Table of Contents

VERISK ANALYTICS, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except for share and per share data, unless otherwise stated)

1. Organization:

Verisk Analytics, Inc. and its consolidated subsidiaries (Verisk or the Company) enable risk-bearing businesses to better understand and manage their risks. The Company provides its customers proprietary data that, combined with analytic methods, creates embedded decision support solutions. The Company is one of the largest aggregators and providers of data pertaining to property and casualty (P&C) or P&C insurance risks in the United States of America (U.S.). The Company offers solutions for detecting fraud in the U.S. P&C insurance, mortgage and healthcare industries and sophisticated methods to predict and quantify loss in diverse contexts ranging from natural catastrophes to health insurance. The Company provides solutions, including data, statistical models or tailored analytics, all designed to allow clients to make more logical decisions.

Verisk was established on May 23, 2008 to serve as the parent holding company of Insurance Services Office, Inc. (ISO) upon completion of the initial public offering (IPO). ISO was formed in 1971 as an advisory and rating organization for the P&C insurance industry to provide statistical and actuarial services, to develop insurance programs and to assist insurance companies in meeting state regulatory requirements. Over the past decade, the Company has broadened its data assets, entered new markets, placed a greater emphasis on analytics, and pursued strategic acquisitions. On October 6, 2009, ISO effected a corporate reorganization whereby the Class A and Class B common stock of ISO were exchanged by the current stockholders for the common stock of Verisk on a one-for-one basis. Verisk immediately thereafter effected a fifty-for-one stock split of its Class A and Class B common stock and equally sub-divided the Class B common stock into two new series of stock, Verisk Class B (Series 1) and Verisk Class B (Series 2). All share and per share information in the condensed consolidated financial statements gives effect to the fifty-for-one stock split that occurred immediately after the reorganization.

On October 9, 2009, the Company completed its IPO. Upon completion of the IPO, the selling stockholders sold 97,995,750 shares of Class A common stock of Verisk, which included the 12,745,750 over-allotment option, at the IPO price of \$22.00 per share. The Company did not receive any proceeds from the sales of common stock in the offering. Verisk trades on the NASDAQ Global Select Market under the ticker symbol VRSK.

2. Basis of Presentation and Summary of Significant Accounting Policies:

The accompanying unaudited condensed consolidated financial statements have been prepared on the basis of accounting principles generally accepted in the U.S. (U.S. GAAP). The preparation of financial statements in conformity with these accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Significant estimates include acquisition purchase price allocations, the fair value of goodwill, the realization of deferred tax assets, acquisition related liabilities, fair value of stock based compensation, liabilities for pension and postretirement benefits, and the estimate for the allowance for doubtful accounts. Actual results may ultimately differ from those estimates.

The condensed consolidated financial statements as of June 30, 2010 and for the three and six month periods ended June 30, 2010 and 2009, in the opinion of management, include all adjustments, consisting of normal recurring accruals, to present fairly the Company's financial position, results of operations and cash flows. The operating results for the three and six month periods ended June 30, 2010 are not necessarily indicative of the results to be expected for the full year. The condensed consolidated financial statements and related notes for the three and six month periods ended June 30, 2010 have been prepared on the same basis as and should be read in conjunction with our annual report on Form 10-K for the year ended December 31, 2009. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to the rules of the Securities and Exchange Commission (SEC). The Company believes the disclosures made are adequate to keep the information presented from being misleading.

Recent Accounting Pronouncements

Table of Contents

In January 2010, the FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures* (ASU No. 2010-06). ASU No. 2010-06 provides guidance on improving disclosures on fair value measurements, such as the transfers between Level 1, Level 2 and Level 3 inputs and the disaggregated activity in the rollforward for Level 3 fair value measurements. ASU No. 2010-06 is effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about the disaggregated activity in the rollforward for Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010 and for interim periods within those fiscal periods. The adoption of the portion of ASU No. 2010-06 that discusses the transfers between Level 1, Level 2 and Level 3 inputs, effective January 1, 2010, did not have a material impact on the Company's consolidated financial statements. The Company is currently evaluating the impact of the portion of ASU No. 2010-06 that discusses the disclosures about the disaggregated activity in the rollforward for Level 3 fair value measurements on its consolidated financial statements.

In October 2009, the FASB issued ASU No. 2009-13, *Multiple-Deliverable Revenue Arrangements* (ASU No. 2009-13). ASU No. 2009-13 establishes the accounting and reporting guidance for arrangements under which the vendor will perform multiple revenue-generating activities. Specifically, ASU No. 2009-13 addresses how to separate deliverables and how to measure and allocate arrangement consideration to one or more units of accounting. ASU No. 2009-13 is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted. The Company has elected not to early adopt and is currently evaluating the impact of ASU No. 2009-13 on its consolidated financial statements.

3. Investments:

The following is a summary of available-for-sale securities:

	Adjusted Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
June 30, 2010				
Registered investment companies	\$ 4,342	\$ 716	\$	\$ 5,058
Equity securities	14		(5)	9
Total available-for-sale securities	\$ 4,356	\$ 716	\$ (5)	\$ 5,067
December 31, 2009				
Registered investment companies	\$ 4,530	\$ 905	\$	\$ 5,435
Equity securities	14		(4)	10
Total available-for-sale securities	\$ 4,544	\$ 905	\$ (4)	\$ 5,445

In addition to the available-for-sale securities above, the Company has two investments in private equity securities in which the Company acquired non-controlling interests and for which no readily determinable market value exists. These securities were accounted for under the cost method in accordance with ASC 323-10-25, *The Equity Method of Accounting for Investments in Common Stock* (ASC 323-10-25). At June 30, 2010 and December 31, 2009, the carrying value of such securities was \$3,841 for each period and have been included in Other assets in the accompanying condensed consolidated balance sheets.

Table of Contents**4. Fair Value Measurements:**

Certain assets and liabilities of the Company are reported at fair value in the accompanying condensed consolidated balance sheets. Such assets and liabilities include amounts for both financial and non-financial instruments. To increase consistency and comparability of assets and liabilities recorded at fair value, ASC 820-10, *Fair Value Measurements* (ASC 820-10) establishes a three-level fair value hierarchy to prioritize the inputs to valuation techniques used to measure fair value. ASC 820-10 requires disclosures detailing the extent to which companies measure assets and liabilities at fair value, the methods and assumptions used to measure fair value and the effect of fair value measurements on earnings. In accordance with ASC 820-10, the Company applied the following fair value hierarchy:

- Level 1 Assets or liabilities for which the identical item is traded on an active exchange, such as publicly-traded instruments.
- Level 2 Assets and liabilities valued based on observable market data for similar instruments.
- Level 3 Assets or liabilities for which significant valuation assumptions are not readily observable in the market; instruments valued based on the best available data, some of which is internally-developed, and considers risk premiums that a market participant would require.

The following tables provide information for such assets and liabilities as of June 30, 2010 and December 31, 2009. The fair values of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, acquisitions related liabilities, and short-term debt approximate their carrying amounts because of the short-term maturity of these instruments. The fair value of the Company's long-term debt was estimated at \$579,162 and \$578,804 as of June 30, 2010 and December 31, 2009, respectively, and is based on an estimate of interest rates available to the Company for debt with similar features, the Company's current credit rating and spreads applicable to the Company. These assets and liabilities are not presented in the following table.

		Quoted Prices in Active Markets for Identical	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	Total	Assets (Level 1)		
June 30, 2010				
Registered investment companies (1)	\$ 5,058	\$ 5,058	\$	\$
Equity securities (1)	\$ 9	\$ 9	\$	\$
Contingent consideration under ASC 805 (2)	\$ (3,853)	\$	\$	\$ (3,853)
December 31, 2009				
Registered investment companies (1)	\$ 5,435	\$ 5,435	\$	\$
Equity securities (1)	\$ 10	\$ 10	\$	\$
Cost based investment recorded at fair value on a non-recurring basis (3)	\$ 1,809	\$	\$	\$ 1,809
Contingent consideration under ASC 805 (2)	\$ (3,344)	\$	\$	\$ (3,344)

(1) Registered investment

companies and equity securities are classified as available-for-sale securities and are valued using quoted prices in active markets multiplied by the number of shares owned.

- (2) Under ASC 805 *Business Combinations* (ASC 805), contingent consideration is recognized at fair value at the end of each reporting period for acquisitions after January 1, 2009. Subsequent changes in the fair value of contingent consideration is recorded in the statement of operations. See Note 6 for further information regarding the 2010 and 2009 acquisitions. For the six months ended June 30, 2010, no adjustments to the initial assessment were required.
- (3) Cost based investment consists of a non-controlling interest in a private equity security with no readily determinable market value. This investment was recorded at fair value on a non-recurring basis as a result of an other-than-temporary

impairment of \$2,012 at December 31, 2009. In establishing the estimated fair value of this investment, the Company took into consideration the financial condition and operating results of the underlying company and other indicators of fair values, such as fair value utilized by the Company's private equity offering. This investment was recorded at adjusted cost as of June 30, 2010.

Table of Contents

The tables below include a rollforward of the Company's contingent consideration under ASC 805 for the three and six month periods ended June 30:

	For the Three Months Ended		For the Six Months Ended	
	June 30,	June 30,	June 30,	June 30,
	2010	2009	2010	2009
Beginning balance	\$ 3,840	\$ 2,800	\$ 3,344	\$
Acquisitions (1)			491	2,800
Accretion on acquisition related liabilities	13		18	
Ending balance	\$ 3,853	\$ 2,800	\$ 3,853	\$ 2,800

(1) Under ASC 805, contingent consideration is recognized at fair value at the end of each reporting period for acquisitions after January 1, 2009. Subsequent changes in the fair value of contingent consideration is recorded in the statement of operations. See Note 6 for further information regarding the acquisitions.

5. Goodwill and Intangible Assets:

The following is a summary of the change in goodwill from December 31, 2009 through June 30, 2010, both in total and as allocated to the Company's operating segments:

	Risk	Decision	Total
	Assessment	Analytics	
Goodwill at December 31, 2009 (1)	\$ 27,908	\$ 462,921	\$ 490,829
Current year acquisitions		3,124	3,124
Purchase accounting reclassifications		1,047	1,047
Finalization of acquisition related escrows		6,996	6,996
Goodwill at June 30, 2010 (1)	\$ 27,908	\$ 474,088	\$ 501,996

- (1) These balances are net of accumulated impairment charges of \$3,244 that occurred prior to the periods included within the condensed consolidated financial statements.

Goodwill and intangible assets with indefinite lives are subject to impairment testing annually as of June 30, or whenever events or changes in circumstances indicate that the carrying amount may not be fully recoverable. The Company completed the required annual impairment test as of June 30, 2010, which resulted in no impairment of goodwill. Based on the results of the impairment assessment as of June 30, 2010, the Company confirmed that the fair value of its reporting units exceeded their respective carrying values. This testing compares the carrying value of each reporting unit to its fair value. If the fair value of the reporting unit exceeds the carrying value of the net assets, including goodwill assigned to that reporting unit, goodwill is not impaired. If the carrying value of the reporting unit's net assets including goodwill exceeds the fair value of the reporting unit, then the Company will determine the implied fair value of the reporting unit's goodwill. If the carrying value of a reporting unit's goodwill exceeds its implied fair value, then an impairment loss is recorded for the difference between the carrying amount and the implied fair value of goodwill.

Table of Contents

The Company's intangible assets and related accumulated amortization consisted of the following:

	Weighted Average Useful Life	Cost	Accumulated Amortization	Net
June 30, 2010				
Technology-based	6 years	\$ 177,234	\$ (127,384)	\$ 49,850
Marketing-related	4 years	36,124	(26,725)	9,399
Contract-based	6 years	6,555	(6,190)	365
Customer-related	12 years	70,279	(29,665)	40,614
Total intangible assets		\$ 290,192	\$ (189,964)	\$ 100,228

	Weighted Average Useful Life	Cost	Accumulated Amortization	Net
December 31, 2009				
Technology-based	6 years	\$ 174,973	\$ (117,986)	\$ 56,987
Marketing-related	4 years	35,104	(24,690)	10,414
Contract-based	6 years	6,555	(6,092)	463
Customer-related	12 years	67,534	(26,872)	40,662
Total intangible assets		\$ 284,166	\$ (175,640)	\$ 108,526

Consolidated amortization expense related to intangible assets for the three months ended June 30, 2010 and 2009, was \$7,020 and \$8,464, respectively. Consolidated amortization expense related to intangible assets for the six months ended June 30, 2010 and 2009, was \$14,324 and \$16,974, respectively. Estimated amortization expense in future periods through 2014 and thereafter for intangible assets subject to amortization is as follows:

Year	Amount
2010	\$ 13,827
2011	\$ 22,234
2012	\$ 18,250
2013	\$ 12,087
2014	\$ 5,036
Thereafter	\$ 28,794

6. Acquisitions:**2010 Acquisitions**

On February 26, 2010, the Company acquired 100% of the stock of Strategic Analytics, Inc. (Strategic Analytics), a privately owned provider of credit risk and capital management solutions to consumer and mortgage lenders, for a net cash purchase price of approximately \$6,386 and the Company funded \$1,500 of indemnity escrows. Within the Decision Analytics segment, the Company believes Strategic Analytics' solutions and application set will allow customers to take advantage of state-of-the-art loss forecasting, stress testing, and economic capital requirement tools to better understand and forecast the risk associated within their credit portfolios.

Table of Contents

The preliminary allocation of purchase price resulted in the following:

	Purchase Price Allocation
Accounts receivable	\$ 866
Current assets	56
Fixed assets	159
Intangible assets	6,026
Goodwill	3,124
 Total assets acquired	 10,231
Deferred income taxes	732
Current liabilities	1,122
Other liabilities	1,991
 Total liabilities assumed	 3,845
 Net assets acquired	 \$ 6,386

Other liabilities consist of a \$1,500 payment due to the sellers of Strategic Analytics, assuming no pre-acquisition indemnity claims arise subsequent to the acquisition date through December 31, 2012, which was funded into escrow at close. The remaining balance is contingent consideration of \$491, which was estimated as of the acquisition date by averaging the probability of achieving each of the specific predetermined EBITDA of the acquired entity, and revenue targets, which could result in a payment ranging from \$0 to \$18,000 for the fiscal year ending December 31, 2011. The terms of the contingent consideration include a range that allows the sellers to benefit from the potential growth of Strategic Analytics; however, the amount recorded as of the purchase allocation date represents management's best estimate based on the prior financial results as well as management's current best estimate of the future growth of revenue and EBITDA. Subsequent changes in the fair value of contingent consideration are recorded in the statement of operations.

The amounts assigned to intangible assets by type for current year acquisitions are summarized in the table below:

	Weighted Average Useful Life	Total
Technology-based	7 years	\$ 2,261
Marketing-related	5 years	1,020
Customer-related	10 years	2,745
 Total intangible assets	 8 years	 \$ 6,026

2009 Acquisitions

On October 30, 2009, the Company acquired the net assets of Enabl-u Technology Corporation, Inc. (Enabl-u), a privately owned provider of data management, training and communication solutions to companies with regional, national or global work forces, for a net cash purchase price of \$2,502 and the Company funded \$136 of indemnity escrows and \$100 of contingency escrows. The Company believes this acquisition will enhance the Company's ability to provide solutions for customers to measure loss prevention and improve asset management through the use of software and software services.

On July 24, 2009, the Company acquired the net assets of TierMed Systems LLC (TierMed), a privately owned provider of Healthcare Effectiveness Data and Information Set (HEDIS) solutions to healthcare organizations that have HEDIS or quality-reporting needs, for a net cash purchase price of \$7,230 and the Company funded \$400 of indemnity escrows. The Company believes this acquisition will enhance the Company s ability to provide solutions for customers to measure and improve healthcare quality and financial performance through the use of software and software services.

On January 14, 2009, the Company acquired 100% of the stock of D2 Hawkeye (D2), a privately-owned provider of data mining, decision support, clinical quality analysis, and risk analysis tools for the healthcare industry, for a net cash purchase price of \$51,618 and the Company funded \$7,000 of indemnity escrows. The Company believes this acquisition will enhance the Company s position in the healthcare analytics and predictive modeling market by providing new market, cross-sell, and diversification opportunities for the Company s expanding healthcare solutions.

Table of Contents

The total net cash purchase price of these three acquisitions was \$61,350 and the Company funded \$7,636 of escrows, of which \$7,000 and \$236 was recorded in Other current assets and Other assets, respectively, in the accompanying condensed consolidated balance sheets. The preliminary allocation of purchase price, including working capital adjustments, resulted in accounts receivable of \$4,435, current assets of \$573, fixed assets of \$2,387, finite lived intangible assets with no residual value of \$25,265, goodwill of \$49,776, current liabilities of \$4,879, other liabilities of \$10,479, and deferred tax liabilities of \$5,728. Other liabilities consisted of \$7,236 payment due to the sellers of D2 and Enabl-u at the conclusion of the escrows funded at close, assuming no pre-acquisition indemnity claims arise subsequent to the acquisition date, and \$3,344 of contingent consideration, which was estimated as of the acquisition date by averaging the probability of achieving each of the specific predetermined EBITDA and revenue targets, which could result in a payment ranging from \$0 to \$65,700 for the fiscal year ending December 31, 2011 for D2 and a payment ranging from \$0 to \$6,000 for the fiscal year ending December 31, 2010 for TierMed. Under ASC 805, contingent consideration is recognized at fair value at the end of each reporting period. Subsequent changes in the fair value of contingent consideration is recorded in the statement of operations.

The amounts assigned to intangible assets by type for acquisitions during the year ended December 31, 2009 are summarized in the table below:

	Weighted Average Useful Life	Total
Technology-based	12 years	\$ 9,282
Marketing-related	5 years	4,698
Customer-related	8 years	11,285
Total intangible assets	9 years	\$ 25,265

The preliminary allocation of the purchase price for the 2010 and 2009 acquisitions to intangible assets, goodwill, accrued liabilities, and the determination of an ASC 740-10-25, *Accounting for Uncertainty in Income Taxes* (ASC 740-10-25), liability is subject to revisions, which may have a material impact on the Company's consolidated financial statements. As the values of such assets and liabilities are preliminary in nature, they are subject to adjustment as additional information is obtained about the facts and circumstances that existed as of the acquisition date. In accordance with ASC 805, the allocation of the purchase price will be finalized once all information is obtained, but not to exceed one year from the acquisition date. The value of goodwill associated with these acquisitions is currently included within the Decision Analytics segment. The goodwill for the Enabl-u and TierMed acquisitions are expected to be deductible for tax purposes over fifteen years. The goodwill for the D2 and Strategic Analytics acquisitions are not deductible for tax purposes. Included within the condensed consolidated statements of operations for the three and six month periods ended June 30, 2010 are revenues of \$796 and \$890 and an operating loss of \$506 and \$978, associated with the Strategic Analytics acquisition. Excluding the final resolution of contingent consideration, the Company finalized the purchase accounting for the acquisition of D2 in the first quarter of 2010, and there have been no adjustments since December 31, 2009. Excluding the final resolution of indemnity escrows and contingent consideration, the Company finalized the purchase accounting for the acquisition of TierMed in the second quarter of 2010, which resulted in an increase in goodwill of \$746 and current liabilities of \$746.

Acquisition Escrows

Pursuant to the related acquisition agreements, the Company has funded various escrow accounts to satisfy pre-acquisition indemnity and tax claims arising subsequent to the acquisition date, as well as a portion of the contingent payments. At June 30, 2010 and December 31, 2009, the current portion of the escrows amounted to \$6,116 and \$20,142, respectively, and has been included in Other current assets in the accompanying condensed consolidated balance sheets. During the second quarter of 2010, the Company released \$13,931 of escrows to sellers primarily related to the D2 and Xactware acquisitions. In accordance with ASC 805, the escrows related to the D2 acquisition were recorded within goodwill at the time of acquisition, as those escrows were expected to be released to

the sellers. In the current period, the release of \$6,935 related to D2 was recorded as a reduction of other current assets and a corresponding reduction in accounts payable and accrued liabilities. At June 30, 2010 and December 31, 2009, the noncurrent portion of the escrow amounted to \$1,501 and \$236, respectively.

7. Income Taxes:

The Company's effective tax rate for the six months ended June 30, 2010 was 42.2% compared to the effective tax rate for the six months ended June 30, 2009 of 42.5%. The effective rate for the six months ended June 30, 2010 was lower due to a decrease in nondeductible expenses in 2010 versus 2009 related to the ISO 401 (k) Savings and Employee Stock Ownership Plan (KSOP). This benefit was partially offset by a non-cash charge of \$2,362 resulting from reduced tax benefits of Medicare subsidies associated with legislative changes in the first quarter of 2010. Excluding this charge, the effective rate for the six months ended June 30, 2010 would have been 41.0%. The difference between statutory tax rates and the Company's effective tax rate is primarily attributable to state taxes and nondeductible share appreciation from the KSOP.

Table of Contents

The Company's effective tax rate for the three months ended June 30, 2010 was 40.9% compared to the effective tax rate for the three months ended June 30, 2009 of 42.2%. The effective rate for the three months ended June 30, 2010 was lower than the prior period due to lower nondeductible expenses in 2010 related to the KSOP.

8. Debt:

The following table presents short-term and long-term debt by issuance:

	Issuance Date	Maturity Date	June 30, 2010	December 31, 2009
Short-term debt and current portion of long-term debt:				
Syndicated Revolving Credit Facility	12/16/2009	1/19/2010	\$	\$ 10,000

Long-term debt				
			\$ 476,767	\$ 527,509

On January 19, 2010 and January 25, 2010, the Company paid \$10,000 and \$50,000, respectively, of its outstanding borrowings from its syndicated revolving credit facility as of December 31, 2009.

In March 2010, the Company amended the New York Life Master Shelf Agreement to increase the authorization of additional senior promissory notes by \$15,000, from \$100,000, to \$115,000, and to extend the maturity of the agreement through March 2013. As of June 30, 2010 and December 31, 2009, the Company had long-term debt outstanding of \$85,000 under this agreement.

Table of Contents**9. Redeemable Common Stock:**

Prior to the corporate reorganization on October 6, 2009, the Company followed ASC 480-10-S99-1, *Presentation in Financial Statements of Preferred Redeemable Stock* (ASC 480-10-S99-1). ASC 480-10-S99-1 required the Company to record ISO Class A common stock and vested stock options at full redemption value at each balance sheet date as the redemption of these securities was not solely within the control of the Company. Effective with the corporate reorganization, the Company is no longer obligated to redeem shares of ISO Class A common stock and is therefore no longer required to record the ISO Class A common stock and vested stock options at redemption value under ASC 480-10-S99-1. The reversal of the redeemable common stock of \$1,064,896 on October 6, 2009 resulted in the elimination of accumulated deficit of \$440,584, an increase of \$30 to Class A common stock at par value, an increase of \$624,282 to additional paid-in-capital, and a reclassification of the ISO Class A unearned common stock KSOP shares balance of \$1,305 to unearned KSOP contributions.

During the six months ended June 30, 2009, 2,452,350 shares of ISO Class A common stock were redeemed by the Company at a weighted average price of \$15.80 per share.

10. Stockholders Equity/(Deficit):

On November 18, 1996, the Company authorized 335,000,000 shares of ISO Class A redeemable common stock. Effective with the corporate reorganization on October 6, 2009, the ISO Class A redeemable common stock and all Verisk Class B shares sold into the IPO were converted to Verisk Class A common stock on a one-for-one basis. In addition, the Verisk Class A common stock authorized was increased to 1,200,000,000 shares. The Verisk Class A common shares have rights to any dividend declared by the board of directors, subject to any preferential or other rights of any outstanding preferred stock, and voting rights to elect nine of the twelve members of the board of directors.

On November 18, 1996, the Company authorized 1,000,000,000 ISO Class B shares and issued 500,225,000 shares. On October 6, 2009, the Company completed a corporate reorganization whereby the ISO Class B common stock and treasury stock were converted to Verisk Class B common stock on a one-for-one basis. All Verisk Class B shares sold into the IPO were converted to Verisk Class A common stock on a one-for-one basis. In addition, the Verisk Class B common stock authorized was reduced to 800,000,000 shares, sub-divided into 400,000,000 shares of Class B (Series 1) (Class B-1) and 400,000,000 shares of Class B (Series 2) (Class B-2). Each share of Class B-1 common stock shall convert automatically, without any action by the stockholder, into one share of Verisk Class A common stock on April 6, 2011. Each share of Class B-2 common stock shall convert automatically, without any action by the stockholder, into one share of Verisk Class A common stock on October 6, 2011. The Class B shares have the same rights as Verisk Class A shares with respect to dividends and economic ownership, but have voting rights to elect three of the twelve directors. The Company did not repurchase any Class B shares during the six months ended June 30, 2010 and 2009.

On October 6, 2009, the Company authorized 80,000,000 shares of preferred stock, par value \$0.001 per share, in connection with the reorganization. The preferred shares have preferential rights over the Verisk Class A and Class B common shares with respect to dividends and net distribution upon liquidation. The Company did not issue any preferred shares from the reorganization date through June 30, 2010.

Share Repurchase Program

On April 29, 2010, the Company's board of directors authorized a \$150,000 share repurchase program of the Company's Class A common stock. Under this repurchase program, the Company may repurchase stock in the open market or as otherwise determined by the Company. The Company has no obligation to repurchase stock under this program and intends to use this authorization as a means of offsetting dilution from the issuance of shares under the KSOP, the Verisk Analytics, Inc. 2009 Equity Incentive Plan (the Incentive Plan) and the Insurance Services Office, Inc. 1996 Incentive Plan (the Option Plan). This authorization has no expiration date and may be suspended or terminated at any time. Repurchased shares will be recorded as treasury stock and will be available for future issuance. During the six months ended June 30, 2010, 2,173,106 shares of Verisk Class A common stock were repurchased by the Company as part of this program at a weighted average price of \$29.87 per share. As treasury stock purchases are recorded based on trade date, the Company has included \$2,635 in Accounts payable and accrued liabilities in the accompanying condensed consolidated balance sheets for those purchases that have not settled as of June 30, 2010.

Earnings Per Share (EPS)

As disclosed in Note 1 Organization, on October 6, 2009 Verisk became the new parent holding company of ISO. In connection with the IPO, the stock of ISO was exchanged for the stock of Verisk on a one-for-one basis and Verisk effected a fifty-for-one stock split of its Verisk Class A and Class B common stock. As a result of the stock split on October 6, 2009, all share and per share data throughout this report has been adjusted to reflect the fifty-for-one stock split.

Table of Contents

Basic earnings per common share is computed by dividing income available to common stockholders by the weighted average number of common shares outstanding during the period. Prior to the IPO, the Company had common stock within the Employee Stock Ownership Plan (ESOP) that had been committed to be released and those shares were subtracted from the weighted average number of common shares outstanding to arrive at the denominator used in calculating EPS for the three and six months ended June 30, 2009. The computation of diluted EPS is similar to the computation of basic EPS except that the denominator is increased to include the number of additional common shares that would have been outstanding, using the treasury stock method, if the dilutive potential common shares, such as stock awards and stock options, had been issued.

The following is a reconciliation of the numerators and denominators of the basic and diluted EPS computations for the three and six month periods ended June 30, 2010 and 2009:

	For the Three Months Ended		For the Six Months Ended	
	June 30,	June 30,	June 30,	June 30,
	2010	2009	2010	2009
Numerator used in basic and diluted EPS:				
Net income	\$ 58,404	\$ 45,939	\$ 113,779	\$ 90,854
Denominator:				
Weighted average number of common shares used in basic EPS	180,492,106	172,887,331	180,272,828	173,409,800
Effect of dilutive shares:				
Potential Class A redeemable common stock issuable upon the exercise of stock options	9,049,787	6,937,148	9,225,496	6,794,500
Weighted average number of common shares and dilutive potential common shares used in diluted EPS	189,541,893	179,824,479	189,498,324	180,204,300
Basic EPS of Class A and Class B	\$ 0.32	\$ 0.27	\$ 0.63	\$ 0.52
Diluted EPS of Class A and Class B	\$ 0.31	\$ 0.26	\$ 0.60	\$ 0.50

The potential shares of common stock that were excluded from diluted EPS were 2,004,390 and 5,301,650 for the six months ended June 30, 2010 and 2009, respectively, because the effect of including these potential shares was anti-dilutive.

Accumulated Other Comprehensive Loss

The following is a summary of accumulated other comprehensive loss:

	June 30,	December 31,
	2010	2009
Unrealized gains on investments	\$ 416	\$ 526
Unrealized foreign currency losses	(876)	(683)
Pension and postretirement unfunded liability adjustment	(51,724)	(53,471)

Accumulated other comprehensive loss	\$ (52,184)	\$ (53,628)
--------------------------------------	-------------	-------------

Table of Contents

The before tax and after tax amounts of other comprehensive income for the six months ended June 30, 2010 and 2009 are summarized below:

	Before Tax	Tax Benefit/ (Expense)	After Tax
For the Six Months Ended June 30, 2010			
Unrealized holding losses on investments arising during the year	\$ (190)	\$ 80	\$ (110)
Unrealized foreign currency losses	(193)		(193)
Pension and postretirement unfunded liability adjustment	2,926	(1,179)	1,747
Total other comprehensive income	\$ 2,543	\$ (1,099)	\$ 1,444
For the Six Months Ended June 30, 2009			
Unrealized holding gains on investments arising during the year	\$ 104	\$ (41)	\$ 63
Reclassification adjustment for amounts included in net income	386	(156)	230
Unrealized foreign currency gains	88		88
Pension and postretirement unfunded liability adjustment	4,900	(1,977)	2,923
Total other comprehensive income	\$ 5,478	\$ (2,174)	\$ 3,304

11. Stock Option Plan:

All of the Company's outstanding stock options are covered under the Incentive Plan or the Option Plan. Awards under the Incentive Plan may include one or more of the following types: (i) stock options (both nonqualified and incentive stock options), (ii) stock appreciation rights, (iii) restricted stock, (iv) restricted stock units, (v) performance awards, (vi) other share-based awards, and (vii) cash. Employees, directors and consultants are eligible for awards under the Incentive Plan. Cash received from stock option exercises for the six months ended June 30, 2010 and 2009 was \$16,733 and \$1,126, respectively. On April 1, 2010 and June 1, 2010, the Company granted 2,011,390 and 5,000, respectively, of nonqualified stock options to key employees with an exercise price equal to the closing price of the Company's Class A common stock on March 31, 2010 and May 28, 2010, with a ten year contractual term and a service vesting period of four years. As of June 30, 2010, there are 8,857,739 shares of Class A common stock reserved and available for future issuance. On July 1, 2010, the Company granted 31,906 nonqualified stock options that were immediately vested and 138,120 nonqualified stock options with a one year service vesting period, to the directors of the Company. These options have an exercise price equal to the closing price of the Company's Class A common stock on the grant date and a ten year contractual term.

The fair value of the stock options granted during the six months ended June 30, 2010 and 2009 were estimated using a Black-Scholes valuation model that uses assumptions noted in the following table:

	June 30, 2010	June 30, 2009
	Black-Scholes	Black-Scholes
Option pricing model		
Expected volatility	30.99%	30.95%
Risk-free interest rate	2.47%	1.98%
Expected term in years	4.8	5.7
Dividend yield	0.00%	1.00%
Weighted average grant date fair value per stock option	\$ 8.70	\$ 4.69

The expected term for a majority of the awards granted was estimated based on studies of historical experience and projected exercise behavior. However, for certain awards granted, for which no historical exercise pattern exist, the expected term was estimated using the simplified method. The risk-free interest rate is based on the yield of U.S. Treasury zero coupon securities with a maturity equal to the expected term of the equity award. The volatility factor

was based on the average volatility of the Company's peers, calculated using historical daily closing prices over the most recent period that commensurates with the expected term of the stock option award. The expected dividend yield was based on the Company's expected annual dividend rate on the date of grant.

Table of Contents

Exercise prices for options outstanding and exercisable at June 30, 2010 ranged from \$1.84 to \$30.25 as outlined in the following table:

Range of Exercise Prices	Options Outstanding			Options Exercisable		
	Weighted- Average Remaining Contractual Life	Stock Options Outstanding	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Life	Stock Options Exercisable	Weighted- Average Exercise Price
\$1.84 to \$2.20	1.0	515,270	\$ 2.04	1.0	515,270	\$ 2.04
\$2.21 to \$2.96	2.7	1,996,600	\$ 2.84	2.7	1,996,600	\$ 2.84
\$2.97 to \$4.62	2.8	5,439,750	\$ 3.56	2.8	5,439,750	\$ 3.56
\$4.63 to \$8.90	4.8	4,154,400	\$ 8.31	4.8	4,154,400	\$ 8.31
\$8.91 to \$13.62	5.7	1,653,600	\$ 11.84	5.6	1,603,600	\$ 11.79
\$13.63 to \$15.10	6.6	1,617,875	\$ 15.10	6.6	1,122,875	\$ 15.10
\$15.11 to \$17.78	8.3	5,824,801	\$ 16.65	8.0	1,921,486	\$ 16.81
\$17.79 to \$30.25	9.4	5,082,011	\$ 24.26	8.0	208,250	\$ 17.84
		26,284,307			16,962,231	

A summary of options outstanding under the Incentive Plan as of June 30, 2010 and changes during the six months then ended are presented below:

	Number of Options	Weighted Average Exercise Price	Aggregate Intrinsic Value
Outstanding at December 31, 2009	26,761,221	\$ 10.74	\$ 522,914
Granted	2,016,390	\$ 28.21	
Exercised	(2,346,429)	\$ 7.13	\$ (52,196)
Cancelled or expired	(146,875)	\$ 18.37	
Outstanding at June 30, 2010	26,284,307	\$ 12.36	\$ 461,043
Options exercisable at June 30, 2010	16,962,231	\$ 7.81	\$ 374,699

Intrinsic value for stock options is calculated based on the exercise price of the underlying awards and the quoted price of Verisk's common stock as of the reporting date. The aggregate intrinsic value of stock options outstanding and exercisable at June 30, 2010 was \$461,043 and \$374,699, respectively. In accordance with ASC 718, *Stock Compensation*, excess tax benefit from exercised stock options is recorded as an addition to paid-in-capital and a corresponding reduction in taxes payable. This tax benefit is calculated as the excess of the intrinsic value of options exercised in excess of compensation recognized for financial reporting purposes. The amount of the tax benefit that has been realized, as a result of those excess tax benefits, is presented in the statement of cash flows as a financing cash inflow. For the six months ended June 30, 2010, the Company recorded an excess tax benefit from stock options exercised of \$20,507, of which \$10,036 has been realized as a tax benefit within the Company's quarterly tax payments.

through June 30, 2010 and presented as a financing cash inflow within the accompanying condensed consolidated statements of cash flows.

For the six months ended June 30, 2010, certain employees exercised stock options and covered the statutory minimum tax withholdings of \$15,051 through a net settlement of 503,043 shares. The payment of taxes related to these exercises were recorded as a reduction to additional-paid-in capital. This transaction is reflected within Net share settlement of taxes upon exercise of stock options within cash flows from financing activities in the accompanying condensed consolidated statements of cash flows.

The Company estimates expected forfeitures of equity awards at the date of grant and recognizes compensation expense only for those awards that the Company expects to vest. The forfeiture assumption is ultimately adjusted to the actual forfeiture rate. Changes in the forfeiture assumptions may impact the total amount of expense ultimately recognized over the requisite service period and may impact the timing of expense recognized over the requisite service period.

As of June 30, 2010, there was \$49,561 of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the Incentive Plan. That cost is expected to be recognized over a weighted-average period of 2.97 years. As of June 30, 2010, there were 9,322,076 nonvested stock options, of which 8,269,610 are expected to vest. The total grant date fair value of options vested during the six months ended June 30, 2010 and 2009 was \$10,030 and \$6,316, respectively.

Table of Contents**12. Pension and Postretirement Benefits:**

Prior to January 1, 2002, the Company maintained a qualified defined benefit pension plan for substantially all of its employees through membership in the Pension Plan for Insurance Organizations (the Pension Plan), a multiple-employer trust. The Company has applied the projected unit credit cost method for its pension plan, which attributes an equal portion of total projected benefits to each year of employee service. Effective January 1, 2002, the Company amended the Pension Plan to determine future benefits using a cash balance formula. Under the cash balance formula, each participant has an account, which is credited annually based on salary rates determined by years of service, as well as the interest earned on their previous year-end cash balance. Prior to December 31, 2001, pension plan benefits were based on years of service and the average of the five highest consecutive years' earnings of the last ten years. Effective March 1, 2005, the Company established the Profit Sharing Plan, a defined contribution plan, to replace the Pension Plan for all eligible employees hired on or after March 1, 2005. The Company also has a non-qualified supplemental cash balance plan (SERP) for certain employees. The SERP is funded from the general assets of the Company.

The Company also provides certain healthcare and life insurance benefits for both active and retired employees. The Postretirement Health and Life Insurance Plan (the Postretirement Plan) is contributory, requiring participants to pay a stated percentage of the premium for coverage. As of October 1, 2001, the Postretirement Plan was amended to freeze benefits for current retirees and certain other employees at the January 1, 2002 level. Also, as of October 1, 2001, the Postretirement Plan had a curtailment, which eliminated retiree life insurance for all active employees and healthcare benefits for almost all future retirees, effective January 1, 2002.

The components of net periodic benefit cost and the amounts recognized in other comprehensive income for the three and six month periods ended June 30, 2010 and 2009 are summarized below:

	For the Three Months Ended June 30,			
	Pension Plan		Postretirement Plan	
	2010	2009	2010	2009
Service cost	\$ 1,397	\$ 1,915	\$	\$
Interest cost	5,408	5,329	211	400
Amortization of transition obligation			(42)	50
Expected return on plan assets	(5,687)	(4,608)		
Amortization of prior service cost	(201)	(200)	(73)	
Amortization of net actuarial loss	1,622	2,550	229	50
Net periodic benefit cost	\$ 2,539	\$ 4,986	\$ 325	\$ 500
Employer contributions	\$ 5,546	\$ 1,440	\$ 1,298	\$ 766

	For the Six Months Ended June 30,			
	Pension Plan		Postretirement Plan	
	2010	2009	2010	2009
Service cost	\$ 3,207	\$ 3,830	\$	\$
Interest cost	10,683	10,658	531	800
Amortization of transition obligation				100
Expected return on plan assets	(11,325)	(9,216)		
Amortization of prior service cost	(401)	(400)	(73)	
Amortization of net actuarial loss	3,033	5,100	367	100
Net periodic benefit cost	\$ 5,197	\$ 9,972	\$ 825	\$ 1,000

Edgar Filing: Verisk Analytics, Inc. - Form 10-Q

Employer contributions	\$	9,711	\$	2,885	\$	2,053	\$	1,790
------------------------	----	-------	----	-------	----	-------	----	-------

The expected contributions to the Pension Plan and the Postretirement Plan for the year ended December 31, 2010 are consistent with the amounts previously disclosed as of December 31, 2009.

Table of Contents**13. Segment Reporting:**

ASC 280-10, *Disclosures About Segments of an Enterprise and Related Information* (ASC 280-10), establishes standards for reporting information about operating segments. ASC 280-10 requires that a public business enterprise report financial and descriptive information about its reportable operating segments. Operating segments are components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. The Company's CEO and Chairman of the Board is identified as the chief operating decision maker (CODM) as defined by ASC 280-10. To align with the internal management of the Company's business operations based on product and service offerings, the Company is organized into the following two operating segments:

Risk Assessment: The Company is the leading provider of statistical, actuarial and underwriting data for the U.S. P&C insurance industry. The Company's databases include cleansed and standardized records describing premiums and losses in insurance transactions, casualty and property risk attributes for commercial buildings and their occupants and fire suppression capabilities of municipalities. The Company uses this data to create policy language and proprietary risk classifications that are industry standards and to generate prospective loss cost estimates used to price insurance policies.

Decision Analytics: The Company develops solutions that its customers use to analyze the three key processes in managing risk: prediction of loss, detection and prevention of fraud, and quantification of loss. The Company's combination of algorithms and analytic methods incorporates its proprietary data to generate solutions in each of these four categories. In most cases, the Company's customers integrate the solutions into their models, formulas or underwriting criteria in order to predict potential loss events, ranging from hurricanes and earthquakes to unanticipated healthcare claims. The Company develops catastrophe and extreme event models and offers solutions covering natural and man-made risks, including acts of terrorism. The Company also develops solutions that allow customers to quantify costs after loss events occur. Fraud solutions include data on claim histories, analysis of mortgage applications to identify misinformation, analysis of claims to find emerging patterns of fraud and identification of suspicious claims in the insurance, mortgage and healthcare sectors.

The two aforementioned operating segments represent the segments for which separate discrete financial information is available and upon which operating results are regularly evaluated by the CODM in order to assess performance and allocate resources. The Company uses segment EBITDA as the profitability measure for making decisions regarding ongoing operations. Segment EBITDA is income from continuing operations before investment income and interest expense, income taxes, depreciation and amortization. Segment EBITDA is the measure of operating results used to assess corporate performance and optimal utilization of debt and acquisitions. Segment operating expenses consist of direct and indirect costs principally related to personnel, facilities, software license fees, consulting, travel, and third-party information services. Indirect costs are generally allocated to the segments using fixed rates established by management based upon estimated expense contribution levels and other assumptions that management considers reasonable. The Company does not allocate investment income, realized gains/(losses) on securities, net, interest expense or income tax expense, since these items are not considered in evaluating the segment's overall operating performance. The CODM does not evaluate the financial performance of each segment based on assets. On a geographic basis, no individual country outside of the United States accounted for 1% or more of the Company's consolidated revenue for either the three or six month periods ended June 30, 2010 or 2009. No individual country outside of the United States accounted for 1% or more of total consolidated long-term assets as of June 30, 2010 or December 31, 2009.

Table of Contents

The following tables provide the Company's revenue and operating income performance by reportable segment for the three and six month periods ended June 30, 2010 and 2009, as well as a reconciliation to income before income taxes for all periods presented in the accompanying condensed consolidated statements of operations:

	For the Three Months Ended June 30, 2010			For the Three Months Ended June 30, 2009		
	Risk Assessment	Decision Analytics	Total	Risk Assessment	Decision Analytics	Total
Revenues	\$ 134,289	\$ 147,388	\$ 281,677	\$ 133,307	\$ 124,609	\$ 257,916

Total consolidated revenues	\$ 281,677	\$ 257,916	\$ 557,831	\$ 503,667

14. Related Parties:

The Company considers its Verisk Class A and Class B stockholders that own more than 5% of the outstanding stock within the respective class to be related parties as defined within ASC 850, *Related Party Disclosures*. At June 30, 2010, the related parties were six Class B stockholders each owning more than 5% of the outstanding Class B shares compared to seven Class B stockholders at June 30, 2009 of which three remained unchanged. At June 30, 2010, there were five Class A stockholders owning more than 5% of the outstanding Class A shares. The Company had accounts receivable, net of \$925 and \$1,353 and fees received in advance of \$3,116 and \$439 from related parties as of June 30, 2010 and December 31, 2009, respectively. In addition, the Company had revenues from related parties for the three months ended June 30, 2010 and 2009 of \$15,280 and \$24,056 and \$30,413 and \$48,143 for the six months ended June 30, 2010 and 2009, respectively. As of June 30, 2010, one of these Class B stockholders has an employee that serves on the Company's board of directors.

The Company incurred expenses associated with the payment of insurance coverage premiums to certain of the related parties aggregating \$18 and \$114 for the three months ended June 30, 2010 and 2009 and \$21 and \$226 for the six months ended June 30, 2010 and 2009, respectively. These costs are included in Cost of revenues and Selling, general and administrative expenses in the accompanying condensed consolidated statements of operations.

15. Commitments and Contingencies:

The Company is a party to legal proceedings with respect to a variety of matters in the ordinary course of business, including those matters described below. The Company is unable, at the present time, to determine the ultimate resolution of or provide a reasonable estimate of the range of possible loss attributable to these matters or the impact they may have on the Company's results of operations, financial position or cash flows. This is primarily because many of these cases remain in their early stages and only limited discovery has taken place. Although the Company believes it has strong defenses for the litigation proceedings described below, the Company could in the future incur judgments or enter into settlements of claims that could have a material adverse effect on its results of operations,

financial position or cash flows.

Claims Outcome Advisor Litigation

Hensley, et al. v. Computer Sciences Corporation et al. was a putative nationwide class action complaint, filed in February 2005, in Miller County, Arkansas state court. Defendants include numerous insurance companies and providers of software products used by insurers in paying claims. The Company is among the named defendants. Plaintiffs allege that certain software products, including the Company's Claims Outcome Advisor product and a competing software product sold by Computer Sciences Corporation, improperly estimated the amount to be paid by insurers to their policyholders in connection with claims for bodily injuries.

The Company entered into settlement agreements with plaintiffs asserting claims relating to the use of Claims Outcome Advisor by defendants Hanover Insurance Group, Progressive Car Insurance and Liberty Mutual Insurance Group. Each of these settlements was granted final approval by the court and together the settlements resolve the claims asserted in this case against the Company with respect to the above insurance companies, who settled the claims against them as well. A provision was made in 2006 for this proceeding and the total amount the Company paid in 2008 with respect to these settlements was less than \$2,000. A fourth defendant, The Automobile Club of California, which is alleged to have used Claims Outcome Advisor, was dismissed from the action. On August 18, 2008, pursuant to the agreement of the parties the Court ordered that the claims against the Company be dismissed with prejudice.

Table of Contents

Subsequently, Hanover Insurance Group made a demand for reimbursement, pursuant to an indemnification provision contained in a December 30, 2004 License Agreement between Hanover and the Company, of its settlement and defense costs in the *Hensley* class action. Specifically, Hanover demanded \$2,536 including \$600 in attorneys' fees and expenses. The Company disputes that Hanover is entitled to any reimbursement pursuant to the License Agreement. In July 2010, after the Company and Hanover were unable to resolve the dispute in mediation, Hanover served a summons and complaint seeking indemnity and contribution from the Company. At this time, it is not possible to determine the ultimate resolution of or estimate the liability related to this matter.

Xactware Litigation

The following two lawsuits have been filed by or on behalf of groups of Louisiana insurance policyholders who claim, among other things, that certain insurers who used products and price information supplied by the Company's Xactware subsidiary (and those of another provider) did not fully compensate policyholders for property damage covered under their insurance policies. The plaintiffs seek to recover compensation for their damages in an amount equal to the difference between the amount paid by the defendants and the fair market repair/restoration costs of their damaged property.

Schafer v. State Farm Fire & Cas. Co., et al. was a putative class action pending against the Company and State Farm Fire & Casualty Company filed in March 2007 in the Eastern District of Louisiana. The complaint alleged antitrust violations, breach of contract, negligence, bad faith, and fraud. The court dismissed the antitrust claim as to both defendants and dismissed all claims against the Company other than fraud, which will proceed to the discovery phase along with the remaining claims against State Farm. Judge Duval denied plaintiffs' motion to certify a class with respect to the fraud and breach of contract claims on August 3, 2009 and the time to appeal that decision has expired. The matter now a single action was reassigned to Judge Africk. The plaintiffs agreed to settle the matter with the Company and State Farm and a Settlement Agreement and Release was executed by all parties in June 2010.

Mornay v. Travelers Ins. Co., et al. is a putative class action pending against the Company and Travelers Insurance Company filed in November 2007 in the Eastern District of Louisiana. The complaint alleged antitrust violations, breach of contract, negligence, bad faith, and fraud. As in *Schafer*, the court dismissed the antitrust claim as to both defendants and dismissed all claims against the Company other than fraud. Judge Duval stayed all proceedings in the case pending an appraisal of the lead plaintiff's insurance claim. The matter has been re-assigned to Judge Barbier, who on September 11, 2009 issued an order administratively closing the matter pending completion of the appraisal process.

At this time, it is not possible to determine the ultimate resolution of or estimate the liability related to the *Mornay* matter.

iiX Litigation

In March 2007, the Company's subsidiary, Insurance Information Exchange, or iiX, as well as other information providers and insurers in the State of Texas, were served with a summons and class action complaint filed in the United States District Court for the Eastern District of Texas alleging violations of the Driver Privacy Protection Act, or the DPPA, entitled *Sharon Taylor, et al. v. Axiom Corporation, et al.* Plaintiffs brought the action on their own behalf and on behalf of all similarly situated individuals whose personal information is contained in any motor vehicle record maintained by the State of Texas and who have not provided express consent to the State of Texas for the distribution of their personal information for purposes not enumerated by the DPPA and whose personal information has been knowingly obtained and used by the defendants. The class complaint alleges that the defendants knowingly obtained personal information for a purpose not authorized by the DPPA and seeks liquidated damages in the amount of \$3 for each instance of a violation of the DPPA, punitive damages and the destruction of any illegally obtained personal information. The Court granted iiX's motion to dismiss the complaint based on failure to state a claim and for lack of standing. Oral arguments on the plaintiffs' appeal of that dismissal were held on November 4, 2009. The Court of Appeals for the Fifth Circuit Court affirmed the District Court's dismissal of the complaint on July 14, 2010.

Table of Contents

Similarly, in April 2010, the Company's subsidiary, iiX, as well as other information providers in the State of Missouri were served with a summons and class action complaint filed in the United States District Court for the Western District of Missouri alleging violations of the Driver Privacy Protection Act, or the DPPA, entitled *Janice Cook, et al. v. ACS State & Local Solutions, et al.* Plaintiffs brought the action on their own behalf and on behalf of all similarly situated individuals whose personal information is contained in any motor vehicle record maintained by the State of Missouri and who have not provided express consent to the State of Missouri for the distribution of their personal information for purposes not enumerated by the DPPA and whose personal information has been knowingly obtained and used by the defendants. The class complaint alleges that the defendants knowingly obtained personal information for a purpose not authorized by the DPPA and seeks liquidated damages in the amount of \$3 for each instance of a violation of the DDPA, punitive damages and the destruction of any illegally obtained personal information. At this time, it is not possible to determine the ultimate resolution of or estimate the liability related to this matter.

Interthinx Litigation

In September 2009, the Company's subsidiary, Interthinx, Inc., was served with a putative class action entitled *Renata Gluzman v. Interthinx, Inc.* The plaintiff, a former Interthinx employee, filed the class action on August 13, 2009 in the Superior Court of the State of California, County of Los Angeles on behalf of all Interthinx information technology employees for unpaid overtime and missed meals and rest breaks, as well as various related claims claiming that the information technology employees were misclassified as exempt employees and, as a result, were denied certain wages and benefits that would have been received if they were properly classified as non-exempt employees. The pleadings include, among other things, a violation of Business and Professions Code 17200 for unfair business practices which allows plaintiffs to include as class members all information technology employees employed at Interthinx for four years prior to the date of filing the complaint. The complaint seeks compensatory damages, penalties that are associated with the various statutes, restitution, interest, costs and attorney fees. Although no assurance can be given concerning the outcome of this matter, in the opinion of management the lawsuit is not expected to have a material adverse effect on our financial condition or results of operations.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with our historical financial statements and the related notes included within our annual report on Form 10-K dated and filed with the Securities and Exchange Commission on March 9, 2010. This discussion contains forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those discussed in or implied by any of the forward-looking statements as a result of various factors.

We enable risk-bearing businesses to better understand and manage their risks. We provide value to our customers by supplying proprietary data that, combined with our analytic methods, creates embedded decision support solutions. We are the largest aggregator and provider of data pertaining to U.S. property and casualty, or P&C, insurance risks. We offer solutions for detecting fraud in the U.S. P&C insurance, mortgage and healthcare industries and sophisticated methods to predict and quantify loss in diverse contexts ranging from natural catastrophes to health insurance.

Our customers use our solutions to make better risk decisions with greater efficiency and discipline. We refer to these products and services as *solutions* due to the integration among our products and the flexibility that enables our customers to purchase components or the comprehensive package of products. These solutions take various forms, including data, statistical models or tailored analytics, all designed to allow our clients to make more logical decisions. We believe our solutions for analyzing risk positively impact our customers' revenues and help them better manage their costs.

On May 23, 2008, in contemplation of our initial public offering, or IPO, we formed Verisk Analytics, Inc., or Verisk, a Delaware corporation, to be the holding company for our business. Verisk was initially formed as a wholly-owned subsidiary of Insurance Services Office, Inc., or ISO. On October 6, 2009, in connection with our initial public offering, we effected a reorganization whereby ISO became a wholly-owned subsidiary of Verisk. Verisk had no operations prior to the initial public offering.

We organize our business in two segments: Risk Assessment and Decision Analytics. Our Risk Assessment segment provides statistical, actuarial and underwriting data for the U.S. P&C insurance industry. Our Risk Assessment segment revenues represented approximately 48% and 52% of our revenues for the six months ended June 30, 2010 and 2009, respectively. Our Decision Analytics segment provides solutions our customers use to analyze the three processes of the Verisk Risk Analysis Framework: Prediction of Loss, Detection and Prevention of Fraud, and Quantification of Loss. Our Decision Analytics segment revenues represented approximately 52% and 48% of our revenues for the six months ended June 30, 2010 and 2009, respectively.

Executive Summary

Key Performance Metrics

We believe our business's ability to generate recurring revenue and positive cash flow is the key indicator of the successful execution of our business strategy. We use year over year revenue growth and EBITDA margin as metrics to measure our performance. EBITDA and EBITDA margin are non-GAAP financial measures within the meaning of Regulation G under the Securities Exchange Act of 1934 (See footnote 2 within the Condensed Consolidated Results of Operations section of *Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations*).

Revenue growth. We use year over year revenue growth as a key performance metric. We assess revenue growth based on our ability to generate increased revenue through increased sales to existing customers, sales to new customers, sales of new or expanded solutions to existing and new customers and strategic acquisitions of new businesses.

EBITDA margin. We use EBITDA margin as a metric to assess segment performance and scalability of our business. We assess EBITDA margin based on our ability to increase revenues while controlling expense growth.

Revenues

We earn revenues through subscriptions, long-term agreements and on a transactional basis. Subscriptions for our solutions are generally paid in advance of rendering services either quarterly or in full upon commencement of the subscription period, which is usually for one year and automatically renewed each year. As a result, the timing of our cash flows generally precedes our recognition of revenues and income and our cash flow from operations tends to be

higher in the first quarter as we receive subscription payments. Examples of these arrangements include subscriptions that allow our customers to access our standardized coverage language or our actuarial services throughout the subscription period. In general, we experience minimal seasonality within the business. Our long-term agreements are generally for periods of three to seven years. We recognize revenue from subscriptions ratably over the term of the subscription and most long-term agreements are recognized ratably over the term of the agreement.

Table of Contents

Certain of our solutions are also paid for by our customers on a transactional basis. For example, we have solutions that allow our customers to access fraud detection tools in the context of an individual mortgage application, obtain property-specific rating and underwriting information to price a policy on a commercial building, or compare a P&C insurance, medical or workers' compensation claim with information in our databases. For the six month periods ended June 30, 2010 and 2009, respectively, 31% and 28% of our revenues were derived from providing transactional solutions. We earn transactional revenues as our solutions are delivered or services performed. In general, transactions are billed monthly at the end of each month.

Approximately 84% of the revenues in our Risk Assessment segment for each of the six month periods ended June 30, 2010 and 2009 were derived from subscriptions and long-term agreements for our solutions. Our customers in this segment include most of the P&C insurance providers in the United States, and we have retained approximately 99% of our P&C insurance customer base in each of the last five years. More than 55% and 59% of the revenues in our Decision Analytics segment, for the six months ended June 30, 2010 and 2009, respectively, were derived from subscriptions and long-term agreements for our solutions.

Principal Operating Costs and Expenses

Personnel expenses are the major component of both our cost of revenues and selling, general and administrative expenses. Personnel expenses include salaries, benefits, incentive compensation, equity compensation costs (described under *Equity Compensation Costs* below), sales commissions, employment taxes, recruiting costs, and outsourced temporary agency costs, which represented 65% of our total expenses for each of the six months periods ended June 30, 2010 and 2009, respectively.

We allocate personnel expenses between two categories, cost of revenues and selling, general and administrative costs, based on the actual costs associated with each employee. We categorize employees who maintain our solutions as cost of revenues, and all other personnel, including executive managers, sales people, marketing, business development, finance, legal, human resources, and administrative services, as selling, general and administrative expenses. A significant portion of our other operating costs, such as facilities and communications, are also either captured within cost of revenues or selling, general and administrative expense based on the nature of the work being performed.

While we expect to grow our headcount over time to take advantage of our market opportunities, we believe that the economies of scale in our operating model will allow us to grow our personnel expenses at a lower rate than revenues. Historically, our EBITDA margin has improved because we have been able to increase revenues without a proportionate corresponding increase in expenses.

Cost of Revenues. Our cost of revenues consists primarily of personnel expenses. Cost of revenues also includes the expenses associated with the acquisition and verification of data, the maintenance of our existing solutions and the development and enhancement of our next-generation solutions. Our cost of revenues excludes depreciation and amortization.

Selling, General and Administrative Expense. Our selling, general and administrative expense also consists primarily of personnel costs. A portion of the other operating costs such as facilities, insurance and communications are also allocated to selling, general and administrative costs based on the nature of the work being performed by the employee. Our selling, general and administrative expense excludes depreciation and amortization.

Description of Acquisitions

Since January 1, 2009 we acquired four businesses. As a result of these acquisitions, our consolidated results of operations may not be comparable between periods.

On February 26, 2010, we acquired 100% of the stock of Strategic Analytics, Inc., or Strategic Analytics, a privately owned provider of credit risk and capital management solutions to consumer and mortgage lenders. We believe this acquisition will allow our customers to take advantage of state-of-the-art loss forecasting, stress testing, and economic capital requirement tools to better understand and forecast the risk associated within their credit portfolios.

On October 30, 2009, we acquired the net assets of Enabl-u Technology Corporation, Inc, or Enabl-u, a privately owned provider of data management, training and communication solutions to companies with regional, national or global work forces. We believe this acquisition will enhance our ability to provide solutions for customers to measure loss prevention and improve asset management through the use of software and software services.

On July 24, 2009, we acquired the net assets of TierMed Systems, LLC, or TierMed, a privately owned provider of Healthcare Effectiveness Data and Information Set, or HEDIS, solutions to healthcare organizations that have HEDIS or quality-reporting needs. We believe this acquisition will enhance our ability to provide solutions for customers to measure and improve healthcare quality and financial performance through the use of software and software services.

Table of Contents

On January 14, 2009, we acquired 100% of the stock of D2 Hawkeye, Inc., or D2, a privately owned provider of data mining, decision support, clinical quality analysis, and risk analysis tools for the healthcare industry. We believe this acquisition will enhance our position in the healthcare analytics and predictive modeling market by providing new market, cross-sell, and diversification opportunities for the Company's expanding healthcare solutions.

Equity Compensation Costs

We have a leveraged employee stock ownership plan, or ESOP, funded with intercompany debt that includes 401(k), ESOP and profit sharing components to provide employees with equity participation. We make quarterly cash contributions to the plan equal to the debt service requirements. As the debt is repaid, a percentage of the ESOP loan collateral is released to the ESOP to fund 401(k) matching and profit sharing contributions and the remainder is allocated annually to active employees in proportion to their eligible compensation in relation to total participants eligible compensation.

We accrue compensation expense over the reporting period equal to the fair value of the ESOP loan collateral to be released to the ESOP.

In connection with our initial public offering, on October 6, 2009, we accelerated our future ESOP allocation contribution through the end of the ESOP in 2013, to all participants eligible for a contribution in 2009. This resulted in a non-recurring non-cash charge of approximately \$57.7 million in the fourth quarter of 2009. As a result, subsequent to the offering, the non-cash ESOP allocation expense has been reduced to zero in 2010.

The amount of our ESOP costs recognized for the three and six months ended June 30, 2010 and 2009 are as follows:

	Three Months Ended June		Six Months Ended June 30,	
	2010	2009	2010	2009
	(In thousands)			
ESOP costs by contribution type:				
401(k) matching contribution expense	\$ 2,495	\$ 2,149	\$ 4,848	\$ 4,253
Profit sharing contribution expense	384	315	881	705
ESOP allocation expense		3,147		5,780
Total ESOP costs	\$ 2,879	\$ 5,611	\$ 5,729	\$ 10,738
ESOP costs by segment:				
Risk Assessment ESOP costs	\$ 1,688	\$ 3,233	\$ 3,415	\$ 6,208
Decision Analytics ESOP costs	1,191	2,378	2,314	4,530
Total ESOP costs	\$ 2,879	\$ 5,611	\$ 5,729	\$ 10,738

In addition, the portion of the ESOP allocation expense related to the appreciation of the value of the ESOP loan collateral in the ESOP above the value of the contribution made when the ESOP was first established is not tax deductible. Therefore, the accelerated ESOP allocation in the fourth quarter of 2009 will result in a reduction to our effective tax rate in the year 2010 and should have a similar impact in future periods.

Trends Affecting Our Business

A portion of our revenues is related to changes in historical insurance premiums; therefore, our revenues could be positively or negatively affected by growth or declines in premiums for the lines of insurance for which we perform services. The pricing of these solutions is based on an individual customer's premiums in a prior period, so the pricing is fixed at the inception of each calendar year. The impact of insurance premiums has a more significant impact on the Risk Assessment segment than it does on the Decision Analytics segment. Since 2005, premium growth in the P&C insurance industry has slowed and we expect little or no growth for most industry insurance lines during 2010. A significant portion of our revenues is from insurance companies. Although business and new sales from these

companies have generally remained strong, the current economic environment could negatively impact buying demand for our solutions.

A portion of our revenues in the Decision Analytics segment is tied to the volume of applications for new mortgages or refinancing of existing mortgages. Turmoil in the mortgage market since 2007 has adversely affected revenue in this segment of our business. This trend began to reverse in late 2008 spurred by lower mortgage interest rates. As a result of the rise in foreclosures and early pay defaults, we have seen and expect to see in the future an increase in revenues from our solutions that help our customers focus on improved underwriting quality of mortgage loans. These solutions help to ensure the application data is accurate and identify and rapidly settle bad loans, which may have been originated based upon fraudulent information.

Table of Contents**Condensed Consolidated Results of Operations**

From January 1, 2009 to June 30, 2010 we have acquired four businesses, which may affect the comparability of our financial statements.

	Three Months Ended June 30,			Six Months Ended June 30,

The financial operating data below sets forth the information we believe is useful for investors in evaluating our overall financial performance:

Other data:

EBITDA (2):

Risk Assessment EBITDA	\$	66,198	\$	60,598	9.2%	\$	131,694	\$	121,197	8.7%
Decision Analytics EBITDA		57,841		45,435	27.3%		115,992		89,744	29.2%
EBITDA	\$	124,039	\$	106,033	17.0%	\$	247,686	\$	210,941	17.4%

The following is a reconciliation of net income to EBITDA:

Net income	\$	58,404	\$	45,939	27.1%	\$	113,779	\$	90,854	25.2%
Depreciation and amortization		16,964		18,182	(6.7)%		34,197		35,887	(4.7)%
Investment income and realized (gains)/losses on securities, net		(121)		(82)	47.6%		(185)		273	(167.8)%
Interest expense		8,445		8,523	(0.9)%		16,911		16,677	1.4%
Provision for income taxes		40,347		33,471	20.5%		82,984		67,250	23.4%
EBITDA	\$	124,039	\$	106,033	17.0%	\$	247,686	\$	210,941	17.4%

(1) In conjunction with our initial public offering, the stock of Insurance Services Office, Inc. converted to stock of Verisk Analytics, Inc.

which effected a fifty-for-one stock split of its common stock. The numbers in the above table reflect this stock split.

- (2) EBITDA is the financial measure, which management uses to evaluate the performance of our segments. EBITDA is defined as net income before investment income and realized (gains)/losses on securities, net, interest expense, provision for income taxes, and depreciation and amortization of fixed and intangible assets. In addition, this Management's Discussion and Analysis includes references to EBITDA margin, which is computed as EBITDA divided by revenues. See Note 13 of our unaudited condensed consolidated financial statements

included in this
10-Q filing.

Table of Contents

Although EBITDA is a non-GAAP financial measure, EBITDA is frequently used by securities analysts, lenders and other in their evaluation of companies, EBITDA has limitations as an analytical tool, and should not be considered in isolation, or as a substitute for an analysis of our results of operations or cash flow from operating activities reported under GAAP. Management uses EBITDA in conjunction with traditional GAAP operating performance measures as part of its overall assessment of company performance. Some of these limitations are:

EBITDA does not reflect our cash expenditures, or future requirements for capital expenditures or contractual commitments;

EBITDA does not reflect changes in, or cash requirement for, our working capital needs;

Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized often will have to be replaced in the future and EBITDA does not reflect any cash requirements for such replacements; and

Other companies in our industry may calculate EBITDA differently than we do, limiting its usefulness as a comparative measure.

Consolidated Results of Operations

Six Months Ended June 30, 2010 Compared to Six Months Ended June 30, 2009

Revenues

Revenues were \$557.8 million for the six months ended June 30, 2010 compared to \$503.7 million for the six months ended June 30, 2009, an increase of \$54.1 million or 10.8%. In the first quarter of 2010 and the latter half of 2009, we acquired three companies, Strategic Analytics, Enabl-u, and TierMed, collectively referred to as recent acquisitions, which accounted for an increase of \$4.0 million in revenues for the six months ended June 30, 2010. Excluding recent acquisitions, revenues increased \$50.1 million, which included an increase in our Risk Assessment segment of \$6.0 million and an increase in our Decision Analytics segment of \$44.1 million. During the second quarter of 2009, we recognized \$2.1 million of revenue that was previously deferred, which lowered our revenue growth for the six months ended June 30, 2010 by 0.5%.

Cost of Revenues

Cost of revenues was \$230.0 million for the six months ended June 30, 2010 compared to \$220.5 million for the six months ended June 30, 2009, an increase of \$9.5 million or 4.3%. The increase was primarily due to costs related to recent acquisitions of \$2.9 million, an increase in data and consultant costs of \$4.5 million, and an increase in salaries and employee benefits costs of \$3.7 million, which include annual salary increases and medical costs, but reflects no ESOP allocation expense in 2010 due to the accelerated ESOP allocation prior to our initial public offering in the fourth quarter of 2009. ESOP allocation expense for the six months ending June 30, 2009 was \$4.5 million. Also within the salaries and employee benefits increase is an offsetting reduction in pension cost of \$3.9 million. The pension cost decreased primarily due to the partial recovery in 2009 of the fair value of our pension investments. These increases were partially offset by a slight decrease in other operating expenses of \$1.6 million.

Selling, General and Administrative Expenses

Selling, general and administrative expenses were \$80.1 million for the six months ended June 30, 2010 compared to \$72.2 million for the six months ended June 30, 2009, an increase of \$7.9 million or 11.0%. The increase was primarily due to costs attributable to recent acquisitions of \$1.0 million and increased salaries and employee benefits costs of \$6.6 million, which include annual salary increases, medical costs, commissions, and stock option expense, including the IPO grant. Salaries and employee benefits costs reflect no ESOP allocation expense for the six months ended June 30, 2010 as compared to \$1.3 million for the six months ended June 30, 2009. Also within the salaries and employee benefits increase is an offsetting reduction in pension cost of \$0.9 million. The pension cost decreased primarily due to the partial recovery in 2009 of the fair value of our pension investments. Other increases were within other general expenses of \$2.0 million, which include advertising cost. These increases were partially offset by a decrease in legal costs of \$1.7 million.

Table of Contents*Depreciation and Amortization of Fixed Assets*

Depreciation and amortization of fixed assets was \$19.9 million for the six months ended June 30, 2010 compared to \$18.9 million for the six months ended June 30, 2009, an increase of \$1.0 million or 5.1%. Depreciation and amortization of fixed assets includes depreciation of furniture and equipment, software, computer hardware, and related equipment. The majority of the increase relates to software and hardware costs to support data capacity expansion and revenue growth.

Amortization of Intangible Assets

Amortization of intangible assets was \$14.3 million for the six months ended June 30, 2010 compared to \$17.0 million for the six months ended June 30, 2009, a decrease of \$2.7 million or 15.6%. This decrease was primarily related to a decrease of \$3.7 million in intangible assets associated with acquisitions that have been fully amortized in prior years and was partially offset by \$1.0 million of amortization of intangible assets associated with the three recent acquisitions.

Investment Income and Realized Gains/(Losses) on Securities, Net

Investment income and realized gains/(losses) on securities, net was a gain of \$0.2 million for the six months ended June 30, 2010 compared to a loss of \$0.3 million for the six months ended June 30, 2009, an increase of \$0.5 million.

Interest Expense

Interest expense was \$16.9 million for the six months ended June 30, 2010 compared to \$16.7 million for the six months ended June 30, 2009, an increase of \$0.2 million or 1.4%. This increase is primarily due to the amortization of debt issuance costs during the six months ended June 30, 2010.

Provision for Income Taxes

The provision for income taxes was \$83.0 million for the six months ended June 30, 2010 compared to \$67.3 million for the six months ended June 30, 2009, an increase of \$15.7 million or 23.4%. The effective tax rate was 42.2% for the six months ended June 30, 2010 compared to 42.5% for the six months ended June 30, 2009. The effective rate for the six months ended June 30, 2010 was lower due to a decrease in nondeductible expenses in 2010 versus 2009 related to the ISO 401(k) Savings and Employee Stock Ownership Plan, or KSOP. This benefit was partially offset by a non-cash charge of \$2.4 million resulting from reduced tax benefits of Medicare subsidies associated with legislative changes in the first quarter. Excluding this charge, the effective rate for the six months ended June 30, 2010 would have been 41.0%.

EBITDA Margin

The EBITDA margin for our consolidated results was 44.4% for the six months ended June 30, 2010 compared to 41.9% for the six months ended June 30, 2009. Our EBITDA margin reflects no ESOP allocation expense in 2010 due to the accelerated ESOP allocation prior to our initial public offering in the fourth quarter of 2009. This resulted in an increase of our EBITDA margin for the six months ended June 30, 2010, due to the reduction of ESOP allocation expense of \$5.8 million, which positively impacted our EBITDA margin by approximately 1.0%. Also included in the calculation of our EBITDA margin are decreased pension costs of \$4.8 million, which positively impacted our EBITDA margin by approximately 0.9%.

Three Months Ended June 30, 2010 Compared to Three Months Ended June 30, 2009*Revenues*

Revenues were \$281.7 million for the three months ended June 30, 2010 compared to \$257.9 million for the three months ended June 30, 2009, an increase of \$23.8 million or 9.2%. In the first quarter of 2010 and the latter half of 2009, we acquired three companies, Strategic Analytics, Enabl-u, and TierMed, collectively referred to as recent acquisitions, which accounted for an increase of \$2.5 million in revenues for the three months ended June 30, 2010. Excluding recent acquisitions, revenues increased \$21.3 million, which included an increase in our Risk Assessment segment of \$1.0 million and an increase in our Decision Analytics segment of \$20.3 million. During the second quarter of 2009, we recognized \$2.1 million of revenue that was previously deferred, which lowered our revenue growth for the three months ended June 30, 2010 by 0.9%.

Cost of Revenues

Cost of revenues was \$115.0 million for the three months ended June 30, 2010 compared to \$113.0 million for the three months ended June 30, 2009, an increase of \$2.0 million or 1.8%. The increase was primarily due to costs

related to recent acquisitions of \$1.6 million, and an increase in salaries and employee benefits costs of \$1.7 million, which include annual salary increases and medical costs, but reflects no ESOP allocation expense in 2010 due to the accelerated ESOP allocation prior to our initial public offering in the fourth quarter of 2009. ESOP allocation expense for the three months ending June 30, 2009 was \$2.4 million. Also within the salaries and employee benefits increase is an offsetting reduction in pension cost of \$2.0 million. Other increases include data and consultant costs of \$0.9 million primarily in our Decision Analytics segment, offset by a decrease in other operating expenses of \$2.2 million.

Table of Contents*Selling, General and Administrative Expenses*

Selling, general and administrative expenses were \$42.6 million for the three months ended June 30, 2010 compared to \$38.9 million for the three months ended June 30, 2009, an increase of \$3.7 million or 9.6%. The increase was primarily due to costs attributable to recent acquisitions of \$0.6 million and increased salaries and employee benefits costs of \$2.7 million, which include annual salary increases, medical costs, commissions, and stock option expense, including the IPO grant. Salaries and employee benefits costs reflect no ESOP allocation expense for the three months ended June 30, 2010 as compared to \$0.7 million for the three months ended June 30, 2009. Also within the salaries and employee benefits increase is an offsetting reduction in pension cost of \$0.5 million. Other increases were other general expenses of \$1.5 million. This increase was partially offset by a decrease in legal costs of \$1.1 million.

Provision for Income Taxes

The provision for income taxes was \$40.3 million for the three months ended June 30, 2010 compared to \$33.5 million for the three months ended June 30, 2009, an increase of \$6.8 million or 20.5%. The effective tax rate was 40.9% for the three months ended June 30, 2010 compared to 42.2% for the three months ended June 30, 2009. The effective rate for the three months ended June 30, 2010 was lower than the prior period due to lower nondeductible KSOP expenses in 2010.

EBITDA Margin

The EBITDA margin for our consolidated results was 44.0% for the three months ended June 30, 2010 compared to 41.1% for the three months ended June 30, 2009. Our EBITDA margin reflects no ESOP allocation expense in 2010 due to the accelerated ESOP allocation prior to our initial public offering in the fourth quarter of 2009. This resulted in an increase in our EBITDA margin for the three months ended June 30, 2010, due to the reduction of ESOP allocation expense of \$3.1 million, which positively impacted our EBITDA margin by approximately 1.1%. Also included in the calculation of our EBITDA margin are decreased pension costs of \$2.6 million, which positively impacted our EBITDA margin by approximately 0.9%.

Results of Operations by Segment*Risk Assessment Results of Operations**Revenues*

Revenues were \$268.9 million for the six months ended June 30, 2010 as compared to \$262.9 million for the six months ended June 30, 2009, an increase of \$6.0 million or 2.3% and \$134.3 million for the three months ended June 30, 2010 as compared to \$133.3 million for the three months ended June 30, 2009, an increase of \$1.0 million or 0.7%. During the second quarter of 2009, we recognized \$2.1 million of revenue that was previously deferred, which lowered our revenue growth for the six months and three months ended June 30, 2010 by 0.8% and 1.6%, respectively. The overall increase within this segment primarily resulted from an increase in prices derived from continued enhancements to the content of our solutions and the addition of new customers.

Our revenue by category for the periods presented is set forth below:

	Three Months Ended June			Percentage Change	Six Months Ended June		
	2010	2009			2010	2009	
	(In thousands)				(In thousands)		
Industry standard insurance programs	\$ 87,427	\$ 87,046		0.4%	\$ 175,471	\$ 172,193	1.9%
Property-specific rating and underwriting information	34,267	33,868		1.2%	68,226	65,869	3.6%
Statistical agency and data services	7,190	7,077		1.6%	14,369	14,135	1.7%
Actuarial services	5,405	5,316		1.7%	10,801	10,676	1.2%
Total Risk Assessment	\$ 134,289	\$ 133,307		0.7%	\$ 268,867	\$ 262,873	2.3%

Table of Contents*Cost of Revenues*

Cost of revenues for our Risk Assessment segment was \$98.6 million for the six months ended June 30, 2010 compared to \$104.5 million for the six months ended June 30, 2009, a decrease of \$5.9 million or 5.7%. The decrease was primarily due to a decrease in salaries and employee benefits costs of \$4.1 million, which was primarily due to no ESOP allocation expense in 2010 as compared to \$2.5 million in 2009. Also within the salaries and employee benefits decrease is a reduction in pension cost of \$3.3 million. Other decreases were in other general expenses of \$2.1 million, which was partially offset by an increase in data and consultant costs of \$0.3 million.

Cost of revenues for our Risk Assessment segment was \$48.7 million for the three months ended June 30, 2010 compared to \$53.0 million for the three months ended June 30, 2009, a decrease of \$4.3 million or 8.1%. The decrease was primarily due to a decrease in salaries and employee benefits costs of \$2.2 million, which was primarily due to no ESOP allocation expense in 2010 as compared to \$1.3 million in 2009. Also within the salaries and employee benefits decrease is a reduction in pension cost of \$1.7 million. Other decreases were in other general expenses of \$2.3 million costs, which was partially offset by an increase in data and consultant costs of \$0.2 million.

Selling, General and Administrative Expenses

Selling, general and administrative expenses for our Risk Assessment segment were \$38.6 million for the six months ended June 30, 2010 compared to \$37.2 million for the six months ended June 30, 2009, an increase of \$1.4 million or 3.8%. The increase was primarily due to an increase in salaries and employee benefit costs of \$1.9 million, which include annual salary increases, medical costs, commissions, and stock option expense, including the IPO grant. Salaries and employee benefits costs reflect no ESOP allocation expense for the six months ended June 30, 2010 as compared to \$0.7 million for the six months ended June 30, 2009. Also within the salaries and employee benefits increase is an offsetting reduction in pension cost of \$0.7 million. This increase was partially offset by a decrease in legal costs of \$0.4 million and other general expenses of \$0.1 million.

Selling, general and administrative expenses for our Risk Assessment segment were \$19.4 million for the three months ended June 30, 2010 compared to \$19.7 million for the three months ended June 30, 2009, a decrease of \$0.3 million or 1.5%. The decrease was primarily due to a decrease in legal expenses of \$0.6 million and other general expenses of \$0.1 million. The decrease was partially offset by an increase in salaries and employee benefit costs of \$0.4 million, which include annual salary increases, medical costs, commissions, and stock option expense, including the IPO grant. Salaries and employee benefits costs reflect no ESOP allocation expense for the three months ended June 30, 2010 as compared to \$0.3 million for the three months ended June 30, 2009. Also within the salaries and employee benefits increase is an offsetting reduction in pension cost of \$0.4 million.

EBITDA Margin

The EBITDA margin for our Risk Assessment segment was 49.0% for the six months ended June 30, 2010 compared to 46.1% for the six months ended June 30, 2009. The primary reason for the increase in our EBITDA margin for the six months ended June 30, 2010 is the reduction of ESOP allocation expense of \$3.2 million, resulting in a 1.1% positive impact on our EBITDA margin.

Decision Analytics Results of Operations*Revenues*

Revenues for our Decision Analytics segment were \$288.9 million for the six months ended June 30, 2010 compared to \$240.8 million for the six months ended June 30, 2009, an increase of \$48.1 million or 20.0%. In the first quarter of 2010 and the latter half of 2009, we acquired three companies. Recent acquisitions accounted for an increase of \$4.0 million in revenues for the six months ended June 30, 2010. Excluding the impact of recent acquisitions, revenue increased \$44.1 million for the six months ended June 30, 2010. Our fraud identification and detection solutions revenue increased \$27.5 million or 21.1%, primarily in our fraud detection and forensic audit services for the home mortgage and mortgage insurance industries, as well as an increase in services sold in response to the increased scrutiny and refinancing within the mortgage industry. Increased revenue in our loss prediction solutions of \$9.8 million or 14.7%, was primarily due to increased penetration of our existing customers. Our loss quantification solution revenues increased \$10.8 million or 25.0%, as a result of new customer contracts and claims volume increases associated with severe weather conditions and other damages caused by disasters experienced in the United States.

Table of Contents

Revenues for our Decision Analytics segment were \$147.4 million for the three months ended June 30, 2010 compared to \$124.6 million for the three months ended June 30, 2009, an increase of \$22.8 million or 18.3%. In the first quarter of 2010 and the latter half of 2009, we acquired three companies. Recent acquisitions accounted for an increase of \$2.5 million in revenues for the three months ended June 30, 2010. Excluding the impact of recent acquisitions, revenue increased \$20.3 million for the three months ended June 30, 2010. Our fraud identification and detection solutions revenue increased \$12.6 million or 18.9% primarily in our fraud detection and forensic audit services for the home mortgage and mortgage insurance industries, as well as an increase in services sold in response to the increased scrutiny and refinancing within the mortgage industry. Our loss prediction solutions increase of \$3.8 million or 10.7% was primarily from increased penetration of our existing customers. Revenue in our loss quantification solution revenues increased \$6.4 million or 29.0% as a result of new customer contracts and claims volume increases associated with severe weather conditions and other damages caused by disasters experienced in the United States.

Our revenue by category for the periods presented is set forth below:

	Three Months Ended June 30,			Percentage Change	Six Months Ended June 30,		
	2010	2009			2010	2009	Percentage Change
	(In thousands)				(In thousands)		
Fraud identification and detection solutions	\$ 79,195	\$ 66,633	18.9%	\$ 157,990	\$ 130,475	21.1%	
Loss prediction solutions	39,779	35,943	10.7%	76,707	66,896	14.7%	
Loss quantification solutions	28,414	22,033	29.0%	54,267	43,423	25.0%	
Total Decision Analytics	\$ 147,388	\$ 124,609	18.3%	\$ 288,964	\$ 240,794	20.0%	

Cost of Revenues

Cost of revenues for our Decision Analytics segment was \$131.4 million for the six months ended June 30, 2010 compared to \$116.0 million for the six months ended June 30, 2009, an increase of \$15.4 million or 13.3%. The increase included \$2.9 million in costs attributable to recent acquisitions. Excluding the impact of these acquisitions, the cost of revenues increased \$12.5 million, primarily due to an increase in salaries and employee benefits of \$7.8 million, which include annual salary increases and increased medical costs. Salaries and employee benefits costs reflect no ESOP allocation expense for the six months ended June 30, 2010 as compared to \$2.0 million for the six months ended June 30, 2009. Also within the salaries and employee benefits increase is an offsetting reduction in pension cost of \$0.6 million. Other increases include data and consultant costs of \$4.2 million, and other operating expenses of \$0.5 million.

Cost of revenues for our Decision Analytics segment was \$66.3 million for the three months ended June 30, 2010 compared to \$60.0 million for the three months ended June 30, 2009, an increase of \$6.3 million or 10.6%. The increase included \$1.6 million in costs attributable to recent acquisitions. Excluding the impact of these acquisitions, the cost of revenues increased \$4.7 million, primarily due to an increase in salaries and employee benefits of \$3.9 million, which include annual salary increases and increased medical costs. Salaries and employee benefits costs reflect no ESOP allocation expense for the six months ended June 30, 2010 as compared to \$1.1 million for the six months ended June 30, 2009. Also within the salaries and employee benefits increase is an offsetting reduction in pension cost of \$0.3 million. Other increases include data and consultant costs of \$0.7 million and other operating expenses of \$0.1 million.

Selling, General and Administrative Expenses

Selling, general and administrative expenses were \$41.5 million for the six months ended June 30, 2010 compared to \$35.0 million for the six months ended June 30, 2009, an increase of \$6.5 million or 18.6%. The increase was due to costs attributable to recent acquisitions of \$1.0 million and an increase in salaries and employee benefits costs of

\$4.7 million, which include annual salary increases, medical costs, commissions, and stock option expense, including the IPO grant. Salaries and employee benefits costs reflect no ESOP allocation expense for the six months ended June 30, 2010 as compared to \$0.6 million for the six months ended June 30, 2009. Also within the salaries and employee benefits increase is an offsetting reduction in pension cost of \$0.2 million. Other increases include an increase in general expenses of \$2.1 million. These increases are partially offset by a decrease in legal expense of \$1.3 million.

Selling, general and administrative expenses were \$23.2 million for the three months ended June 30, 2010 compared to \$19.2 million for the three months ended June 30, 2009, an increase of \$4.0 million or 21.1%. The increase was due to costs attributable to recent acquisitions of \$0.6 million and an increase in salaries and employee benefits costs of \$2.3 million, which include annual salary increases, medical costs, commissions, and stock option expense, including the IPO grant. Salaries and employee benefits costs reflect no ESOP allocation expense for the three months ended June 30, 2010 as compared to \$0.4 million for the three months ended June 30, 2009. Also within the salaries and employee benefits increase is an offsetting reduction in pension cost of \$0.1 million. Other increases include an increase in general expenses of \$1.6 million. These increases are partially offset by a decrease in legal expense of \$0.5 million.

Table of Contents

EBITDA Margin

The EBITDA margin for our Decision Analytics segment was 40.1% for the six months ended June 30, 2010 compared to 37.3% for the six months ended June 30, 2009. Included within the increase in our EBITDA margin for the six months ended June 30, 2010 is the reduction of ESOP allocation expense of \$2.6 million, resulting in a 0.9% positive impact on our EBITDA margin.

Liquidity and Capital Resources

As of June 30, 2010 and December 31, 2009, we had cash and cash equivalents and available-for-sale securities of \$111.9 million and \$77.0 million, respectively. Subscriptions for our solutions are billed and generally paid in advance of rendering service either quarterly or in full upon commencement of the subscription period, which is usually for one year, and they are automatically renewed at the beginning of each calendar year. We have historically generated significant cash flows from operations. As a result of this factor, as well as the availability of funds under our committed credit facilities, we believe we will have sufficient cash to meet our working capital and capital expenditure needs, including acquisition contingent payments.

We have historically managed the business with a working capital deficit due to the fact that, as described above, we offer our solutions and services primarily through annual subscriptions or long-term contracts, which are generally prepaid quarterly or annually in advance of the services being rendered. When cash is received for prepayment of invoices, we record an asset (cash and cash equivalents) on our balance sheet with the offset recorded as a current liability (fees received in advance). This current liability is deferred revenue that does not require a direct cash outflow since our customers have prepaid and are obligated to purchase the services. In most businesses, growth in revenue typically leads to an increase in the accounts receivable balance causing a use of cash as a company grows. Unlike those businesses, our cash position is favorably affected by revenue growth, which results in a source of cash due to our customers prepaying for most of our services.

Our capital expenditures, which include non-cash purchases of fixed assets, as a percentage of revenues for the six months ended June 30, 2010 and 2009, were 3.0% and 3.7%, respectively. Expenditures related to developing and enhancing our solutions are predominately related to internal use software and are capitalized in accordance with the accounting guidance for costs of computer software developed or obtained for internal use. The amounts capitalized in accordance with the accounting guidance for software to be sold, leased or otherwise marketed are not significant to the financial statements.

To provide liquidity to our stockholders, we have historically used our cash for repurchases of our common stock from our stockholders. During the six months ended June 30, 2009, we redeemed \$38.3 million of our ISO Class A common stock. A substantial portion of the share redemptions included in the total above was completed pursuant to the terms of the Insurance Service Office, Inc. 1996 Incentive Plan, or the Option Plan. The obligation to redeem shares issued under the Option Plan terminated upon completion of our initial public offering. On April 29, 2010, our board of directors authorized a \$150.0 million stock repurchase program. See Note 10 to our condensed consolidated financial statements included in this quarterly report on Form 10-Q. During the six months ended June 30, 2010, we repurchased \$64.9 million of our publicly traded Class A common stock and \$15.1 million of shares used in the settlement of taxes upon the exercise of stock options.

We provide pension and postretirement benefits to certain qualifying active employees and retirees. Based on the pension funding policy, we contributed \$9.7 million to the pension plan during the six months ended June 30, 2010 and expect to contribute approximately \$11.3 million to the pension plan in the remaining periods of 2010. Under the postretirement plan, we provide certain healthcare and life insurance benefits to qualifying participants; however, participants are required to pay a stated percentage of the premium coverage. We contributed approximately \$2.1 million to the postretirement plan during the six months ended June 30, 2010 and expect to contribute approximately \$2.8 million in the remaining periods of 2010. See Note 12 to our condensed consolidated financial statements included in this quarterly report on Form 10-Q.

Financing and Financing Capacity

We had total debt, excluding capital lease and other obligations, of \$525.0 million and \$585.0 million at June 30, 2010 and December 31, 2009, respectively. The debt at June 30, 2010 was held under long-term loan facilities drawn to finance our stock repurchases and acquisitions.

As of June 30, 2010, all of our long-term loan facilities are uncommitted facilities and our syndicated revolving credit facility is a committed facility. We have financed and expect to finance our short-term working capital needs and acquisition contingent payments through cash from operations and borrowings from a combination of our long-term shelf facilities and our syndicated revolving credit facility, which is made at variable rates of interest based on LIBOR plus 2.50%. On January 19, 2010 and January 25, 2010, we repaid \$10.0 million and \$50.0 million, respectively, of our outstanding borrowings from the syndicated revolving credit facility. We had no borrowings from our syndicated revolving credit facility outstanding as of June 30, 2010 and \$60.0 million outstanding as of December 31, 2009. We had available capacity of \$418.5 million from our syndicated revolving credit facility at June 30, 2010.

Table of Contents

We have long-term loan facilities under uncommitted master shelf agreements with New York Life and Aviva Investors North America, or Aviva, with available capacity at June 30, 2010 in the amount of \$30.0 million and \$20.0 million, respectively. We can borrow under the New York Life facility until March 16, 2013, and under the Aviva facility until December 10, 2011. Our long-term uncommitted master shelf facility with Prudential Capital Group, or Prudential, expired on February 28, 2010. This facility contained additional available capacity of \$115.0 million. We expect to extend the facility with Prudential during the third quarter of 2010.

Notes outstanding under these facilities mature over the next six years. Individual borrowings are made at a fixed rate of interest determined at the time of the borrowing and interest is payable quarterly. The weighted average rate of interest with respect to our outstanding long-term borrowings was 6.15% and 5.80% for the six months ended June 30, 2010 and 2009, respectively. The uncommitted master shelf agreements contain certain covenants that limit our ability to create liens, enter into sale and leaseback transactions and consolidate, merge or sell assets to another company. The uncommitted master shelf agreements also contain financial covenants that require us to maintain a fixed charge coverage ratio of no less than 275% and a leverage ratio of no more than 300%. We were in compliance with all debt covenants as of June 30, 2010, due to our low leverage and strong operating performance, and we have additional liquidity under our debt covenants.

We have a \$420.0 million syndicated revolving credit facility with Bank of America, N.A. The credit facility contains certain customary financial and other covenants that, among other things, impose certain restrictions on indebtedness, liens, investments, and capital expenditures. These covenants also place restrictions on mergers, asset sales, sale and leaseback transactions, payments between us and our subsidiaries, and certain transactions with affiliates. The financial covenants require that, at the end of any fiscal quarter, we have a consolidated interest coverage ratio of at least 3.0 to 1.0 and that during any period of four fiscal quarters we maintain a consolidated funded debt leverage ratio of below 3.0 to 1.0. We were in compliance with all debt covenants as of June 30, 2010, due to our low leverage and strong operating performance, and we have additional liquidity under our debt covenants.

Cash Flow

The following table summarizes our cash flow data:

	For the Six Months Ended June	
	30,	
	2010	2009
	(In thousands)	
Net cash provided by operating activities	\$ 173,034	\$ 184,529
Net cash used in investing activities	\$ (22,924)	\$ (152,683)
Net cash used in financing activities	\$ (114,617)	\$ (19,157)

Operating Activities

Net cash provided by operating activities decreased to \$173.0 million for the six months ended June 30, 2010 from \$184.5 million for the six months ended June 30, 2009. The decrease in net cash provided by operating activities was principally due to an increase in salary and employee related payments of approximately \$11.0 million due to an additional pay-cycle that occurred in June 2010. In the prior year, this additional pay-cycle occurred in July 2009. Our payroll is processed on a bi-weekly basis thereby requiring an additional pay-cycle in certain periods. The increased pension contributions as well as the timing of certain items such as the accelerated collection of our first quarter customer invoices in the fourth quarter of 2009, the additional pay-cycle, and the timing of certain annual bonus payments mitigated the growth in our operating cash flow during the first-half of 2010.

Investing Activities

Net cash used in investing activities was \$22.9 million for the six months ended June 30, 2010 compared to \$152.7 million for the six months ended June 30, 2009. The decrease in net cash used in investing activities was principally due to a decrease in acquisition and earnout related payments of \$129.0 million.

Financing Activities

Net cash used in financing activities was \$114.6 million for the six months ended June 30, 2010 and \$19.2 million for the six months ended June 30, 2009. The increase in net cash used in financing activities is principally due to an

increase in net debt repayments of \$81.4 million, and increased stock repurchases and redemptions of \$39.1 million, partially offset by increases in proceeds from stock options exercised of \$15.6 million and excess tax benefits from exercised stock options of \$9.4 million.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Table of Contents

Contractual Obligations

There have been no material changes to our contractual obligations outside the ordinary course of our business from those reported in our annual report on Form 10-K and filed with the Securities and Exchange Commission on March 9, 2010.

Critical Accounting Estimates

Our management's discussion and analysis of financial condition and results of operations are based on our condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements require management to make estimates and judgments that affect reported amounts of assets and liabilities and related disclosures of contingent assets and liabilities at the dates of the financial statements and revenue and expenses during the reporting periods. These estimates are based on historical experience and on other assumptions that are believed to be reasonable under the circumstances. On an ongoing basis, management evaluates its estimates, including those related to revenue recognition, goodwill and intangible assets, pension and other post retirement benefits, stock-based compensation, and income taxes. Actual results may differ from these assumptions or conditions. Some of the judgments that management makes in applying its accounting estimates in these areas are discussed under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our annual report on Form 10-K dated and filed with the Securities and Exchange Commission on March 9, 2010. Since the date of our annual report on Form 10-K, there have been no material changes to our critical accounting estimates except as noted below.

As a result of the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010, the tax treatment of federal subsidies paid to sponsors of retiree health benefit plans that provide prescription drug benefits that are at least actuarially equivalent to the corresponding benefits provided under Medicare Part D was effectively changed. This legislative change reduces future tax benefits of the coverage we provided to participants in the Postretirement Plan. We are required to account for this change in the period during which the law is enacted. As a result, we recorded a non-cash tax charge to the provision for income taxes of \$2.4 million for the six months ended June 30, 2010.

Item 3. Qualitative and Quantitative Disclosures About Market Risk

Market risks at June 30, 2010 have not materially changed from those discussed under Item 7A in our annual report on Form 10-K dated and filed with the Securities and Exchange Commission on March 9, 2010.

Item 4. Controls and Procedures

We will be required to comply with Section 404 of the Sarbanes-Oxley Act of 2002 when we file our annual report on Form 10-K for the year ending December 31, 2010.

Disclosure Controls and Procedures

We are required to maintain disclosure controls and procedures (as that term is defined in Rules 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) that are designed to ensure that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Our management, with the participation of the Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this quarterly report on Form 10-Q. Based upon the foregoing assessments, our Chief Executive Officer and Chief Financial Officer have concluded that, as of June 30, 2010, our disclosure controls and procedures were effective.

Changes in Internal Control over Financial Reporting

During the six month period ending June 30, 2010, there has been no change in our internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****Item 1. Legal Proceedings**

We are party to legal proceedings with respect to a variety of matters in the ordinary course of business, including those matters described below. We are unable, at the present time, to determine the ultimate resolution of or provide a reasonable estimate of the range of possible loss attributable to these matters or the impact they may have on our results of operations, financial position or cash flows. This is primarily because many of these cases remain in their early stages and only limited discovery has taken place. Although we believe we have strong defenses for the litigation proceedings described below, we could in the future incur judgments or enter into settlements of claims that could have a material adverse effect on our results of operations, financial position or cash flows.

See Note 15 to our condensed consolidated financial statements for the six months ended June 30, 2010 for a description of our significant current legal proceedings, which is incorporated by reference herein.

Item 1A. Risk Factors

There has been no material change in the information provided under the heading **Risk Factors** in our annual report on Form 10-K dated and filed with the Securities and Exchange Commission on March 9, 2010.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**Recent Sales of Unregistered Securities**

There were no unregistered sales of equity securities by the Company during the period covered by this report.

Issuer Purchases of Equity Securities (1)

Period	Total Number of Shares Purchased	Average Price Paid per Share (3)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (in thousands)
April 29, 2010 through April 30, 2010		\$		\$ 150,000
May 1, 2010 through May 31, 2010 (2)	1,487,743	\$ 29.60	984,700	\$ 120,854
June 1, 2010 through June 30, 2010	1,188,406	\$ 30.09	1,188,406	\$ 85,099
	2,676,149	\$ 29.87	2,173,106	\$ 85,099

- (1) On April 29, 2010, the Company's board of directors authorized a \$150.0 million share repurchase program of the Company's

Class A common stock. Under this repurchase program, the Company may repurchase stock in the open market or as otherwise determined by the Company. This authorization has no expiration date and may be suspended or terminated at any time.

- (2) In May 2010, certain employees exercised stock options and covered the statutory minimum tax withholdings of \$15,051 through a net settlement of 503,043 shares, based on and consistent with the closing stock price on the exercise dates. See Note 11 of our condensed consolidated financial statements included in this quarterly report on Form 10-Q.
