DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements ("Forward-Looking Statements") as defined in the Private Securities Litigation Reform Act of 1995 and Section 27A of the Securities Act of 1933, as amended, relating to future business expectations and predictions of financial condition and results of operations of Suburban Propane Partners, L.P. (the "Partnership"). Some of these statements can be identified by the use of forward-looking terminology such as prospects, outlook, believes, estimates, intends, may, will, should, anticipates, the negative or other variation of these or similar words, or by discussion of trends and conditions, strategies or risks and uncertainties. These Forward-Looking Statements involve certain risks and uncertainties that could cause actual results to differ materially from those discussed or implied in such Forward-Looking Statements (statements contained in this Quarterly Report identifying such risks and uncertainties are referred to as "Cautionary Statements"). The risks and uncertainties and their impact on the Partnership's results include, but are not limited to, the following risks:

The impact of weather conditions on the demand for propane, fuel oil and other refined fuels, natural gas and electricity;

Volatility in the unit cost of propane, fuel oil and other refined fuels and natural gas, the impact of the Partnership's hedging and risk management activities, and the adverse impact of price increases on volumes as a result of customer conservation;

The ability of the Partnership to compete with other suppliers of propane, fuel oil and other energy sources;

The impact on the price and supply of propane, fuel oil and other refined fuels from the political, military or economic instability of the oil producing nations, global terrorism and other general economic conditions;

The ability of the Partnership to acquire and maintain reliable transportation for its propane, fuel oil and other refined fuels;

The ability of the Partnership to retain customers;

The impact of customer conservation, energy efficiency and technology advances on the demand for propane and fuel oil;

The ability of management to continue to control expenses;

The impact of changes in applicable statutes and government regulations, or their interpretations, including those relating to the environment and global warming and other regulatory developments on the Partnership's business;

The impact of legal proceedings on the Partnership's business;

The impact of operating hazards that could adversely affect the Partnership's operating results to the extent not covered by insurance; and

The Partnership's ability to make strategic acquisitions and successfully integrate them.

Some of these Forward-Looking Statements are discussed in more detail in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in this Quarterly Report. Reference is also made to the risk factors discussed in Item 1A of our Annual Report on Form 10-K for the fiscal year ended September 29, 2007. On different occasions, the Partnership or its representatives have made or may make Forward-Looking Statements in other filings with the Securities and Exchange Commission ("SEC"), press releases or oral statements made by or with the approval of one of the Partnership's authorized executive officers. Readers are cautioned not to place undue reliance on Forward-Looking Statements, which reflect management's view only as of the date made. The Partnership undertakes

no obligation to update any Forward-Looking Statement or Cautionary Statement. All subsequent written and oral Forward-Looking Statements attributable to the Partnership or persons acting on its behalf are expressly qualified in their entirety by the Cautionary Statements in this Quarterly Report and in future SEC reports.

SUBURBAN PROPANE PARTNERS, L.P. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(dollars in thousands, except per unit amounts)
(unaudited)

1. Partnership Organization

Suburban Propane Partners, L.P. (the Partnership) is a publicly traded Delaware limited partnership principally engaged, through its operating partnership and subsidiaries, in the retail marketing and distribution of propane, fuel oil and refined fuels, as well as the marketing of natural gas and electricity in deregulated markets. In addition, to complement its core marketing and distribution businesses, the Partnership services a wide variety of home comfort equipment, particularly for heating and ventilation. The publicly traded limited partner interests in the Partnership are evidenced by common units traded on the New York Stock Exchange (Common Units), with 32,725,383 Common Units outstanding at June 28, 2008. The holders of Common Units are entitled to participate in distributions and exercise the rights and privileges available to limited partners under the Third Amended and Restated Agreement of Limited Partnership (the Partnership Agreement), adopted on October 19, 2006 following approval by Common Unitholders at the Partnership's Tri-Annual Meeting and as thereafter amended by the Board of Supervisors on July 31, 2007, pursuant to the authority granted to the Board in the Partnership Agreement. Rights and privileges under the Partnership Agreement include, among other things, the election of all members of the Board of Supervisors and voting on the removal of the general partner.

Suburban Propane, L.P. (the Operating Partnership), a Delaware limited partnership, is the Partnership's operating subsidiary formed to operate the propane business and assets. In addition, Suburban Sales & Service, Inc. (the Service Company), a subsidiary of the Operating Partnership, was formed to operate the service work and appliance and parts businesses of the Partnership. The Operating Partnership, together with its direct and indirect subsidiaries, accounts for substantially all of the Partnership's assets, revenues and earnings. The Partnership, the Operating Partnership and the Service Company commenced operations in March 1996 in connection with the Partnership's initial public offering.

The general partner of both the Partnership and the Operating Partnership is Suburban Energy Services Group LLC (the General Partner), a Delaware limited liability company. On October 19, 2006, the Partnership consummated an agreement with its General Partner to exchange 2,300,000 newly issued Common Units for the General Partner's incentive distribution rights (IDRs) and the economic interest in the Partnership and the Operating Partnership included in the general partner interests therein (the GP Exchange Transaction). Prior to the GP Exchange Transaction, the General Partner was majority-owned by senior management of the Partnership and owned 224,625 general partner units (an approximate 0.74% ownership interest) in the Partnership and a 1.0101% general partner interest in the Operating Partnership. The General Partner also held all outstanding IDRs and appointed two of the five members of the Board of Supervisors. As a result of the GP Exchange Transaction, the General Partner has no economic interest in either the Partnership or the Operating Partnership other than as a holder of 784 Common Units that will remain in the General Partner, no IDRs are outstanding, the General Partner has no right to appoint any member of the Board of Supervisors and the sole member of the General Partner is the Partnership's Chief Executive Officer.

The Operating Partnership also owns the membership interests in Gas Connection LLC (d/b/a HomeTown Hearth & Grill) and Suburban Franchising LLC. HomeTown Hearth & Grill sells and installs propane and natural gas grills, fireplaces and related accessories and supplies. Suburban Franchising creates and markets propane related franchising opportunities.

On December 23, 2003, the Partnership acquired substantially all of the assets and operations of Agway Energy Products, LLC, Agway Energy Services, Inc. and Agway Energy Services PA, Inc. (collectively referred to as Agway Energy) pursuant to an asset purchase agreement dated November 10, 2003 (the Agway Acquisition). The operations of Agway Energy consisted of the distribution and marketing of propane, fuel oil and other refined fuels, as well as the marketing of natural gas and electricity.

Table of Contents

Suburban Energy Finance Corporation, a direct wholly-owned subsidiary of the Partnership, was formed on November 26, 2003 to serve as co-issuer, jointly and severally, with the Partnership of the Partnership's 6.875% senior notes due in 2013.

2. Basis of Presentation

Principles of Consolidation. The condensed consolidated financial statements include the accounts of the Partnership, the Operating Partnership and all of its direct and indirect subsidiaries. All significant intercompany transactions and account balances have been eliminated. As a result of the GP Exchange Transaction, the General Partner has no economic interest in the Partnership or the Operating Partnership apart from 784 Common Units held by it. The Partnership consolidates the results of operations, financial condition and cash flows of the Operating Partnership as a result of the Partnership's 100% limited partner interest in the Operating Partnership.

The accompanying condensed consolidated financial statements are unaudited and have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission (SEC). They include all adjustments that the Partnership considers necessary for a fair statement of the results for the interim periods presented. Such adjustments consist only of normal recurring items, unless otherwise disclosed. These financial statements should be read in conjunction with the Partnership's Annual Report on Form 10-K for the fiscal year ended September 29, 2007, including management's discussion and analysis of financial condition and results of operations contained therein. Due to the seasonal nature of the Partnership's operations, the results of operations for interim periods are not necessarily indicative of the results to be expected for a full year.

Fiscal Period. The Partnership's fiscal periods typically end on the last Saturday of the quarter.

Derivative Instruments and Hedging Activities.

Commodity Price Risk. Given the retail nature of its operations, the Partnership maintains a certain level of priced physical inventory to ensure its field operations have adequate supply commensurate with the time of year. The Partnership's strategy is to keep its physical inventory priced relatively close to market for its field operations. The Partnership enters into a combination of exchange-traded futures and option contracts, forward contracts and, in certain instances, over-the-counter options (collectively, derivative instruments) to hedge price risk associated with propane and fuel oil physical inventory, as well as future purchases of propane or fuel oil used in its operations and to ensure adequate supply during periods of high demand. Under this risk management strategy, realized gains or losses on derivative instruments will typically offset losses or gains on the physical inventory once the product is sold. All of the Partnership's derivative instruments are reported on the condensed consolidated balance sheet, within other current assets or other current liabilities, at their fair values pursuant to Statement of Financial Accounting Standards (SFAS) No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended (SFAS 133). In addition, in the course of normal operations, the Partnership routinely enters into contracts such as forward priced physical contracts for the purchase or sale of propane and fuel oil that, under SFAS 133, qualify for and are designated as normal purchase or normal sale contracts. Such contracts are exempted from the fair value accounting requirements of SFAS 133 and are accounted for at the time product is purchased or sold under the related contract. The Partnership does not use derivative instruments for speculative trading purposes. Market risks associated with futures, options and forward contracts are monitored daily for compliance with the Partnership's Hedging and Risk Management Policy which includes volume limits for open positions. Priced on-hand inventory is also reviewed and managed daily as to exposures to changing market prices.

On the date that futures, forward and option contracts are entered into, other than those designated as normal purchases or normal sales, the Partnership makes a determination as to whether the derivative instrument qualifies for designation as a hedge. Changes in the fair value of derivative instruments are recorded each period in current period earnings or other comprehensive income (loss) (OCI), depending on whether the derivative instrument is designated as a hedge and, if so, the type of hedge. For derivative instruments designated as cash flow hedges, the Partnership formally assesses, both at the hedge contract's inception and on an ongoing basis, whether the hedge contract is highly effective in offsetting changes in cash flows of hedged items. Changes in the fair value of derivative instruments designated as cash flow hedges are reported in OCI to the extent effective and reclassified into cost of products sold during the same period in which the hedged item affects earnings. The mark-to-market

Table of Contents

gains or losses on ineffective portions of cash flow hedges used to hedge future purchases are recognized in cost of products sold immediately. Changes in the fair value of derivative instruments that are not designated as cash flow hedges, and that do not meet the normal purchase and normal sale exemption under SFAS 133, are recorded within cost of products sold as they occur. Cash flows associated with derivative instruments are reported as operating activities within the condensed consolidated statement of cash flows.

At June 28, 2008, the fair value of derivative instruments described above resulted in derivative assets of \$1,169 included within prepaid expenses and other current assets and derivative liabilities of \$29 included within other current liabilities. Cost of products sold included unrealized (non-cash) gains of \$4,695 and unrealized (non-cash) losses of \$323 for the three and nine months ended June 28, 2008, respectively, and unrealized (non-cash) losses of \$179 and \$7,751 for the three and nine months ended June 30, 2007, respectively, attributable to the change in fair value of derivative instruments not designated as cash flow hedges.

Interest Rate Risk. A portion of the Partnership's long-term borrowings bear interest at a variable rate based upon LIBOR, plus an applicable margin depending on the level of the Partnership's total leverage. Therefore, the Partnership is subject to interest rate risk on the variable component of the interest rate. The Partnership manages part of its variable interest rate risk by entering into interest rate swap agreements. On March 31, 2005, the Partnership entered into a \$125,000 interest rate swap contract in conjunction with the Term Loan facility under the Revolving Credit Agreement. The interest rate swap is being accounted for under SFAS 133 and the Partnership has designated the interest rate swap as a cash flow hedge. Changes in the fair value of the interest rate swap are recognized in OCI until the hedged item is recognized in earnings. At June 28, 2008, the fair value of the interest rate swap amounted to an unrealized loss of (\$2,757) and is included within other liabilities with a corresponding debit in accumulated OCI.

Use of Estimates. The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates have been made by management in the areas of depreciation and amortization of long-lived assets, insurance and litigation reserves, environmental reserves, pension and other postretirement benefit liabilities and costs, valuation of derivative instruments, asset valuation assessments, tax valuation allowances, as well as the allowance for doubtful accounts. Actual results could differ from those estimates, making it reasonably possible that a change in these estimates could occur in the near term.

Reclassifications. Certain prior period amounts have been reclassified to conform with the current period presentation.

3. Exchange of General Partner's Interests and Incentive Distribution Rights

On October 19, 2006, following approval by the requisite vote of the Common Unitholders of the Partnership at its 2006 Tri-Annual Meeting held on October 17, 2006, the Partnership consummated the GP Exchange Transaction with its General Partner for the acquisition of the General Partner's IDRs, as well as the economic interest contained in its general partner interests in both the Partnership and the Operating Partnership, in exchange for 2,300,000 newly issued Common Units. Pursuant to a Distribution, Release and Lockup Agreement by and among the Partnership, the Operating Partnership, the General Partner and the members of the General Partner, the Common Units were distributed to the members of the General Partner in exchange for their membership interests in the General Partner (other than 784 Common Units that will remain in the General Partner). The Common Units issued in the GP Exchange Transaction represented approximately 7% of the total number of Common Units outstanding after consummation of the GP Exchange Transaction.

4. Discontinued Operations

The Partnership continuously evaluates its existing operations to identify opportunities to optimize the return on assets employed and selectively divests operations in slower growing or non-strategic markets and seeks to reinvest in markets that are considered to present more opportunities for growth. In line with that strategy, on October 2,

Table of Contents

2007, the Operating Partnership completed the sale of its Tirzah, South Carolina underground granite propane storage cavern, and associated 62-mile pipeline, for \$53,715 in cash, after taking into account certain adjustments. The 57.5 million gallon underground storage cavern is connected to the Dixie Pipeline and provides propane storage for the eastern United States. As a result of this sale, a gain of \$43,707 was reported as a gain from the disposal of discontinued operations in the Partnership's results for the first quarter of fiscal 2008. The results of operations from the Tirzah facilities in the comparative prior year periods have been reclassified to discontinued operations on the condensed consolidated statements of operations for the three and nine months ended June 30, 2007, and the assets and liabilities were classified as held for sale on the condensed consolidated balance sheet as of September 29, 2007. During the first quarter of fiscal 2007, in a non-cash transaction, the Partnership completed a transaction in which it disposed of nine customer service centers considered to be non-strategic in exchange for three customer service centers of another company located in Alaska. The Partnership reported a \$1,002 gain within discontinued operations in the first quarter of fiscal 2007 for the amount by which the fair value of assets relinquished exceeded the carrying value of the assets relinquished. During the third quarter of fiscal 2007, the Partnership sold one customer service center for net cash proceeds of \$284, which were received by the Partnership in the fourth quarter of fiscal 2007, and reported a gain on sale of \$203 which was accounted for within discontinued operations. Prior period results of operations attributable to these customer service centers were not significant and, as such, have not been reclassified as discontinued operations.

5. Inventories

Inventories are stated at the lower of cost or market. Cost is determined using a weighted average method for propane, fuel oil and refined fuels and natural gas, and a standard cost basis for appliances, which approximates average cost. Inventories consist of the following:

	June 28, 2008	September 29, 2007
Propane, fuel oil and refined fuels	\$ 75,096	\$ 76,730
Natural gas		697
Appliances and related parts	3,609	3,819
	\$ 78,705	\$ 81,246

6. Goodwill and Other Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of net assets of businesses acquired. In accordance with SFAS No. 142, Goodwill and Other Intangible Assets (SFAS 142), goodwill is not amortized. Rather, goodwill is subject to an impairment review at a reporting unit level, on an annual basis in August of each year, or when an event occurs or circumstances change that would indicate potential impairment. The Partnership assesses the carrying value of goodwill at a reporting unit level based on an estimate of the fair value of the respective reporting unit. Fair value of the reporting unit is estimated using discounted cash flow analyses taking into consideration estimated cash flows in a ten-year projection period and a terminal value calculation at the end of the projection period.

During the first quarter of fiscal 2008, the Partnership reversed \$1,277 of the deferred tax asset valuation allowance, which was established through purchase accounting for the Agway Acquisition, as a reduction of goodwill. This adjustment resulted from the realization of a portion of the net operating losses established in purchase accounting for the Agway Acquisition.

Table of Contents

Other intangible assets consist of the following:

	June 28, 2008		September 29, 2007	
	Gross	Accumulated Amortization	Gross	Accumulated Amortization
Customer lists	\$ 22,316	\$ (8,141)	\$ 22,316	\$ (6,669)
Tradenames	1,499	(675)	1,499	(562)
Non-compete agreements	166	(147)	516	(482)
Other	1,967	(412)	1,967	(343)
	\$ 25,948	\$ (9,375)	\$ 26,298	\$ (8,056)

Aggregate amortization expense related to other intangible assets for the three and nine months ended June 28, 2008 was \$555 and \$1,669, respectively, and \$598 and \$1,678 for the three and nine months ended June 30, 2007, respectively.

Aggregate amortization expense related to other intangible assets for the remainder of fiscal 2008 and for each of the five succeeding fiscal years as of June 28, 2008 is as follows: 2008 \$555; 2009 \$2,220; 2010 \$2,205; 2011 \$2,205; 2012 \$1,730 and 2013 \$1,276.

7. Income Per Common Unit

Basic income per Common Unit for the three and nine months ended June 28, 2008 is computed by dividing net income by the weighted average number of outstanding Common Units. Diluted income per Common Unit for the three and nine months ended June 28, 2008 is computed by dividing net income by the weighted average number of outstanding Common Units and unvested Restricted Units granted under the 2000 Restricted Unit Plan (as defined in Note 10).

In computing diluted income per Common Unit, weighted average units outstanding used to compute basic income per unit were increased by 222,104 and 161,201 units for the nine months ended June 28, 2008 and June 30, 2007, respectively, to reflect the potential dilutive effect of the unvested Restricted Units outstanding using the treasury stock method. Diluted loss per unit for the three months ended June 28, 2008 and June 30, 2007 does not include 256,073 and 205,760 unvested Restricted Units, respectively, as their effect would be anti-dilutive.

Subsequent to the GP Exchange Transaction, computations of earnings per Common Unit are performed in accordance with SFAS No. 128 Earnings per Share (SFAS 128). Prior to the GP Exchange Transaction, when the General Partner owned IDRs in the Partnership, computations of earnings per Common Unit were performed in accordance with Emerging Issues Task Force (EITF) consensus 03-6 Participating Securities and the Two-Class Method Under SFAS 128 (EITF 03-6), when applicable. EITF 03-6 requires, among other things, the use of the two-class method of computing earnings per unit when participating securities exist. The two-class method is an earnings allocation formula that computes earnings per unit for each class of Common Unit and participating security according to distributions declared and the participating rights in undistributed earnings, as if all of the earnings were distributed to the limited partners and the general partner (inclusive of the IDRs of the General Partner which were considered participating securities for purposes of the two-class method). Net income was allocated to the Common Unitholders and the General Partner in accordance with their respective Partnership ownership interests, after giving effect to any priority income allocations for incentive distributions allocated to the General Partner. For purposes of the computation of income per Common Unit for the nine months ended June 30, 2007, earnings that would have been allocated to the General Partner for the period prior to the GP Exchange Transaction were not significant.

Table of Contents**8. Long-Term Borrowings**

Long-term borrowings consist of the following:

	June 28, 2008	September 29, 2007
Senior Notes, 6.875%, due December 15, 2013, net of unamortized discount of \$1,287 and \$1,462, respectively	\$ 423,713	\$ 423,538
Term Loan, 6.29% to 7.16%, due March 31, 2010	125,000	125,000
	\$ 548,713	\$ 548,538

The Partnership and its subsidiary, Suburban Energy Finance Corporation, have issued \$425,000 aggregate principal amount of Senior Notes (the 2003 Senior Notes) with an annual interest rate of 6.875%. The Partnership's obligations under the 2003 Senior Notes are unsecured and rank senior in right of payment to any future subordinated indebtedness and equally in right of payment with any future senior indebtedness. The 2003 Senior Notes are structurally subordinated to, which means they rank effectively behind, any debt and other liabilities of the Operating Partnership. The 2003 Senior Notes mature on December 15, 2013 and require semi-annual interest payments in June and December. The Partnership is permitted to redeem some or all of the 2003 Senior Notes any time on or after December 15, 2008 at redemption prices specified in the indenture governing the 2003 Senior Notes. In addition, in the event of a change of control of the Partnership, as defined in the indenture governing the 2003 Senior Notes, the Partnership must offer to repurchase the notes at 101% of the principal amount repurchased, if the holders of the notes exercise the right of repurchase.

The Operating Partnership has a revolving credit facility, the Third Amended and Restated Credit Agreement (the Revolving Credit Agreement), which expires on March 31, 2010. The Revolving Credit Agreement provides for a five-year \$125,000 term loan facility (the Term Loan) and a separate working capital facility which provides available revolving borrowing capacity up to \$175,000. The Operating Partnership has standby letters of credit issued under the working capital facility of the Revolving Credit Agreement in the aggregate amount of \$55,825 in support of retention levels under the Operating Partnership's self-insurance programs and certain lease obligations which expire periodically through March 1, 2009. Therefore, as of June 28, 2008 the Operating Partnership had available borrowing capacity of \$119,175 under the working capital facility of the Revolving Credit Agreement. In addition, under the Revolving Credit Agreement the Operating Partnership is authorized to incur additional indebtedness of up to \$10,000 in connection with capital leases and up to \$20,000 in short-term borrowings during the period from December 1 to April 1 in each fiscal year to provide additional working capital during periods of peak demand, if necessary. Borrowings under the Revolving Credit Agreement, including the Term Loan, bear interest at a rate based upon LIBOR, plus an applicable margin or the Federal Funds rate plus 1/2 of 1%. An annual facility fee ranging from 0.375% to 0.50%, based upon certain financial tests, is payable quarterly whether or not borrowings occur. As of June 28, 2008 and September 29, 2007, there were no borrowings outstanding under the working capital facility of the Revolving Credit Agreement and there have been no borrowings since April 2006.

In connection with the Term Loan, the Operating Partnership also entered into an interest rate swap agreement with a notional amount of \$125,000. Effective March 31, 2005 through March 31, 2010, the Operating Partnership will pay a fixed interest rate of 4.66% to the issuing lender on notional principal amount of \$125,000, effectively fixing the LIBOR portion of the interest rate at 4.66%. In return, the issuing lender will pay to the Operating Partnership a floating rate, namely LIBOR, on the same notional principal amount. The applicable margin above LIBOR, as defined in the Revolving Credit Agreement, will be paid in addition to this fixed interest rate of 4.66%. The fair value of the interest rate swap amounted to an unrealized loss of (\$2,757) and (\$284) at June 28, 2008 and September 29, 2007, respectively, and is included in other liabilities with a corresponding amount included within accumulated OCI. The Revolving Credit Agreement and the 2003 Senior Notes both contain various restrictive and affirmative covenants applicable to the Operating Partnership and the Partnership, respectively, including (i) restrictions on the

incurrence of additional indebtedness, and (ii) restrictions on certain liens, investments, guarantees, loans, advances,

Table of Contents

payments, mergers, consolidations, distributions, sales of assets and other transactions. Under the Revolving Credit Agreement, the Operating Partnership is required to maintain a leverage ratio (the ratio of total debt to EBITDA) of less than 4.0 to 1. In addition, the Operating Partnership is required to maintain an interest coverage ratio (the ratio of EBITDA to interest expense) of greater than 2.5 to 1 at the Partnership level. Under the 2003 Senior Note indenture, the Partnership is generally permitted to make cash distributions equal to available cash, as defined, as of the end of the immediately preceding quarter, if no event of default exists or would exist upon making such distributions, and the Partnership's consolidated fixed charge coverage ratio, as defined, is greater than 1.75 to 1. Under the Revolving Credit Agreement, as long as no default exists or would result, the Partnership is permitted to make cash distributions not more frequently than quarterly in an amount not to exceed available cash, as defined, for the immediately preceding fiscal quarter. The Partnership and the Operating Partnership were in compliance with all covenants and terms of the 2003 Senior Notes and the Revolving Credit Agreement as of June 28, 2008.

Debt origination costs representing the costs incurred in connection with the placement of, and the subsequent amendment to, the 2003 Senior Notes and the Revolving Credit Agreement were capitalized within other assets and are being amortized on a straight-line basis over the term of the respective debt agreements. Other assets at June 28, 2008 and September 29, 2007 include debt origination costs with a net carrying amount of \$5,234 and \$6,230, respectively. Aggregate amortization expense related to deferred debt origination costs included within interest expense for the three months ended June 28, 2008 and June 30, 2007 was \$332 and for the nine months ended June 28, 2008 and June 30, 2007 was \$996.

The aggregate amounts of long-term debt maturities subsequent to June 28, 2008 are as follows: fiscal 2008 \$0; fiscal 2009 \$0; fiscal 2010 \$125,000; fiscal 2011 \$0; and, thereafter - \$425,000.

Under the Revolving Credit Agreement, proceeds from the sale, transfer or other disposition of any asset of the Operating Partnership, other than the sale of inventory in the ordinary course of business, in excess of \$15,000 must be used to acquire productive assets within twelve months of receipt of the proceeds. Any proceeds not used within twelve months of receipt to acquire productive assets must be used to prepay the outstanding principal of the Term Loan. The Partnership expects to prepay approximately \$15,000 on the Term Loan from the net proceeds of the sale of the Tirzah storage facility which closed on October 2, 2007 (see Note 4).

9. Distributions of Available Cash

The Partnership is required to make distributions to its partners no later than 45 days after the end of each fiscal quarter of the Partnership in an aggregate amount equal to its Available Cash for such quarter. Available Cash, as defined in the Partnership Agreement, generally means all cash on hand at the end of the respective fiscal quarter less the amount of cash reserves established by the Board of Supervisors in its reasonable discretion for future cash requirements. These reserves are retained for the proper conduct of the Partnership's business, the payment of debt principal and interest and for distributions during the next four quarters.

Prior to October 19, 2006, the General Partner had IDRs which represented an incentive for the General Partner to increase distributions to Common Unitholders in excess of the target quarterly distribution of \$0.55 per Common Unit. With regard to the first \$0.55 of quarterly distributions paid in any given quarter, 98.26% of the Available Cash was distributed to the Common Unitholders and 1.74% was distributed to the General Partner. With regard to the balance of quarterly distributions in excess of the \$0.55 per Common Unit target distribution, 85% of the Available Cash was distributed to the Common Unitholders and 15% was distributed to the General Partner. As a result of the GP Exchange Transaction, the IDRs were cancelled and the General Partner is no longer entitled to receive any cash distributions in respect of its general partner interests. Accordingly, beginning with the quarterly distribution paid on November 14, 2006 in respect of the fourth quarter of fiscal 2006, 100% of all cash distributions are paid to holders of Common Units.

On July 24, 2008, the Partnership announced a quarterly distribution of \$0.80 per Common Unit, or \$3.20 on an annualized basis, in respect of the third quarter of fiscal 2008 payable on August 12, 2008 to holders of record on August 5, 2008. This quarterly distribution included an increase of \$0.025 per Common Unit, or \$0.10 per Common Unit on an annualized basis, from the previous distribution rate.

Table of Contents**10. Share-Based Compensation Arrangements**

2000 Restricted Unit Plan. In November 2000, the Partnership adopted the Suburban Propane Partners, L.P. 2000 Restricted Unit Plan (the 2000 Restricted Unit Plan) which authorizes the issuance of Common Units to executives, managers and other employees and members of the Board of Supervisors of the Partnership. On October 17, 2006, the Partnership adopted amendments to the 2000 Restricted Unit Plan which, among other things, increased the number of Common Units authorized for issuance under the plan by 230,000 for a total of 717,805. Restricted Units issued under the 2000 Restricted Unit Plan vest over time with 25% of the Common Units vesting on each of the third and fourth anniversaries of the grant date and the remaining 50% of the Common Units vesting on the fifth anniversary of the grant date. The 2000 Restricted Unit Plan participants are not eligible to receive quarterly distributions or vote their respective Restricted Units until vested. Restrictions also prohibit the sale or transfer of the units during the restricted periods. The fair value of the Restricted Unit is established by the market price of the Common Unit on the date of grant, less the present value of distributions expected to be paid on the underlying units during the requisite service period. Restricted Units are subject to forfeiture in certain circumstances as defined in the 2000 Restricted Unit Plan. Compensation expense for the awards is recognized ratably over the vesting periods, net of the value of estimated forfeitures.

During the nine months ended June 28, 2008, the Partnership awarded 125,912 Restricted Units under the 2000 Restricted Unit Plan at an aggregate grant date fair value of \$4,431. Following is a summary of activity in the 2000 Restricted Unit Plan:

	Units	Weighted Average Grant Date Fair Value Per Unit
Outstanding September 29, 2007	383,090	\$ 28.85
Awarded	125,912	35.19
Forfeited	(10,759)	(26.72)
Issued	(51,128)	(30.52)
Outstanding June 28, 2008	447,115	\$ 30.58

As of June 28, 2008, \$7,277 of compensation cost related to unvested Restricted Units awarded under the 2000 Restricted Unit Plan remains to be recognized in future periods. Compensation cost associated with unvested awards is expected to be recognized over a weighted-average period of 1.9 years. Compensation expense recognized under the 2000 Restricted Unit Plan, net of forfeitures, for the three and nine months ended June 28, 2008 was \$817 and \$1,503, respectively, and \$949 and \$2,109 for the three and nine months ended June 30, 2007, respectively.

Long-Term Incentive Plan. The Partnership has a non-qualified, unfunded long-term incentive plan for officers and key employees (LTIP-2) which provides for payment, in the form of cash, of an award of equity-based compensation at the end of a three-year performance period. The level of compensation earned under LTIP-2 is based on the market performance of the Partnership's Common Units on the basis of total return to Unitholders (TRU) compared to the TRU of a predetermined peer group composed primarily of other Master Limited Partnerships, approved by the Compensation Committee of the Board of Supervisors, over the same three-year performance period. As a result of the quarterly remeasurement of the liability for awards under LTIP-2, compensation expense for the three and nine months ended June 28, 2008 was \$1,217 and \$1,635, respectively, and \$1,146 and \$4,295 for the three and nine months ended June 30, 2007, respectively. As of June 28, 2008 and September 29, 2007, the Partnership had a liability included within accrued employment and benefit costs of \$5,482 and \$7,796, respectively, related to estimated future payments under LTIP-2.

Compensation Deferral Plan. The Compensation Deferral Plan provided eligible employees of the Partnership the ability to defer receipt of all or a portion of vested Restricted Units granted under a prior restricted unit award plan.

Those units were held in a trust on behalf of these individuals. During the second quarter of fiscal 2008, the

Table of Contents

remaining 292,682 Common Units were distributed to the participants resulting in the satisfaction of the deferred compensation liability of \$5,660 and a corresponding reduction to common units held in trust in the consolidated balance sheet.

11. Commitments and Contingencies

Self-Insurance. The Partnership is self-insured for general and product, workers' compensation and automobile liabilities up to predetermined thresholds above which third party insurance applies. As of June 28, 2008 and September 29, 2007, the Partnership had accrued insurance liabilities of \$42,464 and \$50,308, respectively, representing the total estimated losses under these self-insurance programs. For the portion of the estimated self-insurance liability that exceeds insurance deductibles, the Partnership records an asset within prepaid expense and other current assets or other assets for the probable recoveries from insurance which amounted to \$8,825 and \$13,858 as of June 28, 2008 and September 29, 2007, respectively. On October 23, 2007, the Partnership reached a settlement regarding an outstanding product liability claim. The settlement resulted in a reduction of the accrued insurance liability and the corresponding asset recorded within prepaid expenses and other current assets, which represented the amount of the liability paid by the insurance companies, of approximately \$4,750 during the first quarter of fiscal 2008. The Partnership is also involved in various legal actions that have arisen in the normal course of business, including those relating to commercial transactions and product liability. Management believes, based on the advice of legal counsel, that the ultimate resolution of these matters will not have a material adverse effect on the Partnership's financial position or future results of operations, after considering its self-insurance liability for known and unasserted self-insured claims, as well as existing insurance policies in force.

Environmental. The Partnership is subject to various federal, state and local environmental, health and safety laws and regulations. Generally, these laws impose limitations on the discharge of pollutants and establish standards for the handling of solid and hazardous wastes. These laws include the Resource Conservation and Recovery Act, the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), the Clean Air Act, the Occupational Safety and Health Act, the Emergency Planning and Community Right to Know Act, the Clean Water Act and comparable state statutes. CERCLA, also known as the Superfund law, imposes joint and several liability without regard to fault or the legality of the original conduct on certain classes of persons that are considered to have contributed to the release or threatened release of a hazardous substance into the environment. Propane is not a hazardous substance within the meaning of CERCLA. However, the Partnership owns real property where such hazardous substances may exist.

The Partnership is also subject to various laws and governmental regulations concerning environmental matters and expects that it will be required to expend funds to participate in the remediation of certain sites, including sites where it has been designated by the Environmental Protection Agency as a potentially responsible party under CERCLA and at sites with aboveground and underground fuel storage tanks. Additionally, the Partnership identified that certain active sites contain environmental conditions which may require further investigation, future remediation or ongoing monitoring activities. The environmental exposures include instances of soil and/or groundwater contamination associated with the handling and storage of fuel oil, gasoline and diesel fuel.

Estimating the extent of the Partnership's responsibility at a particular site, and the method and ultimate cost of remediation of that site, requires making numerous assumptions. As a result, the ultimate cost to remediate any site may differ from current estimates, and will depend, in part, on whether there is additional contamination, not currently known to the Partnership, at that site. However, management believes that the Partnership's past experience provides a reasonable basis for estimating these liabilities. As additional information becomes available, estimates are adjusted as necessary. While management does not anticipate that any such adjustment would be material to the Partnership's financial statements, the result of ongoing or future environmental studies or other factors could alter this expectation and require recording additional liabilities. Management currently cannot determine whether the Partnership will incur additional liabilities or the extent or amount of any such liabilities. As of June 28, 2008 and September 29, 2007, the environmental reserve amounted to \$1,787 and \$2,578, respectively.

Future developments, such as stricter environmental, health or safety laws and regulations thereunder, could affect the Partnership's operations. Management does not anticipate that the cost of the Partnership's compliance with environmental, health and safety laws and regulations, including CERCLA, as currently in effect and

Table of Contents

applicable to known sites will have a material adverse effect on the Partnership's financial condition or results of operations. To the extent there are any environmental liabilities presently unknown to the Partnership or environmental, health or safety laws or regulations are made more stringent, however, there can be no assurance that the Partnership's financial condition or results of operations will not be materially and adversely affected.

12. Guarantees

The Partnership has residual value guarantees associated with certain of its operating leases, related primarily to transportation equipment, with remaining lease periods scheduled to expire periodically through fiscal 2015. Upon completion of the lease period, the Partnership guarantees that the fair value of the equipment will equal or exceed the guaranteed amount, or the Partnership will pay the lessor the difference. Although the fair value of equipment at the end of its lease term has historically exceeded the guaranteed amounts, the maximum potential amount of aggregate future payments the Partnership could be required to make under these leasing arrangements, assuming the equipment is deemed worthless at the end of the lease term, is approximately \$13,434. The fair value of residual value guarantees for outstanding operating leases was de minimis as of June 28, 2008 and September 29, 2007.

13. Pension Plans and Other Postretirement Benefits

The following table provides the components of net periodic benefit costs for the three and nine months ended June 28, 2008 and June 30, 2007:

	Pension Benefits		Pension Benefits	
	Three Months Ended		Nine Months Ended	
	June	June 30,	June	June 30,
	28,	2007	28,	2007
	2008	2007	2008	2007
Interest cost	\$ 2,187	\$ 2,226	\$ 6,562	\$ 6,679
Expected return on plan assets	(2,270)	(2,579)	(6,811)	(7,738)
Recognized net actuarial loss	844	1,329	2,531	3,986
Net periodic benefit cost	\$ 761	\$ 976	\$ 2,282	\$ 2,927

	Postretirement		Postretirement	
	Benefits		Benefits	
	Three Months Ended		Nine Months Ended	
	June	June 30,	June	June 30,
	28,	2007	28,	2007
	2008	2007	2008	2007
Service cost	\$ 2	\$ 3	\$ 6	\$ 9
Interest cost	350	329	1,049	988
Amortization of prior service costs	(122)	(149)	(367)	(448)
Net periodic benefit cost	\$ 230	\$ 183	\$ 688	\$ 549

There are no projected minimum employer contribution requirements under Internal Revenue Service Regulations for fiscal 2008 under our defined benefit pension plan. The projected annual contribution requirements related to the Partnership's postretirement health care and life insurance benefit plan for fiscal 2008 is \$2,200, of which \$1,360 has been contributed during the nine months ended June 28, 2008.

14. Income taxes

For federal income tax purposes, as well as for state income tax purposes in the majority of the states in which the Partnership operates, the earnings attributable to the Partnership, as a separate legal entity, and the Operating Partnership are not subject to income tax at the Partnership level. Rather, the taxable income or loss attributable to the

Partnership, as a separate legal entity, and to the Operating Partnership, which may vary substantially from the income before income taxes, reported by the Partnership in the condensed consolidated statement of operations, are

Table of Contents

includable in the federal and state income tax returns of the individual partners. The aggregate difference in the basis of the Partnership's net assets for financial and tax reporting purposes cannot be readily determined as the Partnership does not have access to information regarding each partner's basis in the Partnership.

The earnings of the corporate entities that do not qualify under the Internal Revenue Code for partnership status are subject to federal and state income taxes. The Partnership's fuel oil and refined fuels, natural gas and electricity, service, HomeTown Hearth & Grill and Suburban Franchising businesses are structured as corporate entities and, as such, are subject to corporate level income tax. However, a number of those corporate entities have experienced operating losses in recent years and, as a result, a full valuation allowance has been provided against the deferred tax assets. As such, at present, many of those entities do not report a tax provision as a result of the full valuation allowance.

As a result of the profitability of the Partnership's fuel oil and refined fuel and natural gas and electricity businesses during the first quarter of fiscal 2008 (fourth quarter of calendar and tax year 2007), the corporate entities reported taxable income which enabled utilization of net operating losses to offset the current cash tax liability. Utilization of these net operating losses resulted in a reversal of a portion of the deferred tax asset valuation allowance established in purchase accounting for the Agway Acquisition, a corresponding reduction in goodwill and, in turn, a \$1,277 deferred tax provision.

In July 2006, the Financial Accounting Standards Board (FASB) issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes An Interpretation of SFAS 109 (FIN 48). FIN 48 requires the use of a two-step approach for recognizing and measuring tax benefits taken or expected to be taken in a tax return and disclosures regarding uncertainties in income tax positions. Only tax positions that meet the more likely than not recognition threshold at the effective date may be recognized on adoption of FIN 48. The Partnership has elected to include interest and penalties related to income tax liabilities, if any, in income tax expense.

The adoption of FIN 48 had no impact on the Partnership's condensed consolidated balance sheet, statement of operations or cash flows. As of June 28, 2008, September 30, 2007 (the date of adoption of FIN 48) and September 29, 2007, the end of the prior fiscal year, the Partnership reported no unrecognized tax benefits nor related interest and penalties in its condensed consolidated balance sheet or statement of operations.

Most of the Partnership's corporate entities are subject to U.S. federal, state and local income tax audits by taxing authorities for years 2001 through 2007.

15. Segment Information

The Partnership manages and evaluates its operations in six segments, four of which are reportable segments: Propane, Fuel Oil and Refined Fuels, Natural Gas and Electricity and Services (formerly, HVAC). The chief operating decision maker evaluates performance of the operating segments using a number of performance measures, including gross margins and income before interest expense and provision for income taxes (operating profit). Costs excluded from these profit measures include corporate overhead expenses not allocated to the operating segments. Unallocated corporate overhead expenses include all costs of back office support functions that are reported as general and administrative expenses in the condensed consolidated statements of operations. In addition, certain costs associated with field operations support that are reported in operating expenses in the condensed consolidated statements of operations, including purchasing, training and safety, are not allocated to the individual operating segments. Thus, operating profit for each operating segment includes only the costs that are directly attributable to the operations of the individual segment. The accounting policies of the operating segments are otherwise the same as those described in the summary of significant accounting policies Note in the Partnership's Annual Report on Form 10-K for the fiscal year ended September 29, 2007.

The propane segment is primarily engaged in the retail distribution of propane to residential, commercial, industrial and agricultural customers and, to a lesser extent, wholesale distribution to large industrial end users. In the residential and commercial markets, propane is used primarily for space heating, water heating, cooking and clothes drying. Industrial customers use propane generally as a motor fuel burned in internal combustion engines that power

Table of Contents

over-the-road vehicles, forklifts and stationary engines, to fire furnaces and as a cutting gas. In the agricultural markets, propane is primarily used for tobacco curing, crop drying, poultry brooding and weed control. The fuel oil and refined fuels segment is primarily engaged in the retail distribution of fuel oil, diesel, kerosene and gasoline to residential and commercial customers for use primarily as a source of heat in homes and buildings. The natural gas and electricity segment is engaged in the marketing of natural gas and electricity to residential and commercial customers in the deregulated energy markets of New York and Pennsylvania. Under this operating segment, the Partnership owns the relationship with the end consumer and has agreements with the local distribution companies to deliver the natural gas or electricity from the Partnership's suppliers to the customer. The services segment is engaged in the sale, installation and servicing of a wide variety of home comfort equipment and parts, particularly in the areas of heating and ventilation. In furtherance of the Partnership's efforts to restructure its field operations and to focus on its core operating segments, during fiscal 2006 the Partnership initiated plans to streamline the service offerings by significantly reducing installation activities and focusing on service offerings that support the Partnership's existing customer base within its propane, refined fuels and natural gas and electricity segments. Certain prior period operating expenses associated with the Partnership's services business have been reclassified from the corporate and propane segments as they were directly attributable to the operations of the services segment.

Table of Contents

The following table presents certain data by reportable segment and provides a reconciliation of total operating segment information to the corresponding consolidated amounts for the periods presented:

	Three Months Ended		Nine Months Ended	
	June 28, 2008	June 30, 2007	June 28, 2008	June 30, 2007

16. Recently Issued Accounting Pronouncements

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. It also establishes a fair value hierarchy that prioritizes information used in developing assumptions when pricing an asset or liability. SFAS 157 is effective for fiscal years beginning after November 15, 2007, which will be the Partnership's 2009 fiscal year beginning September 28, 2008. In February of 2008, the FASB provided an elective

Table of Contents

one-year deferral of the applications of the provisions of SFAS 157 to nonfinancial assets and nonfinancial liabilities that are only measured at fair value on a non-recurring basis. The adoption of SFAS 157 is not expected to have a material effect on the Partnership's consolidated financial position, results of operations and cash flows.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). Under SFAS 159, entities may elect to measure specified financial instruments and warranty and insurance contracts at fair value on a contract-by-contract basis, with changes in fair value recognized in earnings each reporting period. SFAS 159 is effective for fiscal years beginning after November 15, 2007, which will be the Partnership's 2009 fiscal year beginning September 28, 2008. The Partnership is currently in the process of evaluating the impact that SFAS 159 may have on its consolidated financial position, results of operations and cash flows.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements - an Amendment of ARB No. 51* (SFAS 160). SFAS 160 establishes accounting and reporting standards for noncontrolling interests in an entity's subsidiary and alters the way the consolidated income statement is presented. SFAS 160 is effective for fiscal years beginning on or after December 15, 2008, which will be the Partnership's 2010 fiscal year beginning September 27, 2009. As of June 28, 2008, the Partnership has no outstanding noncontrolling interests in any subsidiary; accordingly, the adoption of SFAS 160 should not have any impact on the Partnership's consolidated financial position, results of operations and cash flows.

Also in December 2007, the FASB issued a revised SFAS No. 141 *Business Combinations* (SFAS 141R). Among other things, SFAS 141R requires an entity to recognize acquired assets, liabilities assumed and any noncontrolling interest at their respective fair values as of the acquisition date, clarifies how goodwill involved in a business combination is to be recognized and measured, as well as requires the expensing of acquisition-related costs as incurred. SFAS 141R is effective for business combinations entered into in fiscal years beginning on or after December 15, 2008, which will be the Partnership's 2010 fiscal year beginning September 27, 2009, with early adoption prohibited.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* - an Amendment of FASB Statement No. 133 (SFAS 161). SFAS 161 requires enhanced disclosures about an entity's objectives for using derivative instruments and related hedged items, how those derivative instruments are accounted for under SFAS 133 and how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. SFAS 161 is effective for financial statements for interim or annual periods beginning after November 15, 2008, which will be the second quarter of the Partnership's 2009 fiscal year beginning September 29, 2008. The adoption of SFAS 161 is not expected to have a material effect on the Partnership's consolidated financial position, results of operations and cash flows.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following is a discussion of the financial condition and results of operations of the Partnership as of and for the three and nine months ended June 28, 2008. The discussion should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and the historical consolidated financial statements and notes thereto included in the Annual Report on Form 10-K for the fiscal year ended September 29, 2007.

Executive Overview

The following are factors that regularly affect our operating results and financial condition. In addition, our business is subject to the risks and uncertainties described in Item 1A included in the Annual Report on Form 10-K for the fiscal year ended September 29, 2007.

Product Costs and Supply

The level of profitability in the retail propane, fuel oil, natural gas and electricity businesses is largely dependent on the difference between retail sales price and product cost. The unit cost of our products, particularly propane, fuel oil and natural gas, is subject to volatility as a result of product supply or other market conditions, including, but not limited to, economic and political factors impacting crude oil and natural gas supply or pricing. We enter into product supply contracts that are generally one-year agreements subject to annual renewal, and also purchase product on the open market. We attempt to reduce price risk by pricing product on a short-term basis. Our propane supply contracts typically provide for pricing based upon index formulas using the posted prices established at major supply points such as Mont Belvieu, Texas, or Conway, Kansas (plus transportation costs) at the time of delivery. In certain instances, and when market conditions (relating to our supply arrangements and risk management activities) are favorable as was the case in the propane and fuel oil markets during the first half of fiscal 2007, we are able to purchase product under our supply arrangements at a discount to the spot market. However, such favorable market conditions and margin opportunities were not present for the first nine months of fiscal 2008. Rather, very challenging market conditions in fiscal 2008, characterized by an extreme rise in commodity prices (particularly during the third quarter) coupled with lower volumes resulted in the recognition of realized losses under our hedging and risk management activities which were not fully offset by the sales of the physical inventory as more fully described under Hedging and Risk Management Activities below.

In addition, to supplement our annual purchase requirements, we may utilize forward fixed price purchase contracts to acquire a portion of the propane that we resell to our customers, which allows us to manage our exposure to unfavorable changes in commodity prices and to assure adequate physical supply. The percentage of contract purchases, and the amount of supply contracted for under forward contracts at fixed prices, will vary from year to year based on market conditions.

Product cost changes can occur rapidly over a short period of time and can impact profitability. There is no assurance that we will be able to pass on product cost increases fully or immediately, particularly when product costs increase rapidly. Therefore, average retail sales prices can vary significantly from year to year as product costs fluctuate with propane, fuel oil, crude oil and natural gas commodity market conditions. In addition, in periods of sustained higher commodity prices, as has been experienced over the past several fiscal years, retail sales volumes have been negatively impacted by customer conservation efforts.

Seasonality

The retail propane and fuel oil distribution businesses, as well as the natural gas marketing business, are seasonal because these fuels are primarily used for heating in residential and commercial buildings. Historically, approximately two-thirds of our retail propane volume is sold during the six-month peak heating season from October through March. The fuel oil business tends to experience greater seasonality given its more limited use for space heating and approximately three-fourths of our fuel oil volumes are sold between October and March. Consequently, sales and operating profits are concentrated in our first and second fiscal quarters. Cash flows from

Table of Contents

operations, therefore, are greatest during the second and third fiscal quarters when customers pay for product purchased during the winter heating season. We expect lower operating profits and either net losses or lower net income during the period from April through September (our third and fourth fiscal quarters). To the extent necessary, we will reserve cash from the second and third quarters for distribution to holders of our Common Units in the fourth quarter and following fiscal year first quarter.

Weather

Weather conditions have a significant impact on the demand for our products, in particular propane, fuel oil and natural gas, for both heating and agricultural purposes. Many of our customers rely heavily on propane, fuel oil or natural gas as a heating source. Accordingly, the volume sold is directly affected by the severity of the winter weather in our service areas, which can vary substantially from year to year. In any given area, sustained warmer than normal temperatures will tend to result in reduced propane, fuel oil and natural gas consumption, while sustained colder than normal temperatures will tend to result in greater use.

Hedging and Risk Management Activities

We engage in hedging and risk management activities to reduce the effect of price volatility on our product costs and to ensure the availability of product during periods of short supply. We enter into propane forward and option agreements with third parties, and use fuel oil futures and option contracts traded on the New York Mercantile Exchange (NYMEX), to purchase and sell propane and fuel oil at fixed prices in the future. The majority of the futures, forward and option agreements are used to hedge price risk associated with propane and fuel oil physical inventory, as well as, in certain instances, forecasted purchases of propane or fuel oil. Futures and forward contracts are generally settled physically at the expiration of the contract. Although we use derivative instruments to reduce the effect of price volatility associated with priced physical inventory and forecasted transactions, we do not use derivative instruments for speculative trading purposes. Risk management activities are monitored by an internal Commodity Risk Management Committee, made up of five members of management, through enforcement of our Hedging and Risk Management Policy, reporting to our Audit Committee.

As a result of various market factors during the first half of fiscal 2007, particularly commodity price volatility during the first four months of the fiscal year, we experienced additional margin opportunities due to favorable pricing under certain supply arrangements and from our hedging and risk management activities. These market conditions generated additional operating profit of approximately \$20.0 million during the nine months ended June 30, 2007 compared to the nine months ended June 28, 2008. Supply and risk management transactions may not always result in increased product margins and there can be no assurance that the favorable market conditions that contributed to incremental margin during the first half of fiscal 2007 will be present in the future in order to provide the additional margin opportunities. Very different and challenging factors existed in the first nine months of fiscal 2008. In fact, as a result of the unprecedented rise in commodity prices in a relatively short period of time during the third quarter of fiscal 2008, we realized losses under our short futures positions utilized to hedge price risk associated with a portion of our priced physical inventory. Under our hedging and risk management strategy, realized gains or losses on futures contracts will typically offset losses or gains on the physical inventory once the product is sold to customers at market prices. However, as a result of lower than expected volumes primarily attributable to customer conservation, the timing was such that these losses were not fully offset by sales of the physical product. Our risk management activities had a negative effect on earnings of approximately \$14.5 million during the third quarter of fiscal 2008 compared to the prior year quarter as a result of realized losses on futures contracts. See Item 3 of this Quarterly Report for information about accounting for derivative instruments and hedging activities.

Critical Accounting Policies and Estimates

Our significant accounting policies are summarized in Note 2, Summary of Significant Accounting Policies, included within the Notes to Consolidated Financial Statements section of our Annual Report on Form 10-K for the fiscal year ended September 29, 2007.

Table of Contents***Results of Operations and Financial Condition***

Consistent with the seasonal nature of the propane and fuel oil businesses, we typically experience a net loss in our fiscal third quarter. Net loss for the three months ended June 28, 2008, amounted to \$13.7 million, or \$0.42 per Common Unit, compared to a net loss of \$1.1 million, or \$0.03 per Common Unit, in the prior year quarter. EBITDA (as defined and reconciled below) amounted to \$2.8 million, compared to \$15.3 million for the three months ended June 30, 2007.

Given the retail nature of our operations, we maintain a certain level of priced physical inventory to ensure our field operations have adequate supply commensurate with the time of year. Our strategy has been, and will continue to be, to keep our physical inventory priced relatively close to market for our field operations. Consistent with past practices, we principally utilize futures and/or option contracts traded on the NYMEX to mitigate the price risk associated with our priced physical inventory. Under this risk management strategy, realized gains or losses on futures or option contracts will typically offset losses or gains on the physical inventory once the product is sold. We do not use futures contracts, or other derivative instruments, for speculative trading purposes.

With the unprecedented rise in commodity prices, we reported realized losses from our risk management activities which were not fully offset by sales of the physical product, resulting in a negative effect of \$14.5 million during the third quarter of fiscal 2008. Early in the third quarter of fiscal 2008, as a result of continued market volatility and unpredictability, we made a decision to unwind all of our short futures positions during the third quarter of fiscal 2008. Depending on the movement in commodity prices and the volume of products sold, we may recover a portion of these realized losses in future periods.

Retail propane gallons sold in the third quarter of fiscal 2008 decreased 8.6 million gallons, or 10.8%, to 71.4 million gallons compared to 80.0 million gallons in the prior year quarter. Sales of fuel oil and refined fuels decreased 6.5 million gallons, or 34.0%, to 12.6 million gallons during the third quarter of fiscal 2008 compared to 19.1 million gallons in the prior year quarter. Lower volumes in both segments were attributable to ongoing customer conservation resulting from the historically high commodity prices and the proactive steps we have taken to help manage customer credit risk in this high energy price environment, as well as, to a lesser extent, the warmer than normal temperatures and the effects of eliminating certain lower margin accounts which occurred throughout much of fiscal 2007. In the commodities market, average posted prices for both propane and fuel oil increased to new all-time highs on an almost daily basis throughout the quarter. Overall, average posted prices for propane and fuel oil during the third quarter increased 50.0% and 85.2%, respectively, compared to the prior year third quarter. While weather is not typically a significant contributing factor to operating results in the third quarter, sales volumes were negatively impacted to an extent by significantly warmer than normal temperatures in April 2008 compared to the same period in the prior year.

While the high energy price environment has had a negative effect on sales volumes as a result of ongoing customer conservation, the proactive steps we have taken over the past two years to create a more efficient and cost effective operating structure continue to produce favorable results and have contributed to the overall strength of our cash flow and financial position. Combined operating and general and administrative expenses of \$89.7 million for the third quarter of fiscal 2008 were flat compared to the prior year quarter. Continued savings in payroll and benefit related expenses, including variable compensation resulting from lower earnings, as well as the impact of a lower vehicle count, were offset by higher diesel fuel costs to operate our fleet.

From a cash flow perspective, despite the sustained period of high commodity prices, we continue to fund working capital requirements from cash on hand and have not borrowed under our working capital facility since April 2006. We ended the third quarter of fiscal 2008 with \$118.6 million in cash on hand and are well positioned as we advance into the fourth quarter of fiscal 2008. On the strength of these earnings and cash flows, our Board of Supervisors declared the eighteenth increase (since 1999) in our quarterly distribution from \$0.775 to \$0.80 per Common Unit, or from \$3.10 to \$3.20 on an annualized basis. This increase, the ninth consecutive quarter in which we have increased the annualized rate by at least \$0.05 per Common Unit, equates to an increase of 12.3% compared to the third quarter of fiscal 2007.

Table of Contents

Looking ahead to the remainder of fiscal 2008, we expect that the high commodity price environment will continue to present challenges in each of our markets and will also continue to affect customer buying habits, thus having a possible negative impact on sales volumes. Nonetheless, we believe that our flexible cost structure, focus on operating efficiencies and financial strength are all factors that will help us effectively manage through the challenging operating environment.

Our anticipated cash requirements for the remainder of fiscal 2008 include: (i) maintenance and growth capital expenditures of approximately \$7.7 million; (ii) interest payments of approximately \$7.6 million; (iii) cash distributions of approximately \$26.2 million to our Common Unitholders based on the most recently increased quarterly distribution rate of \$0.80 per Common Unit; and (iv) prepayment of approximately \$15.0 million of our Term Loan from the net proceeds of the sale of our Tirzah storage facility. Based on our current estimates of cash flow from operations and our cash position at the end of the third quarter of fiscal 2008, we do not anticipate the need to borrow under the working capital facility of our Revolving Credit Agreement to meet our working capital requirements for the remainder of fiscal 2008. Our Revolving Credit Agreement provides a working capital facility with available revolving borrowing capacity up to \$175.0 million (unused borrowing capacity of \$119.2 million after considering outstanding letters of credit of \$55.8 million as of June 28, 2008).

Three Months Ended June 28, 2008 Compared to Three Months Ended June 30, 2007***Revenues***

(Dollars in thousands)	Three Months Ended		Increase /	Percent
	June 28,	June 30,	(Decrease)	Increase /
	2008	2007		(Decrease)
Revenues				
Propane	\$ 216,999	\$ 188,772	\$ 28,227	15.0%
Fuel oil and refined fuels	55,262	49,021	6,241	12.7%
Natural gas and electricity	22,507	20,182	2,325	11.5%
Services	9,184	11,662	(2,478)	(21.2%)
All other	1,524	1,817	(293)	(16.1%)
Total revenues	\$ 305,476	\$ 271,454	\$ 34,022	12.5%

Total revenues increased \$34.0 million, or 12.5%, to \$305.5 million for the three months ended June 28, 2008 compared to \$271.5 million for the three months ended June 30, 2007, as lower volumes were offset by higher average selling prices associated with higher product costs. Volumes were lower than the prior year third quarter due to ongoing customer conservation resulting from the historically high commodity prices, as well as, to a lesser extent, warmer than normal temperatures during the month of April 2008 in our service territories and the effects of eliminating certain lower margin accounts which occurred throughout much of the prior year. In addition, in the high energy price environment, we have taken proactive steps to help our customers manage their household energy costs and to help manage customer credit risk which has had a negative impact on volumes sold.

Revenues from the distribution of propane and related activities of \$217.0 million in the third quarter of fiscal 2008 increased \$28.2 million, or 15.0%, compared to \$188.8 million in the prior year quarter, primarily due to higher average selling prices, partially offset by lower volumes which were primarily attributable to ongoing customer conservation. Retail propane gallons sold in the third quarter of fiscal 2008 decreased 8.6 million gallons, or 10.8%, to 71.4 million gallons from 80.0 million gallons in the prior year quarter. The average posted price of propane during the third quarter of fiscal 2008 increased approximately 50.0% compared to the average posted prices in the prior year quarter, while our average propane selling prices in the third quarter of fiscal 2008 increased approximately 28.6% compared to the prior year quarter. Additionally, revenues from wholesale and other propane activities for the three months ended June 28, 2008 increased \$2.3 million compared to the prior year quarter.

Table of Contents

Revenues from the distribution of fuel oil and refined fuels of \$55.3 million in the third quarter of fiscal 2008 increased \$6.2 million, or 12.7%, from \$49.0 million in the prior year quarter, primarily due to higher average selling prices, partially offset by lower volumes. Fuel oil and refined fuels gallons sold in the third quarter of fiscal 2008 decreased 6.5 million gallons, or 34.0%, to 12.6 million gallons from 19.1 million gallons in the prior year quarter. Lower volumes in our fuel oil and refined fuels segment were attributable to the impact of ongoing customer conservation from continued high energy prices, combined with our decision to exit certain lower margin diesel and gasoline businesses. Our decision to exit the majority of our low sulfur diesel and gasoline businesses resulted in a reduction in volumes in the fuel oil and refined fuels segment of approximately 2.9 million gallons, or 43.9% of the total volume decline in the third quarter of fiscal 2008 compared to the prior year quarter. The average posted price of fuel oil during the third quarter of fiscal 2008 increased approximately 85.2% compared to the average posted prices in the prior year quarter, while our average selling prices in our fuel oil and refined fuels segment increased approximately 63.8% compared to the prior year quarter.

Revenues in our natural gas and electricity segment increased \$2.3 million, or 11.5%, to \$22.5 million for the three months ended June 28, 2008 compared to \$20.2 million in the prior year quarter as a result of higher average selling prices for both electricity and natural gas, partially offset by lower natural gas and, to a lesser extent, electricity volumes. Revenues in our services segment decreased 21.2% to \$9.2 million in the third quarter of fiscal 2008 from \$11.7 million in the prior year quarter as a result of the decision to reduce the level of certain installation activities. The focus of our ongoing service offerings are in support of our existing core commodity segments.

Cost of Products Sold

(Dollars in thousands)	Three Months Ended		Increase / (Decrease)	Percent Increase / (Decrease)
	June 28, 2008	June 30, 2007		
Cost of products sold				
Propane	\$ 135,545	\$ 107,689	\$ 27,856	25.9%
Fuel oil and refined fuels	54,518	38,520	15,998	41.5%
Natural gas and electricity	19,780	16,710	3,070	18.4%
Services	2,437	3,271	(834)	(25.5%)
All other	694	1,034	(340)	(32.9%)
Total cost of products sold	\$ 212,974	\$ 167,224	\$ 45,750	27.4%
As a percent of total revenues	69.7%	61.6%		

The cost of products sold reported in the condensed consolidated statements of operations represents the weighted average unit cost of propane and fuel oil sold, including transportation costs to deliver product from our supply points to storage or to our customer service centers. Cost of products sold also includes the cost of natural gas and electricity, as well as the cost of appliances and related parts sold or installed by our customer service centers computed on a basis that approximates the average cost of the products. Unrealized (non-cash) gains or losses from changes in the fair value of derivative instruments that are not designated as cash flow hedges are recorded in each quarterly reporting period within cost of products sold. Cost of products sold is reported exclusive of any depreciation and amortization; these amounts are reported separately within the condensed consolidated statements of operations.

Cost of products sold increased \$45.8 million, or 27.4%, to \$213.0 million for the three months ended June 28, 2008 compared to \$167.2 million in the prior year quarter. The increase was primarily attributable to the impact of the unprecedented rise in product costs on volumes sold, as well as the \$14.5 million impact of realized losses from risk management activities discussed above. Cost of products sold in the fiscal 2008 third quarter also included a \$4.7 million unrealized (non-cash) gain representing the net change in the fair value of derivative instruments during the period, compared to a \$0.2 million unrealized (non-cash) loss in the prior year quarter resulting in a decrease of \$4.9 million in cost of products sold for the three months ended June 28, 2008 compared to the prior year quarter.

Table of Contents

The unrealized gain recognized during the third quarter of fiscal 2008 represented the reversal of previously recognized unrealized losses on derivative instruments as those instruments were settled during the period and therefore, reported as realized losses.

Cost of products sold associated with the distribution of propane and related activities of \$135.5 million increased \$27.9 million, or 25.9%, compared to the prior year quarter. Higher average propane costs resulted in an increase of \$35.6 million in cost of products sold during the third quarter of fiscal 2008 compared to the prior year quarter. The impact of the sharp increase in commodity prices was partially offset by lower propane volumes which resulted in a \$10.6 million decrease in cost of products sold during the third quarter of fiscal 2008 compared to the prior year quarter. The increase in wholesale and other propane revenues, noted above, increased cost of products sold by \$2.9 million compared to the prior year period.

Cost of products sold associated with our fuel oil and refined fuels segment of \$54.5 million increased \$16.0 million, or 41.5%, compared to the prior year quarter. Higher average fuel oil costs resulted in an increase of \$19.7 million in cost of products sold during the third quarter of fiscal 2008 compared to the prior year quarter. The impact of the sharp increase in commodity prices was partially offset by lower fuel oil sales volumes, which resulted in a \$13.3 million decrease in cost of products sold during the third quarter of fiscal 2008 compared to the prior year quarter. In addition, as described above, risk management activities during the third quarter of fiscal 2008 resulted in a \$14.5 million increase in cost of products sold compared to the prior year as a result of realized losses on futures contracts. The net change in the fair value of derivative instruments, representing unrealized (non-cash) gains, during the period resulted in a \$4.9 million decrease in cost of products sold associated with the distribution of fuel oil and refined fuels compared to the prior year.

Cost of products sold in our natural gas and electricity segment of \$19.8 million increased \$3.1 million, or 18.4%, compared to the prior year quarter primarily due to higher average natural gas and electricity costs. Cost of products sold in our services segment of \$2.4 million decreased \$0.8 million, or 25.5%, compared to the prior year quarter primarily due to lower sales volumes.

For the quarter ended June 28, 2008, total cost of products sold represented 69.7% of revenues compared to 61.6% in the prior year quarter. This increase was primarily attributable to the significant increase in product costs, which we were not able to fully pass on to customers, as well as the negative effect of higher commodity prices on our risk management activities of \$9.6 million during the third quarter of fiscal 2008 compared to the prior year quarter, representing the net impact of the aforementioned \$14.5 million of realized losses offset by \$4.9 million of unrealized (non cash) gains representing the reversal of previously recognized unrealized losses on derivative instruments which were settled during the period.

Operating Expenses

(Dollars in thousands)	Three Months Ended		Decrease	Percent Decrease
	June 28, 2008	June 30, 2007		
Operating expenses	\$76,455	\$77,076	\$(621)	(0.8%)
As a percent of total revenues	25.0%	28.4%		

All costs of operating our retail distribution and appliance sales and service operations are reported within operating expenses in the condensed consolidated statements of operations. These operating expenses include the compensation and benefits of field and direct operating support personnel, costs of operating and maintaining our vehicle fleet, overhead and other costs of our purchasing, training and safety departments and other direct and indirect costs of operating our customer service centers.

Operating expenses of \$76.5 million for the three months ended June 28, 2008 decreased \$0.6 million, or 0.8%, compared to \$77.1 million in the prior year quarter as a result of our continued efforts to drive operational efficiencies and reduce costs across all operating segments. Payroll and benefit related expenses declined \$1.3

Table of Contents

million due to lower headcount, as well as lower variable compensation associated with lower earnings in the third quarter of fiscal 2008 compared to the prior year. Savings from payroll and benefit related expenses and the impact of a lower vehicle count were partially offset by higher diesel fuel costs to operate our fleet.

General and Administrative Expenses

(Dollars in thousands)	Three Months Ended		Increase	Percent Increase
	June 28, 2008	June 30, 2007		
General and administrative expenses	\$13,268	\$12,587	\$681	5.4%
As a percent of total revenues	4.3%	4.6%		

All costs of our back office support functions, including compensation and benefits for executives and other support functions, as well as other costs and expenses to maintain finance and accounting, treasury, legal, human resources, corporate development and the information systems functions are reported within general and administrative expenses in the condensed consolidated statements of operations.

General and administrative expenses of \$13.3 million for the three months ended June 28, 2008 increased \$0.7 million, or 5.4%, compared to \$12.6 million during the prior year quarter. Continued savings from lower payroll and benefit related expenses, including lower variable compensation due to lower earnings, were more than offset by higher professional services fees and other miscellaneous costs.

Depreciation and Amortization

(Dollars in thousands)	Three Months Ended		Decrease	Percent Decrease
	June 28, 2008	June 30, 2007		
Depreciation and amortization	\$7,159	\$7,306	\$(147)	(2.0%)
As a percent of total revenues	2.3%	2.7%		

Depreciation and amortization expense of \$7.2 million for the three months ended June 28, 2008 was relatively unchanged compared to the prior year quarter.

Interest Expense, net

(Dollars in thousands)	Three Months Ended		Increase	Percent Increase
	June 28, 2008	June 30, 2007		
Interest expense, net	\$9,524	\$8,623	\$901	10.4%
As a percent of total revenues	3.1%	3.2%		

Net interest expense increased \$0.9 million, or 10.4%, to \$9.5 million for the three months ended June 28, 2008, compared to \$8.6 million in the prior year quarter as a result of lower market interest rates for short-term investments, which contributed to less interest income earned. As has been the case since April 2006, there were no borrowings under our working capital facility as seasonal working capital needs have been funded through cash on hand and cash flow from operations. We ended the third quarter of fiscal 2008 in a strong cash position with \$118.6 million in cash on the condensed consolidated balance sheet.

Table of Contents

Discontinued Operations. On October 2, 2007, the Operating Partnership completed the sale of its Tirzah, South Carolina underground granite propane storage cavern, and associated 62-mile pipeline, for approximately \$53.7 million in cash, after taking into account certain adjustments. As a result of this sale, we reported a \$43.7 million gain on disposal of discontinued operations in the first quarter of fiscal 2008. The results of operations from the Tirzah facilities have been reported within discontinued operations on the condensed consolidated statements of operations for the three months ended June 30, 2007 and the assets and liabilities have been classified as held for sale on the condensed consolidated balance sheet as of September 29, 2007.

During the third quarter of fiscal 2007, we sold one customer service center for net cash proceeds of \$0.3 million which we received in the fourth quarter of fiscal 2007 and reported a gain on sale of \$0.2 million.

Net Loss and EBITDA. Net loss for the third quarter of fiscal 2008 amounted to \$13.7 million, or \$0.42 per Common Unit, an increase of \$12.6 million, or \$0.39 per Common Unit, compared to the prior year quarter's net loss of \$1.1 million, or \$0.03 per Common Unit. EBITDA amounted to \$2.8 million for the three months ended June 28, 2008 compared to \$15.3 million in the prior year third quarter.

EBITDA represents income before deducting interest expense, income taxes, depreciation and amortization. Our management uses EBITDA as a measure of liquidity and we disclose it because we believe that it provides our investors and industry analysts with additional information to evaluate our ability to meet our debt service obligations and to pay our quarterly distributions to holders of our Common Units. In addition, certain of our incentive compensation plans covering executives and other employees utilize EBITDA as the performance target. Moreover, our Revolving Credit Agreement requires us to use EBITDA as a component in calculating our leverage and interest coverage ratios. EBITDA is not a recognized term under GAAP and should not be considered as an alternative to net income or net cash provided by operating activities determined in accordance with GAAP. Because EBITDA as determined by us excludes some, but not all, items that affect net income, it may not be comparable to EBITDA or similarly titled measures used by other companies.

The following table sets forth (i) our calculations of EBITDA and (ii) a reconciliation of EBITDA, as so calculated, to our net cash provided by operating activities:

	Three Months Ended	
	June 28, 2008	June 30, 2007
(Dollars in thousands)		
Net loss	\$ (13,747)	\$ (1,140)
Add:

Net cash provided by operating activities	\$ 48,601	\$ 46,788

Nine Months Ended June 28, 2008 Compared to Nine Months Ended June 30, 2007

Revenues

(Dollars in thousands)	Nine Months Ended		Increase / (Decrease)	Percent Increase / (Decrease)
	June 28, 2008	June 30, 2007		
Revenues				
Propane	\$ 946,700	\$ 865,808	\$ 80,892	9.3%
Fuel oil and refined fuels	247,609	229,106	18,503	8.1%
Natural gas and electricity	84,693	79,382	5,311	6.7%
Services	34,752	44,792	(10,040)	(22.4%)
All other	3,928	5,385	(1,457)	(27.1%)
Total revenues	\$ 1,317,682	\$ 1,224,473	\$ 93,209	7.6%

Total revenues increased \$93.2 million, or 7.6%, to \$1,317.7 million for the nine months ended June 28, 2008 compared to \$1,224.5 million for the nine months ended June 30, 2007, as lower volumes were offset by higher average selling prices associated with higher product costs. Volumes in our propane, fuel oil and refined fuels and

Table of Contents

natural gas and electricity segments were lower for the first nine months of the fiscal year compared to the similar period of the prior year primarily due to ongoing customer conservation resulting from the historically high commodity prices, proactive steps to manage customer credit risk, warmer weather in our service territories and, to a lesser extent, the effects of eliminating certain lower margin accounts which occurred throughout much of the prior year. From a weather perspective, average heating degree days in our service territories for the nine months ended June 28, 2008 were 94% of normal and flat compared to the prior year period; however, the winter heating season of fiscal 2008 was warmer than the comparable period of prior year, particularly in the northeast where average heating degree days were 7% below normal and the prior year period, thus having a negative effect on volumes.

Revenues from the distribution of propane and related activities of \$946.7 million for the nine months ended June 28, 2008 increased \$80.9 million, or 9.3%, compared to \$865.8 million for the nine months ended June 30, 2007, primarily due to higher average selling prices, partially offset by lower volumes which were attributable to ongoing customer conservation. Retail propane gallons sold in the first nine months of fiscal 2008 decreased 39.0 million gallons, or 10.6%, to 329.6 million gallons from 368.6 million gallons in the similar period of the prior year. The average posted price of propane during the first nine months of fiscal 2008 increased approximately 53.1% compared to the average posted prices in the similar period of the prior year, while our average propane selling prices in the first nine months of fiscal 2008 increased approximately 25.7% compared to the prior year period. Additionally, revenues from wholesale and other propane activities for the nine months ended June 28, 2008 decreased \$19.2 million compared to the prior year period.

Revenues from the distribution of fuel oil and refined fuels of \$247.6 million for the nine months ended June 28, 2008 increased \$18.5 million, or 8.1%, from \$229.1 million in the prior year period, primarily due to higher average selling prices, partially offset by lower volumes. Fuel oil and refined fuels gallons sold in the first nine months of fiscal 2008 decreased 24.0 million gallons, or 26.2%, to 67.6 million gallons from 91.6 million gallons in the prior year period. Lower volumes in our fuel oil and refined fuels segment were attributable to the impact of ongoing customer conservation from continued high energy prices combined with our decision to exit certain lower margin diesel and gasoline businesses. Our decision to exit the majority of our low sulfur diesel and gasoline businesses resulted in a reduction in volumes in the fuel oil and refined fuels segment of approximately 7.3 million gallons, or 30.4% of the total volume decline, in the first nine months of fiscal 2008 compared to the prior year period. The average posted price of fuel oil during the first nine months of fiscal 2008 increased approximately 66.2% compared to the average posted prices in the prior year period, while our average selling prices in our fuel oil and refined fuels segment increased approximately 44.6% compared to the prior year period.

Revenues in our natural gas and electricity segment increased \$5.3 million, or 6.7%, to \$84.7 million for the nine months ended June 28, 2008 compared to \$79.4 million in the prior year period as a result of higher average selling prices for both electricity and natural gas, partially offset by lower electricity and natural gas volumes. Revenues in our services segment decreased 22.4% to \$34.8 million in the first nine months of fiscal 2008 from \$44.8 million in the prior year period as a result of the decision to reduce the level of certain installation activities. The focus of our ongoing service offerings are in support of our existing core commodity segments.

Table of Contents*Cost of Products Sold*

(Dollars in thousands)	Nine Months Ended		Increase / (Decrease)	Percent Increase / (Decrease)
	June 28, 2008	June 30, 2007		
Cost of products sold				
Propane	\$ 575,678	\$ 480,639	\$ 95,039	19.8%
Fuel oil and refined fuels	213,194	163,738	49,456	30.2%
Natural gas and electricity	71,271	64,783	6,488	10.0%
Services	9,614	13,356	(3,742)	(28.0%)
All other	1,689	2,929	(1,240)	(42.3%)
Total cost of products sold	\$ 871,446	\$ 725,445	\$ 146,001	20.1%
As a percent of total revenues	66.1%	59.2%		

Cost of products sold increased \$146.0 million, or 20.1%, to \$871.4 million for the nine months ended June 28, 2008 compared to \$725.4 million in the prior year period primarily due to the dramatic rise in product costs. In addition, favorable market conditions relating to our supply arrangements and risk management activities contributed approximately \$20.0 million of incremental margin opportunities in the first nine months of the prior year. As reported throughout much of fiscal 2007, favorable market conditions impacting the supply and pricing structure for propane and fuel oil provided additional margin opportunities during the first and second quarters of fiscal 2007. As a result of the significant rise in commodity prices and the market volatility throughout fiscal 2008, these favorable market conditions and resulting incremental margin opportunities were not present during the first nine months of fiscal 2008, thus having a negative effect on the year-over-year comparison of financial results. Additionally, the year-over-year increase in cost of products sold was also attributable to the realized losses on futures contracts associated with risk management activities which had a negative effect of approximately \$14.5 million during the third quarter of fiscal 2008.

Cost of products sold in the first nine months of fiscal 2008 included a \$0.3 million unrealized (non-cash) loss representing the net change in the fair value of derivative instruments during the period, compared to a \$7.8 million unrealized (non-cash) loss in the prior year period resulting in a decrease of \$7.5 million in cost of products sold for the nine months ended June 28, 2008 compared to the similar period of the prior year.

Cost of products sold associated with the distribution of propane and related activities of \$575.7 million increased \$95.0 million, or 19.8%, compared to the prior year period. Higher average propane costs resulted in an increase of \$157.7 million in cost of products sold during the first nine months of fiscal 2008 compared to the prior year period. The impact of the sharp increase in commodity prices was partially offset by lower propane volumes which resulted in a \$46.4 million decrease in cost of products sold during the first nine months of fiscal 2008 compared to the prior year period. Results of lower wholesale and other propane revenues, noted above, decreased cost of products sold by approximately \$14.6 million compared to the prior year period. In addition, the net change in the fair value of derivative instruments during the period resulted in a \$1.7 million decrease in cost of products sold associated with the distribution of propane and related activities compared to the prior year.

Cost of products sold associated with our fuel oil and refined fuels segment of \$213.2 million increased \$49.5 million, or 30.2%, compared to the prior year period. Higher average fuel oil costs resulted in an increase of \$85.2 million in cost of products sold during the first nine months of fiscal 2008 compared to the prior year period. This increase was partially offset by lower fuel oil sales volumes, which resulted in a \$44.4 million decrease in cost of products sold during the first nine months of fiscal 2008 compared to the prior year period. In addition, as described above, risk management activities during the third quarter of fiscal 2008 resulted in a \$14.5 million increase in cost of products sold compared to the prior year period as a result of realized losses on futures contracts. The net change in the fair value of derivative instruments during the period resulted in a \$5.8 million decrease in cost of products sold associated with the distribution of fuel oil and refined fuels compared to the prior year.

Table of Contents

Cost of products sold in our natural gas and electricity segment of \$71.3 million increased \$6.5 million, or 10.0%, compared to the prior year period due to higher average electricity costs and, to a lesser extent, natural gas costs. Cost of products sold in our services segment of \$9.6 million decreased \$3.7 million, or 28.0%, compared to the prior year period primarily due to lower sales volumes.

For the nine months ended June 28, 2008, total cost of products sold represented 66.1% of revenues compared to 59.2% in the prior year period. This increase was primarily attributable to the significant increase in product costs which we were not able to fully pass on to customers, as well as the favorable market conditions discussed above that contributed approximately \$20.0 million of incremental margin opportunities in the first nine months of the prior year that were not present in the first nine months of fiscal 2008 and the negative effect of higher commodity prices on our risk management activities which resulted in the \$14.5 million of realized losses during the third quarter of fiscal 2008.

Operating Expenses

(Dollars in thousands)	Nine Months Ended		Decrease	Percent Decrease
	June 28, 2008	June 30, 2007		
Operating expenses	\$235,495	\$247,819	\$(12,324)	(5.0%)
As a percent of total revenues	17.9%	20.2%		

Operating expenses of \$235.5 million for the nine months ended June 28, 2008 decreased \$12.3 million, or 5.0%, compared to \$247.8 million in the prior year period as a result of our continued efforts to drive operational efficiencies and reduce costs across all operating segments. Payroll and benefit related expenses declined \$13.7 million due to lower headcount, as well as lower variable compensation associated with lower earnings in the first nine months of fiscal 2008 compared to the similar period of the prior year. In addition, vehicle expenditures decreased \$2.1 million compared to the prior year period as a result of a lower vehicle count and route efficiencies despite a significant increase in the cost of fuel to operate our fleet. Savings from payroll and benefit related expenses and vehicle expenditures were partially offset by higher bad debt expense and other costs to operate our customer service centers in the high energy price environment.

General and Administrative Expenses

(Dollars in thousands)	Nine Months Ended		Decrease	Percent Decrease
	June 28, 2008	June 30, 2007		
General and administrative expenses	\$37,632	\$42,667	\$(5,035)	(11.8%)
As a percent of total revenues	2.9%	3.5%		

General and administrative expenses of \$37.6 million for the nine months ended June 28, 2008 decreased \$5.0 million, or 11.8%, compared to \$42.7 million during the prior year period. The decrease was primarily attributable to a reduction in variable compensation resulting from lower earnings in the first nine months of fiscal 2008 compared to the similar period of the prior year and the reduction of compensation costs recognized under certain long-term incentive plans.

Restructuring Charges and Severance Costs. We did not record any restructuring charges for the nine months ended June 28, 2008. For the nine months ended June 30, 2007, we recorded a charge of \$1.5 million primarily related to employee termination costs incurred as a result of further refinements to our plan to restructure our services business segment.

Table of Contents*Depreciation and Amortization*

(Dollars in thousands)	Nine Months Ended		Decrease	Percent Decrease
	June 28, 2008	June 30, 2007		
Depreciation and amortization	\$21,325	\$21,762	\$(437)	(2.0%)
As a percent of total revenues	1.6%	1.8%		

Depreciation and amortization expense of \$21.3 million for the nine months ended June 28, 2008 was relatively unchanged compared to the prior year period.

Interest Expense, net

(Dollars in thousands)	Nine Months Ended		Increase	Percent Increase
	June 28, 2008	June 30, 2007		
Interest expense, net	\$27,330	\$27,161	\$169	0.6%
As a percent of total revenues	2.1%	2.2%		

Net interest expense increased \$0.2 million, or 0.6%, to \$27.3 million for the nine months ended June 28, 2008, compared to \$27.2 million in the prior year period as a result of lower market interest rates for short-term investments, which contributed to less interest income earned. As has been the case since April 2006, there were no borrowings under our working capital facility as seasonal working capital needs have been funded through cash on hand and cash flow from operations. We ended the third quarter of fiscal 2008 in a strong cash position with \$118.6 million in cash on the condensed consolidated balance sheet.

Discontinued Operations. On October 2, 2007, the Operating Partnership completed the sale of its Tirzah, South Carolina underground granite propane storage cavern, and associated 62-mile pipeline, for approximately \$53.7 million in cash, after taking into account certain adjustments. As a result of this sale, we reported a \$43.7 million gain on disposal of discontinued operations during the nine months ended June 28, 2008. The results of operations from the Tirzah facilities have been reported within discontinued operations on the condensed consolidated statements of operations for the first nine months of fiscal 2007 and the assets and liabilities have been classified as held for sale on the condensed consolidated balance sheet as of September 29, 2007.

We continuously evaluate our existing operations to identify opportunities to optimize the return on assets employed and selectively divest operations in slower growing or non-strategic markets and seek to reinvest in markets that are considered to present more opportunities for growth. In line with that strategy, during the first quarter of fiscal 2007, in a non-cash transaction, we disposed of nine customer service centers considered to be non-strategic in exchange for three customer service centers of another company located in Alaska. We reported a \$1.0 million gain within discontinued operations during the nine months ended June 30, 2007 for the amount by which the fair value of assets relinquished exceeded the carrying value of the assets relinquished. As described above, during the third quarter of fiscal 2007 we sold one customer service center and reported a gain of \$0.2 million.

Net Income and EBITDA. Net income for the nine months ended June 28, 2008 amounted to \$166.2 million, or \$5.08 per Common Unit, an increase of \$6.8 million compared to the prior year period of \$159.4 million, or \$4.90 per Common Unit. EBITDA (as defined and reconciled below) for the first nine months of fiscal 2008 amounted to \$216.8 million, an increase of \$6.6 million compared to \$210.2 million in the prior year period.

The following table sets forth (i) our calculations of EBITDA and (ii) a reconciliation of EBITDA, as so calculated, to our net cash provided by operating activities:

(Dollars in thousands)	Nine Months Ended	
	June 28, 2008	June 30, 2007
Net income	\$ 166,205	\$ 159,374
Add:		

Edgar Filing: SUBURBAN PROPANE PARTNERS LP - Form 10-Q

Provision for income taxes	1,956	1,529
Interest expense, net	27,330	27,161
Depreciation and amortization continuing operations	21,325	21,762
Depreciation and amortization discontinued operations		375
EBITDA	216,816	210,201
Add (subtract):		
Provision for income taxes current	(679)	(1,529)
Interest expense, net	(27,330)	(27,161)

Gain on disposal of property, plant and equipment, net	(1,821)	(2,401)
Gain on disposal of discontinued operations	(43,707)	(1,205)
Changes in working capital and other assets and liabilities	(87,794)	(51,999)
Net cash provided by operating activities	\$ 56,988	\$ 128,015

Table of Contents**Liquidity and Capital Resources*****Analysis of Cash Flows***

Operating Activities. Due to the seasonal nature of the propane and fuel oil businesses, cash flows from operating activities are greater during the winter and spring seasons (our second and third fiscal quarters) as customers pay for products purchased during the heating season. For the nine months ended June 28, 2008, net cash provided by operating activities was \$57.0 million compared to net cash provided by operating activities of \$128.0 million for the first nine months of the prior year. The decrease in net cash provided by operating activities was primarily attributable to lower earnings from continuing operations and the significant rise in propane and fuel oil commodity prices that resulted in a significantly larger investment in working capital in comparison to the first nine months of fiscal 2007. Despite the higher working capital requirements driven by the higher commodity price environment, we continue to fund working capital through operating cash flow without the need to access the working capital facility of our Revolving Credit Agreement. In addition, the increased investment in working capital was also attributable to the payment of variable compensation during the first nine months of fiscal 2008 in respect of fiscal 2007 earnings compared to lower variable compensation paid during the first nine months of the prior fiscal year in respect of fiscal 2006 earnings.

Investing Activities. Net cash provided by investing activities of \$39.9 million for the nine months ended June 28, 2008 consisted of the net proceeds from the sale of discontinued operations of \$53.7 million and the net proceeds from the sale of property, plant and equipment of \$3.5 million, partially offset by capital expenditures of \$17.3 million (including \$8.6 million for maintenance expenditures and \$8.7 million to support the growth of operations). Net cash used in investing activities of \$14.7 million for the nine months ended June 30, 2007 consisted of capital expenditures of \$19.7 million (including \$6.8 million for maintenance expenditures and \$12.9 million to support the growth of operations), partially offset by the net proceeds from the sale of property, plant and equipment of \$5.0 million.

Financing Activities. Net cash used in financing activities for the nine months ended June 28, 2008 of \$74.9 million reflects quarterly distributions to Common Unitholders at a rate of \$0.75 per Common Unit paid in respect of the fourth quarter of fiscal 2007, \$0.7625 and \$0.775 per Common Unit paid in respect of the first and second quarter of fiscal 2008, respectively. Net cash used in financing activities for the nine months ended June 30, 2007 of \$67.0 million reflects quarterly distributions to Common Unitholders at a rate of \$0.6625 per Common Unit paid in respect of the fourth quarter of fiscal 2006, \$0.6875 and \$0.70 per Common Unit paid in respect of the first and second quarter of fiscal 2007, respectively.

Summary of Long-Term Debt Obligations and Revolving Credit Lines

Our long-term borrowings and revolving credit lines consist of \$425.0 million in 6.875% senior notes due December 2013 (the 2003 Senior Notes) and a Revolving Credit Agreement at the Operating Partnership level which provides a five-year \$125.0 million term loan due March 31, 2010 (the Term Loan) and a separate working capital facility which provides available credit up to \$175.0 million. There were no outstanding borrowings under the working capital facility as of June 28, 2008 and there have been no borrowings under our working capital facility since April 2006. We have standby letters of credit issued under the working capital facility of the Revolving Credit Agreement in the aggregate amount of \$55.8 million in support of retention levels under our self-insurance programs and certain lease obligations which expire periodically through March 1, 2009. Therefore, as of June 28, 2008 we had available borrowing capacity of \$119.2 million under the working capital facility of the Revolving Credit Agreement. Additionally, under the Revolving Credit Agreement our Operating Partnership is authorized to incur additional indebtedness of up to \$10.0 million in connection with capital leases and up to \$20.0 million in short-term borrowings during the period from December 1 to April 1 in each fiscal year in order to meet working capital needs during periods of peak demand, if necessary. Because of our cash position, operating results and cash flow, we did not make any such short-term borrowings during the first nine months of fiscal 2008.

Table of Contents

The 2003 Senior Notes mature on December 15, 2013 and require semi-annual interest payments. We are permitted to redeem some or all of the 2003 Senior Notes any time on or after December 15, 2008 at redemption prices specified in the indenture governing the 2003 Senior Notes. In addition, the 2003 Senior Notes have a change of control provision that would require us to offer to repurchase the notes at 101% of the principal amount repurchased, if the holders of the notes elected to exercise the right of repurchase. Borrowings under the Revolving Credit Agreement, including the Term Loan, bear interest at a rate based upon LIBOR plus an applicable margin. An annual facility fee ranging from 0.375% to 0.50%, based upon certain financial tests, is payable quarterly whether or not borrowings occur.

In connection with the Term Loan, our Operating Partnership also entered into an interest rate swap contract with a notional amount of \$125.0 million with the issuing lender. Effective March 31, 2005 through March 31, 2010, our Operating Partnership will pay a fixed interest rate of 4.66% to the issuing lender on the notional principal amount of \$125.0 million, effectively fixing the LIBOR portion of the interest rate at 4.66%. In return, the issuing lender will pay to our Operating Partnership a floating rate, namely LIBOR, on the same notional principal amount. The applicable margin above LIBOR, as defined in the Revolving Credit Agreement, will be paid in addition to this fixed interest rate of 4.66%.

Under the Revolving Credit Agreement, our Operating Partnership must maintain a leverage ratio (the ratio of total debt to EBITDA) of less than 4.0 to 1 and an interest coverage ratio (the ratio of EBITDA to interest expense) of greater than 2.5 to 1 at the Partnership level. Under the 2003 Senior Note indenture, the Partnership is generally permitted to make cash distributions equal to available cash, as defined, as of the end of the immediately preceding quarter, if no event of default exists or would exist upon making such distributions, and the Partnership's consolidated fixed charge coverage ratio, as defined, is greater than 1.75 to 1. Under the Revolving Credit Agreement, as long as no default exists or would result, the Partnership is permitted to make cash distributions not more frequently than quarterly in an amount not to exceed available cash, as defined, for the immediately preceding fiscal quarter. The Revolving Credit Agreement and the 2003 Senior Notes both contain various restrictive and affirmative covenants applicable to our Operating Partnership and us, respectively. These covenants include (i) restrictions on the incurrence of additional indebtedness and (ii) restrictions on certain liens, investments, guarantees, loans, advances, payments, mergers, consolidations, distributions, sales of assets and other transactions. We were in compliance with all covenants and terms of all of our debt agreements as of June 28, 2008 and September 29, 2007.

Under the Revolving Credit Agreement, proceeds from the sale, transfer or other disposition of any asset of the Operating Partnership, other than the sale of inventory in the ordinary course of business, in excess of \$15 million must be used to acquire productive assets within twelve months of receipt of the proceeds. Any proceeds not used within twelve months of receipt to acquire productive assets must be used to prepay the outstanding principal of the Term Loan. We expect to prepay approximately \$15.0 million on the Term Loan from the net proceeds of the sale of our Tirzah storage facility which closed on October 2, 2007.

Partnership Distributions

We are required to make distributions in an amount equal to all of our Available Cash, as defined in the Third Amended and Restated Partnership Agreement, as amended, no more than 45 days after the end of each fiscal quarter to holders of record on the applicable record dates. Available Cash, as defined in the Partnership Agreement, generally means all cash on hand at the end of the respective fiscal quarter less the amount of cash reserves established by the Board of Supervisors in its reasonable discretion for future cash requirements. These reserves are retained for the proper conduct of our business, the payment of debt principal and interest and for distributions during the next four quarters. The Board of Supervisors reviews the level of Available Cash on a quarterly basis based upon information provided by management.

On July 24, 2008, we announced a quarterly distribution of \$0.80 per Common Unit, or \$3.20 on an annualized basis, in respect of the third quarter of fiscal 2008 payable on August 12, 2008 to holders of record on August 5, 2008. This quarterly distribution included an increase of \$0.025 per Common Unit, or \$0.10 per Common Unit on an annualized basis, representing the eighteenth increase since our recapitalization in 1999 and a 12.3% increase in the quarterly distribution rate compared to the third quarter of the prior year.

Table of Contents***Other Commitments***

We have a noncontributory, cash balance format, defined benefit pension plan which was frozen to new participants effective January 1, 2000. Effective January 1, 2003, the defined benefit pension plan was amended such that future service credits ceased and eligible employees would receive interest credits only toward their ultimate retirement benefit. At June 28, 2008, the fair value of the plan assets exceeded the accumulated benefit obligation of the plan by \$5.8 million, which was recognized on the balance sheet as an asset. We also provide postretirement health care and life insurance benefits for certain retired employees under a plan that was also frozen to new participants effective January 1, 2000. At June 28, 2008, we had accrued retiree health and life benefits of \$26.2 million.

We are self-insured for general and product, workers' compensation and automobile liabilities up to predetermined thresholds above which third party insurance applies. At June 28, 2008, we had accrued insurance liabilities of \$42.5 million, and an accrued insurance recovery asset of \$8.8 million related to the amount of the liability expected to be covered by insurance carriers.

Off-Balance Sheet Arrangements**Guarantees**

We have residual value guarantees associated with certain of our operating leases, related primarily to transportation equipment, with remaining lease periods scheduled to expire periodically through fiscal 2015. Upon completion of the lease period, we guarantee that the fair value of the equipment will equal or exceed the guaranteed amount, or we will pay the lessor the difference. Although the fair value of equipment at the end of its lease term has historically exceeded the guaranteed amounts, the maximum potential amount of aggregate future payments we could be required to make under these leasing arrangements, assuming the equipment is deemed worthless at the end of the lease term, is approximately \$13.4 million as of June 28, 2008. The fair value of residual value guarantees for outstanding operating leases was de minimis as of June 28, 2008 and September 29, 2007.

Recently Issued Accounting Standards

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. It also establishes a fair value hierarchy that prioritizes information used in developing assumptions when pricing an asset or liability. SFAS 157 is effective for fiscal years beginning after November 15, 2007, which will be our 2009 fiscal year beginning September 28, 2008. In February of 2008, the FASB provided an elective one-year deferral of the applications of the provisions of SFAS 157 to nonfinancial assets and nonfinancial liabilities that are only measured at fair value on a non-recurring basis. The adoption of SFAS 157 is not expected to have a material effect on our consolidated financial position, results of operations and cash flows.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159). Under SFAS 159, entities may elect to measure specified financial instruments and warranty and insurance contracts at fair value on a contract-by-contract basis, with changes in fair value recognized in earnings each reporting period. SFAS 159 is effective for fiscal years beginning after November 15, 2007, which will be our 2009 fiscal year beginning September 28, 2008. We are currently in the process of evaluating the impact that SFAS 159 may have on our consolidated financial position, results of operations and cash flows.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements - an Amendment of ARB No. 51 (SFAS 160). SFAS 160 establishes accounting and reporting standards for noncontrolling interests in an entity's subsidiary and alters the way the consolidated income statement is presented. SFAS 160 is effective for fiscal years beginning on or after December 15, 2008, which will be our 2010 fiscal year beginning September 27, 2009. As of June 28, 2008, we had no outstanding noncontrolling interests in any subsidiary; accordingly, the adoption of SFAS 160 should not have any impact on our consolidated financial position, results of operations and cash flows.

Table of Contents

Also in December 2007, the FASB issued a revised SFAS No. 141 Business Combinations (SFAS 141R). Among other things, SFAS 141R requires an entity to recognize acquired assets, liabilities assumed and any noncontrolling interest at their respective fair values as of the acquisition date, clarifies how goodwill involved in a business combination is to be recognized and measured, as well as requires the expensing of acquisition-related costs as incurred. SFAS 141R is effective for business combinations entered into in fiscal years beginning on or after December 15, 2008, which will be our 2010 fiscal year beginning September 27, 2009, with early adoption prohibited.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities an Amendment of FASB Statement No. 133 (SFAS 161). SFAS 161 requires enhanced disclosures about an entity's objectives for using derivative instruments and related hedged items, how those derivative instruments are accounted for under SFAS 133 and how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. SFAS 161 is effective for financial statements for interim or annual periods beginning on or after November 15, 2008, which will be the second quarter of our 2009 fiscal year beginning September 28, 2008. The adoption of SFAS 161 is not expected to have a material effect on our consolidated financial position, results of operations and cash flows.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK****Commodity Price Risk**

We enter into product supply contracts that are generally one-year agreements subject to annual renewal, and also purchase product on the open market. Our propane supply contracts typically provide for pricing based upon index formulas using the posted prices established at major supply points such as Mont Belvieu, Texas, or Conway, Kansas (plus transportation costs) at the time of delivery. In addition, to supplement our annual purchase requirements, we may utilize forward fixed price purchase contracts to acquire a portion of the propane that we resell to our customers, which allows us to manage our exposure to unfavorable changes in commodity prices and to ensure adequate physical supply. The percentage of contract purchases, and the amount of supply contracted for under forward contracts at fixed prices, will vary from year to year based on market conditions. In certain instances, and when market conditions are favorable as was the case in the propane and fuel oil markets during the first half of fiscal 2007, we are able to purchase product under our supply arrangements at a discount to the market.

Product cost changes can occur rapidly over a short period of time and can impact profitability. We attempt to reduce commodity price risk by pricing product on a short-term basis. The level of priced, physical product maintained in storage facilities and at our customer service centers for immediate sale to our customers will vary depending on several factors, including, but not limited to, price, availability of supply, and demand for a given time of the year. Typically, our on hand priced position does not exceed more than four to eight weeks of our supply needs depending on the time of the year. In the course of normal operations, we routinely enter into contracts such as forward priced physical contracts for the purchase or sale of propane and fuel oil that, under SFAS No. 133,

Accounting for Derivative Instruments and Hedging Activities, as amended (SFAS 133), qualify for and are designated as a normal purchase or normal sale contracts. Such contracts are exempted from the fair value accounting requirements of SFAS 133 and are accounted for at the time product is purchased or sold under the related contract.

Under our hedging and risk management strategies, we enter into a combination of exchange-traded futures and option contracts, forward contracts and, in certain instances, over-the-counter options (collectively, derivative instruments) to manage the price risk associated with priced, physical product and with future purchases of the commodities used in our operations, principally propane and fuel oil, as well as to ensure the availability of product during periods of high demand. We do not use derivative instruments for speculative or trading purposes. Futures and forward contracts require that we sell or acquire propane or fuel oil at a fixed price for delivery at fixed future dates. An option contract allows, but does not require, its holder to buy or sell propane or fuel oil at a specified price during a specified time period. However, the writer of an option contract must fulfill the obligation of the option contract, should the holder choose to exercise the option. At expiration, the contracts are settled by the delivery of the product to the respective party or are settled by the payment of a net amount equal to the difference between the then current price and the fixed contract price or options exercise price. To the extent that we utilize derivative instruments to manage exposure to commodity price risk and commodity prices move adversely in relation to the contracts, we could suffer losses on those derivative instruments when settled. Conversely, if prices move favorably, we could realize gains. Under our hedging and risk management strategy, realized gains or losses on futures contracts will typically offset losses or gains on the physical inventory once the product is sold to customers at market prices.

As a result of various market factors during the first half of fiscal 2007, particularly commodity price volatility during the first four months of the fiscal year, we experienced additional margin opportunities due to favorable pricing under certain supply arrangements and from our hedging and risk management activities. These market conditions generated additional operating profit of approximately \$20.0 million during the nine months ended June 30, 2007, respectively, compared to the nine months ended June 28, 2008.

With the unprecedented rise in commodity prices in a relatively short period of time, coupled with lower than expected sales volumes, we reported realized losses from our risk management activities which had a negative effect on earnings of approximately \$14.5 million during the third quarter of fiscal 2008 compared to the prior year quarter. As a result of continued market volatility, we made a decision under our risk management strategy to unwind all of our short futures positions during the third quarter of fiscal 2008.

Table of Contents**Market Risk**

We are subject to commodity price risk to the extent that propane or fuel oil market prices deviate from fixed contract settlement amounts. Futures traded with brokers of the NYMEX require daily cash settlements in margin accounts. Forward and option contracts are generally settled at the expiration of the contract term either by physical delivery or through a net settlement mechanism. Market risks associated with futures, options and forward contracts are monitored daily for compliance with our Hedging and Risk Management Policy which includes volume limits for open positions. Open inventory positions are reviewed and managed daily as to exposures to changing market prices.

Credit Risk

Futures and fuel oil options are guaranteed by the NYMEX and, as a result, have minimal credit risk. We are subject to credit risk with over-the-counter, forward and propane option contracts to the extent the counterparties do not perform. We evaluate the financial condition of each counterparty with which we conduct business and establish credit limits to reduce exposure to the risk of non-performance by our counterparties.

Interest Rate Risk

A portion of our long-term borrowings bear interest at a variable rate based upon either LIBOR or Wachovia National Bank's prime rate, plus an applicable margin depending on the level of our total leverage. Therefore, we are subject to interest rate risk on the variable component of the interest rate. We manage our interest rate risk by entering into interest rate swap agreements. On March 31, 2005, we entered into a \$125.0 million interest rate swap contract in conjunction with the Term Loan facility under the Revolving Credit Agreement. The interest rate swap is being accounted for under SFAS 133 and has been designated as a cash flow hedge. Changes in the fair value of the interest rate swap are recognized in other comprehensive income until the hedged item is recognized in earnings. At June 28, 2008, the fair value of the interest rate swap was (\$2.8) million representing an unrealized loss and is included within other liabilities with a corresponding debit in other comprehensive income (loss) (OCI).

Accounting for Derivative Instruments and Hedging Activities

Pursuant to SFAS 133, all of our derivative instruments are reported on the balance sheet, within other current assets or other current liabilities, at their fair values. On the date that futures, forward and option contracts are entered into, we make a determination as to whether the derivative instrument qualifies for designation as a hedge. Changes in the fair value of derivative instruments are recorded each period in current period earnings or OCI, depending on whether a derivative instrument is designated as a hedge and, if so, the type of hedge. For derivative instruments designated as cash flow hedges, we formally assess, both at the hedge contract's inception and on an ongoing basis, whether the hedge contract is highly effective in offsetting changes in cash flows of hedged items. Changes in the fair value of derivative instruments designated as cash flow hedges are reported in OCI to the extent effective and reclassified into cost of products sold during the same period in which the hedged item affects earnings. The mark-to-market gains or losses on ineffective portions of cash flow hedges used to hedge future purchases are immediately recognized in cost of products sold. Changes in the fair value of derivative instruments that are not designated as cash flow hedges, and that do not meet the normal purchase and normal sale exemption under SFAS 133, are recorded within cost of products sold as they occur. Cash flows associated with derivative instruments are reported as operating activities within the condensed consolidated statement of cash flows.

At June 28, 2008, the fair value of derivative instruments described above resulted in derivative assets (unrealized gains) of \$1.2 million included within prepaid expenses and other current assets and de minimis derivative liabilities (unrealized losses) included within other current liabilities. Cost of products sold included unrealized (non-cash) gains of \$4.7 million and unrealized (non-cash) losses of \$0.3 million for the three and nine months ended June 28, 2008, respectively, and unrealized (non-cash) losses of \$0.2 million and \$7.8 million for the three and nine months ended June 30, 2007, respectively, attributable to the change in fair value of derivative instruments not designated as cash flow hedges.

Table of Contents

Sensitivity Analysis

In an effort to estimate our exposure to unfavorable market price changes in propane or fuel oil, a sensitivity analysis of open positions as of June 28, 2008 was performed. Based on this analysis, a hypothetical 10% adverse change in market prices for which a futures, forward and/or option contract exists indicates either a reduction in potential future gains or an increase in potential losses in future earnings of \$0.7 million as of June 28, 2008. See also Item 7A of our Annual Report on Form 10-K for the fiscal year ended September 29, 2007.

The above hypothetical change does not reflect the worst case scenario and does not include any expected offsetting gains or losses on the sale of the physical product being hedged. Actual results may be significantly different depending on market conditions and the composition of the open position portfolio at any given point in time.

ITEM 4. CONTROLS AND PROCEDURES

(a) The Partnership maintains disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934) that are designed to provide reasonable assurance that information required to be disclosed in the Partnership's filings and submissions under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to the Partnership's management, including its principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

The Partnership completed an evaluation under the supervision and with participation of the Partnership's management, including the Partnership's principal executive officer and principal financial officer, of the effectiveness of the design and operation of the Partnership's disclosure controls and procedures as of June 28, 2008. Based on this evaluation, the Partnership's principal executive officer and principal financial officer have concluded that as of June 28, 2008, such disclosure controls and procedures were effective to provide the reasonable assurance described above.

(b) There have not been any changes in the Partnership's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Securities Exchange Act of 1934) during the quarter ended June 28, 2008 that have materially affected or are reasonably likely to materially affect its internal control over financial reporting.
