Rio de Janeiro, May 12, 2004 Companhia Vale do Rio Doce (CVRD) reported net earnings of R\$ 954 million in the first quarter of 2004 (1Q04), corresponding to R\$ 2.48 per share 20.5% higher than in the previous quarter, and 18.0% less than in 1Q03.

Gross operating revenues was R\$ 2.731 billion, 8.5% more than in the first quarter of 2003 and 5.0% less than in 4Q03. Consolidated exports were US\$ 1.012 billion, 26.7% higher than in 1Q03. Net exports (exports less imports) were US\$ 864 million, or 14% of Brazil's total trade surplus for the first three months of the year.

EBITDA recorded in the first quarter was R\$ 1.342 billion, the third-highest quarterly EBITDA in CVRD's history, and EBITDA margin (EBITDA as a percentage of net revenues) was 51.5%, higher than the full year 2003 (48.7%), 2002 (48.3%), 2001 (51.0%) and 2000 (48.3%).

Sales of iron ore and pellets were 43.256 million tons, 18.9% more than in 1Q03. The volume of general cargo (other than iron ore and pellets) transported for clients on CVRD's railroads (the Vitória-Minas railroad and the Carajás railroad) totaled 4.0 net ton-kilometers (ntk), 16.8% more than in 1Q03.

EARNINGS GUIDANCE

CVRD does not provide guidance in the form of quantitative forecasts about future financial performance. The Company aims to release the maximum amount of information about its vision for the various markets in which it operates, explaining its strategic directives and execution; thereby, providing capital market participants with sufficient information to form their own expectations with regard to medium and long-term performance.

BUSINESS OUTLOOK

The global economy has continued to experience a synchronized recovery, which began in the third quarter of 2003. The fastest growth is observed in China, the other emerging markets in Asia and in the United States and slower growth rates are observed in the Euro Zone, where consumption remains subdued. In Japan, economic growth, stimulated by exports and investment, continues to exceed expectations, and in Latin America, particularly in Brazil, there are signs that recovery is underway.

According to data from the International Iron and Steel Institute (IISI), global steel production increased 8.7% in 1Q04, compared to 1Q03. Excluding China, production increased 3.9%, which is much higher than the average growth rate observed in the period 1993/2003 of 1.5%. Chinese steel production grew 26.5% in 1Q04, compared to 1Q03, representing a significant increase in that country's steel production rate vis-à-vis the growth rate observed at the end of last year, which amounted to 21.2%.

Chinese iron ore imports in 1Q04 reached a record 50.7 million tons, 48.2% higher than the volume recorded in 1Q03, bringing the total quantity imported in the 12 months to April, to 164.6 million tons. Japan imported 34.7 million tons in the quarter, an increase of 4.1% compared to 1Q03.

The global macroeconomic scenario remains favorable for continued expansion in the demand for ores and metals, which benefits the Company's performance.

The measures taken by the Chinese economic authorities to reduce growth rates – restricting both the supply of and demand for credit – are extremely healthy, because the sooner China seeks to correct its excess demand situation, the lower is the probability of a crisis in the future, which would have an adverse effect on global demand for mineral products.

These measures discourage investments with a low expected rate of return. Such unproductive investments would contribute to lower China's capacity for future economic growth, jeopardizing the buoyancy of demand for ores and metals. According to IMF estimates, one third of the GDP growth in China since 1978, when reforms were first introduced, is explained by productivity gains. Therefore, in preventing the waste of resources, the Chinese government is focused on the

BR GAAP

preservation of the economy's growth dynamics, and consequently the vigor of the demand for mineral products.

CVRD's commercial relationship with China with respect to the sale of iron ore is conducted via long-term contracts with the largest and most modern steel producers in that country. Long-term contracts help to minimize fluctuations in sales during down-cycles and allow customized solutions to be developed that generate value to the Company's clients.

According to the long-term contracts in force, CVRD's iron ore sales, excluding those of Caemi, to the Chinese market should increase from the level of 25.7 million tons in 2003, to approximately 55 million tons in 2008, implying an estimated average annual growth rate of 16.4% during the period 2003-2008.

The Sossego mine, in Carajás, is undergoing its copper concentrate production ramp-up phase, with the first shipment expected between the end of June and the beginning of July 2004. Sossego has a nominal production capacity of 140,000 tons a year, on average, of copper in concentrate equivalent.

The startup of the Sossego operation, CVRD's first copper project and the only greenfield copper project to be completed in 2004 in the world, constitutes an important milestone in the development of CVRD's non-ferrous mineral businesses and creates a new platform for the creation of shareholder value.

RECENT RELEVANT EVENTS

In April, CVRD entered into new long-term contracts with clients, distributed dividends to its shareholders and was successful in its initiative to purchase electricity via auction. Both Alunorte and GIIC obtained various international certifications, which is consistent with the Company's focus on corporate social responsibility.

Long-term contracts for the supply of iron ore and pellets

CVRD and China Steel Corporation (CSC), one of the largest steel producers in Asia, have signed a contract for the supply of 600 thousand tons of pellets a year from 2005 to 2011. CSC has been a client of CVRD since 1979 and in addition to buying pellets, currently purchases some 2.4 million tons a year of iron ore, also under a long-term contract.

CVRD also signed a contract with Usiminas, one of the largest steelmakers in Latin America, for the supply of five million tons a year of iron ore for five years. The volume covered by this contract represents approximately 90% of Usiminas' current iron ore consumption.

In 2003 and in the beginning of 2004, CVRD entered into several long-term contracts with important steelmakers, such as Arcelor, Baosteel and Corus. These contracts minimize future iron ore sales volatility and allow for the development of customized solutions that create value for our clients.

Dividends and debenture remuneration

On April 30, the first minimum dividend installment was paid to CVRD's shareholders, in the amount of R\$ 2.06 (US\$ 0.70 as of April 30) per share, in accordance with the minimum dividend payment proposal for 2004, as announced to the market. The total disbursement by CVRD amounted to US\$ 268.3 million.

1Q 04

3

Table of Contents

BR GAAP

On April 1, CVRD paid its first remuneration payment on debentures issued by the Company and distributed to shareholders before its privatization in 1997, of R\$ 0.0120628 per debenture, amounting to a total disbursement by the Company of US\$ 1.6 million.

Electricity auction

Albras was successful in its initiative to purchase electricity via an auction for a period of 20 years. The electricity bought will supply its needs starting in June 2004. The base purchase price is R\$ 53.00 per MWh, indexed to the IGPM, which is the general price index published by Fundação Getulio Vargas. In addition to the base price, the electricity supplier will have a stake on the portion of the primary aluminum price, at the London Metal Exchange (LME), which exceeds US\$ 1,450 per ton. According to the structure of the operation, Albras will make a prepayment for the purchase of this electricity of R\$ 1.2 billion.

The terms obtained will preserve Albras' highly competitive position in the global aluminum industry.

Corporate social responsibility

GIIC, a joint venture between CVRD and The Gulf Investment Corporation, has received the ISO 9000 certification for the quality of its pellets and the ISO 14001 certification for excellence in environmental protection.

Alunorte, the alumina refinery controlled by CVRD, received three international certifications: the ISO 9001, for quality in alumina production, the ISO 14001, for excellence in environmental protection, and the OHSAS 18001, for health and safety in the workplace.

All of CVRD's iron ore and manganese mines, its maritime terminals; Tubarão's pelletizing plants, RDME, Albras and now Alunorte and GIIC have the ISO 14001 for excellence in environmental protection. Moreover, Albras has additional certifications for corporate social responsibility, quality, health and safety in the workplace.

Social responsibility, including environmental protection, social initiatives, the health and safety of its employees, is a priority for CVRD, which considers such responsibility a crucial factor to maintain its long-term competitiveness.

SALES REVENUES AND VOLUMES

Sales volumes of iron ore and pellets in 1Q04, 43.256 million tons, was 18.9% higher than in 1Q03, and 3.4% lower than in 4Q03. The year-on-year increase was due to the consolidation of Ferteco, which mines contributed 4.854 million tons, and to the strong demand for these products. At the same time, there was a fall in sales volumes from 4Q03 to 1Q04 due to seasonal factors.

Mining production tends to be lower in the first quarter of each year, due to the rainy season, reducing the total of shipments. The rains also increase the risk of accidents on the railroads, although Vitoria a Minas railroad and Carajás railroad have accident rates among the lowest in the world. Certainly there is a production and sales growth trend along the year.

CVRD's iron ore production was 2.6 million tons lower in 1Q04 than in 4Q03. There were accidents on the Carajás and MRS Logística railroads, and delays by

Table of Contents**BR GAAP**

suppliers in delivery of railcars for transport of iron ore both contributing to difficulties in shipments.

Iron ore fines volume was 75.4% of all shipments; lumps were 9.9%, and pellets 14.7%.

About 74% of CVRD's shipments of iron ore and pellets in 1Q04 went directly to exports. China continued to be the main consumer market, buying 5.8 million tons, or 18.1% of the total volume exported by CVRD. The second-largest destination country was Germany, with 4.6 million tons, followed by Japan with 4.0 million tons, France with 2.3 million tons and South Korea with 1.7 million tons. Of the 11.2 million tons sold in the domestic market, 4.9 million tons went to the palletizing joint ventures for processing into pellets, almost all of the production of which goes to the export market.

Sales of potash were 138 thousand tons, 12.7% less than in the first quarter of 2003, and 18.3% less than in the last quarter of 2003, in spite of high demand. Lower sales reflected lower production in this quarter due to works on expansion which should increase the mine's nominal capacity from 600,000 tons/year to 850,000 tons/year in 2005.

The volume of general cargo (cargo other than iron ore and pellets) carried by our railroads (the Vitória a Minas railroad and the Carajás railroad) totaled 4.0 billion ntk, in line with 4Q03, and 16.8% more than in 1Q03. This reflects the increase in our fleet of locomotives and railcars, and the fact that there is pent-up demand for this type of service. Steel products were 52% of the cargo we transported for clients in the quarter, agricultural products 27%, fuel 10%, containers 2% and other products 9%.

Revenue from sales of iron ore was R\$ 1.697 billion, 62.1% of total revenue. This was 9.3% more than in 1Q03, and 6.2% less than in 4Q03. Revenue from sales of pellets was R\$ 595 million, 21.8% of total revenue: 20.0% higher than in the first quarter of 2003, and 4.5% less than in 4Q03.

Revenue from logistics services, at R\$ 332 million, was similar to its levels in 1Q03 and 4Q03, and provided 12.2% of the Company's total revenues. Revenue from rail transport was R\$ 261 million, and revenue from port services was R\$ 71 million.

Table of Contents**BR GAAP****NET EARNINGS OF R\$ 954 MILLION**

CVRD's net earnings in 1Q04 was R\$ 954 million, 20.5% more than in the previous quarter, and 18.1% less than in 1Q03.

An extraordinary item amortization of goodwill of Samitri was recorded in this quarter, in a non-recurrent and non-cash amount of R\$ 183 million, related to the period October 2001 - December 2003. This investment was previously being amortized under a linear 10 year period, based on the projections of future profitability assumed at the time. After revising the projections, we decided to adopt the new five year amortization period to reflect correctly the situation of the investment. Going forward during the next 30 months we will be posting amortization of around R\$ 40 million per quarter on this investment, instead of the R\$ 20 million that we were posting previously.

There was an increase of R\$ 228 million in cost of goods sold (COGS), which can be partially explained by the consolidation of Ferteco, starting in September 2003, which contributed R\$ 209 million to COGS, and by the intensification of operations in the São Luis palletizing plant, adding R\$ 48 million to COGS.

Expenses with outsourced services grew by 120% or R\$ 156 million yoy. From this total, R\$ 83 million are explained by the consolidation of Ferteco that registers in this line the freight paid to MRS Logística to transport part of its iron ore production. Besides that, we saw higher production input prices and higher maintenance and equipment renewal at the mines and plants in order to increase productivity.

Electricity costs and expenses with personnel also showed growth due to tariffs readjustments and to a 17% raise in salaries since July 2003, respectively.

Other factors contributing to lower profit in 1Q04 than in 1Q03 were:

- (i) Monetary variation recorded in 1Q03 was a positive R\$ 279 million since we saw an appreciation of 5.37% of the real against the US dollar between December 31, 2002 and March 31, 2003, against a negative R\$ 69 million recorded in 1Q04, due to a depreciation of 0.67% of the real against the US dollar between December 31, 2003 and March 31, 2004.

- (ii) An increase of R\$ 25 million in expenditure on research and development, as the volume of mineral exploration increased, specially for copper and manganese ore; and

1Q 04

7

Table of Contents**BR GAAP**

(iii) An increase of R\$ 15 million in administrative expenses.

On the other hand, we saw the following positive contributions to net earnings:

- (i) An increase of R\$ 191 million in net operating revenue;
- (ii) A reduction of R\$ 157 million in provisions for income tax;
- (iii) An increase of R\$ 175 million in income from equity from the results of affiliates and joint ventures. The main elements in the improvement in equity from the results of affiliates and joint ventures were: (a) the impact of the depreciation of the real against the US dollar in 1Q04 on the stockholders' equity of Docenave, CSI and Itaco, and an increase in the volume of iron ore and pellets sold by Itaco; (b) the increase since September 2003 in our percentage holding in Caemi which also increased its volumes of iron ore sold; and (c) increases in prices and volumes of manganese and ferro-alloys sold by RDM.
- (iv) A reduction of R\$ 47 million in selling expenses explained by the end of commissions on export sales; and
- (v) A reduction of R\$ 21 million in other operational expenses, influenced by the register of R\$ 28 million in provisions for losses of ICMS credit in 1Q03, which was not verified in 1Q04.

EBITDA: R\$ 1.342 BILLION

CVRD's cash flow in 1Q04 as measured by EBITDA was R\$ 1.342 billion, 16.9% more than in 1Q03, and 8.3% more than in the fourth quarter of 2003. EBITDA margin was 51.5%, a considerable increase on the EBITDA margins of 47.5% in 1Q03 and 44.3% in 4Q03.

The main factors that resulted in 1Q04 EBITDA being R\$ 194 million higher than 1Q03 are:

- (i) Increase of R\$ 191 million in net sales revenue;
- (ii) Increase of R\$ 109 million in dividends received with increases principally in the payments received from MRN, CST and Usiminas, which paid R\$ 62 million, R\$ 46 million and R\$ 36 million, respectively;

- (iii) Increase of R\$ 95 million in depreciation and amortization, influenced by the consolidation of Ferteco and by the change in the method of accounting for goodwill amortization in Samitri;

(iv) Reduction of selling expenses by R\$ 47 million; and

DEBT COMMITTED CREDIT LINES

CVRD is to use committed credit line instruments with the aim of improving the efficiency of its cash management and alleviating debt-refinancing risks during moments of instability in financial markets. To this end, US\$500 million in global committed credit line facilities have been established with the main commercial banks, US\$ 400 million of which can be used over a period of up to one year after the date of disbursement, with a repayment period of up to one year, and US\$ 100 million, which can be used for a period of up to 24 months, with a repayment period of 36 months after the contract is signed. These credit lines will be made available to CVRD although the Company does not intend to use them unless liquidity becomes excessively tight.

The establishment of committed credit line facilities is consistent with the best financial management practices and contributes to achieve a decoupling from the sovereign risk.

The Company redeemed the CVRD 2004 bond at the beginning of April, which had a face value of US\$ 300 million and a coupon of 10% *per annum*. At the same time, it obtained a syndicated loan of US\$ 300 million, with a tenor of seven years and an average term of 4.25 years, at the cost of the six-month Libor rate plus 0.7% a year.

Our discussion of debt is in accordance with generally accepted accounting principles in the United States of America (US GAAP).

Table of Contents**BR GAAP**

CVRD's total debt at 31 March 2004 amounted to US\$ 4.244 billion, an increase on the position reported at the end of 2003, of US\$ 4.028 billion. This increase was the result of raising funds ahead of schedule, for 2004, to take advantage of the favorable conditions in financial markets at the beginning this year. For example, in January, the Company issued a 30-year bond, with a coupon of 8.25% a year, and a yield to maturity of 8.35% a year, with a face value of US\$ 500 million.

Short-term debt registered a decrease of US\$ 304 million in relation to the position at the end of December 2003, while long-term debt increased US\$ 520 million. The average term of the Company's debt at the end of 1Q04 was 6.32 years, more than double of that registered at the end of 2002, without any significant increase in average debt cost, which remains below 7% a year.

Net debt decreased US\$ 200 million, from US\$ 3.443 billion at the end of December 2003 to US\$ 3.243 billion at the end of March 2004.

Guarantees provided to affiliates and non-consolidated joint ventures amounted to US\$ 260 million, a reduction on the figure registered at the end of December last year, of US\$ 283 million.

Due to the strong expansion in adjusted accumulated EBITDA in the last 12 months, which reached US\$ 2.373 billion, the debt leverage indicator, Total Debt/adjusted EBITDA, fell for the second quarter running to 1.79x. The ratio of Total Debt /Enterprise Value at the end of 1Q04 was 18.1%.

There was an improvement in interest coverage, as measured by the ratio LTM adjusted EBITDA /LTM interest paid. This metric increased from 11.51x at the end of 2003, to 11.69x in 1Q04.

All the Company's debt indicators – leverage, interest coverage and average maturity profile – reveals the financial strength of the balance sheet, with the availability of committed credit lines, if needed, providing an additional guarantee to its creditors.

CAPITAL EXPENDITURE

In the first quarter of 2004 CVRD's capital expenditure was of the order of US\$ 306 million, or 20% of the US\$ 1.536 billion budgeted for the whole of 2004.

Our investment in organic growth (growth capex) was US\$ 237 million, and our expenditure on maintenance of existing operations (stay-in-business capex) was US\$ 69 million.

Of the growth capex, US\$ 11 million was spent on mining exploration, 91% in Brazil and 9% outside Brazil (the latter mainly in Chile, Peru, Gabon, Angola and Mongolia). Our prospecting is for copper, nickel, gold, kaolin, bauxite, manganese and metals of the platinum group.

The following figures show details of CVRD's principal current projects:

Area	Project	Budget US\$ million		Status
		1Q04	2004	
Ferrous Minerals	Expansion of Carajás iron ore mines to 70 Mt pa - Northern System	24	76.4	Carajás already set to produce 70 million tons in 2004.
	Expansion of Carajás iron ore mines to 85 Mt pa - Northern System	2	28.8	This project will add 15 million tons a year to CVRD's production capacity, and is scheduled for completion in 2006. Completion of the Phase II of the Pier III at the Marine Terminal of Ponta da Madeira is scheduled for completion in July 2005.
	Expansion of iron ore mine at Brucutu Phase I -Southern System	2	37.3	Brucutu is not a modular project and should produce 4 million tons this year. Phase I of the project will be completed in 2006, when nominal production capacity might reach 12 million tons a year.
	Expansion of iron ore mine at Fábrica Nova - Southern System	3	31.1	First phase scheduled for completion in 2005, when the mine will have a nominal production capacity of 10 million tons a year. Start-up for the second phase is scheduled for 2007, when the mine is expected to reach production of 15 million tons a year.
	Expansion of iron ore mines at Itabira -Southern System	4	13.2	Expansion of production capacity and modernization of operations at the Itabira mines in order to increase production capacity by 3 million tons a year, increasing nominal production capacity to 46 million tons a year. Completion is expected for 2006.
Non-ferrous Minerals	Expansion of potash mine at Taquari-Vassouras	16	21.2	Approximately 65% of the work related to capacity expansion has already been carried out. During March, mining activities were shut down in order to increase the capacity of the shaft through which production is moved out of the underground mine (allowing the extra potash production to be moved, with the

capacity expansion scheduled for completion in 3Q05).

Aluminum	Paragominas I	2	83.2	Environmental licenses were obtained for the mine's development and for the construction of a 230 kilometer mineral pipeline which will transport the bauxite to Alunorte's refinery. Start-up of operations is scheduled for the beginning of 2006, with production capacity of 4.5 million tons of bauxite a year.
Logistics	Purchases of locomotives and railcars-EFVM/EFC	75	182.0	In 1Q04, the Company received delivery of 1,133 railcars - 735 for the transportation of iron ore and 398 for general cargo, as well as 8 locomotives. Total deliveries programmed for 2004 amount to 2,011 railcars and 18 locomotives.
Power Generation	Aimorés hydroelectric plant	11	19.0	The plant is located on the Rio Doce, in the state of Minas Gerais, and will have a generation capacity of 330MW, with start-up scheduled for July 2005.
	Candongá hydroelectric plant	2	3.5	The work on the plant has already been completed. The reservoir is being filled which will be completed by May and commercial operations will begin in June. By August, all the turbines will be generating electricity. The plant will have a generating capacity of 140MW.

1- Management's Discussion and Analysis of the Operating Results for the First Quarter of 2004 Compared with the First Quarter of 2003**1.1- General Aspects****(a) Companhia Vale do Rio Doce's segments of business are mining, logistics and energy, as follows:**

Ferrous minerals: iron ore and pellets as well as manganese and ferroalloys;

Non-ferrous minerals: potash, kaolin and copper;

Logistics: railroads, ports and maritime terminals and shipping;

Energy: electric power generation; and

Holdings: equity holdings in producers of aluminum and steel.

(b) The variations of the main currencies and indices in terms of percentages in relation to the *real*, which impacted the results of the Company and its subsidiaries, jointly-controlled companies and affiliates, were as follows:

Period Currencies / Indices	$\Delta\%$					Parity	
	U.S. DOLLAR	YEN	GOLD	IGP-M	TJLP	US\$ x R\$	US\$ x Yen
1Q/04	0.7	3.3	1.8	2.7	2.4	2.9086	104.48

1Q/03	(5.1)	(4.6)	(3.6)	6.3	2.6	3.3531	118.20
Year ended 2002	52.3	68.2	25.0	25.3	9.9	3.5333	118.87

About 64% of the Company's gross revenue for three months ended March 31, 2004 is derived from exports and part of domestic sales are linked to the U.S. dollar.

About 28% of total costs are linked to the U.S. dollar.

Consequently, fluctuations in the exchange rate between the two currencies have a significant impact on the operating cash flows.

Approximately 95% of the short-term and long-term loans of the Company at 03/31/04 are denominated in U.S. dollars. As a result, exchange rate fluctuations have a significant impact on the financial expenses (Note 6.15).

- (c) **On the first quarter of 2004, the consolidated trade balance of US\$ 864 million was generated as follows:**

Table of Contents**1.2- Comments on the Company Results**

The net income of the Company for the three months ended March 31, 2004 was R\$ 953,714 compared with net income of R\$ 1,163,828 in the three months ended March 31, 2003 (the earnings per share corresponds to R\$ 2.48 in the three months ended March 31, 2004 versus R\$ 3.03 in the three months ended March 31, 2003).

1.2.1- Gross Revenue

The 8% increase in gross revenue (R\$ 2,731,147 on 03/31/04 against R\$ 2,517,618 on 03/31/03) is a result of higher volumes sold of iron ore and pellets, mainly due to the merger of Ferteco in September 2003 and for the operation at full capacity of the palletizing plant of São Luis on the second semester of 2003, as shown in the table below compensated in part of the average evaluation of the real against the United States Dollar by 17.2%, incident on 83% of the revenue of the Company. The increase in iron ore and pellets sales was due to growth in the European and Asiatic markets of 27.9%, 14.5%, respectively.

1.2.2- Cost of Products and Services

The increase of 18% (R\$ 228,046) in the cost of products and services (R\$ 1,475,929 as of March 31, 2004 compared to R\$ 1,247,883 as of March 31, 2003) is mainly due to the following major factors:

Ferteco's merger in September 2003, adding costs of R\$ 208,969 from sales of 4,854 thousand tons of iron ore and pellets;

Speeding of goodwill amortization period of Samitri as a result of the revision of its projection of rentability, increasing costs in this quarter in R\$ 20,312;

Start up operations of the São Luís Pellets Plant (UPSL), adding costs of R\$ 32,139 from sales of 1,321 thousand tons in 2004 as compared to 339 thousand tons in the same period of the prior year.

Utilization of PIS and COFINS tax credits decurrent of the change in the COFINS Law, reducing R\$ 83,842 the quarterly costs.

1.2.4- Operating Expenses

The operating expenses increased R\$ 155,422 (R\$ 439,979 on 03/31/04 compared to R\$ 284,557 on 03/31/03), basically because of non recurring-goodwill amortization of Samitri (note 1.2.10).

1.2.5- Net Financial Result

The net financial result on 1Q04 had a negative impact of R\$ 349,806 (expense of R\$ 204,911 on 03/31/04 compared to revenue of R\$ 144,895 on 03/31/03), mainly due to exchange rate effects decored from the evaluation of the dollar against real 0.7% on March 2004 and devaluation of the dollar against the real 5.1% on March, 2003.

1.2.6- Income Tax and Social Contribution

Income tax and social contribution reflect an expense of R\$ 43,224 on 03/31/04 compared with a expense of R\$ 200,478 on 03/31/03, mainly caused by the decrease in the tax basis (income before income tax and social contribution less the equity method result, goodwill and provisions for non-deductible losses) from negative R\$ 1,017,319 on 03/31/03 to R\$ 456,616 on 03/31/04, partially reduced by the benefit of interest on stockholders equity of R\$ 160,841 on 03/31/04 (R\$ 211,418 on 03/31/03) (Note 6.7).

1.2.7- Cash Generation

The operating cash generation measured by EBITDA (earnings before interest, income tax and depreciation, amortization and depletion) was R\$ 1,341,900 on 03/31/04, against R\$ 1,148,114 on 03/31/03, an increase of 16.9%.

Interest on stockholders' equity paid at 2003 totaled R\$ 1,935 (US\$ 675 million) and payable in 2004 due to 2003 totaled R\$ 319 (US\$ 108 million).

1.2.9- Shareholder Remuneration Policy for 2004

On 01/28/04, CVRD announced that its Executive Board had submitted to the approval of the Board of Directors a proposal to pay minimum shareholder remuneration for 2004 of US\$ 1.43 per common or preferred share totaling US\$ 550 million, in two equal installments, on April 30 and October 29.

The Board of Directors will discuss the proposal of the Executive Board at meetings scheduled for April 14 and October 13. The amount announced will be paid in Brazilian currency, calculated based on the *real*/dollar exchange rate (Ptax - option 5) disclosed by the Central Bank of Brazil on the business day immediately prior to the meeting of the Board of Directors that approves the distribution and respective payment of shareholder remuneration.

On March 31, 2004, CVRD proposed interest on stockholders' equity in the amount of R\$ 790,710 equivalent to R\$ 2.06 per share.

1.2.10- Non recurring Item - Samitri's goodwill amortization

According to instruction CVM 247, we reviewed the terms of goodwill originated from Samitri acquisition. After reviewing the projections of future results we adopted 5 years of amortization, mainly due to the increase of dividends received from Samarco. Consequently we recorded an expense of R\$ 182.796.

Table of Contents

(A free translation of the original in Portuguese relating to the Quarterly Information prepared in accordance with the requirements of Accounting, Practices Generally Accepted in Brazil)

6- Notes to the Quarterly Information at March 31, 2004 and March 31, 2003

Expressed In thousands of reais

6.1- Operations

Companhia Vale do Rio Doce is a publicly traded corporation whose predominant activities are mining, processing and sale of iron ore, pellets and potash, as well as port and railroad transportation services, power generation and mineral research and development. In addition, through its direct and indirect subsidiaries and jointly-controlled companies, CVRD operates in manganese and ferroalloys, steel, aluminum and kaolin.

6.2- Presentation of Quarterly Information

The quarterly information have been prepared in conformity with accounting practices adopted in Brazil, based on corporate legislation, as well as the rules and guidelines issued by the Comissão de Valores Mobiliários - CVM (Brazilian Securities Commission) and Instituto dos Auditores Independentes do Brasil - IBRACON (Brazilian Independent Auditors Institute).

In order to provide better information to the market, the Company is presenting the Statement of Cash Flow (according rule NPC 20 Ibracon).

6.3- Significant Accounting Policies

- (a) The Company adopts the accrual basis of accounting;
- (b) Assets and liabilities that are realizable or due more than twelve months after the quarterly information date are classified as long-term;
- (c) Marketable securities, classified as cash and cash equivalents, are stated at cost plus accrued income earned to the Quarterly Information date;
- (d) Inventories are stated at average purchase or production cost, and imports in transit at the cost of each item, not exceeding market or realizable value;
- (e) Assets and liabilities in foreign currencies are translated at exchange rates in effect at the quarterly information date, and those in local currency, when applicable, are restated based on contractual indices;
- (f) Investments in subsidiaries, jointly-controlled companies and affiliated companies are accounted for by the equity method, based on the stockholders' equity of the investees, and when applicable increased/decreased by goodwill and negative goodwill to be amortized and provision for losses. Other investments are recorded at cost, less provision for unrealized losses when applicable;
- (g) Property, plant and equipment, including interest incurred during the construction period of large-scale projects, are recorded at historic cost (increased by monetary restatement up to 1995) and depreciated on the straight-line method, based on the useful lives of the assets. Depletion of mineral reserves is based on the ratio between production and estimated capacity;

The deferred assets and liabilities regarding income tax and social contribution arising from tax losses, negative social contribution bases and temporary differences are recognized from an accounting standpoint considering an analysis of likely future results, based on economic and financial projections prepared in light of internal assumptions and macroeconomic, commercial and fiscal scenarios. These projections can change in the future. These temporary differences will be realized upon the occurrence of the corresponding taxable events, excepted to be as follows:

In addition to the credits recorded, the Company has a lawsuit claiming an additional 51.8% monetary restatement for tax purposes applied to the months of January and February 1989 (Plano Verão monetary plan). A favorable ruling has already been obtained for compensation of credits corresponding to 42.7% instead of the 51.8% requested (however, not yet utilized due to the Company's tax situation). The amount of these credits covered by the ruling totals approximately R\$ 309,000 and the accounting effects have not yet been recognized in the quarterly information.

Labor-related actions principally comprise employee claims in connection with disputes about the amount of indemnities paid upon dismissal and the one-third extra holiday pay.

Civil actions principally relate to claims made against the Company by contractors in connection with losses alleged to have been incurred as a result of various past government economic plans.

The Company does not expect such guarantees to be executed and therefore no provisions for losses have been made. Excepted for Valesul, CVRD charges for granting these guarantees.

(c) Upon privatization of the Company in 1997, the Brazilian government stipulated the issuance of non-convertible debentures (Debentures) to the stockholders of record, including the federal government. The maturity dates of these Debentures were established to guarantee that pre-privatization stockholders, including the federal government, would share any future benefits from mineral resources held by the Company and its subsidiary and affiliated companies that were not evaluated at the time of setting the minimum price of CVRD shares at the

privatization auction.

A total of 388,559,056 Debentures were issued at a par value of R\$ 0.01 (one centavo), whose value is to be restated in accordance with the variation in the General Market Price Index (IGP-M), as set forth in the Issue Deed. On October 4, 2002, the Comissão de Valores Mobiliários - CVM (Brazilian Securities Commission) approved the Company's registration request, filed on June 28, 2002, for public trading of the Debentures. As of October 28, 2002, the Debentures can be traded on the secondary market.

6.13- Environmental and Site Reclamation and Restoration Costs

Expenditures relating to ongoing compliance with environmental regulations are charged to production costs or capitalized as incurred. The Company manages its environmental policies according to the specifications of ISO 14,001 and maintains ongoing programs to minimize the environmental impact of its mining operations as well as to reduce the costs that will be incurred upon termination of activities at each mine. On 03/31/03, the provision for environmental liabilities amounted to R\$ 238,381 (R\$ 231,767 on 12/31/03), which was accounted for in Others in long-term liabilities.

The Company adopted the concepts of the Accounting for Asset Retirement Obligations, as follows:

Costs for mine closure are recorded as part of the cost of these assets and a corresponding provision is made for such future expenditure.

The estimated costs are accounted for at the present value of the obligations, discounted using a risk free rate; and

The estimated costs are reviewed annually and changes in the present value are adjusted in the recorded values of the assets and liabilities.

Table of Contents**6.14- Paid-up Capital**

As of the Ordinary General Meeting of 04/16/03, the Company's capital increased to R\$ 6.3 this capital corresponds to 388,559,056 book entry shares, of which 249,983,143 are common shares and 138,575,913 are preferred class A shares, the latter including one special preferred share (Golden Share), all with no par value.

Preferred shares have the same rights as common shares, except for the right to elect the members of the Board of Directors. They have priority to a minimum annual dividend of 6% on the portion of capital represented by this class of share or 3% of the book net equity value of the share, whichever is greater.

The special Golden Share created during the privatization in 1997 belongs to the Brazilian Government. This share gives it the right to a permanent veto of changes in the Company's name, headquarters location, nature as a mining enterprise, continuous operation of the integrated mining, transportation and shipping systems and other matters determined in the Bylaws.

6.15- Treasury Stock

The Board of Directors, under the terms of subparagraph XV of Article 13 of the Bylaws and based on Article 30 of Law 6404/76 and CVM Instructions 10 of 02/14/80 and 268 of 11/13/97, approved the acquisition by the Company of its own shares to be held in treasury for later sale or cancellation.

Through the 03/31/04, the Company had acquired 4,715,170 common shares and 4,183 preferred shares, which are held in treasury in the amount of R\$ 131,318. The 4,715,170 common shares guarantee a loan of the subsidiary Alunorte.

6.17 - Financial Instruments - Derivatives

The main market risks the Company faces are related to interest rates, exchange rates and commodities prices. CVRD has a policy of managing risks through the use of derivative instruments.

The Company's risk management follows policies and guidelines reviewed and approved by the Board of Directors and Executive Board. These policies and guidelines prohibit speculative trading and short selling and require diversification of transactions and counterparties. The policy of the Company is to settle all contracts financially without physical delivery of the products. The credit limits and creditworthiness of counterparties are also reviewed periodically and are defined according to the rules approved by the Company's management. The results of hedging are recognized monthly in the results.

Interest Rate Risk

Interest rate risk derives from floating-rate debt, mainly from trade finance operations. The portion of floating-rate debt denominated in foreign currency is mainly subject to fluctuations in the LIBOR - London Interbank Offered Rate. The portion of floating-rate debt expressed in *reais* refers basically to the Brazilian long-term interest rate TJLP, established by the Brazilian Central Bank. Since May 1998, CVRD has been using derivatives to limit its exposure to

fluctuations in the LIBOR.

The interest rate derivatives portfolio consists mainly of instruments contracted to limit exposure to interest rate fluctuations, establishing upper and lower limits. Some operations are subject to knock-out provisions which, if triggered, eliminate the protection contracted.

The table below provides information regarding the interest rate derivatives portfolio for 03/31/04 and 03/31/03.

Type	03/31/04			Final maturity	03/31/03

Total			(139,975)				(230,264)

The unrealized loss represents the present value to payable if all operations had been settled on 03/31/04.

CVRD

Table of Contents**Exchange Rate Risk**

Exchange rate risk arises from foreign currency debts. On the other hand, a substantial part of the Company's revenues are denominated or indexed in U.S. dollars, while the majority of costs are in *reais*. This provides a natural hedge against possible devaluation of the Brazilian currency. Events of this nature have an immediate negative impact on foreign currency debt, offset by the positive effect on future cash flows.

The Company adopts a strategy of monitoring market fluctuations and, if necessary, carrying out derivatives operations to cover risks related to these variations.

The portion of debt denominated in euros and yen (main components of basket of currencies) is protected by derivatives to cover risks of exchange rate movements of these currencies.

The table below shows the exchange rate derivatives portfolio for 03/31/04 and 03/31/03. These operations are forwards and range forwards which were structured to ensure the purchase price of the following currencies:

Type	03/31/04				03/31/03		
	Notional value (in millions)	Rate range	Unrealized gain (loss) (in R\$ thousands)	Final maturity	Notional value (in millions)	Rate range	Unrealized loss (in R\$ thousands)

Euros purchased	23	1.22 - 1.23 per US\$	5,323	Dec-11	5	1.19 - 1.23 por US\$	(2,162)
Euros sold	5	1.2 - 1.3 per US\$	104	Apr-04	3	1.05 - 1.10 por US\$	23
Total			3,861				(3,138)

The unrealized gain represents the present value to receive if all operations had been settled on 03/31/04.

Commodities Price Risk

The prices of iron ore, the Company's main product, are set in annual negotiations between producers and consumers and are notably stable over time. The Company does not enter into derivatives operations to hedge iron ore price exposure.

The Company uses hedge instruments to manage its exposure to changes in the price of gold, aluminum and alumina. These derivatives operations allow establishment of a minimum profit level for future output. The Company actively manages its open positions, with the results reported monthly to senior management to allow adjustment of targets and

strategies in response to market conditions.

The following table shows the gold derivatives portfolio of the Company on 03/31/04 and 03/31/03:

Type	03/31/04				03/31/03

9- Report of the Independent Accountants

(A free translation of the original opinion in Portuguese expressed on Quarterly Information prepared in accordance with the accounting principles prescribed by Brazilian Corporate Law)

To the Board of Directors and Stockholders
Companhia Vale do Rio Doce

- 1 We have carried out limited reviews of the Quarterly Information (ITR) of Companhia Vale do Rio Doce for the quarters ended March 31, 2004 and 2003. This information is the responsibility of Company's management.
- 2 Except as mentioned in paragraph three, our reviews were carried out in conformity with specific standards established by the Institute of Independent Auditors of Brazil (IBRACON), in conjunction with the Federal Accounting Council (CFC), and mainly comprised: (a) inquiries of and discussions with management responsible for the accounting, financial and operating areas of the Company with regard to the main criteria adopted for preparation of the quarterly information and (b) a review of the significant information and of the subsequent events which have, or could have, significant effects on the Company's financial position and operations.
- 3 The financial statements at March 31, 2004 and 2003, of some subsidiary, jointly-owned and associated companies, in which there are relevant investments, have not been reviewed by independent accountants. Accordingly, the conclusions resulting from our reviews do not cover the amounts of R\$ 5,761,571 thousand (2003 - R\$ 8,156,541 thousand) of these investments and R\$ 343,429 thousand (2003 - R\$ 418,620 thousand) of the income produced by them for the quarters then ended.
- 4 Based on our limited reviews, except for the effects of any adjustments which might have been required if the financial statements of the subsidiary, jointly-owned and associated companies mentioned in paragraph 3 had been reviewed by independent accountants, we are not aware of any material modifications that should be made to the quarterly information referred to above in order that such information be stated in conformity with the accounting practices adopted in Brazil applicable to the preparation of quarterly information, consistent with the Brazilian Securities Commission (CVM) regulations.
- 5 Our limited reviews were conducted for the purpose of issuing our report on the quarterly information referred to in paragraph 1, taken as a whole. The statement of cash flow is presented as additional information, and is not a required part of the quarterly report. Such information has been subjected to the auditing procedures described in paragraph 2 and we are not aware of any material adjustments that should be made to this statement for it to be adequately presented in relation to the quarterly information.
- 6 The quarterly information also includes accounting information for the quarter ended December 31, 2003. We audited such information at the time it was prepared, in connection with the audit of the financial statements as of and for the year then ended, on which we issued an unqualified opinion dated February 20, 2004.
