments; (d) the volatility of the securities fair value; (e) performance indicators of the underlying assets in the security including default rates, delinquency rates, percentage of non-performing assets, loan to collateral value ratios, third party guarantees, current levels of subordination, vintage, and geographic concentration and; (f) any other information and observable data considered relevant in determining whether other-than-temporary impairment has occurred, including the expectation of the receipt of all principal and interest due.

For securitized financial assets with contractual cash flows, such as private-label mortgage-backed securities, the Company periodically updates its best estimate of cash flows over the life of the security. The Company's best estimate of cash flows is based upon assumptions consistent with an economic recession, similar to those the Company believes market participants would use. If the fair value of a securitized financial asset is less than its cost or amortized cost and there has been an adverse change in timing or amount of anticipated future cash flows since the last revised estimate to the extent that the Company does not expect to receive the entire amount of future contractual principal and interest, an other-than-temporary impairment charge is recognized in earnings representing the estimated credit loss if management does not intend to sell the security and believes it is more-likely-than-not the Company will not be required to sell the security prior to recovery of cost or amortized cost. Estimating future cash flows is a

quantitative and qualitative process that incorporates information received from third party sources along with certain assumptions and judgments regarding the future performance of the underlying collateral. In addition, projections of expected future cash flows may change based upon new information regarding the performance of the underlying collateral.

Refer to Part II, Item 7, *Impaired Securities*, and Part II, Item 8, Note 1 of the Consolidated Financial Statements in this Annual Report on Form 10-K, for further discussion and analysis concerning other-than-temporary impairments.

Income Taxes: The Company estimates its income taxes for each period for which a statement of income is presented. This involves estimating the Company's actual current tax liability, as well as assessing temporary differences resulting from differing timing of recognition of expenses, income and tax credits, for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included in the Company's consolidated balance sheets. The Company must also assess the likelihood that any deferred tax assets will be recovered from historical taxes paid and future taxable income and, to the extent that the recovery is not likely, a valuation allowance must be established. Significant management judgment is required in determining income tax expense, and deferred tax assets and liabilities. As of December 31, 2013 and 2012, there was no valuation allowance for deferred tax assets, which are included in other assets on the consolidated balance sheet.

Goodwill and Identifiable Intangible Assets: In connection with acquisitions, the Company generally records as assets on its consolidated financial statements both goodwill and identifiable intangible assets, such as core deposit intangibles.

The Company evaluates whether the carrying value of its goodwill has become impaired, in which case the value is reduced through a charge to its earnings. Goodwill is evaluated for impairment at least annually, or upon a triggering event using certain fair value techniques. Goodwill impairment testing is performed at the segment (or reporting unit) level. Goodwill is assigned to reporting units at the date the goodwill is initially recorded. Once goodwill has been assigned to the reporting units, it no longer retains its association with a particular acquisition, and all of the activities within a reporting unit, whether acquired or organically grown, are available to support the value of the goodwill.

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in accordance with the purchase method of accounting for business combinations. Goodwill is not amortized but, instead, is subject to impairment tests on at least an annual basis or more frequently if an event occurs or circumstances change that reduce the fair value of a reporting unit below its carrying amount. The Company completes its annual goodwill impairment test as of December 31 of each year. The impairment testing process is conducted by assigning assets and goodwill to each reporting unit. Currently, the Company's goodwill is evaluated at the entity level as there is only one reporting unit. The Company first assesses certain qualitative factors to determine if it is more likely than not that the fair value of the reporting unit is less than its carrying value. If it is more likely than not that the fair value of the reporting unit is less than the carrying value, then the fair value of each reporting unit is compared to the recorded book value (step one). If the fair value of the reporting unit exceeds its carrying value, goodwill is not considered impaired and step two is not considered necessary. If the carrying value of a reporting unit exceeds its fair value, the impairment test continues (step two) by comparing the carrying value of the reporting unit's goodwill to the implied fair value of

goodwill. The implied fair value is computed by adjusting all assets and liabilities of the reporting unit to current fair value with the offset adjustment to goodwill. The adjusted goodwill balance is the implied fair value of the goodwill. An impairment charge is recognized if the carrying fair value of goodwill exceeds the implied fair value of goodwill. At December 31, 2013, there was no indication of impairment that led the Company to believe it needed to perform a two-step test.

Identifiable intangible assets, included in other assets on the consolidated balance sheet, consist of core deposit intangibles amortized over their estimated useful lives on a straight-line method, which approximates the economic benefits to the Company. These assets are reviewed for impairment at least annually, or whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. The determination of which intangible assets have finite lives is subjective, as is the determination of the amortization period for such intangible assets.

Any changes in the estimates used by the Company to determine the carrying value of its goodwill and identifiable intangible assets, or which otherwise adversely affect their value or estimated lives, would adversely affect the Company's consolidated results of operations.

Refer to Notes 1 and 6 of the consolidated financial statements in Item 8 of this Annual Report on Form 10-K for further details of the Company's accounting policies and estimates covering goodwill.

FINANCIAL CONDITION

Asset/Liability Management

In managing its asset portfolios, the Bank utilizes funding and capital resources within well-defined credit, investment, interest rate, and liquidity risk guidelines. Loans and investment securities are the Bank's primary earning assets with additional capacity invested in money market instruments. Average earning assets represented 96.3% and 95.6% of total average assets during 2013 and 2012, respectively.

The Company, through its management of liabilities, attempts to provide stable and flexible sources of funding within established liquidity and interest rate risk guidelines. This is accomplished through retail deposit products offered within the markets served, as well as through the prudent use of borrowed and brokered funds.

The Company's objectives in managing its balance sheet are to preserve the sensitivity of net interest income to actual or potential changes in interest rates, and to enhance profitability through strategies that promise sufficient reward for

understood and controlled risk. The Company is deliberate in its efforts to maintain adequate liquidity, under prevailing and forecasted economic conditions, and to maintain an efficient and appropriate mix of core deposits, brokered deposits, and borrowed funds.

Earning Assets

For the year ended December 31, 2013, the Company's total average earning assets amounted to \$1,296,121, compared with \$1,196,800 in 2012, representing an increase of \$99,321, or 8.3%. The 2013 increase in average earning assets was principally attributed to a \$59,210 or 7.6% increase in the Bank's average loan portfolio and, to a lesser extent, a \$39,292 or 9.8% increase in average securities.

The tax-equivalent yield on total average earning assets amounted to 4.05% in 2013 compared with 4.38% in 2012, representing a decline of 33 basis points. The weighted average yield on the Bank's securities portfolio declined 49 basis points to 3.41% in 2013, largely reflecting the ongoing replacement of accelerated mortgage-backed securities cash flows in a historically low interest rate environment combined with incremental securities purchases at low prevailing market yields. The weighted average yield on the Bank's loan portfolio declined 26 basis points to 4.46% in 2013, largely reflecting the ongoing origination and competitive re-pricing of certain commercial loans and the origination and refinancing of residential mortgage loans during a period of historically low interest rates.

For the year ended December 31, 2013, total tax-equivalent interest income amounted to \$52,511 compared with \$52,466 in 2012, representing an increase of \$45, or 0.1%. Interest income from the securities portfolio declined \$596 or 3.8% in 2013 compared with 2012, but this decline was essentially offset by a \$658 or 1.8% increase in interest income from the loan portfolio above 2012 levels.

Total Assets

The Company's assets principally consist of loans and securities, which at December 31, 2013 represented 62.1% and 32.8% of total assets, compared with 62.6% and 32.1% at December 31, 2012, respectively.

At December 31, 2013, the Company's total assets stood at \$1,373,893, compared with \$1,302,935 at December 31, 2012, representing an increase of \$70,958, or 5.4%. The increase in total assets was principally attributed to a \$37,853 or 4.6% increase in total loans, followed by a \$32,130 or 7.7% increase in securities.

Securities

The average securities portfolio represented 33.9% of the Company's average earning assets in 2013 and generated 28.5% of its total tax-equivalent interest and dividend income, compared with 33.4% and 29.7% in 2012, respectively.

Bank management considers securities as a relatively attractive means to effectively leverage the Bank's strong capital position, as securities are typically assigned a significantly lower risk weighting for the purpose of calculating the Bank's and the Company's risk-based capital ratios. The overall objectives of the Bank's strategy for the securities portfolio include maintaining appropriate liquidity reserves, diversifying earning assets, managing interest rate risk, leveraging the Bank's strong capital position, and generating acceptable levels of net interest income. The securities portfolio is managed under the policy guidelines established by the Bank's Board of Directors.

The securities portfolio is comprised of mortgage-backed securities (MBS) issued by U.S. government agencies, U.S. Government-sponsored enterprises, and other non-agency, private-label issuers. The securities portfolio also includes tax-exempt obligations of state and political subdivisions thereof.

Total Securities: At December 31, 2013, total securities amounted to \$450,170 compared with \$418,040 at December 31, 2012, representing an increase of \$32,130, or 7.7%. Securities purchased during 2013 consisted of mortgage-backed securities issued and guaranteed by U.S. Government agencies and sponsored enterprises and, to a lesser extent, tax exempt obligations of state and political subdivisions.

Securities Available for Sale: Securities available for sale represented 100% of total securities at December 31, 2013 and 2012.

The designation of securities available for sale is made at the time of purchase, based upon management's intent to hold the securities for an indefinite time; however, these securities would be available for sale in response to changes in market interest rates, related changes in the securities' prepayment risk, needs for liquidity, or changes in the availability of and yield on alternative investments. The securities available for sale portfolio is used for liquidity purposes while simultaneously producing earnings.

Securities classified as available for sale are reported at their fair value with unrealized gains or losses, net of taxes, excluded from earnings but shown separately as a component of shareholders' equity. Gains and losses on the sale of securities available for sale are determined using the specific-identification method and are shown separately in the consolidated statements of income.

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

The following table summarizes the securities available for sale portfolio as of December 31, 2013 and 2012:

December 31, 2013	Gross		Gross	
	Amortized	Unrealized	Unrealized	Estimated
Available for Sale:	Cost	Gains	Losses	Fair Value
Mortgage-backed securities:				
US Government-sponsored enterprises	\$277,838	\$ 4,386	\$ 8,592	\$273,632
US Government agency	83,153	833	2,457	81,529
Private label	5,423	825	78	6,170
Obligations of states and				
political subdivisions thereof	95,221	1,121	7,503	88,839
Total	\$461,635	\$ 7,165	\$18,630	\$450,170
December 31, 2012	Gross		Gross	
	Amortized	Unrealized	Unrealized	Estimated
Available for Sale:	Cost	Gains	Losses	Fair Value
Mortgage-backed securities:				
US Government-sponsored enterprises	\$238,974	\$ 7,913	\$ 1,064	\$245,823
US Government agency	82,397	2,080	216	84,261
Private label	8,063	571	521	8,113
Obligations of states and				
political subdivisions thereof	76,335	4,040	532	79,843
Total	\$405,769	\$14,604	\$ 2,333	\$418,040

Mortgage-backed Securities Issued by U.S. Government-sponsored Enterprises: This category of securities represents mortgage backed securities issued and guaranteed by U.S. Government-sponsored enterprises, specifically, FNMA and FHLMC. These Government-sponsored enterprises were placed under the conservatorship of the U.S. Government on September 7, 2008. In August of 2011, Standard and Poor's, a major credit rating agency, downgraded all debt issued and guaranteed by the United States from AAA to AA+. Accordingly, all of these securities were credit rated AA+ at December 31, 2013.

At December 31, 2013, the amortized cost of mortgage-backed securities issued by U.S. Government-sponsored enterprises totaled \$277,838, compared with \$238,974 at December 31, 2012, representing an increase of \$38,864, or 16.3%. At December 31, 2013, the amortized cost of mortgage-backed securities issued by U.S. Government enterprises comprised 60.2% of the securities portfolio, compared with 58.9% at December 31, 2012.

At December 31, 2013, the Bank's weighted average yield on mortgage-backed securities issued by U.S. Government-sponsored enterprises amounted to 3.34% compared with 3.29% at December 31, 2012. The increase in the weighted average yield was largely attributed to the increase in interest rates during the second half of 2013, causing a slowdown in MBS cash flows, lower levels of bond premium amortization and higher yields.

Mortgage-backed Securities Issued by U.S. Government Agencies: This category of securities represents mortgage-backed securities backed by the full faith and credit of the U.S. Government, such as the Government National Mortgage Association (GNMA). All of these securities were credit rated AA+ at December 31, 2013 and 2012.

At December 31, 2013, the total amortized cost of the Bank's mortgage-backed securities issued by U.S. Government agencies totaled \$83,153, compared with \$82,397 at December 31, 2012, representing an increase of \$756, or 0.9%. At December 31, 2013, the amortized cost of mortgage-backed securities issued by U.S. Government agencies comprised 18.0% of the Bank's securities portfolio, compared with 20.3% at December 31, 2012.

At December 31, 2013, the weighted average yield on mortgage-backed securities issued by U.S. Government agencies amounted to 2.97%, compared with 2.77% at December 31, 2012. The increase in the weighted average yield was largely attributed to the increase in interest rates during the second half of 2013, causing a slowdown in MBS cash flows, lower levels of bond premium amortization and higher yields.

Mortgage-backed Securities Issued by Private-label Issuers: This category of securities represents mortgage-backed securities issued by banks, investment banks, and thrift institutions. Typically, these securities are largely based on mortgages which exceed the conforming loan sizes required by agency securities. While private-label mortgage-backed securities are not guaranteed by any U.S. Government agency, they are credit rated by the major rating agencies (Moody's, Standard & Poor's and FITCH).

Most of the Bank's mortgage-backed securities issued by private-label issuers carry various amounts of credit enhancement, and none are classified as sub-prime mortgage-backed security pools. All of these securities were purchased prior to 2008 based on the underlying loan characteristics such as loan to value ratios, borrower credit scores, property type and location, and the level of credit enhancement.

At December 31, 2013, the total amortized cost of the Bank's private-label MBS amounted to \$5,423, compared with \$8,063 at December 31, 2012, representing a decline of \$2,640, or 32.7%. This decline was principally attributed to principal pay downs on the underlying securities collateral throughout 2013. At December 31, 2013, the amortized cost of mortgage-backed securities issued by private-label issuers comprised 1.2% of the Bank's securities portfolio, compared with 2.0% at December 31, 2012.

At December 31, 2013, the weighted average yield on the Bank's private-label mortgage-backed securities portfolio amounted to 12.31%, compared with 13.66% at December 31, 2012. The unusually high yields were largely attributed to interest received on certain other-than-temporarily impaired securities where the book value was significantly lower than the contractual par value.

At December 31, 2013, \$3,820 of the total amortized cost of the Bank's private-label MBS portfolio was rated below investment grade by at least one of the major credit rating agencies, compared with \$4,425 at December 31, 2012. All of these below investment grade securities had been rated AAA by the credit rating agencies at the date of purchase and continued to be rated AAA through December 31, 2007. Beginning in 2008 and continuing through 2013, unprecedented market stresses began affecting all mortgage-backed securities (Government agency and private-label) as the economy, in general, and the housing market, in particular, seriously deteriorated. As a result, the Bank revised its assessments as to the full recoverability of its private-label MBS, which necessitated OTTI write-downs under existing accounting standards each year since 2008. Refer to Part II, item 8, Notes to Consolidated Financial Statements, Notes 1 and 3 in this Annual Report on Form 10-K for further information on OTTI.

Obligations of States and Political Subdivisions Thereof: Obligations of states and political subdivisions thereof (municipal bonds) are issued by city, county and state governments, as well as by enterprises with a public purpose, such as certain electric utilities, universities and hospitals. One of the primary attractions of municipal bonds is that Bank Qualified issues are federally tax exempt. The Bank's municipal securities primarily consist of general obligation bonds and, to a lesser extent, revenue bonds. General obligation bonds carry less risk, as they are supported by the full faith, credit and taxing authority of the issuing government and in the cases of school districts, are supported with state aid. Revenue bonds are generally backed by municipal revenue streams generated through user fees or lease payments associated with specific municipal projects that have been financed. The Bank's municipal bond portfolio is generally concentrated in school districts across the U.S.A., which have historically been considered among the safer municipal bond investments.

Municipal bonds are frequently supported with insurance, which guarantees that in the event the issuer experiences financial problems, the insurer will step in and assume payment of both principal and interest. Historically, insurance support has strengthened an issuer's underlying credit rating to AAA or AA status. Starting in 2008, many of the insurance companies providing municipal bond insurance experienced financial difficulties and, accordingly, were downgraded by at least one of the major credit rating agencies. Consequently, since 2008 a portion of the Bank's municipal bond portfolio was downgraded by at least one of the major credit rating agencies. Notwithstanding the credit rating downgrades, at December 31, 2013 and 2012, the Bank's municipal bond portfolio did not contain any below investment grade securities as reported by major credit rating agencies. In addition, at December 31, 2013 and 2012 all municipal bond issuers were current on contractually obligated interest and principal payments.

At December 31, 2013, the amortized cost of the Bank's municipal bond portfolio, totaled \$95,221, compared with \$76,335 at December 31, 2012, representing an increase of \$18,886, or 24.7%. At December 31, 2013, the amortized cost of municipal bonds comprised 20.6% of the Bank's securities portfolio, compared with 18.8% at December 31, 2012. At December 31, 2013, the fully tax-equivalent yield on the Bank's municipal bond portfolio amounted to 5.65%, compared with 6.31% at December 31, 2012.

Securities Maturity Distribution and Weighted Average Yields: The following table summarizes the maturity distribution of the amortized cost of the Bank's securities portfolio and weighted average yields of such securities on a fully tax-equivalent basis as of December 31, 2013. The maturity distribution is based upon the final maturity date of the securities. Expected maturities may differ from contractual maturities because issuers may have the right to call or pre-pay certain securities. In the case of mortgage-backed securities, actual maturities may also differ from expected maturities due to the amortizing nature of the underlying mortgage collateral, and the fact that borrowers have the right to prepay.

Total	\$---	\$4,450	\$20,625	\$425,095	\$450,170
-------	-------	---------	----------	-----------	-----------

Securities Concentrations: At December 31, 2013 and 2012, the Bank did not hold any securities for a single issuer, other than U. S. Government agencies and sponsored enterprises, where the aggregate book value of the securities exceeded 2% of the Company's shareholders' equity.

Impaired Securities: The securities portfolio contains certain securities where amortized cost exceeds fair value, which at December 31, 2013, amounted to an excess of \$18,630, or 4.0% of the total amortized cost of the securities portfolio. At December 31, 2012 this amount represented an excess of \$2,333, or 0.6% of the total amortized cost of the securities portfolio. As of December 31, 2013, unrealized losses on securities in a continuous unrealized loss position more than twelve months amounted to \$6,185, compared with \$744 at December 31, 2012. The increase in net unrealized losses was attributed to a significant increase in interest rates and pricing spreads during 2013, which negatively impacted the fair value of the Bank's fixed income portfolio.

As part of the Company's ongoing security monitoring process, the Company identifies securities in an unrealized loss position that could potentially be other-than-temporarily impaired. If a decline in the fair value of an available for sale security is judged to be other-than-temporary, a charge is recorded in pre-tax income equal to the estimated credit losses inherent in the security. Further information regarding impaired securities, other-than-temporarily impaired securities and evaluation of securities for impairment is incorporated by reference to Part II, Item 8, Notes 1 and 3 of the Consolidated Financial Statements in this Annual Report on Form 10-K.

Federal Home Loan Bank Stock

The Bank is a member of the Federal Home Loan Bank of Boston (the FHLB). The FHLB is a cooperatively owned wholesale bank for housing and finance in the six New England states. Its mission is to support the residential mortgage and community-development lending activities of its members, which include over 450 financial institutions across New England. As a requirement of membership in the FHLB, the Bank must own a minimum required amount of FHLB stock, calculated periodically based primarily on its level of borrowings from the FHLB. The Bank uses the FHLB for most of its wholesale funding needs.

At December 31, 2013, the Bank's investment in FHLB stock totaled \$18,370, compared with \$18,189 at December 31, 2012, representing an increase of \$181, or 1.0%.

FHLB stock is a non-marketable equity security and therefore is reported at cost, which generally equals par value. The ratio of the FHLB's market value of equity to its par value of capital stock was 119% at December 31, 2013, compared with 108% at December 31, 2012. Shares held in excess of the minimum required amount are generally redeemable at par value.

The Company periodically evaluates its investment in FHLB stock for impairment based on, among other things, the capital adequacy of the FHLB and its overall financial condition. The FHLB recently reported that it remained in compliance with all regulatory capital ratios as of December 31, 2013, and was classified as adequately capitalized by its regulator, the Federal Housing Finance Agency, based on the FHLB's financial information at September 30, 2013. Based on the capital adequacy, liquidity position and sustained profitability of the FHLB, management believes there is no impairment related to the carrying amount of the Bank's FHLB stock as of December 31, 2013. The Bank will continue to monitor its investment in FHLB stock.

Loans

Total Loans: At December 31, 2013, total loans amounted to \$852,857, compared with \$815,004 at December 31, 2012, representing an increase of \$37,853, or 4.6%.

The loan portfolio is primarily secured by real estate in the counties of Hancock, Washington, Knox, Kennebec and Sagadahoc Maine. The following table summarizes the major components of the Bank's loan portfolio, net of deferred loan fees and costs, as of December 31 over the past five years.

SUMMARY OF LOAN PORTFOLIO AT DECEMBER 31

	2013	2012	2011	2010	2009
Commercial real estate mortgages	\$336,542	\$324,493	\$285,484	\$283,799	\$260,713
Commercial and industrial	73,972	59,373	62,450	57,323	59,446

Commercial construction

and land development	18,129	22,120	30,060	32,114	26,901
Agricultural and other loans to farmers	26,929	24,922	26,580	24,359	22,192
Total commercial loans	455,572	430,908	404,574	397,595	369,252
Residential real estate mortgages	317,115	297,103	239,799	231,434	225,750
Home equity loans	49,565	53,303	51,462	54,289	54,889
Other consumer loans	14,523	19,001	22,906	4,417	4,665
Total consumer loans	381,203	369,407	314,167	290,140	285,304
Tax exempt loans	16,355	15,244	9,700	12,126	14,138
Net deferred loan costs and fees	(273)	(555)	562	809	798
Total loans	852,857	815,004	729,003	700,670	669,492
Allowance for loan losses	(8,475)	(8,097)	(8,221)	(8,500)	(7,814)
Total loans net of allowance					
for loan losses	\$844,382	\$806,907	\$720,782	\$692,170	\$661,678

At December 31, 2013, commercial loans comprised 53.4% of the total loan portfolio, compared with 52.9% at December 31, 2012. Consumer loans, which principally consisted of residential real estate mortgage loans, comprised 44.7% of total loans compared with 45.3% at December 31, 2012.

Factors contributing to the changes in the loan portfolio are enumerated in the following discussion and analysis.

Commercial Loans: The Bank offers a variety of commercial lending products including term loans and lines of credit. The Bank offers a broad range of short to medium term commercial loans, primarily collateralized, to businesses for working capital (including inventory and receivables), business expansion (including acquisitions of real estate and improvements) and the purchase of equipment and machinery. The purpose of a particular loan generally determines its structure. Commercial loans are provided primarily to organizations and sole proprietors in the tourism, hospitality, healthcare, blueberry, boatbuilding, biological research, and fishing industries, as well as to other small and mid-size businesses associated with the coastal communities of Maine.

Commercial loans are approved using a combination of individual loan authorities, and a Directors Loan Committee. For loan relationships below \$500, loans are approved using individual loan authorities. For loan relationships over \$500 but less than \$1,000, loans are approved by two Senior Signers. The Bank has four Senior Signers – the President and CEO, the EVP of Business Banking, the EVP of Retail Banking and the EVP and Chief Risk Officer. Loans to customer relationships over \$1,000 require (with some limited exceptions as permitted in the Bank’s lending policy) approval by the Bank’s Directors Loan Committee, a formal Committee of the Bank’s Board of Directors. Any loans approved under any of the limited exceptions permitted by the Bank’s lending policy are ratified by the Directors Loan Committee, which meets regularly.

At December 31, 2013, total commercial loans amounted to \$455,572, compared with \$430,908 at December 31, 2012, representing an increase of \$24,664, or 5.7%.

Commercial loan growth has generally been challenged by a still-recovering economy, continued economic uncertainty, diminished demand, and strong competition for quality loans. Bank management attributes the continued growth of commercial loans in 2013 to an effective business banking team, deep local market knowledge, sustained new business development efforts, and a resilient local economy that has been faring better than the nation as a whole.

Reflecting the Bank's business region, at December 31, 2013, approximately \$109,875 or 32.6% of the commercial real estate mortgage portfolio was represented by loans to the lodging industry, compared with 31.4% at December 31, 2012. The Bank underwrites lodging industry loans as operating businesses, lending primarily to seasonal establishments with stabilized cash flows.

The proportion of commercial and industrial loans to total commercial loans is reflective of the Bank's market area demographics, which have historically limited the opportunity and growth potential in this particular category of loans. Similarly, the communities served by the Bank generally offer limited opportunities for agricultural and other loans to farmers. This category of loans principally includes loans related to Maine's wild blueberry industry.

Consumer Loans: At December 31, 2013, total consumer loans stood at \$381,203 compared with \$369,407 at December 31, 2012, representing an increase of \$11,796, or 3.2%. At December 31, 2013, residential real estate mortgage loans represented 83.2% of total consumer loans, compared with 80.4% at year end 2012.

Residential real estate mortgage loans totaled at \$317,115 as of December 31, 2013, compared with \$297,103 at December 31, 2012, representing an increase of \$20,012, or 6.7%. This increase was largely attributed to the purchase of a New England based portfolio of residential mortgage loans during the second quarter of 2013. Loans originated and closed by the Bank during 2013 were largely offset by loan re-financings and principal pay downs from the existing residential real estate loan portfolio, as borrowers continued to take advantage of historically low interest rates. All 2013 residential real estate loan originations were held in the Bank's loan portfolio, versus sold into the secondary market.

Home equity loans totaled \$49,565 at December 31, 2013, compared with \$53,303 at December 31, 2012, representing a decline of \$3,738, or 7.0%. Company management believes this decline was largely due to consumer debt consolidation and the fact that the Bank did not aggressively campaign for home equity loans during 2013.

Loans to individuals for household, family and other personal expenditures (other consumer loans) totaled \$14,523 at December 31, 2013, compared with \$19,001 at December 31, 2012, representing a decline of \$4,478, or 23.6%. Given strong competition from the financing affiliates of consumer durable goods manufacturers, among other considerations, the Bank does not campaign aggressively for consumer installment loans. However, in 2011 the Bank purchased a Maine-based, seasoned portfolio of prime consumer loans. The underlying collateral supporting these consumer loans consisted of recreational vehicles and vessels (i.e. pleasure boats). The 2013 decline in other consumer loans principally resulted from normal principal pay downs that were not replaced with new consumer installment loan originations.

Tax Exempt Loans: Tax-exempt loans totaled \$16,355 at December 31, 2013, compared with \$15,244 at December 31, 2012, representing an increase of \$1,111, or 7.3%. Tax-exempt loans include loans to local government municipalities, not-for-profit organizations, and other organizations that qualify for tax-exempt treatment. Government municipality loans typically have short maturities (e.g., tax anticipation notes, etc.). Government municipality loans are normally originated through a bid process among local financial institutions and are typically priced aggressively, thus generating relatively narrow net interest margins.

Loan Concentrations: Because of the Bank's proximity to Acadia National Park, a large part of the economic activity in the area is generated from the hospitality business associated with tourism. At December 31, 2013, approximately \$114,982 or 13.5% of the Bank's loan portfolio was represented by loans to the lodging industry, compared with \$105,699 or 13.0% at December 31, 2012. Loan concentrations continued to principally reflect the Bank's business region.

Real Estate Loans Under Foreclosure: At December 31, 2013, real estate loans under foreclosure totaled \$2,900 compared with \$1,567 at December 31, 2012, representing an increase of \$1,333, or 85.1%.

At December 31, 2013, real estate loans under foreclosure were represented by nine residential mortgage loans totaling \$1,414, one commercial construction and land development loan totaling \$68, seven commercial real estate loans totaling \$1,268 and one commercial and industrial loan totaling \$150.

Other Real Estate Owned: Real estate acquired in satisfaction of a loan is reported in other assets. Properties acquired by foreclosure or deed in lieu of foreclosure are transferred to other real estate owned (OREO) and recorded at the lower of cost or fair market value less estimated costs to sell based on appraised value at the date actually or constructively received. Loan losses arising from the acquisition of such property are charged against the allowance for loan losses. Subsequent reductions in fair value below the carrying value are charged to other operating expenses.

At December 31, 2013, total OREO amounted to \$1,625, compared with \$2,780 as of December 31, 2012, representing a decline of \$1,155 or 41.5%. Five residential and six commercial properties comprised the December 31, 2013 balance of OREO.

During the twelve months ended December 31, 2013, five properties were added to OREO. There were nine properties written down for an aggregate total of \$331 in write downs, and there were seven sales of OREO properties, of which one was sold at a gain of \$53, and six were sold at an aggregate loss of \$17. Additionally, one property with a carrying value of \$13 was donated to the Habitat for Humanity.

Mortgage Loan Servicing: The Bank, from time to time, will sell residential mortgage loans to other institutions and investors such as the FHLMC. In prior years, the Bank has generally sold fixed rate, long term residential mortgage loans, as a means of managing interest rate risk. The sale of loans also allows the Bank to make more funds available to customers in its servicing area, while the retention of servicing rights provides an additional source of income. At December 31, 2013, the unpaid balance of mortgage loans serviced for others totaled \$15,116 compared with \$17,728 at December 31, 2012, representing a decline of \$2,612 or 14.7%.

Loan Portfolio Interest Rate Composition: The following table summarizes the commercial, tax-exempt and consumer components of the loan portfolio by fixed and variable interest rate composition, as of December 31, 2013 and 2012:

	2013	2012
Commercial:		
Fixed	\$ 73,391	\$ 65,865
Variable	382,045	364,765
Total	\$455,436	\$430,630
Tax exempt:		
Fixed	\$ 7,563	\$ 6,239
Variable	8,792	9,005
Total	\$ 16,355	\$ 15,244
Consumer:		
Fixed	\$290,259	\$269,623
Variable	90,807	99,507
Total	\$381,066	\$369,130

Total loans:

Fixed	\$371,213	\$341,727
Variable	481,644	473,277
Total	\$852,857	\$815,004

At December 31, 2013, fixed and variable rate loans comprised 43.5% and 56.5% of the loan portfolio, respectively, compared with 41.9% and 58.1% at December 31, 2012. Over the past few years variable rate loans comprised a larger portion of the commercial loan portfolio compared with historical levels. Bank management believes this was principally driven by the historically low short-term interest rates including Prime and LIBOR. Most new borrowers elected variable rate loan pricing, while some existing borrowers renegotiated their higher cost fixed rate borrowings to lower cost variable rate borrowings.

Loan Maturities and Re-pricing Distribution: The following table summarizes fixed rate loans reported by remaining maturity, and floating rate loans by next re-pricing date, as of December 31, 2013 and 2012. Actual maturity dates may differ from contractual maturity dates due to prepayments, modifications and re-financings.

Maturities	2013	2012
One year or less	\$287,279	\$298,661
Over 1 - 5 years	167,838	150,837
Over 5 years	397,740	365,506
Total loans	\$852,857	\$815,004

Credit Risk: Credit risk is managed through loan officer authorities, loan policies, and oversight from the Bank's Chief Risk Officer, the Bank's Senior Loan Officers' Committee, the Directors' Loan Committee, and the Bank's Board of Directors. Management follows a policy of continually identifying, analyzing and grading credit risk inherent in the loan portfolio. An ongoing independent review, subsequent to management's review, of individual credits is performed by an independent loan review function, which reports to the Audit Committee of the Board of Directors.

Management recognizes that early and accurate recognition of risk is the best means to reduce credit losses and maximize earnings. The Bank employs a comprehensive risk management structure to identify and manage the risk of loss. For consumer loans, the Bank identifies loan delinquency beginning at 10-day delinquency and provides appropriate follow-up by written correspondence or personal contact. Non-residential mortgage loan losses are recognized no later than the point at which a loan is 120 days past due. Residential mortgage loan losses are recognized during the foreclosure process, or sooner, when that loss is quantifiable and reasonably assured. For commercial loans the Bank applies a risk grading system, which stratifies the portfolio and allows management to focus appropriate efforts on the highest risk components of the portfolio. The risk grades include ratings that correlate with regulatory definitions of Pass, Other Assets Especially Mentioned, Substandard, Doubtful, and Loss.

As a result of management's ongoing review of the loan portfolio, loans are placed on non-accrual status, either due to the delinquent status of principal and/or interest, or a judgment by management that, although payments of principal and/or interest are current, such action is prudent because collection in full of all outstanding principal and interest is in doubt. Loans are generally placed on non-accrual status when principal and or interest is 90 days overdue, or sooner if judged appropriate by management. Consumer loans are generally charged-off when principal and or interest payments are 120 days overdue, or sooner if judged appropriate by management.

Non-performing Loans: Non-performing loans include loans on non-accrual status and loans past due 90 days or more and still accruing interest. The following table sets forth the details of non-performing loans over the past five years.

TOTAL NON-PERFORMING LOANS

AT DECEMBER 31

	2013	2012	2011	2010	2009
Commercial real estate mortgages	\$2,046	\$1,888	\$ 2,676	\$ 3,572	\$3,096
Commercial and industrial loans	793	818	1,078	778	237
Commercial construction					
and land development	1,913	2,359	3,753	5,899	392
Agricultural and other loans to farmers	56	664	595	254	1,848
Total commercial loans	4,808	5,729	8,102	10,503	5,573
Residential real estate mortgages	3,227	3,017	4,266	3,022	2,522
Home equity loans	745	814	266	146	304
Other consumer loans	60	72	273	---	5
Total consumer loans	4,032	3,903	4,805	3,168	2,831
Total non-accrual loans	8,840	9,632	12,907	13,671	8,404
Accruing loans contractually					
past due 90 days or more	---	235	---	6	772
Total non-performing loans	\$8,840	\$9,867	\$12,907	\$13,677	\$9,176
Allowance for loan losses					
to non-performing loans	95.9%	82.1%	63.7%	62.1%	85.2%
Non-performing loans to total loans	1.04%	1.21%	1.77%	1.95%	1.37%
Allowance to total loans	0.99%	0.99%	1.13%	1.21%	1.17%

At December 31, 2013, total non-performing loans amounted to \$8,840, compared with \$9,867 at December 31, 2012, representing a decline of \$1,027, or 10.4%. At December 31, 2013, total non-performing loans represented 1.04% of total loans, down from 1.21% as of December 31, 2012. As more fully discussed below, one commercial real estate loan to a local, non-profit affordable housing authority in support of an affordable housing project accounted for \$1,845, or 20.9% of total non-performing loans at December 31, 2013.

Non-performing commercial real estate mortgages totaled \$2,046 at December 31, 2013, representing an increase of \$158, or 8.4%, compared with December 31, 2012. At December 31, 2013, non-performing commercial real estate mortgages were represented by eleven business relationships, with outstanding balances ranging from \$23 to \$460.

Non-performing commercial and industrial loans totaled \$793 at December 31, 2013, representing a decline of \$25, or 3.1%, compared with December 31, 2012. At December 31, 2013, non-performing commercial and industrial loans were represented by ten business relationships, with outstanding balances ranging from \$6 to \$224.

Non-performing commercial construction and land development loans totaled \$1,913 at December 31, 2013, representing a decline of \$446, or 18.9%, compared with December 31, 2012. At December 31, 2013, non-performing commercial construction and land development loans were represented by two business relationships, including a \$1,845 commercial real estate loan to a local, non-profit affordable housing authority in support of an affordable housing project. This loan is principally secured by the housing units from the project. The project is fully constructed and there is no construction risk associated with the loan. The primary source of repayment is the sale of the existing housing units. This loan is impaired and was put on non-accrual status in late 2010. To date, the Bank has charged off \$2,014 of the original outstanding balance of this collateral dependent impaired loan, of which \$192 was recorded in 2012 and \$1,822 in 2011. These charge-offs were based on current appraisals and revised prospects for future cash flows. This loan is recorded at fair value in the Company's financial statements.

Non-performing residential real estate mortgages totaled \$3,227 at December 31, 2013, representing an increase of \$210, or 7.0%, compared with December 31, 2012. At December 31, 2013, non-performing residential real estate loans were represented by thirty-three, conventional, 1-4 family mortgage loans, with outstanding balances ranging from \$15 to \$380.

Non-performing home equity loans totaled \$745 at December 31, 2013, representing a decline of \$69, or 8.5%, compared with December 31, 2012. At December 31, 2013, non-performing home equity loans were represented by five relationships with outstanding balances ranging from \$5 to \$391.

While the level and mix of non-performing loans continued to reflect favorably on the overall quality of the Bank's loan portfolio at December 31, 2013, Bank management is cognizant of the still-recovering real estate market, elevated unemployment rates and soft economic conditions overall. Bank management believes that the current credit cycle has yet to reach a definitive turning point and it may be some time before the overall level of credit quality in the Bank's loan portfolio returns to pre-recession levels and shows lasting improvement. Future levels of non-performing loans may be influenced by economic conditions, including the impact of those conditions on the Bank's customers, including debt service levels, declining collateral values, tourism activity, consumer confidence, monetary policy, and other factors existing at the time. Management believes the economic activity and conditions in the local real estate markets will continue to be significant determinants of the quality of the loan portfolio in future periods and, thus, the Company's results of operations and financial condition.

Delinquencies and Potential Problem Loans: In addition to the non-performing loans discussed above, the Bank also has loans that are 30 to 89 days delinquent. These loans amounted to \$4,201 and \$3,529 at December 31, 2013, and 2012, or 0.49% and 0.43% of total loans, respectively, net of any loans classified as non-performing that are within these delinquency categories. These loans and delinquency trends in general are considered in the evaluation of the allowance for loan losses and the related determination of the provision for loan losses.

On an ongoing basis, the Bank reviews the commercial loan portfolio for evidence of potential problem loans. Potential problem loans are loans that are currently performing in accordance with contractual terms, but where known information about possible credit problems of the borrower causes doubt about the ability of the borrower to comply with the loan payment terms and may result in disclosure of such loans as non-performing at some time in the future.

At December 31, 2013, the Bank identified twenty-eight commercial relationships totaling \$11,123 as potential problem loans, or 1.30% of total loans. At December 31, 2012, the Bank identified thirty-three commercial relationships totaling \$10,297 as potential problem loans, or 1.26% of total loans. Factors such as payment history, value of supporting collateral, and personal or government guarantees led the Bank to conclude that the current risk exposure on these potential problem loans did not warrant accounting for the loans as non-performing. Although in a performing status as of year-end, these loans exhibited certain risk factors, which have the potential to cause them to become non-performing at some point in the future.

Allowance for Loan Losses: At December 31, 2013, the allowance for loan losses (the allowance) stood at \$8,475, compared with \$8,097 at December 31, 2012, representing an increase of \$378, or 4.7%. The increase in the allowance from December 31, 2012 largely reflected loan portfolio growth, as the Bank's credit quality metrics were relatively stable. While non-performing loans declined \$1,027 or 10.4%, other delinquent and potential problem loans increased \$1,498 or 10.8%, compared with December 31, 2012.

At December 31, 2013, the allowance expressed as a percentage of total loans stood at 0.99%, unchanged compared with December 31, 2012. At December 31, 2013, the allowance expressed as a percentage of non-performing loans

amounted to 95.9% compared with 82.1% at December 31, 2012.

The allowance is available to absorb probable losses on loans. The determination of the adequacy of the allowance and provisioning for estimated losses is evaluated quarterly based on review of loans, with particular emphasis on non-performing and other loans that management believes warrant special consideration.

The allowance is maintained at a level that, in management's judgment, is appropriate for the amount of risk inherent in the current loan portfolio, and adequate to provide for estimated, probable losses. Allowances are established for specific impaired loans, a pool of reserves based on historical net loan charge-offs by loan types, and supplemental reserves that adjust historical loss experience to reflect current economic conditions, industry specific risks, and other qualitative and environmental considerations impacting the inherent risk of loss in the current loan portfolio.

Specific allowances for impaired loans are determined based upon a discounted cash flows analysis, or as an expedient, a collateral shortfall analysis. The amount of collateral dependent impaired loans totaled \$2,699 as of December 31, 2013, compared with \$3,149 as of December 31, 2012, representing a decline of \$450, or 14.3%. The related allowances for loan losses on these impaired loans amounted to \$120 as of December 31, 2013 and 2012.

Management reviews impaired loans to ensure such loans are transferred to interest non-accrual status, and written down when necessary. The amount of interest income not recorded on impaired loans amounted to \$52, \$37, and \$5 for the years ended December 31, 2013, 2012 and 2011, respectively.

General allowances for loan losses account for the risk and estimated loss inherent in certain pools of industry and geographic loan concentrations within the loan portfolio. There were no material changes in loan concentrations during 2013 compared with 2012.

Based upon the process employed and giving recognition to all attendant factors associated with the loan portfolio, management believes the allowance for loan losses at December 31, 2013, is appropriate for the risks inherent in the loan portfolio.

While management uses available information to recognize losses on loans, changing economic conditions and the economic prospects of the borrowers may necessitate future additions or reductions to the allowance. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Bank's allowance, which also may necessitate future additions or reductions to the allowance, based on information available to them at the time of their examination.

The following table details changes in the allowance for loan losses and summarizes loan loss experience by loan type over the past five years.

ALLOWANCE FOR LOAN LOSSES

SUMMARY OF LOAN LOSS EXPERIENCE

	2013	2012	2011	2010	2009
Balance at beginning of period	\$ 8,097	\$ 8,221	\$ 8,500	\$ 7,814	\$ 5,446
Charge offs:

Bank Owned Life Insurance

Bank-owned life insurance (BOLI) represents life insurance on the lives of certain retired employees who had provided positive consent allowing the Bank to be the beneficiary of such policies. Increases in the cash value of the policies, as well as insurance proceeds received in excess of the cash value, are recorded in other non-interest income, and are not subject to income taxes. The cash surrender value of the BOLI is included on the Company's consolidated balance sheet.

At December 31, 2013, the cash surrender value of BOLI amounted to \$7,879, compared with \$7,633 at December 31, 2012, representing an increase of \$246, or 3.2%.

Other Assets

The Company's other assets are principally comprised of accrued interest receivable, deferred income taxes and other real estate owned.

At December 31, 2013 total other assets amounted to \$18,812, compared with \$12,984 at December 31, 2012, representing an increase of \$5,828, or 44.9%. The increase in other assets was principally attributed to an increase in deferred income taxes, which resulted from higher levels of unrealized losses in the Bank's securities portfolio.

Funding Sources

The Bank utilizes various traditional sources of funding to support its earning asset portfolios. Funding sources principally consist of retail deposits and, to a lesser extent, borrowings from the Federal Home Loan Bank of Boston (FHLB) of which it is a member, and certificates of deposit obtained from the national market.

Deposits

Historically, the banking business in the Bank's market area has been seasonal, with lower deposits in the winter and spring and higher deposits in the summer and autumn. These seasonal swings have been fairly predictable and have not had a materially adverse impact on the Bank. Seasonal swings in deposits have been typically absorbed by the Bank's strong liquidity position, including borrowing capacity from the FHLB, brokered certificates of deposit obtained from the national market and cash flows from its securities portfolio.

Total Deposits: At December 31, 2013, total deposits amounted to \$835,651 compared with \$795,765 at December 31, 2012, representing an increase of \$39,886, or 5.0%.

Demand Deposits: The Bank's demand deposits are principally business accounts, which account for approximately two-thirds of total demand deposits. At December 31, 2013, total demand deposits amounted to \$72,259, compared with \$71,865 at December 31, 2012, representing an increase of \$394, or 0.5%. As discussed above, the Bank's deposits are seasonal in nature and the timing and extent of seasonal swings vary from year to year. This is particularly the case with demand deposits. For the year ended December 31, 2013, total average demand deposits amounted to \$70,978, compared with \$67,900 in 2012, representing an increase of \$3,078, or 4.5%. The increase in average demand deposits was largely attributed to a relatively strong tourist season in the local communities served by the Bank combined with new customer relationships, including those acquired in connection with the 2012 Border Trust transaction.

The Bank strives to attract demand deposits in connection with its commercial lending activities, on a total relationship basis. The Bank's business checking account offerings include *Easy Business Checking*, *Small Business Checking*, *Business Checking with Interest*, *Business Plus Checking*, and *Non-Profit Business Plus Checking*, each designed to help business owners manage the varying financial aspects of their business. The Bank also offers *Remote Deposit Capture*, enabling its business customers to deposit checks remotely. Business demand deposits are also generated by way of the Bank's *Merchant Credit Card Processing Program*.

NOW Accounts: The Bank offers interest bearing NOW accounts to individuals and not-for-profit organizations. At December 31, 2013, total NOW accounts amounted to \$135,246, compared with \$123,015 at December 31, 2012, representing an increase of \$12,231, or 9.9%. For the year ended December 31, 2013, average NOW accounts

amounted to \$124,382, compared with \$103,955 in 2012, representing an increase of \$20,427, or 19.6%. The increase in average NOW accounts was largely attributed to the deposits acquired in connection with the Border Trust transaction, as well as new customer relationships.

Savings and Money Market Deposits: At December 31, 2013, total savings and money market accounts amounted to \$232,558, compared with \$230,325 at December 31, 2012, representing an increase of \$2,233, or 1.0%. For the year ended December 31, 2013, average savings and money market accounts amounted to \$241,670, compared with \$209,622 in 2012, representing an increase of \$32,048 or 15.3%. This increase was principally attributed to new customer relationships and, to a lesser extent, the deposits acquired in connection with the Border Trust transaction.

Time Deposits: At December 31, 2013, total time deposits amounted to \$395,588, compared with \$370,560 at December 31, 2012, representing an increase of \$25,028, or 6.8%. A portion of the Bank's time deposits include certificates of deposit obtained from the national market. This source of funds is generally utilized to help support the Bank's earning asset growth, while maintaining its strong on-balance-sheet liquidity position via secured borrowing lines of credit with the FHLB and the Federal Reserve Bank of Boston.

The following table summarizes the changes in the average balances of deposits during the periods indicated, including the weighted average interest rates paid for each category of deposits:

AVERAGE DEPOSIT BALANCES BY CATEGORY OF DEPOSIT

	2013		2012	
	Average	Average	Average	Average
	Balance	Rate	Balance	Rate
Demand deposits	\$ 70,978	---	\$ 67,900	---
NOW accounts	124,382	0.19%	103,955	0.24%
Savings and money market deposits	241,670	0.24%	209,622	0.31%
Time deposits	400,044	1.45%	384,064	1.77%
Total deposits	\$837,074		\$765,541	

The following table summarizes the maturity distribution of time deposits of \$100 or greater:

MATURITY SCHEDULE

TIME DEPOSITS \$100 OR GREATER

DECEMBER 31, 2013

Three months or less	\$ 30,632
Over three to six months	40,629
Over six to twelve months	44,349
Over twelve months	36,711
Total	\$152,321

Time deposits in denominations of \$100 or greater totaled \$152,321 at December 31, 2013, compared with \$130,614 at December 31, 2012, representing an increase of \$21,707, or 16.6%.

Borrowed Funds

The Bank utilizes borrowed funds in leveraging its strong capital position and supporting its earning asset portfolios. Borrowed funds are principally utilized to support the Bank's investment securities portfolio and, to a lesser extent, fund loan growth. Borrowed funds also provide a means to help manage balance sheet interest rate risk, given the Bank's ability to select desired amounts, terms and maturities on a daily basis.

Borrowed funds principally consist of advances from the FHLB and, to a lesser extent, securities sold under agreements to repurchase, Fed funds purchased and borrowings from the Federal Reserve Bank of Boston. Advances from the FHLB are secured by stock in the FHLB, investment securities, certain commercial real estate loans, and blanket liens on qualifying mortgage loans and home equity loans.

Refer to Part II, Item 7, *Contractual Obligations*, and Notes 9 and 10, *Short-term Borrowings* and *Long-term Debt*, of the consolidated financial statements in this annual report on form 10-K for further information on borrowed funds.

Total Borrowings: At December 31, 2013, total borrowings amounted to \$409,445, compared with \$371,567 at December 31, 2012, representing an increase of \$37,878, or 10.2%. The increase in borrowings was principally utilized to help fund the Bank's earning asset growth.

Junior Subordinated Debentures: In the second quarter of 2008, the Bank issued \$5,000 aggregate principal amount of subordinated debt securities. These securities qualify as Tier 2 capital for the Bank and the Company and were issued to help support future earning asset growth without jeopardizing the Bank's historically strong capital position. The subordinated debt securities are due in 2023, but are callable by the Bank after five years without penalty. The rate of interest on these securities is three month Libor plus 345 basis points. The subordinated debt securities are classified as borrowings on the Company's consolidated balance sheet.

Capital Resources

Consistent with its long-term goal of operating a sound and profitable organization, at December 31, 2013 the Company maintained its strong capital position and continued to be a well-capitalized financial institution according to applicable regulatory standards. Management believes this to be vital in promoting depositor and investor confidence and providing a solid foundation for future growth.

The Company's Articles of Incorporation authorize the Company to issue up to 10,000,000 shares of the Company's common stock, par value \$2.00 per share and up to 1,000,000 shares of preferred stock, no par value. In October 2009, the Company filed a shelf registration statement on Form S-3 with the SEC to register an indeterminate number of shares of common stock and preferred stock, which together have an aggregate initial offering price not to exceed \$35,000 (the Shelf Registration). The SEC declared the Company's Shelf Registration effective on November 3, 2009.

In December of 2009 the Company announced that it had completed its offering of 800,000 shares of its common stock to the public at \$27.50 per share. The principal use of the net proceeds from that offering were used to repurchase all the Company's Series A preferred shares previously sold to the U.S. Department of the Treasury under its Capital Purchase Program.

The Company's Shelf Registration expired on November 3, 2012. The Company has not decided whether to file a new shelf registration statement and does not have any current plans to raise additional capital; however, the Company does recognize that financial flexibility is important and that a shelf registration filed with the SEC can be a prudent capital management tool should the need or opportunity to raise capital on attractive terms arise and, therefore, the Company may consider the filing of a new shelf registration with the SEC on terms similar to the Shelf Registration or other terms during 2014 or in other future years.

Capital Ratios: As of December 31, 2013 and 2012, the Company and the Bank were considered *well-capitalized* under the regulatory framework for prompt corrective action. Under the capital adequacy guidelines, a *well-capitalized* institution must maintain a minimum total risk-based capital to total risk-weighted assets ratio of at least 10.0%, a minimum Tier I capital to total risk-weighted assets ratio of at least 6.0%, and a minimum Tier I Leverage ratio of at least 5.0%. At December 31, 2013, the Company's Total Risk-based, Tier I Risk-based, and Tier I Leverage ratios were 16.62%, 14.97% and 9.01%, respectively.

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

The following table sets forth the Company's regulatory capital at December 31, 2013 and 2012, under the rules applicable at that date.

	December 31, 2013		December 31, 2012	
	Amount	Ratio	Amount	Ratio
Total Capital to Risk Weighted Assets	\$137,311	16.62%	\$127,857	15.78%
Regulatory Requirement	66,106	8.00%	64,812	8.00%
Excess over "adequately capitalized"	\$ 71,205	8.62%	\$ 63,045	7.78%
Tier 1 Capital to Risk Weighted Assets	\$123,730	14.97%	\$114,667	14.15%
Regulatory Requirement	33,053	4.00%	32,406	4.00%
Excess over "adequately capitalized"	\$ 90,677	10.97%	\$ 82,261	10.15%
Tier 1 Capital to Average Assets	\$123,730	9.01%	\$114,667	8.87%
Regulatory Requirement	54,954	4.00%	51,730	4.00%
Excess over "adequately capitalized"	\$ 68,776	5.01%	\$ 62,937	4.87%

As more fully disclosed in Note 11 of the Consolidated Financial Statements in this Annual Report on Form 10-K, the Bank also maintained its standing as a well-capitalized institution as defined by applicable regulatory standards. At December 31, 2013, the Bank's Total Risk-based, Tier I Risk-based, and Tier I Leverage ratios were 16.81%, 15.16% and 9.12%, respectively.

Shareholders' Equity: At December 31, 2013, total shareholders' equity amounted to \$121,379, compared with \$128,046 at December 31, 2012, representing a decline of \$6,667, or 5.2%. The decline in shareholder's equity was attributed to a \$15,637 decline in accumulated other comprehensive income. This decline was principally the result of a reduction in unrealized gains in the Bank's securities portfolio, which declined from a tax effective unrealized gain of \$8,098 at December 31, 2012 to a tax effected unrealized loss of \$7,567 at December 31, 2013. The net unrealized losses at December 31, 2013 were attributed to a significant increase in interest rates and pricing spreads during 2013, which negatively impacted the fair value of the Bank's fixed income securities portfolio.

Trends, Events or Uncertainties: There are no known trends, events or uncertainties, nor any recommendations by any regulatory authority, that are reasonably likely to have a material effect on the Company's capital resources, liquidity, or financial condition.

Stock Repurchase Plan: In August 2008, the Company's Board of Directors approved a program to repurchase up to 300,000 shares of the Company's common stock, or approximately 10.2% of the shares then currently outstanding. The new stock repurchase program became effective as of August 21, 2008, and was authorized to continue for a period of up to twenty-four consecutive months. In August of 2010, the Company's Board of Directors authorized the

continuance of this program through August 17, 2012. In August of 2012, the Company's Board of Directors authorized the continuance of this program through August 17, 2014. Depending on market conditions and other factors, these purchases may be commenced or suspended at any time, or from time to time, without prior notice and may be made in the open market or through privately negotiated transactions.

As of December 31, 2013, the Company had repurchased 104,952 shares of stock under this plan, at a total cost of \$2,937 and an average price of \$27.98 per share. During 2013, the Company repurchased 700 shares under the plan. The Company records repurchased shares as treasury stock.

Cash Dividends: The Company has historically paid regular quarterly cash dividends on its common stock. Each quarter, the Board of Directors declares the payment of regular quarterly cash dividends, subject to adjustment from time to time, based on the Company's earnings outlook, the strength of its balance sheet, its need for funds, and other relevant factors. There can be no assurance that dividends on the Company's common stock will be paid in the future.

The Company's principal source of funds to pay cash dividends and support its commitments is derived from Bank operations. During 2013, the Company declared and distributed regular cash dividends on its common stock in the aggregate amount of \$4,915 compared with \$4,565 in 2012. The Company's 2013 dividend payout ratio amounted to 37.3%, compared with 36.6% in 2012. The total regular cash dividends paid in 2013 amounted to \$1.25 per common share of common stock, compared with \$1.17 in 2012, representing an increase of \$0.08 per share, or 6.8%.

In the first quarter of 2014, the Company declared a regular cash dividend of \$0.325 per share of common stock, representing an increase of \$0.02 or 6.6%, compared with the first quarter of 2013. Based on the December 31, 2013 price of the Company's common stock of \$39.99 per share, the dividend yield amounted to 3.25%.

Contractual Obligations

The Company is a party to certain contractual obligations under which it is obligated to make future payments. These principally include borrowings from the FHLB, consisting of short and long-term fixed rate borrowings, and collateralized by all stock in the FHLB, a blanket lien on qualified collateral consisting primarily of loans with first and second mortgages secured by one-to-four family properties, and certain pledged investment securities. The Company has an obligation to repay all borrowings from the FHLB.

The Company is also obligated to make payments on operating leases for its retail branch offices in Somesville, Topsham and Augusta, Maine, as well as office space in Ellsworth and Bangor, Maine.

The following table summarizes the Company's contractual obligations at December 31, 2013. Borrowings are stated at their contractual maturity due dates and do not reflect call features, or principal amortization features, on certain borrowings.

CONTRACTUAL OBLIGATIONS

Description	Total Amount of Obligations	Payments Due By Period			
		< 1 Year	1-3	4-5	> 5
			Years	Years	Years
Borrowings from Federal Home Loan Bank Securities sold under agreements	\$384,190	\$ 292,690	\$32,000	\$59,500	\$ ---
to repurchase	20,255	20,255	---	---	---
Junior subordinated debentures	5,000	---	---	---	5,000
Operating Leases	1,638	412	591	275	360
Total	\$411,083	\$313,357	\$32,591	\$59,775	\$5,360

All FHLB advances are fixed-rate instruments. Advances are payable at their call dates or final maturity dates. At December 31, 2013, the Bank had \$44,000 in callable advances.

In the normal course of its banking and financial services business, and in connection with providing products and services to its customers, the Company has entered into a variety of traditional third party contracts for support services. Examples of such contractual agreements would include services providing ATMs, Visa Debit Card processing, trust services accounting support, check printing, and the leasing of T-1 telecommunication lines supporting the Company's wide area technology network.

The majority of the Company's core operating systems and software applications are maintained in-house with traditional third party maintenance agreements of one year or less.

Off-Balance Sheet Arrangements

The Company is, from time to time, a party to certain off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources, that may be material to investors.

At December 31, 2013 and 2012, the Company's off-balance sheet arrangements were limited to standby letters of credit.

Standby Letters of Credit: The Bank guarantees the obligations or performance of certain customers by issuing standby letters of credit to third parties. These letters of credit are sometimes issued in support of third-party debt. The risk involved in issuing standby letters of credit is essentially the same as the credit risk involved in extending loan facilities to customers, and they are subject to the same origination, portfolio maintenance and management procedures in effect to monitor other credit products. The amount of collateral obtained, if deemed necessary by the Bank upon issuance of a standby letter of credit, is based upon management's credit evaluation of the customer.

At December 31, 2013, commitments under existing standby letters of credit totaled \$378, compared with \$307 at December 31, 2012. The fair value of the standby letters of credit was not significant as of the foregoing dates.

Off-Balance Sheet Risk

The Bank is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financial needs of its customers and to reduce its own exposure to fluctuations in interest rates. These financial instruments include commitments to extend credit and, in the past, have included certain financial derivative instruments; namely, interest rate swap agreements and interest rate floor agreements.

Commitments to Extend Credit: Commitments to extend credit represent agreements by the Bank to lend to a customer provided there is no violation of any condition established in the contract. These commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee.

Since many of these commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's creditworthiness on a case-by-case basis using the same credit policies as it does for its balance sheet instruments, such as loans. The amount of collateral obtained, if deemed necessary by the Bank upon the issuance of commitment, is based on management's credit evaluation of the customer.

The following table summarizes the Bank's commitments to extend credit as of December 31:

COMMITMENTS TO EXTEND CREDIT

	December 31, 2013	December 31, 2012
Commitments to originate loans	\$ 10,269	\$ 20,843
Unused lines of credit	98,486	106,773
Un-advanced portions of construction loans	12,203	22,047
Total	\$120,958	\$149,663

Financial Derivative Instruments: As part of its overall asset and liability management strategy, the Bank periodically uses derivative instruments to minimize significant unplanned fluctuations in earnings and cash flows caused by interest rate volatility. The Bank's interest rate risk management strategy involves modifying the re-pricing characteristics of certain assets and liabilities so that change in interest rates does not have a significant adverse effect on net interest income. Derivative instruments that management periodically uses as part of its interest rate risk management strategy include interest rate swap agreements and interest rate floor agreements.

At December 31, 2013 and 2012 and during the years then ended, the Bank did not have any outstanding, off balance sheet financial derivative instruments.

Liquidity

Liquidity is measured by the Company's ability to meet short-term cash needs at a reasonable cost or minimal loss. The Company seeks to obtain favorable sources of liabilities and to maintain prudent levels of liquid assets in order to satisfy varied liquidity demands. Besides serving as a funding source for maturing obligations, liquidity provides flexibility in responding to customer initiated needs. Many factors affect the Company's ability to meet liquidity needs, including variations in the markets served by its network of offices, its mix of assets and liabilities, reputation and credit standing in the marketplace, and general economic conditions.

The Bank actively manages its liquidity position through target ratios established under its Asset Liability Management Policy. Continual monitoring of these ratios, both historical and through forecasts under multiple rate and stress scenarios, allows the Bank to employ strategies necessary to maintain adequate liquidity. A portion of the Bank's deposit base has been historically seasonal in nature, with balances typically declining in the winter months through late spring, during which period the Bank's liquidity position tightens.

The Bank uses a basic surplus model to measure its liquidity over 30 and 90-day time horizons. The relationship between liquid assets and short-term liabilities that are vulnerable to non-replacement are routinely monitored. The Bank's policy is to maintain a liquidity position of at least 4% of total assets. At December 31, 2013, liquidity, as measured by the basic surplus model, was 7.6% over the 30-day horizon and 6.5% over the 90-day horizon.

At December 31, 2013, the Bank had unused lines of credit and net unencumbered qualifying collateral availability to support its credit line with the FHLB approximating \$150 million. The Bank also had capacity to borrow funds on a secured basis utilizing the Borrower in Custody (BIC) program and the Discount Window at the Federal Reserve Bank of Boston (the FRB). At December 31, 2013, the Bank's available secured line of credit at the FRB stood at \$166,347 or 12.2% of the Bank's total assets. The Bank also has access to the national brokered deposit market, and has used this funding source to bolster its liquidity position.

The Bank maintains a liquidity contingency plan approved by the Bank's Board of Directors. This plan addresses the steps that would be taken in the event of a liquidity crisis, and identifies other sources of liquidity available to the Company. Company management believes that the level of liquidity is sufficient to meet current and future funding requirements. However, changes in economic conditions, including consumer savings habits and availability or access to the brokered deposit market could potentially have a significant impact on the Company's liquidity position.

RESULTS OF OPERATIONS

Net Interest Income

Net interest income is the principal component of the Company's income stream and represents the difference or spread between interest generated from earning assets and the interest expense paid on deposits and borrowed funds. Net interest income is entirely generated by the Bank. Fluctuations in market interest rates as well as volume and mix changes in earning assets and interest bearing liabilities can materially impact net interest income.

Total Net Interest Income: For the year ended December 31, 2013, net interest income on a tax-equivalent basis amounted to \$40,848 compared with \$38,599 in 2012, representing an increase of \$2,249, or 5.8%. As more fully discussed below, the increase in 2013 tax-equivalent net interest income compared with 2012 was attributed to average earning asset growth of \$99,321 or 8.3%, as the net interest margin declined eight basis points.

For the year ended December 31, 2012, net interest income on a tax-equivalent basis amounted to \$38,599 compared with \$35,860 in 2011, representing an increase of \$2,739, or 7.6%. As more fully discussed below, the increase in 2012 tax-equivalent net interest income compared with 2011 was attributed to average earning asset growth of \$86,957 or 7.8%, as the net interest margin remained unchanged.

Factors contributing to the changes in net interest income and the net interest margin are further enumerated in the following discussion and analysis.

Net Interest Income Analysis: The following tables summarize the Company's daily average balance sheets and the components of net interest income, including a reconciliation of tax-equivalent adjustments, for the years ended December 31, 2013, 2012 and 2011:

(3) For purposes of these computations, reported on a tax-equivalent basis calculated using a tax rate of 34%.

Net Interest Margin: The net interest margin, expressed on a tax-equivalent basis, represents the difference between interest and dividends earned on interest-earning assets and interest paid to depositors and other creditors, expressed as a percentage of average earning assets.

The net interest margin is determined by dividing tax-equivalent net interest income by average interest-earning assets. The interest rate spread represents the difference between the average tax-equivalent yield earned on interest earning-assets and the average rate paid on interest bearing liabilities. The net interest margin is generally higher than the interest rate spread due to the additional income earned on those assets funded by non-interest bearing liabilities, primarily demand deposits and shareholders' equity.

The Company's tax-equivalent net interest margin amounted to 3.15% in 2013, compared with 3.23% in 2012 and 2011.

The following table summarizes the net interest margin components, on a quarterly basis, over the past two years. Factors contributing to the changes in the net interest margin are enumerated in the following discussion and analysis.

(3) For purposes of these computations, reported on a tax-equivalent basis calculated using a tax rate of 34%.

Recent data suggests the U.S. economy continues to slowly emerge from a deep recession, which was driven by sharp downturns in the nationwide housing and credit markets, followed by multi-decade high unemployment rates and diminished consumer confidence and spending. In 2008, the Board of Governors of the Federal Reserve System addressed the economic decline with changes in its monetary policy by reducing the Federal Funds rate from 4.25% to a range of 0% to 0.25%, where it stayed all the way through 2013. These actions put considerable pressure on the Bank's net interest margin. During 2011, long-term interest rates declined to historic levels with the 10-year U.S. Treasury closing as low as 1.72%. While the 2011 interest rate environment pressured a further decline in earning asset yields, the Bank was able to more than offset this decline by lowering the cost of its interest bearing deposits and borrowings, resulting in an improved net interest margin compared with 2010.

During 2012, long-term interest rates again declined to historic levels with the 10-year U.S. Treasury closing as low as 1.39%. While the 2012 interest rate environment pressured a further decline in earning asset yields, the Bank was able to offset this decline by lowering the cost of its interest bearing deposits and borrowings, resulting in a stable net interest margin compared with 2011.

In 2013, long-term interest rates increased, with the ten-year U.S. Treasury surpassing 3.00% in the second half of the year. While this increase helped strengthen the net interest margin in the third and fourth quarters of 2013, the Bank's full year 2013 net interest margin declined eight basis points compared with 2012, as the yield on earning assets declined more than the cost of interest bearing liabilities.

The foregoing trends are discussed in more detail below.

For the year ended December 31, 2013, the weighted average yield on average earning assets amounted to 4.05%, compared with 4.38% in 2012, representing a decline of 33 basis points. The weighted average cost of interest bearing liabilities amounted to 1.02% in 2013, compared with 1.32% in 2012, representing a decline of 30 basis points. To summarize, comparing 2013 with 2012, the decline in the Bank's weighted average yield on its earning asset portfolios exceeded the decline in its weighted average cost of interest bearing liabilities by three basis points. This resulted in an eight basis point decline in the Bank's 2013 net interest margin and a three basis point decline in the Bank's rate spread, principally reflecting the volume of lower yielding earning assets added to the balance sheet during the year.

For the year ended December 31, 2012, the weighted average yield on average earning assets amounted to 4.38%, compared with 4.72% in 2011, representing a decline of 34 basis points. However, the weighted average cost of interest bearing liabilities amounted to 1.32% in 2012, compared with 1.70% in 2011, representing a decline of 38 basis points. To summarize, comparing 2012 with 2011, the decline in the Bank's weighted average cost of interest bearing liabilities exceeded the decline in the weighted average yield on its earning asset portfolios by four basis points, resulting in an improved interest rate spread. While the interest rate spread improved four basis points in 2012, the net interest margin remained unchanged, principally reflecting the volume of lower yielding earning assets added to the balance sheet during the year.

The declines in earning asset yields during 2013 and 2012 were principally attributed to the replacement of accelerated cash flows from the securities and loan portfolios, as well as the origination of new loans and the purchase of securities, during a period of historically low interest rates. The 2013 and 2012 declines in the cost of interest bearing liabilities were largely attributed to higher cost, maturing time deposits and borrowings being replaced at significantly lower interest rates. While the Bank was able to continue lowering the rates on many of its core deposit products during 2012 while remaining competitive in the markets served by the Bank, such opportunities subsided during 2013.

Interest and Dividend Income: For the year ended December 31, 2013, total interest and dividend income on a tax-equivalent basis amounted to \$52,511, compared with \$52,466 in 2012, representing an increase of \$45, or 0.1%. The increase in interest and dividend income was attributed to average earning growth of \$99,321 or 8.3%, which was almost entirely offset by a 33 basis point decline in the weighted average earning asset yield.

For the year ended December 31, 2013, tax-equivalent interest income from the securities portfolio amounted to \$14,982, compared with \$15,578 in 2012, representing a decline of \$596 or 3.8%. This decline was principally attributed to a 49 basis point decline in the weighted average securities yield to 3.41%, partially offset by a \$39,292 or 9.8% increase in total average securities. The decline in the weighted average securities yield was principally attributed to the ongoing replacement of MBS cash flows in a historically low interest rate environment combined with incremental securities purchases at prevailing low market yields. Accelerated cash flows were principally attributed to increased securitized loan refinancing activity driven by historically low interest rates, a variety of government stimulus programs, quantitative easing efforts by the Federal Reserve, as well as continuing credit defaults. During the second half of 2013, long-term interest rates increased significantly causing a slowing of prepayment speeds on the Bank's MBS, which resulted in less purchase premium amortization and higher book yields compared with the first half of the year. Company management believes future prepayment speeds and premium amortization will largely be dependent on policy decisions by the Federal Reserve and the pace of the economic recovery.

For the year ended December 31, 2013, tax-equivalent interest income from the loan portfolio amounted to \$37,460, compared with \$36,802 in 2012, representing an increase of \$658, or 1.8%. This increase was principally attributed to average loan portfolio growth of \$59,210 or 7.6%, as the weighted average yield declined 26 basis points to 4.46%. The decline in yield principally reflected the origination and competitive re-pricing of certain commercial loans, as well as an elevated level of residential mortgage loan refinancing activity during a period of historically low interest rates.

As depicted on the rate/volume analysis table below, comparing 2013 with 2012, the impact of the increased volume of total average earning assets contributed \$4,332 to the increase in total tax-equivalent interest income, but this increase was almost entirely offset by a \$4,287 decline attributed to the lower weighted average earning asset yield.

For the year ended December 31, 2012, total interest and dividend income on a tax-equivalent basis amounted to \$52,466, compared with \$52,378 in 2011, representing an increase of \$88, or 0.2%. The increase in interest and dividend income was attributed to average earning growth of \$86,957 or 7.8%, which was almost entirely offset by a 34 basis point decline in the weighted average earning asset yield.

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

For the year ended December 31, 2012, tax-equivalent interest income from the securities portfolio amounted to \$15,578, compared with \$17,348 in 2011, representing a decline of \$1,770 or 10.2%. This decline was principally attributed to a 72 basis point decline in the weighted average securities yield to 3.90%, partially offset by a \$23,863 or 6.4% increase in total average securities. The decline in the weighted average securities yield was principally attributed to the ongoing replacement of accelerated mortgage-backed securities cash flows in a historically low interest rate environment combined with incremental securities purchases at low prevailing market yields. Accelerated cash flows were principally attributed to increased securitized loan refinancing activity driven by historically low interest rates, a variety of government stimulus programs, quantitative easing efforts by the Federal Reserve, as well as continuing credit defaults.

For the year ended December 31, 2012, tax-equivalent interest income from the loan portfolio amounted to \$36,802, compared with \$34,983 in 2011, representing an increase of \$1,819 or 5.2% compared with 2011. This increase was principally attributed to average loan portfolio growth of \$61,905 or 8.6%, as the weighted average yield declined 15 basis points to 4.72%. The decline in yield principally reflected the origination and competitive re-pricing of certain commercial loans, as well as an elevated level of residential mortgage loan refinancing activity during a period of historically low interest rates.

As depicted on the rate/volume analysis table below, comparing 2012 with 2011, the impact of the increased volume of total average earning assets contributed \$4,122 to the increase in total tax-equivalent interest income, but this increase was almost entirely offset by a \$4,034 decline attributed to the lower weighted average earning asset yield.

Interest Expense: For the year ended December 31, 2013, total interest expense amounted to \$11,663, compared with \$13,867 in 2012, representing a decline of \$2,204, or 15.9%. This decline was principally attributed to a 30 basis point decline in the weighted average interest rate paid on interest bearing liabilities to 1.02%, offset in part by a \$90,003 or 8.6% increase in average interest bearing liabilities.

The 2013 decline in the average cost of interest bearing liabilities was principally attributed to prevailing, historically low short-term and long-term market interest rates, with maturing time deposits and borrowings being added or replaced at a lower cost and other interest bearing deposits re-pricing into the lower interest rate environment. The weighted average cost of interest bearing deposits declined 24 basis points in 2013 to 0.86%, while the weighted average cost of borrowings declined 40 basis points to 1.34%, principally reflecting the maturity of higher cost, long-term borrowings that were replaced in a historically low interest rate environment.

As depicted on the rate/volume analysis table below, the impact of the lower weighted average rate paid on interest bearing liabilities contributed \$3,336 to the 2013 decline in interest expense, offset in part by \$1,132 attributed to the increased volume of interest bearing liabilities.

For the year ended December 31, 2012, total interest expense amounted to \$13,867, compared with \$16,518 in 2011, representing a decline of \$2,651, or 16.0%. This decline was principally attributed to a 38 basis point decline in the weighted average interest rate paid on interest bearing liabilities to 1.32%, offset in part by a \$79,119 or 8.1% increase in average interest bearing liabilities.

The 2012 decline in the average cost of interest bearing liabilities was principally attributed to prevailing, historically low short-term and long-term market interest rates, with maturing time deposits and borrowings being added or replaced at a lower cost and other interest bearing deposits re-pricing into the lower interest rate environment. The weighted average cost of interest bearing deposits declined 19 basis points in 2012 to 1.10%, while the weighted average cost of borrowings declined 88 basis points to 1.74%, principally reflecting the maturity of higher cost, long-term borrowings that were replaced in a historically low interest rate environment.

As depicted on the rate/volume analysis table below, the impact of the lower weighted average rate paid on interest bearing liabilities contributed \$4,460 to the 2012 decline in interest expense, offset in part by \$1,809 attributed to the increased volume of interest bearing liabilities.

Rate/Volume Analysis: The following tables set forth a summary analysis of the relative impact on net interest income of changes in the average volume of interest earning assets and interest bearing liabilities, and changes in average rates on such assets and liabilities. The income from tax-exempt assets has been adjusted to a fully tax-equivalent basis, thereby allowing uniform comparisons to be made. Because of the numerous simultaneous volume and rate changes during the periods analyzed, it is not possible to precisely allocate changes to volume or rate. For presentation purposes, changes which are not solely due to volume changes or rate changes have been allocated to these categories in proportion to the relationships of the absolute dollar amounts of the change in each.

ANALYSIS OF VOLUME AND RATE CHANGES ON NET INTEREST INCOME

FOR THE YEAR ENDED DECEMBER 31, 2013 VERSUS 2012

INCREASES (DECREASES) DUE TO:

	Average	Average	Total
	Volume	Rate	Change
Loans (1,3)	\$2,789	\$(2,131)	\$ 658
Securities (2,3)	1,539	(2,135)	(596)
Federal Home Loan Bank stock	4	(21)	(17)
Fed funds sold, money market funds, and time deposits with other banks	---	---	---
TOTAL EARNING ASSETS	\$4,332	\$(4,287)	\$ 45
Interest bearing deposits	758	(1,849)	(1,091)
Borrowings	374	(1,487)	(1,113)
TOTAL INTEREST BEARING LIABILITIES	\$1,132	\$(3,336)	\$(2,204)

NET CHANGE IN NET INTEREST INCOME \$3,200 \$ (951) \$ 2,249

(1) For purposes of these computations, non-accrual loans are included in average loans.

(2) For purposes of these computations, unrealized gains (losses) on available-for-sale securities are recorded in other assets.

(3) For purposes of these computations, reported on a tax-equivalent basis calculated using a tax rate of 34%.

ANALYSIS OF VOLUME AND RATE CHANGES ON NET INTEREST INCOME

FOR THE YEAR ENDED DECEMBER 31, 2012 VERSUS 2011

INCREASES (DECREASES) DUE TO:

	Average Volume	Average Rate	Total Change
Loans (1,3)	\$3,015	\$(1,196)	\$ 1,819
Securities (2,3)	1,103	(2,873)	(1,770)
Federal Home Loan Bank stock	4	35	39
Fed funds sold, money market funds, and time deposits with other banks	---	---	---
TOTAL EARNING ASSETS	\$4,122	\$(4,034)	\$ 88
Interest bearing deposits	264	(1,322)	(1,058)
Borrowings	1,545	(3,138)	(1,593)
TOTAL INTEREST BEARING LIABILITIES	\$1,809	\$(4,460)	\$(2,651)
NET CHANGE IN NET INTEREST INCOME	\$2,313	\$ 426	\$ 2,739

(1) For purposes of these computations, non-accrual loans are included in average loans.

(2) For purposes of these computations, unrealized gains (losses) on available-for-sale securities are recorded in other assets.

(3) For purposes of these computations, reported on a tax-equivalent basis calculated using a tax rate of 34%.

Provision for Loan Losses

The provision for loan losses (the provision) reflects the amount necessary to maintain the allowance for loan losses (the allowance) at a level that, in management's judgment, is appropriate for the amount of inherent risk of probable loss in the Bank's current loan portfolio.

The overall credit quality of the Bank's loan portfolio remained relatively stable during 2013. While non-performing loans declined \$1,027 or 10.4%, other delinquent and potential problem loans increased \$1,498 or 10.8%, compared with December 31, 2012. The Bank's loan loss experience improved in 2013 with total net loan charge-offs amounting to \$1,040, or annualized net charge-offs to average loans outstanding of 0.12% compared with \$1,776 or 0.23% in 2012, respectively.

For the year ended December 31, 2013, the Bank recorded a provision for loan losses (the provision) of \$1,418, compared with \$1,652 in 2012, representing a decline of \$234, or 14.2%. The decline in the provision largely reflected stable credit quality metrics combined with improved loan loss experience.

For the year ended December 31, 2012, the overall credit quality of the Bank's loan portfolio continued to improve. This improvement was highlighted by a \$3,040 or 23.6% decline in non-performing loans and lower levels of delinquent and potential problem loans expressed as a percent of total loans, compared with December 31, 2011. During 2012, the Bank's loan loss experience improved with total net loan charge-offs amounting to \$1,776, or annualized net charge-offs to average loans outstanding of 0.23% compared with \$2,674 or 0.37% in 2011, respectively.

For the year ended December 31, 2012, the Bank recorded a provision of \$1,652, compared with \$2,395 in 2011, representing a decline of \$743, or 31.0%. The provision recorded in 2012 was largely driven by the Bank's charge-off experience, growth in the loan portfolio, and still depressed real estate values. The 2012 decline in the provision largely reflected improved credit quality metrics, as discussed immediately above, which continued to stabilize during 2012.

Refer to Part II, Item 7, *Non-performing Loans, Potential Problem Loans and the Allowance for Loan Losses*, in this Annual Report on Form 10-K for further discussion and analysis related to the provision for loan losses.

Non-interest Income

In addition to net interest income, non-interest income is a significant source of revenue for the Company and an important factor in its results of operations. In 2013, non-interest income represented 16.2% of total net interest income and non-interest income, compared with 17.3% in 2012.

For the year ended December 31, 2013, total non-interest income amounted to \$7,566, compared with \$7,709 in 2012, representing a decline of \$143, or 1.9%.

For the year ended December 31, 2012, total non-interest income amounted to \$7,709, compared with \$6,792 in 2011, representing an increase of \$917, or 13.5%.

Factors contributing to the 2013 and 2012 changes in non-interest income are enumerated in the following discussion and analysis:

Trust and Financial Services Income: Income from trust and financial services represented 48.0% of the Company's total non-interest income in 2013, compared with 42.5% and 45.1% in 2012 and 2011, respectively. Income from trust and financial services is principally derived from fee income based on a percentage of the fair market value of client assets under management and held in custody and, to a lesser extent, revenue from brokerage services conducted through Bar Harbor Financial Services, an independent third-party broker.

For the year ended December 31, 2013, income from trust and other financial services amounted to \$3,634, compared with \$3,278 in 2012, representing an increase of \$356, or 10.9%. This increase was attributed to higher levels of revenue from retail brokerage activities, as well as increases in the fair value of assets under management. Reflecting strength in the equity markets and additional new business, assets under management stood at \$387,633 as of December 31, 2013, compared with \$355,461 at December 31, 2012, representing an increase of \$32,172 or 9.1%.

For the year ended December 31, 2012, income from trust and other financial services amounted to \$3,278, compared with \$3,061 in 2011, representing an increase of \$217, or 7.1%. This increase was principally attributed to increases in the fair value of assets under management, new client relationships, as well as increased brokerage activity. Reflecting additional new business and some stability in the equity markets, assets under management stood at \$355,461 as of December 31, 2012, compared with \$333,868 at December 31, 2011, representing an increase of \$21,593 or 6.5%.

Service Charges on Deposit Accounts: This income is principally derived from overdraft fees, monthly deposit account maintenance and activity fees, automated teller machine (ATM) fees and a variety of other deposit account related fees. Income from service charges on deposit accounts represented 16.5% of total 2013 non-interest income, compared with 15.5% and 18.9% in 2012 and 2011, respectively.

For the year ended December 31, 2013, income generated from service charges on deposit accounts amounted to \$1,248, compared with \$1,196 in 2012, representing an increase of \$52, or 4.3%. This increase was principally attributed to customer overdraft increases instituted in the third quarter of 2012, as the level of customer overdraft activity was essentially unchanged compared with 2012.

For the year ended December 31, 2012, income generated from service charges on deposit accounts amounted to \$1,196, compared with \$1,284 in 2011, representing a decline of \$88, or 6.9%. This decline was principally attributed to declines in deposit account overdraft fees, reflecting reduced overdraft activity and the impact of new regulations that limit the ability of a bank to offer overdraft protection to customers without their specific consent and to derive fees from overdraft protection programs in general.

Credit and Debit Card Service Charges and Fees: This income is principally derived from the Bank's Visa debit card product, merchant credit card processing fees and fees associated with Visa credit cards. Income from credit and debit card service charges and fees represented 20.8% of total 2013 non-interest income, compared with 19.0% and 18.8% in 2012 and 2011, respectively.

For the year ended December 31, 2013, credit and debit card service charges and fees amounted to \$1,572, compared with \$1,462 and \$1,277 in 2012 and 2011, representing increases of \$110 and \$185, or 7.5% and 14.5%, respectively. These increases were principally attributed to continued growth of the Bank's retail deposit base, higher levels of merchant credit card processing volumes, and continued success with a program that offers rewards for certain debit card transactions.

Net Securities Gains: For the year ended December 31, 2013, total net securities gains amounted to \$676, compared with \$1,938 in 2012, representing a decline of \$1,262, or 65.1%. The net realized securities gains recorded during 2013 were comprised of realized gains of \$684, offset by realized losses of \$8.

For the year ended December 31, 2012, total net securities gains amounted to \$1,938, compared with \$2,689 in 2011, representing a decline of \$751, or 27.9%. The net realized securities gains recorded during 2012 were comprised of realized gains of \$1,963, offset by realized losses of \$25.

Further information regarding securities gains and losses and OTTI losses is incorporated by reference to Part II, Item 8, Notes 1 and 3 of the Consolidated Financial Statements in this Annual Report on Form 10-K.

Net OTTI Losses Recognized in Earnings: For the years ended December 31, 2013, 2012 and 2011, net OTTI losses recognized in earnings amounted to \$249, \$853 and \$2,219, representing declines of \$604 and \$1,366, or 70.8% and

61.6%, respectively. During 2013 and 2012 the Company determined that certain available-for-sale, private-label mortgage-backed securities were other-than-temporarily impaired, because the Company could no longer conclude that it was probable it would recover all of the principal and interest on these securities. The declines in 2013 and 2012 credit losses principally reflected stabilizing loss severity and constant default rates of the underlying residential mortgage loan collateral, resulting from stabilizing real estate values, foreclosure and collateral liquidation timelines, and general economic conditions.

The OTTI losses recorded in 2013 and 2012 related to fourteen, available for sale, private-label MBS, all but two of which the Company had previously determined to be other-than-temporarily impaired. These OTTI losses represented management's best estimate of credit losses or additional credit losses on the residential mortgage loan collateral underlying these securities. The estimated 2013 and 2012 credit losses were previously recorded, net of taxes, in unrealized gains or losses on securities available for sale within accumulated other comprehensive income or loss, a component of total shareholders' equity on the Company's consolidated balance sheet.

Further information regarding impaired securities, other-than-temporarily impaired securities and evaluation of securities for impairment is incorporated by reference to Part II, Item 8, Notes 1 and 3 of the Consolidated Financial Statements in this Annual Report on Form 10-K.

Other Operating Income: Other operating income principally includes income from bank-owned life insurance, representing increases in the cash surrender value of life insurance policies on the lives of certain retired employees who had provided positive consent allowing the Bank to be the beneficiary of such policies. Other operating income also includes a variety of miscellaneous service charges and fees. Other operating income represented 9.1% of total 2013 non-interest income, compared with 8.9% and 10.3% in 2012 and 2011, respectively.

For the year ended December 31, 2013, total other operating income amounted to \$685, compared with \$688 and \$700 in 2012 and 2011, representing declines of \$3 and \$12, or 0.4% and 1.7%, respectively.

Non-interest Expense

For the years ended December 31, 2013, 2012 and 2011, total non-interest expense amounted to \$26,860, \$25,618 and \$23,281, representing increases of \$1,242 and \$2,337, or 4.8% and 10.0%, respectively.

Factors contributing to the changes in non-interest expense are enumerated in the following discussion and analysis.

Salaries and Employee Benefits: For the year ended December 31, 2013, total salaries and employee benefit expenses amounted to \$15,227, compared with \$14,027 in 2012, representing an increase of \$1,200, or 8.6%. This increase was attributed to a variety of factors including normal increases in base salaries, higher levels of employee incentive compensation, as well as changes in staffing levels and mix. The increase in salaries and benefits also reflected the Bank's acquisition of three branch offices in the third quarter of 2012. Also contributing to the increase were expenses related to certain equity awards to members of the Company's Board of Directors.

For the year ended December 31, 2012, total salaries and employee benefit expenses amounted to \$14,027, compared with \$12,814 in 2011, representing an increase of \$1,213, or 9.5%. This increase was largely attributed to higher levels of employee severance payments including \$263 incurred in connection with the Border Trust transaction, higher levels of employee incentive compensation, as well as normal increases in base salaries and changes in staffing levels and mix. The year-over-year increase in salaries and employee benefits also reflected the recording of \$130 in employee health insurance credits, based on favorable claims experience, in 2011.

Occupancy Expense: For the years ended December 31, 2013 and 2012, total occupancy expense amounted to \$1,968 and \$1,682, compared with \$1,682 and \$1,514 in 2012 and 2011, representing increases of \$286 and \$168, or 17.0% and 11.1%, respectively. These increases were largely attributed to the acquisition of three branch offices in the third quarter of 2012, two of which are leased properties. The increase in occupancy expense was also attributed to the Bank's substantial reconfiguration of its Ellsworth campus, including the replacement of its retail banking office, which was put in service in the third quarter of 2012.

Furniture and Equipment Expense: For the years ended December 31, 2013, 2012 and 2011, total furniture and equipment expense amounted to \$2,005, \$1,778 and \$1,660, representing increases of \$227 and \$118, or 12.8% and 7.1%, respectively. The 2013 and 2012 increases in furniture and equipment expense were largely attributed to a variety of technology upgrades and new technology systems and applications. These increases were also attributed to the acquisition of three branch offices from Border Trust in the third quarter of 2012, as well as the replacement of the Bank's Ellsworth retail banking office.

Credit and Debit Card Expenses: These expenses principally relate to the Bank's Visa debit card processing activities. For the year ended December 31, 2013, total debit card expenses amounted to \$384, compared with \$367 and \$310 in 2012 and 2011, representing increases of \$17 and \$57, or 4.6% and 18.4%, respectively. These increases were principally attributed to higher transaction volumes and were more than offset with higher revenues from these activities.

FDIC Insurance Assessments: For the year ended December 31, 2013, FDIC assessments amounted to \$696, compared with \$853 and \$1,099 in 2012 and 2011, representing declines of \$157 and \$246, or 18.4% and 22.4%, respectively. These declines were largely attributed to a new assessment formula, whereby deposit insurance premiums are principally based on asset size and risk profiles rather than insurable deposits.

Other Operating Expense: For the year ended December 31, 2013, total other operating expenses amounted to \$6,580, compared with \$6,911 in 2012, representing a decline of \$331, or 4.8%. The decline in 2013 other operating expenses was principally attributed to certain non-recurring branch acquisition expenses in connection with the 2012 Border Trust transaction, as well as lower levels of loan collection and other real estate owned expenses compared with 2012.

For the year ended December 31, 2012, total other operating expenses amounted to \$6,911, compared with \$5,884 in 2011, representing an increase of \$1,027, or 17.5%. This increase was principally attributed to \$600 in non-recurring expenses associated with the Border Trust transaction, including fees for professional services and a wide variety of conversion and integration related expenses. The increase in 2012 other operating expenses was additionally attributed to a \$304 thousand or 132.7% increase in loan collection and other real estate owned expenses compared with 2011, largely reflecting higher levels of loan collection and foreclosure activity, as well as losses on the sale or write-down of owned properties.

Income Taxes

For the year ended December 31, 2013, total income taxes amounted to \$5,191, compared with \$4,944 and \$4,462, in 2012 and 2011, representing increases of \$247 and \$482, or 5.0% and 10.8%, respectively.

The Company's 2013 effective income tax rate amounted to 28.3%, compared with 28.4% and 28.8% in 2012 and 2011, respectively. The income tax provisions for these periods were less than the expense that would result from applying the federal statutory rate of 35% to income before income taxes, principally because of the impact of tax-exempt income from certain investment securities, loans and bank owned life insurance.

Fluctuations in the Company's effective tax rate are generally attributed to changes in the relationship between non-taxable income and non-deductible expense, and income before income taxes, during any given reporting period.

Impact of Inflation and Changing Prices

The Consolidated Financial Statements and the accompanying Notes to the Consolidated Financial Statements presented elsewhere in this report have been prepared in accordance with U.S. generally accepted accounting principles, which require the measurement of financial position and operating results in terms of historical dollars without considering changes in the relative purchasing power of money over time due to inflation.

Unlike many industrial companies, substantially all of the assets and virtually all of the liabilities of the Company are monetary in nature. As a result, interest rates have a more significant impact on the Company's performance than the general level of inflation. Over short periods of time, interest rates and the U.S. Treasury yield curve may not necessarily move in the same direction or in the same magnitude as inflation.

While the financial nature of the Company's consolidated balance sheets and statements of income is more clearly affected by changes in interest rates than by inflation, inflation does affect the Company because as prices increase the money supply tends to increase, the size of loans requested tends to increase, total Company assets increase, and interest rates are affected by inflationary expectations. In addition, operating expenses tend to increase without a corresponding increase in productivity. There is no precise method, however, to measure the effect of inflation on the Company's financial statements. Accordingly, any examination or analysis of the financial statements should take into consideration the possible effects of inflation.

Recent Accounting Developments

The following information presents a summary of Accounting Standards Updates (ASU's) that were recently adopted by the Company, as well as those that will be subject to implementation in future periods.

ASU No. 2011-11, *Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities*. ASU 2011-11 amends Topic 210, *Balance Sheet*, to require an entity to disclose both gross and net information about financial instruments, such as sales and repurchase agreements and reverse sale and repurchase agreements and securities borrowing/lending arrangements, and derivative instruments that are eligible for offset in the statement of financial position and/or subject to a master netting arrangement or similar agreement. ASU 2011-11 is effective for annual and interim periods beginning on January 1, 2013, and did not have a material impact on the Company's consolidated financial statements.

ASU 2012-02, Intangibles *Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment*. Under the guidance in this ASU, an entity has the option to bypass the qualitative assessment outlined in ASU 2011-08, Intangibles Goodwill and Other (Topic 350): Testing Goodwill for Impairment, for any indefinite-lived intangible asset in any period and proceed directly to performing the quantitative impairment test. An entity will be able to resume performing the qualitative assessment in any subsequent period. The amendments in this ASU are effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. The

adoption of this ASU did not have a significant impact to the Company's financial statements.

ASU 2013-02, Comprehensive Income (Topic 220) – Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. The objective of this update is to improve the reporting of reclassifications out of accumulated other comprehensive income. The amendments do not change the current requirements for reporting net income or other comprehensive income in financial statements. However, the amendments require an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under U.S. GAAP that provide additional detail about those amounts. The amendments in this update apply to all entities that issue financial statements that are presented in conformity with U.S. GAAP and that report items of other comprehensive income. Public companies are required to comply with these amendments for all reporting periods presented, including interim periods. For public entities, the amendments are effective prospectively for reporting periods beginning after December 15, 2012. Adoption of this update did not have a material impact on our financial condition or results of operations.

ASU 2014-04, Receivables – Troubled Debt Restructurings by Creditors (Subtopic 310-40), In January 2014, the FASB issued ASU 2014-04, which clarifies when an in substance repossession or foreclosure has occurred and the creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. A creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan either when legal title to the residential real estate property is obtained upon completion of a foreclosure or when the borrower has conveyed all interest in the residential real property to the creditor to satisfy the loan through completion of a deed in lieu of foreclosure or similar arrangement. The ASU also requires disclosure of both the amount of foreclosed residential real estate property held by the creditor and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure. The guidance is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. We do not expect the adoption of these provisions to have a significant impact on the Company's consolidated financial statements.

ASU 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists, which amends ASC 740, Income Taxes. The amendments provide guidance on the financial statement presentation of an unrecognized tax benefit, as either a reduction of a deferred tax asset or as a liability, when a net operating loss carryforward, similar tax loss, or a tax credit carryforward exists. The amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013 and may be applied on either a prospective or retrospective basis. We do not expect the adoption of these provisions to have a significant impact on the Company's consolidated financial statements.

ITEM 7A. QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk

Market risk is the risk of loss in a financial instrument arising from adverse changes in market rates/prices, such as interest rates, foreign currency exchange rates, commodity prices and equity prices. Interest rate risk is the most significant market risk affecting the Company. Other types of market risk do not arise in the normal course of the Company's business activities.

The responsibility for interest rate risk management oversight is the function of the Bank's Asset and Liability Committee (ALCO), chaired by the Chief Financial Officer and composed of various members of senior management. ALCO meets regularly to review balance sheet structure, formulate strategies in light of current and expected economic conditions, adjust product prices as necessary, implement policy, monitor liquidity, and review performance against guidelines established to control exposure to the various types of inherent risk.

Interest Rate Risk: Interest rate risk can be defined as an exposure to movement in interest rates that could have an adverse impact on the Bank's net interest income. Interest rate risk arises from the imbalance in the re-pricing, maturity and or cash flow characteristics of assets and liabilities. Management's objectives are to measure, monitor and develop strategies in response to the interest rate risk profile inherent in the Bank's balance sheet. The objectives in managing the Bank's balance sheet are to preserve the sensitivity of net interest income to actual or potential changes in interest rates, and to enhance profitability through strategies that promote sufficient reward for understood and controlled risk.

The Bank's interest rate risk measurement and management techniques incorporate the re-pricing and cash flow attributes of balance sheet and off-balance sheet instruments as they relate to current and potential changes in interest rates. The level of interest rate risk, measured in terms of the potential future effect on net interest income, is determined through the use of modeling and other techniques under multiple interest rate scenarios. Interest rate risk is evaluated in depth on a quarterly basis and reviewed by the Bank's ALCO and the Company's Board of Directors.

The Bank's Asset Liability Management Policy, approved annually by the Bank's Board of Directors, establishes interest rate risk limits in terms of variability of net interest income under rising, flat, and decreasing rate scenarios. It is the role of ALCO to evaluate the overall risk profile and to determine actions to maintain and achieve a posture consistent with policy guidelines.

Interest Rate Sensitivity Modeling: The Bank utilizes an interest rate risk model widely recognized in the financial industry to monitor and measure interest rate risk. The model simulates the behavior of interest income and expense for all balance sheet and off-balance sheet instruments, under different interest rate scenarios together with a dynamic future balance sheet. Interest rate risk is measured in terms of potential changes in net interest income based upon shifts in the yield curve.

The interest rate risk sensitivity model requires that assets and liabilities be broken down into components as to fixed, variable, and adjustable interest rates, as well as other homogeneous groupings, which are segregated as to maturity and type of instrument. The model includes assumptions about how the balance sheet is likely to evolve through time and in different interest rate environments. The model uses contractual re-pricing dates for variable products, contractual maturities for fixed rate products, and product-specific assumptions for deposit accounts, such as money market accounts, that are subject to re-pricing based on current market conditions. Re-pricing margins are also determined for adjustable rate assets and incorporated in the model. Investment securities and borrowings with call provisions are examined on an individual basis in each rate environment to estimate the likelihood of a call. Prepayment assumptions for mortgage loans and mortgage-backed securities are developed from industry median estimates of prepayment speeds, based upon similar coupon ranges and degree of seasoning. Cash flows and maturities are then determined, and for certain assets, prepayment assumptions are estimated under different interest rate scenarios. Interest income and interest expense are then simulated under several hypothetical interest rate conditions including:

.
A flat interest rate scenario in which current prevailing rates are locked in and the only balance sheet fluctuations that occur are due to cash flows, maturities, new volumes, and re-pricing volumes consistent with this flat rate assumption;

.
A 200 basis point rise or decline in interest rates applied against a parallel shift in the yield curve over a twelve-month horizon together with a dynamic balance sheet anticipated to be consistent with such interest rate changes;

.
Various non-parallel shifts in the yield curve, including changes in either short-term or long-term rates over a twelve-month horizon, together with a dynamic balance sheet anticipated to be consistent with such interest rate changes; and

.
An extension of the foregoing simulations to each of two, three, four and five year horizons to determine the interest rate risk with the level of interest rates stabilizing in years two through five. Even though rates remain stable during this two to five year time period, re-pricing opportunities driven by maturities, cash flow, and adjustable rate products will continue to change the balance sheet profile for each of the interest rate conditions.

Changes in net interest income based upon the foregoing simulations are measured against the flat interest rate scenario and actions are taken to maintain the balance sheet interest rate risk within established policy guidelines.

The following table summarizes the Bank's net interest income sensitivity analysis as of December 31, 2013, over one and two-year horizons and under different interest rate scenarios. In light of the prevailing Federal Funds rate of 0.00% to 0.25%, and the two-year U.S. Treasury note of 0.38% at December 31, 2013, the analysis incorporates a declining interest rate scenario of 100 basis points, rather than the 200 basis points as would traditionally be the case.

INTEREST RATE RISK**CHANGE IN NET INTEREST INCOME FROM THE FLAT RATE SCENARIO****DECEMBER 31, 2013**

	-100 Basis Points Parallel Yield Curve Shift	+200 Basis Points Parallel Yield Curve Shift
Year 1		
Net interest income (\$)	\$(278)	\$(1,111)
Net interest income (%)	-0.65%	-2.60%
Year 2		
Net interest income (\$)	\$(402)	\$ (853)
Net interest income (%)	-0.94%	-2.00%

As more fully discussed below, the December 31, 2013 interest rate sensitivity modeling results indicate that the Bank's balance sheet was moderately exposed to rising interest rates over the one and two year horizons.

Assuming interest rates remain at or near their current levels and the Bank's balance sheet structure and size remain at current levels, the interest rate sensitivity simulation model suggests that net interest income will remain relatively stable over the one and two-year horizons. The relatively stable trend over the one and two-year horizons principally results from funding costs rolling over at lower prevailing rates, while largely offsetting expected declines in earning asset yields.

Assuming short-term and long-term interest rates decline 100 basis points from current levels (i.e., a parallel yield curve shift) and the Bank's balance sheet structure and size remain at current levels, management believes net interest income will decline slightly over the one and two-year horizons as declining earning assets yields outpace reductions in funding costs. Should the yield curve steepen as rates fall, the model suggests that accelerated earning asset prepayments will slow, resulting in a more stabilized level of net interest income. Management anticipates that moderate to strong earning asset growth will be needed to meaningfully increase the Bank's current level of net interest income should both long-term and short-term interest rates decline in parallel.

Assuming the Bank's balance sheet structure and size remain at current levels and the Federal Reserve increases short-term interest rates by 200 basis points with the balance of the yield curve shifting in parallel with these increases, management believes net interest income will decline moderately over the one and two-year horizons and then trend steadily upward beyond two years. The interest rate sensitivity simulation model suggests that as interest rates rise, the Bank's funding costs will initially re-price proportionately with earning asset yields. As funding costs begin to stabilize late in the first year of the simulation, the model suggests that the earning asset portfolios will continue to re-price at prevailing interest rate levels and cash flows from the Bank's earning asset portfolios will be reinvested into higher yielding earning assets, resulting in a widening of spreads and increases in net interest income

over the two year horizon and beyond. Management believes moderate to strong earning asset growth will be necessary to meaningfully increase the current level of net interest income over the one-year horizon

should short-term and long-term interest rates rise in parallel. Over the two-year horizon and beyond, management believes moderate earning asset growth will be necessary to meaningfully increase the current level of net interest income.

Interest rates plummeted during 2008 and have remained historically low ever since, as the global economy slowed at unprecedented levels, unemployment levels soared, delinquencies on all types of loans increased along with decreased consumer confidence and dramatic declines in housing prices. Management believes the most significant ongoing factor affecting market risk exposure and the impact on net interest income continues to be the slow and extended recovery from the severe nationwide recession and the U.S. Government's extraordinary responses, including a variety of government stimulus programs and quantitative easing strategies. Recent actions by the Federal Reserve have posed a further threat to net interest income, given its determination to maintain short-term interest rates at historically low levels for an extended period of time. Net interest income exposure is also significantly affected by the shape and level of the U.S. Government securities and interest rate swap yield curve, and changes in the size and composition of the Bank's loan, investment and deposit portfolios.

The preceding sensitivity analysis does not represent a Company forecast and should not be relied upon as being indicative of expected operating results. These hypothetical estimates are based upon numerous assumptions including: the nature and timing of interest rate levels and yield curve shape, prepayment speeds on loans and securities, deposit rates, pricing decisions on loans and deposits, and reinvestment or replacement of asset and liability cash flows, and renegotiated loan terms with borrowers. While assumptions are developed based upon current economic and local market conditions, the Company cannot make any assurances as to the predictive nature of these assumptions including how customer preferences or competitor influences might change.

As market conditions vary from those assumed in the sensitivity analysis, actual results may also differ due to: prepayment and refinancing levels deviating from those assumed; renegotiated loan terms with borrowers, the impact of interest rate caps or floors on adjustable rate assets; the potential effect of changing debt service levels on customers with adjustable rate loans; depositor early withdrawals and product preference changes; and other such variables. The sensitivity analysis also does not reflect additional actions that the Bank's ALCO and Board of Directors might take in responding to or anticipating changes in interest rates, and the anticipated impact on the Bank's net interest income.

The Bank engages an independent consultant to periodically review its interest rate risk position and the reasonableness of assumptions used, with periodic reports provided to the Bank's Board of Directors. At December 31, 2013, there were no significant differences between the views of the independent consultant and management regarding the Bank's interest rate risk exposure.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders

Bar Harbor Bankshares:

We have audited the accompanying consolidated balance sheets of Bar Harbor Bankshares and subsidiaries (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Bar Harbor Bankshares and subsidiaries as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2013, in conformity with U. S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 12, 2014 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

BAR HARBOR BANKSHARES AND SUBSIDIARIES

(All dollar amounts expressed in thousands, except share and per share data)

Note 1: Summary of Significant Accounting Policies

The accounting and reporting policies of Bar Harbor Bankshares (the Company) and its wholly-owned operating subsidiary, Bar Harbor Bank & Trust (the Bank), conform to U.S. generally accepted accounting principles (GAAP) and to general practice within the banking industry.

The Company's principal business activity is retail and commercial banking and, to a lesser extent, financial services including trust, financial planning, investment management and third-party brokerage services. The Company's business is conducted through the Company's fifteen banking offices located throughout downeast, midcoast and central Maine.

The Company is a bank holding company registered under the Bank Holding Company Act of 1956, as amended, and is subject to supervision, regulation and examination by the Board of Governors of the Federal Reserve System. The Company is also a Maine Financial Institution Holding Company for the purposes of the laws of the state of Maine, and as such is subject to the jurisdiction of the Superintendent of the Maine Bureau of Financial Institutions. The Bank is subject to the supervision, regulation, and examination of the FDIC and the Maine Bureau of Financial Institutions.

Financial Statement Presentation: The accompanying consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles.

The consolidated financial statements include the accounts of Bar Harbor Bankshares and its wholly-owned subsidiary, Bar Harbor Bank & Trust. All significant inter-company balances and transactions have been eliminated in consolidation. Whenever necessary, amounts in the prior years' financial statements are reclassified to conform to current presentation. Assets held in a fiduciary capacity are not assets of the Company and, accordingly, are not included in the consolidated balance sheets.

In preparing financial statements in conformity with U.S. generally accepted accounting principles, management is required to make estimates and assumptions that affect the reported amount of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to change in the near term relate to the determination of the allowance for loan losses, other-than temporary impairment on securities, income tax estimates, reviews of goodwill for impairment, and accounting for postretirement plans.

Subsequent Events: The Company has evaluated events and transactions subsequent to December 31, 2013 through report issuance, for potential recognition or disclosure as required by GAAP.

Cash and Cash Equivalents: For purposes of reporting cash flows, cash and cash equivalents include cash and due from banks, federal funds sold and other short-term investments with maturities less than 90 days.

In the normal course of business, the Bank has funds on deposit at other financial institutions in amounts in excess of the \$250 that is insured by the Federal Deposit Insurance Corporation.

Investment Securities: All securities held at December 31, 2013 and 2012 were classified as available-for-sale (AFS). Available-for-sale securities consist of mortgage-backed securities and municipal debt securities, and are carried at estimated fair value. Changes in estimated fair value of AFS securities, net of applicable income taxes, are reported in accumulated other comprehensive income (loss) as a separate component of shareholders' equity. The Bank does not have a securities trading portfolio or securities held-to-maturity.

Premiums and discounts on securities are amortized and accreted over the term of the securities using the interest method. Gains and losses on the sale of securities are recognized at the trade date using the specific-identification method and are shown separately in the consolidated statements of income.

Other-Than-Temporary Impairments on Investment Securities: One of the significant estimates relating to securities is the evaluation of other-than-temporary impairment (OTTI). If a decline in the fair value of a debt security is judged to be other-than-temporary, and management does not intend to sell the security and believes it is more-likely-than-not the Company will not be required to sell the security prior to recovery of cost or amortized cost, the portion of the total impairment attributable to the credit loss is recognized in earnings, and the remaining difference between the security's amortized cost basis and its fair value is included in other comprehensive income.

For impaired available-for-sale debt securities that management intends to sell, or where management believes it is more-likely-than-not that the Company will be required to sell, an other-than-temporary impairment charge is recognized in earnings equal to the difference between fair value and cost or amortized cost basis of the security. The

fair value of the other-than-temporarily impaired security becomes its new cost basis.

The evaluation of securities for impairments is a quantitative and qualitative process, which is subject to risks and uncertainties and is intended to determine whether declines in the fair value of securities should be recognized in current period earnings. The risks and uncertainties include changes in general economic conditions, the issuer's financial condition and/or future prospects, the effects of changes in interest rates or credit spreads and the expected recovery period of unrealized losses. The Company has a security monitoring process that identifies securities that, due to certain characteristics, as described below, are subjected to an enhanced analysis on a quarterly basis.

Securities that are in an unrealized loss position are reviewed at least quarterly to determine if they are other-than-temporarily impaired based on certain quantitative and qualitative factors and measures. The primary factors considered in evaluating whether a decline in value of securities is other-than-temporary include: (a) the cause of the impairment; (b) the financial condition, credit rating and future prospects of the issuer; (c) whether the debtor is current on contractually obligated interest and principal payments; (d) the volatility of the securities' fair value; (e) performance indicators of the underlying assets in the security including default rates, delinquency rates, percentage of non-performing assets, loan to collateral value ratios, third party guarantees, current levels of subordination, vintage, and geographic concentration and; (f) any other information and observable data considered relevant in determining whether other-than-temporary impairment has occurred, including the expectation of the receipt of all principal and interest due.

For securitized financial assets with contractual cash flows, such as private-label mortgage-backed securities, the Company periodically updates its best estimate of cash flows over the life of the security. The Company's best estimate of cash flows is based upon assumptions consistent with the current economic recession, similar to those the Company believes market participants would use. If the fair value of a securitized financial asset is less than its cost or amortized cost and there has been an adverse change in timing or amount of anticipated future cash flows since the last revised estimate, to the extent that the Company does not expect to receive the entire amount of future contractual principal and interest, an other-than-temporary impairment charge is recognized in earnings representing the estimated credit loss if management does not intend to sell the security and believes it is more-likely-than-not the Company will not be required to sell the security prior to recovery of cost or amortized cost. Estimating future cash flows is a quantitative and qualitative process that incorporates information received from third party sources along with certain assumptions and judgments regarding the future performance of the underlying collateral. In addition, projections of expected future cash flows may change based upon new information regarding the performance of the underlying collateral.

Federal Home Loan Bank Stock: The Bank is a member of the Federal Home Loan Bank of Boston (FHLB). The Bank uses the FHLB for most of its wholesale funding needs. As a requirement of membership in the FHLB, the Bank must own a minimum required amount of FHLB stock, calculated periodically based primarily on its level of borrowings from the FHLB. FHLB stock is a non-marketable equity security and therefore is reported at cost, which generally equals par value. Shares held in excess of the minimum required amount are generally redeemable at par value.

The Company periodically evaluates its investment in FHLB stock for impairment based on, among other things, the capital adequacy of the FHLB and its overall financial condition. Based on the capital adequacy, liquidity position and sustained profitability of the FHLB, management believes there is no impairment related to the carrying amount of the Bank's FHLB stock as of December 31, 2013.

Loans: Loans are carried at the principal amounts outstanding adjusted by partial charge-offs and net deferred loan origination costs or fees.

Interest on loans is accrued and credited to income based on the principal amount of loans outstanding. Residential real estate and home equity loans are generally placed on non-accrual status when reaching 90 days past due, or in process of foreclosure, or sooner if judged appropriate by management. Consumer loans are generally placed on non-accrual when reaching 90 days or more past due, or sooner if judged appropriate by management. Secured consumer loans are written down to realizable value and unsecured consumer loans are charged-off upon reaching 120 days past due. Commercial real estate loans and commercial business loans that are 90 days or more past due are generally placed on non-accrual status, unless secured by sufficient cash or other assets immediately convertible to cash, and the loan is in the process of collection. Commercial real estate and commercial business loans may be placed on non-accrual status prior to the 90 days delinquency date if considered appropriate by management. When a loan has been placed on non-accrual status, previously accrued and uncollected interest is reversed against interest on loans. A loan can be returned to accrual status when collectibility of principal is reasonably assured and the loan has performed for a period of time, generally six months.

Commercial real estate and commercial business loans are considered impaired when it becomes probable the Bank will not be able to collect all amounts due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status and collateral value. In considering loans for evaluation of impairment, management generally excludes smaller balance, homogeneous loans: residential mortgage loans, home equity loans, and all consumer loans, unless such loans were restructured in a troubled debt restructuring. These loans are collectively evaluated for risk of loss.

Loan origination and commitment fees and direct loan origination costs are deferred, and the net amount is amortized as an adjustment of the related loans' yield, using the level yield method over the estimated lives of the related loans.

Loans acquired through the completion of a transfer, including loans acquired in a business combination, that have evidence of deterioration of credit quality since origination and for which it is probable, at acquisition, that the Corporation will be unable to collect all contractually required payment receivable are initially recorded at fair value (as determined by the present value of expected future cash flows) with no valuation allowance. The difference between the undiscounted cash flows expected at acquisition and the investment in the loan, or the accretable yield, is recognized as interest income on a level-yield method over the life of the loan. Contractually required payments for

interest and principal that exceed the undiscounted cash flows expected at acquisition, or the nonaccretable difference, are not recognized as a yield adjustment or as a loss accrual or a valuation allowance. Increases in expected cash flows subsequent to the initial investment are recognized prospectively through adjustment of the yield on the loan over its remaining life. Decreases in expected cash flows are recognized as impairment. Valuation allowances on these impaired loans reflect only losses incurred after the acquisition (meaning the present value of all cash flows expected at acquisition that ultimately are not to be received).

Allowance for Loan Losses: The allowance for loan losses (the allowance) is a significant accounting estimate used in the preparation of the Company's consolidated financial statements. The allowance is available to absorb losses inherent in the current loan portfolio and is maintained at a level that, in management's judgment, is appropriate for the amount of risk inherent in the loan portfolio, given past and present conditions. The allowance is increased by provisions charged to operating expense and by recoveries on loans previously charged off, and is decreased by loans charged off as uncollectible.

Arriving at an appropriate level of allowance for loan losses involves a high degree of judgment. The determination of the adequacy of the allowance and provisioning for estimated losses is evaluated regularly based on review of loans, with particular emphasis on non-performing and other loans that management believes warrant special consideration. The ongoing evaluation process includes a formal analysis, which considers among other factors: the character and size of the loan portfolio, business and economic conditions, real estate market conditions, collateral values, changes in product offerings or loan terms, changes in underwriting and/or collection policies, loan growth, previous charge-off experience, delinquency trends, non-performing loan trends, the performance of individual loans in relation to contract terms, and estimated fair values of collateral.

The allowance for loan losses consists of allowances established for specific loans including impaired loans; allowances for pools of loans based on historical charge-offs by loan types; and supplemental allowances that adjust historical loss experience to reflect current economic conditions, industry specific risks, and other observable data.

While management uses available information to recognize losses on loans, changing economic conditions and the economic prospects of the borrowers may necessitate future additions or reductions to the allowance. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Bank's allowance, which also may necessitate future additions or reductions to the allowance, based on information available to them at the time of their examination.

Refer to Note 4 of these consolidated financial statements, *Loans and Allowance for Loan Losses*, for further information on the allowance for loan losses, including the Company's loan loss estimation methodology.

Premises and Equipment: Premises and equipment and related improvements are stated at cost less accumulated depreciation. Depreciation is computed on the straight-line method over the lesser of the lease term or estimated useful lives of related assets; generally 25 to 40 years for premises and three to seven years for furniture and

equipment.

Goodwill and Identifiable Intangible Assets: In connection with acquisitions, the Company generally records as assets on its consolidated financial statements both goodwill and identifiable intangible assets, such as core deposit intangibles.

The Company evaluates whether the carrying value of its goodwill has become impaired, in which case the value is reduced through a charge to its earnings. Goodwill is evaluated for impairment at least annually, or upon a triggering event using certain fair value techniques. Goodwill impairment testing is performed at the segment (or reporting unit) level. Goodwill is assigned to reporting units at the date the goodwill is initially recorded. Once goodwill has been assigned to the reporting units, it no longer retains its association with a particular acquisition, and all of the activities within a reporting unit, whether acquired or organically grown, are available to support the value of the goodwill.

Goodwill represents the excess of the purchase price over the fair value of net assets acquired in accordance with the purchase method of accounting for business combinations. Goodwill is not amortized but, instead, is subject to impairment tests on at least an annual basis or more frequently if an event occurs or circumstances change that reduce the fair value of a reporting unit below its carrying amount. The Company completes its annual goodwill impairment test as of December 31 of each year. The impairment testing process is conducted by assigning assets and goodwill to each reporting unit. Currently, the Company's goodwill is evaluated at the entity level as there is only one reporting unit. The Company first assesses certain qualitative factors to determine if it is more likely than not that the fair value of the reporting unit is less than its carrying value. If it is more likely than not that the fair value of the reporting unit is less than the carrying value, then the fair value of each reporting unit is compared to the recorded book value—step one. If the fair value of the reporting unit exceeds its carrying value, goodwill is not considered impaired and step two is not considered necessary. If the carrying value of a reporting unit exceeds its fair value, the impairment test continues (step two) by comparing the carrying value of the reporting unit's goodwill to the implied fair value of goodwill. The implied fair value is computed by adjusting all assets and liabilities of the reporting unit to current fair value with the offset adjustment to goodwill. The adjusted goodwill balance is the implied fair value of the goodwill. An impairment charge is recognized if the carrying fair value of goodwill exceeds the implied fair value of goodwill. At December 31, 2013, there was no indication of impairment that led the Company to believe it needed to perform a two-step test.

Identifiable intangible assets, included in other assets on the consolidated balance sheet, consist of core deposit intangibles amortized over their estimated useful lives on a straight-line method, which approximates the economic benefits to the Company. These assets are reviewed for impairment at least annually, or whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. The determination of which intangible assets have finite lives is subjective, as is the determination of the amortization period for such intangible assets.

Any changes in the estimates used by the Company to determine the carrying value of its goodwill and identifiable intangible assets, or which otherwise adversely affect their value or estimated lives, would adversely affect the Company's consolidated results of operations.

Bank-Owned Life Insurance: Bank-owned life insurance (BOLI) represents life insurance on the lives of certain retired employees who had provided positive consent allowing the Bank to be the beneficiary of such policies. Increases in the cash value of the policies, as well as insurance proceeds received in excess of the cash value, are recorded in other non-interest income, and are not subject to income taxes. The cash surrender value is included in other assets on the Company's consolidated balance sheet. The Company reviews the financial strength of the insurance carrier prior to the purchase of BOLI and annually thereafter.

Mortgage Servicing Rights: Mortgage servicing rights are recognized as separate assets when purchased or when retained in a sale of financial assets. Capitalized servicing rights are reported in other assets and are amortized into non-interest income in proportion to, and over the period of, the estimated future net servicing income of the underlying financial assets. Servicing assets are evaluated for impairment based upon the fair value of the rights as compared to amortized cost. Fair value is determined using prices for similar assets with similar characteristics, when available, or based upon discounted cash flows using market-based assumptions. Impairment is recognized through a valuation allowance to the extent that fair value is less than the carrying value of the rights.

Other Real Estate Owned: Real estate acquired in satisfaction of a loan is reported in other assets. Properties acquired by foreclosure or deed in lieu of foreclosure are transferred to other real estate owned and recorded at the lower of cost or fair market value less estimated costs to sell based on appraised value at the date actually or constructively received. Loan losses arising from the acquisition of such property are charged against the allowance for loan losses. Subsequent reductions in market value below the carrying value are charged to other operating expenses.

Derivative Financial Instruments: The Company recognizes all derivative instruments on the consolidated balance sheet at fair value. On the date the derivative instrument is entered into, the Company designates whether the derivative is part of a hedging relationship (i.e., cash flow or fair value hedge). The Company formally documents relationships between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking hedge transactions. The Company also assesses, both at the hedge's inception and on an ongoing basis, whether the derivatives used in hedging transactions are highly effective in offsetting the changes in cash flows or fair values of hedged items.

Changes in fair value of derivative instruments that are highly effective and qualify as a cash flow hedge are recorded in other comprehensive income or loss. Any ineffective portion is recorded in earnings. For fair value hedges that are highly effective, the gain or loss on the derivative and the loss or gain on the hedged item attributable to the hedged risk are both recognized in earnings, with the differences (if any) representing hedge ineffectiveness. The Company discontinues hedge accounting when it is determined that the derivative is no longer highly effective in offsetting changes of the hedged risk on the hedged item, or management determines that the designation of the derivative as a hedging instrument is no longer appropriate.

Off-Balance Sheet Financial Instruments: In the ordinary course of business the Company has entered into off-balance sheet financial instruments consisting of commitments to extend credit, and standby letters of credit. Such financial instruments are recorded in the financial statements when they are funded or related fees are incurred or received.

Stock Based Compensation: The Company has stock option plans, which are described more fully in Note 12. The Company expenses the grant date fair value of options granted. The expense is recognized over the vesting periods of the grants.

Accounting for Retirement Benefit Plans: The Company has non-qualified supplemental executive retirement agreements with certain retired officers. The agreements provide supplemental retirement benefits payable in installments over a period of years upon retirement or death. The Company recognized the net present value of payments associated with the agreements over the service periods of the participating officers. Interest costs continue to be recognized on the benefit obligations. The Company also has a supplemental executive retirement agreement with a certain current executive officer. This agreement provides a stream of future payments in accordance with individually defined vesting schedules upon retirement, termination, or in the event that the participating executive leaves the

Company following a change of control event. The Company recognizes the net present value of payments associated with these agreements over the service periods of the participating executive officers. Upon retirement, interest costs will continue to be recognized on the benefit obligation.

The Company recognizes the over-funded or under-funded status of postretirement benefit plans as an asset or liability on the balance sheet and recognizes changes in that funded status through other comprehensive income. Gains and losses, prior service costs and credits, and any remaining transition amounts that have not yet been recognized through net periodic benefit costs are recognized in accumulated other comprehensive income (loss), net of tax effects, until they are amortized as a component of net periodic cost. The measurement date, which is the date at which the benefit obligation and plan assets are measured, is the Company's fiscal year end.

Income Taxes: The Company uses the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. If current available information indicates that it is more likely than not that deferred tax assets will not be realized, a valuation allowance is established. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The Company performs an analysis of its tax positions and has not identified any uncertain tax positions for which tax benefits should not be recognized as of December 31, 2013. The Company's policy is to report interest and penalties, if any, related to unrecognized tax benefits in income tax expense in the consolidated statements of income.

The Company's income tax returns are currently open to audit under the statute of limitations by the Internal Revenue Service for the years ended December 31, 2010 through 2012.

Earnings Per Share: Basic earnings per share excludes dilution and is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflect the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the Company, such as the Company's dilutive stock options.

Segment Reporting: An operating segment is defined as a component of a business for which separate financial information is available that is evaluated regularly by the chief operating decision-maker in deciding how to allocate resources and evaluate performance. The Company has determined that its operations are solely in the community banking industry and include traditional community banking services, including lending activities, acceptance of demand, savings and time deposits, business services, investment management, trust and third-party brokerage services. These products and services have similar distribution methods, types of customers and regulatory responsibilities. Accordingly, disaggregated segment information is not presented in the notes to the consolidated financial statements.

Note 2: Business Combinations

On August 10, 2012, Bar Harbor Bank & Trust (the Bank), a wholly-owned first tier operating subsidiary of Bar Harbor Bankshares, completed its acquisition of the operations of the Border Trust Company (Border Trust), a state chartered bank headquartered in Augusta, Maine, by acquiring certain assets and assuming certain liabilities, including all deposits for a net purchase price of \$133. This transaction represented a strategic extension of the Company's franchise with three branch locations located in Kennebec and Sagadahoc counties.

The Company has determined that the acquisition of the net assets of Border Trust constituted a business combination as defined by the FASB ASC Topic 805, *Business Combinations*. Accordingly, the assets acquired and liabilities assumed were recorded at their fair values. Fair values were determined based on the requirements of FASB ASC Topic 820, *Fair Value Measurements*. In many cases, the determination of these fair values required management to make estimates about discount rates, future expected cash flows, market conditions and other future events that are highly subjective in nature and subject to change. These fair value estimates are subject to change for up to one year after the closing date of the transaction as additional information relative to closing date fair values becomes available. In addition, the tax treatment is complex and subject to interpretations that may result in future adjustments of deferred taxes as of the acquisition date.

The results of Border Trust's operations are included in the Consolidated Statements of Income from the date of acquisition. In connection with this transaction, the consideration paid, the assets acquired, and the liabilities assumed were recorded at fair value on the date of acquisition, as summarized in the following table.

Fair value of total consideration paid:	
Cash consideration paid at closing to Border Trust	\$ 133
Fair value of identifiable assets acquired:	
Cash and cash equivalents	\$ 1,330
Securities	3,537
Federal Home Loan Bank Common stock	770
Loans	33,606
Premises and equipment	563
Core deposit intangible	783
Other assets	540
Total identifiable assets acquired	41,129
Fair value of liabilities assumed:	
Deposits	38,520
Borrowings	3,776
Other liabilities	477
Total liabilities assumed	42,773
Fair value of net identifiable assets (liabilities) acquired	(1,644)

Goodwill resulting from transaction \$ 1,777

Goodwill of \$1,777 was recorded after adjusting for the fair value of net identifiable assets acquired. The goodwill from the acquisition represents the inherent long-term value anticipated from the synergies and business opportunities expected to be achieved as a result of the transaction. The core deposit intangible asset is being amortized over its estimated life, currently expected to be eight and one-half years.

Note 3: Securities Available For Sale

A summary of the amortized cost and market values of securities available for sale follows:

December 31, 2013		Gross	Gross	
	Amortized	Unrealized	Unrealized	Estimated
Available for Sale:	Cost	Gains	Losses	Fair Value
Mortgage-backed securities:				
US Government-sponsored enterprises	\$277,838	\$ 4,386	\$ 8,592	\$273,632
US Government agency	83,153	833	2,457	81,529
Private label	5,423	825	78	6,170
Obligations of states				
and political subdivisions thereof	95,221	1,121	7,503	88,839
Total	\$461,635	\$ 7,165	\$18,630	\$450,170
December 31, 2012		Gross	Gross	
	Amortized	Unrealized	Unrealized	Estimated
Available for Sale:	Cost	Gains	Losses	Fair Value
Mortgage-backed securities:				
US Government-sponsored enterprises	\$238,974	\$ 7,913	\$ 1,064	\$245,823
US Government agency	82,397	2,080	216	84,261
Private label	8,063	571	521	8,113
Obligations of states				
and political subdivisions thereof	76,335	4,040	532	79,843
Total	\$405,769	\$14,604	\$ 2,333	\$418,040

Securities Impairment: As a part of the Company's ongoing security monitoring process, the Company identifies securities in an unrealized loss position that could potentially be other-than-temporarily impaired.

For the year ended December 31, 2013, the Company recorded total OTTI losses of \$359 (before taxes), related to three, available for sale, 1-4 family, private-label MBS, all of which the Company had previously determined was other-than-temporarily impaired. Of the \$359 in total OTTI losses, \$249 (before taxes) represented estimated credit losses on the collateral underlying the securities, while \$110 (before taxes) represented unrealized losses for the same securities resulting from factors other than credit. The \$249 in estimated credit losses were recorded in earnings (before taxes) with the \$110 non-credit portion of the unrealized losses recorded within accumulated other comprehensive income (net of taxes). The additional credit losses principally reflected an increase in the future loss severity and constant default rate estimates resulting from still-recovering real estate markets, extended foreclosure and collateral liquidation timelines, and still-depressed economic conditions that affected the expected performance of the mortgage loans underlying these securities.

For the year ended December 31, 2012, the Company recorded total OTTI losses of \$1,170 (before taxes), related to fourteen, available for sale, 1-4 family, private-label MBS, all but two of which the Company had previously determined was other-than-temporarily impaired. Of the \$1,170 in total OTTI losses, \$853 (before taxes) represented estimated credit losses on the collateral underlying the securities, while \$317 (before taxes) represented unrealized losses for the same securities resulting from factors other than credit. The \$853 in estimated credit losses were recorded in earnings (before taxes) with the \$317 non-credit portion of the unrealized losses recorded within accumulated other comprehensive income (net of taxes). The additional credit losses principally reflected an increase in the future loss severity and constant default rate estimates resulting from depressed real estate markets, extended foreclosure and collateral liquidation timelines, and depressed economic conditions that affected the expected performance of the mortgage loans underlying these securities.

The OTTI losses recognized in earnings represented management's best estimate of credit losses inherent in the securities based on discounted, bond-specific future cash flow projections using assumptions about cash flows associated with the pools of loans underlying each security. In estimating those cash flows the Company considered loan level credit characteristics, current delinquency and non-performing loan rates, current levels of subordination and credit support, recent default rates and future constant default rate estimates, loan to collateral value ratios, recent collateral loss severities and future collateral loss severity estimates, recent prepayment rates and future prepayment rate assumptions, and other estimates of future collateral performance.

Despite elevated levels of delinquencies, defaults and losses in the underlying residential mortgage loan collateral, given credit enhancements resulting from the structures of the individual securities, the Company currently expects that as of December 31, 2013 it will recover the amortized cost basis of its private-label mortgage-backed securities and has therefore concluded that such securities were not other-than-temporarily impaired as of that date. Nevertheless, given future market conditions, it is possible that adverse changes in repayment performance and fair value could occur in future periods that could impact the Company's current best estimates.

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

The following table displays the beginning balance of OTTI related to historical credit losses on debt securities held by the Company at the beginning of the current reporting period as well as changes in estimated credit losses recognized in pre-tax earnings for the three years ended December 31, 2013.

	2013	2012	2011
Estimated credit losses as of prior year-end,	\$5,131	\$4,697	\$3,373
Additions for credit losses for securities on which			
OTTI has been previously recognized	249	682	1,757
Additions for credit losses for securities on which			
OTTI has not been previously recognized	---	171	462
Reductions for securities paid off during the period	691	419	895
Estimated credit losses as of December 31,	\$4,689	\$5,131	\$4,697

Upon initial impairment of a security, total OTTI losses represent the excess of the amortized cost over the fair value. For subsequent impairments of the same security, total OTTI losses represent additional credit losses and or declines in fair value subsequent to the previously recorded OTTI losses, if applicable. Unrealized OTTI losses recognized in accumulated other comprehensive income (OCI) represent the non-credit component of OTTI losses on debt securities. Net impairment losses recognized in earnings represent the credit component of OTTI losses on debt securities.

As of December 31, 2013, the Company held fourteen private-label MBS (debt securities) with a total amortized cost (i.e. carrying value) of \$2,681 where OTTI losses have been historically recognized in pre-tax earnings (dating back to the fourth quarter of 2008). For twelve of these securities, the Company previously recognized credit losses in excess of the unrealized losses in accumulated OCI, creating an unrealized gain of \$519, net of tax, as included in accumulated OCI as of December 31, 2013. For the remaining two securities, the total OTTI losses included in accumulated OCI amounted to \$30 net of tax, as of December 31, 2013. As of December 31, 2013, the total net unrealized gains included in accumulated OCI for securities held where OTTI has been historically recognized in pre-tax earnings amounted to \$488, net of tax, compared with net unrealized gains of \$144, net of tax, at December 31, 2012.

As of December 31, 2013, based on a review of the remaining securities in the securities portfolio, the Company concluded that it expects to recover its amortized cost basis for such securities. This conclusion was based on the issuers continued satisfaction of the securities obligations in accordance with their contractual terms and the expectation that they will continue to do so through the maturity of the security, the expectation that the Company will receive the entire amount of future contractual cash flows, as well as the evaluation of the fundamentals of the issuers financial condition and other objective evidence. Accordingly, the Company concluded that the declines in the values of those securities were temporary and that any additional other-than-temporary impairment charges were not appropriate at December 31, 2013. As of that date, the Company did not intend to sell nor anticipated that it would more-likely-than-not that it would be required to sell any of its impaired securities, that is, where fair value is less than the cost basis of the security.

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

The following tables summarize the fair value of securities with continuous unrealized losses for less than 12 months and those that have been in a continuous unrealized loss position for 12 months or longer as of December 31, 2013 and 2012. All securities referenced are debt securities. At December 31, 2013 and 2012, the Company did not hold any common stock or other equity securities in its securities portfolio.

Description of Securities:	Less than 12 months			12 months or longer			Total		
	Estimated			Estimated			Estimated		
	Fair Value	Number of Investments	Unrealized Losses	Fair Value	Number of Investments	Unrealized Losses	Fair Value	Number of Investments	Unrealized Losses

For securities with unrealized losses, the following information was considered in determining that the impairments were not other-than-temporary:

Mortgage-backed securities issued by U.S. Government-sponsored enterprises: As of December 31, 2013, the total unrealized losses on these securities amounted to \$8,592, compared with \$1,064 at December 31, 2012. All of these securities were credit rated AA+ by the major credit rating agencies. Company management believes these securities have minimal credit risk, as these enterprises play a vital role in the nation's financial markets. Management's analysis indicates that the unrealized losses at December 31, 2013 were attributed to changes in current market yields and pricing spreads for similar securities since the date the underlying securities were purchased, and does not consider these securities to be other-than-temporarily impaired at December 31, 2013.

Mortgage-backed securities issued by U.S. Government agencies: As of December 31, 2013, the total unrealized losses on these securities amounted to \$2,457, compared with \$216 at December 31, 2012. All of these securities were credit rated AA+ by the major credit rating agencies. Management's analysis indicates that these securities bear little or no credit risk because they are backed by the full faith and credit of the United States. The Company attributes the unrealized losses at December 31, 2013 to changes in current market yields and pricing spreads for similar securities since the date the underlying securities were purchased, and does not consider these securities to be other-than-temporarily impaired at December 31, 2013.

Private-label mortgage-backed securities: As of December 31, 2013, the total unrealized losses on the Bank's private-label mortgage-backed securities amounted to \$78, compared with \$521 at December 31, 2012. The Company attributes the unrealized losses at December 31, 2013 to the current illiquid market for non-agency mortgage-backed securities, a still-recovering housing market, risk-related market pricing discounts for non-agency mortgage-backed securities and credit rating downgrades on certain private-label MBS owned by the Company. Based upon the foregoing considerations, and the expectation that the Company will receive all of the future contractual cash flows related to the amortized cost on these securities, the Company does not consider there to be any additional other-than-temporary impairment with respect to these securities at December 31, 2013.

Obligations of states of the U.S. and political subdivisions thereof: As of December 31, 2013, the total unrealized losses on the Bank's municipal securities amounted to \$7,503, compared with \$532 at December 31, 2012. The Bank's municipal securities primarily consist of general obligation bonds and to a lesser extent, revenue bonds. General obligation bonds carry less risk, as they are supported by the full faith, credit and taxing authority of the issuing government and in the cases of school districts, are additionally supported by state aid. Revenue bonds are generally backed by municipal revenue streams generated through user fees or lease payments associated with specific municipal projects that have been financed.

Municipal bonds are frequently supported with insurance, which guarantees that in the event the issuer experiences financial problems, the insurer will step in and assume payment of both principal and interest. Historically, insurance support has strengthened an issuer's underlying credit rating to AAA or AA status. Starting in 2008 and continuing through 2013, many of the insurance companies providing municipal bond insurance experienced financial difficulties and, accordingly, were downgraded by at least one of the major credit rating agencies. Consequently, since 2008 a portion of the Bank's municipal bond portfolio was downgraded by at least one of the major credit rating agencies. Notwithstanding the credit rating downgrades, at December 31, 2013, the Bank's municipal bond portfolio did not contain any below investment grade securities as reported by major credit rating agencies. In addition, at December 31, 2013 all municipal bond issuers were current on contractually obligated interest and principal payments.

The Company attributes the unrealized losses at December 31, 2013 to changes in credit ratings on certain securities and resulting changes in prevailing market yields and pricing spreads since the date the underlying securities were purchased. The Company also attributes the unrealized losses to ongoing media attention and market concerns about the prolonged recovery from the national economic recession and the impact it might have on the future financial stability of municipalities throughout the country. Accordingly, the Company does not consider these municipal securities to be other-than-temporarily impaired at December 31, 2013.

At December 31, 2013, the Company had no intent to sell nor believed it is more-likely-than-not that it would be required to sell any of its impaired securities as identified and discussed immediately above, and therefore did not consider these securities to be other-than-temporarily impaired as of that date.

Maturity Distribution: The following table summarizes the maturity distribution of the amortized cost and estimated fair value of securities available for sale as of December 31, 2013.

Securities Available for Sale	Amortized Cost	Estimated Fair Value
Due one year or less	\$ ---	\$ ---
Due after one year through five years	4,360	4,450

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

Due after five years through ten years	20,080	20,625
Due after ten years	437,195	425,095
Total	\$461,635	\$450,170

Actual maturities may differ from the final contractual maturities depicted above because of securities call or prepayment provisions with or without call or prepayment penalties. The contractual maturity of mortgage-backed securities is not a reliable indicator of their expected life because borrowers have the right to prepay their obligations at any time. Monthly pay downs on mortgage-backed securities cause the average lives of the securities to be much different than their stated lives. Mortgage-backed securities are allocated among the maturity groupings based on their final maturity dates.

Realized Securities Gains and Losses:

The following table summarizes realized gains and losses and other than temporary impairment losses on securities available for sale for the years ended December 31, 2013, 2012 and 2011.

	Proceeds from			Other Than	
	Sale of Securities	Realized	Realized	Temporary	
	Available for Sale	Gains	Losses	Impairment Losses	Net
2013	\$17,234	\$ 684	(\$ 8)	\$ 249	\$ 427
2012	\$39,304	\$1,963	(\$25)	\$ 853	\$1,085
2011	\$48,468	\$2,689	\$ ---	\$2,219	\$ 470

Note 4: Loans and Allowance for Loan Losses

The Company's lending activities are principally conducted in downeast, midcoast and central Maine. The following table summarizes the composition of the loan portfolio as of December 31, 2013 and 2012:

LOAN PORTFOLIO SUMMARY

	2013	2012
Commercial real estate mortgages	\$336,542	\$324,493
Commercial and industrial	73,972	59,373
Commercial construction and land development	18,129	22,120
Agricultural and other loans to farmers	26,929	24,922
Total commercial loans	455,572	430,908
Residential real estate mortgages	317,115	297,103
Home equity loans	49,565	53,303
Other consumer loans	14,523	19,001
Total consumer loans	381,203	369,407
Tax exempt loans	16,355	15,244
Net deferred loan costs and fees	(273)	(555)
Total loans	852,857	815,004
Allowance for loan losses	(8,475)	(8,097)
Total loans net of allowance for loan losses	\$844,382	\$806,907

Loan Origination/Risk Management: The Company has certain lending policies and procedures in place that are designed to maximize loan income within an acceptable level of risk. The Company's Board of Directors reviews and approves these policies and procedures on a regular basis. A reporting system supplements the review process by providing management and the board with frequent reports related to loan production, loan quality, concentrations of credit, loan delinquencies and non-performing loans and potential problem loans. The Company seeks to diversify the loan portfolio as a means of managing risk associated with fluctuations in economic conditions.

Commercial Real Estate Mortgages: The Bank's commercial real estate mortgage loans are collateralized by liens on real estate, typically have variable interest rates (or five year or less fixed rates) and amortize over a 15 to 20 year period. These loans are underwritten primarily as cash flow loans and secondarily as loans secured by real estate. Payments on loans secured by such properties are largely dependent on the successful operation of the property securing the loan or the business conducted on the property securing the loan. Accordingly, repayment of these loans may be subject to adverse economic conditions to a greater extent than other types of loans. The Company seeks to minimize these risks in a variety of ways, including giving careful consideration to the property's operating history, future operating projections, current and projected occupancy, location and physical condition in connection with underwriting these loans. The underwriting analysis also includes credit verification, analysis of global cash flows, appraisals and a review of the financial condition of the borrower. Reflecting the Bank's business region, at December 31, 2013, approximately 32.6% of the commercial real estate mortgage portfolio was represented by loans to the lodging industry. The Bank underwrites lodging industry loans as operating businesses, lending primarily to seasonal establishments with stabilized cash flows.

Commercial and Industrial Loans: Commercial and industrial loans are underwritten after evaluating and understanding the borrower's ability to operate profitably, and prudently expand its business. Commercial and industrial loans are primarily made in the Bank's market areas and are underwritten on the basis of the borrower's ability to service the debt from income. As a general practice, the Bank takes as collateral a lien on any available real estate, equipment or other assets owned by the borrower and obtains a personal guaranty of the borrower or principal. Working capital loans are primarily collateralized by short-term assets whereas term loans are primarily collateralized by long-term assets. In general, commercial and industrial loans involve more credit risk than residential mortgage loans and commercial mortgage loans and, therefore, usually yield a higher return. The increased risk in commercial and industrial loans is principally due to the type of collateral securing these loans. The increased risk also derives from the expectation that commercial and industrial loans generally will be serviced principally from the operations of the business, and, if not successful, these loans are primarily secured by tangible, non-real estate collateral. As a result of these additional complexities, variables and risks, commercial and industrial loans generally require more thorough underwriting and servicing than other types of loans.

Construction and Land Development Loans: The Company makes loans to finance the construction of residential and, to a lesser extent, non-residential properties. Construction loans generally are collateralized by first liens on real estate. The Company conducts periodic inspections, either directly or through an agent, prior to approval of periodic draws on these loans. Underwriting guidelines similar to those described immediately above are also used in the

Company's construction lending activities. Construction loans involve additional risks attributable to the fact that loan funds are advanced against a project under construction and the project is of uncertain value prior to its completion. Because of uncertainties inherent in estimating construction costs, the market value of the completed project and the effects of governmental regulation on real property, it can be difficult to accurately evaluate the total funds required to complete a project and the related loan to value ratio. As a result of these uncertainties, construction lending often involves the disbursement of substantial funds with repayment dependent, in part, on the success of the ultimate project rather than the ability of a borrower or guarantor to repay the loan. In many cases the success of the project can also depend upon the financial support/strength of the sponsorship. If the Company is forced to foreclose on a project prior to completion, there is no assurance that the Company will be able to recover the entire unpaid portion of the loan. In addition, the Company may be required to fund additional amounts to complete a project and may have to hold the property for an indeterminate period of time. While the Company has underwriting procedures designed to identify what it believes to be acceptable levels of risks in construction lending, no assurance can be given that these procedures will prevent losses from the risks described above.

Residential Real Estate Mortgages: The Company originates first-lien, adjustable-rate and fixed-rate, one-to-four-family residential real estate loans for the construction, purchase or refinancing of a single family residential property. These loans are principally collateralized by owner-occupied properties, and are amortized over 10 to 30 years. From time to time the Company will sell longer-term, low rate, residential mortgage loans to the Federal Home Loan Mortgage Corporation (FHLMC) with servicing rights retained. This practice allows the Company to better manage interest rate risk and liquidity risk. In an effort to manage risk of loss and strengthen secondary market liquidity opportunities, management typically uses secondary market underwriting, appraisal, and servicing guidelines for all loans, including those held in its portfolio. Loans on one-to-four-family residential real estate are mostly originated in amounts of no more than 80% of appraised value or have private mortgage insurance. Mortgage title insurance and hazard insurance are required. Construction loans have a unique risk, because they are secured by an incomplete dwelling. This risk is reduced through more stringent underwriting standards, including regular inspections throughout the construction period.

Home Equity Loans: The Company originates home equity lines of credit and second mortgage loans (loans which are secured by a junior lien position on one-to-four-family residential real estate). These loans carry a higher risk than first mortgage residential loans as they are in a second position relating to collateral. Risk is reduced through underwriting criteria, which include credit verification, appraisals and evaluations, a review of the borrower's financial condition, and personal cash flows. A security interest, with title insurance when necessary, is taken in the underlying real estate.

Troubled Debt Restructures: A Troubled Debt Restructure (TDR) results from a modification to a loan to a borrower who is experiencing financial difficulty in which the Bank grants a concession to the debtor that it would not otherwise consider but for the debtor's financial difficulties. Financial difficulty arises when a debtor is bankrupt or contractually past due, or is likely to become so, based upon its ability to pay. A concession represents an accommodation not generally available to other customers, including a below-market interest rate, deferment of principal payments, extension of maturity dates, etc. Such accommodations extended to customers who are not experiencing financial difficulty do not result in TDR classification.

As of December 31, 2013, the Bank had six real estate secured, six commercial and industrial loans, and one other consumer loan, to eight relationships totaling \$1,454 that were classified as TDRs. At December 31, 2013, seven TDRs totaling \$416 were past due or classified as non-performing.

As of December 31, 2012, the Bank had four real estate secured and three commercial and industrial loans to four relationships totaling \$934 that were classified as TDRs. At December 31, 2012, three TDRs totaling \$114 were past due or classified as non-performing.

As of December 31, 2011, the Bank had four real estate secured loans totaling \$913 that were classified as TDRs, of which one in the amount of \$82 was past due and classified as non-performing.

Summary information pertaining to the TDRs granted during the years ended December 31, 2013 and 2012 follows:

	For the Twelve Months Ended			For the Twelve Months Ended		
	Number of Loans	December 31, 2013		Number of Loans	December 31, 2012

Total	\$3,199	\$1,177	\$7,182	\$11,558	\$804,001	\$815,559	\$9,632	\$235

At December 31, 2013, total other real estate owned amounted to \$1,625 compared with \$2,780 and \$2,699 at December 31, 2012 and 2011.

At December 31, 2013, the Company had no firm commitments to lend additional funds to borrowers with loans in non-accrual status.

Impaired Loans: Impaired loans are all commercial loans for which the Company believes it is probable that it will be unable to collect all amounts due according to the contractual terms of the loan agreement, as well as all loans modified into a troubled debt restructure, if any. Allowances for losses on impaired loans are determined by the lower of the present value of the expected cash flows related to the loan, using the original contractual interest rate, and its recorded value, or in the case of collateral dependent loans, the lower of the fair value of the collateral, less estimated costs to dispose, and the recorded amount of the loans. When foreclosure is probable, impairment is measured based on the fair value of the collateral less estimated costs to sell.

Details of impaired loans as of December 31, 2013 and December 31, 2012 follows:

Credit Quality Indicators/Classified Loans: In monitoring the credit quality of the portfolio, management applies a credit quality indicator to all categories of commercial loans. These credit quality indicators range from one through nine, with a higher number correlating to increasing risk of loss. These ratings are used as inputs to the calculation of the allowance for loan losses. Loans rated one through five are consistent with the regulators' Pass ratings, and are generally allocated a lesser percentage allocation in the allowance for loan losses than loans rated from six through nine.

Consistent with regulatory guidelines, the Bank provides for the classification of loans which are considered to be of lesser quality as substandard, doubtful, or loss. The Bank considers a loan substandard if it is inadequately protected by the current net worth and paying capacity of the borrower or of the collateral pledged, if any. Substandard loans have a well defined weakness that jeopardizes liquidation of the debt. Substandard loans include those loans where there is the distinct possibility of some loss of principal, if the deficiencies are not corrected.

Loans that the Bank classifies as doubtful have all of the weaknesses inherent in those loans that are classified as substandard but also have the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. The possibility of loss is high but because of certain important and reasonably specific pending factors which may work to the advantage and strengthening of the loan, its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include proposed merger, acquisition, or liquidation procedures, capital injection, perfecting liens on additional collateral and refinancing plans. The entire amount of the loan might not be classified as doubtful when collection of a specific portion appears highly probable. Loans are generally not classified doubtful for an extended period of time (i.e., over a year).

Loans that the Bank classifies as loss are those considered uncollectible and of such little value that their continuance as an asset is not warranted and the uncollectible amounts are charged off. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this basically worthless asset even though partial recovery may be affected in the future. Losses are taken in the period in which they surface as uncollectible.

Loans that do not expose the Bank to risk sufficient to warrant classification in one of the aforementioned categories, but which possess some weaknesses, are designated special mention. A special mention loan has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or in the institution's credit position at some future date. This might include loans which the lending officer may be unable to supervise properly because of: lack of expertise, inadequate loan agreement, the poor condition of or lack of control over collateral, failure to obtain proper documentation or any other deviations from prudent lending practices. Economic or market conditions which may, in the future, affect the obligor may warrant special mention of the asset. Loans for which an adverse trend in the borrower's operations or an imbalanced position in the balance sheet which has not reached a point where the liquidation is jeopardized may be included in this classification. Special mention assets are not adversely classified and do not expose an institution to sufficient risks to warrant classification.

The following tables summarize the commercial loan portfolio as of December 31, 2013 and December 31, 2012, by credit quality indicator. Credit quality indicators are reassessed for each applicable commercial loan at least annually, or upon receipt and analysis of the borrower's financial statements, when applicable. Consumer loans, which principally consist of residential mortgage loans, are not rated, but are evaluated for credit quality after origination based on delinquency status (see past due loan aging table above).

Allowance for Loan Losses: The allowance for loan losses (the allowance) is a reserve established through a provision for loan losses (the provision) charged to expense, which represents management's best estimate of probable losses inherent within the existing portfolio of loans. The allowance, in the judgment of management, is necessary to provide for estimated loan losses and risks inherent in the loan portfolio. The Company's allowance for loan loss methodology includes allowance allocations calculated in accordance with ASC Topic 310, Receivables and allowance allocations calculated in accordance with ASC Topic 450, Contingencies. Accordingly, the methodology is based on historical loss experience by type of credit and internal risk grade, specific homogeneous risk pools and specific loss allocations, with adjustments for current events and conditions. The Company's process for determining the appropriate level of the allowance is designed to account for credit deterioration as it occurs. The provision reflects loan quality trends, including the levels of and trends related to non-accrual loans, past due loans, potential problem loans, criticized loans and net charge-offs or recoveries, among other factors. The provision also reflects the totality of actions taken on all loans for a particular period. In other words, the amount of the provision reflects not only the necessary increases in the allowance related to newly identified criticized loans, but it also reflects actions taken related to other loans including, among other things, any necessary increases or decreases in required allowances for specific loans or loan pools.

The level of the allowance reflects management's continuing evaluation of industry concentrations, specific credit risks, loan loss experience, current loan portfolio quality, present economic, political and regulatory conditions and unidentified losses inherent in the current loan portfolio. While management utilizes its best judgment and information available, the ultimate adequacy of the allowance is dependent upon a variety of factors beyond the Company's control, including, among other things, the performance of the Company's loan portfolio, the economy, changes in interest rates and the view of the regulatory authorities toward loan classifications.

The Company's allowance for loan losses consists of three principal elements: (i) specific valuation allowances determined in accordance with ASC Topic 310 based on probable losses on specific loans; (ii) historical valuation allowances determined in accordance with ASC Topic 450 based on historical loan loss experience for similar loans with similar characteristics and trends, adjusted, as necessary, to reflect the impact of current conditions; and (iii) general valuation allowances determined in accordance with ASC Topic 450 based on general economic conditions and other qualitative risk factors both internal and external to the Company.

The allowances established for probable losses on specific loans are based on a regular analysis and evaluation of problem loans. Loans are classified based on an internal credit risk grading process that evaluates, among other things: (i) the obligor's ability to repay; (ii) the underlying collateral, if any; and (iii) the economic environment and industry in which the borrower operates. This analysis is performed at the relationship level for all commercial loans. When a loan has a classification of seven or higher, the Company analyzes the loan to determine whether the loan is impaired and, if impaired, the need to specifically allocate a portion of the allowance to the loan. Specific valuation allowances are determined by analyzing the borrower's ability to repay amounts owed, collateral deficiencies, the relative risk grade of the loan and economic conditions affecting the borrower's industry, among other observable considerations.

Historical valuation allowances are calculated based on the historical loss experience of specific types of loans and the internal risk grade of such loans at the time they were charged-off. The Company calculates historical loss ratios for pools of similar loans with similar characteristics based on the proportion of actual charge-offs experienced to the total population of loans in the pool. The historical loss ratios are reviewed quarterly based on actual charge-off experience. A historical valuation allowance is established for each pool of similar loans based upon the product of the historical loss ratio and the total dollar amount of the loans in the pool, net of any loans for which reserves are already established. The Company's pools of similar loans include similarly risk-graded groups of, commercial real estate loans, commercial and industrial loans, consumer real estate loans and consumer and other loans.

General valuation allowances are based on general economic conditions and other qualitative risk factors both internal and external to the Company. In general, such valuation allowances are determined by evaluating, among other things: (i) the experience, ability and effectiveness of the Bank's lending management and staff; (ii) the effectiveness of the Bank's loan policies, procedures and internal controls; (iii) changes in asset quality; (iv) changes in loan portfolio volume; (v) the composition and concentrations of credit; (vi) the impact of competition on loan structuring and pricing; (vii) the effectiveness of the internal loan review function; (viii) the impact of environmental risks on portfolio risks; and (ix) the impact of rising interest rates on portfolio risk. Management evaluates the degree of risk that each one of these components has on the quality of the loan portfolio on a quarterly basis. The results are then used to determine an appropriate general valuation allowance.

Loans identified as losses by management, internal loan review and/or bank examiners, are charged-off. Furthermore, consumer loan accounts are charged-off based on regulatory requirements.

The following tables detail activity in the allowance for loan losses by portfolio segment for the years ended December 31, 2013, 2012, and 2011. The tables also provide details regarding the Company's recorded investment in loans related to each balance in the allowance for loan losses by portfolio segment and disaggregated on the basis of the Company's impairment methodology. Allocation of a portion of the Allowance to one category of loans does not preclude its availability to absorb losses in other categories.

Loan Concentrations: Because of the Company's proximity to Acadia National Park, a large part of the economic activity in the Bank's area is generated from the lodging and hospitality business associated with tourism. At December 31, 2013 and 2012, loans to the lodging and hospitality industry amounted to approximately \$114,982 and \$105,699, respectively.

Loans to Related Parties: In the ordinary course of business, the Bank has made loans at prevailing rates and terms to directors, officers and other related parties. In management's opinion, such loans do not present more than the normal risk of collectability or incorporate other unfavorable features, and were made under terms that are consistent with the Bank's lending policies.

Loan to related parties at December 31 are summarized below. Balances have been adjusted to reflect changes in status of directors and officers for each year presented.

	2013	2012
Beginning balance	\$ 2,491	\$ 3,077
Changes in composition	203	---
New loans	1,017	779
Less: repayments	(377)	(1,365)
Ending balance	\$ 3,334	\$ 2,491

As of December 31, 2013, and 2012, there were no past due or non-performing loans to related parties.

Note 5: Premises and Equipment

The detail of premises and equipment as of December 31 follows:

	2013	2012
Land	\$ 2,474	\$ 2,474

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

Buildings and improvements	22,924	21,486
Furniture and equipment	7,586	7,319
Less: accumulated depreciation	(12,839)	(12,024)
Total	\$ 20,145	\$ 19,255

Depreciation expense amounted to \$1,504, \$1,292 and \$1,180 in 2013, 2012 and 2011, respectively.

Note 6: Goodwill and Other Intangible Assets

Goodwill totaled \$4,935 at December 31, 2013 and 2012, respectively. In the third quarter of 2012, the Company recorded \$1,777 of goodwill in connection with the Bank's acquisition of substantially all of the assets and the assumption of certain liabilities including all deposits of the Border Trust Company. At December 31, 2013, the Company concluded that it is not more-likely-than-not that the fair value of the reporting unit is less than its carrying value, and goodwill is not considered impaired.

Core Deposit Intangible Asset: The Company has a finite-lived intangible asset capitalized on its consolidated balance sheet in the form of a core deposit intangible asset related to the Border Trust Company transaction. The core deposit intangible is being amortized over an estimated useful life of eight and one-half years and is included in other assets on the Company's consolidated balance sheet. At December 31, 2013, the balance of the core deposit intangible asset amounted to \$655.

	December 31,	December 31,
(in thousands)	2013	2012
Core deposit intangibles:		
Gross carrying amount	\$783	\$783
Less: accumulated amortization	128	36
Net carrying amount	\$655	\$747

Amortization expense on the finite-lived intangible assets is expected to total \$92 for each year from 2014 through 2020, then \$11 for 2021.

Note 7: Income Taxes

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

The following table summarizes the current and deferred components of income tax expense (benefit) for each of the three years ended December 31:

	2013	2012	2011
Current			
Federal	\$5,060	\$4,867	\$4,763
State	242	160	176
	5,302	5,027	4,939
Deferred	(111)	(83)	(477)
	\$5,191	\$4,944	\$4,462

The following table reconciles the expected federal income tax expense (computed by applying the federal statutory tax rate of 35%) to recorded income tax expense, for each of the three years ended December 31:

	2013	2012	2011
Computed tax expense	\$6,431	\$6,093	\$5,427
Increase (reduction) in income			
taxes resulting from:			
Officers' life insurance	(82)	(84)	(88)
Tax exempt interest	(1,199)	(1,119)	(1,015)
State taxes, net of federal benefit	157	104	114
Other	(115)	(50)	24
	\$5,191	\$4,944	\$4,462

The tax effects of temporary differences that give rise to deferred tax assets and deferred tax liabilities at December 31, 2013 and 2012 are summarized below. The net deferred tax asset, which is included in other assets, amounted to \$8,609 at December 31, 2013 and \$442 at December 31, 2012.

	2013		2012	
	Asset	Liability	Asset	Liability
Allowance for losses on loans and other real estate owned	\$3,007	\$ ---	\$2,869	\$ ---
Deferred compensation	1,074	---	1,071	---
Unrealized gain or loss on securities available for sale	3,898	---	---	4,173
Unfunded retirement benefits	192	---	207	---
Depreciation	---	713	---	707
Deferred loan origination costs	---	475	---	483
Other real estate owned	159	---	83	---
Non-accrual interest	145	---	124	---
Write down of impaired investments	1,641	---	1,796	---
	---	357	---	249

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

Branch acquisition costs and goodwill

Prepaid expenses	---	235	---	168
Other	284	11	380	308
	\$10,400	\$1,791	\$6,530	\$6,088

The Company has determined that a valuation allowance is not required for its net deferred tax asset since it is more likely than not that this asset is realizable principally through the ability to carry-back to taxable income in prior years, future reversals of existing taxable temporary differences, and future taxable income.

Note 8: Deposits

The aggregate amount of jumbo time deposits, each with a minimum denomination of \$100, was \$152,321 and \$130,614 at December 31, 2013 and 2012, respectively. At December 31, 2013, the scheduled maturities of jumbo certificates of deposit were as follows:

Three months or less	\$ 30,632
Over three to six months	40,629
Over six to twelve months	44,349
Over twelve months	36,711
Total	\$152,321

At December 31, 2013, the scheduled maturities of total time deposits were as follows:

2014	\$237,234
2015	63,466
2016	26,293
2017	26,254
2018	42,121
2019 & thereafter	220
Total	\$395,588

Note 9: Short-term Borrowings

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

The Company's short-term borrowings consist of borrowings from the Federal Home Loan Bank (the "FHLB"), and securities sold under agreements to repurchase. The following table summarizes short-term borrowings at December 31, 2013 and 2012.

	2013		2012	
	Weighted		Weighted	
	Total	Average	Total	Average
	Principal	Rate	Principal	Rate
Federal Home Loan Bank Advances	\$292,690	0.78%	\$203,441	0.99%
Securities sold under agreements to repurchase	20,255	0.29%	20,636	0.32%
Total short-term borrowings	\$312,945		\$224,077	

Federal Home Loan Bank Borrowings: Information concerning short-term Federal Home Loan Bank borrowings for 2013 and 2012 is summarized below:

	2013	2012
Average daily balance during the year	\$ 238,234	\$182,134
Maximum month-end balance during the year	\$ 292,690	\$206,535
Amount outstanding at end of year	\$ 292,690	\$203,441

All short-term FHLB advances are fixed-rate instruments. Pursuant to an agreement with the FHLB, advances are collateralized by stock in the FHLB, investment securities and a blanket lien on qualified collateral, consisting primarily of loans with first mortgages secured by one to four family properties, and other qualifying assets such as certain commercial real estate loans. All short-term advances are payable at their call date or final maturity.

Securities Sold Under Agreements to Repurchase: Securities sold under agreements to repurchase generally mature within one to four days from the transaction date. Information concerning securities sold under agreements to repurchase for 2013, 2012 and 2011 is summarized below:

	2013	2012	2011
Average daily balance during the year	\$16,924	\$17,946	\$17,221
Average interest rate during the year	0.29%	0.32%	0.55%
Maximum month-end balance during the year	\$21,376	\$23,242	\$21,878
Amount outstanding at end of year	\$20,255	\$20,636	\$21,878

Securities collateralizing repurchase agreements, which are held in safekeeping by nonaffiliated financial institutions and not under the Bank's control, were as follows at December 31:

	2013	2012	2011
Carrying value	\$35,286	\$36,661	\$38,716
Estimated fair value	\$35,569	\$38,227	\$40,262

Note 10: Long-term Debt

A summary of long-term debt by contractual maturity is as follows:

Maturity	December 31, 2013			Range of	
	Total Principal	Rate		Interest Rates	
2015	\$ 21,000	2.44%	1.68%	to	4.70%
2016	11,000	1.60%	1.17%	to	2.29%
2017	52,500	1.74%	-0.22%	to	4.50%
2018	7,000	1.50%	1.15%	to	2.25%
2019 and thereafter	---	---	---	to	---
Total long-term debt	\$ 91,500	1.86%			

Maturity	December 31, 2012			Range of	
	Total Principal	Rate		Interest Rates	
2014	\$ 53,990	3.24%	2.73%	to	4.80%
2015	21,000	2.44%	1.68%	to	4.70%
2016	11,000	1.60%	1.17%	to	2.29%
2017	52,500	1.76%	-0.15%	to	4.50%
2018 and thereafter	4,000	1.75%	1.25%	to	2.25%
Total long-term debt	\$142,490				

All of the long-term debt represents advances from the FHLB. All FHLB advances are fixed-rate instruments. Pursuant to an agreement with the FHLB, advances are collateralized by stock in the FHLB, investment securities and a blanket lien on qualified collateral, consisting primarily of loans with first mortgages secured by one to four family

properties, and other qualifying assets such as qualifying commercial real estate loans. Advances are payable at their call dates or final maturity.

The maturity distribution of the long-term debt with callable features was as follows:

December 31, 2013						
	Total	Weighted	Range of			
	Principal	Average	Interest Rates			
		Rate				
2015	\$ 2,000	4.35%	3.99%	to		4.70%
2016	---	---	0.00%	to		0.00%
2017	28,000	2.17%	-0.22%	to		4.50%
2018	2,000	2.25%	2.25%	to		2.25%
2019 and thereafter	---		0.00%	to		0.00%
Total long-term borrowings	\$32,000	2.31%				

December 31, 2012						
	Total	Weighted	Range of			
Maturity	Principal	Average	Interest Rates			
		Rate				
2014	\$ 12,000	4.11%	3.35%	to		4.80%
2015	2,000	4.35%	3.99%	to		4.70%
2016	---	0.00%	0.00%	to		0.00%
2017	28,000	2.21%	-0.15%	to		4.50%
2018 and thereafter	2,000	2.25%	2.25%	to		2.25%
Total	\$ 44,000					

At December 31, 2013, and 2012, the Company had \$19,000 and \$31,000 of long-term debt that was currently callable, respectively. The remaining callable debt has call dates ranging from May 2014 to October 2014.

Junior Subordinated Debentures: In April 2008, the Company's wholly-owned subsidiary, Bar Harbor Bank & Trust (the Bank), issued \$5,000 aggregate principal amount of subordinated debentures. These debt securities qualify as Tier 2 capital for the Company and the Bank. The subordinated debt securities are due in 2023, but are callable by the Bank after five years without penalty. The rate of interest on these debt securities is three month LIBOR plus 345 basis points. The subordinated debt securities are classified as borrowings on the Company's consolidated balance sheet. The Company incurred \$197 in costs to issue the securities and these costs are being amortized over 15 years

using the interest method.

Note 11: Shareholders' Equity

Regulatory Capital Requirements: The Company and Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's financial statements. Under capital adequacy guidelines and the regulatory frameworks for prompt corrective action, the Company and Bank must meet specific capital guidelines that involve quantitative measures of the Company's and

Bank's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Company's and Bank's capital amounts and classification are also subject to qualitative judgment by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier I capital to risk-weighted assets and average assets. As of December 31, 2013, the Company and the Bank exceeded all capital adequacy requirements to which they are subject. As of December 31, 2013, the most recent notification from the federal regulators categorized the Bank as well-capitalized. To be categorized as well-capitalized, the Company and Bank must maintain minimum Total risk-based, Tier I risk-based, and Tier I leverage ratios as set forth in the following table. There are no conditions or events since that notification that management believes have changed the Bank's or the Company's category.

The following table sets forth the Company's and the Bank's regulatory capital at December 31, 2013, under the rules applicable at that date.

	Consolidated Actual		Adequacy Purposes Required		To be well Capitalized Under Prompt Corrective Action Provisions Required	
			Amount	Ratio	Amount	Ratio
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of December 31, 2013						
Total Capital (To Risk-Weighted Assets) Consolidated	\$137,311	16.62%	\$66,106	8.00%	N/A	

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

Bank	\$138,761	16.81%	\$66,041	8.00%	\$82,551	10.00%
Tier 1 Capital (To Risk-Weighted Assets)						
Consolidated	\$123,730	14.97%	\$33,053	4.00%	N/A	
Bank	\$125,180	15.16%	\$33,020	4.00%	\$49,531	6.00%
Tier 1 Capital (To Average Assets)						
Consolidated	\$123,730	9.01%	\$54,954	4.00%	N/A	
Bank	\$125,180	9.12%	\$54,923	4.00%	\$68,653	5.00%

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

The following table sets forth the Company's and the Bank's regulatory capital at December 31, 2012, under the rules applicable at that date.

	Consolidated Actual		Adequacy Purposes Required		To be well Capitalized Under Prompt Corrective Action Provisions Required	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
As of December 31, 2012						
Total Capital (To Risk-Weighted Assets)						
Consolidated	\$127,857	15.78%	\$64,812	8.00%	N/A	
Bank	\$128,791	15.92%	\$64,718	8.00%	\$80,897	10.00%
Tier 1 Capital (To Risk-Weighted Assets)						
Consolidated	\$114,667	14.15%	\$32,406	4.00%	N/A	
Bank	\$115,601	14.29%	\$32,359	4.00%	\$48,538	6.00%
Tier 1 Capital (To Average Assets)						
Consolidated	\$114,667	8.87%	\$51,730	4.00%	N/A	
Bank	\$115,601	8.94%	\$51,701	4.00%	\$64,626	5.00%

Dividend Limitations: Dividends paid by the Bank are the primary source of funds available to the Company for payment of dividends to its shareholders. The Bank is subject to certain requirements imposed by federal banking laws and regulations. These requirements, among other things, establish minimum levels of capital and restrict the amount of dividends that may be distributed by the Bank to the Company. At December 31, 2013, the Bank had \$56,210 available for dividends that could be paid without prior regulatory approval.

Stock Repurchase Plan: In August 2008, the Company's Board of Directors approved a program to repurchase up to 300,000 shares of the Company's common stock, or approximately 10.2% of the shares then currently outstanding. The new stock repurchase program became effective as of August 21, 2008 and was authorized to continue for a period of up to twenty-four consecutive months. In August of 2010, the Company's Board of Directors authorized the continuance of this program through August 17, 2012. In August of 2012, the Company's Board of Directors authorized the continuance of this program through August 17, 2014. Depending on market conditions and other factors, these purchases may be commenced or suspended at any time, or from time to time, without prior notice and may be made in the open market or through privately negotiated transactions. As of December 31, 2013, the Company had repurchased 104,952 shares of stock under this plan, at a total cost of \$2,937 and an average price of \$27.98 per share. The Company records repurchased shares as treasury stock.

The new stock repurchase program replaced the Company's stock repurchase program that had been in place since February 2004, which had authorized the repurchase of up to 310,000 or approximately 10% of the Company's outstanding shares of common stock. As of August 19, 2008, the date this program was terminated, the Company had repurchased 288,799 shares at a total cost of \$8,441 and an average price of \$29.23 per share.

Note 12: Stock-Based Compensation Plans:

On October 3, 2000, the shareholders of the Company approved the Bar Harbor Bankshares and Subsidiaries Incentive Stock Option Plan of 2000 (ISOP) for its officers and employees, which provided for the issuance of up to 450,000 shares of common stock. The purchase price of the stock covered by each option must be at least 100% of the trading value on the date such option was granted. Vesting terms ranged from three to seven years. According to the ISOP no option shall be granted after October 3, 2010, ten years after the effective date of the ISOP.

In May, 2009, the shareholders of the Company approved the adoption of the 2009 Bar Harbor Bankshares and Subsidiaries Equity Incentive Plan (the 2009 Plan) for employees and directors of the Company and its subsidiaries. Subject to adjustment for stock splits, stock dividends, and similar events, the total number of shares of common stock that can be issued under the 2009 Plan over the 10 year period in which the plan will be in place is 175,000 shares of common stock, provided that no more than 75,000 shares of such stock can be awarded in the form of restricted stock or restricted stock units, as further described in the 2009 Plan. The 2009 Plan is to be administered by the Company's Compensation Committee. All employees and directors of the Company and its subsidiaries are eligible to participate in the 2009 Plan, subject to the discretion of the Administrator and the terms of the 2009 Plan. The maximum stock award granted to one individual may not exceed 20,000 shares of common stock (subject to adjustment for stock splits, and similar events) for any calendar year.

In April of 2013, the Board of Directors voted a Long Term Incentive Program for senior management members. The program is designed to be made up of three year rolling plans utilizing the shares made available through the 2009 Plan. Grants may be given in time vested restricted stock awards, performance vested restricted stock awards, or a combination of both.

Compensation expense recognized in connection with the stock based compensation plans are presented in the following table for the years ended December 31, 2013, 2012, and 2011:

	2013	2012	2011
Stock options and restricted stock awards granted	\$265	\$216	\$ 99
Long term performance stock	63	---	---
Long term restricted stock	80	---	---
Total compensation expense	\$408	\$216	\$ 99

For the years ended December 31, 2013, 2012, and 2011, the total anti-dilutive stock options amounted to 60, 36, and 117 thousand shares, respectively.

The fair value of options was estimated at the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions for stock option grants during the years ended December 31:

	2013	2012	2011
Risk free interest rate	1.55%	1.13%	2.04%
Expected market volatility factor			
for the Company's stock	26.44%	26.08%	26.28%
Dividend yield	3.39%	3.40%	3.79%
Expected life of the options (years)	7.0	6.9	6.8
Options granted	27,000	37,500	30,500
Estimated fair value of options granted	\$ 6.63	\$ 5.85	\$ 4.99

The expected market price volatility for the grants during 2013 was determined by using the Company's historical stock price volatility on a daily basis during the three to seven year periods ending December 31, 2013, consistent with the expected life of the 2013 options.

Stock Option and Restricted Stock Activity: A summary combined status of the ISOP and the 2009 Plan as of December 31, 2013, and changes during the year then ended is presented below:

	Number of Stock Options Outstanding	Exercise Price Range		Weighted Average Exercise Price		Aggregate Intrinsic Value
		From	To	Price	Value	Value
Outstanding at January 1, 2013	153,418	\$18.37	\$37.60	\$30.31		

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

Granted	27,000	\$35.46	\$40.62	\$36.75		
Exercised	(16,361)	\$18.37	\$37.60	\$27.72		
Cancelled	(7,388)	\$26.99	\$36.75	\$29.74		
Outstanding at December 31, 2013	156,669	\$21.82	\$40.62	\$31.72	\$5.56	\$1,296
Ending vested and expected to vest December 31, 2013	149,084	\$21.82	\$40.62	\$31.91	\$5.60	\$1,206
Exercisable at December 31, 2013	63,090	\$21.82	\$37.60	\$30.28	\$5.38	\$ 613

	Number of Restricted Stock Awards Outstanding	Weighted Average Grant Date Fair Value
Outstanding at January 1, 2013	0	\$ ---
Awarded	3,370	\$35.80
Released	(3,370)	\$35.80
Forfeited	0	\$ ---
Outstanding at December 31, 2013	0	\$ ---

The intrinsic value of the options exercised and cash received by the Company for options exercised for the years ended December 31, 2013, 2012, and 2011, was approximately \$201 and \$453, \$345 and \$1,174, and \$977 and \$1,363, respectively.

The tax benefit received related to the exercise of options in 2013, 2012 and 2011, was \$19, \$35 and \$248, respectively.

As of December 31, 2013, there was approximately \$298 of unrecognized compensation cost related to unvested stock option awards, net of estimated forfeitures. This amount is expected to be recognized as expense over the next seven years, with a weighted average recognition period of 3.48 years.

Stock Options Outstanding: The following table summarizes stock options outstanding and exercisable by exercise price range at December 31, 2013:

Range of Exercise Prices	Options Outstanding			Options Exercisable		
	Number Outstanding	Weighted Average	Weighted Average	Number Exercisable	Weighted Average	Weighted Average

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

	As of 12/31/13	Remaining Contractual Term(years)	Exercise Price	As of 12/31/13	Remaining Contractual Term(years)	Exercise Price		
	\$21.82	\$40.62	156,669	6.4	\$31.72	63,090	4.0	\$30.28

During 2013, performance share awards were granted to certain executive officers providing the opportunity to earn shares of common stock of the Company ranging from zero to 10,448 shares. The performance shares granted were valued at between \$35.64 and \$36.00 the fair market value at the date of grant, and will be earned over a three year performance period. The current assumption based on the most recent peer group information results in the shares earned at 134% of the target, or 6,964 shares.

Nonvested Performance Shares: The following table summarizes nonvested performance shares as of December 31, 2013:

	Number of Shares	Weighted Average Grant Date Fair Value
Outstanding at January 1, 2013	0	\$ ---
Granted	6,964	35.78
Vested	0	---
Forfeited	0	---
Outstanding at December 31, 2013	6,964	\$35.78

Nonvested Restricted Shares: The following table summarizes nonvested performance shares as of December 31, 2013:

	Number of Shares	Weighted Average Grant Date Fair Value
Outstanding at January 1, 2013	0	\$ ---
Granted	5,605	35.74
Vested	0	---
Forfeited	0	---
Outstanding at December 31, 2013	5,605	\$35.74

As of December 31, 2013, there was \$355 of total unrecognized compensation cost related to nonvested nonvested restricted share awards and performance share awards granted under the Plans. That cost is expected to be recognized over a weighted average period of 2.1 years.

Note 13: Retirement Benefit Plans

The Company has non-qualified supplemental executive retirement agreements with certain retired officers. The agreements provide supplemental retirement benefits payable in installments over a period of years upon retirement or death. The Company also has a supplemental executive retirement agreement with a current executive officer. This agreement provides a stream of future payments in accordance with individually defined vesting schedules upon retirement, termination, or in the event that the participating executive leaves the Company following a change of control event.

The after tax components of accumulated other comprehensive (loss) income, which have not yet been recognized in net periodic benefit cost, related to post-retirement benefits are net actuarial losses related to supplemental retirement plans of \$373 and \$401, as of December 31, 2013 and 2012, respectively.

A December 31 measurement date is used for the supplemental executive retirement plans. The following table sets forth changes in benefit obligation, changes in plan assets, and the funded status of the plans as of and for the years ended December 31:

	Supplemental Executive	
	Retirement Plans	
	Fiscal Year Ending	
Obligations and Funded Status	2013	2012
Change in Benefit Obligation		
Benefit obligation at beginning of year	\$ 3,916	\$ 3,349
Service cost	209	173
Interest cost	120	131
Actuarial (gain) loss on supplemental retirement plans	(147)	469

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

Benefits and expenses paid	(216)	(206)
Benefit obligation at end of year	\$ 3,882	\$ 3,916
Change in plan assets		
Fair value of plan assets at beginning of year	\$ ---	\$ ---
Benefits and expenses paid	(216)	(206)
Contributions	216	206
Fair value of plan assets at end of year	\$ ---	\$ ---
Funded status at end of year	\$(3,882)	\$(3,916)

As of December 31, 2013 and 2012, the Company had recognized liabilities of \$3,882 and \$3,916, respectively, for the supplemental executive retirement plans. These amounts are reported within other liabilities on the consolidated balance sheets.

The following table summarizes the assumptions used to determine the benefit obligations and net periodic benefit costs for the years ended December 31, 2013, 2012, and 2011:

Assumptions	Supplemental Executive		
	Retirement Plans		
	Fiscal Year Ending		
	2013	2012	2011
Weighted-average discount rate beginning of the year	3.14%	3.76%	5.75%
Weighted-average discount rate end of the year	4.02%	3.14%	3.76%

The net periodic benefit cost for the years ended December 31 included the following components:

Supplemental Executive

**Retirement Plans
Fiscal Year Ending
2013 2012 2011**

**Components of Net Periodic Benefit Cost and Other
Amounts Recognized in the Consolidated Income
Statements**

Service cost	\$ 209	\$ 173	\$ 49
Interest cost	120	131	190
Recognition of net actuarial (gain) loss	(105)	(139)	4
Total recognized in the consolidated income statements	\$ 224	\$ 165	\$243

**Other Changes and Benefit Obligations Recognized in
Other Comprehensive Income (pre-tax)**

Recognition of net actuarial loss (gain)	42	582	(4)
Total recognized in other comprehensive income (pre-tax)	42	582	(4)
Total recognized in the consolidated income statements			

and other comprehensive income (pre-tax)	\$ 266	\$ 747	\$239
--	--------	--------	-------

The estimated net actuarial loss for the supplemental executive retirement plan that will be amortized from accumulated other comprehensive income into net periodic benefit cost over the next fiscal year is \$28.

The Company expects to contribute the following amounts to fund benefit payments under the supplemental executive retirement plans:

2014	\$ 331
2015	291
2016	291
2017	291
2018	373
2019 and thereafter	\$3,970

401(k) Plan: The Company maintains a Section 401(k) savings plan for substantially all of its employees. Employees are eligible to participate in the 401(k) Plan on the first day of any quarter following their date of hire and attainment of age 21 ½. Under the plan, the Company makes a matching contribution of a portion of the amount contributed by each participating employee, up to a percentage of the employee's annual salary. The plan allows for supplementary profit sharing contributions by the Company, at its discretion, for the benefit of participating employees. The total expense for this plan in 2013, 2012, and 2011 was \$356, \$321, and \$299, respectively.

Note 14: Commitments and Contingent Liabilities

The Bank is a party to financial instruments in the normal course of business to meet financing needs of its customers. These financial instruments include commitments to extend credit, unused lines of credit, and standby letters of credit.

Commitments to originate loans, including unused lines of credit, are agreements to lend to a customer provided there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank uses the same credit policy to make such commitments as it uses for on-balance-sheet items, such as loans. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation of the borrower.

The Bank guarantees the obligations or performance of customers by issuing standby letters of credit to third parties. These standby letters of credit are primarily issued in support of third party debt or obligations. The risk involved in issuing standby letters of credit is essentially the same as the credit risk involved in extending loan facilities to customers, and they are subject to the same credit origination, portfolio maintenance and management procedures in effect to monitor other credit and off-balance sheet instruments. Exposure to credit loss in the event of non-performance by the counter-party to the financial instrument for standby letters of credit is represented by the contractual amount of those instruments. Typically, these standby letters of credit have terms of five years or less and expire unused; therefore, the total amounts do not necessarily represent future cash requirements.

The following table summarizes the contractual amounts of commitments and contingent liabilities as of December 31, 2013 and 2012.

	December 31,	December 31,
	2013	2012
Commitments to originate loans	\$10,269	\$ 20,843
Unused lines of credit	\$98,486	\$106,773
Un-advanced portions of construction loans	\$12,203	\$ 22,047
Standby letters of credit	\$ 378	\$ 307

As of December 31, 2013 and 2012, the fair values of the standby letters of credit were not significant to the Company's consolidated financial statements.

Operating Lease Obligations

The Company leases certain properties used in operations under terms of operating leases, which include renewal options. The following table sets forth the approximate future lease payments over the remaining terms of the non-cancelable leases as of December 31, 2013.

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

2014	\$412
2015	\$335
2016	\$256
2017	\$136
2018	\$139
2019 and thereafter	\$360

In connection the foregoing lease obligations, in 2013, 2012 and 2011, the Company recorded \$430, \$278, and \$200 in rent expense, respectively, which is included in occupancy and furniture and fixtures expense in the consolidated statements of income.

Note 15: Fair Value Measurements

The Company measures fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact, and (iv) willing to transact.

The Company's fair value measurements employ valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The Company uses a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets (Level 1 measurements) for identical assets or liabilities and the lowest priority to unobservable inputs (Level 3 measurements). The fair value hierarchy is as follows:

Level 1 Valuation is based on unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Valuation is based on quoted prices for similar instruments in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and model-based techniques for which all significant assumptions are observable in the market.

Level 3 Valuation is principally generated from model-based techniques that use at least one significant assumption not observable in the market. These unobservable assumptions reflect estimates that market participants would use in pricing the asset or liability. Valuation techniques include use of discounted cash flow models and similar techniques.

The level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The most significant instruments that the Company values are securities, all of which fall into Level 2 in the fair value hierarchy. The securities in the available for sale portfolio are priced by independent providers. In obtaining such valuation information from third parties, the Company has evaluated their valuation methodologies used to develop the fair values in order to determine whether valuations are appropriately placed within the fair value hierarchy and whether the valuations are representative of an exit price in the Company's principal markets. The Company's principal markets for its securities portfolios are the secondary institutional markets, with an exit price that is predominantly reflective of bid level pricing in those markets. Additionally, the Company periodically tests the reasonableness of the prices provided by these third parties by obtaining fair values from other independent providers and by obtaining desk bids from a variety of institutional brokers.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

Securities Available for Sale: All securities and major categories of securities classified as available for sale are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value measurements from independent pricing providers. The fair value measurements used by the pricing providers consider observable data that may include dealer quotes, market maker quotes and live trading systems. If quoted prices are not readily available, fair values are determined using matrix pricing models, or other model-based valuation techniques requiring observable inputs other than quoted prices such as market pricing spreads, credit information, callable features, cash flows, the U.S. Treasury yield curve, trade execution data, market consensus prepayment speeds, default rates, and the securities' terms and conditions, among other things.

The foregoing valuation methodologies may produce fair value calculations that may not be fully indicative of net realizable value or reflective of future fair values. While Company management believes these valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of December 31, 2013, and December 31, 2012, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

December 31, 2013	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
Securities available for sale:				
Mortgage-backed securities:				
US Government-sponsored enterprises	\$ ---	\$273,632	\$ ---	\$273,632
US Government agencies	\$ ---	\$ 81,529	\$ ---	\$ 81,529
Private label	\$ ---	\$ 6,170	\$ ---	\$ 6,170
Obligations of states and political subdivisions thereof	\$ ---	\$ 88,839	\$ ---	\$ 88,839

December 31, 2012	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
Securities available for sale:				
Mortgage-backed securities:				
US Government-sponsored enterprises	\$ ---	\$245,823	\$ ---	\$245,823
US Government agencies	\$ ---	\$ 84,261	\$ ---	\$ 84,261
Private label	\$ ---	\$ 8,113	\$ ---	\$ 8,113
Obligations of states and political subdivisions thereof	\$ ---	\$ 79,843	\$ ---	\$ 79,843

During the years ended December 31, 2013 and 2012, there were no transfers between levels of the fair value hierarchy.

The Company also makes fair value measurements on a non-recurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

The following table summarizes financial assets and financial liabilities measured at fair value on a non-recurring basis as of December 31, 2013 and December 31, 2012, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value.

For the Year	Level 1	Level 2	Level 3	Fair Value as	Loss
Ended 12/31/13	Inputs	Inputs	Inputs	of 12/31/13	
Other real estate owned	\$ ---	\$ ---	\$1,625	\$1,625	\$338
Collateral dependent impaired loans	\$ ---	\$ ---	\$2,699	\$2,699	\$ ---

For the Year	Level 1	Level 2	Level 3	Fair Value as	Loss
Ended 12/31/12	Inputs	Inputs	Inputs	of 12/31/12	
Other real estate owned	\$ ---	\$ ---	\$2,780	\$2,780	\$146
Collateral dependent impaired loans	\$ ---	\$ ---	\$3,149	\$3,149	\$ ---

The Company had total collateral dependent impaired loans with carrying values of approximately \$2,699 and \$3,149 which had specific reserves included in the allowance of \$120 at December 31, 2013 and December 31, 2012. The Company measures the value of collateral dependent impaired loans using Level 3 inputs. Specifically, the Company uses the appraised value of the collateral, which is then discounted for estimated costs to dispose and other considerations. These discounts generally range from 10% to 30% of appraised value.

In estimating the fair value of OREO, the Company generally uses market appraisals less estimated costs to dispose of the property, which generally range from 10% to 30% of appraised value. Management may also make adjustments to reflect estimated fair value declines, or may apply other discounts to appraised values for unobservable factors resulting from its knowledge of the property or consideration of broker quotes. The appraisers use a market, income, and/or a cost approach in determining the value of the collateral. Therefore they have been categorized as a Level 3 measurement.

Note 16: Fair Value of Financial Instruments

The Company discloses fair value information about financial instruments for which it is practicable to estimate fair value. Fair value estimates are made as of a specific point in time based on the characteristics of the financial instruments and relevant market information. Where available, quoted market prices are used. In other cases, fair values are based on estimates using present value or other valuation techniques. These techniques involve uncertainties and are significantly affected by the assumptions used and judgments made regarding risk characteristics of various financial instruments, discount rates, estimates of future cash flows, future expected loss experience and other factors. Changes in assumptions could significantly affect these estimates. Derived fair value estimates cannot be substantiated by comparison to independent markets and, in certain cases, could not be realized in an immediate sale of the instrument.

Fair value estimates are based on existing financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Accordingly, the aggregate fair value amounts presented do not purport to represent the underlying market value of the Company.

The following describes the methods and significant assumptions used by the Company in estimating the fair values of significant financial instruments:

Cash and cash equivalents: For cash and cash equivalents, including cash and due from banks and other short-term investments with maturities of 90 days or less, the carrying amounts reported on the consolidated balance sheet approximate fair values.

Federal Home Loan Bank Stock: For Federal Home Loan Bank stock, the carrying amounts reported on the balance sheet approximate fair values.

Loans: For variable rate loans that re-price frequently and have no significant change in credit risk, fair values are based on carrying values. The fair value of other loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Deposits: The fair value of deposits with no stated maturity is equal to the carrying amount. The fair value of time deposits is based on the discounted value of contractual cash flows, applying interest rates currently being offered on wholesale funding products of similar maturities. The fair value estimates for deposits do not include the benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of alternative forms of funding (deposit base intangibles).

Borrowings: For borrowings that mature or re-price in 90 days or less, carrying value approximates fair value. The fair value of the Company's remaining borrowings is estimated by using discounted cash flows based on current rates available for similar types of borrowing arrangements taking into account any optionality.

Accrued interest receivable and payable: The carrying amounts of accrued interest receivable and payable approximate their fair values.

Off-balance sheet financial instruments: The Company's off-balance sheet instruments consist of loan commitments and standby letters of credit. Fair values for standby letters of credit and loan commitments were insignificant.

A summary of the carrying values and estimated fair values of the Company's significant financial instruments at December 31, 2013 and 2012 follows:

	Carrying Value	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total Fair Value
December 31, 2013					
Financial Assets:					
Cash and cash equivalents	\$ 9,200	\$ 9,200	\$ ---	\$ ---	\$ 9,200

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURES

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures: The Company carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of its disclosure controls and procedures as of the end of the period covered by this report. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are designed to ensure that the information required to be disclosed by us in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and are operating in an effective manner.

Management Report on Internal Control over Financial Reporting: Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting as defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act as a process designed by, or under the supervision of, the Company's principal executive and principal financial officers and effected by the Company's board of directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

.
Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company;

.
Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and

Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2013. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework*.

Based on its assessment, management believes that as of December 31, 2013, the Company's internal control over financial reporting is effective, based on the criteria set forth by COSO in *Internal Control - Integrated Framework*.

The Company's independent registered public accounting firm has issued an audit report on the effectiveness of the Company's internal control over financial reporting. This report appears within Item 9A of this report on Form 10-K.

Changes in Internal Control Over Financial Reporting: No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders

Bar Harbor Bankshares:

We have audited Bar Harbor Bankshares and subsidiaries (the Company) internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control -- Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *Management Report on Internal Control Over Financial Reporting*. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Edgar Filing: BAR HARBOR BANKSHARES - Form 10-K

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control - Integrated Framework* issued by COSO.

We also have audited in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Bar Harbor Bankshares and subsidiaries as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2013, and our report dated March 12, 2014 expressed an unqualified opinion on those consolidated financial statements.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCE

Directors and Executive Officers: Information required by Item 401 of Regulation S-K with respect to the directors and executive officers will appear under the heading **DIRECTORS AND EXECUTIVE OFFICERS** in the Company's definitive Proxy Statement for the 2014 Annual Meeting of Shareholders, which the Company intends to file with the Commission within 120 days of the end of the Company's 2013 fiscal year (hereinafter the **Proxy**) and is incorporated herein by reference.

Compliance with Section 16(a) of the Securities Exchange Act of 1934: Information required by Item 405 of Regulation S-K with respect to Compliance with Section 16(a) of the Securities Exchange Act of 1934 will appear under the heading **SECTION 16(a) BENEFICIAL OWNERSHIP REPORTING COMPLIANCE** in the Company's Proxy and is incorporated herein by reference.

Stockholder Nominees to Board of Directors: The information required by Item 407(c)(3), procedures by which security holders may recommend nominees to the Company's Board of Directors, will be set forth in the Proxy under the headings entitled **CORPORATE GOVERNANCE** Governance Committee and **OTHER MATTERS** Nominees by Shareholders and other Shareholder Proposals and are incorporated herein by reference.

Audit Committee: Information required by Items 407(d)(4) of Regulation S-K will appear under the heading **CORPORATE GOVERNANCE** Audit Committee in the Company's Proxy, and is incorporated herein by reference. Information required by Item 407(d)(5) of Regulation S-K will appear under **Appendix A** Report of the Audit Committee, contained in the Company's Proxy and is incorporated herein by reference.

Code of Ethics: Information required by Item 406 of Regulation S-K will appear under the heading **OTHER MATTERS** Code of Ethics contained in the Company's Proxy and is incorporated herein by reference.

ITEM 11. EXECUTIVE COMPENSATION

The information required by Item 402 of Regulation S-K will appear under the heading **COMPENSATION OF DIRECTORS AND EXECUTIVE OFFICERS-COMPENSATION OF EXECUTIVE OFFICERS**, in the Company's Proxy, which information is incorporated herein by reference.

The information required by Item 407(e)(4) of Regulation S-K will appear under the heading *Compensation Committee Interlocks and Insider Participation* in the Company's Proxy, which information is incorporated herein by reference.

The information required by Item 407(e)(5) of Regulation S-K will appear under the heading **Report of the Compensation and Human Resources Committee** in the Company's Proxy, which information is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The Information required by Item 201(d) of Regulation S-K appears in this Report as Part II, Item 5, under the heading "Market for Registrant's Common Stock, Related Shareholder Matters and Issuer Purchases of Equity Securities - Incentive Stock Option Plan," which information is incorporated herein by reference.

Information required by Item 403 of Regulation S-K will appear under the heading "VOTING SECURITIES AND PRINCIPAL HOLDERS THEREOF" in the Company's Proxy, which information is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

Information required by Item 404 of Regulation S-K will appear under the heading "CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS" in the Company's Proxy, which information is incorporated herein by reference.

Information required by Section 407(a) of Regulation S-K will appear under the headings "Directors and Nominees" and "CORPORATE GOVERNANCE - Board of Directors" in the Company's Proxy, which information is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Information required by this item will appear under the heading "INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM," in the Company's Proxy, which information is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a)

1. All Financial Statements

The consolidated financial statements of the Company and report of the Company's independent registered public accounting firm incorporated herein are included in Item 8 of this Report as follows:

Item	Page
Report of Independent Registered Public Accounting Firm	72
Consolidated Balance Sheets	73
Consolidated Statements of Income	74
Consolidated Statements of Comprehensive Income	75
Consolidated Statements of Changes in Shareholders' Equity	76
Consolidated Statements of Cash Flows	77
Notes to Consolidated Financial Statements	78

2. Financial Statement Schedules. Schedules have been omitted because they are not applicable or are not required under the instructions contained in Regulation S-X or because the information required to be set forth therein is included in the consolidated financial statements or notes thereto.

3. Exhibits. See Item 15(b) to this Annual Report on Form 10-K.

(b) A list of exhibits to this Form 10-K is set forth on the Exhibit Index immediately preceding such exhibits and is incorporated herein by reference.

(c) There are no other financial statements and financial statement schedules, which were excluded from this report, which are required to be included herein.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
