CIENA CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

(1) INTERIM FINANCIAL STATEMENTS

The interim financial statements included herein for Ciena Corporation (Ciena) have been prepared by Ciena, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. In the opinion of management, financial statements included in this report reflect all normal recurring adjustments that Ciena considers necessary for the fair statement of the results of operations for the interim periods covered and of the financial position of Ciena at the date of the interim balance sheet. Certain information and footnote disclosures normally included in the annual financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. However, Ciena believes that the disclosures are adequate to understand the information presented. The operating results for interim periods are not necessarily indicative of the operating results for the entire year. These financial statements should be read in conjunction with Ciena's audited consolidated financial statements and notes thereto included in Ciena's annual report on Form 10-K for the fiscal year ended October 31, 2007.

Ciena has a 52 or 53 week fiscal year, which ends on the Saturday nearest to the last day of October in each year. For purposes of financial statement presentation, each fiscal year is described as having ended on October 31, and each fiscal quarter is described as having ended on January 31, April 30 and July 31 of each fiscal year.

(2) SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates

The preparation of the financial statements and related disclosures in conformity with accounting principles generally accepted in the United States requires management to make estimates and judgments that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Estimates are used for bad debts, valuation of inventories and investments, recoverability of intangible assets and goodwill, income taxes, warranty obligations, restructuring liabilities and contingencies and litigation. Ciena bases its estimates on historical experience and assumptions that it believes are reasonable. Actual results may differ materially from management's estimates.

Cash and Cash Equivalents

Ciena considers all highly liquid investments purchased with original maturities of three months or less to be cash equivalents. Restricted cash collateralizing letters of credits are included in other current assets and other long-term assets depending upon the duration of the restriction.

Investments

Ciena's investments represent investments in marketable debt securities that are classified as available-for-sale and are reported at fair value, with unrealized gains and losses recorded in accumulated other comprehensive income. Realized gains or losses and declines in value on available-for-sale securities determined to be other-than-temporary are reported in other income or expense as incurred.

Inventories

Inventories are stated at the lower of cost or market, with cost computed using standard cost, which approximates actual cost on a first-in, first-out basis. Ciena records a provision for excess and obsolete inventory when an impairment has been identified.

Equipment, Furniture and Fixtures

Equipment, furniture and fixtures are recorded at cost. Depreciation and amortization are computed using the straight-line method over useful lives of two years to five years for equipment, furniture and fixtures and the shorter of useful life or lease term for leasehold improvements. Impairments of equipment, furniture and fixtures are determined in accordance with Statement of Financial Accounting Standards (SFAS) No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets.

Internal use software and web site development costs are capitalized in accordance with Statement of Position (SOP) No. 98-1, Accounting for the Costs of Computer Software Developed or Obtained for Internal Use, and Emerging Issues Task Force (EITF) Issue No. 00-2, Accounting for Web Site Development Costs. Qualifying costs incurred during the application development stage, which consist primarily of outside services and purchased software license costs, are capitalized and amortized straight-line over the estimated useful life of the asset.

Goodwill and Other Intangible Assets

Ciena has recorded goodwill and purchased intangible assets as a result of several acquisitions. Ciena accounts for goodwill in accordance with SFAS 142 Goodwill and Other Intangible Assets, which requires Ciena to test each reporting unit's goodwill for impairment on an annual basis, which Ciena has determined to be the last business day of fiscal September each year. Ciena operates its business and tests its goodwill for impairment as a single reporting unit. Testing is required between annual tests if events occur or circumstances change that would, more likely than not, reduce the fair value of the reporting unit below its carrying value.

Purchased intangible assets are carried at cost less accumulated amortization. Amortization is computed using the straight-line method over the economic lives of the respective assets, generally three to seven years. Impairments of other intangibles assets are determined in accordance SFAS 144.

Minority Equity Investments

Ciena has certain minority equity investments in privately held technology companies that are classified as other assets. These investments are carried at cost because Ciena owns less than 20% of the voting equity and does not have the ability to exercise significant influence over these companies. These are inherently high risk investments as the markets for technologies or products manufactured by these companies are usually early stage at the time of investment and such markets may never be significant. Ciena could lose its entire investment in some or all of these companies. Ciena monitors these investments for impairment and makes appropriate reductions in carrying values when necessary.

Concentrations

Substantially all of Ciena's cash and cash equivalents and short-term and long-term investments in marketable debt securities are maintained at two major U.S. financial institutions. The majority of Ciena's cash equivalents consist of money market funds and overnight repurchase agreements. Deposits held with banks may exceed the amount of insurance provided on such deposits. Generally, these deposits may be redeemed upon demand and, therefore, management believes that they bear minimal risk.

Historically, a large percentage of Ciena's revenue has been the result of sales to a small number of communications service providers. Consolidation among Ciena's customers has increased this concentration. Consequently, Ciena's accounts receivable are concentrated among these customers. See Notes 5 and 16 below.

Additionally, Ciena's access to certain raw materials is dependent upon sole or limited source suppliers. The inability of any supplier to fulfill Ciena's supply requirements could affect future results. Ciena relies on a small number of contract manufacturers to perform the majority of the manufacturing for its products. If Ciena cannot effectively manage these manufacturers and forecast future demand, or if they fail to deliver products or components on time, Ciena's business may suffer.

Revenue Recognition

Ciena recognizes revenue in accordance with Staff Accounting Bulletin (SAB) No. 104, Revenue Recognition, which states that revenue is realized or realizable and earned when all of the following criteria are met: persuasive evidence of an arrangement exists; delivery has occurred or services have been rendered; the price to the buyer is fixed or determinable; and collectibility is reasonably assured. Customer purchase agreements and customer purchase orders are generally used to determine the existence of an arrangement. Shipping documents and evidence of customer acceptance, when applicable, are used to verify delivery. Ciena assesses whether the price is fixed or determinable based on the payment terms associated with the transaction and whether the sales price is subject to refund or adjustment. Ciena assesses collectibility based primarily on the creditworthiness of the customer as determined by credit checks and analysis, as well as the customer's payment history. In instances where final acceptance of the product, system, or solution is specified by the customer, revenue is deferred until all acceptance criteria have been met. Revenue for maintenance services is generally deferred and recognized ratably over the period during which the

services are to be performed.

Some of Ciena's communications networking equipment is integrated with software that is essential to the functionality of the equipment. Accordingly, Ciena accounts for revenue in accordance with Statement of Position No. 97-2, Software Revenue Recognition, (SOP 97-2) and all related interpretations. SOP 97-2 incorporates additional guidance unique to software arrangements incorporated with general revenue recognition criteria, such as, revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collectibility is probable. In instances where final acceptance of the product is specified by the customer, revenue is deferred until all acceptance criteria have been met.

Arrangements with customers may include multiple deliverables, including any combination of equipment, services and software. If multiple element arrangements include software or software-related elements, Ciena applies the provisions of SOP 97-2 to determine the amount of the arrangement fee to be allocated to those separate units of accounting. Multiple element arrangements that include software are separated into more than one unit of accounting if the functionality of the delivered element(s) is not dependent on the undelivered element(s), there is vendor-specific objective evidence of the fair value of the undelivered element(s), and general revenue recognition criteria related to the delivered element(s) have been met. The amount of product and services revenue recognized is affected by Ciena's judgments as to whether an arrangement includes multiple elements and, if so, whether vendor-specific objective evidence of fair value exists. Changes to the elements in an arrangement and Ciena's ability to establish vendor-specific objective evidence for those elements could affect the timing of revenue recognition. For all other deliverables, Ciena applies the provisions of Emerging Issues Task Force (EITF) No. 00-21, Revenue Arrangements with Multiple Deliverables. EITF 00-21 allows for separation of elements into more than one unit of accounting if the delivered element(s) have value to the customer on a stand-alone basis, objective and reliable evidence of fair value exists for the undelivered element(s), and delivery of the undelivered element(s) is probable and substantially in Ciena's control. Revenue is allocated to each unit of accounting based on the relative fair value of each accounting unit or using the residual method if objective evidence of fair value does not exist for the delivered element(s). The revenue recognition criteria described above is applied to each separate unit of accounting. If these criteria are not met, revenue is deferred until the criteria are met or the last element has been delivered.

Warranty Accruals

Ciena provides for the estimated costs to fulfill customer warranty obligations upon the recognition of the related revenue. Estimated warranty costs include material costs, technical support labor costs and associated overhead. The warranty liability is included in costs of goods sold and determined based upon actual warranty cost experience, estimates of component failure rates and management's industry experience. Ciena's sales contracts do not permit the right of return of product by the customer after the product has been accepted.

Accounts Receivable Trade, Net

Ciena's allowance for doubtful accounts receivable is based on its assessment, on a specific identification basis, of the collectibility of customer accounts. Ciena performs ongoing credit evaluations of its customers and generally has not required collateral or other forms of security from its customers. In determining the appropriate balance for Ciena's allowance for doubtful accounts receivable, management considers each individual customer account receivable in order to determine collectibility. In doing so, management considers creditworthiness, payment history, account activity and communication with such customer. If a customer's financial condition changes, Ciena may be required to take a charge for an allowance for doubtful accounts receivable.

Research and Development

Ciena charges all research and development costs to expense as incurred. Types of expense incurred in research and development include employee compensation, prototype, consulting, depreciation, facility costs and information technologies.

Advertising Costs

Ciena expenses all advertising costs as incurred.

Legal Costs

Ciena expenses legal costs associated with litigation defense as incurred.

Share-Based Compensation Expense

Ciena accounts for share-based compensation expense in accordance with SFAS 123(R), as interpreted by SAB 107. SFAS 123(R) requires the measurement and recognition of compensation expense for share-based awards based on estimated fair values on the date of grant. Ciena estimates the fair value of each option-based award on the date of grant using the Black-Scholes option-pricing model. This model is affected by Ciena's stock price as well as estimates regarding a number of variables including expected stock price volatility over the term of the award and projected employee stock option exercise behaviors. Ciena estimates the fair value of each share-based award on the fair value of the underlying common stock on the date of grant. In each case, Ciena only recognizes expense to its consolidated statement of operations for those options or shares that are expected ultimately to vest. Ciena uses two attribution methods to record expense, the straight-line method for grants with only service-based vesting or the graded-vesting method, which considers each performance period or tranche separately, for all other awards.

No tax benefits were attributed to the share-based compensation expense because a full valuation allowance was maintained for all net deferred tax assets.

Income Taxes

Ciena adopted the provisions of FASB Interpretation (FIN) No. 48, Accounting for Uncertainty in Income Taxes, an interpretation of Statement of Financial Accounting Standards No. 109, Accounting for Income Taxes, after the end of its fiscal 2007. The adoption of FIN 48 results in recognition of a cumulative effect adjustment accounted for as an increase of \$0.1 million to retained earnings, a decrease of \$0.1 million to income taxes payable and the reclassification of \$6.0 million from current income taxes payable to other long-term liabilities as of November 4, 2007. The total amount of unrecognized tax benefits as of the beginning of fiscal 2008 was \$6.0 million, which includes \$1.0 million of interest and some minor penalties. All of the unrecognized tax benefits, if recognized, would decrease the effective income tax rate. During the three months ended January 31, 2008, there has been no significant change in the unrecognized tax benefits. Ciena has reviewed its uncertain income tax positions in accordance with FIN 48, and currently estimates no material changes in the unrecognized income tax benefits in the next twelve months.

Ciena historically classified interest and penalties related to unrecognized income tax benefits as a component of income tax expense. With the adoption of FIN 48, Ciena is maintaining its historical method of accruing interest and penalties associated with unrecognized tax benefits as a component of tax expense.

In the ordinary course of business, transactions occur for which the ultimate outcome may be uncertain. In addition, respective tax authorities periodically audit Ciena's income tax returns. These audits examine significant tax filing positions, including the timing and amounts of deductions and the allocation of income tax expenses among tax jurisdictions. Ciena's major tax jurisdictions include the United States and the United Kingdom, with open tax years beginning with fiscal year 2004 and 2002 respectively.

Loss Contingencies

Ciena is subject to the possibility of various losses arising in the ordinary course of business. These may relate to disputes, litigation and other legal actions. Ciena considers the likelihood of loss or the incurrence of a liability, as well as Ciena's ability to reasonably estimate the amount of loss, in determining loss contingencies. An estimated loss contingency is accrued when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. Ciena regularly evaluates current information available to it to determine whether any accruals should be adjusted and whether new accruals are required.

Fair Value of Financial Instruments

The carrying amounts of Ciena's financial instruments, which include short-term and long-term investments in marketable debt securities, accounts receivable, accounts payable, and other accrued expenses, approximate their fair values due to their short maturities.

Foreign Currency Translation

Some of Ciena's foreign branch offices and subsidiaries use the U.S. dollar as their functional currency, because Ciena, as the U.S. parent entity, exclusively funds the operations of these branch offices and subsidiaries with U.S. dollars. For those subsidiaries using the local currency as their functional currency, assets and liabilities are translated at exchange rates in effect at the balance sheet date, and the statement of operations is translated at a monthly average

rate. Resulting translation adjustments are recorded directly to a separate component of stockholders' equity. Where the U.S. dollar is the functional currency, re-measurement adjustments are recorded in other income. The net gain (loss) on foreign currency re-measurement and exchange rate changes is immaterial for separate financial statement presentation.

Computation of Basic Net Income per Common Share and Diluted Net Income per Dilutive Potential Common Share

Ciena calculates earnings per share (EPS) in accordance with the SFAS 128, Earnings per Share. This statement requires dual presentation of basic and diluted EPS on the face of the income statement for entities with a complex capital structure and requires a reconciliation of the numerator and denominator used for the basic and diluted EPS computations.

Software Development Costs

SFAS 86, Accounting for the Costs of Computer Software to be Sold, Leased or Otherwise Marketed, requires the capitalization of certain software development costs incurred subsequent to the date technological feasibility is established and prior to the date the product is generally available for sale. The capitalized cost is then amortized straight-line over the estimated product life. Ciena defines technological feasibility as being attained at the time a working model is completed. To date, the period between achieving technological feasibility and the general availability of such software has been short, and software development costs qualifying for capitalization have been insignificant. Accordingly, Ciena has not capitalized any software development costs.

Segment Reporting

SFAS 131, Disclosures about Segments of an Enterprise and Related Information, establishes annual and interim reporting standards for operating segments and requires certain disclosures about the products and services an entity provides, the material countries in which it holds assets and reports revenue, and its major customers. Ciena reports its financial results as a single business segment.

Newly Issued Accounting Standards

In September 2006, the FASB issued SFAS 157, Fair Value Measurements. SFAS 157 defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 is effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Ciena is currently evaluating the impact the adoption of this statement could have on its financial condition, results of operations and cash flows.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115. SFAS No. 159 permits an entity to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. Entities that elect the fair value option will report unrealized gains and losses in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. Ciena is currently evaluating the impact the adoption of this statement could have on its financial condition, results of operations and cash flows.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51. SFAS No. 160 requires all entities to report noncontrolling (minority) interests in subsidiaries as equity in the consolidated financial statements. This Statement is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Earlier adoption is prohibited. Ciena is currently evaluating the impact the adoption of this statement could have on its financial condition, results of operations and cash flows.

In December 2007, the FASB issued SFAS No. 141(R), a revised version of SFAS No. 141, Business Combinations. The revision is intended to simplify existing guidance and converge rulemaking under U.S. generally accepted accounting principles (GAAP) with international accounting rules. This statement applies prospectively to business combinations where the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. An entity may not apply it before that date. Ciena is currently evaluating the impact the adoption of this statement could have on its financial condition, results of operations and cash flows, its effects will depend on the nature and significance of any acquisitions subject to this statement.

In June 2007, the FASB ratified EITF 07-3, Accounting for Nonrefundable Advance Payments for Goods or Services Received for Use in Future Research and Development Activities. EITF 07-3 requires nonrefundable advance payments for goods or services that will be used or rendered for future research and development activities to be deferred and capitalized.

Such amounts should be recognized as an expense as the related goods are delivered or the related services are performed. If an entity does not expect the goods to be delivered or services to be rendered, the capitalized advance payment should be charged to expense. EITF 07-3 is effective for fiscal years beginning after December 15, 2007, and interim periods within those fiscal years. Earlier application is not permitted. Ciena is currently evaluating the impact the adoption of this statement could have on its financial condition, results of operations and cash flows.

(3) RESTRUCTURING COSTS

Ciena has previously taken actions to align its workforce, facilities and operating costs with perceived market and business opportunities. Ciena historically has committed to a restructuring plan and has incurred the associated liability concurrently in accordance with the provisions of SFAS 146, Accounting for Costs Associated with Exit or Disposal Activities. The following table sets forth the activity and balances of the restructuring liability accounts for the three months ending January 31, 2008 (in thousands):

	Consolidation of excess facilities
Balance at October 31, 2007	\$ 4,688
Additional liability recorded	\$
Adjustment to previous estimates	\$
Cash payments.	\$ (209)
Balance at January 31, 2008	\$ 4,479
Current restructuring liabilities	\$ 914
Non-current restructuring liabilities	\$ 3,565

The following table sets forth the activity and balances of the restructuring liability accounts for the three months ending January 31, 2007 (in thousands):

	Workforce reduction	Consolidation of excess facilities	Total
Balance at October 31, 2006	\$	\$ 35,634	\$ 35,634
Additional liability recorded	71(a)		71
Adjustment to previous estimates		(537)(b)	(537)
Cash payments	(71)	(2,897)	(2,968)
Balance at January 31, 2007	\$	\$ 32,200	\$ 32,200
Current restructuring liabilities	\$	\$ 7,621	\$ 7,621
Non-current restructuring liabilities	\$	\$ 24,579	\$ 24,579

(a) During the first quarter of fiscal 2007, Ciena recorded a charge of

\$0.1 million
related to other
costs associated
with a previous
workforce
reduction.

- (b) During the first
quarter of fiscal
2007, Ciena
recorded an
adjustment of
\$0.5 million
related to costs
associated with
previously
restructured
facilities.

(4) MARKETABLE DEBT SECURITIES

As of the dates indicated, short-term and long-term investments in marketable debt securities are comprised of the following (in thousands):

	Amortized Cost	January 31, 2008		Estimated Fair Value
		Gross Unrealized	Gross Unrealized	
		Gains	Losses	
Corporate bonds	\$ 151,982	\$ 490	\$	\$ 152,472
Asset backed obligations	93,855	335	26	94,164
Commercial paper	33,946			33,946
US government obligations	12,918	89		13,007
	\$ 292,701	\$ 914	\$ 26	\$ 293,589
Included in short-term investments	258,755	914	26	259,643
Included in long-term investments	33,946			33,946
	\$ 292,701	\$ 914	\$ 26	\$ 293,589

	Amortized Cost	October 31, 2007		Estimated Fair Value
		Gross Unrealized	Gross Unrealized	
		Gains	Losses	
Corporate bonds	\$ 258,904	\$ 252	\$ 42	\$ 259,114
Asset backed obligations	121,274	136	44	121,366
Commercial paper	198,407			198,407
US government obligations	31,186	55		31,241
Certificate of deposits	246,003			246,003
	\$ 855,774	\$ 443	\$ 86	\$ 856,131
Included in short-term investments	821,828	443	86	822,185
Included in long-term investments	33,946			33,946
	\$ 855,774	\$ 443	\$ 86	\$ 856,131

Estimated fair value of commercial paper at October 31, 2007 and January 31, 2008 includes investments in SIV Portfolio plc (formerly known as Cheyne Finance plc) and Rhinebridge LLC, two structured investment vehicles (SIVs) that entered into receivership during the fourth quarter of fiscal 2007 and failed to make payment at maturity. Due to the mortgage-related assets that they hold, each of these entities has been exposed to adverse market conditions that have affected their collateral and their ability to access short-term funding. Based on Ciena's assessment of fair value, as of October 31, 2007, Ciena recognized realized losses of \$13.0 million related to these investments during the fourth quarter of fiscal 2007. Giving effect to these losses, Ciena's investment portfolio at October 31, 2007 included an estimated fair value of \$33.9 million in commercial paper issued by these entities. There were no changes relating to these investments or other events during the first quarter of 2008 that resulted in a change in the fair value of these investments at January 31, 2008. Information and the markets relating to these investments remain dynamic, and there may be further declines in the value of these investments, the value of the collateral held by these entities and the liquidity of these investments. To the extent Ciena determines that a further decline in fair value is

other-than-temporary, Ciena may recognize additional realized losses in future periods up to the aggregate amount of these investments.

Gross unrealized losses related to marketable debt investments were primarily due to changes in interest rates. Ciena's management has determined that the gross unrealized losses at January 31, 2008 are temporary in nature because Ciena has the ability and intent to hold these investments until a recovery of fair value, which may be maturity. As of the dates indicated, gross unrealized losses were as follows (in thousands):

12

	January 31, 2008					
	Unrealized Losses		Unrealized Losses 12		Total	
	Less Than 12 Months		Months or Greater			
	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value
Corporate bonds	\$	\$ 3,000	\$	\$	\$	\$ 3,000
Asset backed obligations			26	9,743	26	9,743
	\$	\$ 3,000	\$ 26	\$ 9,743	\$ 26	\$ 12,743

	October 31, 2007					
	Unrealized Losses Less Than 12 Months		Unrealized Losses 12 Months or Greater		Total	
	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value
Corporate bonds	\$ 41	\$ 50,152	\$ 1	\$ 2,999	\$ 42	\$ 53,151
Asset backed obligations	7	6,140	37	22,923	44	29,063
	\$ 48	\$ 56,292	\$ 38	\$ 25,922	\$ 86	\$ 82,214

The following table summarizes final legal maturities of debt investments at January 31, 2008 (in thousands):

	Amortized Cost	Estimated Fair Value
Less than one year	\$ 166,614	\$ 167,191
Due in 1-2 years	90,631	90,824
Due in 2-5 years	35,456	35,574
	\$ 292,701	\$ 293,589

(5) ACCOUNTS RECEIVABLE

As of January 31, 2008, net trade accounts receivable included four customers that accounted for 11.4%, 16.0%, 17.1% and 22.5%, respectively. As of October 31, 2007, one customer accounted for 40.1% of net trade accounts receivable.

Ciena's allowance for doubtful accounts as of October 31, 2007 and January 31, 2008 was \$0.1 million and \$0.2 million, respectively.

(6) INVENTORIES

As of the dates indicated, inventories are comprised of the following (in thousands):

	October 31, 2007	January 31, 2008
Raw materials	\$ 28,611	\$ 27,858
Work-in-process	4,123	4,504

Finished goods	96,054	100,781
	128,788	133,143
Provision for excess and obsolescence	(26,170)	(29,623)
	\$ 102,618	\$ 103,520

Ciena writes down its inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based on assumptions about future demand and market conditions. During the first three months of fiscal 2008, Ciena recorded a provision for excess and obsolete inventory of \$5.8 million, primarily related to changes in forecasted sales for certain products. Deductions from the provision for excess and obsolete inventory generally relate to disposal activities.

The following table summarizes the activity in Ciena's reserve for excess and obsolete inventory for the period indicated (in thousands):

	Inventory Reserve
Reserve balance as of October 31, 2007	\$ 26,170
Provision for excess inventory, net	5,794
Actual inventory scrapped	(2,341)
Reserve balance as of January 31, 2008	\$ 29,623

Ciena writes down its inventory for estimated obsolescence or unmarketable inventory by the difference between the cost of inventory and the estimated market value based on assumptions about future demand and market conditions. During the first three months of fiscal 2007, Ciena recorded a provision for excess and obsolete inventory of \$4.8 million, primarily related to changes in forecasted sales for certain products. Deductions from the provision for excess and obsolete inventory generally relate to disposal activities.

The following table summarizes the activity in Ciena's reserve for excess and obsolete inventory for the period indicated (in thousands):

	Inventory Reserve
Reserve balance as of October 31, 2006	\$ 22,326
Provision for excess inventory, net	4,763
Actual inventory scrapped	(3,870)
Reserve balance as of January 31, 2007	\$ 23,219

(7) PREPAID EXPENSES AND OTHER

As of the dates indicated, prepaid expenses and other are comprised of the following (in thousands):

	October 31, 2007	January 31, 2008
Interest receivable	\$ 4,981	\$ 2,396
Prepaid VAT and other taxes	18,092	17,072
Deferred deployment expense	6,237	4,472
Prepaid expenses	10,724	9,727
Restricted cash	3,994	4,177
Other non-trade receivables	3,789	2,722
	\$ 47,817	\$ 40,566

(8) EQUIPMENT, FURNITURE AND FIXTURES

As of the dates indicated, equipment, furniture and fixtures are comprised of the following (in thousands):

	October 31, 2007	January 31, 2008
Equipment, furniture and fixtures	\$ 269,534	\$ 276,366
Leasehold improvements	37,249	39,085

	306,783	315,451
Accumulated depreciation and amortization	(260,112)	(266,573)
	\$ 46,671	\$ 48,878

(9) OTHER INTANGIBLE ASSETS

As of the dates indicated, other intangible assets are comprised of the following (in thousands):

14

		October 31, 2007			January 31, 2008	
	Gross Intangible	Accumulated Amortization	Net Intangible	Gross Intangible	Accumulated Amortization	Net Intangible
Developed technology	\$ 145,073	\$ (104,822)	\$ 40,251	\$ 145,073	\$ (109,817)	\$ 35,256
Patents and licenses	47,370	(31,708)	15,662	47,370	(33,269)	14,101
Customer relationships, covenants not to compete, outstanding purchase orders and contracts	45,981	(34,750)	11,231	45,981	(36,103)	9,878
	\$ 238,424		\$ 67,144	\$ 238,424		\$ 59,235

The aggregate amortization expense of other intangible assets was \$7.3 million and \$7.4 million for the first three months of fiscal 2007 and 2008, respectively. For the first three months of fiscal 2008, developed technology assets include a \$0.5 million decrease related to the recognition of deferred tax assets from prior acquisitions. Expected future amortization of other intangible assets for the fiscal years indicated is as follows (in thousands):

	Period ended October 31,
2008 (remaining nine months)	\$ 20,949
2009	20,272
2010	15,518
2011	1,648
2012	848
	\$ 59,235

(10) OTHER BALANCE SHEET DETAILS

As of the dates indicated, other long-term assets are comprised of the following (in thousands):

	October 31, 2007	January 31, 2008
Maintenance spares inventory, net	\$ 20,816	\$ 22,679
Deferred debt issuance costs	18,059	16,889
Investments in privately held companies	6,671	6,671
Restricted cash	19,499	19,579
Other	2,693	2,850
	\$ 67,738	\$ 68,668

Deferred debt issuance costs are amortized using the straight line method which approximates the effect of the effective interest rate method on the maturity of the related debt. Amortization of debt issuance cost, which is included in interest expense, was \$0.9 million and \$1.2 million during the first three months of fiscal 2007 and fiscal 2008, respectively.

As of the dates indicated, accrued liabilities are comprised of the following (in thousands):

October 31,	January 31,
-------------	-------------

Edgar Filing: CIENA CORP - Form 10-Q

	2007	2008
Warranty	\$ 33,580	\$ 33,862
Accrued compensation, payroll related tax and benefits	32,053	28,974
Accrued interest payable	6,998	782
Other	18,291	17,928
	\$ 90,922	\$ 81,546

The following table summarizes the activity in Ciena's accrued warranty for the fiscal years indicated (in thousands):

	Three months ended	Beginning			Balance at
	January 31,	Balance	Provisions	Settlements	end of
					period
2007		\$31,751	4,791	(2,935)	\$33,607
2008		\$33,580	2,914	(2,632)	\$33,862
		15			

As of the dates indicated, deferred revenue is comprised of the following (in thousands):

	October 31, 2007	January 31, 2008
Products	\$ 13,208	\$ 12,105
Services	50,432	50,159
	63,640	62,264
Less current portion	(33,025)	(31,452)
Long-term deferred revenue	\$ 30,615	\$ 30,812

(11) CONVERTIBLE NOTES PAYABLE

Ciena 3.75% Convertible Notes, due February 1, 2008

During the first quarter of fiscal 2008, Ciena paid at maturity the remaining \$542.3 million in aggregate principal amount on its 3.75% convertible notes, and all of the notes were retired. No notes were converted into common stock.

0.25% Convertible Senior Notes due May 1, 2013

On April 10, 2006, Ciena completed a public offering of 0.25% Convertible Senior Notes due May 1, 2013, in aggregate principal amount of \$300.0 million. Interest is payable on May 1 and November 1 of each year. The notes are senior unsecured obligations of Ciena and rank equally with all of Ciena's other existing and future senior unsecured debt.

At the election of the holder, notes may be converted prior to maturity into shares of Ciena common stock at the initial conversion rate of 25.3001 shares per \$1,000 in principal amount, which is equivalent to an initial conversion price of \$39.5255 per share. The notes may not be redeemed by Ciena prior to May 5, 2009. At any time on or after May 5, 2009, if the closing sale price of Ciena's common stock for at least 20 trading days in any 30 consecutive trading day period ending on the date one day prior to the date of the notice of redemption exceeds 130% of the conversion price, Ciena may redeem the notes in whole or in part, at a redemption price in cash equal to the principal amount to be redeemed, plus accrued and unpaid interest.

If Ciena undergoes a fundamental change (as that term is defined in the indenture governing the notes to include certain change in control transactions), holders of notes will have the right, subject to certain exemptions, to require Ciena to purchase for cash any or all of their notes at a price equal to the principal amount, plus accrued and unpaid interest. If the holder elects to convert his or her notes in connection with a specified fundamental change, in certain circumstances, Ciena will be required to increase the applicable conversion rate, depending on the price paid per share for Ciena common stock and the effective date of the fundamental change transaction.

Ciena used approximately \$28.5 million of the net proceeds of this offering to purchase a call spread option on its common stock that is intended to limit exposure to potential dilution from the conversion of the notes. See Note 13 below for a description of this call spread option.

The fair value of the outstanding \$300.0 million in aggregate principal amount of 0.25% convertible senior notes was \$268.5 million, based on the quoted market price for the notes on the last trading day of Ciena's first quarter of fiscal 2008.

0.875% Convertible Senior Notes due Jun 15, 2017

On June 11, 2007, Ciena completed a public offering of 0.875% Convertible Senior Notes due June 15, 2017, in aggregate principal amount of \$500.0 million. Interest is payable on June 15 and December 15 of each year. The notes are senior unsecured obligations of Ciena and rank equally with all of Ciena's other existing and future senior unsecured debt.

At the election of the holder, notes may be converted prior to maturity into shares of Ciena common stock at the initial conversion rate of 26.2154 shares per \$1,000 in principal amount, which is equivalent to an initial conversion price of approximately \$38.15 per share. The notes are not redeemable by Ciena prior to maturity.

If Ciena undergoes a fundamental change (as that term is defined in the indenture governing the notes to include certain change in control transactions), holders of notes will have the right, subject to certain exemptions, to require Ciena to purchase for cash any or all of their notes at a price equal to the principal amount, plus accrued and unpaid interest. If the holder elects to convert his or her notes in connection with a specified fundamental change, in certain circumstances, Ciena will be required to increase the applicable conversion rate, depending on the price paid per share for Ciena common stock and the effective date of the fundamental change transaction.

Ciena used approximately \$42.5 million of the net proceeds of this offering to purchase a call spread option on its common stock that is intended to limit exposure to potential dilution from conversion of the notes. See Note 13 below for a description of this call spread option.

The fair value of the outstanding \$500.0 million in aggregate principal amount of 0.875% convertible senior notes was \$439.2 million, based on the quoted market price for the notes on the last trading day of Ciena's first quarter of fiscal 2008.

(12) INCOME PER SHARE CALCULATION

The following table (in thousands except per share amounts) is a reconciliation of the numerator and denominator of the basic net income per common share (Basic EPS) and the diluted net income per dilutive potential common share (Diluted EPS). Basic EPS is computed using the weighted average number of common shares outstanding. Diluted EPS is computed using the weighted average number of (i) common shares outstanding, (ii) shares issuable upon vesting of restricted stock units, (iii) shares issuable upon exercise of outstanding stock options, employee stock purchase plan options and warrants using the treasury stock method; and (iv) shares underlying the 0.25% and 0.875% convertible senior notes.

	Quarter Ended January 31,	
	2007	2008
Numerator		
Net income	\$ 11,056	\$ 28,807
Add: Interest expense for 0.25% convertible senior notes	469	471
Add: Interest expense for 0.875% convertible senior notes		1,348
Net income used to calculate Diluted EPS	\$ 11,525	\$ 30,626
	Quarter Ended January 31,	
	2007	2008
Denominator		
Basic weighted average shares outstanding	84,953	86,910
Add: Shares underlying outstanding stock options, employees stock purchase plan options, warrants and restricted stock units	716	1,401
Add: Shares underlying 0.25% convertible senior notes	7,590	7,590
Add: Shares underlying 0.875% convertible senior notes		13,108
Dilutive weighted average shares outstanding	93,259	109,009
	Quarter Ended January 31,	
	2007	2008
EPS		
Basic EPS	\$ 0.13	\$ 0.33
Diluted EPS	\$ 0.12	\$ 0.28

Explanation of Shares Excluded due to Anti-Dilutive Effect

For the first quarter of fiscal 2007 and fiscal 2008, the weighted average number of shares set forth in the table below, underlying outstanding stock options, employee stock purchase plan options, restricted stock units, and warrants, is considered anti-dilutive because the exercise price of these equity awards is greater than the average per share closing price on the NASDAQ Stock Market during this period. In addition, the weighted average number of shares underlying Ciena's previously outstanding 3.75% convertible notes, are considered anti-dilutive pursuant to SFAS 128 because the related interest expense on a per common share if converted basis exceeds Basic EPS for the period.

The following table summarizes the shares excluded from the calculation of the denominator for Basic and Diluted EPS due to their anti-dilutive effect for the periods indicated (in thousands):

	Quarter Ended January 31,	
	2007	2008
Shares excluded from EPS Denominator due to anti-dilutive effect		
Shares underlying stock options, restricted stock units and warrants	4,760	3,209
3.75% convertible notes	742	742
Total excluded due to anti-dilutive effect	5,502	3,951

(13) STOCKHOLDERS EQUITY*Call Spread Option*

Ciena holds two call spread options on its common stock relating to the shares issuable upon conversion of two issues of its convertible notes. These call spread options are designed to mitigate exposure to potential dilution from the conversion of the notes. Ciena purchased a call spread option relating to the 0.25% Convertible Senior Notes due May 1, 2013 for \$28.5 million during the second quarter of fiscal 2006. Ciena purchased a call spread option relating to the 0.875% Convertible Senior Notes due June 15, 2017 for \$42.5 million during the third quarter of fiscal 2007. In each case, the call spread options were purchased at the time of the notes offering from an affiliate of the underwriter. The cost of each call spread option was recorded as a reduction in paid in capital. For deductions associated with Ciena's equity compensation, credits to paid-in capital will be recorded when those tax benefits are used to reduce taxes payable.

Each call spread option is exercisable, upon maturity of the relevant issue of convertible notes, for such number of shares of Ciena common stock issuable upon conversion of that series of notes in full. Each call spread option has a lower strike price equal to the conversion price for the notes and a higher strike price that serves to cap the amount of dilution protection provided. At its election, Ciena can exercise the call spread options on a net cash basis or a net share basis. The value of the consideration of a net share settlement will be equal to the value upon a net cash settlement and can range from \$0, if the market price per share of Ciena common stock upon exercise is equal to or below the lower strike price, to approximately \$45.7 million (in the case of the April 2006 call spread option) or approximately \$76.1 million (in the case of the June 2007 call spread), if the market price per share of Ciena common stock upon exercise is at or above the higher strike price. If the market price on the date of exercise is between the lower strike price and the higher strike price, in lieu of a net settlement, Ciena may elect to receive the full number of shares underlying the call spread option by paying the aggregate option exercise price, which is equal to the original principal outstanding on that series of notes. Should there be an early unwind of the call spread option, the amount of cash or shares to be received by Ciena will depend upon the existing overall market conditions, and on Ciena's stock price, the volatility of Ciena's stock and the remaining term of the call spread option. The number of shares subject to the call spread options and the lower and higher strike prices are subject to customary adjustments.

(14) SHARE-BASED COMPENSATION EXPENSE

Ciena Corporation 2000 Equity Incentive Plan

The Ciena Corporation 2000 Equity Incentive Plan (the "2000 Plan") is a shareholder-approved plan that was assumed by Ciena as a result of its merger with ONI. It authorizes the issuance of stock options, restricted stock, restricted stock units and stock bonuses to employees, officers, directors, consultants, independent contractors and advisors. The Compensation Committee of the Board of Directors has broad discretion to establish the terms and conditions for equity awards, including number of shares, vesting conditions and any required service or other performance criteria. The maximum term of any award under the 2000 Plan is ten years. The exercise price of options may not be less than 85% of the fair market value of the stock at the date of grant, or 100% of the fair market value for qualified options.

Under the terms of the 2000 Plan, the number of shares authorized for issuance will increase by 5.0% of the number of Ciena shares issued and outstanding on January 1 of each year, unless the Compensation Committee reduces the amount of the increase in any year. No additional shares were added to the Plan as a result of this provision in 2005, 2006 or 2007. In addition to the evergreen provision, any shares subject to outstanding awards under the ONI 1997 Stock Plan, ONI 1998 Equity Incentive Plan, or ONI 1999 Equity Incentive Plan that are forfeited or cancelled shall become available for issuance under the 2000 Plan. As of January 31, 2008, there were 2.7 million shares authorized and available for issuance under the 2000 Plan.

Stock Options

Outstanding stock option awards to employees are generally subject to service-based vesting restrictions and vest incrementally over a four-year period, with awards subject to 12 months of accelerated vesting upon a change in control. The following table is a summary of Ciena's stock option activity for the periods indicated (shares in thousands):

	Options	Weighted Average Exercise Price
Balance as of October 31, 2006	7,110	48.52
Granted	695	32.47
Exercised	(1,507)	23.04
Canceled	(427)	41.52
Balance as of October 31, 2007	5,871	53.67
Granted	342	35.38
Exercised	(62)	23.36
Canceled	(142)	71.94
Balance as of January 31, 2008	6,009	\$ 52.50

The total intrinsic value of options exercised during the first three months of fiscal 2007 and fiscal 2008 was \$1.3 million and \$1.1 million, respectively. The weighted average fair value of each stock option granted by Ciena in the first three months of fiscal 2007 and 2008 was \$15.67 and \$17.92, respectively.

The following table summarizes information with respect to stock options outstanding at January 31, 2008, based on Ciena's closing stock price of \$26.41 per share on the last trading day of Ciena's first quarter of fiscal 2008 (shares and intrinsic value in thousands):

Options Outstanding at January 31, 2008						Vested Options at January 31, 2008

Assumptions for Option-Based Awards under SFAS 123(R)

Edgar Filing: CIENA CORP - Form 10-Q

Ciena recognizes the fair value of service-based options as stock-based compensation expense on a straight-line basis over the requisite service period. Ciena estimates the fair value of each option award on the date of grant using the Black-Scholes option-pricing model, with the following weighted average assumptions:

	Quarter Ended January 31,			
	2007		2008	
Expected volatility	55.8%		53.0%	
Risk-free interest rate	4.6%	5.0%	3.1%	3.6%
Expected life (years)	6.0	6.4	5.1	5.3
Expected dividend yield	0.0%		0.0%	

Consistent with SFAS 123(R) and SAB 107, Ciena considered the implied volatility and historical volatility of its stock price in determining its expected volatility, and, finding both to be equally reliable, determined that a combination of both would result in the best estimate of expected volatility.

The risk-free interest rate assumption is based upon observed interest rates appropriate for the term of Ciena's employee stock options.

The expected life of employee stock options represents the weighted-average period the stock options are expected to remain outstanding. Because Ciena considered its options to be plain vanilla, it calculated the expected term using the simplified method as prescribed in SAB 107 for fiscal 2007. Under SAB 107, options are considered to be plain vanilla if they have the following basic characteristics: they are granted at-the-money; exercisability is conditioned upon service through the vesting date; termination of service prior to vesting results in forfeiture; there is a limited exercise period following termination of service; and the options are non-transferable and non-hedgeable. Beginning in fiscal 2008, as prescribed by SAB 107, Ciena gathered more detailed historical information about specific exercise behavior of its grantees, which it used to determine the expected term.

The dividend yield assumption is based on Ciena's history and expectation of dividend payouts.

Because share-based compensation expense is recognized only for those awards that are ultimately expected to vest, the amount of share-based compensation expense recognized reflects a reduction for estimated forfeitures. Ciena estimates forfeitures at the time of grant and revises those estimates in subsequent periods based upon new or changed information. Ciena relies upon historical experience in establishing forfeiture rates. If actual forfeitures differ from current estimates, total unrecognized share-based compensation expense will be adjusted for future changes in estimated forfeitures.

Restricted Stock Units

A restricted stock unit is a stock award that entitles the holder to receive shares of Ciena common stock as the unit vests. Ciena's outstanding restricted stock unit awards are subject to service-based vesting conditions and/or performance-based vesting conditions. Awards subject to service-based conditions typically vest in increments over a four-year period. Awards with performance-based vesting conditions require the achievement of certain operational, financial or other performance criteria or targets as a condition of vesting, or acceleration of vesting, of such awards.

The aggregate intrinsic value of Ciena's restricted stock units is based on Ciena's closing stock price on the last trading day of each period as indicated. The following table is a summary of Ciena's restricted stock unit activity for the periods indicated, with the aggregate intrinsic value of the balance outstanding for each period, based on Ciena's closing stock price on the last trading day of the relevant period (shares and fair value in thousands):

	Restricted Stock Units Outstanding	Weighted Average Grant Date Fair Value Per Share	Aggregate Intrinsic Value
Balance as of October 31, 2006	162	\$22.99	\$ 3,829
Granted	1,216		
Vested	(176)		
Canceled or forfeited	(67)		
Balance as of October 31, 2007	1,135	27.94	53,236
Granted	1,009		
Vested	(238)		
Canceled or forfeited	(48)		
Balance as of January 31, 2008	1,858	\$31.88	\$49,070

The total fair value of restricted stock units that vested and were converted into common stock during the first three months of fiscal 2007 and fiscal 2008 was \$0.5 million, and \$8.3 million, respectively. The weighted average fair value of each restricted stock unit granted by Ciena in the first three months of fiscal 2007 and 2008 was \$27.88 and \$35.19, respectively.

Assumptions for Restricted Stock Unit Awards under SFAS 123(R)

The fair value of each restricted stock unit award is estimated using the intrinsic value method which is based on the closing price on the date of grant. Share-based expense for service-based restricted stock unit awards is recognized, net of estimated forfeitures, ratably over the vesting period on a straight-line basis.

Share-based expense for performance-based restricted stock unit awards, net of estimated forfeitures, is recognized ratably over the performance period based upon Ciena's determination of whether it is probable that the performance targets will be achieved. At each reporting period, Ciena reassesses the probability of achieving the performance targets and the performance period required to meet those targets. The estimation of whether the performance targets will be achieved involves judgment, and the estimate of expense is revised periodically based on the probability of achieving the performance targets. Revisions are reflected in the period in which the estimate is changed. If any performance goals are not met, no compensation cost is ultimately recognized against that goal and, to the extent previously recognized, compensation cost is reversed.

2003 Employee Stock Purchase Plan

In March 2003, Ciena shareholders approved the 2003 Employee Stock Purchase Plan (the ESPP), which has a ten-year term and originally authorized the issuance of 2.9 million shares. At the 2005 annual meeting, Ciena shareholders approved an amendment increasing the number of shares available to 3.6 million and adopting an evergreen provision that on December 31 of each year provides for an increase in the number of shares available by up to 0.6 million shares, provided that the total number of shares available shall not exceed 3.6 million. Pursuant to the evergreen provision, the maximum number of shares that may be added to the ESPP during the remainder of its ten-year term is 2.9 million.

Under the ESPP, eligible employees may enroll in an offer period during certain open enrollment periods. New offer periods begin March 16 and September 16 of each year.

Prior to the offer period commencing September 15, 2006, (i) each offer period consisted of four six-month purchase periods during which employee payroll deductions were accumulated and used to purchase shares of common stock; and (ii) the purchase price of the shares was 15% less than the fair market value on either the first day of an offer period or the last day of a purchase period, whichever was lower. In addition, if the fair market value on the purchase date was less than the fair market value on the first day of an offer period, then participants automatically commenced a new offer period.

On May 30, 2006, the Compensation Committee amended the ESPP, effective September 15, 2006, to shorten the offer period under the ESPP to six months. As a result of this change, the offer period and any purchase period will be the same six-month period. Under the amended ESPP, the applicable purchase price equals 95% of the fair market value of Ciena common stock on the last day of each purchase period. Employees enrolled with offer periods commenced prior to September 15, 2006, will be permitted to complete the remaining purchase periods in their current offer period. These amendments were intended to enable the ESPP to be considered a non-compensatory plan under FAS 123(R) for future offering periods.

The following table is a summary of ESPP activity for the periods indicated (shares and fair value in thousands):

	ESPP shares available for issuance	Intrinsic value at exercise date
Balance as of October 31, 2005	3,264	
Evergreen provision	307	
Issued March 15, 2006	(335)	8,662
Issued September 15, 2006	(260)	4,610
Balance as of October 31, 2006	2,976	
Evergreen provision	571	
Issued March 15, 2007	(119)	1,137
Issued September 14, 2007	(45)	\$ 581
Balance as of October 31, 2007	3,383	
Evergreen provision	188	
Balance as of January 31, 2008	3,571	

The amendments to the ESPP for offer periods on or after September 15, 2006 were intended to enable the ESPP to be considered a non-compensatory plan under FAS 123(R) for future offering periods. For offer periods that commenced prior to September 15, 2006, however, fair value is determined as of the grant date, using the graded

vesting approach. Under the graded vesting approach, the 24-month ESPP offer period, which consists of four six-month purchase periods, is treated for valuation purpose as four separate option tranches with individual lives of six, 12, 18 and 24 months, each commencing on the initial grant date. Each tranche is expensed straight-line over its individual life.

Share-Based Compensation Recognized under SFAS 123(R) for the first three months of Fiscal 2007 and Fiscal 2008

22

The following table summarizes share-based compensation expense for the periods indicated (in thousands):

	Quarter Ended January 31,	
	2007	2008
Product costs	\$ 221	\$ 565
Service costs	193	246
Stock-based compensation expense included in cost of sales	414	811
Research and development	743	1,177
Sales and marketing	1,040	2,464
General and administrative	1,000	2,209
Stock-based compensation expense included in operating expense	2,783	5,850
Stock-based compensation expense capitalized in inventory, net	92	220
Total stock-based compensation	\$ 3,289	\$ 6,881

As of January 31, 2008, total unrecognized compensation expense was: (i) \$19.2 million, which relates to unvested stock options and is expected to be recognized over a weighted-average period of 2.0 years; and (ii) \$53.7 million, which relates to unvested restricted stock units and is expected to be recognized over a weighted-average period of 2.0 years.

(15) COMPREHENSIVE INCOME

The components of comprehensive income were as follows (in thousands):

	Quarter Ended January 31,	
	2007	2008
Net income	\$ 11,056	\$ 28,807
Change in unrealized loss on available-for-sale securities	(505)	538
Change in accumulated translation adjustments	(162)	1,287
Total comprehensive income	\$ 10,389	\$ 30,632

(16) ENTITY WIDE DISCLOSURES

The following table reflects Ciena's geographic distribution of revenue based on the location of the purchaser. Revenue attributable to geographic regions outside of the United States is reflected as International revenue, with any country accounting for greater than 10% of total revenue in the period specifically identified. For the periods below, Ciena's geographic distribution of revenue was as follows (in thousands, except percentage data):

	Quarter Ended January 31,			
	2007	%*	2008	%*
United States	\$ 119,603	72.4	\$ 169,518	74.5
United Kingdom	20,646	12.5	23,182	10.2
International	24,852	15.1	34,716	15.3

total revenue

(17) CONTINGENCIES

Foreign Tax Contingencies

Ciena has received assessment notices from the Mexican tax authorities asserting deficiencies in payments between 2001 and 2005 related primarily to income taxes and import taxes and duties. Ciena has filed judicial petitions appealing these assessments. As of October 31, 2007 and January 31, 2008, Ciena had accrued liabilities of \$0.9 million and \$1.0 million, respectively, related to these contingencies, which are reported as a component of other current accrued liabilities. As of January 31, 2008, Ciena estimates that it could be exposed to possible losses of up to \$5.9 million, for which it has not accrued liabilities. Ciena has not accrued these liabilities because it does not believe that such losses are more likely than not to be incurred. Ciena continues to evaluate the likelihood of probable and reasonably possible losses, if any, related to these assessments. As a result, future increases or decreases to accrued liabilities may be necessary and will be recorded in the period when such amounts are probable and estimable.

Litigation

On January 31, 2008, Ciena Corporation and Northrop Grumman Guidance and Electronics Company (previously named Litton Systems, Inc.) entered into an agreement to settle patent litigation between the parties pending in the United States District Court for the Central District of California. A description of this litigation and the history of the proceedings can be found in Item 3. Legal Proceedings of Part I of Ciena's Annual Report on Form 10-K filed with the Securities and Exchange Commission on December 27, 2007. Pursuant to the settlement agreement, Ciena made a \$7.7 million payment and agreed to indemnify the plaintiff, should it be unable to collect compensatory damages awarded, if any, in a final judgment in its favor against a specified Ciena supplier. This obligation is specific to this litigation and, while there is no maximum amount payable, Ciena's obligation is limited to plaintiff's collection of that portion of any compensatory damages award that relates to the supplier's sale of infringing products to Ciena. Ciena has determined the fair value of this guarantee to be insignificant.

As a result of its merger with ONI Systems Corp. in June 2002, Ciena became a defendant in a securities class action lawsuit. Beginning in August 2001, a number of substantially identical class action complaints alleging violations of the federal securities laws were filed in the United States District Court for the Southern District of New York. These complaints name ONI, Hugh C. Martin, ONI's former chairman, president and chief executive officer; Chris A. Davis, ONI's former executive vice president, chief financial officer and administrative officer; and certain underwriters of ONI's initial public offering as defendants. The complaints were consolidated into a single action, and a consolidated amended complaint was filed on April 24, 2002. The amended complaint alleges, among other things, that the underwriter defendants violated the securities laws by failing to disclose alleged compensation arrangements (such as undisclosed commissions or stock stabilization practices) in the initial public offering's registration statement and by engaging in manipulative practices to artificially inflate the price of ONI's common stock after the initial public offering. The amended complaint also alleges that ONI and the named former officers violated the securities laws on the basis of an alleged failure to disclose the underwriters' alleged compensation arrangements and manipulative practices. No specific amount of damages has been claimed. Similar complaints have been filed against more than 300 other issuers that have had initial public offerings since 1998, and all of these actions have been included in a single coordinated proceeding. Mr. Martin and Ms. Davis have been dismissed from the action without prejudice pursuant to a tolling agreement. In July 2004, following mediated settlement negotiations, the plaintiffs, the issuer defendants (including Ciena), and their insurers entered into a settlement agreement, whereby the plaintiffs' cases against the issuers would be dismissed, the insurers would agree to guarantee a recovery by the plaintiffs from the underwriter defendants of at least \$1 billion, and the issuer defendants would agree to assign or surrender to the plaintiffs certain claims the issuers may have against the underwriters. The settlement agreement did not require Ciena to pay any amount toward the settlement or to make any other payments. In October 2004, the district court certified a class with respect to the Section 10(b) claims in six focus cases selected out of all of the consolidated cases, which cases did not include Ciena, and which decision was appealed by the underwriter defendants to the U.S. Court of Appeals for the Second Circuit. On February 15, 2005, the district court granted the motion filed by the plaintiffs and issuer defendants for preliminary approval of the settlement agreement, subject to certain modifications to the proposed bar order, and on August 31, 2005, the district court issued a preliminary order approving the revised stipulated settlement agreement. On December 5, 2006, the U.S. Court of Appeals for the Second Circuit vacated the district court's grant of class certification in the six focus cases. On April 6, 2007, the Second Circuit denied plaintiffs' petition for rehearing. In light of the Second Circuit's decision, the parties agreed that the settlement could not be approved. On June 25, 2007, the district court approved a stipulation filed by the plaintiffs and the issuer defendants terminating the proposed settlement. On August 14, 2007, the plaintiffs filed second amended complaints against the defendants in the six focus cases, as well as a set of amended master allegations against the other issuer defendants, including changes to the definition of the purported class of investors. On September 27, 2007, the plaintiffs filed a motion for class certification based on their amended complaints and allegations. On November 12, 2007, the defendants in the six focus cases moved to dismiss the second amended complaints and, on December 21, 2007, the same defendants filed an opposition to the motion for class certification. Due to the inherent uncertainties of litigation, Ciena cannot accurately predict the ultimate outcome of the matter at this time.

In addition to the matters described above, Ciena is subject to various legal proceedings, claims and litigation arising in the ordinary course of its business. Ciena does not expect that the ultimate costs to resolve these matters will have a material effect on its results of operations, financial position or cash flows.

(18) SUBSEQUENT EVENT

On January 22, 2008, Ciena entered into an Agreement and Plan of Merger with World Wide Packets, Inc., a Delaware corporation (" WWP "), Wolverine Acquisition Subsidiary, Inc., a Delaware corporation and wholly owned subsidiary of Ciena (" Merger Sub "), and Daniel Reiner, as Stockholders' Representative. On March 3, 2008, Ciena completed its acquisition of WWP. Pursuant to the merger agreement, Merger Sub was merged with and into WWP, with WWP continuing as the surviving corporation and a wholly owned subsidiary of Ciena. Upon the closing of the merger, all of the outstanding shares of WWP common stock and preferred stock were exchanged for approximately 2.5 million shares of Ciena common stock and approximately \$196.7 million in cash. Of this amount, \$20.0 million in cash and 340,000 shares of Ciena common stock were placed into escrow for a period of one year as security for the indemnification obligations of WWP stockholders under the merger agreement. Upon the closing, Ciena also assumed all then outstanding WWP options and substituted for them options to acquire approximately 0.9 million shares of Ciena common stock. Ciena assumed all outstanding liabilities of WWP as a result of the merger, including approximately \$11.3 million in outstanding debt. Ciena also paid transaction costs of WWP of approximately \$10.3 million. WWP is a supplier of communications network equipment that enables the cost-effective delivery of a wide variety of Carrier Ethernet-based services. Prior to the merger, WWP was a privately held company.

As a result of this acquisition, Ciena expects to record a charge for in-process research and development and record intangible assets related to existing technology, customer relationships, customer contracts, customer order backlog, and non-competition agreements with employees. Ciena expects to complete its tangible and intangible asset and liability assessments associated with this acquisition during the second quarter of fiscal 2008.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Some of the statements contained, or incorporated by reference, in this quarterly report discuss future events or expectations, contain projections of results of operations or financial condition, changes in the markets for our products and services, or state other forward-looking information. Ciena's forward-looking information is based on various factors and was derived using numerous assumptions. In some cases, you can identify these forward-looking statements by words like may, will, should, expects, plans, anticipates, believes, estimates, predicts, potential or continue or the negative of those words and other comparable words. You should be aware that these statements only reflect our current predictions and beliefs. These statements are subject to known and unknown risks, uncertainties and other factors, and actual events or results may differ materially. Important factors that could cause our actual results to be materially different from the forward-looking statements are disclosed throughout this report, particularly under the heading Risk Factors in Item 1A of Part II of this report below. You should review these risk factors and the rest of this quarterly report in combination with the more detailed description of our business in our annual report on Form 10-K, which we filed with the Securities and Exchange Commission on December 27, 2007, for a more complete understanding of the risks associated with an investment in Ciena's securities. Ciena undertakes no obligation to revise or update any forward-looking statements.

Overview

Ciena Corporation is a supplier of communications networking equipment, software and services that support the transport, switching, aggregation and management of voice, video and data traffic. Our products are used, individually or as part of an integrated solution, in communications networks operated by telecommunications service providers, cable operators, governments and enterprises around the globe. Our products facilitate the cost-effective delivery of enterprise and consumer-oriented communication services. Through our FlexSelect Architecture, we specialize in transitioning legacy communications networks to converged, next-generation architectures, better able to handle increased traffic and to deliver more efficiently a broader mix of high-bandwidth communications services. By improving network productivity, reducing costs and enabling integrated service offerings, our converged Ethernet infrastructure and broadband access products create business and operational value for our customers.

Acquisition of World Wide Packets

On January 22, 2008, we entered into a merger agreement with World Wide Packets, Inc. ("WWP"), a provider of communications network equipment that enables the cost-effective delivery of a variety of Carrier Ethernet-based services. WWP designs products for the access and aggregation tiers of communications networks and its products are typically deployed in metro and access networks. We completed this acquisition on March 3, 2008, subsequent to the end of our first quarter of fiscal 2008. We believe that this transaction will improve our time to market with carrier Ethernet products and allow us to reach new customers and customer segments, while strengthening our position within existing customer networks. We also believe that this acquisition will enable us to penetrate additional application segments, including Ethernet business services, wireless backhaul, and Ethernet infrastructure for high-bandwidth services such as IPTV and triple play. See Note 18 to the financial statements included in Item 1 of Part 1 of this report for additional information related to the nature and amount of merger consideration paid, and Risk Factors in Item 1A of Part II of this report, for a discussion of certain risks associated with this transaction. We expect that our acquisition of WWP will be dilutive to our fiscal 2008 earnings and expect to record a charge for in-process research and development and record intangible assets related to WWP's existing technology, customer relationships, customer contracts, customer order backlog, and non-competition agreements with employees.

Financial Results

Growth in reliance upon communications services by consumers and enterprises, as well as new, high-bandwidth applications and services, continue to drive increases in network capacity requirements. The resulting broader mix of high-volume traffic is driving a transition from legacy network infrastructures to more efficient, simplified, Ethernet-based network architectures. We believe that our FlexSelect Architecture and Ethernet/IP-related enhancements to our product portfolio have enabled us to benefit from both increasing capacity requirements and investment by our customers in more efficient and economical communications network architectures.

Revenue for the first quarter of fiscal 2008 was \$227.4 million, representing a 5.2% increase from \$216.2 million for the fourth quarter of fiscal 2007 and a 37.7% increase from \$165.1 million for first quarter of fiscal 2007. The

sequential increase was due primarily to higher sales of converged Ethernet infrastructure products and the market conditions described above. Our international revenue decreased from \$67.3 million, or 31.1% of total revenue, in the fourth quarter of fiscal 2007 to \$57.9 million, or 25.5% of total revenue in the first quarter of fiscal 2008. The nature of our business exposes us to the possibility of quarterly fluctuation in revenue during fiscal 2008. A sizable portion of our revenue comes from sales to a small number of telecommunications service providers for large communication network builds. These projects are generally characterized by large and sporadic equipment orders and contract terms that can result in the recognition or deferral of significant amounts of revenue in a given quarter. The level of demand for our products, the timing and size of equipment orders, our ability to deliver products to fulfill those orders, and the timing of product acceptance for revenue recognition all contribute to and can cause fluctuations in our revenue on a quarterly basis.

Consolidation within the telecommunications industry and among several of our largest customers continues to affect our concentration of revenue. For the first quarter of 2008, two customers each accounted for greater than 10% of our revenue and 43.5% in the aggregate. We believe that our results illustrate our success in leveraging our incumbent position within our large carrier customers. However, concentration of our revenue exposes us to additional risks, including greater pricing pressure and increased susceptibility to changes in customers' network strategy or reductions in their capital expenditures.

Gross margin for the first quarter of fiscal 2008 was 51.3%, up from 50.5% for the fourth quarter of fiscal 2007 and 44.6% in the first quarter of fiscal 2007. Services gross margin for the first quarter of fiscal 2008 was 24.1%, an improvement from the levels achieved during fiscal 2007. By focusing on the development and sale of Ethernet-based, software-intensive products that enable flexible, cost-effective delivery of higher value communications services we seek to sustain recent gross margin improvements. Our gross margin, however, may be lower in future periods and continues to be susceptible to quarterly fluctuation due to a number of factors, including product and customer mix during the period, our ability to drive further product cost reductions, the level of pricing pressure we encounter, the effect of changes in our services gross margin, the introduction of new products or entry into new markets, charges for excess and obsolete inventory and changes in warranty costs.

Operating expense for the first quarter of fiscal 2008 was \$98.2 million, an increase from \$82.0 million for the fourth quarter of fiscal 2007 and \$70.8 million in the first quarter of fiscal 2007. This increase reflects a \$7.7 million patent litigation settlement during the first quarter of fiscal 2008 and the effect of a \$4.9 million gain on lease settlement during the fourth quarter of fiscal 2007. We expect our ongoing operating expense to increase during fiscal 2008 to support growth of the business through research and development initiatives geared toward expanding our addressable market and extending the portfolio of the WWP products recently acquired, as well as additional sales resources.

Management believes that our income from operations, exclusive of the operating expense items specifically noted above, demonstrates continued improvement in our core operating performance, even though we experienced a decrease from \$27.1 million for the fourth quarter of fiscal 2007 to \$18.4 during the first quarter of fiscal 2008. Net income was similarly affected by the items noted above, as well as a \$6.2 million sequential decrease in interest income due to lower interest rates on investment balances. Net income decreased from \$30.4 million, or \$0.30 per diluted share, for the fourth quarter of fiscal 2007, to \$28.8 million, or \$0.28 per diluted share, for the first quarter of fiscal 2008. Net income for the fourth quarter of fiscal 2007 reflected a \$13.0 million loss related to investments in commercial paper issued by two structured investment vehicles (SIVs) that entered into receivership during the fourth quarter of fiscal 2007.

We generated \$13.7 million in cash from operations during the first quarter of fiscal 2008, consisting of \$56.1 million in cash from net income (adjusted for non-cash charges) and a \$42.4 million net use of cash resulting from changes in working capital. This compares with \$11.3 million in cash generated from operations during the fourth quarter of fiscal 2007, consisting of \$61.4 million in cash from net income (adjusted for non-cash charges) and a \$50.1 million net use of cash resulting from changes in working capital.

During the first quarter of fiscal 2008, we paid the remaining principal balance of \$542.3 million upon maturity of our 3.75% convertible notes. Giving effect to this payment, we had \$922.3 million in cash and cash equivalents and \$293.6 million short-term and long-term investments in marketable debt securities at January 31, 2008. See "Critical Accounting Policies and Estimates - Investments" below for information relating to the loss we recognized during the fourth quarter of 2007 related to our investments in commercial paper issued by two structured investment vehicles and the remaining \$33.9 million included in long-term investments at January 31, 2008 related to these investments.

As of January 31, 2008, head count was 1,853, an increase from 1,797 at October 31, 2007 and an increase from 1,588 at January 31, 2007.

Results of Operations

In this report we discuss our revenue in three major groupings as follows:

1. *Converged Ethernet Infrastructure*. This group incorporates our transport and switching products and packet interworking products and related software.
2. *Ethernet access*. This group includes our broadband and Ethernet access products and related software.
3. *Global Network Services*. This group reflects services, support and training activities.

Cost of goods sold consists of component costs, direct compensation costs, warranty and other contractual obligations, royalties, license fees, direct technical support costs, cost of excess and obsolete inventory and overhead related to manufacturing, technical support, and engineering, furnishing and installation (EF&I) operations.

Three months ended January 31, 2007 compared to three months ended January 31, 2008

Revenue, cost of goods sold and gross profit

The table below (in thousands, except percentage data) sets forth the changes in revenue, cost of goods sold and gross profit for the periods indicated:

	Quarter Ended January 31,				Increase	
	2007	%*	2008	%*	(decrease)	%**
Revenue:						
Products	\$ 146,282	88.6	\$ 201,790	88.7	\$ 55,508	37.9
Services	18,819	11.4	25,626	11.3	6,807	36.2
Total revenue	165,101	100.0	227,416	100.0	62,315	37.7
Costs:						
Products	74,979	45.4	91,387	40.2	16,408	21.9
Services	16,494	10.0	19,460	8.6	2,966	18.0
Total cost of goods sold	91,473	55.4	110,847	48.7	19,374	21.2
Gross profit	\$ 73,628	44.6	\$ 116,569	51.3	\$ 42,941	58.3

Revenue

Product revenue increased primarily due to a \$53.7 million increase in sales of our converged Ethernet infrastructure products. We believe that our converged Ethernet infrastructure revenue has benefitted from both increasing network capacity requirements and customer transition to more efficient and economical network architectures. Increased converged Ethernet revenue reflects a \$31.1 million increase in sales of core switching products, an \$18.1 million increase in core transport products and a \$4.5 million increase in sales of our CN 4200 FlexSelect Advanced Service Platform.

Services revenue increased primarily due to a \$4.6 million increase in deployment service sales and a \$2.7 million increase in maintenance and support services, reflecting higher sales volume and increased installation activity.

United States revenue increased primarily due to a \$43.5 million increase in sales of converged Ethernet infrastructure products. This primarily reflects a \$25.6 million increase in sales of core switching products and a \$16.1 million increase in core transport products.

International revenue increased primarily due to a \$10.2 million increase in sales of converged Ethernet infrastructure products. This primarily reflects a \$5.5 million increase in sales of core switching products and a \$2.0 million increase in core transport products.

Gross profit

Gross profit as a percentage of revenue increased primarily due to product gross margin improvements and, to a lesser extent, an increase in services gross margin. Our gross margin may be lower in future periods and is susceptible to quarterly fluctuation due to a number of factors, including product and customer mix during the period, our ability to drive further product cost reductions, the level of pricing pressure we encounter, the effect of changes in our services gross margin, the introduction of new products or entry into new markets, charges for excess and obsolete inventory and changes in warranty costs.

Gross profit on products as a percentage of product revenue increased primarily due to favorable product and customer mix, significant product cost reductions, improved manufacturing efficiencies, and lower warranty expense.

Gross profit on services as a percentage of services revenue increased significantly as a result of favorable services mix, specifically related to sales and maintenance contracts, as well as improved deployment efficiencies. While we experienced a significant improvement in over the levels achieved in fiscal 2007, services gross margin is heavily dependent upon the mix of services in a given period and may fluctuate from quarter to quarter.

Operating expense

The table below (in thousands, except percentage data) sets forth the changes in operating expense for the periods indicated:

	Quarter Ended January 31,					
	2007	%*	2008	%*	Increase (decrease)	%**
Research and development	\$ 29,853	18.1	\$ 35,444	15.6	\$ 5,591	18.7
Selling and marketing	24,875	15.1	33,608	14.8	8,733	35.1
General and administrative	10,291	6.2	22,628	10.0	12,337	119.9
Amortization of intangible assets	6,295	3.8	6,470	2.8	175	2.8
Restructuring recoveries	(466)	(0.3)		0.0	466	(100.0)

Total operating expenses	\$ 70,848	42.9	\$ 98,150	43.2	\$ 27,302	38.5
--------------------------	-----------	------	-----------	------	-----------	------

* Denotes % of total revenue

** Denotes % change from 2007 to 2008

Research and development expense increased due to higher employee compensation cost of \$4.1 million, primarily due to growth in headcount at our India development center, and a \$1.0 million increase in consulting expense.

Selling and marketing expense increased primarily due a \$5.1 million increase in employee compensation, which primarily reflects increased headcount. Other increases included \$1.1 million in consulting expense, \$0.7 million in travel expense, and \$0.6 million in marketing and demonstration systems.

General and administrative expense increased due to increased legal expense of \$8.2 million, primarily related to a \$7.7 million settlement of patent litigation. Employee compensation also increased by \$2.8 million, which reflects a \$1.2 million increase in stock compensation cost.

Amortization of intangible assets costs increased slightly due to the purchase of certain developed technology during the fourth quarter of fiscal 2007.

Restructuring recoveries during fiscal 2007 primarily reflect adjustments related to the return to use of previously restructured facilities.

Other items

The table below (in thousands, except percentage data) sets forth the changes in other items for the periods indicated:

	Quarter Ended January 31,				Increase (decrease)	%**
	2007	%*	2008	%*		
Interest and other income, net	\$ 14,845	9.0	\$ 19,082	8.4	\$ 4,237	28.5
Interest expense	\$ 6,148	3.7	\$ 7,358	3.2	\$ 1,210	19.7
Provision for income taxes	\$ 421	0.3	\$ 1,336	0.6	\$ 915	217.3

* Denotes % of total revenue

** Denotes % change from 2007 to 2008

Interest and other income, net increased due to higher average cash and investment balances resulting from the proceeds of our June 11, 2007 issuance of 0.875% convertible senior notes, partially offset by lower interest rates on investment balances. We expect interest income to decrease as a result of our repayment of our 3.75% convertible notes at maturity during the first quarter of fiscal 2008 and lower interest rates on investment balances.

Interest expense increased primarily due to interest associated with our June 11, 2007 issuance of 0.875% convertible senior notes. We expect interest expense to decrease as a result of our repayment of the our 3.75% convertible notes at maturity during the first quarter of fiscal 2008.

Provision for income taxes increased primarily due to increased federal and state tax expense. This increase is largely reduced, except for any alternative minimum tax, by recognizing tax benefits for deferred tax assets that were previously reserved against by a valuation allowance. However, to the extent any of these benefits relate to deferred tax assets from certain acquisitions, the benefit is recorded by reducing intangible assets rather than tax expense. We will continue to maintain a valuation allowance against all remaining net deferred tax assets until sufficient evidence exists to support its reversal. See Critical Accounting Policies and Estimates Deferred Tax Valuation Allowance below for information relating to this valuation allowance and the conditions required for the release of our valuation allowance.

Liquidity and Capital Resources

At January 31, 2008, our principal sources of liquidity were cash and cash equivalents, short-term investments in marketable debt securities and cash from operations. The following table summarizes our cash and cash equivalents and investments in marketable debt securities (in thousands):

	October 31, 2007	January 31, 2008	Increase (decrease)
Cash and cash equivalents	\$ 892,061	\$ 922,306	\$ 30,245
Short-term investments in marketable debt securities	822,185	259,643	(562,542)
Long-term investments in marketable debt securities	33,946	33,946	
Total cash and cash equivalents and investments in marketable debt securities	\$ 1,748,192	\$ 1,215,895	\$ (532,297)

The decrease in total cash and cash equivalents and investments in marketable debt securities at January 31, 2008 was primarily related to the repayment at maturity of our 3.75% convertible notes for \$542.3 million. This was partially offset by our net income during the first three months of fiscal 2008 and the effect of the non-cash items described in *Operating Activities* below. Based on past performance and current expectations, we believe that our cash and cash equivalents, investments in marketable debt securities and cash generated from operations will satisfy our working capital needs, capital expenditures, the payment of the merger consideration in our WWP transaction, and other liquidity requirements associated with our existing operations through at least the next 12 months.

Included in long-term investments in marketable debt securities at October 31, 2007 and January 31, 2008 is approximately \$33.9 million in investments in commercial paper issued by two SIVs that entered into receivership during the fourth quarter of fiscal 2007 and failed to make payment at maturity. Due to the mortgage-related assets that they hold, each of these entities has been exposed to adverse market conditions that have affected the value of their collateral, their ability to access short-term funding and the liquidity and value of our investment. These investments are no longer trading and have no readily determinable market value. Based on our assessment of fair value, as of October 31, 2007, we recognized realized losses of \$13.0 million related to these investments during the fourth quarter of fiscal 2007. We are not aware of any other marketable debt securities that have experienced a similar decline. There were no changes relating to these investments or other events during the first quarter of 2008 that resulted in a change in the fair value of these investments, however, we may realize further reductions in fair value, additional losses or a complete loss of these investments. See *Critical Accounting Policies and Estimates Investments*, below for additional information regarding our determination of the fair value of these investments. Subsequent to the end of the first quarter of fiscal 2008, we received a \$2.3 million initial payment from Rhinebridge LLC, one of the SIVs above, representing 15.5% of our outstanding principal amount of commercial paper investment in this SIV. We have been informed by the receivers of Rhinebridge LLC that this initial payment does not reflect the total amount that we should expect to receive in respect of our investment.

The following sections review the significant activities that had an impact on our cash during the first three months of fiscal 2008.

Operating Activities

The following tables set forth (in thousands) significant components of our \$13.7 million of cash generated by operating activities for the first three months of fiscal 2008:

Net income

	Three Months Ended January 31, 2008
Net income	\$ 28,807

Our net income for the first three months of fiscal 2008 included the significant non-cash items summarized in the following table (in thousands):

	Three Months Ended January 31, 2008
Depreciation and amortization of leasehold improvements	3,949
Share-based compensation costs	6,881
Amortization of intangible assets	7,438
Deferred tax provision	471
Provision for inventory excess and obsolescence	5,794
Provision for warranty	2,914
Total significant non-cash charges	\$ 27,447

Accounts Receivable, Net

Cash consumed by accounts receivable, net increased by \$40.6 million from the end of fiscal 2007 through the first three months of fiscal 2008. Our days sales outstanding (DSOs) increased from 48 days for fiscal 2007 to 57 days for the first quarter of fiscal 2008. Our accounts receivable balance and our DSOs both increased due to a proportionately higher volume of shipments made later in the first quarter of fiscal 2008.

The following table sets forth (in thousands) changes to our accounts receivable, net of allowance for doubtful accounts receivable, from the end of fiscal 2007 through the first three months of fiscal 2008:

	October 31, 2007	January 31, 2008	Increase (decrease)
Accounts receivable, net	\$ 104,078	\$ 144,639	\$ 40,561

Inventory

Excluding the non-cash effect of a \$5.8 million provision for excess and obsolescence, cash consumed by inventory for the first three months of fiscal 2008 was \$6.7 million. Ciena's inventory turns increased from 3.3 for fiscal 2007 to 3.5 for the first three months of fiscal 2008. The following table sets forth (in thousands) changes to the components of our inventory from the end of fiscal 2007 through the first three months of fiscal 2008:

	October 31, 2007	January 31, 2008	Increase (decrease)
Raw materials	\$ 28,611	\$ 27,858	\$ (753)
Work-in-process	4,123	4,504	381
Finished goods	96,054	100,781	4,727
Gross inventory	128,788	133,143	4,355
Provision for inventory excess and obsolescence	(26,170)	(29,623)	(3,453)
Inventory	\$ 102,618	\$ 103,520	\$ 902

Accounts payable

During the first three months of fiscal 2008, our accounts payable balance increased by \$11.0 million primarily due to inventory received during the last few weeks of the quarter. The following table sets forth (in thousands) changes in our accounts payable from the end of fiscal 2007 through end of the first three months of fiscal 2008:

	October 31, 2007	January 31, 2008	Increase (decrease)
Accounts payable	\$ 55,389	\$ 66,385	\$ 10,996

Interest Payable on Ciena's Convertible Notes

The final \$10.2 million interest payment on Ciena's 3.75% convertible notes, due February 1, 2008, was paid during the first quarter of fiscal 2008.

Interest on Ciena's outstanding 0.25% convertible senior notes, due May 1, 2013, is payable on May 1 and November 1 of each year, commencing on November 1, 2006.

Interest on Ciena's outstanding 0.875% convertible senior notes, due June 15, 2017, is payable on June 15 and December 15 of each year, commencing on December 15, 2007. Ciena paid \$2.2 million in interest on the 0.875% convertible notes during the first quarter of fiscal 2008.

The indentures governing our outstanding convertible notes do not contain any financial covenants. The indentures provide for customary events of default, including payment defaults, breaches of covenants, failure to pay certain judgments and certain events of bankruptcy, insolvency and reorganization. If an event of default occurs and is continuing, the principal amount of the notes, plus accrued and unpaid interest, if any, may be declared immediately due and payable. These amounts automatically become due and payable if an event of default relating to certain events of bankruptcy, insolvency or reorganization occurs. For additional information about our convertible notes, see Note 11 to our financial statements included in Item 1 of Part I of this report.

The following table reflects (in thousands) the balance of interest payable and the change in this balance from the end of fiscal 2007 through the first three months of fiscal 2008.

	October 31, 2007	January 31, 2008	Increase (decrease)
Accrued interest payable	\$ 6,998	\$ 782	\$ (6,216)

Deferred revenue

During the first three months of fiscal 2008, deferred revenue decreased by \$1.4 million. Product deferred revenue represents payments received in advance of shipment and payments received in advance of our ability to recognize revenue. Services deferred revenue is related to payment for service contracts that will be recognized over the contract

term. The following table reflects (in thousands) the balance of deferred revenue and the change in this balance from the end of fiscal 2007 through the first three months of fiscal 2008:

34

	October 31, 2007	January 31, 2008	Increase (decrease)
Products	\$ 13,208	\$ 12,105	\$ (1,103)
Services	50,432	50,159	(273)
Total deferred revenue	\$ 63,640	\$ 62,264	\$ (1,376)

Financing Activities

During the first quarter of fiscal 2008, we paid the remaining principal balance of \$542.3 million upon maturity of our 3.75% convertible notes.

Contractual Obligations

On January 22, 2008, we entered into a definitive merger agreement with World Wide Packets, Inc. (WWP). Our acquisition of WWP was completed on March 3, 2008, following the first quarter of fiscal 2008. See Note 18 to our financial statements in Item 1 of Part 1 of this report for information relating to the closing of this merger, the nature and amount of merger consideration paid and the debt assumed in this transaction.

Except as described above, during the first quarter of fiscal 2008, we did not experience material changes, outside of the ordinary course of business, in our contractual obligations from those reported in our form 10-K for the year ended October 31, 2007. The following is a summary of our future minimum payments under contractual obligations as of January 31, 2008 (in thousands):

	Total	Less than one year	One to three years	Three to five years	Thereafter
Convertible notes	\$ 845,688	\$ 5,125	\$ 10,250	\$ 10,250	\$ 820,063
Operating leases (1)	67,193	13,240	20,609	14,856	18,488
Purchase obligations (2)	121,870	121,870			
Total (3)	\$ 1,034,751	\$ 140,235	\$ 30,859	\$ 25,106	\$ 838,551

- (1) The amount for operating leases above does not include insurance, taxes, maintenance and other costs required by the applicable operating lease. These costs are variable and are not expected to have a material impact.

- (2) Purchase obligations relate to purchase order commitments to our contract manufacturers and component suppliers for inventory. In certain instances, we are permitted to cancel, reschedule or adjust these orders. Consequently, only a portion of the amount reported above relates to firm, non-cancelable and unconditional obligations.
- (3) As of January 31, 2008, we had approximately \$6.0 million of other long-term obligations in our condensed consolidated balance sheet for unrecognized tax positions that are not included in this table because the periods of cash settlement with the respective tax authority cannot be reasonably estimated.

Edgar Filing: CIENA CORP - Form 10-Q

Some of our commercial commitments, including some of the future minimum payments set forth above, are secured by standby letters of credit. The following is a summary of our commercial commitments secured by standby letters of credit by commitment expiration date as of January 31, 2008 (in thousands):

	Total	Less than one year	One to three years	Three to five years	Thereafter
Standby letters of credit	\$ 23,719	\$ 4,177	\$ 19,542	\$	\$

Off-Balance Sheet Arrangements

Ciena does not engage in any off-balance sheet financing arrangements. In particular, we do not have any equity interests in so-called limited purpose entities, which include special purpose entities (SPEs) and structured finance entities.

Critical Accounting Policies and Estimates

The preparation of our consolidated financial statements requires that we make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expense, and related disclosure of contingent assets and liabilities. By their nature, these estimates and judgments are subject to an inherent degree of uncertainty. On an ongoing basis, we reevaluate our estimates, including those related to bad debts, inventories, investments, intangible assets, goodwill, income taxes, warranty obligations, restructuring, and contingencies and litigation. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Among other things, these estimates form the basis for judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. To the extent that there are material differences between our estimates and actual results, our consolidated financial statements will be affected.

We believe that the following critical accounting policies reflect those areas where significant judgments and estimates are used in the preparation of our consolidated financial statements.

Revenue Recognition

We recognize revenue in accordance with SAB No. 104, Revenue Recognition, which states that revenue is realized or realizable and earned when all of the following criteria are met: persuasive evidence of an arrangement exists; delivery has occurred or services have been rendered; the price to the buyer is fixed or determinable; and collectibility is reasonably assured. Customer purchase agreements and customer purchase orders are generally used to determine the existence of an arrangement. Shipping documents and customer acceptance, when applicable, are used to verify delivery. We assess whether the price is fixed or determinable based on the payment terms associated with the transaction and whether the sales price is subject to refund or adjustment. We assess collectibility based primarily on the creditworthiness of the customer as determined by credit checks and analysis, as well as the customer's payment history. In instances where final acceptance of the product, system, or solution is specified by the customer, revenue is deferred until all acceptance criteria have been met. Revenue for maintenance services is generally deferred and recognized ratably over the period during which the services are to be performed.

Some of our communications networking equipment is integrated with software that is essential to the functionality of the equipment. Accordingly, we account for revenue in accordance with SOP No. 97-2, Software Revenue Recognition, and all related interpretations. SOP 97-2 incorporates additional guidance unique to software arrangements incorporated with general accounting guidance, such as, revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collectibility is probable. In instances where final acceptance of the product is specified by the customer, revenue is deferred until all acceptance criteria have been met.

Arrangements with customers may include multiple deliverables, including any combination of equipment, services and software. If multiple element arrangements include software or software-related elements, we apply the provisions of SOP 97-2 to determine the amount of the arrangement fee to be allocated to those separate units of accounting. Multiple element arrangements that include software are separated into more than one unit of accounting if the functionality of the delivered element(s) is not dependent on the undelivered element(s), there is vendor-specific objective evidence of the fair value of the undelivered element(s), and general revenue recognition criteria related to the delivered element(s) have been met. The amount of product and services revenue recognized is affected by our judgments as to whether an arrangement includes multiple elements and, if so, whether vendor-specific objective evidence of fair value exists. Changes to the elements in an arrangement and our ability to establish vendor-specific objective evidence for those elements could affect the timing of revenue recognition. For all other deliverables, we apply the provisions of EITF 00-21, Revenue Arrangements with Multiple Deliverables. EITF 00-21 allows for separation of elements into more than one unit of accounting if the delivered element(s) have value to the customer on a stand-alone basis, objective and reliable evidence of fair value exists for the undelivered element(s), and delivery of the undelivered element(s) is probable and substantially within our control. Revenue is allocated to each unit of accounting based on the relative fair value of each accounting unit or using the residual method if objective evidence of fair value does not exist for the delivered element(s). The revenue recognition criteria described above is applied to each separate unit of accounting. If these criteria are not met, revenue is deferred until the criteria are met or the last

element has been delivered.

Our total deferred revenue for products was \$13.2 million and \$12.1 million as of October 31, 2007 and January 31, 2008, respectively. Our services revenue is deferred and recognized ratably over the period during which the services are to be performed. Our total deferred revenue for services was \$50.4 million and \$50.2 million as of October 31, 2007 and January 31, 2008, respectively.

Share-Based Compensation

We recognize share-based compensation expense in accordance with SFAS 123(R), *Share-Based Payments*, as interpreted by SAB 107. SFAS 123(R) requires the measurement and recognition of compensation expense for share-based awards based on estimated fair values on the date of grant. We estimate the fair value of each option-based award on the date of grant using the Black-Scholes option-pricing model. This option pricing model requires that we make several estimates, including the option's expected life and the price volatility of the underlying stock. The expected life of employee stock options represents the weighted-average period the stock options are expected to remain outstanding. Because we considered our options to be plain vanilla, we calculated the expected term using the simplified method as prescribed in SAB 107 for fiscal 2007. Under SAB 107, options are considered to be plain vanilla if they have the following basic characteristics: they are granted at-the-money; exercisability is conditioned upon service through the vesting date; termination of service prior to vesting results in forfeiture; there is a limited exercise period following termination of service; and the options are non-transferable and non-hedgeable. Beginning in fiscal 2008, as prescribed by SAB 107, we gathered more detailed historical information about specific exercise behavior of our grantees, which we used to determine expected term. We considered the implied volatility and historical volatility of our stock price in determining our expected volatility, and, finding both to be equally reliable, determined that a combination of both measures would result in the best estimate of expected volatility. We recognize the estimated fair value of option-based awards, net of estimated forfeitures, as stock-based compensation expense on a straight-line basis over the requisite service period.

We estimate the fair value of our restricted stock unit awards based on the fair value of our common stock on the date of grant. Our outstanding restricted stock unit awards are subject to service-based vesting conditions and/or performance-based vesting conditions. We recognize the estimated fair value of service-based awards, net of estimated forfeitures, as share-based expense ratably over the vesting period on a straight-line basis. Awards with performance-based vesting conditions require the achievement of certain financial or other performance criteria or targets as a condition to the vesting, or acceleration of vesting. We recognize the estimated fair value of performance-based awards, net of estimated forfeitures, as share-based expense over the performance period, using graded vesting, which considers each performance period or tranche separately, based upon our determination of whether it is probable that the performance targets will be achieved. At each reporting period, we reassess the probability of achieving the performance targets and the performance period required to meet those targets. Determining whether the performance targets will be achieved involves judgment, and the estimate of expense may be revised periodically based on changes in the probability of achieving the performance targets. Revisions are reflected in the period in which the estimate is changed. If any performance goals are not met, no compensation cost is ultimately recognized against that goal, and, to the extent previously recognized, compensation cost is reversed.

No tax benefits were attributed to the share-based compensation expense because a full valuation allowance was maintained for all net deferred tax assets.

Because share-based compensation expense is based on awards that are ultimately expected to vest, the amount of expense takes into account estimated forfeitures. SFAS 123(R) requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Changes in these estimates and assumptions can materially affect the measure of estimated fair value of our share-based compensation. See Note 14 to our financial statements in Item 1 of Part I of this report for information regarding our assumptions related to share-based compensation and the amount of share-based compensation expense we incurred for the periods covered in this report.

Reserve for Inventory Obsolescence

We make estimates about future customer demand for our products when establishing the appropriate reserve for excess and obsolete inventory. We write down inventory that has become obsolete or unmarketable by an amount equal to the difference between the cost of inventory and the estimated market value based on assumptions about future demand and market conditions. Inventory write downs are a component of our product cost of goods sold. Upon recognition of the write down, a new lower cost basis for that inventory is established, and subsequent changes in facts and circumstances do not result in the restoration or increase in that newly established cost basis. We recorded charges for excess and obsolete inventory of \$4.8 million and \$5.8 million in the first three months of fiscal 2007 and

2008 respectively. These charges were primarily related to excess inventory due to a change in forecasted product sales. In an effort to limit our exposure to delivery delays and to satisfy customer needs we purchase inventory based on forecasted sales across our product lines. In addition, part of our research and development strategy is to promote the convergence of similar features and functionalities across our product lines. Each of these practices exposes us to the risk that our customers will not order those products for which we have forecasted sales, or will purchase less than we have forecasted. Historically, we have experienced write downs due to changes in strategic direction, discontinuance of a product and declines in market conditions. If actual market conditions differ from those we have assumed, if there is a sudden and significant decrease in demand for our products, or if there is a higher incidence of inventory obsolescence due to a rapid change in technology, we may be required to take additional inventory write-downs and our gross margin could be adversely affected. Our inventory net of allowance for excess and obsolete was \$102.6 million and \$103.5 as of October 31, 2007 and January 31, 2008, respectively.

Restructuring

As part of our restructuring costs, we provide for the estimated cost of the net lease expense for facilities that are no longer being used. The provision is equal to the fair value of the minimum future lease payments under our contracted lease obligations, offset by the fair value of the estimated sublease payments that we may receive. As of January 31, 2008, our accrued restructuring liability related to net lease expense and other related charges was \$4.5 million. The total minimum lease payments for these restructured facilities are \$19.7 million. These lease payments will be made over the remaining lives of our leases, which range from one month to eleven years. If actual market conditions are different than those we have projected, we will be required to recognize additional restructuring costs or benefits associated with these facilities.

Allowance for Doubtful Accounts

Our allowance for doubtful accounts receivable is based on management's assessment, on a specific identification basis, of the collectibility of customer accounts. We perform ongoing credit evaluations of our customers and generally have not required collateral or other forms of security from customers. In determining the appropriate balance for our allowance for doubtful accounts receivable, management considers each individual customer account receivable in order to determine collectibility. In doing so, we consider creditworthiness, payment history, account activity and communication with such customer. If a customer's financial condition changes, or if actual defaults are higher than our historical experience, we may be required to take a charge for an allowance for doubtful accounts receivable which could have an adverse impact on our results of operations. Our accounts receivable net of allowance for doubtful accounts was \$104.1 million and \$144.6 as of October 31, 2007 and January 31, 2008, respectively. Our allowance for doubtful accounts as of October 31, 2007 and January 31, 2008 was \$0.1 million and \$0.2 million, respectively.

Goodwill

As of October 31, 2007 and January 31, 2008, our consolidated balance sheet included \$232.0 million in goodwill. This amount represents the remaining excess of the total purchase price of our acquisitions over the fair value of the net assets acquired. In accordance with SFAS 142, we test our goodwill for impairment on an annual basis, which we have determined to be the last business day of fiscal September each year. We also test our goodwill for impairment between annual tests if an event occurs or circumstances change that would, more likely than not, reduce the fair value of the reporting unit below its carrying value. No such event or circumstance occurred during the first quarter of fiscal 2008.

For fiscal 2007, we determined fair value of our single reporting unit to be equal to our market capitalization plus a control premium. Market capitalization was determined by multiplying the shares outstanding on the assessment date by the average market price of our common stock over a 10-day period before and a 10-day period after each assessment date. We use this 20-day duration to consider inherent market fluctuations that may affect any individual closing price. In determining fair value, we added a control premium which seeks to give effect to the increased consideration a potential acquirer may be required to pay in order to gain sufficient ownership to set policies, direct operations and make decisions related to our company to our market capitalization. For fiscal 2007, we used a 25% control premium in our goodwill assessment.

Our stock price is a significant factor in assessing our fair value for purposes of the goodwill impairment assessment. Our stock price can be affected by, among other things, changes in industry or market conditions, changes in our results of operations, and changes in our forecasts or market expectations relating to future results. In assessing whether there has been a triggering event for an interim impairment assessment, we consider indicators of impairment including fluctuations in stock price. If we suffer a sustained decline in our stock price and our market capitalization declines below our carrying value, we will assess whether the goodwill has been impaired. In this instance, our estimate of the appropriate control premium to apply in determining fair value could be an important variable in our goodwill impairment assessment. A significant impairment could result in additional charges and have a material adverse impact on our financial condition and operating results.

For fiscal 2007, Ciena performed an assessment of the fair value of its single reporting unit as of September 29, 2007 and our market capitalization, as determined above, was approximately \$3.6 billion, exceeding our carrying value at that date of \$0.9 billion. Because our market capitalization exceeded our carrying value without giving effect

to the control premium, our estimate of the control premium was not a determining factor in the outcome of impairment assessment. No goodwill impairment loss was recorded in fiscal 2007 because our carrying value, including goodwill, did not exceed fair value.

Intangible Assets

As of January 31, 2008, our consolidated balance sheet included \$59.2 million in other intangible assets, net. We account for the impairment or disposal of long-lived assets such as equipment, furniture, fixtures, and other intangible assets in accordance with the provisions of SFAS 144. In accordance with SFAS 144, we test each intangible asset for impairment whenever events or changes in circumstances indicate that the asset's carrying amount may not be recoverable. Valuation of our intangible assets requires us to make assumptions about future sales prices and sales volumes for our products that involve new technologies and uncertainties around customer acceptance of new products. If actual market conditions differ or our forecasts change, we may be required to record additional impairment charges in future periods. Such charges would have the effect of decreasing our earnings or increasing our losses in such period.

Investments

We have an investment portfolio comprised of marketable debt securities including short-term commercial paper, certificates of deposit, corporate bonds, asset-backed obligations and U.S. government obligations. The value of these securities is subject to market volatility for the period we hold these investments and until their sale or maturity. We recognize realized losses when we determine that declines in the fair value of our investments, below their cost basis, are other-than-temporary. In determining whether a decline in fair value is other-than-temporary, we consider various factors including market price (when available), investment ratings, the financial condition and near-term prospects of the investee, the length of time and the extent to which the fair value has been less than our cost basis, and our intent and ability to hold the investment until maturity or for a period of time sufficient to allow for any anticipated recovery in market value. We make significant judgments in considering these factors. If we judge that a decline in fair value is other-than-temporary, the investment is valued at the current fair value and a realized loss equal to the decline is reflected in net income, which could materially adversely affect our operating results.

During the fourth quarter of fiscal 2007, we determined that declines in the estimated fair value of our investments in certain commercial paper were other-than-temporary. This commercial paper was issued by SIV Portfolio plc (formerly known as Cheyne Finance plc) and Rhinebridge LLC, two structured investment vehicles (SIVs) that entered into receivership during the fourth quarter of fiscal 2007 and failed to make payment at maturity. Due to the mortgage-related assets that they hold, each of these entities has been exposed to adverse market conditions that have affected the value of their collateral and their ability to access short-term funding. We purchased these investments in the third quarter of fiscal 2007 and, at the time of purchase, each investment had a rating of A1+ by Standard and Poor's and P-1 by Moody's, their highest ratings respectively. These investments are no longer trading and have no readily determinable market value. We have reviewed current investment ratings, valuation estimates of the underlying collateral, company specific news and events, and general economic conditions in considering the fair value of these investments. In estimating fair value, we used a valuation approach based on a liquidation of assets held by each SIV and their subsequent distribution of cash. We utilized assessments of the underlying collateral from multiple indicators of value, which were then discounted to reflect the expected timing of disposition and market risks. Based on this assessment of fair value, as of October 31, 2007, we recognized realized losses of \$13.0 million related to these investments. Giving effect to these losses, our investment portfolio at October 31, 2007 included an estimated fair value of \$33.9 million in commercial paper issued by these entities. There were no changes relating to these investments or other events during the first quarter of 2008 that resulted in a change in the fair value of these investments at January 31, 2008.

As of January 31, 2008, our minority investments in privately held technology companies, reported in other assets, were \$6.7 million. These investments are generally carried at cost because we own less than 20% of the voting equity and do not have the ability to exercise significant influence over any of these companies. These investments are inherently high risk. The markets for technologies or products manufactured by these companies are usually early stage at the time of our investment and such markets may never materialize or become significant. We could lose our entire investment in some or all of these companies. We monitor these investments for impairment and make appropriate reductions in carrying values when necessary. If market conditions, the expected financial performance, or the competitive position of the companies in which we invest deteriorate, we may be required to record a charge in future periods due to impairment in their value.

Deferred Tax Valuation Allowance

As of January 31, 2008, we have recorded a valuation allowance fully offsetting our gross deferred tax assets of \$1.2 billion. We calculated the valuation allowance in accordance with the provisions of SFAS 109, Accounting for Income Taxes, which requires an assessment of both positive and negative evidence regarding the realizability of these deferred tax assets, when measuring the need for a valuation allowance. We record a valuation allowance to reduce our deferred tax assets to the amount that is more likely than not to be realized. In determining net deferred tax assets and valuation allowances, management is required to make judgments and estimates related to projections of profitability, the timing and extent of the utilization of net operating loss carryforwards, applicable tax rates, transfer pricing methodologies and tax planning strategies. The valuation allowance is reviewed quarterly and is maintained until sufficient positive evidence exists to support the reversal. Because evidence such as our operating results during

the most recent three-year period is afforded more weight than forecasted results for future periods, our cumulative loss during this three-year period represents sufficient negative evidence regarding the need for a full valuation allowance under SFAS 109. We will release this valuation allowance when management determines that it is more likely than not that our deferred tax assets will be realized. If we are able to sustain a meaningful level of profitability in future periods, and forecast sufficient earnings for periods thereafter, we may be required to release a significant portion of the valuation allowance. Any future release of valuation allowance will be recorded as a tax benefit increasing net income, an adjustment to acquisition intangibles, or an adjustment to paid-in capital. For the first three months of fiscal 2008, a \$0.5 million adjustment to acquisition intangibles was related to the release of valuation allowance associated with the recognition of deferred tax assets from prior acquisitions. Because we expect our recorded tax rate to increase in subsequent periods following a release of the valuation allowance, our net income would be affected in periods following the release. Any valuation allowance release will not affect the amount of cash paid for income taxes.

Warranty

Our liability for product warranties, included in other accrued liabilities, was \$33.6 million and \$33.9 million as of October 31, 2007 and January 31, 2008, respectively. Our products are generally covered by a warranty for periods ranging from one to five years. We accrue for warranty costs as part of our cost of goods sold based on associated material costs, technical support labor costs, and associated overhead. Material cost is estimated based primarily upon historical trends in the volume of product returns within the warranty period and the cost to repair or replace the equipment. Technical support labor cost is estimated based primarily upon historical trends and the cost to support the customer cases within the warranty period. The provision for product warranties was \$4.8 million and \$2.9 million in the first three months of fiscal 2007 and 2008 respectively. The provision for warranty claims may fluctuate on a quarterly basis depending upon the mix of products and customers in that period. If actual product failure rates, material replacement costs, service or labor costs differ from our estimates, revisions to the estimated warranty provision would be required. An increase in warranty claims or the related costs associated with satisfying these warranty obligations could increase our cost of sales and negatively affect our gross margin.

Uncertain Tax Positions

Effective at the beginning of the first quarter of 2008, we adopted FIN 48, Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109, which is a change in accounting for income taxes. FIN 48 contains a two-step approach to recognizing and measuring uncertain tax positions accounted for in accordance with SFAS No. 109, Accounting for Income Taxes. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon settlement. As a result of the implementation of FIN 48, we reduced the liability for net unrecognized tax benefits by \$0.1 million, and accounted for the reduction as a cumulative effect of a change in accounting principle that resulted in an increase to retained earnings of \$0.1 million and a decrease to income tax payable of \$0.1 million. As of January 31, 2008, we had approximately \$6.0 million recorded as other long-term obligations on our condensed consolidated balance sheet for uncertain tax positions in accordance with FIN 48. Significant judgment is required in evaluating our uncertain tax positions and determining our provision for income taxes. Although we believe our reserves are reasonable, no assurance can be given that the final tax outcome of these matters will not be different from that which is reflected in our historical income tax provisions and accruals. We adjust these reserves in light of changing facts and circumstances, such as the closing of a tax audit or the refinement of an estimate. To the extent that the final tax outcome of these matters is different than the amounts recorded, such differences will affect the provision for income taxes in the period in which such determination is made. The provision for income taxes includes the effect of reserve provisions and changes to reserves that are considered appropriate, as well as the related net interest.

Loss Contingencies

We are subject to the possibility of various losses arising in the ordinary course of business. These may relate to disputes, litigation and other legal actions. We consider the likelihood of loss or the incurrence of a liability, as well as our ability to reasonably estimate the amount of loss, in determining loss contingencies. A loss is accrued when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. We regularly evaluate current information available to us to determine whether any accruals should be adjusted and whether new accruals are required.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The following discussion about our market risk disclosures involves forward-looking statements. Actual results could differ materially from those projected in the forward-looking statements. We are exposed to market risk related to changes in interest rates and foreign currency exchange rates. We do not use derivative financial instruments for speculative or trading purposes.

Interest Rate Sensitivity. We maintain a short-term and long-term investment portfolio. See Note 4 to the financial statements in Item 1 of Part I of this report for information relating to the fair value of these investments. These available-for-sale securities are subject to interest rate risk and will fall in value if market interest rates increase. If market interest rates were to increase immediately and uniformly by 10% from levels at January 31, 2008, the fair value of the portfolio would decline by approximately \$9.2 million.

Foreign Currency Exchange Risk. As a global concern, we face exposure to adverse movements in foreign currency exchange rates. Because our sales are primarily denominated in U.S. dollars, the impact of foreign currency fluctuations on sales has not been material. Our primary exposures are related to non-U.S. dollar denominated operating expense in Canada, Europe, India and China. During the first three months of fiscal 2008, approximately 79.5% of our operating expense was U.S. dollar denominated. As of January 31, 2008, our assets and liabilities related to non-dollar denominated currencies were primarily related to intercompany payables and receivables. We do not expect an increase or decrease of 10% in the foreign exchange rate would have a material impact on our financial position. To date, we have not significantly hedged against foreign currency fluctuations. Should exposure to fluctuations in foreign currency become more significant, however, we may pursue hedging alternatives.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

As of the end of the period covered by this report, Ciena carried out an evaluation under the supervision and with the participation of Ciena's management, including Ciena's Chief Executive Officer and Chief Financial Officer, of Ciena's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended). Based upon this evaluation, Ciena's Chief Executive Officer and Chief Financial Officer concluded that Ciena's disclosure controls and procedures were effective as of the end of the period covered by this report.

Changes in Internal Control over Financial Reporting

There was no change in Ciena's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended) during the most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, Ciena's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

On January 31, 2008, Ciena Corporation and Northrop Grumman Guidance and Electronics Company (previously named Litton Systems, Inc.) entered into an agreement to settle patent litigation between the parties pending in the United States District Court for the Central District of California. A description of this litigation and the history of the proceedings can be found in Item 3. Legal Proceedings of Part I of our Annual Report on Form 10-K filed with the Securities and Exchange Commission on December 27, 2007. Pursuant to the settlement agreement, we made a \$7.7 million payment and agreed to indemnify the plaintiff, should it be unable to collect compensatory damages awarded, if any, in a final judgment in its favor against a specified Ciena supplier for that portion of any compensatory damages award that relates to the supplier's sale of infringing products to Ciena.

As a result of our merger with ONI Systems Corp. in June 2002, Ciena became a defendant in a securities class action lawsuit. Beginning in August 2001, a number of substantially identical class action complaints alleging violations of the federal securities laws were filed in the United States District Court for the Southern District of New York. These complaints name ONI, Hugh C. Martin, ONI's former chairman, president and chief executive officer; Chris A. Davis, ONI's former executive vice president, chief financial officer and administrative officer; and certain underwriters of ONI's initial public offering as defendants. The complaints were consolidated into a single action, and a consolidated amended complaint was filed on April 24, 2002. The amended complaint alleges, among other things, that the underwriter defendants violated the securities laws by failing to disclose alleged compensation arrangements (such as undisclosed commissions or stock stabilization practices) in the initial public offering's registration statement and by engaging in manipulative practices to artificially inflate the price of ONI's common stock after the initial public offering. The amended complaint also alleges that ONI and the named former officers violated the securities laws on the basis of an alleged failure to disclose the underwriters' alleged compensation arrangements and manipulative

practices. No specific amount of damages has been claimed. Similar complaints have been filed against more than 300 other issuers that have had initial public offerings since 1998, and all of these actions have been included in a single coordinated proceeding. Mr. Martin and Ms. Davis have been dismissed from the action without prejudice pursuant to a tolling agreement. In July 2004, following mediated settlement negotiations, the plaintiffs, the issuer defendants (including Ciena), and their insurers entered into a settlement agreement, whereby the plaintiffs' cases against the issuers would be dismissed, the insurers would agree to guarantee a recovery by the plaintiffs from the underwriter defendants of at least \$1 billion, and the issuer defendants would agree to assign or surrender to the plaintiffs certain claims the issuers may have against the underwriters.

The settlement agreement did not require Ciena to pay any amount toward the settlement or to make any other payments. In October 2004, the district court certified a class with respect to the Section 10(b) claims in six focus cases selected out of all of the consolidated cases, which cases did not include Ciena, and which decision was appealed by the underwriter defendants to the U.S. Court of Appeals for the Second Circuit. On February 15, 2005, the district court granted the motion filed by the plaintiffs and issuer defendants for preliminary approval of the settlement agreement, subject to certain modifications to the proposed bar order, and on August 31, 2005, the district court issued a preliminary order approving the revised stipulated settlement agreement. On December 5, 2006, the U.S. Court of Appeals for the Second Circuit vacated the district court's grant of class certification in the six focus cases. On April 6, 2007, the Second Circuit denied plaintiffs' petition for rehearing. In light of the Second Circuit's decision, the parties agreed that the settlement could not be approved. On June 25, 2007, the district court approved a stipulation filed by the plaintiffs and the issuer defendants terminating the proposed settlement. On August 14, 2007, the plaintiffs filed second amended complaints against the defendants in the six focus cases, as well as a set of amended master allegations against the other issuer defendants, including changes to the definition of the purported class of investors. On September 27, 2007, the plaintiffs filed a motion for class certification based on their amended complaints and allegations. On November 12, 2007, the defendants in the six focus cases moved to dismiss the second amended complaints. Due to the inherent uncertainties of litigation, we cannot accurately predict the ultimate outcome of the matter at this time.

In addition to the matters described above, we are subject to various legal proceedings, claims and litigation arising in the ordinary course of business. We do not expect that the ultimate costs to resolve these matters will have a material effect on our results of operations, financial position or cash flows.

Item 1A. Risk Factors

Investing in our securities involves a high degree of risk. In addition to the other information contained in this report, you should consider the following risk factors before investing in our securities.

Growth of our business could be adversely affected if improved conditions in our markets do not continue or if general economic conditions further weaken.

We have experienced considerable annual revenue growth in recent fiscal years, in part due to growing demand and improved conditions in our markets. Our business has benefited from increases in the amount of voice, video and data traffic transmitted over communications networks and spending by carriers to address capacity needs and offer additional consumer and enterprise services over more efficient, economical network architectures. It is not certain that these improved market conditions, the level of demand for our products or our success in competing in these markets will continue. Economic weakness, customer financial difficulties and constrained spending on communications networks have previously resulted, and may in the future result, in decreased demand and lower revenues. If growth in demand for bandwidth, or the adoption of new communications services, does not continue, or slows, or general economic conditions weaken, the growth of our business and our revenues could be adversely affected.

A small number of communications service provider customers account for a significant portion of our revenue, and the loss of any of these customers, or a significant reduction in their spending, would have a material adverse effect on our business, financial condition and results of operations.

A significant portion of our revenue is concentrated among a relatively small number of customers. Five customers collectively accounted for 65.3% of our fiscal 2007 revenue. For the first quarter of fiscal 2008, we had two customers that each accounted for greater than 10% of our revenue and 43.5% in the aggregate. Because a significant part of our revenue is concentrated among telecommunications service providers, our business could be exposed to risks associated with a market-wide change in business prospects, competitive pressures or other conditions affecting our carrier customers. The loss of, or significant reductions in spending by, one or more of our large carrier customers would have a material adverse effect on our business, financial condition and results of operations. Our concentration in revenue has increased, in part, as a result of consolidations among a number of our largest customers. These consolidations have resulted in increased concentration of customer purchasing power, which in turn may lead to constraints on pricing, fluctuations in revenue, increases in costs to meet demands of large customers and pressure to accept onerous contract terms. Consolidation may also result in fewer opportunities to participate in larger network

builds and could increase our exposure to changes in customer network strategy and reductions in customer capital expenditures. These conditions related to our concentration of revenue could adversely affect our profitability and results of operations.

We face intense competition that could hurt our sales and profitability.

The markets in which we compete for sales of networking equipment, software and services are extremely competitive, particularly the market for sales to communications service providers. Competition in these markets is based on any one or a combination of the following factors: price, product features and functionality, manufacturing capability and lead-times, incumbency and existing business relationships, scalability and the ability of products to meet the immediate and future network requirements of customers. A small number of very large companies have historically dominated our industry. These competitors have substantially greater financial, technical and marketing resources, greater manufacturing capacity and better established relationships with telecommunications carriers and other potential customers than we do. Consolidation activity among large networking equipment providers has caused some of our competitors to grow even larger, which may increase their strategic advantages. In recent years, Alcatel acquired Lucent, Nokia and Siemens combined their communications service provider businesses to create a new joint venture, and Ericsson acquired certain telecommunications business assets of Marconi. These transactions may adversely affect our competitive position.

We also compete with a number of smaller companies that provide significant competition for a specific product, application, customer segment or geographic market. These competitors often base their products on the latest available technologies. Due to the narrower focus of their efforts, these competitors may achieve commercial availability of their products more quickly and may be more attractive to customers.

Increased competition in our markets has resulted in aggressive business tactics, including:

- one-stop shopping options;

- significant price competition, particularly from competitors in Asia;

- customer financing assistance;

- early announcements of competing products and extensive marketing efforts;

- competitors offering equity ownership positions to customers;

- competitors offering to repurchase our equipment from existing customers;

- marketing and advertising assistance; and

- intellectual property assertions and disputes.

The tactics described above can be particularly effective in an increasingly concentrated base of potential customers such as communications service providers. If we fail to compete successfully in our markets, our sales and profitability would suffer.

Our revenue and operating results can fluctuate unpredictably from quarter to quarter.

Our revenue can fluctuate unpredictably from quarter to quarter. Fluctuations in our revenue can lead to even greater fluctuations in our operating results. Our budgeted expense levels depend in part on our expectations of future revenue. Any substantial adjustment to expense in order to account for lower levels of revenue is difficult and takes time. Consequently, if our revenue declines, our levels of inventory, operating expense and general overhead would be high relative to revenue, and this could result in operating losses.

Other factors contribute to fluctuations in our revenue and operating results, including:

- the level of demand for our products and the timing and size of customer orders, particularly from large telecommunications carrier customers;

- satisfaction of contractual acceptance criteria and related revenue recognition requirements;

- delays, changes to or cancellation of orders from customers;

the effects of consolidation of our customers, including increased exposure to any changes in network strategy and reductions in customer capital expenditures;

the availability of an adequate supply of components and sufficient manufacturing capacity;

the introduction of new products by us or our competitors;

changes in general economic conditions; and

readiness of customer sites for installation.

Many of these factors are beyond our control, particularly in the case of large carrier orders and multi-vendor or multi-technology network infrastructure builds where the achievement of certain performance thresholds for acceptance is subject to the readiness and performance of the customer or other providers, and changes in customer requirements or installation plans. As a consequence, our revenue and operating results for a particular quarter may be difficult to predict and our prior results are not necessarily indicative of results likely in future periods. Any one or a combination of the factors above may cause our revenue and operating results to fluctuate from quarter to quarter.

Our gross margin may fluctuate from quarter to quarter, which may adversely affect our level of profitability.

Our gross margin fluctuates from quarter to quarter and may be adversely affected by numerous factors, including:

customer, product and services mix in any period;

the effect of our services gross margin, which is generally lower than our product gross margin;

sales volume during the period;

increased price competition;

charges for excess or obsolete inventory;

changes in the price or availability of components for our products;

our ability to continue to reduce product manufacturing costs;

introduction of new products, with initial sales at relatively small volumes with resulting higher production costs; and

increased warranty or repair costs.

The factors that contribute to fluctuations in revenue and operating results can also significantly affect our gross margin. Fluctuations in gross margin may affect our level of profitability in any period. As a consequence, our gross margin for a particular quarter may be difficult to predict, and our prior results are not necessarily indicative of results likely in future periods.

Network equipment sales to large communications service providers often involve lengthy sales cycles and protracted contract negotiations and may require us to assume terms or conditions that negatively affect our pricing, payment terms and the timing of revenue recognition.

Our future success will depend in large part on our ability to maintain and expand our sales to large communications service providers. These sales typically involve lengthy sales cycles, protracted, and sometimes difficult, contract negotiations, and extensive product testing and network certification. We are sometimes required to assume contract terms or conditions that negatively affect pricing, payment terms and the timing of revenue recognition in order to consummate a sale. These terms may, in turn, negatively affect our revenue and results of operations and increase our susceptibility to quarterly fluctuations in our results. Communications service providers may ultimately insist upon terms and conditions that we deem too onerous or not in our best interest. Moreover, our purchase agreements generally do not require that a customer guarantee any minimum purchase level and customers often have the right to modify, delay, reduce or cancel previous orders. As a result, we may incur substantial expense and devote time and resources to potential relationships that never materialize or result in lower than anticipated sales.

We may encounter difficulty integrating World Wide Packets and may not be able to achieve the benefits we anticipate from our merger.

We recently completed our acquisition of World Wide Packets and are in the process of integrating its operations, systems, technologies, products, and personnel. Integration of acquired companies can be complex and exposes us to a variety of risks, including the possible loss of key personnel, disruption of product development efforts, difficulties with new suppliers, loss of customers and incorporation of financial reporting processes and related information systems. Moreover, World Wide Packets customers have included our competitors, some of whom are strategic partners that resell World Wide Packets products. There is no assurance that these companies will continue to be customers following the merger, and these relationships could give rise to unanticipated difficulties. In addition to these operational risks, we may ultimately be unable to achieve the strategic benefits we anticipate from this transaction and could be exposed to additional risks that could have a material adverse effect on our business, results of operations and financial condition. For example, under the merger we are succeeding to all known and unknown liabilities of World Wide Packets. These liabilities may include liabilities to stockholders, customers, suppliers or employees, as well as liabilities related to intellectual property disputes. Difficulties relating to our integration efforts, and exposure to additional liabilities or operational risks stemming from our merger with World Wide Packets, may make it difficult for us to achieve the benefits we anticipate from this merger.

Investment of research and development resources in technologies for which there is not a matching market opportunity, or failure to sufficiently or timely invest in technologies for which there is market demand, would adversely affect our revenue and profitability.

The market for communications networking equipment is characterized by rapidly evolving technologies and changes in market demand. To support the growth of our business, we continually invest research and development resources to enhance our existing products, create new products and develop or acquire new technologies. There is often a lengthy period between commencing these development initiatives and bringing the new or revised product to market, and, during this time, technology or the market may move in directions we had not anticipated. There is a significant possibility, therefore, that at least some of our development decisions will not turn out as anticipated, and that our investment in some projects will be unprofitable. There is also a possibility that we may miss a market opportunity because we fail to invest, or invest too late, in a new product or an enhancement of an existing product that could have been highly profitable. Changes in the market may also cause us to discontinue previously planned investments in products, which can have a disruptive effect on relationships with customers that were anticipating the availability of a new product or feature. If we fail to make the right investments and to make them at the right time, our competitive position may suffer and our revenue and profitability could be harmed.

We may be exposed to unanticipated risks and additional obligations in connection with our resale of complementary products or technology of other companies.

We have entered into agreements with strategic partners that permit us to distribute their products or technology. We rely upon these relationships to add complementary products or technologies or to fulfill an element of our product portfolio. As part of our strategy to diversify our product portfolio and customer base, we may enter into additional original equipment manufacturer (OEM) or resale agreements in the future. We may incur unanticipated costs or difficulties relating to our resale of third party products. Our third party relationships could expose us to risks associated with delays in their development, manufacturing or delivery of products or technology. We may also be required by customers to assume warranty, service and other commercial obligations greater than the commitments, if any, made to us by these technology partners. Some of our strategic partners are relatively small companies with limited financial resources. If they are unable to satisfy their obligations to us or our customers, we may have to expend our own resources to satisfy these obligations. Exposure to the risks above could harm our reputation with key customers and negatively affect our business and our results of operations.

Product performance problems could damage our business reputation and negatively affect our results of operations.

The development and production of equipment that addresses rapidly growing, multi-service communications network traffic is complicated. Due to their complexity, some of our products can be fully tested only when deployed in communications networks or with other equipment. As a result, new products or product enhancements can contain

undetected hardware or software errors at the time of release. We have introduced new or upgraded products recently and expect to continue to enhance and extend our product portfolio. Product performance problems are often more acute for initial deployments of new products and product enhancements. Unanticipated problems can relate to the design, manufacturing, installation or integration of our products. If we experience significant performance, reliability or quality problems with our products, or our customers suffer significant network restoration delays relating to these problems, a number of negative effects on our business could result, including:

- increased costs to address software or hardware defects;

- payment of liquidated damages or claims for damages for performance failures or delays;

- increased inventory obsolescence and warranty expense;

- delays in collecting accounts receivable;

- cancellation or reduction in orders from customers; and

- damage to our reputation or legal actions by customers or end users.

Product performance problems could damage our business reputation and negatively affect our business and results of operations.

We may be required to write off significant amounts of inventory as a result of our inventory purchase practices, the convergence of our product lines and our supplier transitions.

To avoid delays and meet customer demand for shorter delivery terms, we place orders with our contract manufacturers and suppliers to manufacture components and complete assemblies based on forecasts of customer demand. As a result, our inventory purchases expose us to the risk that our customers either will not order those products for which we have forecasted sales or will purchase fewer than the number of products we have forecasted. Our purchase agreements generally do not require that a customer guarantee any minimum purchase level, and customers often have the right to modify, reduce or cancel purchase quantities. As a result, we may purchase inventory based on forecasted sales and in anticipation of purchases that never come to fruition. Historically, our inventory write-offs have resulted from the circumstances above. As features and functionalities converge across our product lines, however, we face an increased risk that customers may elect to forego purchases of one product we have inventoried in favor of purchasing another product with similar functionality or application. We may be exposed to write-offs due to significant inventory purchases that we deem necessary as we transition from one supplier to another, or resulting from a supplier's decision to discontinue the manufacture of certain components. We may also be required to write off inventory as a result of the effect of evolving domestic and international environmental regulations. If we are required to write off or write down a significant amount of inventory due to the factors above or otherwise, our results of operations for the period would be materially adversely affected.

Shortages in component supply or manufacturing capacity could increase our costs, adversely affect our results of operations and constrain our ability to grow our business.

As we have expanded our use of contract manufacturers, broadened our product portfolio and increased sales volume in recent years, manufacturing capacity and supply constraints have become increasingly significant issues for us. We have encountered component shortages that have affected our operations and ability to deliver products in a timely manner. Growth in customer demand for the communications networking products supplied by us, our competitors and other third parties, has resulted in supply constraints among providers of some components used in our products. In addition, environmental regulations, such as RoHS, have resulted in, and may continue to give rise to, increased demand for compliant components. As a result, we may experience delays or difficulty obtaining compliant components from suppliers. Component shortages and manufacturing capacity constraints may also arise, or be exacerbated by difficulties with our suppliers or contract manufacturers, or our failure to adequately forecast our component or manufacturing needs. If shortages or delays occur or persist, the price of required components may increase, or the components may not be available at all. If we are unable to secure the components or subsystems that we require at reasonable prices, or are unable to secure adequate manufacturing capacity, we may experience delivery delays and may be unable to satisfy our contractual obligations to customers. These delays may cause us to incur liquidated damages to customers and negatively affect our revenue and gross margin. Shortages in component supply or manufacturing capacity could also limit our opportunities to pursue additional growth or revenue opportunities and could harm our business reputation and customer relationships.

We may not be successful in selling our products into new markets and developing and managing new sales channels.

We continue to take steps to sell our expanded product portfolio into new geographic markets and to a broader customer base, including enterprises, cable operators, wireless operators and federal, state and local governments. We have less experience in these markets and believe, in order to succeed in these markets, we must develop and manage new sales channels and distribution arrangements. We expect these relationships to be an increasingly important part of the growth of our business and our efforts to increase revenue. We may not be successful in reaching additional customer segments or expanding into new geographic regions and may be exposed to increased expense and business and financial risks associated with entering new markets and pursuing new customer segments. We may expend time, money and other resources on channel relationships that are ultimately unsuccessful. In addition, sales to federal, state and local governments require compliance with complex procurement regulations with which we have little experience. We may be unable to increase our sales to government contractors if we determine that we cannot comply with applicable regulations. Our failure to comply with regulations for existing contracts could result in civil, criminal

or administrative proceedings involving fines and suspension, or exclusion from participation in federal government contracts. Failure to manage additional sales channels effectively would limit our ability to succeed in these new markets and could adversely affect our ability to grow our customer base and revenue.

We may experience delays in the development and enhancement of our products that may negatively affect our competitive position and business.

Our products are based on complex technology, and we can experience unanticipated delays in developing, improving, manufacturing or deploying them. Each step in the development life cycle of our products presents serious risks of failure, rework or delay, any one of which could decrease the timing and cost-effective development of such products and could affect customer acceptance of such products. Intellectual property disputes, failure of critical design elements, and other execution risks may delay or even prevent the introduction of these products. Our development efforts may also be affected, particularly in the near term, by the transfer of some of our research and development activity to our facility in India. Modification of research and development strategies and changes in allocation of resources could also be disruptive to our development efforts. If we do not develop and successfully introduce products in a timely manner, our competitive position may suffer and our business, financial condition and results of operations would be harmed.

We must manage our relationships with contract manufacturers effectively to ensure that our manufacturing and production requirements are met.

We rely on contract manufacturers to perform the majority of the manufacturing operations for our products and components, and we are increasingly utilizing overseas suppliers, particularly in Asia. The qualification of our contract manufacturers is a costly and time-consuming process, and these manufacturers build products for other companies, including our competitors. We are constantly reviewing our manufacturing capability, including the work of our contract manufacturers, to ensure that our production requirements are met in terms of cost, capacity, quality and reliability. From time to time, we may decide to transfer the manufacturing of a product from one contract manufacturer to another, to better meet our production needs. Efforts to transfer to a new contract manufacturer or consolidate our use of suppliers may result in temporary increases in inventory volumes purchased in order to ensure continued supply. We may not effectively manage these contract manufacturer transitions, and our new contract manufacturers may not perform as well as expected. Our reliance upon contract manufacturers could also expose us to risks that could harm our business related to difficulties with lead times, on-time delivery, quality assurance and product changes required to meet evolving environmental standards and regulations. These risks can result in strategic harm to our business, including delays affecting our time to market for new or enhanced products. In addition, we do not have contracts in place with some of these providers and do not have guaranteed supply of components or manufacturing capacity. Our inability to effectively manage our relationships with our contract manufacturers, particularly overseas, could negatively affect our business and results of operations.

We depend on sole and limited source suppliers for some of our product components and the loss of a source, or a lack of availability of key components, could increase our costs and harm our customer relationships.

We depend on a limited number of suppliers for our product components and subsystems, as well as for equipment used to manufacture and test our products. Our products include several components for which reliable, high-volume suppliers are particularly limited. Some key optical and electronic components we use in our products are currently available only from sole or limited sources. As a result of this concentration in our supply chain, particularly for optical components, our business would be negatively affected if our suppliers were to experience any significant disruption in their operations affecting the price, quality, availability or timely delivery of components. Concentration in our supply chain can exacerbate our exposure to risks associated with vendors discontinuing the manufacture of certain components for our products. The loss of a source of supply, or lack of sufficient availability of key components, could require us to redesign products that use those components, which would increase our costs and negatively affect our product gross margin. The partial or complete loss of a sole or limited source supplier could result in lost revenue, added costs and deployment delays that could harm our business and customer relationships.

Our failure to manage our relationships with service delivery partners effectively could adversely impact our financial results and relationship with customers.

We rely on a number of service delivery partners, both domestic and international, to complement our global service and support resources. We rely upon third party service delivery partners for the installation of our equipment in some large network builds. These projects often include onerous customization, installation, testing and acceptance terms. In order to ensure the timely installation of our products and satisfaction of obligations to our customers, we

must identify, train and certify our partners. The certification of these partners can be costly and time-consuming, and these partners provide similar services for other companies, including our competitors. We may not be able to effectively manage our relationships with our partners and cannot be certain that they will be able to deliver services in the manner or time required. If our service partners are unsuccessful in delivering services:

we may suffer delays in recognizing revenue;

our services revenue and gross margin may be adversely affected; and

our relationship with customers could suffer.

Difficulties with service delivery partners could cause us to transition a larger share of deployment and other services from third parties to internal resources, thereby increasing our service overhead costs and negatively affecting our services gross margin and results of operations.

We may incur significant costs as a result of our efforts to protect and enforce our intellectual property rights or respond to claims of infringement from others.

Our business is dependent upon the successful protection of our proprietary technology and intellectual property. We are subject to the risk that unauthorized parties may attempt to access, copy or otherwise obtain and use our proprietary technology, particularly as we expand our product development into India and increase our reliance upon contract manufacturers in Asia. These and other international operations could expose us to a lower level of intellectual property protection than in the United States. Monitoring unauthorized use of our technology is difficult, and we cannot be certain that the steps that we are taking will prevent or minimize the risks of unauthorized use. If competitors are able to use our technology, our ability to compete effectively could be harmed.

In recent years, we have filed suit to enforce our intellectual property rights. From time to time we have also been subject to litigation and other third party intellectual property claims, including as a result of our indemnification obligations to customers or resellers that purchase our products. The frequency of these assertions is increasing as patent holders, including entities that are not in our industry and that purchase patents as an investment, use infringement assertions as a competitive tactic or as a source of additional revenue. Intellectual property claims can significantly divert the time and attention of our personnel and result in costly litigation. Intellectual property infringement claims can also require us to pay substantial damages or royalties, enter into costly license agreements or develop non-infringing technology. Accordingly, the costs associated with third party intellectual property claims could adversely affect our business, results of operations and financial condition.

Our international operations could expose us to additional risks and result in increased operating expense.

We market, sell and service our products globally. We have established offices around the world, including in North America, Europe, Latin America and the Asia Pacific region. We have also established a major development center in India and are increasingly relying upon overseas suppliers, particularly in Asia, for sourcing of components and contract manufacturing of our products. We expect that our international activities will be dynamic in the near term, and we may enter new markets and withdraw from or reduce operations in others. These changes to our international operations may require significant management attention and result in additional expense. In some countries, our success will depend in part on our ability to form relationships with local partners. Our inability to identify appropriate partners or reach mutually satisfactory arrangements for international sales of our products could impact our ability to maintain or increase international market demand for our products.

International operations are subject to inherent risks, including:

effects of changes in currency exchange rates;

greater difficulty in collecting accounts receivable and longer collection periods;

difficulties and costs of staffing and managing foreign operations;

the impact of economic changes in countries outside the United States;

less protection for intellectual property rights in some countries;

adverse tax and customs consequences, particularly as related to transfer-pricing issues;

social, political and economic instability;

trade protection measures, export compliance, qualification to transact business and other regulatory requirements; and

natural disasters and epidemics.

These and other factors related to our international operations may result in increased risk to our business and could give rise to unanticipated expense or other effects that could adversely affect our financial results.

Our use and reliance upon development resources in India may expose us to unanticipated costs or liabilities.

We have established a development center in India and expect to increase hiring of personnel for this facility. There is no assurance that our reliance upon development resources in India will enable us to achieve meaningful cost reductions or greater resource efficiency. Further, our development efforts and other operations in India involve significant risks, including:

difficulty hiring and retaining appropriate engineering resources due to intense competition for such resources and resulting wage inflation;

the knowledge transfer related to our technology and exposure to misappropriation of intellectual property or confidential information, including information that is proprietary to us, our customers and other third parties;

heightened exposure to changes in the economic, security and political conditions of India;

fluctuation in currency exchange rates and tax risks associated with international operations; and

development efforts that do not meet our requirements because of language, cultural or other differences associated with international operations, resulting in errors or delays.

Difficulties resulting from the factors above and other risks related to our operations in India could expose us to increased expense, impair our development efforts, harm our competitive position and damage our reputation.

Our exposure to the credit risks of our customers and resellers may make it difficult to collect receivables and could adversely affect our operating results and financial condition.

In the course of our sales to customers, we may have difficulty collecting receivables and could be exposed to risks associated with uncollectible accounts. We may be exposed to similar risks relating to third party resellers and other sales channel partners. While we monitor these situations carefully and attempt to take appropriate measures to protect ourselves, it is possible that we may have to write down or write off doubtful accounts. Such write-downs or write-offs could negatively affect our operating results for the period in which they occur, and, if large, could have a material adverse effect on our operating results and financial condition.

Efforts to restructure our operations and align our resources with market opportunities could disrupt our business and affect our results of operations.

Over the last several years, we have taken steps, including reductions in force, office closures, and internal reorganizations to reduce the size and cost of our operations and to better match our resources with our market opportunities. We may take similar steps in the future to improve efficiency and match our resources with market opportunities. Any such changes could be disruptive to our business and may result in the recording of accounting charges. These include inventory and technology-related write-offs, workforce reduction costs and charges relating to consolidation of excess facilities. If we are required to take a substantial charge related to any future restructuring activities, our results of operations would be adversely affected in the period in which we take such a charge.

If we are unable to attract and retain qualified personnel, we may be unable to manage our business effectively.

Competition to attract and retain highly skilled technical and other personnel with experience in our industry is increasing in intensity, and our employees have been the subject of targeted hiring by our competitors. We may experience difficulty retaining and motivating existing employees and attracting qualified personnel to fill key positions. It may be difficult to replace members of our management team or other key personnel, and the loss of such individuals could be disruptive to our business. Because we generally do not have employment contracts with our employees, we must rely upon providing competitive compensation packages and a high-quality work environment in order to retain and motivate employees. If we are unable to attract and retain qualified personnel, we may be unable to manage our business effectively.

We may be adversely affected by fluctuations in currency exchange rates.

To date, we have not significantly hedged against foreign currency fluctuations. Historically, our primary exposure to currency exchange rates has been related to non-U.S. dollar denominated operating expense in Europe, Asia and Canada where we sell primarily in U.S. dollars. With the growth of our international headcount, we have witnessed

increases in operating expense resulting from the weakening of the U.S. dollar. We expect these risks to continue as we further increase headcount in India.

As we increase our international sales and utilization of international suppliers, we may transact additional business in currencies other than the U.S. dollar. As a result, we would be subject to the possibility of greater effects of foreign exchange translation on our financial statements. For those countries outside the United States where we have significant sales, a devaluation in the local currency would make our products more expensive for customers to purchase or increase our operating costs, thereby adversely affecting our competitiveness. There can be no assurance that exchange rate fluctuations in the future will not have a material adverse effect on our revenue from international sales and, consequently, our business, operating results and financial condition.

Strategic acquisitions and investments may expose us to increased costs and unexpected liabilities.

We may acquire or make strategic investments in other companies to expand the markets we address and diversify our customer base. We may also engage in these transactions to acquire or accelerate the development of technology or products. To do so, we may use cash, issue equity that would dilute our current shareholders' ownership, incur debt or assume indebtedness. These transactions involve numerous risks, including:

- difficulty integrating the operations, technologies and products of the acquired companies;

- diversion of management's attention;

- difficulty completing projects of the acquired company and costs related to in-process projects;

- the loss of key employees of the acquired company;

- amortization expenses related to intangible assets and charges associated with impairment of goodwill;

- ineffective internal controls over financial reporting;

- dependence on unfamiliar supply partners; and

- exposure to unanticipated liabilities, including intellectual property infringement claims.

As a result of these and other risks, any acquisitions or strategic investments may not reap the intended benefits and may ultimately have a negative impact on our business, results of operation and financial condition.

Changes in government regulation could lead our customers to reduce investment in their communications networks which would reduce the size of our market and could adversely affect our business.

The Federal Communications Commission, or FCC, has jurisdiction over the U.S. communications industry and similar agencies have jurisdiction over the communication industries in other countries. Many of our most important customers are subject to the rules and regulations of these agencies. Changes in regulatory requirements in the United States or other countries could inhibit service providers from investing in their communications network infrastructures and thus could adversely affect the sale of our products. Changes in regulatory tariff requirements or other regulations relating to pricing or terms of carriage on communications networks could slow the expansion of network infrastructures and adversely affect our business, operating results, and financial condition.

The investment of our substantial cash balance and our investments in marketable debt securities are subject to risks which may cause losses and affect the liquidity of these investments.

At January 31, 2008, we had \$922.3 million in cash and cash equivalents and \$293.6 million in investments in marketable debt securities. We have historically invested these amounts in corporate bonds, asset-backed obligations, commercial paper, securities issued by the United States, certificates of deposit and money market funds meeting certain criteria. These investments are subject to general credit, liquidity, market and interest rate risks, which may be exacerbated by U.S. sub-prime mortgage defaults that have affected various sectors of the financial markets and caused credit and liquidity issues. During the fourth quarter of fiscal 2007, we determined that declines in the fair value of certain of our investments in commercial paper issued by two structured investment vehicles (SIVs) were other-than-temporary. Each of these SIVs entered receivership during our fourth quarter of fiscal 2007 and subsequently failed to make payment at maturity. We recognized realized losses of \$13.0 million related to these

investments during the fourth quarter of fiscal 2007 and, as of January 31, 2008, estimated the fair value of these investments at \$33.9 million. We may recognize further realized losses in the fair value of these investments or a complete loss of these investments. Additional losses would have a negative effect on our net income. Information and the markets relating to investments that hold mortgage-related assets as collateral remain dynamic. There may be further declines in the value of these investments and the value of the collateral held by these entities. As a result, we may experience a reduction in value or loss of liquidity of other investments. In addition, should our other investments cease paying or reduce the amount of interest paid to us, our interest income would suffer. These market risks associated with our investment portfolio may have a negative adverse effect on our results of operations, liquidity and financial condition.

We may be required to take further write-downs of goodwill and other intangible assets.

As of January 31, 2008, we had \$232.0 million of goodwill on our balance sheet. This amount primarily represents the remaining excess of the total purchase price of our acquisitions over the fair value of the net assets acquired. At January 31, 2008, we had \$59.2 million of other intangible assets on our balance sheet. The amount primarily reflects purchased technology from our acquisitions. At January 31, 2008, goodwill and other intangible assets represented approximately 15.2% of our total assets. During the fourth quarter of 2005, we incurred a goodwill impairment charge of approximately \$176.6 million and an impairment of other intangibles of \$45.7 million. If we are required to record additional impairment charges related to goodwill and other intangible assets, such charges would have the effect of decreasing our earnings or increasing our losses in such period. If we are required to take a substantial impairment charge, our operating results could be materially adversely affected in such period.

Failure to maintain effective internal controls over financial reporting could have a material adverse effect on our business, operating results and stock price.

Section 404 of the Sarbanes-Oxley Act of 2002 requires that we include in our annual report a report containing management's assessment of the effectiveness of our internal controls over financial reporting as of the end of our fiscal year and a statement as to whether or not such internal controls are effective. Compliance with these requirements has resulted in, and is likely to continue to result in, significant costs and the commitment of time and operational resources. Growth of our business, including our broader product portfolio and increased transaction volume, will necessitate ongoing changes to our internal control systems, processes and information systems. We are actively engaged in updating or reengineering certain important business processes to address the growth of our operations and to improve efficiency. Our increasingly global operations, including our development facility in India and offices abroad, pose additional challenges to our internal control systems as their operations become more significant. Each of these changes to our operations and our processes creates additional business risks. We cannot be certain that our current design for internal control over financial reporting will be sufficient to enable management or our independent registered public accounting firm to determine that our internal controls are effective for any period, or on an ongoing basis. If we or our independent registered public accounting firms are unable to assert that our internal controls over financial reporting are effective, our business may be harmed. Market perception of our financial condition and the trading price of our stock may be adversely affected, and customer perception of our business may suffer.

Obligations associated with our outstanding indebtedness on our convertible notes may adversely affect our business.

At January 31, 2008, indebtedness on our outstanding convertible notes totaled \$800 million in aggregate principal. Our indebtedness and repayment obligations could have important negative consequences, including:

- increasing our vulnerability to general adverse economic and industry conditions;

- limiting our ability to obtain additional financing;

- reducing the availability of cash resources for other purposes, including capital expenditures;

- limiting our flexibility in planning for, or reacting to, changes in our business and the markets in which we compete; and

- placing us at a possible competitive disadvantage to competitors that have better access to capital resources.

We may also add additional indebtedness such as equipment loans, working capital lines of credit and other long term debt.

Our business is dependent upon the proper functioning of our information systems and upgrading these systems may result in disruption to our business, operating processes and internal controls.

The efficient operation of our business is dependent on the successful operation of our information systems. In particular, we rely on our information systems to process financial information, manage inventory and administer our sales transactions. In an effort to improve the efficiency of our operations, achieve greater automation and support the growth of our business, we are in the process of upgrading certain information systems and have recently implemented a new version of our Oracle management information system. We anticipate that we will have to modify a number of operational processes and internal control procedures as a result of this upgrade. Any material disruption, malfunction or similar problems with our information systems could have a negative effect on our business and results of operations in the period affected. In addition, in recent years, we have experienced a considerable growth in transaction volume, headcount and reliance upon international resources in our operations. Our information systems need to be sufficiently scalable to support the continued growth of our operations and the efficient management of our business. If our information system resources are inadequate, we may be required to undertake costly upgrades and the growth of our business could be harmed.

Our stock price is volatile.

Our common stock price has experienced substantial volatility in the past and may remain volatile in the future. Volatility can arise as a result of a number of the factors discussed in this **Risk Factors** section, as well as divergence between our actual or anticipated financial results and published expectations of analysts, and announcements that we, our competitors, or our customers may make.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Not applicable.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Submission of Matters to a Vote of Security Holders

Not applicable.

Item 5. Other Information

Not applicable.

Item 6. Exhibits

Exhibit Description

- 2.1(1) Agreement and Plan of Merger, dated January 22, 2008, among Ciena Corporation, Wolverine Acquisition Subsidiary, Inc., World Wide Packets, Inc. and Daniel Reiner, as Stockholders Representative.
- 31.1 Certification of Chief Executive Officer Pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934 as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Chief Financial Officer Pursuant to Rule 13a-14(a) under the Securities Exchange Act of 1934 as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of Chief Executive Officer Pursuant to 18 U.S.C. Section 1350 as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2 Certification of Chief Financial Officer Pursuant to 18 U.S.C. Section 1350 as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

- * Represents management contract or compensatory plan or arrangement
- (1) Incorporated by reference to Exhibit 2.1 of Ciena's Current Report on Form 8-K filed on January 24, 2008.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
